Hem'orrhage, accident'al. See *Hemorrhage.* **H., ac'tive,** see *Hemorrhage.* **H., adynam'ic,** see *Hemorrhage.* **H., alve'olar,** H. that takes place from a tooth after extraction. **H., ante-par'tum,** see *Ante-partum.* **H., arte'rial,** see *Hemorrhage.* **H. from the blad'der,** cystirrhagia. **H., bronch'ial,** bronchorrhagia. **H., buc'cal,** stomatorrhagia. **H., car'diac,** hæmocardiorrhagia. **H., cere'bral,** see *Apoplexy.* **H., chorioïd'al,** C. hemorrhage. **H., concealed,** H. in uterus between its parietes and the ovum. **H., consec'utive,** H., secondary. **H., constitu'tional,** see *Hemorrhage.* **H., crit'ical,** see *Hemorrhage.* **H. by exhala'tion,** see *Hemorrhage.* **H., exter'nal,** see *Hemorrhage.* **H., funic'ular,** H. from umbilical cord. **H., gas'tric,** gastrorrhagia. **H., gen'eral,** see *Hemorrhage.* **H. of heart,** hæmocardiorrhagia. **H., inev'itable,** H., unavoidable. **H., inter'nal,** see *Hemorrhage.* **H., interstit'ial,** H. into connective tissue; apoplexy. **H., intes'tinal,** hæmatochezia; enterorrhagia; melæna. **H., intracra'nial,** H. within the skull. **H., intrarhachid'ian** or **intraspi'nal,** hæmatorrhachis. **H. of liver,** hepatorrhagia. **H., lo'cal,** see *Hemorrhage.* **H. of lungs,** hæmoptysis. **H., meninge'al,** apoplexy. **H. of the mu'cous membranes,** see *Hemorrhage.* **H., na'sal,** epistaxis. **H., pas'sive,** see *Hemorrhage.* **H. from the pitu'itary mem'brane,** epistaxis. **H. plant,** Aspilia latifolia. **H., pleu'ral,** hæmatothorax. **H., post-par'tum,** see *Post-partum.* **H., pri'mary,** H. immediately after injury. **H., puer'peral,** H. after labor; sometimes used to denote any hemorrhage before or after childbirth. **H., pul'monary,** H. from the lungs. **H., sec'ondary,** see *Hemorrhage.* **H. from the skin,** sudor cruentus. **H., spi'nal,** hæmatorrhachis; apoplexia myelitica. **H., sponta'neous,** see *Hæmorrhagia.* **H., subconjuncti'val,** see *Ecchymoma.* **H., supplement'ary,** see *Hæmorrhagia.* **H., symptomat'ic,** see *Hæmorrhagia.* **H. of the tis'sues,** see *Hemorrhage.* **H., traumat'ic,** see *Hemorrhage.* **H., unavoid'able,** H. from placenta prævia. **H., u'terine,** metrorrhagia. **H., ves'ical,** cystorrhagia.

Hemorrhagic, hem-or-rhaj'ic. Relating or appertaining to hemorrhage. **H. ar'teries,** arteries to external capsule of brain, which, from some pathological change, give rise to hemorrhage. **H. diath'esis,** hæmophilia. **H. fo'cus,** centre of cerebral hemorrhage in apoplexy. **H. pleu'risy,** hæmothorax.

Hemorrhagiparous, hem-or-rhaj-ip'ar-us (*hæmorrhagia, pario*, to bring forth). Giving occasion to hemorrhage.
Hemorrhin'ia (*hemo, rhis*, nose). Epistaxis.
Hemorrhœ'a. Hæmorrhœa.
Hemorrhoic, hem-or-ro'ik. Hæmorrhoic.
Hem'orrhoid. Hæmorrhois. **H., exter'nal,** H. at margin of anus. **H., inter'nal,** H. from or in interior of anus. **H., ure'thral,** see *Urethra, vascular tumor of.*
Hemorrhoidal, hem-or-rhoid'al. Hæmorrhoidal.
Hemorrhoids, hem'or-rhoids. Livid, painful tubercles or excrescences, usually attended with discharge of mucus or blood. The most common causes are a sedentary life, accumulation of fæces in the rectum, violent efforts at stool, pregnancy, etc. The precursory symptoms are pains in the loins, stupor of the lower limbs, and uneasiness in the abdomen and rectum, with more or less gastric, cerebral, and general disorder, constituting a hæmorrhoidal diathesis, *Motus* or *Turba hæmorrhoidalis*, and *Molimen hæmorrhoidale.* To these symptoms follow one or more round, smooth, painful, pulsating, erectile tumors around the margin of the anus or within the anus; some bleeding occasionally. Hæmorrhoids are sometimes divided into bleeding or open piles and shut or blind piles. They have also been divided into internal or occult and external according to their situation, and into accidental or constitutional. **H., exter'nal,** hæmorrhoid having location outside of the sphincter ani and covered with skin. **H., inter'nal,** hæmorrhoid situated within the anus and covered with mucous membrane. Hæmorrhoidal tumors are formed of a close, spongy texture, similar to that surrounding the orifice of the vagina, and, like it, erectile. The treatment in mild cases is simple: rest, horizontal posture, use of mild laxatives, as sulphur, castor oil, and emollient glysters. If they be much inflamed, leeches may be applied and warm cataplasms or cold lotions prescribed, with abstinence and cooling drinks. Afterward an ointment of powdered galls and opium may afford relief. In the relaxed kind such ointment, with attention to diet, will be of benefit. If after repeated attacks the tumors remain hard and painful and threaten fistula, they may be removed.

By *Hemorrhoidal flux* is meant the hemorrhage taking place from the rectum owing to hemorrhoids. The quantity of blood discharged is often trifling, but at times sufficient to induce great debility and even death. The symptoms are those attending hemorrhoidal tumors. The treatment is the same as in hemorrhages in general. When the hemor-

rhage has become habitual or is vicarious, caution may be required in checking it. If inconvenience arise from a sudden suppression of habitual or vicarious hemorrhage, its return may be solicited by sitting over warm water, aloetic purgatives, glysters, irritating suppositories, etc., or leeches applied to the anus.

The internal bleeding pile is a soft, red, strawberry-like elevation of the mucous membrane, called a vascular tumor. A species of *Leucorrhœa analis*, or whitish discharge from the anus, sometimes attends ordinary hemorrhoids.

The term *Hemorrhoid* is applied at times to varicose veins developed elsewhere, as at the orifice of the uterus, *Uterine hemorrhoid*, or to *Vascular tumor of the urethra*. See *Metrœmorrhoides* and *Urethra*.

Hemorrhoscopy, hem-or-rhos'ko-pe (*hemo*, *rheo*, to flow, *skopeo*, to examine). Hæmatoscopy.

Hemospasia, hem-o-spas'e-ah. Hæmospasia.

Hemospas'tic. Hæmospastic.

Hemospermia, hem-o-spur'me-ah. Hæmospermatisis. Effusion of blood into the vesiculæ seminales.

Hemostasia, hem-o-sta'she-ah. Hæmostasia.

Hemostatics, hem-o-stat'iks. Hæmotostatica.

Hemotoxia, hem-o-toks'e-ah. Blood-poisoning.

Hemotro'phia. Nourishment of or by blood.

Hemp, Amer'ican. Cannabis Americana. **H., bar'ren**, Cannabis sativa. **H., Cana'dian**, Apocynum cannabinum. **H., com'mon**, Cannabis sativa. **H., East In'dian** or **In'dian**, Cannabis sativa; Hibiscus cannabinus. **H. net'tle**, Galeopsis tetrahit. **H. seed**, see *Cannabis sativa*. **H. seed calculus**, small mulberry-like urinary calculus, usually multiple, composed of oxalate of calcium. **H., wild**, Ambrosia trifida; galeopsis.

Hemp'weed, aromat'ic. Eupatorium aromaticum. **H., round'leaved**, Eupatorium rotundifolium.

Hemure'sia. Hæmaturia.

Hen'bane. Hyoscyamus.

Hen'bit. Lamium amplexicaule; Veronica hederifolia; stimulant diaphoretic.

Henblindness, hen'blind-ness. Hemeralopia.

Hen'le, elas'tic mem'brane of. Elastic membrane of inner layer of outer coat of the vessels. **H., glands of**, small glands in conjunctiva of the eyelids. **H., layer of**, outer part of inner sheath of hair-root. **H., loops** or **looped tu'bules of**, portion of uriniferous tubules forming a loop on itself. **H., root-sheath of**, see *Huxley's layer*. **H., sheath of**, see *Huxley's layer*. **H., tu'bules of**, H., loops of.

Hen'na. Lawsonia inermis.

Henoch's pur'pura. Purpura complicated with affection of the intestines.

Henogen'esis or **Henogenia**, hen-o-jen'e-ah (*heis*, *henos*, one, *genesis*, formation). Formation or development of an individual.

Heno'sis. Making into one; perfect union; adhesion between the lids or between the lids and eyeball.

Henot'ic. Tending to complete union or healing.

Henricea pharmacearcha, hen-ris'e-ah phar-mas-e-ar'kah (after R. S. Henrici of Copenhagen). Gentiana chirayita.

Henricus Rubens, hen-re'kus ru'bens. Colcothar.

Hen'sen's cor'puscle. Elliptical portion of upper part of external hair-cells, organ of Corti. **H.'s disk**, apparent divisions of muscle-fibre as seen by polarized light. **H.'s prop'-cells**, see *Prop-cells*.

Hep. See *Rosa canina*.

He'par (liver). The liver. Name for substances resembling liver in appearance. Ancient name for the liver of sulphur, hepar sulphuris. See *Potassii sulphuretum*. **H. adipo'sum**, fatty liver; adiposis hepatica. **H. adulteri'num**, spleen. **H. antimonia'tum** or **antimo'nii**, compound of a sulphuret of antimony and an alkali; see *Oxidum stibii sulphuratum*. **H. cal'cis**, sulphurated lime. **H. kali'num**, potassii sulphuretum. **H. martia'le**, compound of sulphuret of potassium and an oxide of iron. **H. mi'grans** or **mo'bile**, movable liver; floating liver. **H. moschatifor'me**, liver, nutmeg. **H. san'guinis**, blood-clot. **H. sinis'trum**, spleen. **H. succenturia'tum**, accessory liver; additional liver or liver lobe, a case of malformation. **H. sul'phuris**, potassii sulphuretum. **H. sul'phuris calcar'eum**, calcis sulphuretum. **H. sul'phuris volat'ile**, ammonii sulphuretum. **H. uteri'num**, placenta. **H. variega'tum**, liver, nutmeg.

Heparocele, hep-ar-o-se'le (Eng. hep'ar-o-seel) (*hepar*, liver, *kele*, tumor). Fatty tumor from connective tissue beneath the peritoneum, having external appearance of abdominal hernia.

Hepatæmorrhagia, hep-at-e-mor-rhaj'e-ah. Hemorrhage from the liver.

Hepatalgia, hep-at-al'je-ah (*hepato*, *algos*, pain). Pain in the liver; neuralgia of the liver; biliary colic. **H. calculo'sa**, hepatic colic; gallstone colic. **H. Petitia'na**, distension of gall-bladder by bile. **H. phlegmonoï'des**, inflammation of the liver.

Hepatapostema, hep-at-ap-os-ta'mah (*hepato*, *apostema*, abscess). Abscess of the liver.

Hepatarius, hep-at-ar'e-us. Hepatic.

Hepatatrophia, hep-at-at-rof'e-ah. Atrophy of the liver.

Hepatauxe (hep-at-auks'e) or **Hepatauxe'sis** (*hepato*, *auxe*, increase). Hypertrophy of the liver.

Hepatechema, hep-at-ek-a'mah (*hepato*, *echema*, sound). Sound rendered by the liver on percussion.

Hepatectomy, hep-at-ek'to-me (*hepato*, *ektome*, excision). Excision of a portion of the liver.

Hepatelcosis, hep-at-el-ko'sis. Ulceration of the liver.

Hepatemphraxis, hep-at-em-fraks'is (*hepato*, *emphrasso*, to obstruct). Hepatic obstruction.

Hepatencephaloma (hep-at-en-sef-al-o'mah) or **Hepatencephalosis**, hep-at-en-sef-al-o'sis (*hepato*, *enkephalos*, encephalon). Encephaloid of the liver.

Hepaterus, hep-at-a'rus. Hepatic.

Hepathæmia, hep-at-he'me-ah (*hepato*, *haima*, blood). Congestion of the liver with blood.

Hepathæmorrhagia, hep-at-he-mor-rhaj'e-ah. Hemorrhage from the liver.

Hepathelcosis, hep-at-hel-ko'sis (*hepato*, *helcosis*, ulceration). Ulceration of the liver.

Hepathyderos, hep-at-hid'er-us (*hepato*, *hudor*, water). Dropsy from hepatic disease.

Hepathydrocystis, hep-at-hid-ro-sis'tis (*hepato*, *hudor*, water, *kustis*, bladder). Cyst of the liver.

Hepatic, hep-at'ik (*hepar*, liver). Belonging or relating to or resembling liver. **H. air**, sulphuretted hydrogen gas. **H. al'oes**, see *Aloes hepatica*. **H. ar'tery**, one of the three branches given off by the cœliac. It passes toward the inferior surface of the liver, where it divides into two branches, a *right* and a *left*, proceeding toward the corresponding parts of that organ. **H. cells**, glandular cells of the liver, having a granular protoplasm containing adipose matter and pigment. **H. duct**, canal about three fingers' breadth in length and of the size of a quill, formed by the union of the biliary ducts, and joining the cystic duct at a very acute angle, to form the ductus choledochus. It conveys the bile from the liver toward the duodenum. **H. flex'ure**, rectangular bend between ascending and transverse colon, at under surface of the liver. **H. flux**, discharge from the liver. **H. glands**, glands in mucous membrane along the hepatic duct; lymphatic glands in lesser omentum receiving supplies from the liver. **H. islets**, lobules of the liver. **H. ligaments**, peritoneal folds and other structures keeping the liver in position and restraining its movement. **H. lobes**, H. lobules; see *Liver*. **H. plex'us** consists of nervous filaments, sent by the cœliac plexus to the liver, which accompany the hepatic artery. **H. veins** (*Suprahepatic veins*, *Intralobular veins*) arise in the substance of the liver, converge toward its posterior margin, and open into the vena cava inferior. They convey away the blood carried to the liver by the hepatic artery and vena porta. **H. zones**, areas in a hepatic lobule, which with blood-vessels and cells form vein or artery zones.

Hepatica, hep-at'ik-ah. Medicines believed to be capable of affecting the liver; liverwort; H. triloba.

H. America'na, H. triloba. **H. fonta'na,** Marchantia polymorpha. **H. nob'ilis,** H. triloba; Anemone hepatica. **H. stella'ta,** Asperula odorata. **H. tri'loba,** *Kidney liver-leaf, Liverwort, Liverweed, Trefoil, Noble liverwort, Herb trinity;* the leaves, *Hepatica* (Ph. U. S.), are a gentle astringent.

Hepat'ico. In composition, relating to the liver.

Hepat'ico-diaphragmat'icus. Occasional muscular slip from central tendon of diaphragm to peritoneum, anterior to the spine and to remnant of ductus venosus or under part of liver.

Hepat'ico-gas'tric. Hepatogastric.

Hepaticula, hep-at-ik'u-lah (dim. of **Hepar,** liver). Chronic hepatitis.

Hepaticus, hep-at'ik-us. Hepatic. **H. flos,** Hepatica triloba.

Hepatifaction, hep-at-e-fak'shun (*hepato, facio,* to make). Hepatization.

Hepatin, hep'at-in. Glycogen.

Hepatirrhagia, hep-at-ir-rha'je-ah. Hepatorrhagia.

Hepatirrhœa, hep-at-ir-rhe'ah (*hepato, rheo,* to flow). Discharge from the liver. Species of diarrhœa in which the excreted matters seem to come from the liver or are much mixed with bile.

Hepatis suspensorium, hep'a-tis sus-pen-so're-um. Ligament, suspensory, of the liver.

Hepatisatio, hep-at-iz-ah'she-o. Hepatization. **H. pulmo'num,** hepatization of the lungs.

Hepatisis, hep-at'is-is. Hepatization.

Hepatism, hep'at-izm. Combined phenomena from disordered liver; biliousness.

Hepatitis, hep-at-e'tis. Inflammation of the liver. It may be seated either in the peritoneal covering, *Serohepatitis, Hepatitis velamentosa* or *externa, Peritonitis hepatica, Perihepatitis;* or in the substance of the liver, *Hepatitis parenchymatosus;* or in both, *Parahepatitis,* and may be acute or chronic. The symptoms are pain in the right hypochondrium, shooting to the back and right shoulder, and increased on pressure; difficulty of lying on the left side; sometimes jaundice, with cough and synocha. Its termination is generally by resolution. In tropical climates it often runs on to suppuration, *Jecoris vomica, Hepatitis apostematosa, Suppurative hepatitis,* the abscess breaking either externally or forming a communication with the intestines or chest, or breaking into the cavity of the abdomen. Heat predisposes to it; hence its greater frequency in hot climates. In hot climates, especially, new action must be excited by mercury as early as possible. **H. apostemato'sa,** suppurative inflammation of liver. **H., bil'iary,** inflammation of the liver originating in the bile-ducts, sometimes suppurative or plastic, the patches of inflammation being colored with bile-pigment. **H., chron'ic,** chronic liver disease, is not as common as is believed. Symptoms are those above mentioned in a minor degree: enlargement, constant dull pain in the region of the liver, sallow countenance, high-colored urine, clay-colored fæces, etc. A chronic form of interstitial hepatitis is generally described as cirrhosis of the liver. **H. cys'tica,** inflammation of the gall-bladder, cholecystitis. **H. cytoph'thora,** acute atrophy of liver. **H., diffused,** acute or yellow atrophy of the liver, acute wasting or softening of the liver, fatal jaundice. Form of parenchymatous inflammation of the liver, characterized by a rapid and complete destruction of the hepatic cells throughout every part of the organ, occurring in early adult life; indicated by jaundice, sometimes with petechiæ and extensive ecchymosis, vomiting of ingesta and mucus, and afterward of altered blood resembling coffee-grounds; delirium, convulsions, and coma, usually fatal in about a week. The liver is found, on post-mortem examination, to be extensively atrophied. **H., epidem'ic,** bilious remittent fever. **H. exter'na,** inflammation of peritoneal coat of the liver; perihepatitis. **H. fibro'sa,** indurative hepatitis. **H., gum'matous** or **gummo'sa,** form of syphilitic inflammation of the liver. **H., in'durative,** form of h. in which the liver-cells become atrophied and the connective tissue is made denser and indurated. **H., intersti'tial,** inflammation of connective tissue of the liver, resulting in abscess or glandular destruction, with softening or induration, atrophy or cirrhosis; cirrhsois of the liver. **H. lon'ga,** chronic hepatitis. **H. occul'ta,** hepatitis, chronic. **H. parenchymato'sa,** inflammation of substance of the liver; yellow atrophy of liver. **H. purulen'ta,** suppurative hepatitis; see *Hepatitis.* **H., sup'purative,** abscess of the liver; see *Hepatitis.* **H. velamento'sa,** inflammation of the peritoneal coat of the liver; perihepatitis.

Hepatization, hep-at-iz-a'shun (*hepar,* liver). Conversion into liver-like substance, as in the lungs when gorged with effused matter, so that they are no longer pervious to the air; they are then said to be hepatized. **H., gray,** condition of the lungs characterizing the third stage of pneumonia, or stage of purulent infiltration. **H., red,** condition of the lung characterizing the first stage of consolidation of the lungs in pneumonia. **H., white,** appearance of the lungs in still-born children affected with syphilis. **H., yel'low,** appearance of the lungs in later stages of pneumonia, when colored with pus-cells.

Hep'atize. To convert or to be converted into substance resembling liver.

Hep'atized ammo'nia. Ammonium sulphide.

Hepatizon, hep-at'e-zon (*hepatizo,* to resemble liver). Chloasma.

Hepato, hep'at-o (*hepar,* liver). In composition, liver.

Hepatocace, hep-at-ok'as-e (*hepato, kakos,* evil). Gangrene of the liver.

Hepatocele, hep'at-o-se-le (Eng. hep-at'o-seel) (*hepato, kele,* tumor). Hernia of the liver; protrusion occasionally met with, especially in infants, in whom the upper part of the linea alba is very weak. Hepatocele may be *umbilical* (hepatomphalum) or *ventral* (through the linea alba).

Hepatochlorrhœa, hep-at-o-klo-rhe'ah (*hepato, chole,* bile, *rheo,* to flow). Hepatirrhœa.

Hepatocirrho'sis. Cirrhosis of the liver; interstitial hepatitis.

Hepatocolic, hep-at-o-kol'ik. Relating to the liver and colon, as **H. lig'ament,** ligament of the liver passing from the gall-bladder and contiguous sinus portarum, across the duodenum, to the colon; another, termed *hepatorenal,* descends from the root of the liver to the kidney. They are both peritoneal.

Hepatocystic, hep-at-o-sis'tik (*hepato, kustis,* bladder). Relating to liver and gall-bladder. **H. duct,** choledoch duct; rare canal passing from the liver to the gall-bladder.

Hepato'des. Hepatic.

Hepatodid'ymus or **Hepatod'ymus.** Hepatodyme.

Hepatoduode'nal (*hepato, duodenum*). Relating to liver and duodenum. **H. lig'ament,** gastro-hepatic omentum.

Hepatodyme, hep'at-o-dime (*hepato, didumos,* twin). Monster united at the liver and double above.

Hepatod'ymus. Hepatodyme.

Hepatodynia, hep-at-o-din'e-ah (*hepato, odune,* pain). Pain in the liver.

Hepatodysentery, hep-at-o-dis'en-ter-e. Hepatirrhœa; hepatic dysentery.

Hepatogastric, hep-at-o-gas'trik. Relating to stomach and liver. **H. lig'ament** or **omen'tum,** gastro-hepatic ligament.

Hepatogastricholo'sis (*hepato, gaster,* stomach, *chole,* bile). Fever, bilious; fever, gastric.

Hepatogastri'tis. Inflammation of the liver and stomach.

Hepatogenic (hep-at-o-jen'ik) or **Hepatog'enous** (*hepato, gennao,* to produce). Forming liver structure. Produced by or originating in the liver.

Hepatography, hep-at-og'raf-e (*hepato, graphe,* description). Part of anatomy describing the liver. Hepatology.

Hepatohæmia, hep-at-o-he'me-ah (*hepato, haima,* blood). Hepatic engorgement. Sanguineous congestion of the liver.

Hepatoid, hep'at-oid (*hepato, eidos,* resemblance). Hepatic.

Hepatolith, hep'at-o-lith (*hepato, lithos,* stone). Concretion in the liver; biliary calculus.

Hepatolithiasis, hep-at-o-lith-e'as-is. Formation of concretions in the liver.

Hepatology, hep-at-ol'o-je (*hepato, logos,* discourse). Treatise on the liver. Description of the liver.

Hepatomalacia, hep-at-o-mal-ah'se-ah (*hepato, malakia,* softness). Softening of the liver.

Hepatomegalia, hep-at-o-me-gal'e-ah (*hepato, megas,* large). Enlargement of the liver.

Hepatomelanosis, hep-at-o-mel-an-o'sis. Melanosis of the liver.

Hepatomphalocele, hep-at-om-fal-o-se'le (Eng. hep-at-om'fal-o-seel). Umbilical hernia, the liver forming part of contents of sac.

Hepatomphalus, hep-at-om'fal-us. Hepatomphalocele.

Hepatomyeloma, hep-at-o-me-el-o'mah (*hepato, muelos,* marrow). Encephaloid of the liver.

Hepatomyelosis, hep-at-o-me-el-o'sis. Formation or growth of hepatomyeloma.

Hepatoncus, hep-at-on'kus (*hepato, onkos,* tumor). Tumefaction or tumor of the liver.

Hepatonecrosis, hep-at-o-ne-cro'sis. Necrosis or gangrene of the liver.

Hepatoparectama, hep-at-o-par-ek'tam-ah (*hepato, parektama,* considerable extension). Excessive enlargement of the liver.

Hepatopathy, hep-at-op'ath-e (*hepato, pathos,* affection). Disease of the liver.

Hepatoperitoni'tis. Inflammation of the peritoneal covering of the liver.

Hepatophlebitis, hep-at-o-fleb-e'tis (*hepato, phleps,* vein). Inflammation of the hepatic veins.

Hepatophlegmone, hep-at-o-fleg'mo-ne (*hepato, phlegmone,* inflammation). Inflammation of the liver.

Hepatophthisis, hep-at-o-te'sis (*hepato, phthisis,* consumption). Consumption from suppuration of the liver.

Hepatophyma, hep-at-o-fe'mah (*hepato, phuma,* growth). Tumor of the liver.

Hepatopostema, hep-at-o-pos-ta'mah. Abscess of the liver.

Hepatopto'sis (*hepato, ptosis,* falling). Floating liver.

Hepatore'nal. Relating to liver and kidney, as *Hepatorenal ligament;* see *Hepatocolic.* **H. pouch,** pocket in peritoneum for reception of right extremity of liver.

Hepatorrhagia, hep-at-or-rhaj'e-ah (*hepato, rhegnumi,* to break forth). Hepatirrhœa; hemorrhage of the liver.

Hepatorrhaphy, hep-at-or'rhaf-e (*hepato, rhaphe,* suture). Suture of the liver.

Hepatorrhexis, hep-at-or-rheks'is (*hepato, rhexis,* rupture). Rupture of the liver.

Hepatorrhœa, hep-at-or-rhe'ah. Hepatirrhœa.

Hepatosarcoma, hep-at-o-sar-ko'ma. Sarcoma of the liver.

Hepatoscirrhus, hep-at-o-skir'rus (*hepato, skirrhos,* cancerous induration). Carcinoma or schirrhus of the liver.

Hepatos'copy (*hepato, skopeo,* to see). Examination of the liver.

Hepatosplenitis, hep-at-o-splen-e'tis. Inflammation of the liver and spleen.

Hepatostrumo'sis (*hepato, struma,* a scrofulous tumor). Tubercle or scrofulosis of the liver.

Hepatotomy, hep-at-ot'o-me (*hepato, tome,* incision). Dissection of, or incision into, the liver.

Hephæstic, hef-e'stik (*Hephæstus,* Vulcan). Relating to the forge or hammer, as hephæstic hemiphlegia. See *Hammer palsy.*

Hephæstiorrhaphy, hef-e-ste-or'rhaf-e (*Hephæstus,* Vulcan, *rhaphe,* suture). Union by fire, or by actual cautery applied to edges of a wound.

Hepialos, hep-e'al-os. Epialos.

Hepse'ma or **Hepsesis,** hep-sa'sis. Decoction. Gruel.

Hep'tad (*hepta,* seven). Septivalent; element demanding seven volumes of hydrogen to produce saturation.

Heptal, hep'tal. Relating to seven. **H. cy'cle,** cycle, hebdomadal.

Heptal'lon grave'olens. *Hogwort, Bear's fright.* Indigenous plant, with fetid porcine smell; diaphoretic, diuretic, cathartic.

Heptamelus, hep-tam'el-us (*hepta,* seven, *melos,* limb). Double monster having seven limbs.

Hep'tane. Heptyl hydride. C_7H_{16}. A paraffin, liquid constituent of petroleum.

Heptaphyllum, hep-taf-il'lum (*hepta,* seven, *phullon,* leaf). Tormentilla.

Heptapleuron, hep-tah-plu'ron (*hepta,* seven, *pleuron,* rib). Plantago major.

Hep'-tree. Rosa canina.

Heracleum, her-ak-le'um. Branca, H. spondylium. **H. lana'tum,** masterwort, cow parsnip; stimulant, carminative, poisonous. **H. spondyl'ium** or **tau'ricum,** cow parsnip, allheal, cow mumble, ord. Umbelliferæ. Root is tonic, stomachic, and carminative. Russians and Poles obtain from its seeds and leaves, by fermentation, an intoxicating spirituous liquor called parst.

Heracleus morbus, her-ak-le'us mor'bus (herculean disease). Epilepsy.

Herb (pron. urb). Non-ligneous plant, dying down to the ground, at least in winter. In pharmacy, the whole herb or its separate parts. **H., aromat'ic,** species aromaticæ. **H., bit'ter,** Erythræa centaurium. **H., bless'ed,** Geum urbanum. **H. Chris'topher,** Actæa spicata. **H., Ful'ler's,** saponaria. **H. of grace,** Gratiola officinalis. **H., holy,** Verbena officinale. **H. mas'tich,** Thymus mastichina; Teucrium marum. **H. of patience,** Rumex patientia. **H. Pe'ter,** Primula veris. **H., poor'man's,** Gratiola officinalis. **H. of repent'ance,** Ruta graveolens. **H. Rob'ert,** Geranium Robertianum. **H. of Saint Cu'negonde,** Eupatorium cannabinum. **H. of Saint George,** Valeriana officinalis. **H. Sophi'a,** Sisymbrium Sophia. **H. trin'ity,** Hepatica triloba; Viola tricolor; Anemone hepatica.

Herba, ur'bah. Herb. **H. absin'thii,** absinthium. **H. aconi'ti,** aconite herb. **H. Alexandri'na,** Smyrnium olusatrum. **H. althæ'æ,** Pelargonium cucullatum. **H. an'thos,** rosmarinus. **H. apollina'ris,** mandragora; Hyoscyamus niger. **H. apoplec'tica,** Ajuga chamæpitys. **H. arthrit'ica,** Primula officinalis. **H. as'pera,** Galium aparine. **H. bal'lotæ lana'tæ,** Leonurus lanatus. **H. belladon'næ,** belladonna leaves. **H. benedic'ta,** Geum urbanum. **H. beton'icæ al'bæ,** veronica herb. **H. Britan'nica,** rumex. **H. can'nabis In'dicæ,** Cannabis Indica. **H. can'ni,** Artemisia santonica. **H. cardi'aca,** Leonurus cardiaca. **H. car'dui benedic'ti,** blessed thistle. **H. car'dui ven'eris,** Dipsacus fullonum. **H. cata'riæ,** catnip. **H. centau'rii,** centaury. **H. chelido'nii majo'ris,** chelidonium. **H. chenopo'dii,** herb of Chenopodium ambrosioïdes. **H. chol'era,** Salvia sclarea. **H. cicu'tæ macula'tæ,** herb of conium. **H. citra'ta,** melissa. **H. cochlea'riæ,** scurvy grass. **H. coni'i,** herb of conium. **H. divi'na,** tobacco leaves. **H. do'rea,** Solidago virgaurea. **H. erys'imi,** Sisymbrium officinale. **H. febrif'uga,** Teucrium chamædrys; Erythræa centaurium. **H. fe'lis,** Nepeta cataria, catmint. **H. flam'mula Jo'vis,** Clematis erecta. **H. fuma'riæ,** fumitory. **H. gen'ipi ve'ri,** Achillea atrata. **H. grati'olæ,** gratiola leaves. **H. hirundina'riæ,** chelidonium. **H. hyoscy'ami,** hyoscyamus, leaves and flowering tops. **H. ig'nis,** Lichen pyxidatus. **H. le'di,** Ledum palustre. **H. Liberia'na,** Galeopsis grandiflora. **H. lobe'liæ,** lobelia. **H. majora'næ,** sweet marjoram. **H. melancholif'uga,** fumaria. **H. melis'sæ,** melissa. **H. men'thæ acu'tæ** or **roma'næ,** spearmint. **H. men'thæ piperi'tæ,** peppermint. **H. milita'ris,** Achillea millefolium. **H. millefo'lii,** millefolium. **H. napel'li,** aconite. **H. nastur'tii aquat'ici,** water-cress. **H. nep'etæ,** catnep. **H. ocula'ria,** Euphrasia pratensis. **H. orig'ani,** origanum herb. **H. papilla'ris,** lapsona. **H. paradisi'aca,** or **paralys'eos,** or **paralyt'ica,** Primula veris. **H. pa'tæ lapi'-**

næ, Leonurus cardiaca. **H. pedicula'ria**, Delphinium staphisagria. **H. pervin'cæ**, Vinca minor. **H. pe'tri**, Primula verus. **H. pra'sii**, marrubium. **H. pulica'ris**, Plantago psyllium. **H. querci'ni**, Lichen plicatus. **H. re'gia**, Artemisia vulgaris. **H. rosel'iæ**, Drosera rotundifolia. **H. Ruper'ti**, Geranium Robertianum. **H. sabi'næ**, savin. **H. sac'ra**, Verbena officinalis. **H. saliva'ris**, Anthemis pyrethrum. **H. salv'iæ horten'sis**, salvia. **H. Sanc'ti Anto'nii**, Plumbago Europæa. **H. San'ta Mari'a**, Chenopodium ambrosioïdes. **H. sardo'nia**, Ranunculus sceleratus. **H. scelera'ta**, Ranunculus sceleratus. **H. scopar'ii**, tops of scoparium or broom. **H. Scyth'ica**, Glycyrrhiza glabra. **H. serpyl'li**, wild thyme. **H. siderit'idis**, Galeopsis grandiflora. **H. sola'ni tubero'si**, belladonna. **H. solda'do**, matico. **H. somnif'era**, Atropa belladonna. **H. tab'aci**, Nicotiana tabacum. **H. thy'mi**, thyme. **H. trinita'tis**, Anemone hepatica; Viola tricolor. **H. ven'eris**, Adiantum pedatum. **H. ven'tis**, Anemone pulsatilla. **H. veron'ica**, veronica or speedwell. **H. vi'olæ tricolo'ris**, Viola tricolor. **H. vir'gæ pe'giæ**, digitalis. **H. vit'ri**, see *Salsola kali*. **H. zazarhen'di**, origanum.

Herbaceous, ur-ba'shus. Possessing the character of an herb.

Herbæ pro enemate, ur'ba pro en-em'at-e. Glyster herbs. **H. pro fo'tu**, fomentation herbs.

Herbalist, ur'bal-ist. Herborist.

Herbarist (ur'ba-rist) or **Herba'rius**. Herborist.

Herbarium, u-bar'e-um. Collection of plants, generally of dried plants. In pharmacy, a plant that is used entire.

Herb-doctor. Botanical doctor or physician, root-doctor. One who treats diseases altogether by herbs; a "Thomsonian," for example.

Herbivorous, ur-biv'o-rus (*herba, voro*, to eat). Epithet applied to animals which feed on herbs. Such animals are called *Herbivora*.

Herborist (urb'o-rist), **Herb'alist**, or **Herb'arist**. One who deals in plants or herbs; a practitioner who employs herbs only.

Herborization, urb-o-re-za'shun. Excursion for collection of plants, such as are directed by the Apothecaries' Company of London for their apprentices, etc.

Herbs (urbs), **five cap'illary**. These were, anciently, hart's tongue, black, white, and golden maidenhair, and spleenwort. The **five emol'lient herbs** were, anciently, beet, mallow, marshmallow, French mercury, and violet.

Her'bst's cor'puscles. Small sensory bodies, like Pacinian corpuscles, seen in birds.

Hercules (her'ku-lees) **allheal**. Pastinaca opoponax. **H. club**, Aralia spinosa.

Herculeus morbus, her-ku-le'us mor'bus. Epilepsy.

Heredicity, her-ed-is'it-e. Tendency, disposition, or natural law of transmission of disease; tendency or family peculiarity from one generation to another.

Hereditary, her-ed'it-a-re (*hæres*, heir). Epithet given to diseases, or predispositions to diseases, communicated or inherited from progenitors.

Hered'ity. Law by which structure, mental and physical characteristics, diseases, etc. are transmitted from progenitors. See *Heredicity*.

Heritiera (her-it-e-a'ra) **littora'lis**. Astringent plant of E. Indies, Australia, and Africa.

Hermadactylus, herm-ah-dak'til-is. Hermodactyl.

Hermaphrodeity, hurm-af-ro-de'it-e (*Hermes*, Mercury, *Aphrodite*, Venus), **Hermaph'rodism**, **Hermaph'roditism**. Appertaining to Mercury and Venus. Union of characteristics of the two sexes in the same individual. See *Hermaphrodite*.

Hermaphrodisia (hurm-af-ro-diz'e-ah), or **Hermaph'rodism** (hurm-af'ro-dizm), or **Hermaph'rodite**, hurm-af'ro-dite. Hermaphrodeity. One who possesses the attributes of male and female; bisexual, uniting in one individual the two sexes. Term applied to an animal or plant which is, at the same time, both male and female. True hermaphrodites are usually met with in the lower degrees of the animal scale, among the zoöphytes, mollusca, or gasteropoda. Individuals of the human species, regarded as hermaphrodites, owe this appearance to vicious conformation of the genital organs; a kind of monstrosity rendering them unfit for generation, although attentive examination may generally exhibit the true sex. Hermaphrodites have been described which, instead of uniting the attributes of both sexes, cannot be considered male or female—neutral hermaphrodites.

Hermaphroditic, hurm-af-ro-dit'ik. Relating or appertaining to an hermaphrodite.

Hermaphroditismus, hurm-af-ro-dit-iz'mus. Hermaphrodeity. **H. exter'nus**, condition of external genital organs when they have characters of both sexes. **H. femini'nus**, subject of the malformation is here female, with some male characteristics. **H. lateral'is**, here both sexes are apparent, a testicle being present on one side, an ovary on the other. **H. masculi'nus**, presence of organs of female and male. **H. spu'rius**, condition having appearance of blended sexual organs, but in which real sex is easily established. **H., true**, H. verus. **H. ve'rus**, actual blending of sexual organs.

Hermesia, hur-me'ze-ah. Chemistry.

Hermetic (hur-met'ik), **Hermet'ical** (*Hermes*, Mercury). Pertaining to chemistry; secret or closely sealed. **H. doc'trine**, doctrine of Hermes, a celebrated Egyptian philosopher, being that part of chemistry whose object was the pretended transmutation of metals. **H. seal'ing**, the treatment of gunshot wounds, as of the chest, by completely closing the edges with sutures and collodion.

Hermetism, hur'met-ism. Chemistry.

Hermodac'tyl or **Hermodactylus**, hur-mo-dak'til-us (*Hermus*, a river in Asia upon whose bank it grows, *daktulos*, date). The root was formerly used as a cathartic. By some it is supposed to be identical with the Iris tuberosa; a variety of colchicum—Colchicum Illyricum.

Hermophilus, hurm-of'il-us (*Hermes*, Mercury, *philos*, lover). Fond of mercury as a medicine.

Hernandia (her-nan'de-ah) **Guianen'sis**. Species of plant of Guiana, seeds and roots of which are purgative. **H. ovig'era**, of E. Indies, and **H. sono'ra**, of E. and W. Indies, have similar properties.

Hernia, hur'ne-ah (*hernos*, a sprout or shoot). Rupture. Any tumor formed by the displacement of a viscus, or a portion of a viscus which has escaped from its natural cavity by some aperture and projects externally. Unless otherwise specified, hernia means abdominal hernia. Herniæ have been arranged according to the region or organ affected, the opening involved, or the viscera included in them.

Abdominal herniæ are remarkable for their frequency, variety, and the danger attending them. They are produced by the protrusion of the viscera of the abdomen through the natural or accidental apertures in the parietes of that cavity. The organs forming them most freqently are the intestines and the epiploon. These herniæ have been divided, according to the apertures by which they escape, into—

1. *Inguinal* or *Suprapubian herniæ*, which issue by the inguinal canal, are called bubonocele when small, and scrotal hernia or oscheocele in man when they descend into the scrotum; or vulvar hernia or pudendal or labial hernia, episiocele, in women when they extend to the labia majora. See *Bubonocele*. Direct inguinal hernia, ventro-inguinal hernia, is where the protruding parts, in place of entering the internal ring and descending along the inguinal canal, make a direct passage through the parietes of the abdomen opposite the external ring.

2. *Crural* or *Femoral hernia*, merocele, when they issue by the crural canal.

3. *Infrapubian* or *Subpubic hernia*, oödeocele, opeocele, opodeocele, hernia foraminis ovalis or obturatoria, when the viscera escape through the opening which gives passage to the infrapubian vessels.

4. *Ischiatic* or *Sciatic hernia*, when it takes place through the sacrosciatic notch.

5. *Umbilical hernia*, hernia umbilicalis, exomphalos, omphalocele, when it occurs at the umbilicus or near it.

6. *Epigastric hernia,* occurring through the linea alba above the umbilicus.

7. *Hypogastric* or *Infra-umbilical hernia,* cœliocele, hypogastrocele, when it occurs through the linea alba below the umbilicus.

8. *Perineal hernia,* mesoscelocele, hernia perinæi or perinealis, perinæocele, perineocele, when it takes place through the levator ani and appears at the perineum.

9. *Vaginal hernia,* colpocele, coleocele, or elytrocele, through the parietes of the vagina.

10. *Diaphragmatic hernia,* diaphragmatocele, when it passes through the diaphragm. The prolongation of the hernial sac in various directions within the abdominal walls is called intraparietal or intermuscular hernia.

Herniæ are likewise distinguished, according to the viscera forming them, into enterocele, epiplocele, entero-epiplocele, gastrocele, cystocele, hepatocele, splenocele, etc.

When a hernia can be restored to its natural cavity by the aid of pressure, etc. properly applied, it is said to be reducible; and it is irreducible when adhesion, bulk, etc. oppose its return. When the aperture giving passage to the hernia occasions more or less constriction of the protruded portion, the hernia is said to be incarcerated, hernia obstructa or strangulated, H. strangulata; and if the constriction be not removed, constipation, hiccough, vomiting, and the signs of violent inflammation, followed by gangrene, supervene, with alteration of the features, small pulse, cold extremities, and death. See *Incarceration.*

Therapeutical indications are—1. In reducible hernia: to replace the viscera in the abdomen by taxis, and to retain them there by the use of a truss, which, if properly adapted, may effect a radical cure. 2. Irreducible hernia: to support the tumor by an appropriate suspensory bandage. 3. Strangulated hernia: to have recourse to taxis, bloodletting, warm bath, tobacco glysters, ice to the tumor, and, if these should not succeed, to perform an operation, consisting in dividing the covering of the hernia and cutting the aponeurotic ring causing the strangulation; reducing the displaced viscera unless their diseased condition should require them to be retained without; dressing the wound appropriately; restoring the course of the fæces by gentle glysters, preventing or combating inflammation of the abdominal viscera; conducting the wound to cicatrization by appropriate means; and afterward supporting the cicatrix by a bandage.

Hernia formerly signified also the scrotum and the testicle.

Her'nia, abdom'inal. Hernia; laparocele. **H. adipo'sa,** H. in which a fatty mass enters into the protruding part; lipocele; steatocele. **H. adna'ta,** congenital h. **H., aneuris'mal,** cirsomphalus; caput Medusæ. **H. annula'ris,** umbilical h. **H. aquo'sa,** hydrocele. **H. arte'riæ** or **arteria'rum,** hernial aneurism; see *Aneurism.* **H., ascend'ing,** H., interstitial. **H., Béclard's,** H. through saphenous opening. **H., Ber'kett's,** H. into vaginal process of peritoneum. **H. of the blad'der,** cystocele. **H. of the blad'der, congen'ital,** see *Exstrophia.* **H. of the brain,** encephalocele. **H. bronchia'lis,** bronchocele. **H., bur'sal,** H., synovial. **H., cæ'cal,** H. involving the cæcum. **H. of canal' of Nuck,** see *Canal of Nuck.* **H. cap'itis,** encephalocele. **H. carno'sa,** sarcocele; elephantiasis of the scrotum. **H. of cerebel'lum,** parencephalocele. **H., cer'ebral,** encephalocele; fungus cerebri. **H. of Cloquet,** pectineal h.; see *Merocele.* **H., concealed,** H. of such small size that it is impossible to detect the protruding part. **H., congen'ital,** H. of infancy; protrusion of some of the contents of the abdomen into the tunica vaginalis testis, owing to a want of adhesion between its sides after the descent of the testicle; H. into vaginal process of peritoneum. **H. of Coo'per (Sir Astley),** see *Merocele.* **H. cor'neæ,** ceratocele. **H., cru'ral,** femoral h.; merocele. **H., cys'tic,** cystocele. **H. of di'aphragm,** see *Hernia;* diaphragmatic hernia. **H., divertic'ular,** H. containing diverticulum of intestine; H. Littrica. **H. dorsa'lis,** lumbar h. **H., encyst'ed,** vaginal h. **H. enterovagi'nal,** see *Enterocele.* **H., epigas'tric,** see *Hernia* and *Ventral hernia.* **H., epip'loic,** epiplocele. **H., exter'nal in'guinal,** form of inguinal h. in which the neck of the sac is external to the epigastric artery and spermatic cord or round ligament of the uterus. **H., fat'ty,** lipocele; steatocele. **H., fem'oral,** merocele. **H. flatulen'ta,** pneumatocele. **H. foram'inis ova'lis,** obturator h.; see *Hernia.* **H., funic'ular,** H. into umbilical cord or its covering. **H., gas'tric,** gastrocele. **H. guttura'lis** or **gut'turis,** bronchocele. **H. of heart,** cardiocele. **H. hepat'ica,** hepatocele. **H. of Hes'selbach,** see *Merocele.* **H., hour'-glass,** see *Hourglass.* **H. humora'lis,** inflammation of the testicle; swelled testicle; epididymitis. Swelling and inflammation of the testicle are common symptoms of gonorrhœa, but may arise from external injuries or other causes. It affects the epididymis more especially. When supervening on gonorrhœa or blennorrhœa, it is sometimes termed blennorrhagic epididymitis or gonorrhœal orchitis. **H., hypogas'tric,** see *Hernia.* **H. immo'bilis,** irreducible h. **H. incarcera'ta,** see *Hernia* and *Enteroperistole.* **H., incar'cerated,** H. so constricted as to prevent return of the contents; see *Hernia.* **H., incomplete',** H., interstitial; form of inguinal h. in which the sac does not extend beyond the abdominal ring. **H. of in'fancy,** H., congenital. **H., infrapu'bian,** obturator h.; see *Hernia.* **H., infra-umbil'ical,** see *Hernia.* **H. ingen'ita,** H., congenital. **H., in'guinal,** H. through inguinal canal; bubonocele; see *Hernia.* **H., in'guino-properitone'al,** see *Inguino-properitoneal.* **H., intermus'cular,** see *Hernia.* **H., inter'nal,** H. in interior of body that is not visible, as diaphragmatic hernia. **H., intersti'tial,** H. between two layers of aponeurosis, as in the abdominal wall; incomplete inguinal hernia. **H., intes'tinal** or **intestino'rum,** enterocele. **H. intestina'lis omenta'lis,** entero-epiplocele. **H., intrapari'etal,** interstitial h.; see *Hernia.* **H. i'ridis,** ptosis iridis. **H., irreduc'ible,** see *Hernia.* **H. ischiad'ica,** or **ischiat'ica,** or **ischyad'ica,** ischiocele. **H. of kid'ney,** nephrocele. **H., Kron'lein's,** H. having both peritoneal and inguinal sacs. **H., la'bial,** pudendal hernia. **H., lac'rymal,** see *Lacrymal.* **H., lat'eral,** diverticular h. **H. of Laugier,** see *Merocele.* **H. liena'lis,** splenocele. **H., Littré's,** H. Littrica. **H. Litt'rica** or **Littria'na,** diverticular hernia. Hernia first described by Littré, in which the intestinal canal proper is not included in the hernial sac, the protruded portion of intestine consisting of a digital prolongation of the ileum, which he concluded was formed by the gradual extension of a knuckle of the bowel that had been engaged in the inguinal canal. **H. of liv'er,** hepatocele. **H., lum'bar,** see *Ventral hernia.* **H. of lung,** pneumocele. **H., Malgaigne's,** congenital h. **H., mesenter'ic,** duodeno-jejunal h. **H., mesocol'ic,** H. caused by the bowels gliding between the layers of the mesocolon. **H., mixed,** entero-epiplocele. **H. mo'bilis,** reducible h. **H., oblique in'guinal,** indirect hernia entering the internal abdominal ring and passing out of the external abdominal ring. **H. obstruc'ta,** see *Hernia.* **H. obturato'ria,** see *Hernia.* **H. oc'uli,** exophthalmia. **H. œsoph'agi,** pharyngocele. **H., omen'tal,** epiplocele. **H. oschea'lis,** scrotal hernia. **H. ova'rii,** ovarial hernia; condition is generally congenital, caused by the entrance of the ovary into a hernial sac, usually inguinal. **H. parorchido-enter'ica,** parorchido-enterocele. **H., Part'ridge's,** femoral hernia anterior to, or to outer side of, femoral vessels. **H., pectine'al,** H. passing internal to and behind the femoral vessels or pectineus muscle. **H. perinæ'i** or **perinea'lis,** see *Hernia.* **H., Petit's,** lumbar h. **H. pharyn'gis,** pharyngocele. **H., phren'ic,** diaphragmatic h. **H. pinguedino'sa scro'ti,** liparocele. **H. of pleu'ra,** pleurocele. **H. pleu'rica et pulmona'lis,** pleurocele. **H., properitone'al,** H., Kronlein's. **H. pudenda'lis,** pudendal or labial hernia. **H., pur'ulent,** empyocele. **H., rectovagi'nal,** see *Rectocele.*

H. of rec'tum, proctocele. **H., redu'cible**, see *Hernia*. **H. rena'lis**, nephrocele. **H., retroperitone'al**, see *Retroperitoneal*. **H. sac'ci lacryma'lis**, lacrymal hernia, mucocele. **H., sacrorec'tal**, proctocele from incomplete ossification of the sacrum. **H. sanguin'ea**, hæmatocele, hæmatomphalocele. **H., sciat'ic**, ischiocele. **H., scro'tal**, scrotocele, oscheocele. **H. semina'lis scro'ti**, spermatocele. **H. spi'næ**, hydrorrhachis. **H., sple'nic**, splenocele. **H. of stomach**, gastrocele. **H., stran'gulated**, see *Hernia*. **H., subpu'bic**, see *Hernia*. **H., suprapu'bian**, H., inguinal. **H., syno'vial**, projection of synovial membrane through ruptured capsular ligament of an articulation. **H. tes'tis**, benign fungus of the testis, granular swelling of the testis. Protrusion of the tubuli of the testicle through a rupture or ulceration of its fibrous envelope, the tunica albuginea; orchiocele. **H., thora'cic**, diaphragmatic h.; intercostal h.; cardiocele; pneumonocele. **H., thy'roid**, H., obturator. **H. of the tongue**, glossocele. **H., umbil'ical**, epiplomphalon, exomphalos. **H. of umbil'ical cord**, congenital umbilical hernia. **H. umbili'ci aquo'sa**, hydromphalum. **H. u'rachi**, uromphalus. **H. u'teri**, hysterocele. **H., u'veal**, prolapse of iris, staphyloma iridis. **H. of vagi'na**, elytrocele; see *Hernia*. **H. varico'sa**, cirsocele, varicocele. **H., Velpeau''s**, femoral h. protruding anterior to the vessels. **H. vena'rum**, varix. **H. ven'eris**, hernia humoralis, orchitis. **H. vento'sa**, physocele. **H., ven'tral**, see *Ventral*. **H. ventric'uli**, gastrocele. **H., ven'tro-in'guinal**, direct inguinal h. **H. vesi'cæ urina'riæ**, cystocele. **H., ves'ical**, cystocele. **H., vesicovagi'nal**, see *Cystocele*. **H., vul'var**, pudendal or labial hernia. **H. of the womb**, hysterocele. **H. zirba'lis**, epiplocele.

Her'nia-knife. Herniotome.

Hernial, hur'ne-al. Belonging to or concerning hernia. **H. ring**, constricted part of hernial sac. **H. sac**, peritoneal fold carried forward by the intestine in hernia.

Herniaria (hur-ne-ah're-ah) **alpes'tris, gla'bra, hirsu'ta**, or **vulga'ris**. European species used in hernia, dropsies, urinary and renal diseases; rupture wort, rupture herb; astringent and diuretic.

Herniated, hur'ne-a-ted. Term applied to part enveloped in a hernial sac.

Herniemphragmus (hur-ne-em-frag'mus) or **Herniemphraxis**, hur-ne-em-fraks'is (*hernia, emphragmos*, obstruction). Mechanical obstruction of the hernial canal for radical cure of hernia.

Herniencoleosis, hur-ne-en-kol-e-o'sis (*hernia, en*, in, *koleos*, sheath). Invagination of integument into the inguinal canal.

Hernioenterotomy, hur-ne-o-en-ter-ot'o-me (*hernia, enteron*, intestine, *tome*, incision). Herniotomy with enterotomy.

Herniolaparotomy, hur-ne-o-lap-ur-ot'o-me (*hernia, lapara*, the loins, *tome*, incision). Abdominal section practised in case of hernia.

Herniol'ogy (*hernia, logos*, discourse). Discourse on or description of hernia.

Herniopuncture, hur-ne-o-punk'shur. Operation of puncturing a hernia.

Hernioschoncus, hurn-e-os-kon'kus (*hernia, osche*, scrotum, *onkos*, tumor). Scrotal hernia.

Herniotome, hur'ne-o-tome (*hernia, tome*, incision). Knife adapted to operations for hernia.

Herniotomy, hur-ne-ot'o-me (same etymon). See *Celotomy*.

Hernious, hur'ne-us. Hernial.

Heroic, he-ro'ik. Epithet applied to remedies or practice of a violent character.

Herophilus (her-of'il-us), **tor'cular of.** See *Torcular*.

Herpedon (hur-pe'don) or **Herpen**, hur'pen. Herpes.

Herpes, her'pees (*herpo*, to creep, because it creeps and spreads about the skin). *Tetter, Fret.* Vesicular disease, which, in most of its forms, passes through a regular course of increase, maturation, decline, and termination in from ten to fourteen days. Vesicles arise in distinct but irregular clusters, commonly appearing in quick succession, and near together, on an inflamed base; generally attended with heat, pain, and considerable constitutional disorder. The name has been applied to a large number of dissimilar diseases. The ancients had three varieties: the miliary, vesicular, and eroding. The following varieties are usually described: 1. *Herpes phlyctænodes*, herpes miliaris, ecphlysis herpes miliaris, nirles, in which the vesicles are millet-sized; pellucid; clusters commencing on an uncertain part of the body and being progressively strewed over the rest of the surface; succeeded by fresh crops. 2. *Herpes zoster*, zoster, zona ignea or serpiginosa, ignis Persicus, cincilla, cingulum, sacer ignis, ecphlysis herpes zoster, herpes periscelis, erysipelas zoster or phlyctænoïdes or pustulosa, zona, circinus, perzoma; shingles, in which the vesicles are pearl-sized, the clusters spreading round the body like a girdle, at times confluent, and occasionally preceded by constitutional irritation. A form of this affection seen on the side of the nose, the upper eyelid, and the forehead is called herpes zoster frontalis or ophthalmicus, browshingles. 3. *Herpes circinatus*, formica ambulatoria, annulus repens, herpes serpigo, tinea circinata, serpigo, ecphlysis herpes circinatus, ringworm, vesicular ringworm, consisting of vesicles with a reddish base, uniting in rings, the area of the rings slightly discolored; often followed by fresh crops. 4. *Herpes labialis*, and 5, *Herpes præputialis*, aphthæ præputii, ulcuscula præputii, appearing, respectively, on the lips and prepuce. 6. *Herpes iris*, iris rainbow worm, occurring in small circular patches, each composed of concentric rings of different colors. To these may be added *Herpes exedens*, forms of which are H. esthiomenus or depascens or ferus or estiomenus or ferox, ecphlysis herpes exedens, darta excoriativa or maligna, lupus non exedens, vitiligo, leuce, formica corrosiva, formix, papula fera, ulcerative ringworm, agria, in which the vesicles are hard; clusters thronged; fluid dense, yellow, or reddish, hot, acrid, corroding the subjacent skin, and spreading in serpentine trails. **H. auricula'ris**, zoster auricularis. **H., bilat'eral**, zoster attacking both sides of the body at once. **H., black**, H., hemorrhagic. **H. cerdo'num**, H. of those working with their hands in their occupations. **H. cervi'cis**, vesicular eruption on cervix uteri. **H. chron'icus**, lichen planus. **H. circina'tus**, see *Herpes*. **H. colla'ris**, eruption on neck of priests and others who wear dyed goods around their necks. **H., con'fluent**, probably a form of H. zoster, with neuralgia and general disturbance of the system. **H. conjuncti'væ**, conjunctivitis phlyctænulosa. **H. cor'neæ**, phlyctenular corneitis or keratitis; inflammation of the cornea, accompanied with the appearance of vesicles. When the latter are numerous and occupy considerable expanse of the cornea, the affection is known as pannus scrofulosus; see *Ophthalmia* and *Corneitis*. **H. crusta'ceus**, impetigo; eczema impetiginosum. **H. depas'cens**, H. exedens; lupus; see *Herpes*. **H. desqua'mans**, tinea imbricata. **H. devas'tans**, lupus vulgaris. **H. epizoö'ticus contagio'sus**, contagious herpetoid affection of throat and other parts of the body, said to be derived from foot-and-mouth disease of cattle; aphtha epizoötica. **H. ero'dens**, herpetic eruption with destruction of tissue. **H. esthiom'enus** or **estiom'enus**, H. exedens; see *Herpes*. **H. exe'dens**, see *Herpes* and *Lupus*. **H. facia'lis**, herpes of the face. **H. farino'sus**, eczema papulosum; pityriasis. **H. fe'rox** or **fe'rus**, H. exedens; lupus; see *Herpes*. **H. figura'tus**, herpes. **H. furfura'ceus**, pityriasis. **H. furfura'ceus circina'tus**, lepra; H. exedens. **H. genita'lis**, acute H. of genital organs of male. **H. gestatio'nis**, chronic herpetic eruption in latter stages of pregnancy; impetigo herpetiformis; pemphigus. **H., gut'tural**, pharyngitis, diphtheritic. **H., hemorrha'gic**, herpes with exudation of blood into the vesicles; a serious condition. **H. hu'midus exul'cerans**, impetigo. **H. impetiginifor'mis** or **impetigino'sus**, impetigo herpetiformis. **H. of i'ris**, eczema impetiginosum; tinea circinata; t. tonsurans; see *Herpes*. **H. labia'lis**, see *Herpes*. **H. maculo'sus**, H. attended with loss of hair; H. ton-

surans maculosus; tinea tonsurans. **H. malig'nus,** lupus. **H. milia'ris,** H. phlyctænoides; miliaria; see *Herpes*. **H. mor'dax,** lupus. **H. neurit'icus,** zoster. **H. ophthal'micus,** see *Herpes*. **H. periscelis,** H. zoster. **H. phagedæ'nicus,** lupus exedens. **H. phlyctænoï'des,** see *Herpes*. **H. præputia'lis,** see *Herpes*. **H. progenita'lis,** acute H. of the male genital organs. **H. pseudosyph'ilis,** H. progenitalis. **H. pudenda'lis,** acute H. of female genital organs. **H. pustulo'sus,** impetigo; acne; sycosis. **H. pyæ'micus,** impetigo herpetiformis. **H. ro'dens,** lupus. **H. scrophulo'sus,** psoriasis. **H. serpi'go** or **serpigino'sus,** H. circinatus; lupus; eczema impetiginosum. **H. sic'cus,** H. furfuraceus. **H. squamo'sus,** psoriasis; eczema squamosum. **H. squamo'sus mad'idans,** eczema rubrum. **H. ton'dens** or **ton'surans,** ringworm; porrigo decalvans; mycosis tricophytina; tinea tonsurans; t. tricophytina; t. circinata. **H. unilatera'lis,** zoster. **H. uteri'na,** H. cervicis. **H. veg'etans,** impetigo herpetiformis. **H. vesiculo'sus,** tinea tonsurans. **H. vo'rax,** lupus vorax. **H. vulva'ris,** H. pudendalis. **H. zos'ter,** see *Herpes, H. gestationis, Zoster*. **H. zos'ter ophthal'micus,** severe form of zoster attacking the eyes.

Herpesthiom'enus (*herpes, esthio,* to eat). Lupus exedens.

Herpes'tis cuneifo'lia or **monie'ria** or **monnie'ra.** Species of Scrophularineæ, of U. States and India; antipyretic, aperient, diuretic.

Herpet'ic. Of nature of herpes; relating to herpes.

Herpetiform, hur-pet'i-form (*herpes* and *forma*). Resembling or possessing the character of herpes.

Her'petism. Dartrous diathesis; chronic constitutional condition inducing disease of the skin; tendency or liability to eruptions of herpes.

Herpetog'raphy (*herpes, grapho,* description). Description of the different forms of herpes.

Herpetol'ogy. Treatise on herpes; also on reptiles (*herpeton,* reptile).

Herpeton, hur'pet-on. Creeping eruption or ulcer.

Herpylos, hur'pil-os. Thymus serpyllum.

Hesperetin (hes-per-et'in) or **Hesperrhetin,** hes-perrhet'in. $C_{16}H_{14}O_6$. When hesperidin is acted on by dilute acids it is converted into hesperetin and glucose.

Hesper'idin. $C_{22}H_{26}O_{12}$. Glucoside from bitter orange- and lemon-peel; substance of similar name is derived from shaddock.

Hesperis alliaria, hes'per-is al-le-ah're-ah (*hespera,* evening). Alliaria. **H. matrona'lis,** dame's violet; European plant, used in dysuria, colds, etc.

Hesselbach (hes'sel-bach), **hernia of.** Crural hernia with multilocular sac; see *Merocele*. **H., tri'angle of,** see *Triangle*.

Hetæ're-col'ica (*hetaira,* prostitute, *kolikos,* affected with colic). Colica scortorum or colic of prostitutes.

Heteradelphia, het-er-ad-elf'e-ah (*heteros,* another). Double monstrosity, of which one portion may be regarded as the stem or trunk to which another organized part, less developed than itself, is affixed as a parasite.

Heteradelphus, het-er-ad-el'fus (*hetero, adelphos,* brother). Monster in condition of heteradelphia.

Heteracephalus, het-er-ah-sef'al-us (*hetero, kephale,* head). Monstrosity with two dissimilar heads.

Heterade'nia (*hetero, aden,* gland). Accidental tissue having glandular structure, but occurring in parts devoid of glands.

Heteraden'ic or **Heteradenoid,** het-er-ad'en-oid. Relating to heteradenia or abnormal gland-structure.

Heteradenoma, het-er-ad-en-o'mah. Glandiform tumor in an unusual locality.

Hetero, het'er-o (*heteros,* other). In composition, other.

Heteroalbumose, het-er-o-al'bu-moze. Form of albumose resembling globulin, insoluble in distilled water, coagulable by heat.

Heteroautoplasty, het-er-o-awt'o-plast-e. Plastic surgery using another part or individual for flaps.

Heteroblastic, het-er-o-blas'tik (*hetero, blastos,* formative). Producing different kind of tissue or structure.

Heterocele, het-er-o-se'le (Eng. het'er-o-seel) (*hetero, kele,* tumor). Hernia into another organ, as the rectum when prolapsed.

Heterocephalous, het-er-o-sef'al-us. Monster having two dissimilar heads.

Heterochiral, het-er-o-ki'ral (*hetero, cheir,* hand). Term to express motion of a horse, as in trotting, when the hind and fore feet act together.

Heterochroic (het-er-o-kro'ik) or **Heterochro'mous** (*hetero, chroia,* color). Having different color or colors.

Heterochromatosis, het-er-o-kro-mat-o'sis (*hetero, chroma,* color). Abnormal discoloration of skin, as seen in the blueness of surface after use of nitrate of silver; argyria.

Heterochronia (het-er-o-kron'e-ah) or **Heteroch'ronism** (*hetero, chronos,* time). Deviation as to time in the formation or action of parts.

Heterochronic (het-er-o-kron'ik) or **Heteroch'ronus** (*hetero, chronos,* time). Relating to difference of time; a *heterochronic pulse* is one of varying rhythm, an irregular or intermittent pulse.

Heterochymeusis, het-er-o-ke-mu'sis (*hetero, chumeusis,* mixture). State of the blood in which it contains other matters than in health, as urea, bile, etc.

Heteroclite, het'er-o-klite (*hetero, klino,* to bend). See *Homology* and *Tissues*.

Heteroc'litous. Abnormally or unnaturally bent or distorted.

Heterocrania, het-er-o-kran'e-ah. Hemicrania; unsymmetrical condition of two sides of the skull.

Heterocrasia, het-er-o-kraz'e-ah (*hetero, krasis,* state of humors). Unnatural condition or mixture of humors of the body.

Heterocrinia, het-er-o-krin'e-ah (*hetero, krino,* to separate). Modification in the character or situation of secretions.

Heterocrisis, het-er-ok'ris-is. Abnormal or unnatural crisis of disease.

Heterodermotrophy, het-er-o-derm-ot'ro-fe (*hetero, derma,* skin, *trophe,* nourishment). Change or impairment of nutrition of skin.

Heterodesmotic, het-er-o-des-mot'ik (*hetero, desmos,* bond). Binding other parts. **H. fi'bres,** fibres of nerves associating nervous centres with other parts of the nervous system or with external organs.

Heterodidymia (het-er-o-did-im'e-ah) or **Heterodymia,** het-er-o-dim'e-ah (*hetero, didumos,* twin). Heteradelphia.

Heterodidymus, het-er-o-did'im-us. Heteradelphus.

Het'erodyme. Monstrosity in which supernumerary fœtus has an imperfectly developed head connected by the neck or an incomplete thorax.

Heterogeneous, het-er-o-je'ne-us (*hetero, genos,* kind). Of a different kind.

Heterogenesia, het-er-o-jen-es'e-ah (*hetero, genesis,* generation). Want of power of fecundation, as sometimes occurs in crossing breeds of animals.

Heterogenesis, het-er-o-jen'es-is (*hetero, genesis,* generation). Anomaly in organic formation; abrogenesis. Formation and development of offspring, which undergo a different existence from that of the parent. See *Generation*.

Heterogenetic, het-er-o-jen-et'ik (same etymon). Relating to heterogenesis; resulting from external causes.

Heterogeny, het-er-oj'en-e (same etymon). Generation without sexual organs or intercourse; heterogenesis.

Heteroglobulose, het-er-o-glob'u-loze. Result of digestive action on globulin.

Heteroinfection, het-er-o-in-fek'shun. Infection from without, not originating in the body. Infection through one who is not himself infected.

Heteroi'osis. Change, as of structure.

Heterolalia, het-er-o-lal'e-ah (*hetero, laleo,* to speak). Using words not intended; heterophonia.

Heterologous (het-er-ol'o-gus) **tis'sues** (*hetero, logos,* condition). Different in shape or structure from that which is natural or usual. See *Tissues*.

Heterology, het-er-ol'o-je (same etymon). Formation of structure or tissue different from that in which it is developed or from some structure or tissue taken as a standard.

Heterolopy, hel-er-ol'o-pe (*hetero, lopos,* bark). Formation of morbid crusts or scales.

Heterometria, het-er-o-met're-ah (*hetero, metron,* measure). Variation in the quantity of parts.

Heteromorphism, het-er-o-morf'izm (*hetero, morphe,* shape). Deviation from the natural shape of parts. Crystallization in different forms.

Heteromorphosis, het-er-o-morf-o'sis (*hetero, morphe,* shape). Malformation; genus of skin diseases, including nævus, polytrichia, and other malformations.

Heteromorphous, het-er-o-mor'fus (same etymon). Of different form; heterologous or polymorphous. See *Homology.*

Heteronomous, het-er-on'o-mus (*hetero, nomos,* law). Governed by laws which regulate other bodies. Of different structure. Abnormal.

Heteronymous, het-er-on'im-us (*hetero, onuma,* name). Crossed.

Heteropagia, het-er-o-paj'e-ah (*hetero, pago,* to unite together). Double monstrosity in which the accessory subject is very small and imperfect, but provided with a distinct head and at least rudimental lower limbs, its body being implanted on the anterior surface of the body of the principal subject. The monster is called *Heteropagus.*

Heteropathy, het-er-op'ath-e (*hetero, pathos,* affection). Counter-irritation; allopathy.

Heterophasia, het-er-o-faz'e-ah (*hetero, phasis,* speech). Heterolalia; heterophonia.

Heterophemy, het-er-o-fe'me (*hetero, phemi,* to speak). Heterophonia.

Heterophlegmasia, het-er-o-fleg-maz'e-ah (*hetero, phlegmasia,* inflammation). Counter-irritation.

Heterophonia, het-er-o-fo'ne-ah (*hetero, phone,* voice). Cracked or broken voice; change of the voice or speech; speaking words not intended.

Heterophoria, het-er-o-for'e-ah (*hetero, phoros,* carrying). Departure of lines of vision from the parallel, as exophoria, esophoria, hyperphoria, according as the lines tend outward, inward, or one above the other.

Heterophthalmia (het-er-of-thal'me-ah) or **Heterophthal'mus** (*hetero, ophthalmos,* eye). Difference in the two eyes, as when one squints or is of a different color or size.

Heteroplasia, het-er-o-plaz'e-ah (*hetero, plasso,* to form). Formation of a heteroplasm or abnormal tissue or structure.

Heteroplasm, het'er-o-plazm. Morbid formation foreign to the economy, composed of elements different from those found in it in the normal condition.

Heteroplastic, het-er-o-plas'tik. Relating to, or having the nature of, a heteroplasm; heterologous.

Heteroplas'tid. Organ whose cells are divided in their duties in maintaining the life of the individual and of the species.

Heteroplasty, het'er-o-plas-te. Irregular plastic or formative action or operation; plastic operation in which the lost surface is filled by drafts upon other persons, as in the transference of grafts of skin in loss of superficial soft parts.

Heteropodia (het-er-o-pod'e-ah) or **Heteropody,** het-er-op'od-e (*hetero, pous,* foot). Condition in which the feet differ in size. See *Heteropus.*

Heteroprosopus, het-er-o-pros-o'pus (*hetero, prosopon,* countenance). Monster having two faces, usually dissimilar.

Heteropus, het'er-op-us (*hetero, pous,* foot). One who has one foot different from the other.

Heterorexia (het-er-or-eks'e-ah) or **Heterorhex'ia** (*hetero, orexis,* appetite). Depravation of appetite.

Heterorrhythmus, het-er-or-rhith'mus (*hetero, rhuthmos,* rhythm). Having another rhythm, as the pulse when it is such as is usually felt at a different age.

Heterosarcoses, het-er-o-sar-ko'sees (*hetero, sarx,* flesh). Class of diseases which consist in the formation of accidental or heterologous tissues.

Heteroscelous, het-er-os'sel-us (*hetero, skelos,* leg). Having legs of unlike appearance or unsymmetrical.

Heteroscopy, het-er-os'ko-pe (*hetero, skopeo,* to see). Unnatural vision; dissimilar vision of the two eyes.

Heterostomy, het-er-os'to-me (*hetero, stoma,* mouth). Want of symmetry of the two sides of the mouth.

Heterotaxia (het-er-o-taks'e-ah) or **Heterotax'is** (*hetero, taxis,* order). Malformation consisting in the general transposition of organs; change in the relation of organs, as of the viscera.

Heterothermal, het-er-o-thur'mal (*hetero, therme,* heat). Of different temperature; cold-blooded.

Heterotop'ia. Heterotopy.

Heterotopy, het-er-ot'o-pe (*hetero, topos,* place). Deviation from the natural position of parts, objective heterotopia. Subjective heterotopia is a sensation of displacement or approximation, such as is experienced in the stump of an amputated limb. Plastic heterotopia is formation of tissue in unusual localities. **H., troph'ic,** heteroplasia.

Heterotrichosis, het-er-o-trik-o'sis (*hetero, thrix,* hair). Having hair of different shades or colors.

Heterotropa asaroïdes, het-er-ot'ro-pah as-a-ro-e'dees. Species of asarum, having carminative, diaphoretic, and diuretic properties.

Heterotrophia, het-er-o-trof'e-ah (*hetero, trophe,* nourishment). Abnormal or disordered nutrition, from whatever cause.

Heterotrop'ia (*hetero, trepo,* to turn). Act of turning in a wrong direction. Strabismus.

Heterot'ropous (*hetero, trepo,* to turn). Turned in an unusual or abnormal direction.

Heterotypic, het-er-o-tip'ik (*hetero, tupos,* type). Term referring to a double monster in which the parasite is attached to the front part of the main individual.

Heteroxanthine, het-er-o-zan'theen. $C_6H_6N_4O_2$. Leucomaïne discovered in urine. See *Leucomaïnes* (table).

Hettocyrtosis, het-to-sur-to'sis (*hetton,* slight, *kurtosis,* curvature). Slight curvature.

Heubner's disease. Syphilitic affection of the arteries of the encephalon.

Heuchera, hoich-a'ra (after Prof. Heucher, botanist at Wittemberg). H. cortusa. **H. acerifo'lia** or **cortu'sa,** *Alum root, American sanicle, Groundmaple, Cliffweed, Splitrock.* The root is a powerful astringent. The American Indians apply the powdered root to wounds, ulcers, and cancers. **H. cortu'sa, H. cylin'drica, H. micran'tha, H. parvifio'ra,** and **H. pubes'cens,** all growing in U. S., are astringent. **H. Richardso'nii,** used medicinally by the Indians, who chew its astringent root, and apply it as a vulnerary to wounds and sores. **H. villo'sa,** indigenous; properties like those of H. cortusa. **H. vis'cida,** H. cortusa.

Heudelotia (hu-del-o'she-ah) **Africa'na** (after Heudelot, garden director on the Senegal). See *Bdellium, Balsamodendron Africanum.*

Hevea (he've-ah) **Brasilien'sis.** Tree of Brazil, a source of caoutchouc. **H. Guianen'sis,** Siphonia elastica; see *Caoutchouc.*

Hex'ad (*hex,* six). In chemistry, sexvalent.

Hexagium, heks-aj'e-um (*hex,* six). Sixth part of an ounce.

Hexagon, heks'a-gon (*hex,* six, *gonia,* angle). Having six sides or angles. **H., arte'rial,** circle of Willis.

Hexathyridium pinguicola, heks-ath-ir-id'e-um pin-gwik'o-lah (*hex,* six, *thuridion,* a little door). Species of trematode worms; see *Parasites.* **H. vena'rum,** trematode worms found in veins and sputa; see *Parasites.*

Hexchlorethene, heks-klor-e'theen. Trichloride of carbon.

Hexicology, heks-ik-ol'o-je (*hexis,* habit, *logos,* discourse, description). Discourse on, or description of, habits or constitution.

Hexis, heks'is. Habit of body, constitution; hence hectic, cachectic, etc.

Hexyl chloral, heks'il klo'ral. $C_6H_9Cl_3O$. Obtained by distillation from butyl chloral. Hypnotic.

Hexylamine, heks-il'am-een. $C_6H_{15}N$. Ptomaine

occurring in the putrefaction of yeast; also found in cod-liver oil. Caproylamine.

Hey'dia hor'rida. Malabar tree, seeds of which are used in mania, the bark in affections of the bowels and dropsy.

Hey's amputa'tion (after Mr. William Hey, surgeon, Leeds, England). Amputation of the foot by disarticulation of metatarsal from tarsal bones, the internal cuneiform bone being sawn across. **H.'s lig'ament,** falciform process of fascia lata. **H.'s saw,** saw for extraction of fragments of the cranium after fractures.

Hi'ant (*hio*, to be opening). Gaping, yawning; having a fissure.

Hiatus, he-at'us (*hio*, to gape). Foramen or aperture. Mouth; vulva. Yawning. See *Helicotrema, Coloboma.* **H. aor'ticus diaphrag'matis,** aortic foramen, opening in the diaphragm for the passage of the abdominal aorta. **H. cana'lis facia'lis** or **Fallo'pii,** opening in aquæductus Fallopii. **H. cana'lis sacra'lis,** H. sacralis. **H. Fallo'pii,** opening into aquæductus Fallopii. **H. femora'lis,** crural ring. **H. interos'seus antibrach'ii,** space between oblique ligament of radius and interosseous ligament. **H. Magen'dii,** foramen of Magendie. **H. maxilla'ris,** opening between middle meatus of nose and antrum of Highmore. **H. obturato'rius,** aperture of obturator canal in the pelvis. **H. occip'ito-petro'sus,** foramen lacerus posterius. **H. œsophage'us,** opening for œsophagus in diaphragm; foramen œsophageum. **H. pel'vicus latera'lis,** aperture for departure of vessels from the pelvis below H. obturatorius. **H. sacra'lis,** opening at lower extremity of sacral canal made by want of completion of laminæ of last sacral vertebra. **H. of Scar'pa,** H. of Winslow. **H. semiluna'ris,** opening on external wall of middle meatus of the nose; opening of brachial fascia. **H. sphenopetro'sus,** foramen lacerum medius. **H. spina'lis congen'ita,** spina bifida. **H. subarcua'tus,** fossa on posterior surface of petrous portion of temporal bone, lodging flocculus of cerebellum. **H. ve'næ saphe'næ par'væ,** aperture for external saphenous vein as it passes into deep fascia of leg. **H. of Winslow,** *foramen of Winslow;* opening behind the lesser omentum and the vessels and nerves of the liver, forming communication between the peritoneal cavity and that of the omenta.

Hibernation, hi-bur-na'shon (*hiberno*, to winter). *Winter-sleep.* State of torpidity in which certain animals pass the winter, the organic actions being reduced so low that animation seems suspended.

Hibis'ci cap'sulæ. Unripe capsules of Hibiscus esculentus, having demulcent and diuretic properties.

Hibis'cus or **Hibis'cum.** Althæa. **H. abelmos'chus,** *Abelmosch, Abelmusk, Maskmallow,* ord. Malvaceæ. Name of the plant whose seeds are called grana moschi or musksеed. Indigenous in Egypt and the Indies. The seeds are chiefly used as perfumes. **H. esculen'tus,** *Okra, Okro, Gombo;* plant, the green pods of which abound in mucilage, and are used for soups. In the East the root is employed as a demulcent like althæa. **H. moscha'tus,** *Marsh hibiscus;* indigenous; properties like those of marshmallow. **H. popule'us,** balimbago; small Molucca tree; fruit is full of a juice similar to camboge; root is emetic; used in chronic diarrhœa, colic, dyspepsia, etc. **H. ro'sa Sinen'sis,** rose of China; astringent and demulcent. **H. tilia'ceus,** corkwood; mucilaginous and emollient; properties belonging also to **H. trionum**—*Venice mallow, Flower of an hour*—of U. States and Southern Europe, and **H. vitifo'lius,** of E. Indies.

Hibrida, hib'rid-ah. Hybrid.

Hiccough, hik'kup ([G.] *hickkop,* by onomatopœia). See *Singultus.*

Hickory, hik'o-re. Name of several American trees of the genus Carya, order Juglandaceæ. The leaves are usually aromatic, and are reputed antispasmodic; the bark of the species having bitter nuts, as Carya amara and C. porcina, is astringent. The fruit of Carya oliviæformis is pecan or peccan nut, and of C. sulcata and C. alba, shellbark or shagbark. The hickory nut is called also kiskitomas nut.

Hidden (hid'n) **seiz'ures.** Obscure encephalic and spinal attacks of epileptoid character, which may be owing to trachelismus or spasmodic action of muscles of the neck from pressure of veins of that region.

Hide'bound. Having tightness of skin, as in scleroderma.

Hidradeni'tis or **Hydroadenitis,** hid-ro-ad-en-e'tis. Inflammation of sweat-glands.

Hidrischesis, hid-ris'kes-is. Hidroschesis.

Hidroa, hid-ro'ah (*hidros,* sweat). Desudatio; hydroa; sudamina.

Hidroadenitis, hid-ro-ad-en-e'tis (*hidros, aden,* gland, *itis,* inflammation). Inflammation of sweat-glands.

Hidroanchone, he-dro-an'kon-e (*hidros, anchone,* strangling). Miliaria aginosa.

Hidrocryptoses, hid-ro-krip-to'sees (*hidros, kruptos,* concealed). Cutaneous diseases involving the apparatus of perspiration.

Hi'dromancy. Prognosis from perspiration.

Hidronosus (hid-ron'o-sus) or **Hidronu'sus** (*hidros, nosos* or *nousos,* disease). Disease accompanied by violent sweats; sudor Anglicus; disease of the sweat-apparatus.

Hidropedesis, he-dro-ped-a'sis (*hidros, pedao,* to bound). Excessive or colliquative sweating.

Hidrophoros, hid-rof'or-os (*hidros, phero,* to carry). Sweat-producing; sudoriferous.

Hidroplania, hid-ro-plan'e-ah (*hidros, plane,* wandering). Sweating in an unusual location; vicarious sweating.

Hidropoietic, hid-ro-poi-et'ik (*hidros, poieo,* to make). Sweat-producing; sudoriferous.

Hidropyra (hid-rop'ir-ah) or **Hidropyretus,** hid-ro-pir'et-us (*hidros, pur,* fever). Sweating fever; sudor Anglicus.

Hidrorrhœa, hid-ror-rhe'ah (*hidros, rheo,* to flow). Excessive or colliquative sweating.

Hid'ros. Sweat.

Hidrosadenitis, hid-dros-ad-en-e'tis. Inflammation of sweat-glands.

Hidroschesis (hid-ros'kes-is) or **Hidris'chesis** *hidros, ischo,* to restrain). Suppression of perspiration; anidrosis.

Hidroses, hid-ro'sees. Cutaneous diseases accompanied with disturbance of functions of the sudoriferous apparatus.

Hidrosis, hid-ro'sis. Sweating; hidrotic fever. **H. malig'na,** miliaria; sudor Anglicus. **H. sim'plex,** hyperhidrosis.

Hidroterion, he-dro-ter'e-on (*hidros*). Sweating-room or achicolum in ancient bagnios.

Hidrote'rium. Sudorific.

Hidrotic, hid-rot'ik. Sudorific; agent increasing the secretion of sweat. **H. fever,** form of puerperal fever attended with excessive sweating.

Hidrotium, hid-ro'te-um (dim. of **Hidros**). Gentle sweat or perspiration.

Hidrotopoiesis, hid-ro-to-poi-a'sis (*hidros, poieo,* to make). Production or secretion of perspiration.

Hidrotopoiet'ic (*hidros, poieo,* to make). Sudorific.

Hiera (*hieros,* holy). Old name for medicine. **H. of col'ocynth** or **diacolocyn'thidos,** electuary composed of colocynth, agaric, germander, white horehound, stæchas, sagapenum, parsley, round birthwort root, white pepper, spikenard, cinnamon, myrrh, saffron, and honey. **H. Loga'dii,** Hiera picra. **H. no'sos,** epilepsy. **H. pi'cra** (*hieros,* holy, *pikros,* bitter), holy bitter, formerly called *Hiera Logadii* when made into electuary with honey; mixture of Socotrine aloes and Canella alba; see *Pulvis aloës cum canellâ.* **H. syr'inx,** holy tube; vertebral column.

Hieracium (he-er-ah'se-um) (*hierakion,* hawk-weed, from *hierax,* a hawk) **auric'ula.** Orange mouse-ear of Europe; laxative. **H. Grono'vii,** hairy hawk-weed; herb of N. America, order Compositæ; used as application for toothache and warts. **H. lachenal'ii,** H. murorum. **H. muro'rum,** golden lungwort, French l., wall hawk-weed; plant of Europe and Asia; astringent, tonic, and expectorant. **H. olera'ceum,** Sonchus oleraceus. **H. Pelletiera'num** or **H. pilo-**

sel'la, mouse-ear; mouse-ear hawk-weed. This plant contains a bitter, lactescent juice having a slight astringency; the herbs and flowers are expectorant and astringent, and root is antiperiodic. **H. veno'sum**, rattlesnake weed, veiny hawk-weed, bloodwort; indigenous; has similar properties; said to be a remedy for snake-bite.

Hieranosus, he-er-an'os-us (holy disease) or **Hieronu'sus**. Chorea, convulsion, epilepsy.

Hierax, he'er-aks. Sparrow-hawk; bandage, like claw of hawk, applied over the nose.

Hierobotane, he-er-o-bot'an-e (*hieros*, holy, *botane*, herb). Verbena officinalis.

Hieroglyphics, hi-er-o-glif'iks (*hieros*, holy, *glupho*, to carve). Signs employed in medicine; folds in the hands, feet, and forehead which afford chiromancy its pretended oracles.

Hieron'osus. Chorea, convulsion, epilepsy.

Hieropyra, he-er-op'ir-ah (*hieros*, holy, *pur*, fever). Erysipelas.

High mallow. Malva sylvestris. **H. operation for stone**, suprapubic lithotomy.

High'more, an'trum of. See *Antrum*. **H., body of**, mediastinum testis. **H., si'nus of**, see *Antrum of Highmore*.

Hik'ry pik'ry (*Hiera picra*). Pulvus aloës et canellæ.

Hill-berry. Gaultheria.

Hill-fever. Jungle-fever; modified remittent occurring in hilly districts of India.

Hilton's mus'cle (after Hilton, English surgeon of 19th century). Compressor sacculi laryngis. **H.'s sac**, pouch directed upward from anterior part of ventricle of larynx.

Hi'lum (improperly **Hilus**, the black spot on the top of a bean). Small blackish tumor formed by the protrusion of the iris through an opening in the transparent cornea, so called from its comparison with the hile or black mark on one extremity of Vicia faba. Fissure or space through which vessels, nerves, etc. enter an organ, as the kidney, spleen, etc. Clavus.

Hilus, he'lus. Hilum. **H. of cor'pus denta'tum**, space in which white fibres enter the corpus dentatum. **H. of fas'cia denta'ta**, portion of fascia dentata through which the pyramidal cells of the hippocampus major pass. **H. hep'atis**, transverse fissure of liver; see *Liver*. **H. of kid'ney**, internal concave edge of kidney. **H. liena'lis**, hilum of spleen. **H. lie'nis**, concave part of spleen. **H. of lung**, H. pulmonis. **H. nu'clei denta'ti**, H. of olivary body; H. olivæ. **H. oli'væ**, portion of olivary body through which white fibres make their exit. **H. of the o'vary**, concave edge of that organ. **H. placen'tæ**, point of union of placenta and umbilical cord. **H. pulmo'nis**, space for entrance of blood-vessels and tubes into the lung at its root. **H. rena'lis**, hilum of kidney. **H. of spleen**, H. lienis.

Hilusstroma, he-lus-stro'mah. Canaliculated connective tissue near hilum of ovary.

Hil'wort, Mentha pulegium.

Himantoma (he-man-to'mah) or **Himanto'sis**, he-man-to'sis. Himas.

Himas, he'mas (*himas*, thong of leather). Uvula; likewise elongation and extenuation of it. Staphylœdema.

Himeros, him'er-os. Amorous desire; salacitas; prurigo.

Hind'berries. See *Rubus idæus*.

Hind-brain. Posterior cerebral vesicle. Afterbrain in fœtus, including, in the adult, the cerebellum, pons Varolii, and upper portion of the floor of the fourth ventricle. Epencephalon.

Hind-head. Occiput.

Hinge-joint. Ginglymus.

Hin'gra. Inferior variety of asafœtida.

Hip. Haunch; hypochondriasis. **H. bone**, ilion. **H. disease**, coxarum morbus. **H. gir'dle**, pelvic arch. **H. gout**, neuralgia femoro-poplitæa. **H. joint**, coxofemoral articulation. **H. joint disease**, coxalgia. **H. tree**, Rosa canina.

Hippanthropy, hip-anth'ro-pe (*hippo*, *anthropos*, man; Hippanthropos was the fabulous centaur). Melancholy in which the patient believes himself changed to a horse.

Hippasia (hip-paz'e-ah), **Hippeia** (hip-pi'ah), or **Hippeusis**, hip-pu'sis. Equitation.

Hipped, hip'd. Hypochondriac.

Hippiater (hip-pe-at'ur) or **Hippiatrus**, hip-pe-at'rus (*hippo*, *iatros*, physician). Farrier; horse-doctor. One who treats diseases of domestic animals; veterinary surgeon.

Hippiatria (hip-pe-at-re'ah), **Hippiat'rica**, or **Hippiat'rice**. Science whose object is knowledge of diseases of the horse or of other domestic animals. See *Veterinary art*.

Hippia'tros or **Hippiatrus**, hip-pe-at'rus. Hippiater.

Hippicus, hip'pik-us (*hippos*, horse, because used in getting on horseback). Tibialis anticus muscle.

Hip'po (*hippos*, horse). In composition, horse. It often expresses "greatness, excess," like bou, bu, horse, ox, etc. Arrow-poison of Africa, probably made from strychnos. Ipecacuanha; corruption, in Ireland, of ipecacuanha, hence applied at times in the United States to Euphorbia corollata or American ipecacuanha. **H., In'dian**, Gillenia trifoliata.

Hippocampal fissure, hip-po-kam'pal fis'shur. Transverse fissure of the brain; groove separating the hippocampal convolution from the crus cerebri, dipping into the hippocampus and extending from the internal part of the gyrus fornicatus, behind the corpus callosum, to the unciform process.

Hippocampus major, hip-po-kam'pus ma'jor. Cornu ammonis. **H. mi'nor**, unciform eminence; medullary tubercle or projection observed in the posterior cornu of the lateral ventricle of the brain.

Hippocastanum, hip-po-kas'tan-um. Horse-chestnut; rind is astringent and febrifuge. See *Æsculus*. **H. vulga're**, Æsculus hippocastanum.

Hippocentaurea centaurium, hip-po-sen-taw're-ah sen-taw're-um. Chironia centaurium.

Hippocoryza, hip-po-kor-i'zah. Coryza of horses, symptom of farcy or glanders.

Hippocras, hip'po-kras. See *Claret*.

Hippocrates (hip-pok'rat-ees), **cap of**. Double-headed roller bandage enveloping the head like a cap. **H., fa'cies of**, see *Face*, *Hippocratic*. **H., sa'cred disease of**, epilepsy. **H. sleeve**, conical flannel bag for straining liquids.

Hippocratic, hip-po-krat'ik. Relating to Hippocrates or concerning his doctrine, as H. doctrine, H. face. **H. coun'tenance**, see *Face*. **H. deform'ity of fin'gers**, fingers, Hippocratic. **H. face**, see *Face*.

Hippocratism, hip-pok'rat-izm. Doctrine of Hippocrates, consisting in observing and following nature, as indicated by her presumed efforts and the crises set up by her.

Hippocratist, hip-pok'rat-ist. Partisan of the Hippocratic doctrine.

Hippoglossum, hip-po-glos'sum. Globularia alypum; Ruscus hypoglossum.

Hippogonyolepus, hip-po-gon-e-ol'ep-us (*hippo*, *gonu*, knee, *lepos*, scale). Morbid secretion from the knee of the horse, used in epilepsy; crusta genu equinæ.

Hippolapathum, hip-po-lap'ath-um. Rumex patientia.

Hippolithus, hip-pol'ith-us (*hippo*, *lithos*, stone). Bezoard of the horse.

Hippomane mancinella (hip-pom'an-e man-sin-el'lah) or **manzanillo** (*hippo*, *mania*, madness; horse or violent madness). Manchineel, ord. Euphorbiaceæ. Poisonous tree of tropical America, with milky juice which the Indians use to poison their arrows. A source of caoutchouc. Fruit is highly poisonous. Resting under shade of this tree is said to produce sickness and death. Externally, juice is used for removal of fungous growths.

Hippomanes, hip-pom'an-ees. Secretion from the vagina of a mare in a state of heat. Brownish-green body in the allantoic fluid of the mare. Used, of old, in the preparation of philters.

Hippomel'anin. Dark pigment from melanotic tumor of horse.

Hippomyx'a (*hippo, muxa*, mucus). Hippocoryza. *Hippomyxoma* is a swelling following hippocoryza.

Hippomyzo'sis (same etymon). Glanders.

Hipponosol'ogy (*hippo, nosos*, disease, *logos*, discourse). Description of, or treatise on, diseases of the horse.

Hippopathology hip-po-path-ol'o-je (*hippo, pathos*, disease, *logos*, discourse). Pathology of the horse; hipponosology.

Hippophæs, hip-po-feez'. Sea buckthorn; sallow thorn; used in Norway in arthritic affections and as a diaphoretic in skin diseases.

Hippophagous, hip-pof'a-gus (*hippo, phago*, to eat). Feeding or subsisting on horseflesh.

Hippophagy, hip-pof-a'je. Act of feeding or subsisting on horseflesh.

Hippopus, hip'po-pus (*hippo, pous*, foot). Talipes equinus. See *Kyllosis*.

Hip'pos. Horse.

Hipposelinum, hip-po-sel-e'num. Smyrnium olusatrum.

Hipposteology, hip-pos-te-ol'o-je (*hippo, osteon*, bone, *logos*, discourse). Osteology of the horse.

Hippotomy, hip-pot'o-me (*hippo, tome*, incision). Anatomy of the horse.

Hippuria, hip-pu're-ah. Pathological condition in which there is an excess of hippuric acid in the urine.

Hippu'ric ac'id. Acid found in urine of graminivorous animals. $C_9H_9NO_3$. It is contained in small quantities in human urine, and its amount is increased by taking into the stomach substances containing benzoic acid.

Hippuris (hip-pu'ris) **commu'nis, flu'itans**, or **vulgar'is** (*hippo, oura*, tail). Systematic name of the horse's tail, mare's tail, of Europe and America. Astringent used as tea in diarrhœa and hemorrhage.

Hip'pus. A disease of the eyes in which they perpetually twinkle, like those of a man on horseback; a tremulous condition of the iris, occasioning repeated alternations of contraction and dilatation of the pupil. It is generally allied with nystagmus.

Hips. Fruit of Rosa canina; chiefly used as a confection.

Hi'ra. Jejunum; intestines.

Hirci barbula, hur'se bar'bu-lah. Hircus; hairs of tragus. **H. pi'li**, hairs of axilla.

Hircin, hur'sin (*hircus*, goat). Glyceril compound of hircic acid, oil without color, with strong goat-like smell.

Hircismus, hur-siz'mus (*hircus*, goat). Stinking like a goat; applied especially to the odor of the secretions of the axilla.

Hircus, hur'kus (*goat*). Canthus (greater); hircismus; tragus. **H. ala'rum**, smell of the arm-pits; cinabra.

Hirquitalitas, hurk-we-tal'it-as (*hircus*, a goat). Goat's voice. See *Egophony*.

Hirquus (goat), hurk'wus. Hircus; canthus (greater); hircismus; tragus.

Hirsute, hur'sute (*hirtus*, hairy). Hairy.

Hirsuties, hur-su'she-ees (*hirtus*, hairy). Hairiness; growth of hairs on extraneous parts, or superfluous growth of hair, as in cases of bearded women; hypertrichosis. **H. adna'ta**, congenital hirsuties.

Hir'tate. Hirsute.

Hirudo, hir-u'do. The leech or leach. In medicine, hirudo or sanguisuga medicinalis, bdella medicinalis or medicinal leech, and hirudo sanguisuga officinalis, order of aquatic worms, Gnathobdellidæ, are generally employed. In the United States H. decora is also used. The leech lives in fresh water, and feeds on the blood of animals, which it sucks, after having pierced the skin with its sharp teeth—a habit taken advantage of to produce local bloodletting. A good English leech will take about half an ounce of blood, including that which flows by fomenting the part subsequently; the American leech takes less. **H. artifi'cia**, antlia sanguisuga. **H. dec'ora**, see *Hirudo*. **H. mechan'ica**, artificial leech. **H. medicina'lis**, German leech; hirudo. **H. officina'lis**, Hungarian leech. **H. provincia'lis**, sanguisuga officinalis. **H. troc'tina**, species of leech from Algiers.

Hirundinaria, hir-un-din-ar'e-ah. Asclepias vincetoxicum; Lysimachia nummularia; Chelidonium majus.

Hirundo, hir-un'do. The swallow, the nests of which were once employed as rubefacients, boiled in vinegar. Edible birds' nests of the hirundo esculenta of the Indian Archipelago are highly prized, especially by the Chinese, as an article of diet. They are of a mucilaginous character. See *Alcyon*.

Hispanicum viride, his-pan'ik-um vir'id-e (Spanish green). Cupri subacetas.

Hispiditas, his-pid'it-as (*hispidus*, hairy). Irregular position of eyelashes; distichiasis; phalangosis.

Hispidula, his-pid'u-lah. Antennaria dioica.

Hissing respiration, hiss'ing res-pi-ra'shun. Slight prolonged whistling sound, from presence of mucus obstructing the smaller bronchial ramifications.

Histic, his'tik (*histos*, tissue). Relating to tissues.

His'tin. Fibrin.

Histiogenesis, his-te-o-jen'es-is (*histos*, tissue, *genesis*, formation). Development and formation of tissues; histogeny.

Histioid, his'te-oid. Histoid.

Histiological, his-te-o-loj-ik'l. Histological.

Histiology, his-te-ol'o-je. Histology.

Histoblast, his'to-blast (*histos*, tissue, *blastos*, cell). A cell concerned in tissue-formation.

Histochemia (his-to-kem-e'ah), **Histochemistry** (his-to-kem'is-tre), or **Histochymy**, his-tok'im-e. Chemistry of tissues.

Histodialysis, his-to-de-al'is-is (*histos, dialusis*, dissolution). Morbid dissolution of the tissues.

Histogenesis, his-to-jen'es-is. Histogeny.

Histogenetic, his-to-jen-et'ik (*histos, genesis*, formation). Tissue-making; relating or appertaining to histogeny or the formation and development of the organic textures. **H. el'ements of nutri'tion**, see *Plastic element*. **H. mo'lecules**, see *Plastic element*.

Histogeny, his-toj'en-e (same etymon). Tissue-formation; formation and development of the organic textures. **H. of bone**, osteogeny. **H. of car'tilage**, chondrogenesis.

Histohæmatins, his-to-he'mat-ins. Group of pigments detected in tissues of animals of different species, probably concerned in respiration.

Histoid (his'toid) or **His'tioid** (*histos, eidos*, resemblance). Term applied to textures whose contents closely resemble the normal structure of the body, as fat, hair, teeth, skin, etc. **H. tu'mor**, tumor of connective tissue.

Histological (his-to-loj'ik'l) or **Histiolog'ical.** Relating to histology; applied at times to the natural transformations occurring in the tissues in the embryo, in contradistinction to morphological, which applies to alterations in the form of the several parts of the embryo.

Histologist, his-tol'o-jist. One who is versed in histology.

Histology (his-tol'o-je) or **Histiol'ogy** (*histo, logos*, description). Anatomy of the tissues; microscopic morphology; minute or textural anatomy; general anatomy; minute anatomy of the tissues. Pathological histology or microscopic pathological anatomy is the morbid anatomy of the tissues.

Histolysis, his-tol'is-is (*histos, lusis*, solution). Decay and dissolution of the organic tissues and of the blood; it includes the various forms of retrograde metamorphosis and degeneration and disintegration of tissues.

Histolytic, his-to-lit'ik (same etymon). Relating to histolysis. **H. mo'lecules**, see *Plastic elements*.

Histonomy, his-ton'o-me (*histos, nomos*, law). Aggregate of laws presiding over the formation and arrangement of the organic tissues.

Histophysiology, his-to-fiz-e-ol'o-je. Physiology of tissues; histology applied to study of physiological processes.

History, medical, his'to-re, med'ik'l. Narration of the chief circumstances and the persons connected with them in the progress of medicine.

His'tos (web or tissue). Organic texture.

Histotome, his'to-tome (*histos, tome,* incision). Microtome.

Histotomy, his-tot'o-me (same etymon). Dissection of the tissues.

Histotripsy, his'to-trip-se (*histos, tripsis,* crushing). Écrasement.

Histotrophic, his-to-trof'ik (*histos, trophe,* nourishment). Relating to nutrition of tissues; nourishing to the tissues; see *Plastic element.*

Histozyme, his'to-zime (*histos, zume,* ferment). Soluble ferment presumed to be capable of disintegrating nitrogenous tissues and causing their decomposition.

Histricism, his'tri-sizm. Erect state of the hairs.

Histrionic (his-tre-on'ik) **paral'ysis** (*histrio,* an actor). Paralysis of the facial muscles, causing emotional appearance of the face. **H. spasm,** similar spasm of the facial muscles.

Hive syr'up. Syrupus scillæ compositus.

Hives. Cynanche trachealis; varicella globularis; urticaria varicella. In Scotland, any eruption proceeding from an internal cause; in the United States it is employed most frequently for urticaria. **H., bold,** Cynanche trachealis; urticaria. **H., eat'ing,** Rupia escharotica.

Ho'ang-nan. Bark of Strychnos gaultheriana, from which strychnia and brucine may be obtained; employed in leprosy and various cutaneous affections; tonic, stimulant, antiparasitic; used in scrofula, leprosy, paralysis, etc.

Hoar'hound. Marrubium.

Hoarseness, horse'ness. Change in voice, which loses its smoothness and becomes low and obscure; common symptom in diseases of the larynx and trachea.

Hoar'y pea. Tephrosia Virginiana; root is tonic and anthelmintic.

Hob'nail liv'er. Cirrhosis of the liver; nutmeg liver.

Hoc or **Hocks.** Alcea rosea.

Hock. The ham. Also a kind of Rhine wine.

Hodge's pes'sary. Peculiar U-shaped pessary, usually of rubber.

Hodgkin's (hodj'kin's) **disease** (after Dr. Hodgkin of London). *Glandular sarcoma, Lymphadenoma, Pseudoleucæmia, Adenia, Adenitis.* A chronic morbid affection—a form of scrofulous cachexia and anæmia—mainly characterized by the enormous enlargement of the lymphatic glands of the body, along with a peculiar deposit in the spleen. Iron and cod-liver oil seem to be the best remedies. The prognosis is unfavorable.

Hodgson's disease. Aneurism or atheroma of the aorta. **H.'s opera'tion,** ligation of axillary artery under the clavicle.

Hodograph, hod'o-graf (*hodos,* way, *grapho,* to write). Instrument for registering locomotor movements.

Hoffman's an'odyne. Spiritus ætheris compositus.

Hog cholera, hog kol'e-rah. Disease of swine, symptoms of which are inflammation of the bowels, with ulceration, ecchymoses, nephritis, etc. Several affections have received this name. The disease is produced by a special micro-organism. See *Bacillus of hog cholera.* **H. gum,** doctor gum; glutinous substance from Rhus metopium of Jamaica, or Moronobea coccinea, flowing from incisions in the bark; emetic properties; used in Jamaica for the same purposes as Burgundy pitch. **H. lice,** onisci aselli.

Hog's lard. Adeps præparatus.

Hog'weed. Ambrosia artemisiæfolia.

Hogwort. Heptallon graveolens.

Hoit'zia coccin'ea or **Mexica'na.** Polemoniaceous plant of Mexico; diuretic, cathartic, emetic.

Holagogue, hol'ag-og (*holos,* whole, *agogos,* driving). Capable of driving away every morbid humor.

Holanencephalia, hol-an-en-sef-al'e-ah (*holos,* whole, *anencephalia*). Entire absence of brain; same as anencephalia.

Holarthritis, hol-ar-thre'tis (*holos,* whole, *arthritis*). Gout in all the joints; universal gout; polyarthritis.

Holce, hol'se. A drachm.

Hol'cus sor'gum. Panicum Italicum.

Hol'den's line. Groove or furrow in the groin below Poupart's ligament, used as a guiding line in amputations.

Holder. Tenaculum. **H., horizon'tal plane of,** plane of cranium made by lines projected from superior portion of auricular foramen to inferior border of the orbit.

Holes, burnt. Rupia escharotica; noma; pemphigus gangrænosus.

Holigarna longifolia, hol-e-gar'nah lon-je-fo'le-ah. Species of Anacardiaceæ, juice of which is used externally for sores, warts, etc.

Hol'lands. Gin.

Hollarrhena antidysenterica, hol-ar-rhe'nah an-te-dis-en-ter'ik-ah. Of E. Indies; nat. ord. Apocynaceæ; tonic, astringent, anthelmintic; Wrightia antidysenterica. **H. pubes'cens,** plant of India, seeds of which are used in diarrhœa and dysentery.

Hol'ly, Amer'ican. Ilex. **H., com'mon,** Ilex aquifolium. **H., Dahoon',** Ilex vomitoria. **H., emet'ic,** Ilex vomitoria. **H., Europe'an,** Ilex aquifolium. **H., ground,** Chimaphila umbellata; Gaultheria procumbens; Pyrola maculata; Pyrola umbellata. **H., sea,** Eryngium maritimum. **H., South Amer'ican,** Ilex Paraguaiensis.

Hollyhock (hol'le-hok), **com'mon.** Alcea rosea.

Holmes weed. Scrophularia nodosa.

Holmgren's wools. Differently colored skeins of wool, used as tests for color-blindness.

Holmiscus, hol-mis'kus. Alveolus.

Hol'mus. Mortar; trunk of the body.

Ho'lo (*holos,* whole). In composition, the whole.

Holoblastic, hol-o-blas'tik (*holo, blastos,* germ). Term applied to the ova of viviparous animals, in which the whole, or almost all, of the yolk is directly formative, and only a slight part, or no portion, nutritive.

Holocyron, hol-o'sir-on. Teucrium chamæpitys.

Hologangliïtis, hol-o-gan-gle-e'tis (*holo, ganglion, itis*). Cholera.

Holonarcosis, hol-o-nar-ko'sis (*holo, narcosis,* stupor). Narcosis of the whole body; complete narcosis.

Holopathy, hol-op'a-the (*holos,* whole, *pathos,* affection). Doctrine which teaches that diseases are but phases or "episodes" of a general affection of the organism.

Holophlyctides, hol-o-flik'tid-ees. Tumor formed by accumulation of serous fluid under the epidermis.

Holosteosclerosis, hol-ost-e-o-skle-ro'sis (*holo, osteon,* bone, *sclerosis,* hardening). Sclerosis of bones generally.

Holosteum alsine, hol-os'te-um al-se'ne. Alsine media.

Holosteus, hol-os'te-us (*holo, osteon,* bone). Osteocolla.

Holostomum, hol-os'tom-um (*holo, stoma,* mouth). Amphistoma hominis. **H. ala'tum,** entozoon in intestinal canal of the dog.

Holosymphysis, hol-o-sim'fis-is (*holo, sumphusis,* union). Perfect union.

Holotetanus, hol-o-tet'an-us. General tetanus affecting the whole system of the muscles.

Holotomy, hol-ot'o-me (*holo, tome,* incision). Complete excision.

Holotonia (hol-o-ton'e-ah) or **Holot'ony** (*holo, teino,* to stretch). Spasm or tetanus of the whole body.

Holotonicus, hol-o-ton'ik-us. Relating to holotonia.

Hol'stein disease. Endemic syphilitic disease.

Holy bit'ter. Hiera picra.

Homagra, ho'mag-rah (*homos,* shoulder, *agra,* seizure). Gout in the shoulder.

Homa'lium racemo'sum. Astringent plant growing in the W. Indies; used in diarrhœa. **H. raconbea** or **spica'tum,** root of this plant of Guiana is astringent and used in gonorrhœa.

Homalocephalus, hom-al-o-sef'al-us (*homalos,* level, *kephale,* head). Flat-headed.

Homalocoryphus, hom-al-o-kor'e-fus (*homalos,* level or like, *koruphe,* head or vertex). Term for crania in which the parietal angle of Lissauer (that is, between lines projected in median plane of skull from most prominent part of parietal bone to bregma and lambda) is from 132° to 142°.

Homalodermatous (hom-al-o-derm'at-us) or **Homaloderm'ous** (*homalos,* level, *derma,* skin). Smooth-skinned.

Homalographic method, hom-al-o-graf'ik meth'od (*homalos,* level, *grapho,* to write). Representation by plans or sections—by flat frozen sections, for example.

Homalography, hom-al-og'ra-fe (same etymon). Use of sections, such as frozen sections, for teaching anatomy.

Homalometopus, hom-al-o-met-o'pus (*homalos,* level, *metopon,* countenance). Term applied to crania in which the angle between the lines drawn from metopion to bregma and nasion is from 141° to 130.5°.

Homalopisthocranius, hom-al-op-isth-o-kran'e-us (*homalos,* level, *opistho,* backward, *kranion,* skull). Term applied to crania in which the angulus summi occipitis (angle between lines projected in median plane from the most prominent part of the supra-occipital bone to lambda and inion) is from 140° to 154°.

Homaluranus, hom-al-u'ran-us (*homalos,* level, *ouranos,* roof). Term applied to skulls in which the angulus summi palati is from 147.5° to 163.5°.

Homatro'pia or **Homatropine,** hom-at'ro-peen. $C_{16}H_{21}NO_3$. White crystalline alkaloid resulting from heating a solution of tropine and toluic acid in muriatic acid; used as a rapid and transient mydriatic; also internally in night-sweats of phthisis. It is also called oxytoluyltropeine. **H. hydrobro'mate** or **hydrobro'mide,** crystallizable soluble salt; used in ophthalmic practice to dilate the pupil. **H. sal'icylate** is also employed. **H. sul'phate,** combination of homatropine and sulphuric acid.

Homatropinum, hom-at-ro-pe'num. Homatropine. **H. hydrobro'micum,** homatropine hydrobromate. **H. sulfu'ricum,** homatropine sulphate.

Homeopathy, hom-e-op'ath-e. Homœopathy.

Homerda, hom-er'dah (*homo,* man, *merda,* excrement). Human excrement.

Homeria collina, hom-e're-ah kol-le'nah (after Homer). Cape tulip; poisonous S. African plant, the bulb of which acts as a violent acronarcotic, speedily producing fatal results.

Homeria'na. Polygonum aviculare.

Home'sickness. Nostalgia or intense desire to return to one's own home, amounting almost to melancholy.

Home'wort. Sempervivum tectorum.

Homicidal, hom-i-si'd'l (*homo,* man, *cædo,* to kill). Pertaining to homicide or the killing of man. **H. insan'ity** or **monoma'nia,** insanity, with irresistible impulse to destroy life.

Homilia, hom-il'e-ah. Coition.

Hominisection, hom-in-i-sek'shun (*homo,* man, *seco,* to cut). Dissection of the human body.

Hominivorous, hom-in-iv'o-rus (*homo,* man, *voro,* to eat). Man-eating; parasitic on man.

Hominy, hom'in-e (of Indian derivation). Maize or Indian corn hulled and coarsely broken; used for food. **H., wheat'en,** see *Groats.*

Homiosis, hom-e-o'sis. Homoiosis.

Ho'mo. See *Man.* **H. ala'tus** (winged man), see *Alatus.* **H. cauda'tus** (tailed man), fabulous tailed variety of the human species. **H. fat'uus,** idiot.

Homoblastic, ho-mo-blas'tik (*homo, blastos,* germ). Forming similar tissue.

Homocentric, ho-mo-sen'trik. Having one centre; concentric.

Homocerebrin, ho-mo-ser'e-brin. Substance like cerebrin derived from brain-tissue by action of baryta and alcohol.

Homocinchonicine, ho-mo-sin-kon'e-seen. $C_{19}H_{22}N_2O$. Alkaloid resulting from exposing homocinchonidine sulphate to heat.

Homocinchonidine, ho-mo-sin-kon'id-een. Alkaloid, $C_{19}H_{22}N_2O$, derived from Cinchona rosulenta.

Homocinchonine, ho-mo-sin'kon-een. Alkaloid, $C_{19}H_{22}N_2O$, having a similar source to homocinchonidine.

Homodermatous, ho-mo-derm'at-us (*homo, derma,* skin). Having the whole skin alike.

Homodesmot'ic (*homos, desmos,* bond). Term applied to nerve-fibres associating similar masses of gray matter.

Homoëdrus, ho-mo-ed'rus (*homos,* alike, *hedra,* seat). Having the same seat. *Morbi homoëdri* are diseases that have the same seat.

Homœo, ho-me'o (*homoios,* like). In composition, like.

Homœobiotic, ho-me-o-bi-ot'ik (*homo, bios,* life). Having similar life.

Homœoblastic, ho-me-o-blas'tik. Homoblastic.

Homœogenesia (ho-me-o-jen-ez'e-ah) or **Homœogen'esis** (*homœo, genesis,* formation). Producing offspring when crossing occurs in animals.

Homœomorphia, ho-me-o-mor'fe-ah (*homœo, morphe,* shape). Similarity of shape.

Homœomorphous, ho-me-o-mor'fus (*homœo, morphe,* shape). Having similar shape. See *Homology.*

Homœopath, ho'me-o-path. Homœopathist.

Homœopathic, ho-me-o-path'ik. Relating to homœopathy.

Homœopathist, ho-me-op'a-thist. A believer in or practitioner of homœopathy.

Homœopathy, ho-me-op'ath-e (*homœo, pathos,* affection). *Hahnemannism, Dynamopathy, Globulism.* A fanciful doctrine which maintains that disordered actions in the human body are to be cured by inducing other disordered actions of a like kind (*similia similibus curantur*), and this to be accomplished by infinitesimally small doses, often of apparently inert agents, the decillionth part of a grain of charcoal, for example. According to Dr. Bigelow, homœopathy consists in leaving the case to nature while the patient is amused with nominal and nugatory remedies.

So long ago as in the writings of Gregory the Great, there is the following remark: "Mos medicinæ est ut aliquando similia similibus, aliquando contraria contrariis curet. Nam sæpe calida calidis, frigida frigidis, sæpe autem frigida calidis, calida frigidis sanare consuevit."

Homœoplasia, ho-me-o-plaz'e-ah (*homœo, plasso,* to form). Formation of tissues similar to the normal; the opposite to heteroplasia.

Homœoplas'tic (same etymon). Forming tissues similar to normal tissue; the opposite of heteroplastic.

Homœoplasty, ho'me-o-plas-te. Transplantation of tissue, as of bone, from one part of an individual to another, or from another of the same species.

Homœosis, ho-me-o'sis. Assimilation. See *Homoiosis.*

Homœosym'pathy. Homœopathy.

Homœotherapeutics, ho-me-o-ther-a-pu'tiks. Homœopathy.

Homœothermic, ho-me-o-thur'mik (*homoios,* like, *therme,* heat). Having or retaining even temperature; warm-blooded.

Homœozygy, hom-e-oz'e-je (*homœo, zugoo,* to join together). Law of association of organs, by which like parts adhere to like parts, as in monstrosities.

Homoethnia, ho-mo-eth'ne-ah. Sympathy.

Homogeneity, ho-mo-jen-e'it-e. State of being homogeneous.

Homoge'neous (*homos, genos,* kind). Having a descent from the same race or family. Of the same kind throughout, as structures or tissues, or derived from the same source.

Homogenesis (hom-o-jen'es-is) or **Homogen'ia** (*homos,* equal, *genesis,* generation). Univocal or regular generation. See *Generation.*

Homogeny, ho-moj'en-e. Homogenesis.

Homog'onous (*homos, gonos,* seed). Having like or similar offspring.

Homoiopathia, ho-moi-o-path-e'ah (*homœo, pathos,* affection). Sympathy. Homœopathy.

Homoiosis, hom-oi-o'sis (*homoioo*, to assimilate). Elaboration of the nutritious juice, by which it becomes proper for assimilation. Disease of disordered assimilation.

Homoiothermal, ho-moi-o-thur'mal. Homœothermic.

Homolinon, ho-mol'in-on (*homos*, raw, *linon*, flax). See *Apolinosis*.

Homological, ho-mo-loj'ik-al (same etymon as **Homology**). Relating or appertaining to homology, as anatomy.

Homologous, ho-mol'o-gus (*homos*, like, *logos*, condition). Like in structure or other characteristics. See *Homology* and *Homotype*. **H. tis'sues,** tissues having like organization or structure. **H. tu'mors,** those made up of like structures or of regular tissues.

Homologue, ho'mo-log. Term applied to the same organ in different animals under every variety of form and function.

Homology, ho-mol'o-je. Similarity of structure and development, as of two sides of the body. Doctrine or study of the relations of the parts of animal bodies. Homologous, homomorphous, or homœomorphous tissues are those that resemble others; in opposition to heterologous, heteroclite, or heteromorphous, which are new formations. **H., se'rial,** see *Homotype*.

Homomorphous, ho-mo-mor'fus (*homos*, like, *morphe*, shape). See *Homology*.

Homon'omous (*homos*, *nomos*, law). Being under the same law.

Homonopagia, hom-on-o-paj'e-ah. Cephalalgia.

Homonym, hom'o-nim (*homos*, same, *onuma*, name). Having the same designation; applied to anatomical relation of organs.

Homonymous, ho-mon'im-us (*homos*, like, *onuma*, name). Having the same name. **H. diplo'pia,** double vision in which images are on same side as the eyes to which they belong. *Hemianopsia*, defective visual field on the same side in the two eyes.

Homophagus (ho-mof'ag-us), more correctly **Omophagus.** One who eats raw flesh.

Homoplast, ho'mo-plast (*homos*, alike, *plasso*, to form). Structure or tissue resembling another in development. Element of simple tissue.

Homoplastic, ho-mo-plas'tik (same etymon). Similar in structural development.

Homoplastid, ho-mo-plas'tid (same etymon). Structure each cell of which is endowed with reproductive power to produce a species.

Homoplasty, ho'mo-plas-te (*homos*, like, *plasso*, to form). Formation of homologous tissues.

Homoplasy, ho-mop'las-e (same etymon). Unusual action of one structure or tissue assuming peculiar characteristics of another.

Homoplata, hom-o-plat'ah (*homos*, shoulder, *platus*, broad). Scapula.

Homoquinine, ho-mo-kwi'nine. $C_{19}H_{22}N_2O_2$. Alkaloid from cuprea bark, obtained from Remijia Purdieana and R. pedunculata triana.

Homosalicyl'ic ac'id. Creasotic acid.

Homosexual'ity. Sexual feeling or inclination for one of the same sex.

Homothermic, ho-mo-thur'mik. Homœothermic.

Homotonus, hom-ot'on-us (*homos*, like, *tonos*, tone). That which has the same tension or tone; as continued fever, whose symptoms have equal intensity during its whole course.

Homotrophy, hom-ot'ro-fe (*homos*, *trophe*, nourishment). Having the same nourishment and growth.

Homotype, ho'mo-tipe (*homos*, like, *tupos*, type). Repetition of the same essential part, in the series of vertebral segments, for example. Parts thus similarly related are homotypic or serially homologous.

Homuncio, hom-un'she-o. Human fœtus.

Homunculus, hom-un'ku-lus. A diminutive, debilitated man; mannikin.

Hondu'ras bark. Cascara amarga. **H. sarsaparil'la,** variety of sarsaparilla from Belize.

Honesty, on'est-e. Lunaria, Clematis vitalba.

Hone'wort, field. Sison amomum.

Honey (hun'e). Mel. **H. bloom,** Apocynum androsæmifolium. **H. of bo'rate of so'dium,** mel boracis. **H. of bo'rax,** mel boracis. **H., clar'ified,** mel despumatum. **H., lo'cust,** Geditschia triacanthos. **H., prepared,** mel præparatum. **H. of roses,** mel rosæ. **H. of squill, com'pound,** syrupus scillæ compositus. **H. wa'ter,** hydromel.

Hon'eycomb bag. Reticulum. **H. ring'worm,** favus.

Hon'eysuckle. Lonicera; Cornus succica; Trifolium pratense; Rhinanthus crista galli. **H. bush,** Diervilla trifida. **H., scar'let** or **trum'pet,** Lonicera sempervirens.

Honey-sugar. Glucose.

Honor capitis, hon'or kap'it-is (honor of the head). Hair of the head.

Honorarium, hon-or-ah're-um. A physician's fee or compensation.

Hood. Caul. **H., caud'al,** caudal fold of embryo. **H., cephal'ic,** cephalic fold of embryo.

Hoodwort. Scutellaria lateriflora.

Hoof'bound. Deformative contraction and dryness of the back part of the hoof of the horse.

Hook. Instrument consisting of steel wire, flattened at the middle, and having the extremities crooked and pointed; used by anatomists and surgeons to lay hold of and raise up certain parts in delicate dissection or when the parts would slip from the fingers. The tenaculum is a variety of hook. See *Hamus*, *Hamulus*, *Uncus*. **H., blunt,** instrument for passing over flexures of joints to assist in bringing down the fœtus in parturition.

Hoop'er's pills. Pilulæ aloes et myrrhæ.

Hoop'ing cough. Pertussis.

Hoop'tree. Melia azedarach.

Hoose. Bronchial and pulmonary disease of calves and lambs caused by micro-organism, as strongylus filaria.

Hoove. Acute tympanitis of cattle and sheep.

Hop. Humulus lupulus; Bryonia dioica. **H. pil'low,** see *Humulus lupulus*. **H. plant,** Humulus lupulus. **H. tree,** Ptelea trifoliata. **H. vine,** Humulus lupulus.

Ho'pea splen'dida. Tree of Sunda yielding a fatty substance used as a base for ointments. **H. ternifo'lia** or **tincto'ria,** sweet leaf; indigenous in Southern States; stomachic tonic.

Hope's cam'phor mix'ture. Mixture of nitrous acid, camphor-water, and laudanum, employed in diarrhœa, dysentery, etc.

Hop-horn'beam. Leverwood; Ostrya Virginica.

Hoplochrisma, hop-lo-kriz'mah (*hoplon*, weapon, *chrisma*, salve). Armatory or sympathetic unguent. Salve formerly supposed to cure wounds by sympathy, the instrument with which the wound was inflicted being anointed with it.

Hoplomochlion, hop-lo-mok'le-on (*hoplon*, weapon, *mochlos*, lever). Iron machine or apparatus which embraced the whole body like armor. A figure of it is given by Fabricius ab Aquapendente.

Hops. Humulus lupulus.

Hora (ho'rah), or **Horœotas** (ho-re'o-tas), or **Horæotes,** ho-re'o-tees. Puberty; maturity.

Horæa, ho-re'ah. Menses.

Hordea, hor'de-ah. Small rounded prominence on the floor of the fourth ventricle.

Hordeation, hor-de-a'shun (*hordeum*, barley). Foundering of horses from eating too much barley.

Hordei maltum, hor'da-e mal'tum (malt of barley). Malt. **H. sem'ina,** barley seeds.

Hordeiform, hor-de'e-form (*hordeum*, barley, *forma*, shape). Having the shape of barley.

Hordeïn, hor'de-in (*hordeum*, barley). Powder obtained from barley, analogous to starch.

Hordeolum, hor-de'ol-um (dim. of **Hordeum**). Sty or stye. Small inflammatory tumor, of the nature of a boil, exhibiting itself near the free edge of the eyelids, particularly near the inner angle of the eye.

Hordeozymose, hor-de-o-zi'moze (*hordeum*, barley, *zumosis*, fermentation). Diastase.

Hordeum, hor'de-um. Seeds of Hordeum vulgare or Scotch barley, ord. Gramineæ, ranked among Ce-

realia; affording a mucilaginous decoction, diluent and antiphlogistic. Seeds of Hordeum distichum or æstivum, Zeocriton distichum, and H. hexastichon possess similar properties. Barley is freed from its shells in mills, forming Hordeum mundatum or decorticatum or excorticatum, Hordeum (Ph. U. S.), and, at times, is rubbed into small round grains, somewhat like pearls, when it is called Hordeum perlatum, pearl barley, and forms Hordeum denudatum or perlatum, or Hordei semina tunicis nudata. Also a germ. **H. caus'ticum**, Veratrum sabadilla. **H. decortica'tum**, see *Hordeum*. **H. denuda'tum**, see *Hordeum*. **H. dis'tichon**, see *Hordeum*. **H. excortica'tum**, see *Hordeum*. **H. galac'ticum**, rice. **H. germina'tum**, malt. **H. hexas'tichon**, see *Hordeum*. **H. munda'tum**, see *Hordeum*. **H. perla'tum**, see *Hordeum*.

Hore'hound. Marrubium vulgare; Ballota nigra. **H., black**, Ballota fœtida. **H., german'der-leaved**, Eupatorium teucrifolium. **H., stink'ing**, Ballota fœtida. **H., water**, Lycopus sinuatus; Lycopus Virginicus. **H., wild**, Eupatorium rotundifolium; E. teucrifolium.

Horistocacopneumonia, hor-ist-o-kak-o-nu-mo'ne-ah (*horistos*, limited, *kakos*, bad). Circumscribed or limited gangrene of the lung.

Horistopneumonosaprosis, hor-ist-o-nu-mo-no-sapro'sis (*horistos*, limited, *pneumon*, lung, *sapros*, putrid). Horistocacopneumonia.

Horistopneumonosepsis, hor-ist-o-nu-mo-no-sep'sis (*horistos*, limited, *pneumon*, lung, *sepsis*, putrefaction). Horistocacopneumonia.

Horizocardia, hor-iz-o-kard'e-ah (*horizon*, *kardia*, heart). Horizontal position of that organ on the diaphragm in the centre of the cavity of the thorax, in some forms of hypertrophy or dilatation.

Horizontal, hor-i-zon't'l. Term to denote, when used anatomically, parallelism to the plane of the horizon when a person is standing erect. **H. circum'ference**, distance measured on exterior of skull through ophryon (point at which supraorbital line intersects median line) and occipital point. **H. lines of demarca'tion**, lines made in retina by planes through horizontal axis perpendicular to line of sight at crossing-point of lines of direction. **H. merid'ian**, that described on eyeball or retina by plane of regard passing through centre of retina. **H. plane**, plane through centres of rotation of the eyes when the head is erect. **H. plate**, part of palate-bone going to make up hard palate. **H. ra'mus**, horizontal bony portion passing backward and inward from the body of the pubis toward the acetabulum. **H. semicir'cular canal**, external semicircular canal. **H. sul'cus of cerebel'lum**, fusion between anterior and middle lobes of cerebellum.

Horme, hor'me. Instinct.

Horminum, hor-me'num (*hormao*, to incite, as to venery). Salvia horminum. **H. colora'tum** or **sati'vum**, Salvia horminum.

Hor'mion. Point of junction in middle line of vomer and sphenoid bone.

Hormis'cium cerevis'iæ. Torula cerevisiæ.

Hor'mon. Vital principle.

Horn. Cornu. **H. ail**, anæmia of horned cattle. **H., ante'rior**, prolongation of lateral ventricle into the frontal lobe; anterior gray cornu of spinal cord. **H., cuta'neous**, cornu cutaneum. **H., descend'ing**, portion of lateral ventricle, chiefly formed by hippocampus major. **H., exter'nal**, posterior cornu of medulla oblongata. **H., inter'nal**, gray matter in medulla oblongata corresponding to lateral horn of spinal cord. **H. mad**, see *Mania*. **H., pap'illary**, cornu cutaneum with hypertrophied papillæ. **H. pop'py**, Glaucium luteum. **H., pos'terior**, part of lateral ventricle projected into occipital lobe. **H. quick'silver**, mercury protochloride; horn silver; silver chloride.

Hornbean. Carpinus betulus.

Horn'er's mus'cle. Tensor tarsi.

Horn'pox. See *Varicella*.

Horns. Cornua. **H., poste'rior acces'sory**, extensions from central gray matter of medulla oblongata into cuneate fasciculus. **H. of spi'nal cord**, semilunar muscles of nerve-matter observed in transverse sections of gray columns of spinal cord. **H. of ven'tricles**, cornua ventriculi.

Horn'seed. Ergot. **H. sil'ver**, silver chloride.

Horn'wort. Ceratophyllum demersum, demulcent plant.

Horn'y. Corneous. **H. excres'cences**, excrescences occasionally formed on some part of the skin, resembling in shape the horns of an animal. **H. haired**, superficial layers of epidermic cells. **H. sub'stance**, see *Tooth*.

Horop'ito. Drimys axillaris.

Horop'ter (*horos*, limit, *opter*, beholder). Line representing curve along which both eyes can unite in vision.

Horrentia, hor-ren'she-ah (*horreo*, to shudder). Horripilation.

Horrida cutis, hor'rid-ah ku'tis (rough skin). Goose-flesh, goose-skin; a state of the skin produced by cold or fear, or accompanying the rigor of an intermittent; produced essentially by the action of microscopic muscular fibres—the arrectores pilorum. The projections are sometimes called goose-pimples.

Horripilation, hor-ri-pil-a'shun (*horreo*, to bristle, *pilus*, hair). General chilliness preceding fever, and accompanied with bristling of the hairs over the body. See *Horrida cutis*.

Horripilato'res. Arrectores pilorum. See *Horrida cutis*.

Hor'ror (*horreo*, to shudder). Horripilation. **H. cibo'rum**, disgust for food.

Hor'rors. Delirium tremens. **H. of drink**, delirium tremens.

Horse. In composition, great. **H. aloes**, caballine aloes. **H. balm**, Collinsonia Canadensis. **H. cane**, Ambrosia trifida. **H. cas'sia**, Cassia grandis. **H. chest'nut**, Æsculus hippocastanum. **H. crust**, crusta genu equinæ. **H. distem'per**, influenza. **H. doc'tor**, veterinary surgeon.

Horse'fly weed. Sophora tinctoria.

Horse'foot See *Kyllosis*. **H. gen'tian**, Triosteum perfoliatum.

Horse'leech. Horse-doctor; veterinary surgeon.

Horse'mint. Ambrosia trifida, Monarda coccinea, M. fistulosa, and M. punctata. **H., sweet**, Cunila mariana.

Horsenet'tle. Solanum Carolinense.

Horse'pox. Pustular disease of horses.

Horse'radish. Cochlearia armoracia. **H. tree**, Moringa pterygosperma.

Horseshoe com'missure. Fibres of deep layer of lemniscus. **H. head**, old name for condition of the skull in children in which the sutures are too open; the coronal suture presenting the form of a horseshoe. **H. kid'ney**, fatty crescents, or horseshoe conformation, in which the lower ends of the kidneys are united by a transverse portion across the spine.

Horsetail. Hippuris vulgaris; Equisetum; E. hyemale.

Horseweed. Ambrosia trifida; Collinsonia Canadensis; Erigeron Canadense.

Hortia Brasiliana, hor'she-ah bras-il-e-an'ah. Species of S. American plant, bark of which, antiperiodic, is used as a substitute for quinine.

Hortulus (dim. of **Hortus**) **cupidinis**, hor'tu-lus ku-pid'in-is. Vulva.

Hor'tus. Garden; vulva. **H. sic'cus**, herbarium.

Hospital, hos'pit'l (primarily from *hospes*, guest). Infirmary; establishment for the reception, care, and treatment of the sick and wounded. Hospitals were first instituted about the end of the 4th century, at which period the word *Nosokomeion* was employed, for the first time, by St. Jerome. Hospitals may be general, receiving all cases, or special, admitting only certain diseases. See *Nosocomial*. **H. at'mosphere**, see *Hospitalism*. **H., cot'tage**, small hospital, with a few beds, manageable at a small expense. **H. fe'ver**, typhus fever. **H., field**, hospital composed of canvas or wooden tents to be used by an army in the field. **H. gan'grene**, putrid or malignant ulcer, hospital sore; gangrene occurring in wounds or ulcers in hos-

pitals the air of which has been vitiated by the accumulation of patients or other circumstance. **H., insane'**, institution for care and treatment of insane. **H., lep'er**, hospital for care and treatment of leprous patients. **H., lock**, hospital for venereal cases.

Hospitalism, hos'pit'l-izm. Bad influence exerted by the air of a hospital on the progress of operations, diseases, etc.

Hospitalization, hos-pi-tal-iz-a'shun. Act of placing a person under hospital treatment.

Host. Organism on which a parasite lives.

Hot'house. See *Achicolum.*

Hottentot apron, hot'ten-tot a'prun. Condition of hypertrophied nymphæ, seen among Hottentots, in which an apron-like flap hangs down on the thighs.

Hottentottismus, hot-ten-tot-tiz'mus. Severe stuttering, sometimes from oral malformation.

Hough. Ham; hock.

Hound's tongue. Cynoglossum.

Hour'glass contrac'tion of the u'terus. Irregular contraction of the uterus like that of an hourglass, retaining the placenta after birth of child. **H. her'nia**, variety of oblique inguinal hernia, having a constriction of the hernial sac at some point between the position of the testis and that of the external abdominal ring.

House-green. Sempervivum tectorum.

House'leek Sempervivum tectorum. **H., small**, sedum.

House'maid's knee. Inflammation of bursa of patella with enlargement and effusion from pressure.

House-pu'pil. See *House-surgeon.*

House-sur'geon. Resident surgeon; usually a senior housepupil or graduate, residing in a hospital, and attending to every accident and disease in the absence of the attending physician or surgeon. It answers to the élève interne or interne of the French hospitals; the élève externe or externe is a less advanced pupil; from the externes the internes are chosen.

Hous'ton's folds. Folds of the rectum. **H.'s mus'cle**, compressor venæ dorsalis penis. **H.'s valve**, H.'s folds.

Ho'ven. Acute tympanites of cattle, usually from retained food.

Ho'vius, canal of. Fontana, canal of.

How'ard's meth'od. See *Drowning, resuscitation from,* and *Artificial respiration.*

How'ship's lacunæ, la-ku'ne. Condition in rarefying osteitis in which the edge of melting bone-tissue is broken by shallow curves or deeper semicircular excavations, the concavity being outward, between every two of which there is angular projection of an intervening portion of bone.

Hoya coronaria, hoi'ah kor-o-nah're-ah (after Hoy, English horticulturist). Species of Asclepidaceæ, growing in Sumatra, Borneo, etc., milky juice of which is used internally in gonorrhœa.

Huamil'ies bark. Bark of Cinchona micrantha, C. nitida, and C. Peruviana.

Huanokine, hu-an'o-keen. Alkaloid, $C_{20}H_{24}N_2O$, obtained from cinchona growing near Huanuco; antipyretic.

Huck'le or **Hucklebone.** Ischium; coccyx.

Huckleberry, huk''l-ber-re. See *Gaylussacia* and *Vaccinium.* **H., dwarf**, Gaylussacia humosa.

Huckshouldered, huk'shoal-der'd (G. *hocker*, protuberance). One who has a hump.

Hueb'ner's disease. Syphilitic endoarteritis, encroaching largely on the lumen of the artery.

Huechys sanguinea (hu'ek-is san-gwin'e-ah) or **vesicatoria**, ves-ik-at-o're-ah. Blistering fly of China.

Hugonia mystax, hu-go'ne-ah mis'taks. Tree of Malabar, root of which is considered tonic, diuretic, and vermifuge.

Huguier (hu-ge'a), **canal' of.** Small canal at inner side of fissure of Glaser, through which the chorda tympani nerve leaves the cavity of the tympanum. **H., disease of**, lupus; hypertrophy and abnormal protrusion of the neck of the uterus into the vagina; uterine fibromyoma. **H., opera'tion of**, conoidal amputation of neck of uterus.

Huingan. The seed of this plant, indigenous in the Andes, is used in urinary diseases.

Hulver. Ilex aquifolium.

Hum. Continuous low murmur. **H., ve'nous**, sound heard in auscultating over a vein.

Humectant, hu-mek'tant (*humecto*, to moisten). Imparting moisture; augmenting the fluidity, as of the blood; diluent.

Humectation, hu-mek-ta'shun (*humecto*, to moisten). Act of moistening.

Humeral, u'mer-al. Belonging to, or connected with, the arm or humerus. **H. ar'tery**, brachial artery. Descending branch of acromio-thoracic artery. **H. mus'cle**, deltoid muscle. **H. nerve**, circumflex nerve of arm. **H., trans'verse**, suprascapular artery.

Humera'lis. Humeral deltoid.

Hu'meri os. Humerus.

Hu'mero. In composition, humerus.

Hu'mero-bicip'ital. Relating to humerus and biceps, as humero-bicipital bursa, bursa over tendon of long head of biceps in groove of humerus.

Hu'mero-capsula'ris mus'cle. Occasional muscle from internal surface of shaft of humerus, inserted in capsular ligament of shoulder.

Humero-coronarius, hu'mer-o-kor-o-nar'e-us. Epitrochleo-phalangeus.

Hu'mero-cu'bital articula'tion. Articulation of humerus and ulna at elbow-joint. **H.-c. mus'cle**, brachialis anticus muscle; humero-radialis muscle.

Humero-metacarpeus, hu'mer-o-met-a-kar'pe-us. Muscle of horse, analogue of long and short extensor carpi radialis muscles in man.

Hu'mero-olec'ranal mus'cle. Triceps brachialis muscle.

Humero-phalangeus, hu'mer-o-fal-an-je'us. In the horse, analogue of flexor perforatus of man.

Humero-radial, hu'mer-o-ra'de-al. Muscle of lower animals, analogue of brachialis anticus in man.

Hu'mero-radia'lis mus'cle. Supinator longus muscle; anconæus.

Humero-radio-phalangeus, hu'me-ro-rad'e-o-fal-an-je'us. Muscle in the horse, analogue of flexor perforans in man.

Humero-supracarpeus, hu'mer-o-su-pra-kar'pe-us. Muscle attached to humerus and carpal bones.

Humerus, hu'mer-us. Shoulder. Most elevated part of the arm; bones concurring in forming it are the scapula, head of the humerus, and the clavicle, united together by strong ligaments, and covered by numerous muscles. Also shoulder-bone, arm-bone; cylindrical irregular bone of the arm, the upper extremity of which has a hemispherical head connected with the scapula, and two tuberosities or tubercles, a greater and a lesser, for the attachment of muscles, between which is the bicipital groove or fossa. At the inferior extremity are the inner and outer condyles; the small head articulated with the radius; the trochlea articulated with the ulna, etc. **H., an'gles of**, lower borders of the humerus; supracondylar ridges. **H. sum'mus**, top of the humerus; acromion.

Hu'mid tet'ter of scalp. Vulgar name for eczema.

Humidity, hu-mid'it-e. Moisture. Absolute humidity is the actual number of grains of moisture in a cubic foot of air. **H., rel'ative**, percentage of moisture in the air.

Humidum, hu'mid-um. Moisture. **H. nati'vum**, H. radicale. **H. nati'vum articulo'rum**, synovia. **H. primige'nium**, or **radica'le**, or **semina'le**, radical moisture; liquid conceived to give flexibility and proper consistence to the different organic textures; seminal fluid. **H. vit'reum**, vitreous body.

Humilis ("humble") (*humus*, the ground). Rectus inferior oculi muscle.

Humilus, hu'mil-us. Humulus.

Hum'ming-top mur'mur. Venous hum heard on auscultating over a vein.

Hum'mums. Sweating baths. See *Achicolum.*

Hu'mor (*humeo*, to be moist). Every fluid sub-

stance of the organized body, as the blood, chyle, lymph, etc. Humors differ considerably as to number and quality in the different species of organized beings, and even in the same species, according to the state of health or disease. The ancients reduced them to four, which they called cardinal humors—the blood, phlegm, yellow bile, and atrabilis or black bile. It is not easy to give a satisfactory classification of the humors. Popularly, chronic skin disease from disordered state of blood. **H., albugin'eous,** aqueous humor; vitreous humor. **H. albumin'eus,** aqueous humor. **H. am'nii,** liquor amnii. **H. aquo'sus,** aqueous humor. **H. articula'ris,** synovia. **H., card'inal,** see *Humor*. **H., ceru'minous,** cerumen. **H., corro'ding,** atrabilis. **H. Cotugn'ii,** perilymph. **H., crys'talline,** crystalline lens. **H. dor'idis,** water, sea. **H. genita'lis,** semen; sperm. **H. glacia'lis,** crystalline, corpus vitreum. **H. hyali'nus** or **hyaloï'des,** corpus vitreum. **H. lacryma'lis,** tear. **H. lac'teus,** milk. **H. of Meibo'mius,** secretion of Meibomian glands. **H. melanchol'icus,** see *Mercurialis*. **H. mercuria'lis,** see *Mercurialis*. **H. Morgagnia'nus** or **Morgag'nii,** Morgagni, humor of. **H. mucilagino'sus,** synovia. **H. ova'tus** or **ovifor'mis,** aqueous humor. **H. pericar'dii,** see *Pericardium*. **H. purulen'tus,** pus. **H. Scar'pæ,** endolymph. **H. semina'lis,** sperm. **H. vene'reus,** sperm. **H., vit'reous,** corpus vitreum; endolymph.

Humoral, hu'mor-al. Proceeding from, or connected with, humors. **H. her'nia,** inflammation and swelling of the testicle; see *Hernia humoralis*. **H. pathol'ogy,** humoralism, humorism.

Humoralism, hu'mor-al-ism. Theory of agency of humors in health and disease; the latter being humoral pathology or humorism.

Humoralists, hu'mor-al-ists. Humorists.

Humores (hu-mo'rees) (pl. of **Humor**) **inquili'ni** (alien humors). Recrementitial secretions.

Humorism, hu'mor-izm. Theory founded exclusively on the parts which the humors were supposed to play in the production of disease. See *Humor*.

Humorists (hu'mor-ists) or **Hu'moralists.** Galenical and other physicians who attributed all diseases to the depraved state of the humors or to vicious juices collected in the body.

Hu'mors. Cold; scrofula. **H. of the eye,** aqueous and vitreous humors and crystalline lens; see *Eye*.

Hump (*umbo,* boss of a buckler). *Hunch, Bunch, Boss.* Prominence formed by a deviation of the bones of the trunk; commonly formed by the spine or sternum, and seated at the posterior or anterior part of the trunk. It may also be produced by deviation of the ribs or pelvis. The spine may be curved in three principal directions: 1, backward, the most common case, *Cyphosis, Gibbosity;* 2, forward, *Lordosis, Recurvatio;* and, 3, laterally, *Scoliosis, Obstipatio*. Most curvatures occur at a very early age, and are caused by scrofula, rickets, etc., and not unfrequently they are accompanied by caries of the vertebræ; see *Vertebral disease*. One who has a hump is called humpbacked, hunchbacked, bunchbacked, humpty, huckshouldered, or shrumpshouldered.

Hump'backed or **Humpty,** hump'te. See *Hump*.

Hu'mulo-tan'nic acid. Tannic acid derived from hops.

Humulin, hu'mu-lin. Lupulin. See *Humulus lupulus*.

Humulus (hu'mu-lus) (*humus,* ground, on which it creeps) or **H. lu'pulus.** Hop-plant, nat. ord. Urticaceæ. Its cones or strobiles, Humulus (Ph. U. S. and Br.), have a fragrant odor, a bitter, aromatic taste, depending on a peculiar principle, named lupulin (humulin would be a more correct term), extractive and essential oil, extracted, equally by water and spirit, from the dried strobiles. The hop is employed as a tonic and hynoptic and a diaphoretic; it increases the action of, and enters into the composition of, ale and beer. The hop-pillow has long been used for producing sleep.

Hunch. Hump.

Hunch-backed. See *Hump*.

Hun'dred-leaved rose. Rosa centifolia.

Hunga'rian bal'sam. H. turpentine. **H. disease,** angina pectoris. **H. leech,** hirudo officinalis. **H. tur'pentine,** thin turpentine obtained by exudation from Pinus pumilis. **H. valo'nia,** acorn-cups of European white oak, Quercus robur.

Hungarica febris, hun-gar'ik-ah feb'ris. Fever, Hungary.

Hung'er. Necessity for taking food; internal sensation, dictated by the wants of the system, which some have attributed to the friction between the sides of the stomach in its empty state; others, to compression of the nerves when the organ is contracted; others, to the action of the gastric juice, etc. See *Appetite*. **H. cure,** treatment of disease, as syphilis, by semi-starvation. **H. plague** or **ty'phus,** relapsing fever. **H. weed,** Ranunculus arvensis; Alopecurus agrestis.

Hung'ry. Affected with hunger.

Hunterian chancre, hun-te're-an shan'ker (from John Hunter, English surgeon). Hard or indurated, infecting chancre; true venereal ulcer, followed by constitutional symptoms.

Hun'ter's canal. Aponeurotic membrane extending upward from the opening for the femoral vessels in the adductor magnus muscles, enclosing between the several muscles of the thigh a passage, Hunter's canal, containing the femoral artery and vein and the saphenous nerve. **H.'s opera'tion for an'eurism,** ligature of an artery in its continuity, on the proximal side and at a distance from the sac.

Hunt'ington's chore'a. Hereditary chorea of adult life. See *Chorea*.

Huntsman's cup. Rhizome of Sarracenia flava of S. United States; used in diarrhœa.

Hunyadi Janos, hoon'yah-di yan'os. Bitter Hungarian natural water, strongly purgative, from large amount of sulphate of sodium and magnesium contained in it.

Hura Brasiliensis, hu'rah braz-il-e-en'sis. *Assacou, Assacu, Ussacu.* Brazilian tree which in the extract of the bark is esteemed in leprosy; also given in elephantiasis and as an anthelmintic; bark, juice, and seeds are cathartic and emetic. **H. crep'itans,** sand-box tree of Africa and South America; used in leprosy; seeds are emeto-cathartic.

Hu'rin. Principle found in juice of Hura crepitans.

Hurt. Injury. See *Trauma*.

Hur'tleberry. Vaccinium myrtillus.

Husch'ke's teeth. Denticulate processes of spiral crest of cochlea. **H.'s valve,** semilunar mucous fold in the lacrymal sac.

Husk'y. Rough, as of the voice.

Hutch'inson's disease. Senile degeneration of the retina around the yellow spot. **H.'s teeth,** semilunar and notched condition of free border of incisor teeth of upper jaw in inherited syphilis. **H.'s tri'ad,** syphilitic teeth; olitis; interstitial keratitis.

Hux'ham's tinc'ture. Tinctura cinchonæ composita.

Huxley's lay'er, mem'brane, or **sheath.** Inner layer of the inner root-sheath of the hair, the outer layer being the inner root-sheath of Henle.

Hyacinth (hi'a-sinth), **wild.** Scilla nutans; S. esculenta.

Hyænanche (he-e-nan'ke) **Capen'sis** or **globo'sa** (*hyæna, ancho,* to strangle). Shrub of S. Africa, the fruit of which is used to destroy beasts of prey.

Hyaleus, he-al-a'us (*hualos,* glass). Hyaline.

Hy'alin. Albuminoid substance, like amyloid matter, found in certan kinds of morbid growths, as miliary tubercle; wall of hydatid cysts.

Hyaline, hi'al-ine. Vitreous; glassy; resembling glass. **H. canal',** hyaloid canal. **H. car'tilage,** clear, homogeneous type of cartilage, such as articular cartilages. **H. cast,** clear, homogeneous urinary tube-cast. **H. coat,** thin layer of dermic coat of hair-follicle. **H. cyl'inder,** H. cast. **H. degenera'tion,** degeneration by conversion into hyalin. **H. sub'stance,** cytoblastema.

Hyalino'sis. Hyaline waxy degeneration.

Hyalistos (he-al-is'tos) or **Hyalistus,** he-al-is'tus. Vitreous body.

Hyalitis, he-al-e'tis. Inflammation of the hyaloid membrane of the eye or vitreous humor.

Hyalo, he'al-o (*hualos,* glass). In composition, vitreous.

Hyalodeï'tis. Hyalitis.

Hyalodeomala'cia (*hualodes,* vitreous, *malakia,* softness). Softening of vitreous humor.

Hyalodeonyx'is. Hyalonixis.

Hyalodeoproptosis, he-al-o-de-o-prop-to'sis (*hyalo, proptosis,* falling forward). Prolapse of corpus vitreum.

Hyalodes, he-al-o'dees. Hyaloid; corpus vitreum.

Hyalogen, hi-al'o-jen (*hyalo, gennao,* to engender). Albuminous substance in cartilage.

Hyaloid, hi'al-oid (*hyalo, eidos,* resemblance). Vitriform; resembling glass; relating or appertaining to the hyaloid body, hyaloid membrane, etc. **H. ar'tery,** branch of central artery of retina passing to capsule of lens. **H. bod'y,** vitreous body. **H. canal,** see *Hyaloid membrane.* **H. car'tilage,** see *Cartilage.* **H. fos'sa,** see *Hyaloid membrane.* **H. hu'mor,** vitreous body. **H. mem'brane,** extremely delicate membrane forming exterior covering of the vitreous humor, and transmitting within it prolongations dividing it into cells. Fallopius discovered it, and called it hyaloid. On a level with the entrance of the optic nerve into the eye, the hyaloid membrane forms by reflection a cylindrical canal, *hyaloid canal,* which pierces the vitreous humor from behind to before. It transmits the capsular artery of the eye in fœtal life. **H. sub'stance,** vitreous body.

Hyaloïdei'tis or **Hyaloïditis,** he-al-o-id-e'tis. Hyalitis.

Hyaloïdia propria, he-al-o-id'e-ah pro'pre-ah. Hyaloid membrane.

Hyaloïdioproptosis, he-al-o-id-e-o-prop-to'sis. Prolapse of corpus vitreum.

Hyaloïdi'tis. Hyalitis.

Hyaloma, he-al-o'mah. Alteration of the eye into a glass-like mass.

Hyalomeninx, he-al-o-men'inks (*hyalo, meninx,* membrane). Hyaloid membrane.

Hyalonixis (he-al-o-niks'is) or **Hyalonyxis** (*hyalo, nusso,* to push). Puncture of vitreous body; depression of lens in cataract by incision through the sclerotic.

Hyalophagia, he-al-o-fah'je-ah (*hualos,* glass, *phago,* to eat). Glass-eating; mania for eating glass.

Hyaloplasm, hi'al-o-plazm (*hualos,* glass, *plasso,* to form). Transparent formative material or plasma.

Hyalos, he'al-os. Vitrum or glass.

Hyanche, he-an'ke (*hus,* swine, *ancho,* to choke). Cynanche tonsillaris.

Hyban'thus ipecacuan'ha. Ionidium ipecacuanha; plant of S. America, from which a false variety of ipecacuanha is obtained.

Hybernation, hi-ber-na'shun. Hibernation.

Hyboma, hib-o'mah (*huboo,* to make convex). Humpback; gibbosity.

Hybosis, hib-o'sis (*huboo,* to make convex). Gibbosity; production of hyboma or humpback.

Hybrid, hi'brid (*hubris,* mongrel). Cross-bred; born of two different species, as the mule. Term applied to plants as well as to animals; also to mixture of two different diseases. The result is termed *hybridity* or *hybridism.* Hybrid is also used to designate words from two different languages, as *uteritis,* inflammation of the uterus, in place of *metritis.*

Hybridation, hi-brid-a'shon. Hybridization.

Hybridism (hi'brid-izm) or **Hybrid'ity.** See *Hybrid.*

Hybridization, hi-brid-i-za'shun. Production of a hybrid or of a hybrid state.

Hydaleus, hid-al'e-us. Dropsical.

Hydarthrosis (hid-ar-thro'sis) or **Hydarthrus,** hid-ar'thrus. Hydrarthrus.

Hydas, he'das. Water.

Hydatæromenous, hid-at-e-rom'en-us. Dropsical; hydræmic.

Hydatenterocele, hid-at-ent-er-o-se'le (Eng. hid-at-ent'er-o-seel) (*hudor,* water, *enteron,* intestine, *kele,* tumor). Hernia complicated with hydrocele.

Hydatid, hi-dat'id (*hudor,* water). Hydatic cyst; echinococcus hominis or humanus. Encysted tumor containing aqueous and transparent fluid. Subsequently applied to vesicles softer than the tissue of membranes, more or less transparent, developed within organs, but without adhering to their tissues. They are found in various parts of the body; sometimes in the uterus, occasioning signs nearly similar to those of pregnancy, but being sooner or later expelled. Expulsion is generally attended with more or less hemorrhage. See *Acephalocyst.* **H., alve'olar,** nerve-sac at root of tooth. **H. cyst,** hydatid. **H. of epidid'ymis,** corpora Morgagnii. **H. frem'itus,** sound heard on percussion over tumors containing hydatids. **H. mole,** formation of a cyst-like character, included by Virchow in the class of mucous tumors forming in the hypertrophied villi of the chorion. **H. of Morgag'ni,** corpora Morgagnii. **H., pill-box,** see *Acephalocystis.*

Hydatidepatitis, hid-at-id-ep-at-e'tis (*hydatid, hepatitis,* inflammation of liver). Hepatitis complicated with hydatids.

Hydatides, hid-at'id-ees (pl. of **Hydatis**) **cervi'cis u'teri.** Nabothi glandulæ.

Hydatidiform, hi-dat-id'i-form. Hydatiform.

Hydatidoce'le or **Hydatocele,** hi-dat-o-se'le (Eng. hi-dat'o-seel) (*hydatid, kele,* tumor). Oscheocele containing hydatids. Hydatid tumor, of scrotum particularly.

Hydatidoid, hid-at'id-oid. Resembling hydatids.

Hydatidoma, hid-at-id-o'mah. Tumor caused by hydatids.

Hydatidoscheocele, hid-at-id-os-ke-o-se'le (Eng. hid-at-id-os'ke-o-seel) (*oscheon,* scrotum, *kele,* tumor). Hydatidocele.

Hydatidosis, hid-at-id-o'sis. Condition of one affected with hydatids.

Hydat'ids of neck of u'terus. Nabothi glandulæ.

Hydatiform (hi-dat'i-form), **Hydatin'iform,** or **Hydatid'iform.** Resembling a hydatid. **H. mole,** collection of watery cysts or tumors resulting from degeneration of the chorion.

Hydatinus, hid-at-e'nus. Hydatoid.

Hydatis, hid'at-is. Hydatid or hydatid cyst. Echinococcus hominis. Small transparent vesicular tumor of the eyelids. **H. acephalocys'tis,** acephalocyst. **H. cœnu'rus,** C. cerebralis. **H. conjuncti'væ** or **cuticula'ris,** small transparent vesicular tumor of the eyelids. **H. echinococ'cus,** echinococcus. **H. fin'næ,** cysticercus cellulosæ. **H. pal'pebræ,** H. conjunctivæ. **H. termina'lis,** corpora Morgagnii.

Hydatism, hi'dat-izm. Noise caused by the fluctuation of pus in an abscess, hydrothorax, etc.

Hydato, hid-at'o (*hudor*). In composition, water.

Hydatocele, hid-at-o-se'le (Eng. hid-at'o-seel). Hydatidocele; hydrocele.

Hydatocholos (hid-at-ok'ol-os) or **Hydatoch'olus** (*hydato, chole,* bile). Aquoso-bilious. Epithet given to evacuated matters when mixed with water and bile.

Hydatodei'tis. Hydatoditis.

Hydatodes, hid-at-o'dees. Dropsical; aqueous.

Hydatoditis, hid-at-od-e'tis. Serous inflammation of the iris; inflammation of lining membrane of anterior chamber.

Hydatoid, hi'dat-oid. Watery; resembling water or hydatid. Name given to the membrane of the aqueous humor and to the aqueous humor itself. Hyaloid.

Hydatoncus, hid-at-on'kus (*hydato, onkos,* tumor). Anasarca; œdema; watery tumor.

Hydatoposia, hid-at-o-po'ze-ah (*hydato, posis,* drinking). Water-drinking.

Hydatopotes, hid-at-op'o-tees (same etymon). Water-drinker.

Hydatorrhœa, hid-at-or-rhe'ah (*hydato, rheo,* to flow). Watery flow or evacuation; hydrorrhœa.

Hydatoscheocele, hid-at-os-ke-o-se'le (Eng. hid-at-os'ke-o-seel). Hydatidoscheocele.

Hydatosis, hid-at-o'sis. Formation of or tendency to dropsy; accumulation of water.

Hydatotherapeia, hid-at-o-ther-ap-e'ah (*hydato, therapeia,* a cure). Hydrotherapy or water-cure.

Hydat'ula cerebra'lis. Cænurus cerebralis. **H. solita'ria,** cysticercus.

Hyderiasis, hid-er-e'as-is. Dropsy.

Hydericus (hid-er'ik-us) or **Hyderodes,** hid-er-o'dees. Dropsical; hydropic.

Hyderoncus, hid-er-on'kus. Anasarca; œdema; watery tumor.

Hyd'eros or **Hyderus.** Anasarca; dropsy; diabetes.

Hydnocarpus (hid-no-kar'pus) **anthelmint'icus.** Tree of Cochin China; seed is used as substitute for St. Ignatius's beans. **H. ine'brians,** H. venenata. **H. odora'ta,** Gynocardia odorata. **H. venena'ta,** of Ceylon; seeds are sometimes sold for those of Gynocardia odorata, chaulmugra seeds. **H. Wightia'na,** of India; seeds have similar properties to those of H. odoratus.

Hydorrhœa, hid-or-rhe'ah. Hydrorrhœa.

Hydracetine, hy-dras'et-een. Colorless, odorless, nearly tasteless substance obtained by heating together phenylhydrazine and acetic anhydride, or by action of glacial acetic acid on phenylhydrazine. Antipyretic in doses of gr. ½ or a little more, but even in these doses caution must be used and the medicine employed only for a day or two, as it is a cumulative blood-poison; externally it is used in skin diseases, especially in psoriasis.

Hydrachnis, hid-rak'nis (*hydro, achna,* down, or sordes). Conoidal chickenpox in which the vesicles are generally acuminated and fluid pellucid throughout.

Hydracid, hi'dras-id. A hydrogen acid, as hydrochloric or hydrocyanic acid.

Hydracryl'ic ac'id. Acid isomeric with lactic acid.

Hydraden, hid-rad'en (*hydro, aden,* gland). Conglobate or lymphatic gland.

Hydradenitis, hid-rad-en-e'tis (*hydraden, itis*). Inflammation of a lymphatic gland or sweat-gland.

Hydradenoma, hid-rad-en-o'mah (*hudor,* water, *adenoma*). Adenoma containing serum or water.

Hydrædus, hid-re'dus (*hydro, aidoia,* genital organs). Œdema of the female organs.

Hydræmatocele, hid-re-mat-o-se'le (Eng. hi-dre-mat'o-seel). Hæmatocele supervening on hydrocele.

Hydræmia, hid-re'me-ah (*hydro, haima,* blood). Hydroæmia; anæmia.

Hydræ'mic, hi-dre'mik. Anæmic. **H. œdema,** see *Œdema.*

Hydragoga (hid-rah-go'gah), **Hydragogia** (hid-rah-go'je-ah), or **Hydragogica,** hid-rah-go'jik-ah. Hydragogues; lymphatics.

Hydragogues, hi'dra-gogs (*hydro, ago,* to expel). Medicines which cause watery evacuations; generally cathartics or diuretics.

Hydragogum, hid-rah-go'gum. Hydragogue. **H. Boyl'ei,** nitrate of silver.

Hydrallas, hid-ral'las (*hydro, allas,* sausage). Morbid increase in the quantity of the fluid of the allantois.

Hydralmæ, hid-ral'me (*hydro, halme,* saltness). Saline mineral waters.

Hydramide, hi'dram-ide. Amide obtained from subjecting an aldehyde to the action of ammonia.

Hydramnios, hid-ram'ne-os. Excessive quantity of the liquor amnii.

Hydramyl, hi'dram-il. Amyl hydride.

Hydrangea arborescens, hid-ran'je-ah ar-bo-res'sens (*hydro, angeion,* vessel). *Sevenbark, Wild hydrangea, Bissum.* Indigenous plant of Middle and Western States, leaves of which are tonic, sialagogue, cathartic, diuretic, and antilithic. **H. Thunber'gii,** species, leaves of which are employed by Japanese to make a tea called tea of heaven. **H. vulgar'is,** H. arborescens.

Hydrangeia, hid-ran-ji'ah (*hydro, angeion,* vessel). Lymphatic vessels.

Hydrangeitis, hid-ran-je-e'tis (*hydrangia, itis*). Inflammation of lymphatic vessels; lymphangeitis.

Hydrangia, hid-ran'je-ah (*hydro, angeion,* vessel). Lymphatic vessels.

Hydrangin, hid-ran'jin. Crystalline glucoside from root of Hydrangea arborescens.

Hydrangiography, hid-ran-je-og'raf-e (*hydrangia, graphe,* description). Description of lymphatic vessels.

Hydrangiology, hid-ran-je-ol'o-je (*hydrangia, logos,* discourse). Treatise on lymphatic vessels.

Hydrangiotomy, hid-ran-je-ot'o-me (*hydrangia, tome,* incision). Dissection of vessels.

Hydran'osos or **Hydran'usus** (*hydro, nosos,* disease). Serous exudation; hydatosis.

Hydrargism, he-drar'jizm. Hydrargyriasis.

Hydrargyranatripsis (hid-rar-jir-an-ah-trip'sis), **Hydrargyrentrip'sis,** or **Hydrargyrotrip'sis** (*hydrargyrum, anatripsis,* rubbing in). Mercurial inunction.

Hydrargyrate, hi-drar'je-rate. Relating to or containing mercury.

Hydrargyrenterophthisis, hid-rar-jer-en-ter-o-te'sis (*hydrargyrum, enteron,* intestine, *phthisis,* wasting). Wasting enteric disease from use of mercury.

Hydrargyri acetas, hid-rar'jir-e as-e'tas. Acetate of mercury. **H. amida'to-bichlo'ridum,** hydrargyrum ammoniatum. **H. et ammo'nii-chlo'ridum,** hydrargyrum ammoniatum. **H. ammo'nio-chlo'ridum,** hydrargyrum ammoniatum. **H. ammoniure'tum,** hydrargyrum ammoniatum. **H. et arsen'ici io'didum,** arsenic and mercury, iodide of. **H. ben'zoas,** benzoate of mercury. **H. bichlore'tum** or **bichlo'ridum,** chloridum corrosivum (Ph. U. S.), bichloride, perchloride, or oxymuriate, or corrosive chloride or muriate of mercury, corrosive sublimate, mercuric chloride. In colorless crystalline masses, acrid taste, soluble in water and alcohol; alterative, antiseptic, antisyphilitic, eutrophic in venereal complaints, old cutaneous affections, etc.; externally escharotic and antiseptic, usually in proportion of 1 part of the bichloride to 2000 parts of water. Dose, gr. $\frac{1}{32}$ to $\frac{1}{16}$, three times a day, in pill. Intense irritant poison; white of egg is best antidote to it when taken in an overdose. *Yellow wash,* phagedenic wash, made by adding corrosive sublimate to lime-water, is a common application to syphilitic sores. **H. bicyan'idum** or **bicyanure'tum,** H. cyanuretum. **H. binio'didum,** H. iodidum rubrum. **H. binox'idum,** H. oxidum rubrum. **H. bisulphure'tum,** H. sulphuretum rubrum. **H. bo'ras,** combination of calomel and borax formerly used. **H. borus'sias,** H. cyanuretum. **H. bro'midum,** bromide of mercury. Protobromide and bibromide are analogous in composition and medicinal properties to the corresponding iodides of mercury, but have peculiar properties of bromides. Dose of the former is gr. j.; of the latter, gr. $\frac{1}{16}$. **H. calx al'ba,** hydrargyrum ammoniatum. **H. car'bolas,** carbolate of mercury. **H. chlore'tum** or **chlo'ridum,** H. chloridum mite. **H. chlo'ridum corrosi'vum,** H. bichloridum. **H. chlo'ridum mi'te** (Ph. U. S.), mild chloride, protochloride, submuriate, subchloride, or mild muriate of mercury, calomel, mercurous chloride; white, insoluble powder; alterative, antisyphilitic, and sialagogue; in large doses purgative, in dose of gr. ½ to v or x. *Black wash,* formed of calomel and lime-water, is used for syphilitic sores. **H. cyan'idum** or **cyanure'tum** (Ph. U. S.), cyanuret, cyanide, or prussiate of mercury; colorless salt, with strong metallic taste, soluble in water and alcohol; may be made by dissolving mercuric oxide in hydrocyanic acid; antisyphilitic. **H. deutochlo'ridum,** H. bichloridum. **H. deutoio'didum** or **deutoiodure'tum,** H. iodidum rubrum. **H. deutoni'tras,** see *H. nitras.* **H. deutosul'phas,** H. sulphas. **H. diperni'tras,** see *H. nitras.* **H. hyperoxo'des,** H. nitrico-oxidum. **H. io'didum** or **io'didum vir'ide** (Ph. U. S.), iodide, protiodide, or green iodide of mercury, mercurous iodide; greenish, tasteless powder, scarcely soluble in water, insoluble in alcohol; alterative in scrofula and syphilis. Dose, gr. $\frac{1}{8}$–$\frac{1}{4}$, gradually increased. **H. io'didum chlo'ridi,** mercury, iodide of chloride of. **H. io'didum ru'brum** (Ph. U. S. and Br.), red iodide, biniodide, deutiodide, or periodide of mercury, mercuric iodide; scarlet, tasteless powder, almost insoluble in water, soluble in 120 parts of alcohol at 60° Fahr.; made by double de-

composition of mercuric chloride and potassium iodide; irritant poison, but used therapeutically as antisyphilitic. Dose, $\frac{1}{32}$–$\frac{1}{16}$ gr. **H. io'didum vir'ide,** H. iodidum. **H. iodobichlo'ridum,** mercury, iodide of chloride of. **H. mu'rias ba'si ox'idi imperfec'ti,** H. bichloridum. **H. mu'rias corrosi'vus,** H. bichloridum. **H. mu'rias dul'cis sublima'tus,** H. chloridum mite. **H. mu'rias oxygena'tus,** H. bichloridum. **H. mu'rias spirituo'sus liq'uidus,** liquor hydrargyri oxymuriatis. **H. mu'rias suboxygena'tus præcipitatio'ne para'tus,** hydrargyrum ammoniatum; calomel prepared by precipitation. **H. ni'tras,** nitrate of mercury, mercurous nitrate; colorless salt prepared by dissolving mercury in nitric acid and water; it is employed in syphilis, and, externally, in fungus, obstinate ulcers, and in ringworm. *Acid nitrate of mercury,* mercuric nitrate, solution of supernitrate of mercury, solution of supernitrate of deutoxide of mercury; made by dissolving mercury in nitric acid and distilled water; has been used as a caustic in malignant ulcerations and cancerous affections; see *Liquor hydrargyri nitrici.* **H. nit'rico-ox'idum,** hydrargyri oxidum rubrum (Ph. U. S. and Br.), nitric oxide of mercury, red oxide of mercury, mercuric oxide, red precipitate; insoluble scales or powder, made by decomposing mercuric nitrate by heat; used externally only, as stimulant and escharotic, in foul ulcers, being sprinkled on the part in fine powder or united with lard into an ointment. **H. ox'idi mu'rias ammoniaca'li,** hydrargyrum præcipitatum. **H. oxid'ulum ni'grum,** H. oxidum cinereum. **H. ox'idum cine'reum,** gray or black oxide of mercury, mercurous oxide; it may be formed by boiling mild chloride of mercury in lime-water. Dose of powdered oxide is from two to ten grains. **H. ox'idum fla'vum** (Ph. U. S. and Br.), yellow oxide of mercury, yellow mercuric oxide; orange-yellow powder, without taste or odor, insoluble in water or alcohol; obtained by precipitation from corrosive chloride of mercury solution by means of solution of soda or potassa; used externally in affections of the skin, but chiefly in those of the eyelids. *Mercurius solubilis* of Hahnemann is formed from a black oxide of mercury; it is the oxydum hydrargyri nigri mediante ammoniâ ex protonitrate hydrargyri præcipitatum, azotas hydrargyroso-ammonicus, considered, in Germany and France, antisyphilitic. Dose, gr. $\frac{1}{5}$ to gr. j. Used in the same cases as the hydrargyri oxidum cinereum. **H. ox'idum ni'grum,** H. oxidum cinereum. **H. ox'idum ni'tricum,** hydrargyri nitrico-oxidum. **H. ox'idum ru'brum,** H. nitrico-oxidum. **H. ox'idum ru'brum per ac'idum ni'tricum,** hydrargyri nitrico-oxidum. **H. ox'idum sacchara'tum,** hydrargyrum saccharatum. **H. ox'idum sulphu'ricum,** hydrargyri sulphas flava. **H. oxo'des ru'brum,** H. nitro-oxidum. **H. oxymu'rias,** H. chloridum mite. **H. perchlo'ridum,** H. bichloridum. **H. perio'didum,** H. iodidum rubrum. **H. permu'rias,** hydrargyri bichloridum. **H. persul'phas** (Ph. Br.), mercuric sulphate; white powder, made by heating mercury with sulphuric acid; used in preparation of other salts. **H. phos'phas,** mercury, phosphate of. **H. et potas'sii io'didum,** iodide of mercury and potassium. **H. præcipita'tum al'bum,** hydrargyrum ammoniatum. **H. protoio'didum** or **protoiodure'tum,** H. iodidum. **H. protoni'tras,** mercurous nitrate, H. nitras. **H. prototar'tras,** H. tartras. **H. prus'sias,** H. cyanidum. **H. et qui'niæ chlo'ridum,** combination of corrosive sublimate and quinia, used in obstinate skin diseases. **H. et qui'niæ protochlo'ridum,** protochloride of mercury and quinia, combination of mild chloride of mercury and quinia, administered in obstinate cutaneous diseases. **H. sacch'arum vermif'ugum,** hydrargyrum saccharatum. **H. subchlo'ridum,** H. chloridum mite. **H. subio'didum,** H. iodidum. **H. submu'rias,** H. chloridum mite. **H. submu'rias ammonia'tum,** hydrargyrum ammoniatum. **H. subsul'phas** or **s. fla'vus** (Ph. U. S.), hydrargyri sulphas flavus. **H. subsul'phas peroxidat'i,** hydrargyri sulphas flava. **H. sul'phas,** hydrargyri persulphas. **H. sul'phas fla'va,** basic mercuric sulphate, yellow subsulphate of mercury, oxymercuric sulphate, turpeth mineral, subsulphate of mercury; yellow odorless powder, with metallic taste, not soluble in water or alcohol; formed by action of boiling water on mercuric sulphate; alterative, errhine, and emetic; irritant poison. **H. sulphure'tum ni'grum,** black sulphuret of mercury, sulphuret of mercury with sulphur, æthiops mineral; made by treating equal parts of sulphur and mercury until metallic globules disappear; used chiefly in scrofulous and cutaneous affections. Dose, gr. x to ℥ss. **H. sulphure'tum ru'brum,** H. sulphidum rubrum (Ph. U. S.), bisulphuret or red sulphuret of mercury, mercuric sulphide, cinnabar, cinoper, vermilion; insoluble scarlet powder, without taste or odor, made by heating together sulphur and mercury, and afterward subliming; antisyphilitic, but chiefly used in fumigation against venereal ulcers of the nose, mouth, and throat—℥ss being thrown on a red-hot iron. **H. supermu'rias,** H. bichloridum. **H. superni'tras,** see *Hydrargyri nitras.* **H. tar'tras** or **prototar'tras,** tartrate of mercury; antisyphilitic. Dose, one or two grains twice a day.

Hydrargyria (hid-rar-jir'e-ah), **Hydrargyriasis** (hid-rar-jir-e'as-is), or **Hydrargyro'sis.** Disease induced by the use of mercury; mercurial disease; poisoning by mercury; eczema mercuriale. Also the phenomena produced by mercury on the organism, mercurialism.

Hydrargyricum (hid-rar-jir'ik-um) or **Hydrargyrium,** hid-rar-jir'e-um. Mercurial.

Hydrargyrism, hi-drar'jir-izm. Hydrargyria.

Hydrargyroman'ia. Insanity from use of mercury.

Hydrargyrophthal'mia. Ophthalmia from use of mercury.

Hydrargyrosialorrhœa, hid-rar-jir-o-se-al-or-rhe'ah (*hydrargyrum,* mercury, *sialon,* saliva, *rheo,* to flow). Mercurial salivation.

Hydrargyrosis, hid-rar-jir-o'sis. Eczema mercuriale; hydrargyria.

Hydrargyrostomatitis, hid-rar-jir-o-sto-mat-e'tis. Mercurial salivation; mercurial stomatitis; mercurial sore throat.

Hydrargyrotripsis, hid-rar-jir-o-trip'sis (*hydrargyrum, tripsis,* rubbing). Mercurial inunction.

Hydrargyrum, hid-rar'jir-um (*hydro, arguros,* silver). Mercury; quicksilver. Fluid, brilliant metal, of a slightly bluish-white color; fluid above −39° of Fahr. and under 662°. S. g., when liquid, 13.5; easily oxidized. Metallic quicksilver does not act on the body when taken into the stomach; but if oxidized and combined with acids, it acts powerfully. It has been exhibited in cases of constriction of the bowels and intussusception, from a notion that it must certainly pass through the bowels by its gravity. When the crude metal is distilled in an iron retort it forms hydrargyrum purificatum. **H. aceta'tum** or **ace'ticum,** mercury, acetate of. **H. albumina'tum,** mercury albuminate. **H. amida'to-bichlo'ridum** or **amida'to-bichlora'tum,** H. ammoniatum. **H. ammonia'to-muriat'icum,** H. ammoniatum. **H. ammonia'tum** (Ph. U. S. and Br.), ammoniochloride of mercury, ammoniated mercury, white precipitate of mercury, amidochloride of mercury, white precipitate; white insoluble powder, devoid of odor or taste, made by precipitation from solution of mercuric chloride with water of ammonia. A peroxide, combined with muriatic acid and ammonia, forming a triple salt. Used in powder to destroy vermin; and, united with lard, for the same purpose, as well as in scabies and other cutaneous affections. **H. arsenia'to-ioda'tum,** arsenic and mercury, iodide of. **H. bibroma'tum,** hydrargyri bibromidum. **H. bichlorat'um,** hydrargyri bichloridum. **H. bichlorat'um ammonia'tum,** H. ammoniatum. **H. b. corrosi'vum,** hydrargyri bichloridum. **H. biiodat'um cum kalio ioda'to,** potassii hydrargyro-iodidum. **H. biiodat'um ru'brum,** hydrargyri iodidum rubrum. **H. bisulphure'tum ru'brum,** red sulphide of mercury. **H. borus'icum,** hydrargyri cyanuretum. **H. broma'tum,** hydrargyri

bromidum. **H. carbol'icum**, mercury carbolate. **H. chlora'tum** or **chlora'tum mite**, hydrargyri chloridum mite. **H. corrosi'vum al'bum** or **sublima'tum**, hydrargyri bichloridum. **H. cum cre'tâ**, mercury with chalk, gray powder, protoxide of mercury; formed by trituration with carbonate of lime. It may be advantageously exhibited in diarrhœa in children dependent upon acidity and vitiated secretions; dose, 2 to 10 grains in any viscid substance. **H. cyana'tum** or **cyanogena'tum**, hydrargyri cyanuretum. **H. dul'ce præcipita'tum**, hydrargyri chloridum mite. **H. elain'icum**, mercury oleate. **H. formamida'tum**, mercury formamidate; salt introduced for hypodermic injection in syphilis, being solution of mercuric formamide, made by action of caustic soda on corrosive sublimate, washing the precipitate, dissolving in formamide and water at 30° to 48° C. **H. hydrocyan'icum**, hydrargyri cyanuretum. **H. ioda'tum**, hydrargyri iodidum. **H. ioda'tum cum chlo'rido-mercu'rii**, mercury, iodide of chloride of. **H. ioda'tum fla'vum**, hydrargyri iodidum. **H. ioda'tum ru'brum**, hydrargyri iodidum rubrum. **H. iodidula'tum**, hydrargyri iodidum. **H. cum magne'siâ** resembles H. cum cretâ in properties. **H. muriat'icum** or **muriat'icum du'lce** or **mi'te**, hydrargyri chloridum mite. **H. muriat'icum præcipita'tum**, hydrargyrum ammoniatum. **H. muria'tum**, hydrargyri chloridum mite. **H. muria'tum corrosi'vum**, hydrargyri bichloridum. **H. nitra'tum**, hydrargyri nitras. **H. nitra'tum ru'brum**, hydrargyri oxidum rubrum. **H. ni'tricum**, hydrargyri nitras. **H. ni'tricum oxydula'tum crystallisa'tum**, hydrargyri nitras. **H. ni'tricum oxydula'tum liq'uidum**, liquor hydrargyri nitratis. **H. olein'icum** or **o'leo-stearin'icum**, mercury oleate. **H. oxyda'tum**, hydrargyri oxidum rubrum. **H. oxyda'tum fla'vum**, hydrargyri oxidum flavum. **H. oxyda'tum præcipita'tum**, hydrargyri oxidum flavum. **H. oxyda'tum ru'brum**, hydrargyri oxidum rubrum. **H. oxydula'tum ni'tricum**, hydrargyri nitras. **H. oxydula'tum per se**, æthiops per se. **H. oxydula'tum pu'rum**, hydrargyri oxidum nigrum. **H. oxydula'tum sulphura'tum ru'brum**, hydrargyri sulphuretum rubrum. **H. oxymuriat'icum mi'te**, hydrargyri chloridum mite. **H. perbroma'tum**, hydrargyri bibromidum. **H. perchlora'tum** or **perchlo'ridum**, hydrargyri bichloridum. **H. perioda'tum**, hydrargyri iodidum rubrum. **H. persulphura'tum**, hydrargyri sulphuretum rubrum. **H. phosphora'tum** or **phospho'reum**, mercury phosphate. **H. præcipita'tum** or **præcipita'tum al'bum**, H. ammoniatum (Ph. U. S.). **H. præcipita'tum per se**, mercuric oxide; made by heating mercury to near boiling-point, until oxidized to red powder. **H. sacchara'tum**, mild mercurial formula in several European pharmacopœias; formed by triturating mercury with white sugar; used in worms and venereal affections of children. **H. salicyl'icum**, mercury salicylate. **H. sal'itum**, hydrargyri bichloridum. **H. sublima'tum**, hydrargyri bichloridum. **H. sulfura'tum ni'grum**, æthiops mineral; hydrargyri sulphuretum nigrum. **H. sulfura'tum stibia'tum**, æthiops antimonialis. **H. sulphura'tum ru'brum**, hydrargyri sulphuretum rubrum. **H. sulphu'ricum**, hydrargyri sulphas. **H. sulphu'ricum fla'vum**, yellow sulphate of mercury; turpeth mineral. **H. vitriola'tum**, hydrargyri sulphas flava. **H. zoöt'icum**, hydrargyri cyanuretum.

Hydrargyrus, hid-rar'jir-us. Hydrargyrum. **H. aceta'tus**, mercury acetate. **H. biioda'tus**, hydrargyri iodidum rubrum. **H. calcina'tus**, hydrargyri oxidum rubrum. **H. chlora'tus mi'tis**, hydrargyri chloridum mite. **H. cum cre'tâ**, hydrargyrum cum cretâ. **H. ioda'tus**, hydrargyri iodidum. **H. ioda'tus fla'vus**, hydrargyri iodidum. **H. ioda'tus ru'ber**, hydrargyri iodidum. **H. muriat'icus mi'tis**, hydrargyri chloridum mite. **H. muria'tus**, hydrargyri bichloridum. **H. muria'tus mi'tis**, hydrargyri chloridum mite; H. chloridum corrosivum. **H. nitra'tus ru'ber**, hydrargyri nitrico-oxidum. **H. perioda'tus**, hydrargyri iodidum rubrum. **H. phosphora'tus**, mercury phosphide; phosphuretted mercury; used in cases of inveterate venereal ulcers. **H. sulphura'tus ru'ber**, hydrargyri sulphuretum rubrum. **H. cum sul'phure**, hydrargyri sulphuretum nigrum. **H. vitriola'tus**, hydrargyri sulphas flava.

Hydrarthron (hid-rar'thron), **Hydrarthros** (hid-rar'thros), **Hydrarthro'sis** (hid-rar-thro'sis), or **Hydrarthrus**, hid-rar'thrus (*hydro*, *arthron*, joint). White swelling; dropsy of the articulations. White swelling is a formidable strumous disease; it may attack any joint, but is commonly met with in the knee, haunch, foot, and elbow; generally in scrofulous children. It consists, at times, in tumefaction and softening of soft parts and ligaments surrounding the joints; at others, in swelling and caries of the articular extremities of bones; or both states may exist at the same time. Synovia. **H. synovia'lis**, hydrarthrus.

Hy'dras. Hydrate. **H. chloral'icus**, chloral hydrate. **H. fer'ricus**, ferric hydrate. **H. kal'icus**, potassa. **H. magne'sicus**, magnesium hydrate. **H. na'tricus**, soda. **H. potas'sicus**, potassa. **H. so'dicus**, soda.

Hydrastia (hid-ras'te-ah) or **Hydras'tine.** $C_{22}H_{23}NO_6$. White prismatic alkaloid in Hydrastis Canadensis; causes constriction of vessels in small doses and increase of blood-pressure; in large doses, vaso-motor paralysis and diminution of blood-pressure. Given in chronic catarrhal affections of urinary organs in typhoid and other fevers, and as an injection in gonorrhœa. When hydrastine is oxidized with nitric acid a white crystalline alkaloid, *hydrastinine*, is obtained, $C_{11}H_{13}NO_3$, used as substitute for ergot in metrorrhagia, congestive dysmenorrhœa, etc. See *Hydrastis Canadensis* and *Doses* (table).

Hydras'tinine. See *Hydrastine.*

Hydrastis, hid-ras'tis (*hydro*, *drao*, to be active). H. Canadensis. **H. Canaden'sis**, Canadian hydrastis, yellow root, orange root, yellow puccoon, ground raspberry, yellow paint, golden seal, Indian paint, eyebalm, nat. ord. Ranunculaceæ. The rhizome and rootlets, *Hydrastis* (Ph. U. S.), are used in infusion as a tonic and as a "mouth-water" and outward application in wounds and local inflammations. Its characteristic alkaloid is hydrastia or hydrastine.

Hy'drate. Compound of an element with water.

Hydrated, hi'dra-ted. Containing water; forming hydrate. **H. ox'ide of am'yl**, amylic alcohol. **H. ox'ide** or **perox'ide** or **sesquiox'ide of i'ron**, ferric hydrate.

Hydration, hi-dra'shun (*hudor*, water). Impregnation or moistening with water.

Hydra'tum. Hydrate.

Hydrazine, hy-dra-zeen'. N_2H_4. Active poison, fatal to animals and vegetables, to bacteria, etc.

Hydrec'tasis (*hydro*, *ektasis*, dilatation). Dilatation by water or serous fluid.

Hydredema, hid-red-e'mah (*hydro*, *oidema*, swelling). Œdema.

Hydrelæon, hid-rel-e'on (*hydro*, *elaion*, oil). Mixture of water and oil.

Hydrelectricity, hi-drel-ek-tris'it-e. Galvanism.

Hydrelytron, hid-rel'it-ron (*hydro*, *elutron*, vagina). Watery collection in the vagina. See *Hydrocele.*

Hydremesis, hid-rem'e-sis (*hydro*, *emesis*, vomiting). Vomiting of watery liquid.

Hydrencephalic, hi-dren-sef-al'ik (*hydro*, *enkephalos*, encephalon). Hydrocephalic.

Hydrencephalitis, hid-ren-sef-al-e'tis (*hydro*, *encephalon*). Hydrocephalus internus.

Hydrencephalium (hid-ren-sef-al'e-um) or **Hydrocephalion**, hid-ro-sef-al'e-on (*hydro*, *encephalon*). Hydrocephalus internus.

Hydrencephalocele (hid-ren-sef-al-o-se'le) (Eng. hidren-sef'al-o-seel) or **Hydrocephalocele**, hid-ro-sef-al-o-se'le (Eng. hi-dro-sef'al-o-seel) (*hydro*, *encephalon*, *kele*, rupture, protrusion). Monstrosity in which there is a fissure of the cranium, the integument of the head being present and forming a hernial sac in which the brain lies outside the skull, the sac containing a large quantity of serous fluid. See *Meningocele*, *Encephalocele*, *Hernia cerebri*, *Hydrocephalus chronicus*. **H. ante'rius** or **fronta'lis**, proencephalus.

Hydrencephaloid (hid-ren-sef'al-oid) or **Hydroceph'aloid** (*hydro, encephalon, eidos,* resemblance). Resembling hydrencephalus. Disorders of the bowels and exhaustion in children are at times attended with hydrencephaloid symptoms.

Hydrencephalon (hid-ren-sef'al-on) or **Hydrenceph'alus.** Hydrocephalus chronicus.

Hydrencephalus, hid-ren-sef'al-us (*hydro, enkephalos,* encephalon). Hydrocephalus internus.

Hydrenterepiplocele, hid-ren-ter-ep-ip-lo-se'le (Eng. hid-ren-ter-ep-ip'lo-seel). Entero-epiplocele sac of which contains serous fluid.

Hydrenterocele, hid-ren-ter-o-se'le (Eng. hid-ren'-ter-o-seel) (*hydro, enteron,* intestine, *kele,* tumor). Intestinal hernia the sac of which encloses fluid.

Hydrenteromphalocele (hid-ren-ter-om-fal-o-se'le) (Eng. hid-ren-ter-om'fal-o-seel) or **Hydrenterom'phalus** (*hydro, enteron,* intestine, *omphalos,* umbilicus, *kele,* rupture). Umbilical hernia with intestine and water in the sac.

Hydrepigastrium, hid-rep-e-gas'tre-um. Accumulation of fluid in external or superficial ascites outside the peritoneum.

Hydrepiplocele, hid-rep-ip-lo-se'le (Eng. hid-rep-ip'lo-seel) (*hydro, epiploon,* omentum, *kele,* rupture). Omental hernia with water in the sac.

Hydrepiplomphalus (hid-rep-ip-lom'fal-us) or **Hydrepiplomphalocele** (*hydro, epiploon,* omentum, *omphalos,* umbilicus). Umbilical hernia with omentum and water in the sac.

Hydrepiploon, hid-rep-ip'lo-on. Dropsy of the omentum.

Hydre'tron or **Hydretrum,** hid-ra'trum (*hydro, etron,* lower belly). Ascites.

Hydriasis, hid-re'as-is (*hudor,* water). Hydrotherapy.

Hydriater, hid-re'at-ur (*hydro, iatros,* physician). Hydropathic physician.

Hydriatria (hid-re-at-re'ah), **Hydriatrica** (hid-re-at're-ka) **ars,** or **Hydriat'rics.** Hydrotherapy.

Hydriatricus (hid-re-at'rik-us) or **Hydriatrus,** hid-re-at'rus. See *Hydropathic.*

Hydriatry, hid-re-at're. Hydrotherapy.

Hydric, hi'drik. Containing water or combined with hydrogen. **H. ether,** ether.

Hydriodas (hid-re'od-as) **kal'icus.** See *Potassæ hydriodas.*

Hydriodic (hid-re-od'ik) **acid.** See *Acid, hydriodic.* **H. ether,** æther hydriodicus; ethyl iodide.

Hydriosis, hid-re-o'sis. Hydrotherapy.

Hydro, hid'ro. In composition, water.

Hydroa, hid-ro'ah (*hudor,* water). Affection consisting in accumulation of water or serous fluid under the epidermis. Sudamina; pemphigus; herpes iris; cysticercus; symptomatic form of miliary fever; hydatid. **H. febri'lis,** facial herpes. **H. gestatio'nis,** impetigo herpetiformis; pemphigus gravidarum. **H. herpetifor'me,** vesicles grouped as in herpes. **H. pemphigoï'des,** herpetiform dermatitis. **H. prurigino'sum,** form of h. attended with vesicles or bullæ, which when they empty and dry leave red papules. **H. vaccinifor'me,** vesicular eruption which becomes umbilicated. **H. vesiculo'sum,** simple hydroa, often associated with erythema; herpes iris.

Hydro-abdo'men. Ascites.

Hydroadenitis, hid-ro-ad-en-e'tis. Inflammatory state of the perspiratory follicles ending usually in suppuration.

Hydroæmia, hid-ro-e'me-ah (*hydro, haima,* blood). State of the blood in which the watery constituents are in excess.

Hydro-aëric, hid-ro-a'er-ik (*hydro, aër,* air). Epithet for the sound rendered on percussing or auscultating cavities containing water and air.

Hydroarion, hid-ro-ar'e-on (*hydro, oarion,* ovarium). Dropsy or cystoma of the ovarium.

Hydroata, hid-ro'at-ah. Sudamina.

Hydrobiliru'bin. $C_{31}H_{40}N_4O_7$. Derivative of bilirubin, coloring matter in fæces and urine.

Hydroblepharismus (hid-ro-blef-ar-iz'mus), **Hydrobleph'aron,** or **Hydroblepharum,** hid-ro-blef'ar-um (*hydro, blepharon,* eyelid). Œdema or watery swelling of the eyelids. Blepharœdema. **H. ether,** ethyl bromide.

Hydrobromate, hi-dro-bro'mate. Salt of a base with hydrobromic acid.

Hydrobromic (hi-dro-bro'mik) **acid.** HBr. Pungent gas formed by action of phosphorus upon bromine. Ten per cent. solution in water constitutes *dilute hydrobromic acid,* acidum hydrobromicum dilutum (Ph. U. S.), which is given internally to produce the effect of the bromides in dose of one-half to two fluidrachms.

Hydrocachexia, hid-ro-kak-eks'e-ah. Dropsical habit.

Hydrocamphoric acid, hid-ro-kam-for'ik as'id. $C_{10}H_{18}O_4$. Acid formed by heating camphoric acid at 160° with hydriodic acid.

Hydrocarbons, hi-dro-kar'bons. Substances whose component parts are hydrogen and carbon, such as fats, essential oils, products of decomposition of organic matter, etc. Several hundred are known; they are solids, liquids, or gases.

Hydrocardia, hid-ro-kar'de-ah (*hydro, kardia,* heart). Serous secretion of the pericardium; hydropericardium.

Hydrocatarrhophesis (hid-ro-kat-ar-rof-a'sis) or **Hydrocatarrhoph'ia** (*hydro, katarrhopheo,* to sip up). Absorption of water from without.

Hydrocele, hid-ro-se'le (Eng. hi'dro-seel) (*hydro, kele,* tumor). Collection of serous fluid in the areolar texture of the scrotum or in coverings either of the testicle or spermatic cord. To the first of these varieties the name external hydrocele has been given; to the second, internal hydrocele, H. tunicæ vaginalis testis, hydrelytron. When the collection occurs in the envelope of the testicle, it is called hydrocele of the tunica vaginalis, and the epithet congenital is added, hydrocele congenita, when the interior of the membrane in which it is situate still communicates freely with the cavity of the abdomen. When it exists in the spermatic cord, it is called encysted or diffused hydrocele of the spermatic cord, hydrocele cystica, hydrocele funiculi seminalis or spermatic, as the case may be. The tumor of the distended scrotum is oblong, greater below than above, indolent, and semi-transparent. When inconveniently large the fluid may be evacuated by puncturing with a trocar, but, as it collects again, this is only palliative. Radical cure consists, usually, in injecting irritating liquid, as iodine, through the canula of the trocar, which has been left in after puncturing. This is kept in the tunica vaginalis a few minutes, and then withdrawn. The coat inflames, adhesion takes place, and the cavity is obliterated. **H., acute,** dropsical effusion during acute orchitis or as direct result of injury. **H., anasar'cous,** œdema of scrotum. **H. of canal' of Nuck,** hydrocele of the round ligament. **H., chy'lous,** chylocele. **H. congen'ita,** see *Hydrocele.* **H. cys'tica,** see *Hydrocele.* **H., Dupuytren's,** H. with constriction separating it in two. **H., encyst'ed,** cyst of spermatic cord, epididymis, or testicle, or tunica vaginalis. **H., endem'ic, of Mal'abar,** elephantiasis Arabum. **H., exter'nal,** see *Hydrocele.* **H. fœm'inæ** or **fœmine'a,** H. of labium pudendi. **H., funic'ular,** or **funic'uli semina'lis,** or **f. spermat'ici,** see *Hydrocele.* **H., her'nial,** accumulation of fluid in hernial sac; dropsical condition of the sac of an old scrotal hernia after obliteration of the neck; see *Oscheohydrocele.* **H. ingen'ita,** H. congenita. **H., inter'nal,** see *Hydrocele.* **H. intra-abdomina'lis,** H. of upper portion of inguinal canal. **H. of Mal'abar,** H., endemic. **H., milk'y,** chylocele. **H. mulie'bris,** H. fœminea. **H. of the neck,** a tumor filled with watery fluid, occupying some portion of the neck. **H., œdem'atous,** H., external; see *Hydrocele.* **H. peritonæ'i,** ascites. **H. of the round lig'ament,** hydrocele of the canal of Nuck; an uncommon affection, being a cystic growth of those parts. It may be treated by the seton or by the injection of iodine. **H., spermat'ic,** see *Hydrocele.* **H. spina'lis,** hydrorachis. **H. tes'tis,** form of cystic tumor beneath the tunica albuginea. **H., vagi'nal,** H. of the tunica vaginalis.

Hydrocelic, hi-dro-se'lik. Relating or appertaining to hydrocele.

Hydrocenosis, hid-ro-sen-o'sis (*hydro, kenosis,* evacuation). Evacuation of water morbidly accumulated in the body, by drugs or operation.

Hydrocephalic, hi-dro-sef-al'ik. Relating to hydrocephalus. **H. cry,** peculiar shriek of pain emitted at times by the hydrocephalic infant.

Hydrocephalitis, hid-ro-sef-al-e'tis. Hydrencephalitis. Hydrocephalus internus.

Hydrocephalium, hid-ro-sef-al'e-um. Hydrocephalus.

Hydrocephalocele, hid-ro-sef-al-o-se'le (Eng. hid-ro-sef'al-o-seel) (*hydrocephalus, kele,* rupture or protrusion). Hydrencephalocele.

Hydrocephalocentesis, hid-ro-sef-al-o-sen-ta'sis (*kentesis,* act of puncturing). Puncturing the head in hydrocephalus.

Hydrocephaloëctasis, hid-ro-sef-al-o-ek'tas-is (*hydrocephalus, ektasis,* extension). Hydrocephalus chronicus.

Hydrocephaloid, hi-dro-sef'al-oid (*hydrocephalus, eidos,* resemblance). Resembling hydrocephalus, as in cerebral anæmia of young children. Hydrencephaloid.

Hydrocephalon (hid-ro-sef'al-on) or **Hydrocephalum,** hid-ro-sef'al-um. Hydrocephalus.

Hydrocephalus, hi-dro-sef'al-us (*hydro, kephale,* head). Water of the head, dropsy of the head, dropsy of the brain. A collection of water within the head. It may be internal or external. **H. acu'tus,** H. internus, tubercular meningitis. **H. acu'tus se'num,** serous apoplexy. **H. adnat'us,** see *H. chronicus.* **H., arach'noid,** H. with effusion into arachnoid cavity. **H. chron'icus** may exist at birth; commonly commences at an early period of existence, the accumulation of fluid gradually producing distension of the brain and skull, with separation of the sutures; it commonly proves fatal before puberty. **H. congen'itus,** see *H. chronicus.* **H. exter'nus,** infiltration into the subcutaneous cellular tissue of the cranium; see *Hydrocephalus chronicus.* **H. inter'nus,** *Water brain fever, Whytt's disease;* generally seated in the meninges and surface of the encephalon; a tubercular meningitis, observed particularly in childhood; extremely acute and often very rapid, sometimes destroying in two or three days, at others extending to two or three weeks. On dissection water is generally found in the ventricles or at the base of the brain, or there are evidences of previous vascular excitement, as effusions of coagulable lymph, etc. When effusion occurs suddenly, either primarily or secondarily in the course of some other disease, it has been termed water-stroke. **H. longus,** chronic hydrocephalus. **H. meninge'us,** H. internus. **H., spu'rious,** hydrencephaloid (disease). **H., tuber'culous,** tubercular meningitis. **H. ventricula'ris** or **ve'rus,** H. internus.

Hydrochamaimelum, hid-ro-kam-aim-e'lum (*hydro, chamaimelon,* chamomile). Infusion of chamomile.

Hydrochezia, hid-ro-kez'e-ah (*hydro, chezo,* to go to stool). Serous or watery diarrhœa.

Hydrochinidin, hid-ro-chin'id-in. Hydroquinidine.

Hydrochinin, hid-ro-chin'in. Hydroquinine.

Hydrochloras, hid-ro-klor'as. Hydrochlorate. **H. ammo'niæ,** ammonium chloride.

Hydrochlorate, hi-dro-klor'ate. Salt of hydrochloric or muriatic acid with a base.

Hydrochloric (hi-dro-klor'ik) **acid.** Acidum hydrochloricum. **H. e'ther,** ethyl chloride.

Hydrochlorinas (hid-ro-klor'e-nas) **nat'ricus.** Sodium chloride.

Hydrocholecystis, hid-ro-kol-e-sis'tis (*hydro, chole,* bile, *kustis,* bladder). Distension of gall-bladder by bile or dropsical fluid.

Hydrocholecystitis, hid-ro-kol-e-sis-te'tis. Dropsy of gall-bladder attended with inflammation.

Hydrocinchonidine, hid-ro-sin-kon'id-een. $C_{19}H_{24}N_2O$. Alkaloid derived from cinchona.

Hydrocinchonin, hid-ro-sin'ko-nin. $C_{19}H_{22}N_2O$. Alkaloid made by action of potassium permanganate on cinchonine.

Hydrocirsocele (hid-ro-sur-so-se'le) (Eng. hi-dro-sur'so-seel), **Hygrocir'socele,** or **Hy'grocele** (*hydro, kirsos,* varix, *kele,* tumor). Tumor formed by the varicose distension of the veins of the spermatic cord, and by the accumulation of serous fluid in the areolar texture of the scrotum.

Hydrocœlia, hid-ro-se'le-ah (*hydro, koilia,* abdomen). Ascites.

Hydrocollidine, hid-ro-kol'lid-een. Oily liquid ptomaine obtained from putrefying mackerel and horseflesh or ox-flesh, etc. Very poisonous, resembling strychnia in action.

Hydrocolpocele, hid-ro-kol-po-se'le (Eng. hi-dro-kol'po-seel) (*hydro, kolpos,* vagina, *kele,* tumor). Watery or serous tumor of the vagina.

Hydrocon'chinine. Hydroquinidine.

Hydroconium, hid-ro-ko'ne-um (*hydro, konios,* dusty). Bath, shower; apparatus for throwing spray.

Hydrocotarnia, hid-ro-ko-tar'ne-ah. Poisonous alkaloid obtained from mother-liquor of opium, after morphia and codeia have been separated. $C_{12}H_{15}NO_3$.

Hydrocotarnine, hid-ro-ko-tar'nin. Hydrocotarnia.

Hydrocotoïn, hid-ro-ko'to-in. $C_{22}H_{16}O_5$. Crystallizable principle in coto bark; action is similar to that of cotoin.

Hydrocotyle Asiatica, hid-ro-kot'il-e a-ze-at'ik-ah (*hydro, kotule,* cup, leaves being like cups). Asiatic or Midian pennywort, order Umbelliferæ. Plant of India, Cape of Good Hope, and Jamaica, possessed of astringent, febrifuge, and diuretic properties. The leaves are applied to bruised parts to prevent inflammation. In India hydrocotyle has been used as a remedy for leprosy. **H. Bonarien'sis,** plant growing in Brazil, having diuretic properties. **H. centel'la,** S. African plant, the roots and stalks of which are astringent; used in diarrhœa and dysentery. **H. umbella'tum,** acaricoba. **H. vulga'ris,** marsh pennywort; aperient.

Hydrocrania (hid-ro-kran'e-ah) or **Hydrocranium,** hid-ro-kran'e-um (*hydro, kranion,* skull). Hydrocephalus.

Hydrocrithe, hid-ro-krith'e (*hydro, krithe,* barley). Barley-water.

Hydrocyanic (hi-dro-si-an'ik) **acid** (*hydro, kuanos,* blue). Prussic acid; cyanohydric or cyanhydric acid. This acid exists in a great variety of native combinations in the vegetable kingdom, and imparts to them certain properties long known and esteemed; as in the bitter almond, cherry-laurel, leaves of the peach tree, kernels of fruit, pips of apples, etc. When concentrated it is liquid, colorless, of a strong smell and taste, at first cooling, afterward burning. Its s. g. as a liquid, at 18° Centigrade, is 0.6969. It is very volatile, speedily undergoes decomposition, and consists of a peculiar gaseous and highly inflammable compound of carbon and nitrogen, cyanogen, and of hydrogen, which acts as the acidifying principle; hence its name, hydrocyanic acid. Great caution is necessary in its use, on account of its extremely poisonous properties. It has been advised in laryngeal phthisis, pulmonary phthisis, pulmonary inflammation and irritation, dyspepsia, uterine affections, hectic cough, cancer, chronic rheumatism, and mania, and as a local remedy in impetiginous affections. It is so unmanageable, and the preparation so uncertain, that it is not much used. The dose of medicinal prussic acid, *Acidum hydrocyanicum dilutum* (Ph. U. S.), containing 2 per cent. of the acid, is from a quarter of a drop to two drops. **H. e'ther** (C_2H_5CN), ethyl cyanide, proprionitrite; very poisonous liquid, formed by action of ethyl iodide on potassium cyanide in closed tubes at temperature of 180° C.; properties like those of hydrocyanic acid.

Hydrocyanogen, hi-dro-si-an'o-jen. Hydrocyanic acid.

Hy'drocyst or **Hydrocystis,** hid-ro-sis'tis (*hydro, kustis,* bladder). Cyst containing a watery or serous fluid; hydatid; saccated ascites.

Hydrodeopyra, hid-ro-de-op'ir-ah (*hydrodes,* watery, *pur,* fever). Fever with watery discharges.

Hydroderma, hid-ro-dur'mah (*hydro, derma,* skin). Anasarca.

Hydrodes, hid-ro'dees. Aqueous.

Hydrodiarrhœa, hi-dro-di-ar-rhe'ah. Serous diarrhœa.

Hydrodictiotomy, hi-dro-dik-te-ot'o-me (*hydro, diktuon,* retina, *tome,* incision). Operation by incision for relief of œdema of the retina.

Hydrodiuresis, hid-ro-de-u-re'sis (*hydro, diuresis,* passage of water). Passage of watery urine.

Hydrœdema, hid-red-e'mah. Œdema.

Hydro-elat'erin. Amorphous substance derived from Momordica elaterium.

Hydro-electrization, hi-dro-el-ek-tre-za'shun. Employment of water as an electrode in electrization.

Hydro-encephalocele, hid-ro-en-sef-al-o-se'le (Eng. hi-dro-en-sef'al-o-seel) (*hydro, encephalon, kele,* tumor). Hydro-encephalocele.

Hydro-enceph'alon. Hydrocephalus.

Hydro-encephalorrhœ'a (*hydro, encephalon, rheo,* to flow). Serous apoplexy.

Hydro-encephalus, hid-ro-en-sef'al-us. Hydrocephalus.

Hydro-enterocele, hid-ro-en-ter-o-se'le (Eng. hi-dro-en'ter-o-seel) (*hydro, enteron,* intestine, *kele,* tumor). Hydrocele complicated with enterocele.

Hydro-entero-epiplocele, hid-ro-en-ter-o-ep-ip-lo-se'le (Eng. hi-dro-en-ter-o-ep-ip'lo-seel) (*hydro, enteron,* intestine, *epiploon,* omentum). Hydro-epiplo-enterocele; entero-epiplocele the sac of which contains a serous fluid.

Hydro-entero-epiplomphalum, hid-ro-en-ter-o-ep-ip-lom'fal-um (*hydro, enteron,* intestine, *epiploon, omphalos,* navel). Umbilical hernia the sac of which contains intestine, epiploon, and serum.

Hydro-enteromphalum (hid-ro-en-ter-om'fal-um) or **Hydrenterom'phalum** (*hydro, enteron,* intestine, *omphalos,* umbilicus). Hernia umbilicalis the sac of which contains intestine and serum.

Hydro-enterorrhœa, hid-ro-en-ter-or-rhe'ah. Watery diarrhœa.

Hydro-epigastrium, hid-ro-ep-e-gas'tre-um. Hydrepigastrium.

Hydro-epiplocele, hid-ro-ep-ip-lo-se'le (Eng. hi-dro-ep-ip'lo-seel) (*hydro, epiploon,* omentum, *kele,* tumor). Hernia formed by omentum the sac of which contains serum.

Hydro-epiplo-enterocele, hid-ro-ep-ip-lo-en-ter-o-se'le (Eng. hi-dro-ep-ip-lo-en'ter-o-seel). Hydro-entero-epiplocele.

Hydro-epiplomphalocele, hid-ro-ep-ip-lom-fal-o-se'le (Eng. hi-dro-ep-ip-lom'fal-o-seel). Hydrepiplomphalocele.

Hydro-epiplomphalum, hid-ro-ep-e-plomf'al-um (*hydro, epiploon,* omentum, *omphalos,* umbilicus). Umbilical hernia the sac of which contains intestine and serum.

Hydro-epiploon, hid-ro-ep-ip'lo-on. Hydrepiploon.

Hydro-et'ron. Ascites.

Hydrofluoric (hi-dro-flu-or'ik) **acid.** Thin liquid, soluble in water, and used in such solution in goitre, and inhaled in phthisis and diphtheria. It is also antiseptic.

Hydrogala, hid-rog'al-ah (*hydro, gala,* milk). Mixture of water and milk.

Hydrogaster, hid-ro-gas'ter (*hydro, gaster,* belly). Ascites.

Hydro-gastrorrhœa, hid-ro-gas-tror-rhe'ah (*hydro, gaster,* stomach, *rheo,* to flow). Watery effusion into the cavity of the stomach or abdomen.

Hydrogen, hi'dro-jen (*hydro, gennao,* to produce). Inflammable air; sp. gr. .069; this gas when breathed proves fatal from containing no oxygen; when diluted with two-thirds of atmospheric air it occasions diminution of muscular power and sensibility, and a reduction of the force of the circulation. It has been respired in catarrh, hæmoptysis, and phthisis. Hydrogen has been used by injection *per anum* to diagnosticate a wound of the bowel, the gas escaping at the cut aperture. **H., antimo'niated,** gaseous substance prepared at the moment of administration, by adding muriatic acid to a mixture of antimony and zinc, with tartar emetic or chloride of antimony, and inhaled in cases of pneumonia and capillary bronchitis. **H. binox'ide** or **perox'ide,** oxygenated water; combination of water with a mixing weight of oxygen; prepared by acting on barium dioxide with dilute sulphuric acid. It is a colorless, transparent liquid, very prone to decomposition; a powerful oxidizing agent, given as an excitant in asphyxia, cholera, and narcotic poisoning; and in cachectic affections—cancer, diabetes, etc.; and externally antiseptic in ulcers, chancre, diphtheritic sores, etc., probably by its oxidizing powers. Solution of the peroxide in ether, called ozonic or ozonized ether, was employed by Dr. B. W. Richardson of London to oxidize the sugar in the circulation, and cause its elimination through the lungs. **H. bro'mide,** hydrobromic acid. **H. bu'tylate,** butyl alcohol. **H., car'buretted,** *Methane, Methyl hydrate;* inflammable air, fire-damp, of miners, marsh gas; obtained by passing the vapor of water over charcoal, at the temperature of ignition, in an iron tube; has been found possessed of properties like hydrogen, and been used, diluted, in like cases. After the explosion of fire-damp in mines there remains the after-damp, choke-damp, or black-damp, consisting of carbonic acid and nitrogen, which occasions a greater loss of life, perhaps, than the explosion. **H. chlo'ride,** hydrochloric acid. **H. cy'anide,** hydrocyanic acid. **H. deutox'ide,** H. binoxide. **H. diox'ide,** H. binoxide. **H. eth'ylate,** ethyl alcohol. **H. flu'oride,** hydrofluoric acid. **H. i'odide,** hydriodic acid. **H. meth'ylate,** methylic alcohol. **H. ni'trate,** nitric acid. **H. ox'ide,** water. **H. perox'ide,** H., binoxide of. **H. persul'phide,** H_2S_2, oily liquid, powerful antiseptic. **H. protox'ide,** water. **H. subox'ide,** water. **H. sul'phate,** H_2SO_4, absolute sulphuric acid. **H. sul'phide,** H., sulphuretted, H. persulphide. **H., sul'phuretted,** hydrosulphuric, sulphydric, sulphhydric, sulphohydric, or hydrothionic acid, may be disengaged from any of the sulphurets by the addition of a strong acid. It is a violent poison, but has been used by injection *per anum* in phthisis, and as a means of determining the existence and location of wounds of the intestine; see *Hydrosulphuretted water.*

Hydrogenesis, hid-ro-jen'es-is. Formation or accumulation of watery fluid.

Hydrogenii peroxidum, hid-ro-jen'e-e per-ox'id-um. Hydrogen binoxide.

Hydrogenium, hid-ro-jen'e-um. Hydrogen.

Hydrogenosulphuretum, hid-roj-en-o-sul-fu-re'tum. Hydrosulphide. **H. ammoni'acæ liq'uidum,** ammoniæ sulphuretum.

Hydroglossa, hid-ro-glos'sah (*hydro, glossa,* tongue). Ranula.

Hydrography, hi-drog'ra-fe (*hydro, grapho,* to describe). See *Hydrology.*

Hydrohæmatocele, hid-ro-he-mat-o-se'le (Eng. hi-dro-hem-at'o-seel). Hæmatocele complicated with hydrocele; hydræmatocele.

Hydrohæmia (*hydro, haima,* blood). Hydræmia, anæmia, hydroæmia.

Hydrohæmothorax, hid-ro-he-mo-tho'raks. Presence of serous fluid and blood in cavity of pleura; hydrothorax combined with hæmatothorax.

Hydrohymenitis, hid-ro-he-men-e'tis (*hydro, humen,* a membrane). Inflammation of a serous membrane.

Hydrohystera, hid-ro-his'ter-ah (*hydro, hustera,* uterus). Hydrometra.

Hydroid, hi'droid (*hudor,* water, *eidos,* resemblance). Resembling water.

Hydrokeph'alus. Hydrocephalus.

Hydrolactom'eter (*hydro, lac,* milk, *metron,* measure). Instrument for determining the quantity of water in milk.

Hydrolæum, hid-ro-le'um. Hydrelæon.

Hydrolapathum, hid-ro-lap'ath-um (*hydro, lapathon,* the dock). Rumex hydrolapathum.

Hydrolat (F.), he'dro-lah. See *Hydrolica.*

Hydrolata, hid-ro'lat-ah. Distilled waters. See *Hydrolica.*

Hydrolatum, hid-ro-lat'um. Medicated water. **H. cinnamo'mi,** cinnamon-water. **H. flo'ris cit'ri**

auran'tii, orange-flower water. **H. lactu'cæ,** lettuce-water. **H. ro'sæ,** rose-water.

Hydrolé (F.). See *Hydrolica.*

Hydrolea (hid-ro'le-ah) **Zeylan'ica.** Plant of E. Indies, pulp of leaves being employed for ulcers.

Hydrole'ros or **Hydrole'rus** (*hydro, leros,* chatter). Variety of mania with great restlessness.

Hydrolica, hid-ro'le-kah. Watery solutions of the active principles of medicinal agents. Those prepared by solution or admixture are termed, by French pharmaciens, *Hydrolés;* by distillation, *Hydrolats.*

Hydrology, hi-drol'o-je (*hydro, logos,* a discourse). Treatise on water or water-supplies. Medical hydrology is that part of physics whose object is the study of water as it respects medicine; mineral waters, for example. Medical hydrography comprises the study of the influence exerted by the sea or by navigation on the health.

Hydrolyte, hi'dro-lite (*hydro, lutos,* soluble). Aqueous solution without distillation; liquor (Ph. U. S.).

Hydrolytic, hi-dro-lit'ik (*hydro, lusis,* solution). Producing elimination of water; causing dissolution of liquids or organic ferments.

Hydroma, hid-ro'mah (*hydro, oma,* tumor). Œdema; cyst or cystic tumor; abnormal growth consisting chiefly of water.

Hydromania, hid-ro-man'e-ah (*hydro, mania*). Polydipsia, or excessive desire for drink; diabetes insipidus; strong propensity to drown one's self.

Hydromediastinum, hid-ro-med-e-as-te'num. Effusion of serous fluid into the mediastinum.

Hy'dromel (*hydro, meli,* honey). A liquid medicine prepared with honey and tepid water, demulcent and laxative, and known under the names simple or vinous hydromel.

Hydromeningitis, hid-ro-men-in-je'tis. Meningitis with effusion; serous iritis; aquomembranitis; hydrocephalus internus; serous iritis; dotted or punctate keratitis.

Hydromeningocele, hid-ro-men-in-go-se'le (Eng. hi-dro-men-in'go-seel). Protrusion of membranes of brain containing fluid but no cerebral substance; encephalocele. Variety of spina bifida in which the spinal cord does not form part of the sac.

Hydromeninx, hid-ro-men'inks (*hydro, meninx,* membrane). Dropsy of meninges or membranes of the brain.

Hydromenorrhœ'a. Sanguinolent serous discharge from the vagina sometimes observed in pregnant women. Discharge of a thin or watery menstrual fluid.

Hydrometer, hi-drom'et-ur (*hydro, metron,* measure). Instrument for determining the density of liquids; areometer; acidometer.

Hydrometra (hid-ro-me'trah) or **Hydrome'tria** (*hydro, metra,* womb). Dropsy of the uterus; collection of the catarrhal secretions of the mucous membrane behind an abnormally contracted os uteri.

Hydrometrectasia, hid-ro-met-rek-tah'se-ah (*hydro, metra,* uterus, *ektasis,* extension). Hydrometra, or distension from it.

Hydromicrencephaly, hid-ro-mik-ren-sef'al-e (*hydro, mikros,* small, *encephalon,* brain). Atrophy of the brain in a microcephalic subject, with serous effusion into the cavities.

Hydromicrocephalus, hid-ro-mik-ro-sef'al-us (*hydro, mikros,* small, *kephale,* head). Hydrocephalus or serous effusion in a small or microcephalic brain.

Hydromphalocele hid-rom-fal-o-se'le (Eng. hi-drom'fal-o-seel) (*hydro, omphalos,* navel, *kele,* hernia). Hydromphalocele; umbilical hernia sac of which contains fluid.

Hydromphalon (hid-rom'fal-on), **Hydromphalum** (hid-rom'fal-um), or **Hydromphalus,** hid-rom'fal-us (*hydro, omphalos,* navel). A tumor formed by the accumulation of serum in the sac of umbilical hernia or by distension of the navel in ascites.

Hydromyelia, hid-ro-me-el'e-ah (*hydro, muelos,* marrow). Collection of fluid in the spinal cord; hydrorrhachis.

Hydromyelitis, hid-ro-me-el-e'tis. Hydrorrhachis.

Hydromyelocele, hid-ro-me-el-o-se'le (Eng. hi-dro-me'el-o-seel) (*hydro, muelos,* marrow, *kele,* tumor). Collection of fluid in central canal of spinal cord; variety of spina bifida outer covering of which is made up of remains of spinal cord.

Hydromyelus, hid-ro-me'el-us. Hydromelia; hydrorrhachis.

Hydromyringa (hid-ro-mir-in'gah) or **Hydromy'rinx** (*hydro, myrinx,* membrana tympani). Dropsy of the drum of the ear or its membrane.

Hydronaphthol, hi-dro-naf'thol. Derivative of beta-naphthol; antiseptic and disinfectant; employed in tinea tonsurans, diarrhœa, typhoid fever. It is also antiseptic when applied externally in solution, especially in alcohol and glycerin.

Hydroncus, hid-ron'kus (*hydro, onkos,* tumor). Anasarca, œdema.

Hydronephrectasia, hid-ro-nef-rek-taz'e-ah (*hydro, nephros,* kidney, *ektasis,* dilatation). Dropsical distension of the kidney; hydronephrosis.

Hydroneph'ros or **Hydroneph'rus.** Dropsy of the kidney.

Hydronephrosis, hid-ro-nef-ro'sis (*hydro, nephros,* kidney). Hydrorenal distension; dropsy of the kidney. Accumulation of its secretion in the kidney, owing to the obstruction of the tubes of the papillæ.

Hydronosus (hid-ron'os-us) or **Hydronusis,** hid-ron-u'sus (*hydro, nosos,* disease). Dropsy; watery effusion.

Hydro-oarion, hid-ro-o-ar'e-on. Ovarian dropsy.

Hydro-oligocythæmia, hid-ro-ol-ig-o-sith-e'me-ah (*hydro, oligos,* few, *haima,* blood). Variety of anæmia characterized by increase in proportion of serum, as after lead-poisoning.

Hydro-opho'ria or **Hydro-ophoron,** hid-ro-of'or-on (*hydro, oöphoros,* egg-bearing). Ovarian dropsy.

Hydro-ovarium, hid-ro-o-var'e-um. Ovarian dropsy.

Hydroparotus, hid-ro-par-ot'us. Œdema or watery cyst of parotid gland.

Hydropath, hi'dro-path. Hydropathist.

Hydropathic, hi-dro-path'ik (*hydro, pathos,* affection). Relating to hydropathy or the water-cure.

Hydropathist, hi-drop'ath-ist. Hydropathic physician; a believer in hydropathy.

Hydropathy, hi-drop'ath-e. Hydrotherapy, hydriatrics.

Hydropedesis, hid-ro-ped-a'sis (*hydro, pedao,* to spring out). Excessive sweating.

Hydropege, hid-ro-pa'ge (*hydro, pege,* spring). Spring-water.

Hydropeltis purpurea, hid-ro-pel'tis pur-pu're-ah (*hydro, pelte,* buckler; having leaves like a buckler). Brasenia hydropeltis.

Hydropericardia, hid-ro-per-e-kar'de-ah. Hydropericardium.

Hydropericarditis, hid-ro-per-e-kar-de'tis. Pericarditis with dropsy. Hydropericardium.

Hydropericardium (hid-ro-per-e-kar'de-um) or **Hydropericar'dia.** Dropsy of the pericardium; disease attended with palpitations, irregular or intermitting pulse, excessive dyspnœa or orthopnœa, and dulness over a large space on percussion; all associated with collection of fluid in the pericardium, as from Bright's disease, splenic or cancerous cachexia, etc.

Hydroperikardium, hid-ro-per-e-kar'de-um. Hydropericardium.

Hydroperione, hid-ro-per'e-own (*hydro, peri,* around, *oon,* egg or ovum). Sero-albuminous substance secreted by the lining of the uterus prior to the arrival of the impregnated ovum in that cavity.

Hydroperipneumonia, hid-ro-per-e-nu-mo'ne-ah (*hydro, peri,* around, *pneumon,* lung). Pneumonia complicated with effusion.

Hydroperitoneum, hid-ro-per-e-to-ne'um. Collection of serous fluid in cavity of peritoneum; ascites or abdominal dropsy.

Hydroperitonitis, hid-ro-per-e-ton-e'tis. Peritonitis with serous effusion.

Hydrophallus, hid-ro-fal'lus (*hydro, phallos,* male organ). Œdema of the male organ.

Hydrophenyl, hid-ro-fen'il. Benzole.

Hydrophlegmasia, hid-ro-fleg-maz'e-ah. Acute inflammation with serous effusion into the cellular tissue. **H. tex'tûs cellula'ris,** phlegmasia alba.

Hydrophlogosis, hid-ro-flo-go'sis (*hydro, phlogosis,* inflammation). Œdematous inflammation. **H. ventriculo'rum cer'ebri,** hydrocephalus internus.

Hydrophobia, hi-dro-fo'be-ah (*hydro, phobos,* dread). Canine madness, water-fright; strictly, morbid dread of water or other drinks, a symptom occasionally met with in other nervous affections than the disease so named; then called hysterical, nervous, or spontaneous hydrophobia. The term rabies is more appropriate for the aggregate of symptoms resulting from the bite of a rabid animal, as the dog—*R. canina.* Rabies is susceptible of spontaneous development in the dog, wolf, cat, and fox, which can thence transmit it to other quadrupeds or to man. The bitten part should always be excised, where practicable, and cauterized. **H., hyster'ical** or **ner'vous,** see *Hydrophobia.*

Hydrophobine, hi-dro-fo'been. Virus of hydrophobia or rabies.

Hydrophobophobia, hid-ro-fo-bo-fo'be-ah. Dread of hydrophobia; phantom hydrophobia.

Hydrophobos (hid-rof'ob-os) or **Hydrophobus,** hid-rof'ob-us. One bitten by a mad dog or affected with hydrophobia.

Hydrophone, hi'dro-fone (*hydro, phone,* sound). Instrument used in auscultatory percussion, water being the medium for transmission of sound.

Hydrophthalmia (hid-rof-thal'me-ah) or **Hydrophthal'mus** (*hydro, ophthalmos,* eye). Dropsy of the eye. Affection caused at times by an increase in the quantity of the aqueous or of the vitreous humor; in the former case the iris is concave anteriorly and pushed backward; in the latter, convex and pushed forward. Commonly it seems to depend on both humors at the same time. When all other remedies, as hydragogues, fomentations, bloodletting, blisters, etc., fail, the fluid may be evacuated by a puncture with a cataract needle at the lower part of the transparent cornea. **H., ante'rior,** ceratoglobus. **H., con'ical,** staphyloma of the cornea; conical cornea. **H. cruen'ta,** hæmophthalmia.

Hydrophthalmion (hid-rof-thal'me-on) or **Hydrophthal'mium.** Œdematous swelling of the conjunctiva.

Hydrophthal'mos or **Hydrophthalmus,** hid-rof-thal'mus. Hydrophthalmia. **H. cruen'tus,** internal hæmophthalmia.

Hydrophyllum (hid-ro-fil'lum) (*hydro, phullon,* a leaf) **Canaden'se** or **ve'rum.** Species of water-leaf or bur-flower, used in snake-bites or poisoning by Rhus toxicodendron; Hydrastis Canadensis.

Hydrophymosis, hid-ro-fi-mo'sis. Phimosis with dropsical effusion of the prepuce.

Hydrophysocele (hid-ro-fis-o-se'le) (Eng. hi-dro-fis'o-seel) (*hydro, phusa,* wind, *kele,* tumor). Hernia containing serous fluid and gas.

Hydrophysometra, hid-ro-fis-o-ma'trah (*hydro, phusao,* to inflate, *metra,* womb). Morbid condition of the womb in which both fluid and air are contained in it.

Hydropic, hi-drop'ik (*hudrops,* dropsy). Dropsical; one laboring under dropsy; dropsied; relating to dropsy; also diuretic or hydragogue; hence antihydropic.

Hydropiper, hid-ro-pi'per (*hydro, peperi,* pepper). Polygonum hydropiper; Elatine hydropiper.

Hydropisia, hid-ro-pisz'e-ah. Dropsy. **H. articula'ris,** hydrarthrus. **H. ventricula'ris,** hydrencephalus.

Hydrop'isine. Form of albumin found in urine and ovarian cysts; metalbumin.

Hydropisis (hid-rop'is-is) or **Hydropismus,** hid-rop-iz'mus. Dropsy.

Hydroplasm, hi'dro-plazm. A fluid constituent of protoplasm.

Hydropleuria, hid-ro-plu're-ah. Hydrothorax; hydropleuritis.

Hydropleuritis, hid-ro-plu-re'tis (*hydro, pleura,* the side). Pleurisy with effusion.

Hydropneumatocele, hid-ro-nu-mat-o-se-le (Eng. hi-dro-nu-mat' o-seel), (*hydro, pneuma,* air, *kele,* rupture). Hydrophysocele.

Hydropneumatomphalocele, hid-ro-nu-mat-om-fal-o-se'le (Eng. hi-dro-neu-mat'o-seel). Umbilical hernia containing serum and gas.

Hydropneumatosis, hid-ro-nu-mat-o'sis (*hydro, pneuma,* air). Abnormal accumulation of fluid and air; œdema of the lungs.

Hydropneumon (hid-ro-nu'mon) or **Hydropneumonia,** hid-ro-nu-mo'ne-ah (*hydro, pneumon,* lung). Dropsical infiltration or œdema of the lungs.

Hydropneumonypostasis, hid-ro-nu-mon-ip-os'tasis (*hydro, pneumon,* lung, *hypostasis,* deposition or sediment). Hypostatic pneumonia with œdema.

Hydropneumopericardia (hid-ro-nu-mo-per-e-kar'de-ah) or **Hydropneumopericardium,** hid-ro-nu-mo-per-e-kard'e-um (*hydro, pneuma,* air, *pericardium*). Effusion of fluid—as of blood, pus, or fibrinous exudation—and air in the cavity of the pericardium.

Hydropneumorrhœa, hid-ro-nu-mor-rhe'ah (*hydro, pneumon,* lung, *rheo,* to flow). Watery discharge from the lungs.

Hydropneumosarca, hid-ro-nu-mo-sark'ah (*hydro, pneuma,* air, *sarx,* flesh). An abscess containing water, air, and matters similar to flesh.

Hydropneumothorax, hid-ro-nu-mo-tho'raks (*hydro, pneumon,* lung, *thorax,* chest). Pneumothorax with effusion of blood into the chest. See *Pneumothorax.*

Hydropoid, hi'dro-poid (*hydrops, eidos,* likeness). Dropsical; resembling dropsy.

Hydropoiesis, hid-ro-poi-a'sis (*hydro, poieo,* to make). Formation of serum or watery fluid.

Hydropo'sia (*hydro, posis,* drinking). Water-drinking.

Hydropota (hid-rop'o-tah) or **Hydropotes,** hid-rop'-o-tees (*hydro, potes,* drinker). One who drinks only water or drinks it in an extraordinary quantity.

Hydrops, hi'drops. Dropsy. Preternatural collection of serous fluid in any cavity or in the areolar texture. When the areolar texture of the whole body is more or less filled with fluid, it is called anasarca or leucophlegmatia; when this variety is local or partial, it is called œdema. In encysted dropsy fluid is enclosed in a sac or cyst—dropsy of the ovarium is an instance. Dropsy may be active, consisting in an increased action of the exhalants, so that they pour out much more fluid than is absorbed; or passive, arising from atony of the absorbent vessels, allowing accumulation of fluid. It may be mechanical, or produced by obstruction to the circulation, as in diseased liver. Treatment consists in using remedies which act on the various secretions, so that, the demand being increased, the supply will have to be increased accordingly; and in this manner the collected fluid may be taken up by the absorbents. Also watery discharge of any kind; diabetes; one affected with dropsy.

Hy'drops abdom'inis, ascites. **H. abdom'inis aë'reus,** tympanites. **H. abdom'inis sacca'tus,** see *Ascites.* **H. adipo'sus,** chylous or milky form of ascites; ascites fluid contents of which are broken-down cells which have undergone fatty degeneration. **H. anasar'ca,** anasarca. **H. anasar'ca acu'tus,** see *Anasarca.* **H. an'tri,** dropsy of antrum of Highmore; see *Antrum.* **H. arachnoï'deæ,** hydrocephalus. **H. artic'uli** or **articulo'rum,** hydrarthrus; arthrœdema; effusion of serum in synovitis. **H. asci'tes,** ascites. **H. asthmat'icus,** beriberi. **H. bronchia'lis,** accumulation of water in the bronchial tubes, interfering with the breathing and inducing coldness of the surface of the body. **H. bul'la,** fever-blister. **H. bur'sæ muco'sæ,** synovial bursa. **H. cap'itis,** hydrocephalus; hydrocephalus chronicus. **H. cardi'acus,** cardiac dropsy; hydropericardium. **H. cavita'tis colum'næ vertebra'lis,** hydrorachis. **H. cellula'ris,** anasarca. **H. cellula'ris art'uum,** œdema. **H. cellula'ris toti'us cor'poris,** anasarca. **H. cellulo'sus,** anasarca. **H. cer'ebri,** hydrocephalus. **H. chylo'sus,** H. lacteus; H. adiposus. **H. cuta'neus,** anasarca. **H. cys'ticus,** encysted dropsy; see *Ascites* and *Hydrops.* **H. cyst'idis fel'leæ,** dropsy of the gall-bladder.

H. fibrino'sus, fibrinous dropsy; see *Effusion of serum.* **H. flatulen'tus**, tympanites. **H. frig'idus**, passive dropsy. **H. glot'tidis**, œdema of the glottis. **H. hepat'icus**, hepatic dropsy. **H. hypodermat'icus**, anasarca. **H. hyster'icus**, œdema from delay or suppression of menstrual discharge or of urinary secretion in hysterical cases. **H. incarcera'tus**, encysted dropsy; see *Hydrops.* **H. inter'cus**, anasarca. **H. lac'teus**, chylous or milky ascites. **H. leucophlegma'tia**, leucophlegmatia. **H. matel'læ**, diabetes. **H. ad mat'ulam**, diabetes. **H. mediasti'ni**, hydromediastinum. **H. medul'læ spina'lis**, hydrorachis. **H. oc'uli**, hydrophthalmia. **H. ova'rii**, hydroarion; dropsy or cystoma of ovary; see *Hydrops.* **H. pal'pebræ**, hydroblepharon; blepharœdema. **H. pec'toris**, hydrothorax. **H. pericar'dii**, hydropericardium. **H. peritonæ'i**, ascites. **H. pleu'ræ**, hydrothorax. **H. pulmo'nis** or **pulmo'num**, hydrothorax; hydropneumonia; œdema of the lungs. **H. pulmo'num cellulo'sus**, pulmonary œdema; hydropneumonia. **H. rena'lis** or **re'num**, hydronephrosis; dropsy, renal. **H. sacca'tus**, encysted dropsy; see *Hydrops.* **H. sac'ci lacryma'lis**, fistula lacrymalis; dropsy of lacrymal sac. **H. scro'ti**, hydrocele. **H. sic'cus**, emphysema. **H. sic'cus et flatulen'tus**, tympanites. **H. spi'næ** or **spi'næ vertebra'lis**, hydrorachis. **H. subcuta'neus**, anasarca. **H. te'læ cellulo'sæ**, anasarca. **H. tes'ticuli** or **testiculo'rum**, hydrocele. **H. thora'cis**, hydrothorax. **H. tu'bæ**, hydrosalpinx. **H. tuba'rum, tuba'rum Fallo'pii**, or **tuba'lis**, hydrosalpinx. **H. tym'pani**, dropsy of the tympanum. **H. tympani'tes**, tympanites. **H. umbilica'lis**, hydromphalum. **H. u'teri**, hydrometra. **H. u'teri vesicula'ris**, vesicular mole. **H. ventric'uli** or **ventriculo'rum cer'ebri**, hydrocephalus. **H. ve'rus**, anasarca. **H. vesi'cæ fel'leæ**, distension of gall-bladder by bile; dropsy of gall-bladder.

Hydropsia (hid-rop'se-ah) or **Hydropsy**, hi'drop-se. Dropsy.

Hydropyopneumothorax, hid-ro-pe-o-nu-mo-tho'raks (*hydro, puon*, pus, *pneuma*, air, *thorax*, chest). Inflammation of the pleura, followed by effusion of serum, pneumothorax, and pyothorax.

Hydropyosalpinx, hid-ro-pe-o-sal'pinks (*hydro, puon*, pus, *salpinx*, tube). Purulent accumulation in the Fallopian tube.

Hydropyret'ic. Feverish with sweating. Relating to hydropyretos.

Hydropyretos, hid-ro-pir'et-os (*hydro, puretos*, fever). Fever with sweating—*Hidropyretos* would be more proper (*hidros*, sweat); see *Sudor anglicus.*

Hydroquinidine, hi-dro-kwin'id-een. $C_{20}H_{26}N_2O_2$. Alkaloid derived from cinchona bark and cuprea bark.

Hydroqui'nine. Isomeric with hydroquinidine, and derived from cinchona and cuprea barks; antipyretic.

Hydroquinone, hi-dro-kwe'none. $C_6H_4O_2H_2$. Substance isomeric with resorcin, variously obtained; antipyretic, antiseptic, and antizymotic in typhoid fever, erysipelas, etc.

Hydrorachis (hid-ro-rak'is) or **Hydrorra'chis** (*hydro, rhachis*, spine. Spinal dropsy; effusion of serum, often owing to inflammation of the spinal membranes, forming a soft, frequently transparent tumor, constituted of the membranes of the spinal marrow, distended and projecting backward from the vertebral canal, the posterior paries of which, when the affection is congenital, is wanting to a certain extent; variously called spina bifida, atelorachidia, hydrorachis dehiscens or congenita, schistorrhachis, spinola.

Hydrorachitis, hid-ro-rak-e'tis. Hydrorachis; inflammatory hydrorachis.

Hydrorchis, hid-ror'kis (*hydro, orchis*, testicle). Hydrocele.

Hydrorrhachia (hid-ror-rhak'e-ah) or **Hydrorrhachis**, hid-ror-rhak'is. Hydrorachis. **H. congen'ita**, see *Hydrorachis.* **H. dehis'cens**, see *Hydrorachis.* **H. exter'na**, variety of hydrorrhachis in which serous effusion into the subarachnoid space occurs. **H. inter'na**, dropsy of central cavity of spinal cord.

Hydrorrachiocentesis, hid-ror-rak-e-o-sen-ta'sis (*hydrorrhachis, kentesis*, puncturation). Treatment of spina bifida or hydrorrhachis by puncturation.

Hydrorrhagia, hid-ror-rhaj'e-ah (*hydro, rhegnumi*, to break forth). Serous apoplexy.

Hydrorrhoe, hid-ror'rho-e. Dropsy.

Hydrorrhœa, hid-ror-rhe'ah (*hydro, rheo*, to flow). Hydrops; copious watery discharge, as from the vagina or uterus. **H. gravida'rum, puerpera'rum**, or **u'teri grav'idi**, discharge of water or serous fluid taking place at any time during pregnancy. It may be the liquor amnii, but is usually the result of rapid secretion from the uterine glands or from the cervical cavity.

Hydrorthopnœa, hid-ror-thop-ne'ah (*hydro, orthopnœa*, difficulty of breathing except in the erect posture). Orthopnœa owing to a collection of water in the chest.

Hydrosaccharum, hid-ro-sak'ar-um. Sugared water. Simple syrup.

Hydrosadenitis, hid-ros-ad-en-e'tis. Inflammation of the sudoriparous follicles.

Hydrosalpinx, hid-ro-sal'pinks (*hydro, salpinx*, a tube). Dropsy of the Fallopian tube.

Hydrosarca, hid-ro-sar'kah (*hydro, sarx*, flesh). Tumor containing a fluid, as well as portions of flesh. Anasarca.

Hydrosarcocele, hid-ro-sar-ko-se'le (Eng. hi-dro-sark'o-seel) (*hydro, sarx*, flesh, *kele*, a tumor). Tumor formed by a sarcocele, complicated with dropsy of the tunica vaginalis or hydrocele.

Hydroscheocele, hid-ros-ke-o-se'le (Eng. hi-dros'-ke-o-seel) (*hydro, osche*, the scrotum, *kele*, rupture). Collection of water in the scrotum. Hydrocele.

Hydroscheon (hid-ros'ke-on) or **Hydros'cheum.** Hydrocele; hydroscheocele.

Hydroschoncus, hid-ros-kon'kus (*hydro, osche*, scrotum, *onkos*, tumor). Collection of water in the scrotum.

Hydroscopy, hi-dros'ko-pe (*hydro, skopeo*, to see). Examination of water or watery fluids. Hydrometry.

Hydroselinum, hid-ro-sel-e'num. Apium graveolens.

Hydrosis, hid-ro'sis. Hidrosis.

Hydrospermatic, hi-dro-spur-mat'ik. Relating to thin or watery semen.

Hydrosphygmograph, hi-dro-sfig'mo-graf. Sphygmograph registering arterial variation when the limb is surrounded with water enclosed in a tube.

Hydrospirometer, hi-dro-spi-rom'e-tur (*hydro, spiro*, to breathe, *metron*, measure). Form of spirometer based on the effect of the act of breathing on a column of water.

Hydrostatic (hi-dro-stat'ik) **bed.** Water bed. **H. test of infan'ticide**, see *Docimasia.*

Hydrostat'ics. Science investigating the properties of liquids in a condition of equilibrium.

Hydrosteon (hid-ros'te-on) or **Hydrosteum**, hid-ros'te-um (*hydro, osteon*, bone). Accumulation of serum around ends of long bones in hydrarthrus or dropsy of joints.

Hydrostomia, hid-ro-stom'e-ah (*hydro, stoma*, mouth). Increased secretions in interior of mouth.

Hydrosudopathy, hi-dro-su-dop'ath-e (*hydro, sudo*, to sweat, *pathos*, affection). Hydrosudotherapeia.

Hydrosudotherapeia, hid-ro-su-do-ther-a-pi'ah (*hydro, sudo*, to sweat, *therapeuo*, to cure). *Hydropathy, Hydrosudopathy, Water-cure.* Badly-compounded word to express the mode of treating systematically by water, sweating, etc.

Hydrosulphuretum ammoniacale aquosum (hid-ro-sulf-u-re'tum am-mo-ne-ak-al'e ak-wo'sum) or **ammoni'acum.** Ammonii sulphuretum.

Hydrosulphuric acid, hid-ro-sul-fu'rik as'id. Hydrogen, sulphuretted.

Hydrotherapeutics, hi-dro-ther-a-pu'tiks (*hydro, therapeuo*, to cure). Hydrotherapia.

Hydrotherapi'a or **Hydrother'apy** (*hydro, therapeuo*, to cure). Mode of treating diseases systematically by the internal or external use of cold or warm water.

Hydrothermal, hi-dro-thur'mal (*hydro, therme*,

heat). Relating to warm water, as warm springs, hot springs, etc.

Hydrothion, hid-ro-the'on (*hydro, theion,* sulphur). Hydrogen, sulphuretted.

Hydrothionæmia, hid-ro-the-on-e'me-ah (*hydro, theion, haima,* blood). Presence of hydrogen sulphide in the blood, the symptoms being those of poisoning by that gas.

Hydrothionammonæmia, hid-ro-the-on-am-mon-e'-me-ah (*hydrothion, ammonia, haima,* blood). A condition similar to that just mentioned (hydrothionæmia), hydrosulphide of ammonium being the agent entering the blood, the symptoms being those of poisoning by that gas.

Hydrothionic acid, hid-ro-the-on'ik. Hydrosulphuric acid.

Hydrothionuria, hid-ro-the-on-u're-ah (*hydrothion, ouron,* urine). Presence of hydrogen sulphide in urine.

Hydrothorax, hi-dro-tho'raks (*hydro, thorax,* the chest). Dropsy of the chest, idiopathic hydrothorax, dropsy of the pleuræ. Generally exists only on one side, which, if the fluid effused be considerable, projects more than the other. Dyspnœa and fluctuation perceptible to the ear are characteristic symptoms. When the chest is examined with the stethoscope, respiration is perceptible only at the root of the lung. Sound is also dull on percussion. Effusion into the chest as a result of inflammation of a thoracic viscus, symptomatic hydrothorax, is common, but is usually fatal. Treatment for dropsies in general must be adopted; diuretics are especially useful, probably on account of the great activity of pulmonary absorption. Paracentesis is rarely serviceable. **H. chylo'sus,** chylothorax. **H. purulen'tus,** empyema.

Hydrotica, hid-rot'ik-ah. Hydragogues.

Hydrotis, hid-ro'tis (*hydro, ous,* ear). Dropsy of the ear. Properly, accumulation of mucous or mucopurulent matter in the middle ear.

Hydrot'omy (*hydro, tome,* incision). Dissection by forcible injection of water into the blood-vessels, thus causing separation of the tissues or structures.

Hydrotropism, hid-rot'o-pizm (*hydro, trepo,* to turn). Effect of water in causing motion in particles of protoplasm in its immediate vicinity.

Hydrotympanum, hid-ro-tim'pan-um. Dropsy or exudation of mucus into the tympanum.

Hydrous, hi'drus. Watery. **H. chlo'ral,** chloral hydrate.

Hydrovarium, hid-ro-var'e-um. Hydroarion.

Hydroxyl, hi-droks'il. An univalent radical containing one atom of oxygen and one of hydrogen.

Hydroxylamine, hid-roks-il'am-een. Ammonium in which an atom of hydrogen is substituted by a molecule of hydrogen; employed in solution in certain parasitic diseases of the skin. **H. hydrochlo'ride,** combination of hydroxylamine and chlorohydric acid; soluble, colorless crystals like ammonium chloride; used in lieu of chrysarobin, anthrarobin, and pyrogallic acid in cutaneous affections, as lupus, psoriasis, mycosis, etc. Poisonous, and must be used cautiously.

Hydruresis (hid-ru-ra'sis) or **Hydruria,** hid-ru're-ah (*hydro, ouron,* urine). Increase in watery constituents of urine; diabetes. See *Urine.*

Hydruret, hi'dru-ret. Compound of an element with hydrogen.

Hydrymenitis, hid-rim-en-e'tis (*hydro, humen,* membrane). Inflammation of serous membrane.

Hyepiglottic, hi-ep-e-glot'tik. Hyo-epiglottic.

Hyetometer, hi-et-om'et-ur (*huetos,* rain, *metron,* measure). Instrument to ascertain the exact amount of rainfall occurring in a certain time.

Hygea (hij-e'ah) or **Hygeia,** hij-e'ah. Health.

Hygeist, hi-je'ist. Hygienist.

Hygeology (hi-je-ol'o-je) or **Hygiol'ogy** (*hugeia,* health). Treatise on health or on hygiene.

Hygiasma, hij-e-az'mah. Medicament; convalescence.

Hygiastics, hij-e-as'tiks. Hygiene.

Hygiasticus, hij-e-as'tik-us. Salutary; curative.

Hygiea (hij-e-e'ah) or **Hygieia.** Hygiene; health; goddess of health; medicine.

Hygieinus, hij-e-i'nus. Salutary.

Hygieiocomium, hi-je-i-o-ko'me-um (*hygeia, komeo,* to care for). Sanitarium or sanatorium to aid restoration of the sick to health.

Hygieiology, hi-je-i-ol'o-je. Hygeology.

Hygiene, hy'jeen (*hygeia,* health). Hygienics. Part of medicine whose object is the preservation of health, embracing a knowledge of healthy man, socially and individually, as well as of all influences bearing on his constitution and organs. See *Regimen.*

Hygienic, hi-je-en'ik. Relating to hygiene or health.

Hygienics, hi-je-en'iks. Hygiene.

Hygienist (hi-je'en-ist) or **Hygeist,** hy-je'ist. One who understands or follows the principles of hygiene.

Hygiensis (hij-e-en'sis) or **Hygiasis,** hij-e'as-is. Health.

Hygierus, hij-e-a'rus. Salutary.

Hygiesis, hij-e-a'sis. Hygiene.

Hygiesmus, hij-e-es'mus. Hygiene.

Hygiocomium, hij-e-ok-o'me-um. Hygeiocomium.

Hygiology, hi-je-ol'o-je. Hygeology.

Hygiostatics, hi-je-o-stat'iks (*hygieia, histemi,* to stand). Hygiene.

Hygra, he'grah (*hugros,* moist). Soft or liquid plasters.

Hygrasia, hig-raz'e-ah. Humor.

Hygrechema, hig-rek-a'mah (*hygro, echema,* sound). Sound of fluid heard by auscultation or otherwise.

Hygredon, hig-ra'don. Humor.

Hygremplastra, hig-rem-plas'trah. Soft or liquid plasters.

Hygrine, hig'reen. Volatile oily liquid alkaloid existing in Erythroxylon coca.

Hygro (*hugros,* humid). In composition, humid.

Hygroblepharici, hig-ro-blef-ar'is-e (**duc'tus**) (*hygro, blepharon,* eyelid). Excretory ducts of the lacrymal gland.

Hygroblepharismus, hig-ro-blef-ar-iz'mus (same etymon). Epiphora.

Hygroblepharitis, hig-ro-blef-ar-e'tis. Inflammation of eyelids with excessive flow of tears.

Hygrobleph'aron or **Hygroblepharum,** hig-ro-blef'-ar-um. Watery eyelids; hydroblepharon.

Hygrobronchiorrhonchus, hig-ro-bron-ke-or-rhon'-kus. Mucous râle.

Hygrocataracta, hig-ro-kat-ar-ak'tah. Fluid cataract.

Hygrocele, hig-ro-se'le (Eng. hi'gro-seel) (*hygro, kele,* tumor). Hydrocirsocele; hydrocele.

Hygrocirsocele, hi-gro-sur-so-se'le (Eng. hi-gro-cir'-so-seel) (*hygro, kirsos,* varix, *kele,* tumor). Hydrocirsocele.

Hygrocollyria, hig-ro-kol-lir'e-ah. Liquid application to the eye.

Hygrocystis, hig-ro-sis'tis (*hygro, kustis,* bladder). Hydrocyst; hydatid.

Hygrocystorrhonchus, hig-ro-sis-tor-rhon'kus (*hygro, kustis,* bladder, *rhonchus*). Moist vesicular rhonchus.

Hygroderma, hig-ro-der'mah (*hygro, derma,* skin). Cutaneous moisture.

Hygrograph, hi'gro-graf (*hygro, grapho,* to write). Automatic instrument for determining the amount of moisture in the air.

Hygrohæmatocele, hig-ro-he-mat-o-se'le (Eng. hig-ro-he-mat'o-seel) (*hygro, haima,* blood, *kele,* tumor). Hydrocele of tunica vaginalis complicated with hæmatocele.

Hygrology, hi-grol'o-je (*hygro, logos,* discourse). Anatomy or description of the fluids of the body.

Hygroma, hig-ro'mah (*hugros,* moist). Serous cyst; simple cyst containing fluid like that of serous membranes. Effusion of serum in a bursa mucosa. Intestinal worm, genus Bothriocephalidæ. **H., cys'tic,** congenital cystic tumor containing serous fluid in a fibrous sac. **H. du'ræ ma'tris,** meningocele. **H. ganglio'des,** serous cyst situate between external layers of sheaths of tendons. **H. of the neck,** congenital hydrocele of neck. **H. of the or'bit,** dropsy

of bursæ of tendons of several muscles of the eye. **H. patel'læ** or **præpatella're,** housemaid's knee; painful enlarged bursa in front of the patella. **H., sac'ral,** cystic tumor of sacrococcygeal bursa.

Hygrometer, hi-grom'et-ur (*hygro, metron,* measure). Instrument for measuring the amount of moisture in the air.

Hygrometric, hi-gro-met'rik. Relating or appertaining to hygrometry. H. property of organized tissue is that by which it gives off to the air and receives from it moisture under varying conditions of that medium.

Hygrometricity, hi-gro-me-tris'it-e. Hygrometric property.

Hygrometry, hi-grom'et-re (*hygro, metron,* measure). Part of physics concerning the measurement of the humidity of the atmosphere. Diseases are frequently caused by varying moisture of the atmosphere or by changes in its weight or temperature.

Hygron, hig'ron (*hugros,* liquid). Liquor; moisture.

Hygropædophlysis, hig-ro-ped-of'lis-is (*hygro, pais,* child, *phlusis,* eruption). Moist eczema of children.

Hygrophila spinosa, hig-rof'il-ah spin-o'sah. Asteracantha longifolia of E. Indies and Ceylon; seeds are diuretic; root and leaves tonic and diuretic.

Hygrophobia, hig-ro-fo'be-ah (*hygro, phobos,* dread). Hydrophobia.

Hygrophthalmia, hig-rof-thal'me-ah (*hygro, ophthalmia*). Ophthalmia with excessive lacrymation.

Hygrophthalmici, hig-rof-thal'mis-e. Hygroblepharici.

Hygropissa (hig-ro-pis'sah) or **Hygropis'son** (*hygro, pissos,* pitch). Liquid pitch. See *Pinus sylvestris.*

Hygrorrhonchus, hig-ror-rhon'kus. Moist râle.

Hygros (moist). Liquid, as the alvine evacuations.

Hygrosarca, hig-ro-sar'kah (*hygro, sarx,* flesh). Œdema. Flabbiness of muscles.

Hygroscope, hi'gro-skope (*hygro, skopeo,* to see). Hygrometer.

Hygroscopic, hi-gro-skop'ik. Having the property of absorbing moisture from the air.

Hygroscopism (hi-gros'kop-izm) or **Hygroscopicity,** hi-gro-skop-is'it-e (*hygro, skopeo,* to see). Capacity for absorption of moisture.

Hygroscopy, hi-gros'ko-pe (*hygro, skopeo,* to examine). Hygrometry.

Hygrotes (hig'ro-tees) or **Hy'grum** (*hugros,* liquid). Humor; liquor.

Hyle, he'le (*hule,* matter). Materia medica. **H. iat'rice,** e-at'ris-e, materia medica.

Hylisis (hil'is-is) or **Hylismus,** hil-iz'mus (*hulizo,* to strain). Filtration; percolation.

Hylisterion (hil-is-ter'e-on), **Hylis'trion,** or **Hylistrium,** hil-is'tre-um. Filter; strainer.

Hylophagous, hi-lof'ag-us (*hule,* wood, *phago,* to eat). One that feeds upon young shoots of trees, roots, etc.

Hylotrichi, hil-ot'rik-e (*hule,* wood, *thrix,* hair). Those who have woolly hair.

Hylozoism, hi-lo-zo'izm (*hyle, zoe,* life). Materialism; doctrine that life is the result of matter or organization.

Hymen, hi'men (*humen,* marriage, membrane). Any membrane. Virginal membrane; semilunar, parabolic, or circular fold of mucous membrane situate at the outer orifice of the vagina in virgins, especially during youth and prior to menstruation. It is ordinarily ruptured by the first venereal act, and is effaced by accouchement, irregular flaps remaining, to which the name carunculæ myrtiformes has been given from their resemblance to myrtle leaves. Circumstances of innocent character may occasion rupture or destruction of the hymen, it being often, indeed, found absent in children soon after birth; while it may remain entire after copulation. Hence its presence does not absolutely prove virginity, nor its absence incontinence, although its presence would be *primâ facie* evidence of continence. **H. annula'ris,** one having shape of a ring. **H., bifen'estrate** or **biperfora'tus,** hymen with two apertures. **H., bri'dled,** H. divided by muscular bridge in median line. **H., cotumera'tus,** H., bridled. **H., crib'riform,** H. perforated with numerous apertures. **H. diaphrat'ton,** mediastinum. **H. fimbria'tus,** fringed hymen. **H., horse'shoe,** H. divided into parts resembling a horseshoe. **H. imperfora'tus,** imperforate h.; atresia of hymen. **H. semiluna'ris,** hymen of semilunar shape.

Hymenæ'a (after the god Hymen). See *Copal.* **H. cour'baril,** see *Anime.*

Hyme'nal. Relating to the hymen. **H. tu'bercles,** carunculæ myrtiformes.

Hymen'ica amenorrhœ'a. Amenorrhœa occasioned by closure of the hymen.

Hymen'icus. Relating to the hymen. Membranous.

Hymeni'tis Inflammation of internal membrane; inflammation of the hymen.

Hymen'ium (dim. of **Hymen**). Fine, delicate membrane.

Hymenocallis, he-men-o-kal'lis. Several species, indigenous in W. Indies and Southern United States, are used medicinally: **H. amæ'na, H. Caribbæ'a, H. ova'ta,** and **H. pa'tens,** externally as emollients; **H. Mexica'na** and **H. rota'ta,** bulbs have an action similar to that of squills.

Hymenochondroid, hi-men-o-kon'droid (*hymen, chondros,* cartilage). Composed of cartilage and membrane.

Hymeno'des. Membranous; resembling membrane.

Hymenodic'tyon excel'sum (*hymen, diktuon,* net). Cinchona excelsa.

Hymenodictyonine, hi-men-o-dik'te-on-een. $C_{24}H_{40}N_2$. Alkaloid from bark of Hymenodictyon excelsum or Cinchona excelsa; similar to quinoidine and berberine.

Hymenoganglii'tis. Cholera.

Hymenog'eny (*hymen, gennao,* to engender). Production of membranes by the effect of simple contact of two liquids, as albumen and fat, when the former gives a coating to the globules of the latter. See *Haptogen.*

Hymenog'raphy (*hymen, grapho,* to describe). Treatise on, or description of, the membranes.

Hymenol'ogy (*hymen, logos,* description). Treatise on, or description of, the membranes.

Hymenomalacia, he-men-o-mal-ah'se-ah (*hymen,* membrane, *malakia,* softening). Softening of membranes.

Hymenomycetes, he-men-o-mis-a'tes (*hymen, mukes,* fungus). Fungi having hymenium or umbrella, including all edible species and many poisonous fungi.

Hymenophthal'mia. Ophthalmia membranarum.

Hymenopterygium, he-men-o-ter-ij'e-um. Membranous pterygium.

Hymenor'rhaphy (*hymen, rhaphe,* suture). Elytrorrhaphy performed in the natural situation of the hymen.

Hymenotome, hi-men'o-tome (*hymen, tome,* incision). Instrument for excising membranes or the hymen.

Hymenot'omy (*hymen, tome,* incision). Dissection of the membranes. Incision of the hymen for imperforation of the vagina, to give exit to the blood retained in the uterine cavity.

Hym'nion or **Hym'nium.** Amnion.

Hy'o. In composition, hyoid bone.

Hyo-angularis, he-o-an-gu-lar'is. Rare form of stylohyoid muscle arising from angle of the lower jaw.

Hyobasioglos'sus. Basioglossus.

Hyocærulein, he-o-se-ru'le-in (*hus,* hog, *cæruleus,* blue). Blue pigment from biliary calculi of hog.

Hyodeoglos'sus. Hyoglossus.

Hyoceratopharyngeus, he-o-ser-at-o-far-in-je'us. Cerato-pharyngeus muscle. Hyopharyngeus.

Hyocervica'lis. Muscle passing from hyoid bone to cervical fascia. Hyofascialis muscle.

Hyocholic (hi-o-kol'ik) **acid** (*hus,* hog, *chole,* bile). Acid of bile of hog, $C_{25}H_{40}O_4$.

Hyochondroglos'sus. Hyoglossus.

Hyodeothyreo'des. Thyreohyoïdeus.

Hyodepiglottic, hy-od-ep-e-glot'tik. Hyo-epiglottic.

Hyodepiglot'ticus. Hyo-epiglotticus.

Hyo'des. Hyoid.

Hyo-epiglot'tic. Belonging to the os hyoides and epiglottis. Hyo-epiglottic ligament is a bundle of condensed areolar tissue passing from the posterior part of the body of the hyoid bone to the base of the epiglottic fibro-cartilage.

Hyo-epiglotticus (he-o-ep-e-glot'tik-us) **muscle.** A muscle occasionally passing from the back part of the hyoid bone to the epiglottis.

Hyofascialis, he-o-fas-se-al'is. Hyocervicalis.

Hyoglossal, hi-o-glos'sal. Relating to hyoid bone and tongue. **H. mem'brane,** fibrous lamina connecting the under surface of the base of the tongue with the body of the hyoid bone. **H. mus'cle,** hyoglossus.

Hyoglos'sian nerve. Hypoglossal nerve.

Hyoglos'sus. Large, thin, quadrilateral muscle situate at the anterior and superior part of the neck; formerly described as divided into three portions: *Ceratoglossus,* attached to the great cornu of the os hyoides; *Basioglossus,* arising from the superior part of the body of the same bone; *Chondroglossus,* arising from the lesser cornu and the cartilage situate between the body and the greater cornu. The fibres of these three bundles are inserted into the lateral and inferior parts of the tongue; this muscle depresses the base of the tongue or raises the os hyoides when the tongue is fixed.

Hyoglycocholic (hi-o-glik-o-kol'ik) **acid** (*hus,* hog, *glukus,* sweet, *chole,* bile). Resinous acid ($C_{27}H_{43}NO_5$) derived from bile of hog.

Hyoid, hi'oid (Greek Υ, *eidos,* shape). Shaped like Greek letter Υ; relating to hyoid bone. **H. arch,** second branchial arch or column of tissue separating branchial clefts. **H. ar'tery,** branch also from superior thyroid. **H. bone,** very movable osseous arch, of a parabolic shape, convex before, and suspended horizontally in the substance of the soft parts of the neck, between the base of the tongue and the larynx. Separated entirely from the rest of the skeleton, it is composed of five distinct portions, susceptible of motion on each other: the central portion or the *body,* affording attachment to several muscles; two lateral *branches* or *greater cornua;* and two smaller, situate above the other, the *lesser cornua* or *styloid cornua,* corpora or corpuscula triticea. **H. pri'mus,** sternohyoïdeus.

Hyoideal, hi-oid'e-al. Hyoid.

Hyoidean, hi-oid'e-an. Hyoid. **H. appara'tus,** collection of structures of fœtal skeleton in third visceral arch. **H. arch,** hyoid arch.

Hyoides, he-oid'ees. Hyoid.

Hyoïdeus, he-o-e'de-us. Hyoid bone; muscle connected with that bone.

Hyoïdis quartus musculus, he-o-e'dis kwar'tus mus'ku-lus. Omohyoïdeus.

Hyomandibular, hi-o-man-dib'u-lar. Relating to the hyoid bone and inferior maxilla. **H. arch,** hyoid arch.

Hyomaxillary (hi-o-maks'il-la-re) **mus'cle.** Hyoangularis.

Hyomental, hi-o-men'tal. Relating to hyoid bone and chin.

Hyopharyngeus, he-o-far-in-ja'us. Middle constrictor muscle of pharynx or its first portion.

Hyosci'amus. Hyoscyamus.

Hyoscine, hi'os-een. Semisolid, poisonous alkaloid from Hyoscyamus niger; soporific, nervous sedative, and mydriatic; isomeric with hyoscyamine and atropine; $C_{17}H_{23}NO_3$. The dose of hydrobromate or hydrobromide of hyoscine is gr. $\frac{1}{100}$ to $\frac{1}{60}$. The hydrochloride of hyoscine is used with similar therapeutic effect.

Hyoscinic (hi-os-sin'ik) **ac'id.** Product of decomposition of hyoscyamine by caustic baryta.

Hyoscipicrin, he-os-ip-ik'rin. Hyoscypicrin.

Hyoscyamia (he-os-se-am'e-ah) or **Hyoscy'amin.** See *Hyoscyamus.*

Hyoscyamine sulphate, hi-os-si'am-een sul'fate. Hyoscyaminæ sulphas (Ph. U. S). $(C_{17}H_{23}NO_3)_2H_2SO_4$. Yellowish powder, amorphous or crystalline; soluble in water and alcohol; used by ophthalmologists as a mydriatic, and also employed as a soporific.

Hyoscyamus, hi-os-si'am-us (*hus,* swine, *kuamos,* bean eaten by swine). Henbane, poison tobacco, stinking nightshade, ord. Solanaceæ. Leaves, *Hyoscyamus* (Ph. U. S.), and seed, *Hyoscyami semen,* are used in medicine; virtues are yielded to alcohol. Hyoscyamus is narcotic, anodyne, hypnotic, antispasmodic, mydriatic, and slightly stimulant. It is an active narcotic poison; therapeutic action similar to belladonna and stramonium; used as a substitute for opium where the latter disagrees; applied externally as a cataplasm in cancer and glandular swellings. Dose, gr. iij to x of the powder. Alkaloids have been obtained from it, *Hyoscyamine* or *Hyoscyamia* and *Hyoscine* ($C_{17}H_{23}NO_3$). The former, in minute fractional doses, exercises a favorable action in the spasmodic and convulsive neuroses; resembles atropine in therapeutic action. See *Hyoscine.* **H. agres'tis,** hyoscyamus. **H. al'bus,** *White henbane* of Southern Europe, possesses similar virtues to H. niger; sometimes employed instead of H. niger. **H. In'dicus,** tobacco. **H. leaves,** see *Hyoscyamus.* **H. lu'teus,** Nicotiana rustica. **H. ni'ger,** hyoscyamus. **H. Peruvia'nus,** Nicotiana tabacum. **H. physaloï'des,** kite-flower, purple-flowered henbane of N. Asia; narcotic; used in syphilis, dysentery, etc. **H. reticula'tus,** Egyptian henbane of S. Europe; properties similar to those of H. niger. **H. scopo'lia,** herb and root of this plant, growing in Central Europe, are used in the same cases as belladonna.

Hyoscypicrin, he-os-e-pik'rin. $C_{27}H_{52}O_{14}$. Bitter glucoside from seed of Hyoscyamus niger.

Hyospondylotomy, hi-o-spon-dil-ot'o-me (*hyo, spondulos,* cervical vertebra, *tome,* incision). Incision or puncture of the laryngeal pouch (recess passing upward from the front part of the ventricle of the larynx) in the horse.

Hyosternal, hi-o-stur'nal. Relating to the hyoid bone and sternum.

Hyotaurocholic (hi-o-tau-ro-kol'ik) **acid** (*hus,* hog, *tauros,* bull, *chole,* bile). Acid found in moderate quantity in bile of pig, $C_{27}H_{45}NSO_6$.

Hyothy'reoid or **Hyothyroid,** hi-o-thi'roid. Thyreohyoid.

Hyothyreoïdeus, he-o-thir-e-o-e'de-us. Thyreohyoïdeus.

Hyotrachealis, he-o-trak-e-al'is. Part of thyrohyoid muscle, occasionally passing from hyoid bone to trachea.

Hyovertebrotomy, hi-o-vur-te-brot'o-me (*hyo, vertebra, tome,* incision). Hyospondylotomy.

Hyp. (abbrev. of **Hypochondriac**). Hypochondriac; hence, vulgarly, to be *hypped.*

Hypactic, hi-pak'tik (*hypo, ago,* to drive). Cathartic.

Hypacusia (hip-a-ku'se-ah) or **Hypacusis,** hip-ak-u'sis) *hypo, akousis,* hearing). Defective hearing.

Hypæmia, hip-e'me-ah (*hypo, haima,* blood). Deficiency of blood; extravasation of blood. **H., intertrop'ical,** aneurism due to presence of anchylostomum duodenale. **H. oc'uli,** hæmophthalmia.

Hypæsthesia, hip-es-the'se-ah (*hypo, aisthesis,* sensation). Defective or diminished sensation; partial anæsthesia.

Hypagoge, hip-ag-o'ge (*hypo, ago,* to drive). Dejection; purgation.

Hypagogue, hip'a-gog. Laxative.

Hypalbuminosis, hip-al-bu-min-o'sis (*hypo, albumin*). Deficiency in amount of albumin in the blood.

Hypaleimma, hip-al-li'mah (*hypo, aleipho,* to anoint). Ointment or liniment.

Hypaleipsis, hip-al-eip'sis (*hypo, aleipho,* to anoint). Inunction.

Hypaleip'ton. Hypaleimma.

Hypaleiptris (hip-al-eip'tris), **Hypaleiptron** (hip-al-eip'tron), or **Hypaleip'trum.** Spatula for spreading ointment.

Hypaleiptum, hip-al-eip'tum. Hypaleimma.

Hypalgesia, hip-al-ge'ze-ah (*hypo, algos,* pain). Deadened or diminished sensibility of a part; partial loss of sensibility to pain.

Hypalgia, hip-al'je-ah (*hypo, algos,* pain). Slight pain.

Hypalimma, hip-al-im'mah. Hypaleimma.

Hypaliptrum, hip-al-ip'trum. Hypaleiptron.

Hypamaurosis, hip-am-aur-o'sis (*hypo, amaurosis*). Imperfect amaurosis.

Hypamblyopia, hip-am-ble-o'pe-ah. Slight amblyopia.

Hypanco'nion or **Hypanconium,** hip-an-ko'ne-um (*hypo, ankon,* elbow). Pillow for supporting the elbow in surgical cases.

Hypaphonia, hip-af-o'ne-ah (*hypo, aphonia,* loss of speech). Partial dumbness.

Hypapophysis, hip-ap-of'is-is (*hypo, apophysis,* process of bone). Bony projection from inferior part of a vertebra in some animals.

Hypapoplexia, hip-ap-o-pleks'e-ah. Incomplete attack of apoplexy.

Hypasthenia, hip-as-then-e'ah (*hypo, asthenia,* weakness). Slight debility.

Hypatmismus (hip-at-miz'mus) or **Hypatmus,** hyp-at'mus (*hypo, atmos,* vapor). Fumigation.

Hypatonia, hip-a-ton'e-ah (*hypo, a, tonus,* tone). Slight want of tone.

Hypauche'nion or **Hypauchenium,** hip-au-ken'e-um (*hypo, auchen,* neck). Pillow or cushion for the neck.

Hypaxial, hip-aks'e-al. Beneath axis of the body or vertebræ. **H. mus'cles,** muscles below vertebral axis of early fœtal life.

Hypecacuan'ha. Ipecacuanha.

Hypecchoresis, hip-ek-ko-ra'sis (*hypo, ec, choreo,* to make vacant). Moderate alvine dejections.

Hypectasia (hip-ek-taz'e-ah) or **Hypec'tasis.** Slight dilatation or extension.

Hypelatus, hip-el-at'us (*hypo, elauno,* to drive). Cathartic; laxative.

Hypemphraxis, hip-em-fraks'is (*hypo, emphraxis,* obstruction). Slight obstruction; constipation.

Hypenantioma (hip-en-an-te-o'mah) or **Hypenantiosis,** hip-en-an-ti-o'sis (*hypo, enantios,* opposite). Allopathy.

Hypencephalis, hip-en-sef'al-is. Cerebellum.

Hypene, hip-e'ne. Beard under the chin; upper lip. See *Mystax.*

Hypenetes, hip-en-e'tees. Adolescens.

Hyper (*huper,* above). In excess.

Hyperacanthosis, hip-er-ak-an-tho'sis (*hyper, acantha,* thorn). Excessive development of inner or prickle-cell layer of epidermis, as in lichen planus.

Hyperacoe, hip-er-ak'o-e. Hyperacusis.

Hyperacusis, hip-er-ak-u'sis (*hyper, akoe,* audition). Excessive sensibility of the organ of hearing.

Hyperadenoma, hip-er-ad-en-o'mah (*hyper, aden,* gland). Hypertrophy of a gland or glands.

Hyperadenosis (hip-er-ad-en-o'sis) or **Hyperadeno'ma** (*hyper, aden,* gland). Hypertrophy of a gland.

Hyperæmatosis, hip-er-e-mat-o'sis (*hyper, haima,* blood). Plethora.

Hyperæmia, hi-per-e'me-ah (*hyper, haima,* blood). Preternatural accumulation of blood in the capillary vessels, more especially local plethora—*plethora partialis;* congestion. Hyperæmia may be active or sthenic; asthenic or passive; cadaveric or that which forms immediately before or after death; hypostatic, occurring in depending parts; and mechanical, produced by mechanical impediment. **H. abdom'inis,** cœliæmia. **H. acti'va,** inflammation. **H., asthen'ic,** see *Hyperæmia.* **H. of the brain,** accumulation of blood in the vessels of the brain; congestion of the brain. **H., cadav'eric,** livid discoloration occurring in cadavers. **H. cap'itis** or **cer'ebri,** H. of the brain. **H., collat'eral** or **compen'satory,** H., either arterial or venous, in one part of the body, compensating for anæmia in another part. **H., encephal'ic,** H. of the brain. **H. follicula'ris,** H. of glands; congestion of follicles, as of the throat. **H. hepat'ica,** sanguineous congestion of the liver. **H., hypostat'ic,** see *Hyperæmia.* **H. of the lungs,** congestion or accumulation of blood in the pulmonary vessels. **H., mechan'ical,** see *Hyperæmia.* **H., neuroparalyt'ic,** H. of paralysis, from paralysis or injury of nerve. **H. pec'toris,** H. of the lungs. **H. pulmo'num,** H. of the lungs.

Hyperæmic (hi-per-e'mik) or **Hyperæ'mial.** Congested; bloodshot; affected with hyperæmia; having excess of blood.

Hyperæmosis, hip-er-e-mo'sis. Hyperæmia; increased blood-pressure.

Hyperaëria, hip-er-a-e're-ah (*hyper, aër*). Condition of lung in which many of the pulmonary cells are torn across and large cavities formed in the parenchyma, which are filled with air. See *Emphysema.*

Hyperæsthe'ses. Diseases characterized by hyperæsthesia.

Hyperæsthesia (hi-per-ees-the'ze-ah) or **Hyperæsthe'sis** (*hyper, aisthesis,* feeling). Excessive sensibility or impressibility. **H., acous'tic** or **aud'itory,** painful or annoying sensation in the ear from the sounds heard. **H. acus'tica,** H., acoustic. **H. of car'diac plex'us,** angina pectoris. **H., cuta'neous,** H. of the skin. **H., epilep'tic,** epileptic aura, with excessive sensibility. **H., gus'tatory,** excessive acuteness of taste. **H. lin'guæ,** hypergeustia. **H., neur'al,** neuralgia. **H., olfac'tory,** hyperosphresia, hyperosmia. **H. plex'us cardi'aci,** angina pectoris. **H., psy'chical,** hypochondriasis.

Hyperæsthet'ic. Agent that augments general sensibility, as strychnia, brucia, etc. **H. spots,** circumscribed patches of skin, intensely painful to the touch, with occasionally recurring attacks of burning pain.

Hyperakanthosis, hip-er-ak-an-tho'sis. Hyperacanthosis.

Hyperakusis, hip-er-a-ku'sis. Hyperacusis.

Hyperalbuminosis, hip-er-al-bu-min-o'sis. Increase or excess of amount of albumin.

Hyperalgesia (hip-er-al-ge'se-ah) or **Hyperalgia,** hip-er-al'je-ah (*hyper, algos,* pain). Excessive pain; increased sensitiveness to pain. **H., cuta'neous,** excessive sensibility of common sensations of the skin.

Hyperanarrhophesis, hip-er-an-ar-ro-fa'sis (*hyper, anarrhophesis,* absorption). Excessive absorption.

Hyperanarth'ric (*hyper, an,* priv., *arthron,* joint). Having limbs and joints excessively imperfect in development.

Hyperanthera moringa, hip-er-an-the'rah mo-rin'gah (*hyper,* in excess, *anthera,* anther). Guilandina moringa.

Hyperanthraxis, hip-er-an-thraks'is (*hyper, anthrax,* coal). See *Cholera.*

Hyperaphia, hip-er-af'e-ah (*hyper, aphe,* touch). Excessive acuteness of touch or of cutaneous sensibility.

Hyperaphrodisia, hip-er-af-ro-diz'e-ah (*Aphrodite,* Venus). Excessive venereal desire.

Hyperarthric, hip-er-arth'rik (*hyper, arthron,* joint). Having supernumerary joints or limbs.

Hyperarthritis, hip-er-ar-thre'tis. Intense arthritis.

Hyperarthrosis, hip-er-ar-thro'sis. Condition in which superfluous joints exist.

Hyperasthenia, hip-er-as-then-e'ah (*hyper, astheneia,* weakness). Excessive debility.

Hyperauxesis, hip-er-auks-a'sis (*hyper, auxesis,* augmentation). Excessive increase or enlargement of a part, as of the iris, H. iridis.

Hyperbolic, hi-per-bol'ik (*hyper, ballo,* to throw). Excessive or exaggerated, as **H. at'titudes,** term by which Galen designated certain extraordinary attitudes in which the limbs and vertebral column are in a state of complete extension or flexion. **H. lens,** glass having shape of hyperbola for treatment of conical cornea.

Hyperborean, hi-per-bo're-an (*hyper, boreas,* north wind). Race of men at the extreme north of the two continents, in the vicinity of the polar circle.

Hyperbrachycephalic, hi-per-brak-e-sef-al'ik (*hyper, brachus,* short, *kephale,* head). Having an excessively short head, or having a cephalic index (relation of length to breadth of skull) of from 85° to 89°.

Hyperbronchitis, hip-er-bron-ke'tis. Suffocative catarrh.

Hyperbulia, hip-er-bu'le-ah (*hyper, boule,* will). Ungovernable will or volition.

Hypercardia, hip-er-kar'de-ah (*hyper, kardia,* heart). Hypertrophy of the heart.

Hypercardiæ'mia (*hyper, kardia,* heart, *haima,* blood). Cardiac plethora.

Hypercardiodynamia, hip-er-kar-de-o-din-am'e-ah (*hyper, kardia,* heart, *dunamis,* power). Increased force of contractions of the heart.

Hypercardiohæ'mia. Cardiac plethora.

Hypercardiotrophy, hip-er-kar-de-ot'ro-fe (*hyper, kardia,* heart, *trophe,* nourishment). Hypertrophy of the heart.

Hypercarposis, hip-er-kar-po'sis (*hyper, karposis,* profit). Increase in number of blood-corpuscles, the fibrin being decreased.

Hypercatapino'sis (*hyper, katapino,* to sip up). Excessive activity of absorption or of deglutition.

Hypercatharsia (hip-er-kath-ar'se-ah) or **Hypercatharsis,** hip-er-kath-ar'sis (*hyper, katharsis,* purgation). Superpurgation; menorrhagia.

Hypercathartic, hi-per-kath-art'ik. Excessively purgative.

Hypercedemonia, hip-er-se-de-mon'e-ah (*hyper, kedemonia,* anxiety). Excessive care; intense anxiety.

Hypercenosis, hip-er-sen-o'sis (*hyper, kenosis,* evacuation). Excessive evacuation, as of blood, bile, etc.

Hypercerasis (hip-er-ser'as-is) or **Hyperceratosis,** hip-er-ser-at-o'sis (*hyper, keras,* cornea). Staphyloma of the cornea; thickening of the cornea.

Hypercholia, hip-er-kol'e-ah (*hyper, chole,* bile). Excessive secretion of bile.

Hyperchondroma, hip-er-kon-dro'mah (*hyper, chondros,* cartilage). Hypertrophic development of cartilage; cartilaginous tumor.

Hyperchondrosis, hip-er-kon-dro'sis. Development of hyperchondroma.

Hyperchroma, hip-er-kro'mah (*hyper, chroma,* color). Excessive secretion of cutaneous pigment; red fleshy excrescence at the inner angle of the eye, near the caruncula lacrymalis.

Hyperchromatopsy, hi-per-kro'mat-op-se (*hyper, chroma,* color, *opsis,* vision). Defect of vision, owing to which ideas of color are attached to objects which convey no such colored impressions to a healthy eye; antithesis to *Achromatopsy.*

Hyperchromatosis (hip-er-kro-mat-o'sis) or **Hyperchromia** (*hyper, chroma,* color). Increased pigmentary formation in the skin. Diseases of the skin so characterized are called *Hyperchromatoses.*

Hypercinesia (hip-er-sin-a'ze-ah) or **Hypercine'sis** (*hyper, kinesis,* motion). Excessive motion; spasm; morbid mobility; spasmodic neurosis, as hysteria and hypochondria. **H. cor'dis,** palpitation of the heart. **H. of fa'cial nerve,** local and habitual convulsive motion of certain muscles, especially of some of those of the face; convulsive tic. **H. gas'trica,** hypochondriasis. **H. hyster'ica,** hysterical convulsions. **H. nervo'sa,** see *Irritable.* **H. uteri'na,** hysteria.

Hypercoryphosis, hip-er-kor-e-fo'sis (*hyper, koruphe,* the vertex, the extreme point of anything). Protuberance. Prominent point of the lobes of the liver or lung.

Hypercousia, hip-er-ku'ze-ah. Excessive sensibility of the organ of hearing.

Hypercrinia, hip-er-krin'e-ah (*hyper, krino,* to separate). Morbid increase in the quantity of the secretions.

Hypercrisis, hip-er'kris-is. Excessive crisis or evacuation; flux; violent critical effort or too copious critical evacuations.

Hypercusia, hip-er-ku'ze-ah. Excessive sensibility of the organ of hearing.

Hypercyema, hip-er-se-a'mah (*hyper, kuo,* to conceive). Superfœtation.

Hypercyesis, hip-er-se-a'sis. Rapidly successive conceptions.

Hypercyrto'sis (*hyper, kurtosis,* curvature) Excessive curvature.

Hyperdacryosis, hip-er-dak-re-o'sis (*hyper, dakruon,* tear). Excessive secretion of tears.

Hyperdactylia, hip-er-dak-til'e-ah (*hyper, daktulos,* finger). Excessive development of fingers or toes, as supernumerary digits.

Hyperdermatoma, hip-er-dur-mat-o'mah (*hyper, derma,* skin). Morbid growth formed of hypertrophied skin.

Hyperdermatosis, hip-er-dur-mat-o'sis (*hyper, derma,* skin). Hypertrophy of the skin.

Hyperdermoma, hip-er-dur-mo'mah. Hyperdermatoma.

Hyperdesmosis, hip-er-des-mo'sis (*hyper, desmos,* bond). Excessive development or formation of connective tissue, as of the skin.

Hyperdiacrisis, hip-er-de-ak'ris-is (*hyper, diakrisis,* separation). Excessive crisis.

Hyperdicrotic (hi-per-dik-rot'ik) or **Hyperdicrotus,** hip-er-dik'ro-tus (*hyper, di,* double, *kroteo,* to strike). See *Hypodicrotous.*

Hyperdicrotism, hip-er-dik'rot-izm. Condition attendant upon or associated with a hyperdicrotous pulse.

Hyperdiuresis, hip-er-de-u-ra'sis. Diabetes polyuria.

Hyperdynamia, hip-er-din-am'e-ah (*hyper, dunamis,* strength). Hypersthenia; excessive muscular power. **H. u'teri,** excessive uterine exertion or pain in labor.

Hyperdynamic, hi-per-di-nam'ik. Appertaining to or having the characters of hyperdynamia.

Hypereccrisis, hip-er-ek'kris-is (*hyper, ekkrisis,* secretion). Excessive secretion.

Hyperechema (hip-er-ek-a'mah) or **Hypereche'sis** (*hyper, echo,* to sound). Epithet for intensified sounds heard on auscultation and percussion.

Hyperechetic, hip-er-e-ket'ik. Producing or causing loud sound.

Hyperemesis (hip-er-em'es-is) or **Hyperemes'ia** (*hyper, emeo,* to vomit). Excessive vomiting.

Hypere'mia. Hyperæmia.

Hyperencephalia, hip-er-en-sef-al'e-ah. Encephalocele or development of such a condition; hypertrophy of the brain.

Hyperencephalus, hip-er-en-sef'al-us. Monster whose excessive brain is situated in the skull, or whose brain is chiefly outside the skull, the roof of which is deficient, possibly with hydrocephalus.

Hyperenergia, hip-er-en-er-je'ah (*hyper, energia,* activity). Excessive activity, as of the nervous system.

Hyperenteri'tis, (*hyper, enteron,* intestine). Acute inflammation of the bowel.

Hyperenteroma, hip-er-en-ter-o'mah (same etymon). Tumor or abnormal growth of the intestines.

Hyperenterosis, hip-er-en-ter-o'sis (same etymon). Development of abnormal growth of the intestines; hypertrophy of the intestines.

Hyperephidrosis, hip-er-ef-id-ro'sis (*hyper, hidros,* sweat). Excessive sweating.

Hyperepidosis, hip-er-ep-id'o-sis (*hyper, epidosis,* increase). Excessive increase or enlargement of a part.

Hyperepithymia, hip-er-ep-e-thim'e-ah (*hyper, epithumia,* desire). Excessive or abnormal desire.

Hypererethisia (hip-er-er-e-thiz'e-ah) or **Hypererethismus,** hip-er-er-e-thiz'mus (*hyper, erethizo,* to excite). Excessive irritability.

Hypererythræmosis, hip-er-er-ith-re-mo'sis (*hyper, eruthros,* red, *haima,* blood). Excessive quantity of red or arterial blood.

Hyperesophoria, hip-er-e-so-fo're-ah (*hyper, eso,* inward, *phoros,* bearing). Direction of visual line inward and upward.

Hyperexophoria, hip-er-eks-o-fo're-ah (*hyper, exo,* outward, *phoros,* bearing). Direction of visual line outward and upward.

Hyperfecundation, hi-per-fek-un-da'shun (*hyper, fecundus,* fertile). Excessive procreative ability. Superfecundation.

Hyperfecundity, hi-per-fe-kund'it-e. Giving birth to children at frequent intervals.

Hyperfibrination, hi-per-fib-rin-a'shun. See *Hiperinosis.*

Hyperflexion, hi-per-flek'shun. Excessive flexion.

Hypergastritis, hip-er-gas-tre'tis. Intensely acute or active gastritis.

Hypergastropathia, hip-er-gas-tro-path-e'ah (*hyper, gaster*, stomach, *pathos*, disease). Intense disease of the stomach.

Hypergenesis, hip-er-jen'es-is (*hyper, genesis*, generation). Excess of formative power, which may give occasion to monstrosities by excess of parts. Excessive production or development. See *Monster*.

Hypergeustia (hip-er-goos'te-ah), **Hypergeus'ia,** or **Hypergeus'is** (*hyper, geusis*, taste). Excessive sensibility or delicacy of the organ of taste.

Hyperglobulia, hip-er-glob-u'le-ah (*hyper, globulus*, globule). Plethoric condition with excess of red blood-corpuscles.

Hyperglottis, hip-er-glot'tis. Superior entrance to the larynx; the larynx itself.

Hyperhæmato'sia or **Hyperhæmato'sis.** Inflammation; plethora.

Hyperhæ'mia. Hyperæmia.

Hyperhidrosis, hip-er-hid-ro'sis (*hyper, hidrosis*, sweating). Excessive sweating.

Hyperhora, hip-er-ho'rah (*hyper, hora*, manhood). Premature development of the body or of some part.

Hyperhydræmia, hip-er-hid-re'me-ah. Excess of serum in the blood; hydræmia.

Hyperhypnosis, hip-er-hip-no'sis (*hyper, hupnos*, sleep). Excessive sleep, as to duration.

Hypericum (hip-er'ik-um) **anagalloi'des.** Species of H. of California, used as a medicine. **H. androsæ'mum,** androsæmum. **H. as'cyron,** St. Peter's wort, seeds of which are cathartic. **H. baccif'erum,** ord. Hypericaceæ; Brazilian tree whose bark, like that of H. Guianense, emits a juice, when wounded, resembling gamboge. **H. Canaden'se,** species of H. growing in Western United States; expectorant, styptic, etc.; used in croup, mania, bowel affections, etc. **H. conna'tum,** leaves of this Brazilian plant are astringent, and used in decoction as a gargle in inflammation of the throat. **H. corymbo'sum,** spotted St. John's wort, fluxseed; grows in Indian Territory; used in dysentery and diarrhœa. **H. cris'pum,** species of S. Europe, used in dysmenorrhœa, leucorrhœa, etc. **H. Delphinen'se,** St. Peter's wort; imperforate St. John's wort; used in hydrophobia in Eastern Europe; diuretic, astringent, vermifuge. **H. Guianen'se,** see *H. bacciferum*. **H. hirci'num,** goat-scented St. John's wort of Europe; used in dysuria and dysmenorrhœa. **H. laxius'culum,** *Allerim brabo*, has been long used in Brazil against the bites of serpents. **H. ma'jus,** Arnica montana. **H. officina'le** or **officina'rum,** H. perforatum. **H. perfora'tum,** perforated or common St. John's wort, growing in America, Europe, and Africa; aromatic and astringent; enters into a number of aromatic preparations, and was at one time much used in dysentery, hemorrhages, etc., and as a diuretic. Oil of St. John's wort, red oil, linimentum or oleum hyperici, balsamum hyperici simplex, is made by infusing the flowers in olive oil; it is applied to recent bruises. **H. saro'thra,** orange-grass, bastard gentian, pineweed; indigenous; applied in domestic practice, boiled, to contusions and sprains. **H. Virgin'icum,** growing in United States and Canada, is expectorant and stomachic, the flowers being treated with alcohol. **H. vulga're,** H. perforatum.

Hyperidrosis, hip-er-id-ro'sis. Excessive sweating, or disease of skin so characterized. **H. oleo'sa cap'itis,** seborrhœa oleosa.

Hyperinesis (hip-er-in-a'sis) or **Hyper'inos** (*hyper, ineo*, to purge). Excessive purgation.

Hyperinosæmia, hip-er-in-os-e'me-ah. Excessive amount of fibrin in the blood.

Hyperinosis, hip-er-in-o'sis (*hyper, is*, fibre). Condition of the blood in which it contains increase in the proportion of fibrin (hyperfibrination, superfibrination), a decrease of the ratio of red corpuscles, with excess of fibrin and increase of the fat, as in inflammation. Morbidly increased muscular activity.

Hyperinotic, hi-per-in-ot'ik. Relating to hyperinosis.

Hyperinvolution, hi-per-in-vo-lu'shun. Unnaturally early involution of the uterus after parturition; incorrectly used for atrophy of the uterus after labor.

Hyperkeratosis, hip-er-ker-at-o'sis (*hyper, keras*, horn). Anomalous horny development of the epidermis or its appendages. Hypertrophy of the cornea; conical cornea.

Hyperkine'sia or **Hyperkine'sis.** Hypercinesia. **H., spi'nal,** exaggeration of spinal or automatic action, as in hysteria.

Hyperkinetic, hi-per-kin-et'ik. Relating to hyperkinesia.

Hyperlactation, hi-per-lak-ta'shun. Excessive secretion of milk; excessive suckling of a child; superlactation.

Hyperlogia, hip-er-lo'je-ah (*hyper, logos*, discourse). Excessive talkativeness.

Hyperlymphia, hip-er-limf'e-ah. Excessive formation or accumulation of lymph.

Hypermastia, hip-er-mas'te-ah (*hyper, mastos*, breast). Excessively enlarged or developed breasts.

Hypermegalia, hip-er-me-gal'e-ah. Hypermegaly.

Hypermegaly, hi-per-meg'al-e (*hyper, megalos*, great). Exaggerated development, as of the heart from fatty or amyloid degeneration of its structure.

Hypermegasthenic, hi-per-meg-as-then'ik (*hyper, megas*, great, *sthenos*, strength). Having remarkable muscular power.

Hypermesoticephalic, hip-er-mes-o-te-sef-al'ik (*hyper, mesotes*, middle or mean, *kephale*, head). Having a mean cephalic index of 78° or 79°.

Hypermetrohemia, hip-er-met-ro-he'me-ah. Hyperæmia of the uterus.

Hypermetropathy, hi-per-met-rop'ath-e (*hyper, metra*, womb, *pathos*, disease). Excessively acute uterine disease.

Hypermetropia, hi-per-met-ro'pe-ah (*hyper, metron*, measure, *opsis*, vision). Abnormal refraction; opposite condition of vision to myopia, the principal focus falling behind the retina, while in myopia it falls in front of it. **H., ax'ial,** H. caused by shortening of antero-posterior axis of the eye. **H. curv'ature,** H. caused by flattening of the cornea or crystalline. **H., fac'ultative,** H. having near-point for both eyes at a fixed distance. **H., la'tent,** difference between manifest and total hypermetropia or far-point of distinct vision. **H., man'ifest,** hypermetropia that can be overcome by attempt at accommodation or with an accommodating convex glass. **H., to'tal,** whole amount exhibited after accommodation has been paralyzed.

Hypermetropic, hi-per-met-rop'ik. Relating to hypermetropia; one affected with this condition of vision.

Hypermetrotrophy, hi-per-met-rot'ro-fe (*hyper, metra*, uterus, *trophe*, nourishment). Hypertrophy of the uterus.

Hypermnesia, hip-er-na'ze-ah (*hyper, mnaomai*, to recollect). Excessively acute memory.

Hypermyelohæmia, hip-er-me-el-o-he'me-ah (*hyper, muelos*, marrow, *haima*, blood). Hyperæmia of the spinal marrow.

Hypermyopia, hip-er-me-o'pe-ah. Excessive myopia.

Hypermyotrophia, hip-er-me-ot-rof'e-ah (*hyper, mus*, muscle, *trophe*, nourishment). Hypertrophy of muscular tissues.

Hypernephrotrophy, hi-per-nef-rot'ro-fe (*hyper, nephros*, kidney, *trophe*, nourishment). Hypertrophy of the kidney.

Hypernerv'ia or **Hyperneuria,** hip-er-nu're-ah (*hyper, neuron*, nerve). Excessive nervous activity.

Hyperneuroma, hip-er-nu-ro'mah. Morbid development of the neurine or nervous masses. Fungous growth of nervous tissue.

Hyperneurosis, hip-er-nu-ro'sis (same etymon). Hypertrophy of nervous tissue.

Hypernidation, hi-per-nid-a'shun (*hyper, nidus*, nest). Excessive formation of menstrual deciduous membrane, sometimes producing dysmenorrhœa.

Hypernœ'a or **Hypernoi'a** (*hyper, nous*, mind). Excessive exercise of the mental powers.

Hyperoa, hip-er-o'ah (*hyper, oon,* high place). Palatine arch; base of cranium; hard palate; velum palati.

Hyperodontogeny, hi-per-o-don-toj'en-e (*hyper, odous,* tooth, *gennao,* to produce). Excessive growth of teeth.

Hyperoitis, hip-er-o-e'tis (*hyperoa,* velum palati). Inflammation of the velum palati.

Hyperoncosis, hip-er-on-ko'sis (*hyper, onkos,* swelling). Excessive tumefaction. **H. i'ridis,** iridoncosis.

Hyperonych'ia or **Hyperonychosis,** hip-er-on-ik-o'sis (*hyper, onux,* nail). Excessive growth of the nails.

Hyperoöchasma (hip-er-o-o-kaz'mah (*hyperoa, chasma,* opening). Fissure of the palate.

Hyperopharyngeus, hip-er-o-far-in-ja'us. Palatopharyngeus.

Hyperopia, hip-er-o'pe-ah (*hyper, ops,* eye). Hypermetropia. See *Presbyopia.* Excessive acuteness of vision.

Hyperopsia, hip-er-ops'e-ah (*hyper, opsis,* vision). Great acuteness of vision; exposure to intense light.

Hyperorexic, hip-er-o-reks'ik (*hyper, orexis,* appetite). Having excessive appetite.

Hyperorexis, hip-er-o-reks'is (same etymon). Excessive appetite.

Hyperorgosis, hip-er-or-go'sis (*hyper, orgao,* to desire ardently). Excessive erotic orgasm; satyriasis.

Hyperorthognathus, hy-per-or-thog-nath'us (*hyper, orthos,* right, *gnathos,* jaw). Having profile line inclined to auriculo-infraorbital plane 91° or over.

Hyperorthosis, hip-er-or-tho'sis (*hyper, orthos,* straight). Excessive erection; priapism; tetanus.

Hyperos, hip-a'ros. Pestle; lever for traction in dislocation.

Hyperosmia (hip-er-oz'me-ah) (*hyper, osme,* smell) or **Hyperosphresia,** hip-er-os-fra'se-ah (*hyper, osphresis,* smell). Excessive acuteness of smell.

Hyperosmic (hi-per-os'mik) **ac'id.** Osmiun tetroxide or osmic acid.

Hyperosteogeny, hi-per-os-te-oj'en-e (*hyper, osteon,* bone, *gennao,* to produce). Excessive growth of bone; formation of exostoses.

Hyperostosis, hip-er-os-to'sis (*hyper, osteon,* bone, *osis*). Exostosis; hypertrophy of bone.

Hyperpathia, hip-er-path-e'ah (*hyper, pathos,* affection). Excessive sensibility in disease; severe illness.

Hyperphasia, hip-er-faz'e-ah (*hyper, phasis,* talking). Excessive loquacity.

Hyperphleboectasy, hi-per-fleb-o-ek'tas-e (*hyper, phleps,* vein, *ektasis,* swelling). Excessive venous dilatation.

Hyperphlebosis, hip-er-fleb-o'sis (*hyper, phleps,* vein, *osis*). Too great development of the venous system; predominant venosity.

Hyperphlegma, hip-er-fleg'mah (*hyper, phlegma,* phlegm). Excessive secretion of phlegm.

Hyperphlegmasia, hip-er-fleg-mah'ze-ah. Hyperphlogosis.

Hyperphlogosis, hip-er-flog-o'sis (*hyper, phlogosis,* inflammation). A high degree of inflammatory action.

Hyperphoria, hip-er-for'e-ah (*hyper, phoreo,* to carry). Inclination of visual axis of one eye to a point above that of the other eye.

Hyperphrasia, hip-er-frah'ze-ah (*hyper, phrasis,* speech). Excessive talkativeness; exaggerated style of speech.

Hyperphren'ia (*hyper, phren,* mind). Great mental excitement; mania.

Hyperpigmentation, hi-per-pig-men-ta'shun. Excessive amount of pigment.

Hyperpimele, hip-er-pim'el-e (*hyper, pimele,* fat). *Hyperpimely.* Excessive development of fat; excess of fat; obesity.

Hyperplasia, hip-er-plah'ze-ah (*hyper, plasso,* to form). Excess of formative action. This relates to the formation of new elements, hypertrophy being an increase in bulk of pre-existing normal elements.

Hyperplasma, hip-er-plaz'mah (*hyper, plasso,* to form). Hyperinosis.

Hyperplastic, hi-per-plas'tik (same etymon). Having a tendency to excess of formative action.

Hyperplasty, hi'per-plas-te. Hyperplasia; hypergenesis.

Hyperplatyrrhine, hi-per-plat'ir-rheen (*hyper, platus,* broad, *rhis,* nose). Having nasal index over 58°.

Hyperplerosis, hip-er-pler-o'sis (*hyper, plerosis,* filling up). Extreme fulness or repletion.

Hyperplexia, hip-er-pleks'e-ah (*hyper, plesso,* to strike). Trance; luxation.

Hyperpneumop'athy (*hyper, pneumon,* lung, *pathos,* disease). Very severe disease of the lung.

Hyperpneu'sia, Hyperpneu'sis, or **Hyperpneustia,** hip-er-noos'te-ah (*hyper, pneo,* to blow). Excessive flatulence.

Hyperpnœa, hip-er-ne'ah (*hyper, pnoë,* breathing). Abnormally rapid breathing due to deficiency of oxygen in the blood.

Hyperporosis, hip-er-po-ro'sis (*hyper, porosis,* formation of callus). Excessive formation of callus.

Hyperpraxia, hip-er-praks'e-ah (*hyper, praxis,* action). Over-action, leading to listlessness or inaction; excessive movement of the limbs, as sometimes noticed in the insane.

Hyperpresbyopia, hip-er-pres-be-o'pe-ah. Excessive presbyopia; hypermetopia.

Hyperpresby'tia. Presbytia; hyperpresbyopia.

Hyperpyretic, hi-per-pir-et'ik (*hyper, pur,* fever). Excessively feverish; having an abnormally high temperature of body.

Hyperpyrexia, hip-er-pir-eks'e-ah (*hyper, purexis,* fever). Excessive temperature of body; high fever.

Hyperrhinencepha'lia (*hyper, rhis,* nose, *kephale,* head). Enlargement of the olfactory nerves with deformative prominence of frontal bone.

Hypersarcia, hip-er-sar'ke-ah (*hyper, sarx,* flesh). Obesity.

Hypersarcoma, hip-er-sar-ko'mah. Soft fungous excrescence, as on ulcerated parts; fungosity.

Hypersarcosis, hip-er-sar-ko'sis (same etymon). Obesity. Excessive development of granulations. Hypertrophy of muscular tissue. **H. cor'dis,** heart, hypertrophy of. **H. testic'uli,** sarcocele.

Hypersarxis, hip-er-sarks'is (*hyper, sarx,* flesh). Hypersarcoma.

Hypersecretion, hi'per-se-kre'shun. Excessive secretion.

Hyperselaphesia, hip-er-sel-af-a'ze-ah (*hyper, pselaphesis,* act of feeling). Excessively acute sense of touch.

Hypersomnia, hip-er-som-ne'ah (*hyper, somnus,* sleep). Hybrid word denoting excessive somnolence.

Hyperspadiæus (hip-er spad-e-e'us) or **Hyperspadias,** hip-er-spad'e-as (*hyper, spao,* to draw). Epispadias.

Hyperspasmia, hip-er-spaz'me-ah (*hyper, spasmos,* spasm). Convulsion.

Hypersplenotrophy, hi-per-splen-ot'ro-fe (*hyper, splen,* spleen, *trophe,* nourishment). Tumefaction or hypertrophy of the spleen.

Hyperspongia, hip-er-spon'je-ah (*hyper, spongos,* fungus). Spina ventosa; fungosity.

Hypersteatosis, hip-er-ste-at-o'sis (*hyper, stear,* fat). Excessive secretion of fat or of sebaceous matter, as in seborrhœa.

Hypersthenia, hip-er-sthen-e'ah (*hyper, sthenos,* strength). Excessive strength; superexcitement.

Hypersthenic, hi-per-sthen'ik. Stimulant, active, violent.

Hypertension, hi-per-ten'shun. Excessive tension.

Hyperthelic, hi-per-the'lik (*hyper, thele,* nipple). Above the nipple; on mucous membrane.

Hyperthermia, hip-er-thur'me-ah (*hyper, therme,* heat). Excessive heat; great increase in temperature.

Hyperthermic, hi-per-thur'mik. Relating to high temperature.

Hyperthymia, hip-er-thim-e'ah (*hyper, thumos,* vehemence). Mental disease characterized by cruelty or excessive passion or acts of folly.

Hypertonia, hip-er-ton'e-ah (*hyper, tonos,* tone).

Hypertonicity. Excess of tone in parts; excessive irritability. Opposed to atony.

Hypertonic, hi-per-ton'ik. Relating to, or disposed to, excessive tonicity or irritability.

Hyper'tonus. Increase of tension, as within the eye.

Hypertrichosis (hip-er-trik-o'sis) or **Hypertrichi'asis** (*hyper, thrix,* hair). Excessive production of hair.

Hypertromos, hip-er'tro-mos (*hyper, tromos,* trembling). Excessive tremor.

Hypertrophæmia, hip-er-trof-e'me-ah (*hyper, trophe,* nourishment, *haima,* blood). State in which the plastic powers of the blood are increased.

Hypertrophia, hip-er-trof'e-ah (*hyper, trophe,* nourishment). Hypertrophy. **H. cer'ebri,** hypertrophy of the brain. **H. cor'dis,** heart, hypertrophy of. **H. glandula'rum,** hypertrophy of glands. **H. hep'atis,** hypertrophy of the liver. **H. intestino'rum,** hypertrophy of the intestines. **H. lie'nis,** tumefaction of the spleen. **H. miasmat'ica lie'nis,** ague cake. **H. sple'nis,** tumefaction of the spleen. **H. un'guium,** excessive growth of the nails; curvature of the nails. **H. u'teri,** hypertrophy of the uterus. **H. vesi'cæ urina'riæ,** hypertrophy of the bladder.

Hypertrophiæ, hip-er-trof'e-e. See *Hypertrophy.*

Hypertrophic, hi-per-trof'ik (*hyper, trophe,* nourishment). Relating to, or characterized by, hypertrophy or enlargement.

Hypertrophied (hi'per-tro-feed) or **Hypertrophous,** hip-er'tro-fus. See *Hypertrophy.*

Hypertrophy, hi'per-tro-fe (*hyper, trophe,* nourishment). State of a part in which the nutrition is performed with greater activity, and which, on that account, at length acquires unusual bulk. A part thus affected is said to be hypertrophied or hypertrophous. The term hypertrophiæ is used for an order of cutaneous diseases characterized by hypertrophy of the derma or epidermis, or both, or of the hair-follicles. See *Hyperplasia.* **H. of the blad'der,** cystauxe. **H. of the brain,** phrenauxe. **H., car'diac,** heart, hypertrophy of. **H., centrip'etal,** concentric H. of heart. **H., compen'satory,** H. of a part or organ by which it can perform additional work to compensate for defective condition or work of another part. **H., concen'tric,** H. of heart leading to diminution of its cavities. **H. eccen'tric,** H. of walls of a cavity, as ventricle of heart, with dilatation. **H. of the glands,** hyperadenosis, Hodgkin's disease. **H. of the heart,** heart, hypertrophy of. **H. of the intes'tines,** enterhypertrophia. **H. of the liver,** hepatauxe. **H., mus'cular,** pseudohypertrophic muscular paralysis. **H. of the nails,** onychauxe. **H., numer'ical,** hyperplasia. **H., pseudomus'cular,** pseudohypertrophic muscular paralysis. **H. of the spleen,** splenoncus; ague cake. **H. of the thy'roid,** bronchocele. **H. of the u'terus,** metrauxe.

Hyperuresis, hip-er-u-re'sis (*hyper, ouron,* urine). Excessive urination; polyuria; enuresis. **H. aquo'sa,** diabetes; polyuria. **H. sacchari'na,** diabetes mellitus.

Hyperurorrhœ'a (*hyper, ouron,* urine, *rheo,* to flow). Diabetes; polyuria. **H., sac'charine,** diabetes mellitus; melliturla.

Hypervenosity, hi-per-ve-nos'it-e. Excessive development of the venous system generally or of individual veins.

Hyperymenoma, hip-er-e-men-o'mah (*hyper, hymen,* membrane). Tumor made up of membranes. The development of such tumor is termed *Hypermenosis.*

Hyperzoödynamia, hip-er-zo-o-din-am'e-ah (*hyper, zoon,* animal, *dunamis,* power). Hypersthenia; hyperdynamia.

Hypesthesia, hip-es-the'ze-ah. Hypæsthesia.

Hypexodus, hip-eks'od-us (*hypo, exodus,* exit). Alvine discharge or flux.

Hypezocus, hip-e-zo'kus (*hypo, zonnumi,* to gird). Diaphragm; pleura. Membrane or septum, as the mediastinum.

Hypha, hif'ah. Texture.

Hyphæma, hif-e'mah (*hypo, haima,* blood). Ecchymoma; anæmia; suggillation; hyphæmia. **H. oc'uli,** effusion of blood in aqueous chamber of cornea; hæmophthalmia.

Hyphæmatosis (hif-he-mat-o'sis) or **Hypohæmato'sis.** Morbidly diminished hæmatosis, or blood-formation, or vascular action. Condition like anæmia or chlorosis, with defective respiration.

Hyphæmia, hif-he'me-ah. Deficiency of blood; oligæmia; ecchymosis; extravasation of blood in anterior chamber.

Hyphæmorrhagia, hif-e-mor-rhaj'e-ah. Moderate hemorrhage.

Hyphæmos, hif-e'mos (*hypo, haima,* blood). Somewhat bloody; having color and nature of blood. Suggillated.

Hyphe, hif'e. Texture.

Hyphe'mia. Hyphæmia.

Hyphidrosis, hif-id-ro'sis (*hypo, hidrosis,* sweating). Slight sweating; deficiency of perspiration.

Hyphology, hif-ol'o-je (*hyphe,* texture, *logos,* description). Histology.

Hyphotomy, hif-ot'o-me (*hyphe,* texture, *tome,* incision). Dissection of tissue.

Hyphydræmia, hif-id-re'me-ah. Anæmia resulting from anhydrization of the blood, consequent on experiments on the lower animals, with the view of studying the effect of concentration of the liquor sanguinis and globules. Slight hydræmia.

Hyphydros (hif'id-ros) or **Hyph'ydrus** (*hypo, hudor,* water). Hydropic.

Hypinosis, hip-in-o'sis (*hypo, is,* fibre). Condition of the blood in which the quantity of fibrin or its proportion to the blood-corpuscles is less than in health. The quantity of corpuscles is either absolutely increased or their proportion to the fibrin is larger than in healthy blood; the quantity of solid constituents is also frequently larger than in health.

Hypinotical, hip-in-ot'ik'l. Relating to hypinosis.

Hypnæsthesis, hip-nees-the'sis (*hypnos, aisthesis,* feeling). Somnolency.

Hypnagogic, hip-nag-o'gik (*hypnos, agogos,* leader). Leading to sleep.

Hypnal, hip'nal. Oily liquid of ethereal odor and taste of chloral; compound of chloral and antipyrin; sedative, analgesic, and hypnotic; chloral antipyrin.

Hyp'nelos or **Hyp'nelus.** Sleepy.

Hypnenergia, hip-nen-ur-je'ah (*hypnos, energeia,* energy). Somnambulism.

Hypniater, hip-ne-at'ur (*hypnos, iatros,* physician). One who claims to be able during magnetic sleep to diagnosticate disease and its appropriate treatment. Clairvoyant.

Hypnic, hip'nik (*hupnos,* sleep). Producing sleep; relating to sleep.

Hypnob'ades (*hypnos, baino,* to move). Somnambulist.

Hypnobadisis (hip-no-bad'is-is), **Hypnobasis** (hip-nob'as-is), **Hypnobatasis** (hip-no-bat-a'sis), **Hypnobatesis** (hip-no-bat-a'sis), or **Hypnobatia,** hip-no-bat'e-ah. Somnambulism.

Hypnobates (hip-nob'a-tees) or **Hypnodes,** hip-no'dees (*hupnos,* sleep). One in a state of slumber or somnolency.

Hypnodia, hip-no'de-ah. Somnolency.

Hypnogenic, hip-no-jen'ik (*hypnos, gennao,* to produce). Producing sleep or hypnotism.

Hypnolepsy, hip'no-lep-se (*hypnos, lepsis,* seizure). Morbid drowsiness. Narcolepsy. African sleep disease, nelavan.

Hypnology, hip-nol'o-je (*hypnos, logos,* discourse). Treatise on sleep; doctrine of sleep; hypnotism.

Hypnone, hip'none. C_8H_8O. Acetophenone, phenylmethylketone, methylphenylketone. Made by acting on zinc-methyl with chloride of benzyl, or distilling together mixture of acetate and benzoate of calcium. Colorless, oily liquid, with odor of bitter almonds, soluble in alcohol, chloroform, and ether. Hypnotic in dose of one to four minims.

Hypnonergia, hip-no-ner-je'ah (*hypnos, energeia,* action). Somnambulism.

Hypnopathy, hip-nop'ath-e (*hypnos, pathos,* disease).

Sleep or drowsiness from some disease of the body or brain.

Hypnophobia, hip-no-fo'be-ah (*hypnos, phobos,* dread). Dread of sleep; incubus or nightmare.

Hypnophreno'sis (*hupnos,* sleep, *phren,* mind). Disturbed sleep, as in somnambulism, nightmare, etc., or delirium.

Hypnophrenoses, hip-no-fren-o'sees (*hypnos, phren,* mind). Morbid mental conditions connected with sleep, such as delirium, somnambulism, etc.

Hypnopœus, hip-no-pe'us (*hypnos, poieo,* to make). Producing sleep.

Hypnos, hip'nos. Sleep.

Hypnosia, hip-no'ze-ah. Unnatural sleep; narcolepsy. **H. biomagnet'ica,** hypnosis, biomagnetic.

Hypnosis, hip-no'sis. Supervention or production of sleep or of a hypnotic condition. **H., biomagnet'ic,** sleep, magnetic; hypnotism; nelavan or sleep disease.

Hypnotic, hip-not'ik. Somniferous. Agent producing sleep. **H. hallucina'tions,** phenomena of hypnotism; also hallucinations in the state between sleeping and waking. **H. sugges'tion,** effect produced in one who has been hypnotized, under influence of which suggestions of the operator are adopted by the patient as his own.

Hypnotism, hip'no-tizm. An artificially produced neurotic condition or form of lethargy resulting from direct, patient attention to a second party, through the influence of animal magnetism. There is loss or suspension of sensation, consciousness, or willpower. See *Magnetism, animal.*

Hypnotiza'tion. Act of subjecting any one to hypnotic influence.

Hypnotized, hip'no-tized. Subject to or under the influence of hypnotism. See *Mesmerized, Animal magnetism,* and *Hypnotism.*

Hy'po (under). In composition, under. Also abbreviation for hypochondriasis.

Hypoæma, hip-o-e'mah (*hypo, haima,* blood). Ecchymoma.

Hypoæmia, hip-o-e'me-ah. Ecchymoma; hypæmia; suggillation.

Hypoalbumino'sis. Diminution in the quantity of albumen in the blood.

Hypoazoturia, hip-o-az-ot-u're-ah (*hypo, azote, ouron,* urine). Diminution in amount of urea passed in the urine.

Hypoblast, hi'po-blast (*hypo, blastos,* germ). Entoderm or inner or mucous layer of blastoderm.

Hypoblepharon (hip-o-blef'ar-on) or **Hypoblepharum,** hip-o-blef'ar-um (*hypo, blepharon,* eyelid). Tumefaction under one or both eyelids. Artificial eye placed under the eyelids.

Hypobranchial (hi-po-bran'ke-al) **groove.** Ventral groove in œsophagus of the fœtus.

Hypobulia, hip-o-bu'le-ah (*hypo, boule,* will). Deficiency of will-power.

Hypocampa, hip-o-kam'pah. Hippocampus major.

Hypocapnisma (hip-o-kap-niz'mah) or **Hypocapnismus,** hip-o-kap-niz'mus (*hypo, kapnos,* smoke). Fumigation.

Hypocardia, hip-o-kar'de-ah (*hypo, kardia,* heart). Displacement of the heart in a downward direction.

Hypocarodes, hip-o-kar-o'dees (*hypo, karos,* heavy sleep). Lethargic; in a state approaching last stages of coma.

Hypocatalepsis, hip-o-kat-al-ep'sis (*hypo, katalepsis,* seizure). Slight catalepsy, or epilepsy that is not fully developed.

Hypocatharsis, hip-o-kath-ar'sis (*hypo, katharsis,* purgation). Feeble purgation (opposed to hypercatharsis). Purgation downward.

Hypocathartic, hi-po-kath-art'ik. Laxative.

Hypocausis, hip-o-kaus'is (*hypo, kauo,* to burn). Slight burning.

Hypocaus'ticum (same etymon). Mild caustic.

Hypocaustum, hip-o-kaus'tum (*hypo, kaio,* to burn). Stove or any contrivance for sweating purposes. Furnace in subterraneous place for heating baths; the balnearium, vaporarium, calidarium of ancient baths.

Hypocauterium, hip-o-kau-ter'e-um (same etymon). Mild caustic.

Hypocephalæum, hip-o-sef-al-e'um (*hypo, kephale,* head). Pillow for the head.

Hypocerchaleon, hip-o-ser-kal'e-on (*hypo, kerchaleos,* hoarse). Roughness of the fauces, making the voice hoarse.

Hypochloretum sulphurosum, hip-o-klo-re'tum sulfu-ro'sum. Sulphur, chloride of.

Hypochloric (hi-po-klo'ric) **acid.** Chlorine peroxide, obtained by treating potassium chlorate with a strong sulphuric acid; it is very explosive.

Hypochloris, hip-o-klo'ris. Hypochlorite. **H. cal'cicus,** chlorinated lime.

Hypochlo'rite. Salt formed with hypochlorous acid, HClO, as H. of lime.

Hypochloromelas, hip-o-klor-om'el-as (*hypo, chloros,* green, *melas,* black). Term applied to one whose skin is pale, with a blackish hue.

Hypochlorous (hi-po-klo'rus) **acid** (*hypo,* under, *chlorous*). Acid obtained by agitating mercuric oxide with chlorine-water; is a strong bleaching agent.

Hypochœris maculata, hip-o-ke'ris mak-u-lat'ah. Herb growing in Europe, nat. ord. Compositæ; expectorant. **H. radica'ta,** Australian cape weed, long-rooted cat's ear, grows in Europe, having similar properties to H. maculata; used also in intestinal obstructions.

Hypochoilion, hip-o-koil'e-on (*hypo, koilia,* belly). Abdomen.

Hypochon'dre or **Hypochondrium,** hip-o-kon'dreum (*hypo, chondros,* cartilage). Hypochondriac region. Each lateral and superior region of the abdomen is so called, because bounded by the cartilaginous margin of the false ribs, which forms the base of the chest. There is a right and left hypochondrium.

Hypochon'dria. Hypochondriasis.

Hypochondriac (hip-o-kon'dre-ak) or **Hypochondri'acal.** Vapory; vaporish; belonging to hypochondriasis. One laboring under hypochondriasis; hipped. **H. re'gion,** portion of the abdomen beneath the ribs; also extension of this region forward.

Hypochondriacism, hip-o-kon-dri'a-sizm. Hypochondriasis.

Hypochondrialgia, hip-o-kon-dre-al'je-ah (*hypo, chondre, algos,* pain). Pain in the hypochondriac region.

Hypochondriasis, hip-o-kon-dri'a-sis. *Hypo, Hypochondrism, Hip, Spleen, Vapors, English malady, Low spirits,* (vulg.) *The blues, Black dog* (S. Johnson); probably so called from the circumstance of some hypochondriacs having felt an uneasy sensation in the hypochondriac regions. Species of neurosis or of mental alienation observed in persons in other respects of sound judgment, who reason erroneously on whatever concerns their own health. It is characterized by disordered digestion, flatulence, borborygmi, extreme increase of sensibility, palpitations, illusions of the senses, a succession of morbid feelings appearing to simulate those of disease, panics, exaggerated uneasiness of various kinds, chiefly as to what regards the health, etc. Indigestion is doubtless often a cause of hypochondriasis, but the seat of the affection is really, though functionally, in the brain. The disease almost always appears at the adult age, most commonly in irritable individuals and in those exhausted by mental labor, domestic or public affairs, etc.

Hypochondriasm (hip-o-kon'dre-azm), **Hypochondricism** (hip-o-kon'dre-sizm), **Hypochondrism** (hip-o-kon'drizm), or **Hypochondry,** hip-o-kon'dre. Hypochondriasis.

Hypochondrium, hip-o-kon'dre-um. Hypochondriac region.

Hypochondrophthi'sis. Wasting away with hypochondriasis.

Hypochorema, hip-o-ko-ra'mah (*hypo, choreo,* to make vacant). Excrement.

Hypochoresis, hip-o-ko-ra'sis (same etymon). Defecation.

Hypochoretic, hip-o-ko-ret'ic. Cathartic.

Hypochromia, hip-o-kro'me-ah (*hypo, chroma,* color). Unusual pallor of the skin.

Hypochrosis, hip-o-kro'sis (*hypo, chrosis,* color). Unnatural paleness; want of color in red corpuscles of the blood.

Hypochyma, hip-ok'im-ah (*hypo, chuo,* to pour). Cataract; glaucoma; hæmatophthalmia.

Hypochysis, hip-ok'is-is (*hypo, chuo,* to pour). Cataract. **H. hemato'des,** internal hæmophthalmia.

Hypocine'sia or **Hypocine'sis.** Slight or defective motion; diminished muscular response to excitation.

Hypocistis, hip-o-sis'tis. Cytinus.

Hypoclepsis, hip-o-klep'sis (*hypo, klepsis,* theft). Diminution; transudation.

Hypoclysis (hip-ok-lis'is) or **Hypoclys'mus** (*hypo, kluzo,* to wash out, as by a clyster). Purging by a clyster.

Hypocœlis, hip-o-se'lis. Lower eyelid.

Hypocœlium, hip-o-se'le-um (*hypo, koilia,* abdomen). Abdomen.

Hypocœlum, hip-o-se'lum. Lower eyelid, or cavity under it.

Hypocoilon (hip-o-koil'on), **Hypocœ'lon,** or **Hypocœ'lum** (*hypo, koilon,* cavity). Cavity under the lower eyelid or the lower eyelid itself.

Hypocone, hip'o-kone (*hypo, konos,* cone). Sixth cusp in molars of upper jaw.

Hypocophosis, hip-o-ko-fo'sis (*hypo, kophos,* deaf). Hardness of hearing; incomplete deafness.

Hypoco'phous (same etymon). Deaf to a moderate degree.

Hypocranium, hip-o-kran'e-um (*hypo, kranion,* the cranium). Collection of pus between the cranium and dura mater.

Hypocratus, hip-ok'rat-us (*hypo, kratos,* strength). Infirm.

Hypocrinia, hip-o-krin'e-ah (*hypo, krino,* to secrete). Lessened amount of secretion.

Hypocylum, hip-o-se'lum. Hypocoilon.

Hypocyphus, hip-o-se'fus (*hypo, kuphos,* gibbous). Slightly humpbacked.

Hypocyrtos, hip-o-sir'tos (*hypo, kurtos,* curved). Slightly humpbacked.

Hypocysteotomy, hi-po-sis-te-ot'o-me (*hypo, kustis,* bladder, *tome,* section). Perineal cystotomy; lateral operation of lithotomy.

Hypoderis, hip-od'er-is (*hypo, deris,* skin). Clitoris; prepuce of clitoris; lower part of the neck.

Hypoderm, hi'po-durm (*hypo, derma,* skin). Subcutaneous tissue.

Hypodermal, hi-po-dur'mal. Hypodermic.

Hypodermatic, hi-po-dur-mat'ic (*hypo, derma,* skin). Under the skin; hypodermic; subcutaneous.

Hypodermatomy, hip-o-der-mat'o-me (*hypo, derma,* skin, *tome,* incision). Section of subcutaneous parts, as of tendons and muscles.

Hypodermic, hi-po-dur'mik (*hypo, derma,* skin). Under the skin, as *Hypodermic medication,* that which consists in the application of remedies under the skin. Subcutaneous. **H. injec'tion,** injection of fluid into the subcutaneous cellular tissue; also the fluid injected. When blood is thus injected, the process is called *H. transfusion.*

Hypodermis, hip-o-derm'is. Hypoderma; clitoris; nymphæ; prepuce of clitoris.

Hypodermoclysis, hip-o-der-mok'lis-is (*hypo, derma, klusis,* washing out). Hypodermic injection of alkaline, saline, or other solutions, in quantity, as in cholera; subcutaneous injection.

Hypodermoclysm, hi-po-der'mo-klism. Treatment by large saline injections, as in cholera.

Hypodermotherapy, hi-po-der-mo-ther'ap-e (*hypo, derma,* skin, *therapeuo,* to cure). Hypodermic medication.

Hypoderrhis, hip-o-der'rhis (*hypo, dere,* neck). Epideris; lower and fore part of the neck; hypoderis.

Hypodesis, hip-od'es-is (*hypo, deo,* to bind). Bandage; ligation.

Hypodesma (hip-o-dez'mah) or **Hypodes'mis** (*hypo, desma,* bandage). Bandage.

Hypodiaphragmatic, hi-po-di-a-frag-mat'ik. Below the diaphragm.

Hypodicrotous, hi-po-dik'ro-tus (*hypo, di,* double, *kroteo,* to strike). Term applied to the pulse-trace of the sphygmograph when indicating that dicrotism is slight or retarded. When the latter is blended with the line of ascent of the next pulsation, it is said to be hypodicrotous.

Hypodyma, hip-od'im-ah. Pleura; mediastinum.

Hypodynamic, hi-po-di-nam'ik (*hypo, dunamis,* power). Adynamic.

Hypodynia, hip-o-din'e-ah (*hypo, odune,* pain). Slight pain.

Hypoëcta'sia. Hypectasia.

Hypogala, hip-og'al-ah (*hypo, gala,* milk). Effusion of milky fluid into the eye; hypopyon.

Hypogaster, hip-o-gas'ter. Hypogastrium.

Hypogastralgia (hip-o-gas-tral'je-ah) or **Hypogastrial'gia** (*hypogastrium, algos,* pain). Pain in the hypogastrium.

Hypogastrectasia (hip-o-gas-trek-tah'ze-ah) or **Hypogastrec'tasis** (*hypogastrium, ektasis,* dilatation). Dilatation of the hypogastrium.

Hypogastrial'gia. Hypogastralgia.

Hypogastric, hi-po-gas'trik. Relating to the hypogastrium. **H. ar'tery,** more internal of the two branches into which the primary iliac divides; it descends into the cavity of the pelvis, and gives off a number of branches, which arise at times separately, at others by common trunks; see *Umbilical arteries.* **H. fold,** peritoneal fold from sides of the bladder to the umbilicus, in which are the obliterated umbilical arteries. **H. fos'sa,** fossa in the peritoneum caused by the hypogastric fold. **H. gan'glion,** large nervous ganglion on each side of the cervix uteri, immediately behind the ureter, which receives the greater number of the nerves of the hypogastric and sacral plexuses, and distributes branches to the uterus, vagina, bladder, and rectum. **H. glands,** lymphatic glands of hypogastric region. **H. lithot'omy,** high or suprapubic lithotomy. **H. nerve,** branch of ilio-hypogastric nerve to the skin. **H. plex'us,** this is situate at the lateral and posterior parts of the rectum and the *bas fond* of the bladder, and is formed by the sacral nerves and the inferior mesenteric plexus, giving off numerous filaments, which accompany the arteries passing to the rectum and genital organs. Also plexus of lymphatic vessels surrounding the internal iliac artery. **H. re'gion,** hypogastrium. **H. vein,** internal iliac vein.

Hypogastrion, hip-o-gas'tre-on. Abdomen; hypogastrium.

Hypogastriorrhexis, hip-o-gas-tre-or-rheks'is. Hypogastrorrhexis.

Hypogastriotomy, hip-o-gas-tre-ot'o-me (*hypogastrium, tome,* incision). Operation of opening the abdomen in region of hypogastrium.

Hypogastritis, hip-o-gas-tre'tis. Slight gastritis.

Hypogastrium, hip-o-gas'tre-um (*hypo, gaster,* belly). Lower part of the abdomen; the hypogastric region extending as high as three fingers' breadth beneath the umbilicus. It is divided into three secondary regions: one middle or pubic, and two lateral or inguinal.

Hypogastrius, hip-o-gas'tre-us. Hypogastric.

Hypogastroarctia, hip-o-gas-tro-ark'te-ah (*hypogastrium, arcto,* to narrow). Constriction of the abdomen at the hypogastrium.

Hypogastrocele, hip-o-gas-tro-se'le (Eng. hi-po-gas'-tro-seel) (*hypogastrium, kele,* tumor). Hernia in the hypogastric region, occurring through the separated fibres of the lower part of the linea alba; hypogastric hernia.

Hypogastrodidymus, hip-o-gas-tro-did'im-us (*hypogastrium, didumos,* twin). Monstrosity in which twins are united by the hypogastrium.

Hypogastroectasia, hip-o-gas-tro-ek-taz'e-ah (*hypogastrium, ektasis,* dilatation). Dilatation of the abdomen at the hypogastrium.

Hypogastrohæmia, hip-o-gas-tro-he'me-ah (*hypogastrium, haima,* blood). Abdominal hemorrhage in the region of the hypogastrium.

Hypogastronervia (hip-o-gas-tro-nur've-ah) or **Hypogastroneur'ia** (*hypo, gaster*, stomach, *neuron*, nerve). Deficient nervous action of the stomach.

Hypogastropathia, hip-o-gas-tro-path-e'ah (*hypogastrium, pathos*, disease). Disease of the hypogastrium.

Hypogastrorrhagia, hip-o-gas-tror-rhaj'e-ah (*hypogastrium, rhage*). Abdominal hemorrhage in the region of the hypogastrium.

Hypogastrorrhexis, hip-o-gas-tror-rheks's is (*hypogastrium, rhexis*, rupture). Rupture of the hypogastrium; eventration.

Hypogastrorrhœa, hip-o-gas-tror-rhe'ah (*hypogastrium, rheo*, to flow). Slight gastrorrhœa.

Hypogastrostenosis, hip-o-gas-tro-sten-o'sis (*hypogastrium, stenosis*, narrowness). Narrowness or constriction of the hypogastrium.

Hypogenesia, hip-o-jen-a'ze-ah (*hypo, genesis*, formation). Defective development or formative power.

Hypogenesis, hip-o-jen'es-is. Incomplete production.

Hypogeusia, hip-o-gu'ze-ah (*hypo, geusis*, taste). Deadening or diminution of sense of taste; defective taste.

Hypoglobu'lia (*hypo, globule*). Diminution in the quantity of globules in the blood.

Hypoglossa, hip-o-glos'sah. Hypoglottides.

Hypoglossal, hi-po-glos'sal (*hypo, glossa*, tongue). Under the tongue. **H. a'rea**, inferior end of round fasciculus, floor of fourth ventricle. **H. nerve**, lingual or gustatory nerve, ninth pair of nerves; it arises by ten or twelve very fine filaments from the grooves separating the corpora pyramidalia from the corpora olivaria, issues from the cranium by the foramen condyloideum anterius, and divides, near the angle of the jaw, into two branches: one, the cervicalis descendens or descendens noni; the other, the lingual branch, the continuation of the principal trunk, gives numerous filaments to the muscles of the tongue and pharynx. The ninth pair communicates motion to the muscles to which it is distributed.

Hypoglossia, hip-o-glos'se-ah. Hypoglottides.

Hypoglossiadenitis, hip-o-glos-se-ad-en-e'tis (*hypo, glossa*, tongue, *aden*, gland). Inflammation of the sublingual gland.

Hypoglossidia, hip-o-glos-sid'e-ah. Hypoglottides.

Hypoglossion (hip-o-glos'se-on) or **Hypoglossium**, hip-o-glos'se-um (*hypo, glossa*, tongue). Sublingual region.

Hypoglossis (hip-o-glos'sis), **Hypoglot'tis**, or **Hypoglot'tia** (*hypo, glossa*, tongue). Under surface of the tongue; ranula.

Hypoglossitis, hip-o-glos-se'tis. Inflammation under the tongue.

Hypoglossium, hip-o-glos'se-um. Hypoglossion; ranula.

Hypoglossocynanche, hip-o-glos-so-sin-an'ke (*hypo, glossa*, tongue, *cynanche*). Angina Ludovici.

Hypoglossum, hip-o-glos'sum. Ruscus hypoglossum; ranula.

Hypoglos'sus (under the tongue). Hypoglossal and hypoglossus nerve.

Hypoglottia, hip-o-glot'te-ah. Hypoglossis, hypoglottides.

Hypoglottides (hip-o-glot'tid-ees) **pil'ulæ**. Pills placed under the tongue to dissolve there.

Hypoglottis, hip-o-glot'tis. Hypoglossis; ranula.

Hypoglutis, hip-o-glu'tis (*hypo, gloutos*, breech). The lower and projecting part of the nates; gluteal fold.

Hypognathaden, hip-o-nath'ad-en (*hypo, gnathos*, jaw, *aden*, gland). Submaxillary gland.

Hypognathadenitis, hip-o-nath-ad-en-e'tis (*hypognathaden*, submaxillary gland). Inflammation of the submaxillary gland.

Hypognathus, hip-o-nath'us (*hypo, gnathos*, jaw). Double monstrosity in which one fœtus is attached to another beneath its jaw. Having the lower jaw more prominent than the upper.

Hypohæma, hip-o-he'mah (*hypo, haima*, blood). Effusion of blood into the chambers of the eye; hyphæma.

Hypohæmatosis, hip-o-he-ma-to'sis. Hyphæmatosis.

Hypohæmia, hip-o-he'me-ah. Hypæmia.

Hypohæmitis, hip-o-he-me'tis. Slight inflammation of the blood.

Hypohidrosis, hip-o-hid-ro'sis (*hypo, hidrosis*, sweat). Deficiency of perspiration.

Hypohyal, hi-po-hi'al. Under the hyoid bone.

Hypohydræmia, hip-o-hi-dre'me-ah (*hypo, hydro, haima*, blood). Deficient amount of water in the blood.

Hypohypnosis, hip-o-hip-no'sis (*hypo, hupnos*, sleep). Insufficient or lessened amount of sleep.

Hypoidro'sis. Hypohidrosis.

Hypoinosæ'mia (*hypo, is*, fibrin, *haima*, blood). Diminution of amount of fibrin in the blood, or of formative power as regards fibrin in the blood.

Hypokinesia (hip-o-kin-a'ze-ah) or **Hypokinesis**, hip-o-kin-a'sis. Diminished power of movement; slow motion or action; slight paralysis of motion.

Hypolampsia (hip-o-lamp'she-ah) or **Hypolampsis**, hip-o-lamp'sis (*hypo, lampsis*, shining). Slight brightness of surface in dropsy; slight degree of contraction of a limb.

Hypolemmal, hi-po-lem'mal (*hypo, lemma*, husk). Having position on ental side of a sheath; a portion of nerve in a motorial end-plate, for example.

Hypolepsiomania, hip-o-lep-se-o-man'e-ah (*hypo, lepsis*, seizure, *mania*). Slight mania; monomania; melancholy.

Hypolepsis, hip-o-lep'sis (*hypo, lepsis*, seizure). Slight mania or monomania.

Hypologia, hip-o-lo'je-ah (*hypo, logos*, discourse). General mental degeneration of the insane, in which words are improperly used to express thoughts.

Hypolympha, hip-o-lim'fah (*hypo, lympha*, water). Plastic effusion into the anterior chamber of the eye.

Hypolymphia, hip-o-limf'e-ah (same etymon). Deficiency of lymph.

Hypolysis, hip-ol'is-is (*hypo, lusis*, loosening). Slight paralysis.

Hypomania, hip-o-man'e-ah. Slight mania; monomania.

Hypomelancholia, hip-o-mel-an-kol'e-ah. Slight melancholy.

Hypomenous, hip-om'en-us (*hypo, meno*, to remain). Unattached to the part above it.

Hypometropia, hip-o-met-ro'pe-ah (*hypo, metron*, measure, *ops*, eye). Myopia.

Hypo'mia (*hypo, homos*, shoulder). Axilla.

Hypomicrosthenic, hi-po-mik-ros-then'ik (*hypo, mikros*, small, *sthenos*, strength). Want of strength; deficiency of muscular power.

Hypomne'sis (*hypo, mnesis*, memory). Defective memory.

Hypomnestic, hi-po-nes'tik (*hypo, mnesis*, memory). Having defective memory.

Hypomoria, hip-o-mo're-ah (*hypo, moria*, folly). Slight imbecility of mind or slight delirium.

Hypomyosthenia, hip-o-me-os-the-ne'ah (*hypo, mus*, muscle, *sthenos*, strength). Muscular debility.

Hypomyot'rophy (*hypo, mus*, muscle, *trophe*, nourishment). Muscular atrophy.

Hypomyxon, hip-o-miks'on (*hypo, muxa*, mucus). Part that is slightly mucous in character or covered with mucus.

Hyponarthecia, hip-o-nar-tha'se-ah (*hypo, narthex*, splint). Mode of treating fractures by position only, the limb resting upon a cushioned board or splint.

Hyponephrotrophia, hip-o-nef-ro-trof'e-ah (*hypo, nephros*, kidney, *trophe*, nourishment). Atrophy of the kidney.

Hyponeur'via or **Hyponeuria**, hip-o-nu're-ah (*hypo, neuron*, nerve). Morbidly diminished nervous energy; partial paralysis.

Hyponomous, hi-pon'om-us (*hypo, nemo*, to feed). Spreading or eating away under the surface, as an ulcer or fistula; burrowing, as of an abscess.

Hyponomus, hip-on'om-us (*hypo, nemo*, to feed). Deep fistula or ulcer.

Hyponychial, hi-pon-ik'e-al (*hypo, onux*, nail). Seated under the nail; relating to parts so situate.

Hyponychion, hip-on-ik'e-on (*hypo, onux,* nail). Embryonic nail, apparently embedded in the cuticle.

Hyponychon, hip-on'ik-on (same etymon). Effusion of blood or pus under a nail.

Hypopathia, hip-o-path-e'ah (*hypo, pathos,* affection). A disease of a slight character.

Hypopatus, hip-op'at-us (*hypo, pateo,* to go). Dejection.

Hypopedium, hip-o-ped-e'um (*hypo, pes,* foot). A cataplasm for the sole of the foot.

Hypopharyngeal, hi-po-far-in-je'al. Under the pharynx.

Hypopha'sia or **Hypophasis,** hip-of'as-is (*hypo, phaino,* to appear). The state of the eyes in which the white only is seen through the opening of the eyelids; lagophthalmia.

Hypophleboarctia, hip-o-fleb-o-ark'te-ah (*hypo, phleps,* vein, *arctus,* narrow). Slight contraction or narrowness of the veins.

Hypophlegmasia, hip-o-fleg-mah'ze-ah. Slight inflammation.

Hypophlegmymen'ic (*hypo, phlegma,* phlegm, *hymen,* membrane). Under the mucous membrane.

Hypophonesis, hip-o-fon-a'sis (*hypo, phone,* voice). Moderate use of the voice; speaking in an undertone.

Hypophora, hip-of'o-rah (*hypo, phero,* to carry). A fistulous ulcer; purgation.

Hypophosphis, hi-po-fos'fis. Hypophosphite. **H. cal'cicus,** calcium hypophosphite. **H. fer'ricus,** iron hypophosphite. **H. ka'licus,** potassium hypophosphite. **H. na'tricus,** sodium hypophosphite. **H. potas'sicus,** potassium hypophosphite. **H. so'dicus,** sodium hypophosphite.

Hypophosphites, hi-po-fos'fites. A class of compounds formed by the union of hypophosphorous acid with oxides of iron, sodium, calcium, etc., and with quinia and strychnia prescribed in the form of syrup to obviate their oxidation into phosphates if given in solution. They are prescribed in debility, anæmia accompanied with nervous derangement, muscular weakness, nervous exhaustion, hysteria, insomnia, gastralgia, etc. See *Ferri hypophosphis, Calcii hypophosphis,* etc.

Hypophosphorous (hi-po-fos'for-us) **acid.** White crystalline, monobasic acid, forming salts with bases. See *Hypophosphites.* Its therapeutic action is similar to that of phosphorous acid.

Hypophrasia, hip-o-frah'ze-ah (*hypo, phrasis,* speech). Defective speech from loss of control, as in paresis, or from disinclination to speak, as in melancholia.

Hypophraxia, hip-o-fraks'e-ah (obstruction or blocking up). Disinclination to move from assumed or fixed position, as in melancholia.

Hypophrenic, hi-po-fren'ik (*hypo, phren,* diaphragm). Under the diaphragm.

Hypophthalmia, hip-of-thal'me-ah. Hypopyon.

Hypophthalmion, hip-of-thal'me-on (*hypo, ophthalmos,* eye). Part under the eye where œdema generally commences in chronic diseases and in cachexiæ.

Hypophysis, hip-of'is-is (*hypo, phuo,* to bring forth). Process of bone. Cataract. Offspring or progeny. Superfœtation. **H. cerebra'lis, cer'ebri,** or **diencepha'lii,** pituitary gland.

Hypopion, hip-op'e-on (*hypo, ops,* eye). Portion of the face directly under the eye. Ecchymosis of the lower eyelid; black eye. Hypopyon.

Hypopitys languinosa, hip-op'it-is lan-gwin-o'sah (*hypo, pitus,* pine tree). American pine-sap, false beech-drops, birds' nest. Powdered root is nervine. Remedy for cough of sheep.

Hypopium, hip-op'e-um. Hipopion. Malar bone.

Hypoplasia, hip-o-plah'ze-ah (*hypo, plasso,* to form). Defect in development or formative power.

Hypoplasma, hip-o-plaz'mah (*hypo, plasso,* to form). Hypinosis.

Hypoplastæma (hip-o-plas-te'mah) or **Hypoplasticæmia,** hip-o-plas-te-se'me-ah (*hypo, plastikos,* formative, *haima,* blood). Diminished plasticity of the blood.

Hypoplas'tia. Hypoplastæma.

Hypoplastic, hip-o-plas'tik (*hypo,* under, *plastikos,* formative). Possessing impaired power of formation.

Hypoplasty, hi'po-plas-te (same etymon). Hypoplastæma; hypoplasia.

Hypopleurius, hip-o-plu're-us (*hypo, pleura,* rib). Subcostal pleura.

Hypopodia, hip-o-po'de-ah (*hypo, pous,* foot). Remedies, as sinapisms, applied under the foot.

Hypopodion (hip-o-pod'e-on) or **Hypopod'ium** (*hypo, pous,* foot). Remedy, as cataplasm, applied to the foot. Foot-rest of surgical apparatus.

Hypopselaphesia (hip-o-sel-af-a'ze-ah) or **Hypopselaphesis,** hip-o-sel-af-a'sis (*hypo, pselaphesis,* act of feeling). Impaired or diminished tactile power.

Hypopsophesis, hip-o-sof-a'sis (*hupopsopheo,* to make a slight noise). Noise of fluids in passage through the œsophagus.

Hypoptyalism, hi-po-ti'al-ism (*hypo, ptualon,* saliva. Diminished secretion of saliva; slight ptyalism.

Hypopyon (hip-op'e-on) or **Hypop'yum** (*hypo, puon,* pus). Collection of pus. Name given to small abscesses between the laminæ of the cornea, hypopyon of the cornea, as well as to purulent collections in the chambers of the eye, hypopyon of the chambers. Also effusion of blood under the eyelids and tunica conjunctiva or under the lower eyelid. **H. lac'teum,** hypopyon.

Hypoquebrachine, hip-o-kwe-brak'in. Yellowish alkaloid, $C_{21}H_{26}N_2O_2$, from white quebracho bark.

Hyporinion (hip-o-rin'e-on) or **Hyporrhin'ium** (*hypo, rhis,* nose). Part of the beard beneath the nose; mustache. Upper lip.

Hyporisma, hip-or-iz'mah. Aneurism.

Hyporrhachis, hip-or'rak-is (*hypo, rhachis,* spine). Hollow in the small of the back.

Hyporrhagia, hip-or-rha'je-ah (*hypo, rhegnumi,* to break forth). Discharge of fluid from beneath. Slight hemorrhage.

Hyporrhinion (hip-or-rhin'e-on) or **Hyporrhinium,** hip-or-rhin'e-um. Hyporinion.

Hyporrhinos (hip-or-rhin'os) or **Hyporrhinus,** hip-or-rhin'us (*hypo, rhis,* nose). Under the nose; nasal, as the voice.

Hyporrhœa, hip-or-rhe'ah (*hypo, rheo,* to flow). Slight discharge.

Hyporrhysis, hip-or'rhis-is (*hypo, rhuo,* to flow). Defluxion, prolapsus. Falling off in nutrition or flesh.

Hyposaprus, hip-o-sap'rus (*hypo, sapros,* putrid). Growing putrid; slightly putrid.

Hyposaphro'ne (*hypo, saroo,* to roll about, *phone,* voice). Slight roughness of voice.

Hyposarca, hip-o-sar'kah (*hypo, sarx,* flesh). Anasarca. Collection of fluid in muscular tissue. Pendulous abdomen; physconia.

Hyposarcidium, hip-o-sar-sid'e-um. Anasarca; hyposarca.

Hyposarcosis, hip-o-sar-ko'sis (*hypo, sarcosis,* fleshy growth). Small fleshy growth; wart.

Hyposcheotomy, hip-osk-e-ot'o-me (*hypo, oscheon,* scrotum, *tome,* incision). Treatment of hydrocele by puncturation at the lower part of the tunica vaginalis.

Hyposeismus (*hypo, seismos,* shaking). Slight concussion.

Hyposiagon, hip-o-se'ag-on (*hypo, siagon,* jaw-bone). Inferior maxillary bone.

Hyposiagonarthritis, hip-o-se-ag-on-arth-re'tis (*hyposiagon, arthron,* joint). Inflammation of temporomaxillary joint.

Hyposialaden, hip-o-se-al'ad-en (*hypo, sialon,* saliva, *aden,* gland). Submaxillary gland.

Hyposialadenitis, hip-o-se-al-ad-en-e'tis (*hyposialaden,* submaxillary gland). Inflammation of submaxillary gland.

Hyposkeletal, hi-po-skel'e-tal. Below the vertebral axis of the embryo.

Hyposmia, hip-oz'me-ah (*hyper, osme,* smell). Diminished or defective sense of smell.

Hypospadia (hip-o-spad'e-ah), **Hypospadias** (hip-o-spad'e-as), or **Hypospadiasis,** hip-o-spad-e'as-is (*hypo, spao,* to draw). Malformation in which the canal of the urethra, instead of opening at the apex of the

glans, terminates at its base or beneath the penis, at greater or less distance from the symphysis pubis. When the orifice of the urethra is very near the root of the penis the scrotum is divided, as it were, into two great labia—a malformation often taken for hermaphrodism. The condition probably causes impotence; it certainly renders impregnation less probable. When the opening is in the glans penis, it is called *glandular* or *balanic* hypospadias; between the glans and scrotum, *penile* h.; in the scrotum, *scrotal* h.; in the perineum, *perineal* h. Also retraction of glans from contracted frænum. In female, deficiency of urethra, the urine thus passing into the vagina.

Hypospadian, hip-o-spad'e-an. Hypospadias.

Hypospadias, hip-o-spad'e-as. One affected with hypospadia; hypospadian. Hypospadia.

Hypospadiasis, hip-o-spad-e'as-is. Hypospadia.

Hypospasm, hi'po-spazm. Slight spasmodic action.

Hypospathis'mos or **Hypospathismus,** hip-o-spathiz'mus (*hypo, spathion,* ladle or spatula). Ancient operation in severe defluxion to the eyes or chronic headaches, consisting in incisions made in the scalp down to the bone and insertion of a spatula (*spation* or *hypospathister*) to enable the parts to be divided.

Hypospathister, hip-o-spath-is'ter. See *Hypospathismos.*

Hyposphagma, hip-o-sfag'mah (*hypo, sphazo,* to kill). Coagulated blood collected when an animal is killed; used for food. Effusion of blood, especially under the conjunctiva. Hæmophthalmia.

Hyposphenal (hi-po-sfe'nal) **bone.** Presphenoid or basisphenoid bone of fishes.

Hyposphinxis, hip-o-sfinks'is (*hypo, sphinxis,* constriction). Ligation applied from beneath.

Hypostaphyle, hip-o-staf'il-e (*hypo, staphule,* uvula). Relaxation and tumefaction of the uvula; staphylœdema.

Hypostaphylitis, hip-o-staf-il-e'tis (*hypostaphyle*). Slight inflammation of the uvula.

Hypostasis, hip-os'tas-is (*hypo, stasis,* act of placing). A morbid deposition. Sediment. Passive congestion or venous hyperæmia from dependent position. Suppression of morbid humors. Abscess. **H., cadav'eric,** venous hyperæmia from gravity noticed in the dead body. **H., pul'monary** or **pulmo'num,** hypostatic hyperæmia or congestion of the lungs.

Hypostatic, hi-po-stat'ik (*hypo, stasis,* stagnation). Relating to hypostases, sediments, or depositions. **H. conges'tion,** hypostasis; hypostatic hyperæmia. **H. hyperæ'mia,** congestion of blood in vessels of a part from depending position. **H. pneumo'nia,** inflammation and passive congestion of the lungs at their lower portions.

Hypostema, hip-o-ste'mah. Hypostasis; sediment.

Hypostenoma, hip-o-sten-o'mah (*hypo, stenos,* narrow). Slight contraction or narrowness.

Hypostenosis, hip-o-sten-o'sis (same etymon). Development of slight narrowness or contraction.

Hyposteoma, hip-os-te-o'mah. Hypostoma.

Hyposternal, hi-po-stur'nal. Under the sternum. **H. bone,** epihyal bone of fishes.

Hyposthenia, hip-o-sthen-e'ah (*hypo, sthenos,* strength). Debility.

Hyposthenic, hip-o-sthen'ik. Debilitated; contrastimulant or sedative. Medicine that reduces the action of the heart without disturbing its regular beat.

Hypostoma, hip-os-to'ma (*hypo, osteon,* bone). Bony tumor on inferior surface of bone.

Hypostome, hi'pos-tome. Hypostoma.

Hypostosis, hip-os-to'sis. Development of hypostoma.

Hypostroma, hip-o-stro'mah. Mycelium of certain fungi.

Hypostrophe (hip-os'tro-fe) or **Hypostro'phia** (*hypo, strepho,* to turn). Act of patient in turning himself. Restlessness. Relapse or return of a disease. Retroversion.

Hypostypsis, hip-o-stip'sis (*hypo, stupsis,* contraction). Mild astringency.

Hypostyptic, hi-po-stip'tik (*hypo, stupsis,* constriction). Feeble astringent.

Hyposulphis, hi-po-sul'fis. Hyposulphite. **H. cal'cicus,** hyposulphite of lime. **H. na'tricus** or **so'dicus,** sodium hyposulphite.

Hyposulphite, hip-o-sul'fite. Salt formed by union of hyposulphurous acid with a base, as oxide of sodium, of calcium, etc. See *Sulphurous acid.*

Hyposynergia, hip-o-sin-er-je'ah (*hypo, sunergia,* cooperation). Defective co-ordination; defective combination of muscular actions.

Hyposyphilis, hip-o-sif'il-is. Mild form of syphilis.

Hyposystolia, hip-o-sis-tol'e-ah. Defective systole of the heart, noticed sometimes in advanced stages of heart disease.

Hypotarsus, hip-o-tar'sus. Calcaneum of some birds.

Hypotasis, hip-ot'as-is (stretching under). Spreading anything, as a sheet or rubber cloth, beneath a patient.

Hypotaurium, hip-o-taur'e-um. Perinæum.

Hypothema, hip-o-the'mah (*hypo, tithemi,* to place). Suppository.

Hypothenar, hip-oth'en-ar (*thenar,* palm of hand) or **H. eminence.** Fleshy projection of the palmar surface of the hand, corresponding with the little finger, and supported by the fifth metacarpal bone; it is formed of the palmaris brevis, adductor or flexor brevis minimi digiti, and opponens minimi digiti muscles. Name also given to different muscles of the hand; hypothenar minimi digiti includes abductor, flexor brevis, and opponens minimi digiti; hypothenar pollicis corresponds to the abductor and a portion of the flexor brevis pollicis. Eminence at ulnar edge of the palm. **H. auricula're,** H. minimi digiti. **H. ma'jus,** H. eminence. **H. min'imi dig'iti,** flexor parvus minimi digiti. **H. mi'nor metacar'peus,** abductor minimi digiti. **H. pol'licis,** abductor pollicis. **H. Riola'ni,** flexor parvus minimi digiti.

Hypothermal, hi-po-thur'mal (*hypo, therme,* heat). Moderately warm; tepid.

Hypothermic, hi-po-thur'mik (same etymon). Hypothermal; relating to depression of temperature, as of the body.

Hypothesis, hip-oth'es-is (*hypo,* under, *tithemi,* to place). Supposition; theory.

Hypotheton (hip-oth'et-on) or **Hypoth'etum** (*hypo, tithemi,* to place). Suppository.

Hypothymiama, hip-o-thim-e-am'ah. Fumigation.

Hypothymiasis, hip-o-thim-e-as'is (*hypo, thumiao,* to fumigate). Act of fumigation.

Hypo'tion or **Hypotium,** hip-o'she-um (*hypo, ous,* ear). Plaster applied behind or under the ear.

Hypotony, hi-pot'on-e (*hypo, tonos,* tone or tension). Diminished tone or tension, as within the eyeball.

Hypotrope, hip-ot'ro-pe (*hypo, trepo,* to turn). Relapse.

Hypotrophy, hip'ot-ro-fe (*hypo, trophe,* nourishment). Scanty nourishment or nutrition; atrophy.

Hypotropiasmus, hip-o-trop-e-az'mus (*hypo, trepo,* to turn). Relapse,

Hypotropic, hi-po-trop'ik (same etymon). Relapsing.

Hypotrygus, hip-ot'rig-us (*hypo, trux,* lees). Feculent.

Hypotympanic, hi-po-tim-pan'ik. Beneath the tympanum, as hypotympanic bone.

Hypourocrinia, hip-o-u-ro-krin'e-ah (*hypo, ouron,* urine, *krino,* to separate). Diminution of urinary secretion.

Hypourrhœa, hip-o-ur-rhe'a (*hypo, rheo,* to flow). Diminution of flow or of secretion of urine.

Hypouterotopia, hip-o-u-ter-o-top'e-ah (*hypo, uterus, topos,* place). Prolapse of the uterus.

Hypovenosity, hi-po-ve-nos'it-e. Defective venous supply, or defective development of the venous system.

Hypoxæmia, hip-o-ze'me-ah (*hypo,* oxygen, *haima,* blood). Deficient oxygenation of blood; asphyxia from defective oxygenation of blood.

Hypoxanthine, hi-po-zan'theen. $C_5H_4N_4O$. Leucomaïne of spleen, brain, muscles, marrow of bone, etc., occurring in leucocythæmia etc., in blood and

urine, in nuclein of pus and red corpuscles, in plants, seeds, etc. See *Leucomaines* (table).

Hypoxis (hip-oks'is) or **Hypoxys erecta**, hip-oks'is e-rek'tah (*hypo*, *oxus*, sharp). Stargrass; indigenous; root is eaten, and has been used as a vulnerary, and in chronic ulcers, ague, and low fevers.

Hypozo'a. Protozoa.

Hypozoma, hip-o-zo'mah (*hypo*, *zonnumi*, to bind round). Membrane or septum, as the mediastinum, diaphragm, etc.

Hypseloglossus, hip-sel-o-glos'sus. Basioglossus.

Hypsicephaly, hip-se-sef'al-e (*hupsos*, height, *kephale*, head). Having a high skull; having vertical index over 75.1°. Such head is said to be *Hypsicephal'ic.*

Hypsicranium, hip-se-kran'e-um (*hupsos*, height, *kranion*, cranium). Hypsicephaly; also measurement of cranium having ratio of length to height of 82.5° to 90.4°.

Hypsilodes (hip-sil-o'dees) **os** (Greek letter Υ). Hyoid bone.

Hypsiloglossus, hip-sil-o-glos'sus. Hyoglossus.

Hyp'siloid. Hyoid.

Hypsocephaly, hip-so-sef'al-e. Hypsicephaly.

Hypson'osos or **Hypsonosus**, hip-son'os-us (*hupsos*, height, *nosos*, disease). Mountain sickness, especially of S. America; puna.

Hypsophobia, hip-so-fo'be-ah (*hupsos*, height, *phobos*, fear). Dread of high places.

Hypsophonous, hip-so-fo'nus (*hupsos*, height, *phone*, voice). One having a clear high voice.

Hypsopisthius, hip-so-pis'the-us. Term applied to crania in which a line projected from hormion to lambda makes an angle with radius fixus of 33.5° to 41°.

Hypsosis, hip-so'sis. Sublimation; elevation, as of the arms.

Hyptiasma, hip-te-az'mah (*huptiazo*, to lie with the face upward). Supination.

Hyptiasmus, hip-te-az'mus. In a supine posture; inversion of the stomach, as in nausea or vomiting.

Hyp'tis. Plant of Brazil and Uruguay, genus Labiatæ. **H. capita'ta**, infusion of leaves of W. Indies, used as aromatic, as are also *H. ebracteata*, *H. radiata*, and *H. suaveolens*, all having the same habitat.

Hypulus, hip-u'lus (*hypo*, *oule*, cicatrix). Imperfectly cicatrized.

Hyraceum, he-ras'e-um. Evacuation from klipdas or hyrax capensis, or coney; in smell and medical properties resembling castor, and used in Cape Colony in nervous and spasmodic affections.

Hyrax capensis, he'raks kap-en'sis. Cape rabbit or badger. See *Hyraceum.*

Hysgine, his-je'na (*husginos*, scarlet). Scarlet fever.

Hyssop, his'sop. Hyssopus. **H., hedge**, Gratiola officinalis.

Hyssopin, his'sop-in. Salifiable base discovered in hyssop.

Hyssopites, his-sop-e'tees. Diuretic wine, of which hyssop was the chief ingredient.

Hyssopus, his-so'pus. Common hyssop; aromatic, stimulant, sudorific, and pectoral in the form of infusion. **H. officina'lis** or **officina'rum**, hyssopus.

Hystera, his'ter-ah. Uterus; secundines. The vulva. **H. diadel'pha**, double uterus.

Hysteralgia, his-ter-al'je-ah (*hystero*, *algos*, pain). Pain in the uterus; neuralgia of the uterus; irritable uterus. See *Metralgia.* **H. cancro'sa**, uterine pain due to cancer. **H. catarrha'lis**, H. from endometritis; metrorrheuma. **H. erethis'tica**, spasmodic uterine pain. **H. galac'tica**, phlegmasia alba dolens. **H. lochia'lis**, dyslochia. **H. menstrua'lis**, dysmenorrhœa. **H. rheumat'ica**, rheumatism of the uterus. **H. scirrho'sa**, H. cancrosa.

Hysteranesis, his-ter-an'es-is (*hystero*, *anesis*, relaxation). Relaxation of the uterus, especially of the fundus.

Hysterapopnixis, his-ter-ap-o-niks'is (*hystero*, *apo*, *pnigo*, to strangle). Nervous quinsy; globus hystericus. See *Angone.*

Hysteratresia, his-ter-at-ra'ze-ah (*hystero*, *atretos*, imperforate). Imperforation of the os uteri or cervix.

Hysterectomy, his-ter-ek'to-me (*hystero*, *ektome*, excision). Excision of the whole uterus; when through the abdominal wall, *abdominal hysterectomy;* when through the vagina, *vaginal hysterectomy.* **H., Cæsa'rean**, Porro's operation; oöphoro-hysterectomy or ovario-hysterectomy. Modification of the Cæsarean operation, the uterus and its contents and ovaries being removed, division being made through the cervix, and the stump clamped. In the Porro-Müller operation the uterus is drawn out through the abdominal incision, an elastic ligature placed around the cervix at the level of the internal os uteri, the uterus opened by incision, and the fœtus thus delivered.

Hysterelcosis, his-ter-el-ko'sis (*hystero*, *helkos*, ulcer). Ulceration of the uterus.

Hysterelosis, his-ter-el-o'sis (*hystero*, *eileo*, to turn). Hysteroloxia.

Hysteremphysema, his-ter-em-fe-ze'mah. Uterine tympanites. See *Physometra.*

Hysteria, his-te're-ah (*hustera*, uterus). *Vapors*, *Hysterics*, *Hysteric fit*, *Mother.* A species of neurosis, so called because reputed to have its seat in the uterus (hystera). The name *Oöphoria* has been applied to it under the belief that it is due to ovarian influences. It generally occurs in paroxysms, the chief characters of which consist in alternate fits of laughing and crying, with a sensation as if a ball—bolus hystericus—is ascending from the hypogastrium toward the stomach, chest, and neck, producing a sense of strangulation. There are sometimes loss of consciousness (although the presence of consciousness generally distinguishes it from epilepsy) and convulsions. Hysteria appears to depend upon irregularity of nervous distribution in very impressible persons, and is not confined to women; well-marked cases are occasionally met with in men. No lesion of the central nervous system has been discovered. During the fit dashing cold water on the face, stimulants applied to the nose or exhibited internally, and antispasmodics form the therapeutical agents. Exercise, tranquillity of mind, and agreeable occupations are prophylactics. Chronic paroxysmal cough—hysterical cough—frequently occurs, seeming to be a convulsion of the muscles of the larynx and diaphragm, resembling the cough excited by inhalation of chlorine and other gases. See *Mania, dancing.* **H. catalep'tica**, catalepsy. **H., cer'ebral**, form of hysteria simulating cerebral disease or apoplexy. **H., epilep'tiform** or **epilep'toid**, hystero-epilepsy. **H. major**, hystero-epilepsy. **H. va'ga**, hysteria.

Hysterias (his-ter'e-as) or **Hysteriasis**, his-ter-e'asis. Hysteria.

Hyster'ic. Hysterical. **H. au'ra**, aura accompanying hysteria. **H. globe**, see *Hysteria* and *Globus hystericus.* **H. insan'ity**, mania, hysterical. **H. nail**, clavus hystericus. **H. pas'sion**, hysteria. **H. spasm**, hysteria.

Hysterica, his-ter'ik-ah. Female affected with nymphomania or with strong sexual desires.

Hysterical, his-ter'ik-al. Vaporish; vaporing; relating to or affected with hysteria. **H. chore'a**, see *Chorea.* **H. cough**, see *Hysteria.*

Hystericism, his'ter-i-sizm. Group of special physical and mental phenomena characteristic of hysteria.

Hystericœdema, his-ter-is-e-de'mah. Hysterical œdema; phantom tumor.

Hysterics, his-ter'iks. Popular name for an attack of hysteria.

Hysteriencephalitis, his-ter-e-en-sef-al-e'tis. Form of inflammation of the brain said to occur after repeated attacks of hysteria.

Hysteriform (his'ter-i-form). Resembling hysteria.

Hyste'rioid. Hysteriform.

Hysterionica (his-ter-e-on'ik-ah) or **Hysteron'ica.** Plant indigenous in Chile; used in affections of the stomach and bowels and of the air-passages, and in cystitis.

Hysteriotomy, his-ter-e-ot'o-me. Hysterotomy.

Hysterism, his'ter-ism. Hystericism; hysteria.

Hysterites, his-ter-e'tees. Hydrometra.

Hysteritis, his-ter-e'tis. Inflammation of the womb.

Hystero, his'ter-o. In composition, uterus.

Hysterobubonocele, his-ter-o-bu-bon-o-se'le (Eng. his-ter-o-bu-bon'o-seel) (*hystero, bubonocele,* inguinal hernia). Inguinal hernia involving the uterus.

Hysterocarcinoma, his-ter-o-kar-sin-o'mah. Carcinoma of the uterus.

Hysterocatalepsy, his-ter-o-kat'al-ep-se. Hysteria complicated with catalepsy.

Hysterocele, his-ter-o-se'le (Eng. his'ter-o-seel) (*hystero, kele,* hernia). Hernia of the womb, a rare disease. The womb may protrude through the inguinal or the crural canal, or through the lower part of the linea alba. **H. nu'da,** prolapsus uteri.

Hysterochloasma, his-ter-o-klo-az'mah. Chloasma dependent upon uterine disease.

Hysterocleisis, his-ter-o-kli'sis (*hystero, kleisis,* occlusion). Jobert's operation for occlusion in vesico-vaginal fistula by suture of the lips of the womb.

Hysterocnesmus, his-ter-o-nes'mus (*hystero, knesma,* itching). Pruritus of the uterus or genitals.

Hysterocolic, his-ter-o-kol'ik. Uterine colic. See *Colica uterina.*

Hysterocran'ion or **Hysterocranium,** his-ter-o-kran'e-um (*husteros,* behind, *kranion,* cranium). Occiput.

Hysterocyesis, his-ter-o-se-a'sis (*hystero, kuo,* to be pregnant). Uterine pregnancy.

Hysterocystic, his-ter-o-sis'tik (*hystero, kustis,* bladder). Relating to the uterus and bladder.

Hysterocystocele, his-ter-o-sis-to-se'le (Eng. his-ter-o-sis'to-seel) (*hystero, kustis,* bladder, *kele,* tumor). Hernia of the uterus complicated with displacement of the bladder.

Hysterocystokleisis, his-ter-o-sis-to-kli'sis (*hystero, kustis,* bladder, *kleisis,* occlusion). Bozeman's operation for turning the cervix of the uterus into the bladder in vesico-utero-vaginal fistula.

Hysterodemonopathy, his-ter-o-de-mon-op'ath-e. Demonomania of hysterical women.

Hysterodynamometer, his-ter-o-di-nam-om'et-ur (*hystero, dunamis,* power, *metron,* measure). Instrument or apparatus for measuring the force of uterine contractions.

Hysterodynia, his-ter-o-din'e-ah (*hystero, odune,* pain). Hysteralgia.

Hysterœdema, his-ter-e-de'mah (*hystero, oidema,* swelling). Hydrometra.

Hystero-ephelkosis, his'ter-o-ef-el-ko'sis (*hystero, epi,* upon, *helko,* to draw). Bozeman's operation of drawing down the uterus to assist in closing fissures or ruptured septa.

Hystero-epilepsy, his'ter-o-ep'il-ep-se. Hysteria complicated with epileptiform convulsions and other nervous phenomena; oöphoro-epilepsy of the female.

Hys'tero-epileptog'enous. Producing hysteria and epilepsy. **H.-e. points,** foci of hyperæsthesia in hystero-epilepsy.

Hysterogenic, his-ter-o-jen'ik (*hystero, gennao,* to produce). Producing hysteria. In susceptible persons local pressure will sometimes produce hysterical symptoms. **H. zones,** foci of hyperæsthesia in hystero-epilepsy.

Hysteroid (his'ter-oid) or **Hysteroid'al** (*hysteria, eidos,* resemblance). Resembling hysteria.

Hysterokleisis, his-ter-o-kli'sis. Hysterocleisis.

Hysterolaparotomy, his-ter-o-lap-ar-ot'o-me (*hystero, lapara,* flanks, *tome,* incision). Removal of the uterus by incision through the abdomen; abdominal hysterectomy.

Hysterolith, his'ter-o-lith (*hystero, lithos,* stone). Calculus of the uterus.

Hysterolithiasis, his-ter-o-lith-e'as-is (same etymon). Formation of uterine calculus.

Hysterology, his-ter-ol'o-je (*hystero, logos,* description). Treatise on, or anatomy of, the uterus.

Hysteroloxia, his-ter-o-loks'e-ah (*hystero, loxos,* oblique). Oblique position of the uterus occurring during pregnancy; anterior anteversion of the uterus and posterior retroversion of that organ are varieties of it.

Hysteroma, his-ter-o'mah. Fibrous tumor.

Hysteromalacia (his-ter-o-mal-as'e-ah) or **Hysteromalaco'ma** (*hystero, malakia,* softness). Softening of the uterus, especially during pregnancy, rendering it liable to rupture in labor.

Hysteromalacosis, his-ter-o-mal-ak-o'sis (same etymon). Production of hysteromalacoma.

Hysteromania, his-ter-o-man'e-ah. Hysterical mania dependent upon irritation of the uterus or ovaries; oöphomania; nymphomania.

Hysterometer, his-ter-om'et-ur (*hystero, metron,* measure). Uterine sound.

Hysterom'etry. Measurement of the uterus.

Hysteromochlion (his-ter-o-mok'le-on) or **Hysteromochlium,** his-ter-o-mok'le-um (*hystero, mochlion,* lever). Lever; vectis.

Hysteromorphous, his-ter-o-morf'us (*hystero, morphe,* shape). Having shape of the uterus.

Hysteromyoma, his-ter-o-me-o'mah. Myomatous tumor of the uterus.

Hysteromyomectomy, his-ter-o-mi-om-ek'to-me (*hystero, myoma, ektome,* excision). Excision of the whole or a considerable portion of the uterus above the vagina for myoma.

Hysteromyotomy, his-ter-o-mi-ot'o-me (*hystero, myoma, tome,* incision). Incision or excision of myomatous tumor of the uterus, or of the uterus for removal of a solid tumor.

Hys'teron (*husteros,* later). Placenta.

Hysteroncus, his-ter-on'kus (*hystero, onkos,* tumor). Tumor or swelling of the uterus.

Hysteroneurosis, his-ter-o-nu-ro'sis. Neurosis or nervous affection dependent on uterine irritation.

Hystero-oöphorectomy (his'ter-o-o-of-or-ek'to-me) or **Hys'tero-ovariot'omy** (*hystero, oöphoros,* egg-bearing, for *ovarium,* ovary, *ektome,* excision). Operation for excision of the uterus and ovaries. **H.-o., Cæsa'rean,** Porro or Porro-Müller operation; see *Hysterectomy.*

Hysteroparalysis, his-ter-o-par-al'is-is. Paralysis of the uterus.

Hysteropathia, his-ter-o-path-e'ah (*hystero, pathos,* affection). Hysteropathy. Disease or suffering in the uterus. Hysteria. Deuteropathia.

Hysterop'athy. See *Hysteropathia.*

Hysteropexy, his-ter-op'eks-e (*hystera, pexis,* fixation). Operation for fixation of the uterus by suture to the anterior wall of the abdomen.

Hysterophore, his'ter-o-for (*hystero, phero,* to bear). Form of pessary consisting of two oval metal plates united by a hinge and approximated by metallic rods.

Hysterophyma, his-ter-o-fe'mah (*hystero, phuma,* swelling). Tumor of the uterus.

Hysteroph'ysa, Hysteroph'yse, or **Hysterophyse'ma** (*hystero, phuse,* wind). Distension of the uterus with air; physometra.

Hysteroplas'ma (*hystero, plasma,* formation). Model of the uterus for demonstration in study or teaching.

Hysteroplegia, his-ter-o-plej'e-ah (*hystero, plege,* stroke). Paralysis of the uterus.

Hysteropnix, his'ter-o-niks (*hystero, pnix,* suffocation). Angone; globus hystericus.

Hysteropolypus, his-ter-o-pol'ip-us. Polypus of the uterus.

Hysteropsellismus, his-ter-o-sel-liz'mus (*husteros,* behind, *psellismos,* stammering). Stammering due to laryngeal spasm.

Hysteropsophia, his-ter-o-sof'e-ah (*hystero, psophos,* sound). Physometra; escape of air from the uterus.

Hysteropsychosis, his-ter-o-se-ko'sis. Disordered intellectual condition sympathetic with uterine irritation.

Hysteroptosis, his-ter-o-to'sis (*hystero, ptosis,* fall). Prolapse of the uterus; inversion of the uterus. Protrusion of any part of the genital organs or of excrescences from them into the genital passages. Inversion of the uterus. Falling of the womb. **H. vagi'næ,** prolapsus vaginæ.

Hysterorrhagia, his-ter-or-rhaj'e-ah (*hystero, rheg-*

numi, to break forth). See *Metrorrhagia*. **H. sanguin'ea**, metrorrhagia.

Hysterorrhaphy, his-ter-or'rhaf-e (*hystero*, *rhaphe*, suture). Operation for opening the uterus and then closing it with suture, as after Cæsarean operation; hysteropexy.

Hysterorrhexis, his-ter-or-rheks'is (*hystero*, *rhexis*, rupture). Rupture of the uterus.

Hysterorrhœa, his-ter-or-rhe'ah (*hystero*, *rheo*, to flow). Discharge from the uterus. See *Metrorrhagia*. **H. muco'sa**, leucorrhœa.

Hysterorrhoischesis, his-ter-or-rho-isk'es-is (*hystero*, *rheo*, to flow, *schesis*, retention). Stoppage of uterine discharge.

Hysterosal'pinx (*hystero*, *salpinx*, trumpet). Fallopian tube.

Hysteroscirrhus, his-ter-o-skir'rus. Scirrhus of the uterus.

Hysteroscope, his'ter-o-skope (*hystero*, *skopeo*, to view). Metallic mirror for inspecting the state of the os uteri, throwing light to the bottom of a speculum uteri.

Hysterospasm, his'ter-o-spasm (*hystero*, *spasmos*, spasm). Spasm of the uterus; hysterical spasm.

Hysterostoma, his-ter-os'to-mah (*hystero*, *stoma*, mouth). External os uteri.

Hysterostomatome, his-ter-o-stom'a-tome (*hysterostoma*, external os uteri, *tome*, incision). Instrument for dividing the os or cervix uteri when it is important to deliver immediately, as in case of convulsions. The operation is called *Hysterostomatotomy*. See *Hysterotomus*.

Hysterostom'ium (*hystero*, *stoma*, mouth). Os uteri.

Hysterosynizesis, his-ter-o-sin-iz-a'sis (*hystero*, *synizesis*, sitting together). Adhesion of the uterus to a neighboring organ; occlusion of the uterus.

Hysterotokot'omy (*hystero*, *tokos*, parturition, *tome*, section). Cæsarean section.

Hysterotome, his'ter-o-tome (*hystero*, *tome*, section). See *Hysterotomus*.

Hysterotomotocia (his-ter-o-to-mo-to'she-ah) or **Hysterotomotokia**, his-ter-o-to-mo-tok'e-ah (*hystero*, *tome*, section, *tokos*, parturition). Cæsarean section.

Hysterotomus, his-ter-ot'om-us (*hystero*, *tome*, section). Hysterotome, metrotome, uterotome; instrument for dividing the womb through the vagina; a kind of bistouri caché, intended to divide the cervix and os uteri. Hysterostomatome.

Hysterotomy, his-ter-ot'o-me. Cæsarean section; dissection of the uterus; division of the cervix uteri. **H., abdom'inal**, Cæsarean section. **H., Cæsa'rean**, Cæsarean section. **H., vagi'nal**, incision of the uterus through the vagina.

Hysterotrachelorraphy, his-ter-o-trak-el-or'rhaf-e (*hystero*, *trachelos*, neck, *rhaphe*, suture). Operation for laceration of the cervix by freshening the edges of the wound and bringing them in apposition; Emmet's operation. See *Emmet*.

Hysterotrachelotomy, his-ter-o-trak-el-ot'o-me (*hystero*, *trachelos*, neck, *tome*, incision). Incision of the cervix uteri.

Hysterotraumatism, his-ter-o-trau'ma-tizm (*hystero*, *trauma*, wound). Hysteria following injury.

Hysterotrismus, his-ter-o-triz'mus (*hystero*, *trizo*, to gnash the teeth). Spasmodic contraction of the uterus, especially of its mouth.

Hysterum, his'ter-um. Hysteron.

Hystremphysema, his-trem-fe-ze'mah. Physometra.

Hystriasis (his-tre'as-is) or **Hystriciasis**, his-tris-e'as-is (*hustrix*, hedgehog or porcupine). Porcupine disease; disease of the hairs in which they stand erect like the quills of the porcupine; trichosis sitosa; ichthyosis hystrix.

Hystricism, his'tre-sizm. Ichthyosis hystrix.

Hystrix, his'triks. Ichthyosis hystrix.

I.

Iama, e-am'ah (remedy). Medicament; cure.

Iamatology, e-am-at-ol'o-je (*iama*, *logos*, discourse). Materia medica and therapeutics.

Iamatosyntaxiologia, e-am-at-o-sin-taks-e-o-loj'e-ah (*iama*, *suntaxis*, arrangement, *logos*, discourse). Science of prescribing. See *Prescription*.

Iamatosyntaxis, e-am-at-o-sin-taks'is. Preparation of medicines. See *Composition*.

Iamatotaxiologia, e-am-at-o-taks-e-o-loj'e-ah. See *Prescription*.

Iasimus, e-as'im-us (*iasimos*, curable). Curable.

Iasis, e-as'is (*iasis*, cure). Curation; mode of treatment.

Iater, e-at'ur. Physician.

Iateria, e-at-a're-ah. Medicine; therapeutics.

Iaterius, e-at-a're-us. Medicinal.

Iatoria, e-at-o're-ah. Therapeutics.

Iatos, e'at-os. Curable.

Iatraleiptes, e-at-rah-leip'tees. Iatraleptes.

Iatraleiptic, e-at-rah-leip'tik. See *Iatraleiptice*.

Iatraleiptice (e-at-rah-leip'te-se) or **Iatralip'tice** (*iatro*, *aleipho*, to anoint). Iatraleiptic or iatraliptic method. Method of treating diseases adopted by the Iatraleptes—that is, by friction chiefly.

Iatraleptes (e-at-rah-lep'tees), **Iatraliptes** (e-at-rah-lip'tees), **Iatralip'ta**, or **Iatraleip'tes** (same etymon). One who treats diseases by unguents, frictions, and external means generally.

Iatraleptic, e-at-rah-lep'tik. See *Iatraleiptice*.

Iatraliptic (e-at-rah-lip'tik) **meth'od**. Iatraleiptice.

Iatraliptice, e-at-rah-lip'te-se. Iatraleiptice.

Iatraliptics, e-at-rah-lip'tiks. Iatraleiptice.

Iatreia, e-at-ri'ah. Medical treatment.

Iatreion (e-at-ri'on), **Iatreium** (e-at-ri'um), **Iat'reon**, or **Iat'reum**. Physician's office; cost of medical attendance.

Iatreusiology, e-at-ru-se-ol'o-je (*iatreusis*, exercise of art of healing, *logos*, description). Science of the exercise of the healing art.

Iatreusis, e-at-ru'sis. Exercise of the healing art.

Iatria, e-at-re'ah. Medicine or medical treatment. Female medical practitioner.

Iatric, e-at'rik. Medical. Fourth or ring-finger.

Iatrice, e-at'ris-e. Medical treatment.

Iatrine, e-at-re'ne. Woman practitioner of medicine; doctress; midwife.

Iatrion, e-at-re'on. House or office of a physician or surgeon. Physician's fee or honorarium.

Iatrochemia (e-at-ro-kem-e'ah) or **Iatrochymi'a**. Medical chemistry.

Iatrochemist, e-at-ro-kem'ist. Physician with preference for, or special knowledge of, chemistry.

Iatrognomonica, e-at-ro-nom-on'ik-ah (*iatros*, *gignosko*, to know). Knowledge of medical objects or properties of remedies.

Iatroleiptes, e-at-ro-leip'tees. Iatraleptes.

Iatrology, e-at-rol'o-je (*iatros*, *logos*, description). Treatise on physic or physicians. Science of medicine.

Iatromantia, e-at-ro-man-te'ah (*iatros*, *manteia*, divination). Divination by drugs.

Iatromantis, e-at-ro-man'tis (*iatros*, *manteia*, divination). Physician who is a soothsayer.

Iatromathematical (e-at-ro-math-e-mat'ik-'l) **physicians**. Physicians believing that mathematics is the basis of medicine, who flourished about the middle of the seventeenth century. Borelli was the founder of the sect.

Iatromechanical, e-at-ro-mek-an'i-kal. Iatromathematical.

Iatron, e-a'tron. Iatrion.

Iatrophysics, e-at-ro-fis'iks. Medical physics.

Iatros, e-at'ros. Physician or surgeon.

Iatrosophist, e-at-ro-sof'ist (*iatros*, *sophistes*, one skilled in art or science). A learned or thoroughly educated physician.

Iatrotechna (e-at-ro-tek'nah) or **Iatrotech'nes** (*iatros*, *techne*, art). Practical physician or surgeon.

Iatrotechnice (e-at-ro-tek'nis-e) or **Iatrotechnics**, e-at-ro-tek'niks. Art of medicinal therapeutics.

Iatrus, e-at'rus. Physician or surgeon.

Iberis, ib-e'ris. Lepidium iberis. **I. ama'ra**, *Wild* or *Bitter candytuft*, *Clown's mustard*, *Sciatica cress*, from Iberia, where it is indigenous. Small herbaceous plant, indigenous in Europe; acronarcotic, and also employed in gout, rheumatism, etc. The seeds have been used in asthma, bronchitis, and dropsy. **I. bur'sa pasto'ris**, Thlaspi bursa. **I. campes'tris**, Thlaspi campestre. **I. semperflo'rens**, broad-leaved and purple annual candytuft of S. Europe. Seeds are diuretic and expectorant. **I. sophi'a**, Cardamine pratensis.

Ibicuiba, ib-e-ku-e'bah. *Becuiba*, *Becuiba nut*. Brazilian nut, the emulsive kernel of which is balsamic.

Ibis, i'bis. Bird held sacred by the Egyptians. When sick, it was wont to inject the water of the Nile into its fundament; whence, according to Langius, was learned the use of glysters.

Ibischa mismalva (ib-is'ka mis-mal'vah) or **Ibiscus**, ib-is'kus. Althæa.

Ibixu'ma. Saponaria.

Icaja. Ordeal poison of Africa, poisonous alkaloid from which, called *Icajin*, somewhat resembles brucine. See *Akazga*.

Ice. Frozen water. Iced water is much used internally, as the best refrigerant in fever and to check nausea; also applied externally in internal inflammations, as well as in phrenitic and hernial affections, etc., in the form of the ice cap, ice cataplasm, ice compress, or ice poultice, formed by half filling a bladder or rubber bag with pounded ice.

Ice'land moss. Lichen islandicus or Cetraria islandica.

Ice'plant. Mesembryanthemum crystallinum; Monotropa uniflora; tetragonia.

Ichnocarpus (ik-no-karp'us) **Afzel'lii** or **frutes'cens**. Species of genus Apocynaceæ, growing in India and Ceylon; alterative and cathartic.

Ichnos, ik'nos. Foot; sole of the foot; heel.

Ichor, ik'or. Serum of the blood; thin, aqueous, and acrid discharge; corrupted humor; pus.

Ichorhæmia (ik-or-he'me-ah) or **Ichoræ'mia**. Ichorrhæmia.

Ichoroïdes, ik-or-o-e'dees (*ichor*, *eidos*, resemblance). Ichorous.

Ichorous, ik'or-us. Belonging to or resembling ichor.

Ichorrhæmia, ik-or-rhe'me-ah (*ichor*, *haima*, blood). Constitutional effects of absorption of septic matters in the circulation. See *Pyæmia* and *Septæmia*.

Ichorrhœa, ik-or-rhe'ah (*ichor*, *rheo*, to flow). Ichorous discharge.

Ichthiasis, ik-the'as-is. Ichthyosis.

Ich'thin or **Ich'thidin**. Albuminous matter obtained from fishes.

Ichthya, ik'the-ah (fish-hook). Blunt hook.

Ichthyiasis, ik-the-e'as-is. Ichthyosis.

Ichthyo, ik'the-o (*ichthus*, fish). In composition, fish.

Ichthyocolla, ik-the-o-kol'lah (*ichthyo*, *kolla*, glue). Isinglass, fishglue; dried swimming-bladder or sound of acipenser huso and other species of fish, which is almost wholly composed of gelatin, and is employed in medicine in the formation of nutritive jellies, and occasionally in anatomical injections. English court-plaster is made with it. In Russia isinglass is also obtained from Siluris glanis.

Ichthyoid, ik'the-oid. Fish-like, as ichthyosis.

Ichthyol, ik'the-ol (*ichthus*, fish, *oleum*, oil). Ammonium sulpho-ichthyolate; clear, yellowish-brown oil distilled from bituminous shale in which are semi-

fossilized remains of fishes, in the Tyrol especially. It contains 3 to 10 per cent. of sulphur. It is anodyne, astringent, tonic to the stomach and kidneys, and resolvent; used externally in rheumatism, gynecology, skin diseases, erysipelas, ulcers, gout, etc., and as a discutient. It is combined, for external use, with lanolin, olive oil, glycerin, collodion, chloroform, etc. The dose internally is 2 to 4 minims.

Ichthyology, ik-the-ol'o-je (*ichthus,* fish, *logos,* description). Description of fishes.

Ichthyoph'agi or **Ichthyophagists,** ik-the-of'a-jists (*ichthyo, phago,* to eat). People who feed habitually on fish.

Ichthyophagous, ik-the-of'a-gus. Fish-eating.

Ichthyophagy, ik-the-of'a-je. Habitual eating of fish.

Ichthyosis, ik-the-o'sis (*ichthus,* fish, from resemblance of the scales to those of a fish). Porcupine disease, fish-skin disease; permanently harsh, dry, scaly, and, in some cases, almost horny texture of the integuments of the body from thickening of the epidermis and elongation of the papillæ, unconnected with internal disorder; it usually occurs in very early life. **I. congen'ita,** congenital form of the disease, with thickened corneous plates; usually soon fatal. **I. cor'nea,** I. with thick, horny scales. **I. fa'ciei,** seborrhœa oleosa; I. hystrix; cornu cutaneum. **I. fœta'lis,** I. congenita. **I. follicula'ris,** I. characterized by prominent adherent horny elevations, somewhat like lichen pilaris. **I. hys'trix,** true porcupine disease with horny spines; I. cornea. **I., intra-u'terine,** I. congenita. **I. lin'guæ,** fissured tongue, with hypertrophied papillæ, often syphilitic; leucoplakia buccalis. **I. ni'gricans,** form of i. with blackish scales. **I. nit'ida,** form of the disease having pearl-like scales. **I. pel'lagra,** pellagra. **I. sauroder'ma,** form of i. simplex like lizard-skin. **I. seba'cea,** sebaceous ichthyosis; seborrhœa; morbid incrustation of a concrete sebaceous substance—seborrhœa—upon the surface of the epidermis, confounded with ichthyosis, to which it bears a close resemblance. **I. serpenti'na,** I. of the extremities particularly, resembling scales of a serpent. **I. sim'plex,** form of i. devoid of constitutional disturbance; xeroderma. **I. spu'ria,** I. sebacea. **I. stria'ta,** form of i. with separation of large masses of scales. **I. ve'ra,** xeroderma ichthyoïdes. **I. vul'væ,** elephantiasis of the vulva.

Ichthyosma, ik-the-oz'mah (*ichthyo, osme,* smell). Sarcophyte.

Ichthyosul'phonate. Combination of ichthyol and sulphonic acid. **I. of so'dium, lith'ium, mer'cury,** and **zinc** are used as substitutes for ichthyol when it is desirable to give the latter in pill form.

Ichthyotomy, ik-the-ot'o-me (*ichthyo, tome,* incision). Dissection or anatomy of fishes.

Ichthyotoxicum, ik-the-o-toks'ik-um (*ichthyo, toxicon,* poison). Fish-poison.

Ichthysmus, ik-thiz'mus. Poisoning from eating fish.

Icica aracouchini. Aracouchini balsam, extracted by incision from this tree in Guiana; used for healing wounds. **I. caran'na,** tree of New Granada yielding gum caranna. **I. heptaphyl'la,** incense-wood of Guiana, resin from which, called ashyana or hyawa, is used for dysentery, bronchitis, and gonorrhœa. **I. heterophyl'la,** Icica aracouchini. **I. icicariba,** see *Amyris elemifera.*

Icmakratia, ik-mak-rat-e'ah (*ikmas,* moisture, *akratia,* impotence). Asthenic state of the fluids of the body.

Icon'oscope (*eikon,* an image, *skopeo,* to see). Instrument for checking binocular parallax; the reverse of a telestereoscope.

Icterencephalotyphus, ik-ter-en-sef-al-o-ti'phus (*ikteros,* jaundice, *enkephalos,* brain, *typhus*). Typhus fever with marked cerebral symptoms and jaundice.

Icterepati'tis or **Icterhepatitis,** ik-ter-hep-at-e'tis (*ikteros,* jaundice, *hepatitis,* inflammation of liver). Inflammation of liver complicated with jaundice.

Icter'ic. Relating to or resembling icterus; affected with jaundice; remedy for jaundice.

Icteri'cia or **Icteritia,** ik-ter-ish'e-ah. Icterus. **I. al'ba,** chlorosis. **I. fla'va,** icterus. **I. ru'bea** or **ru'bra,** erysipelas.

Icteritious, ik-ter-ish'us. Yellowish, as in jaundice.

Icterode. Icteric; jaundiced.

Icteroid, ik'ter-oid. Resembling jaundice.

Icterophthi'sis. Tuberculosis combined with jaundice.

Icterus, ik'ter-us (*ikteros,* with the ancients a yellow bird, perhaps the oriole). *Bilious dyscrasy, Jaundice, Yellows, Janders, Jaunders.* The principal symptom is yellowness of the skin and eyes, with white fæces and high-colored urine, caused by obstruction of the course of the bile, so that it is taken into the mass of the blood, producing the yellowness of surface. The bile being separated by the kidneys causes yellowness of urine, and its being prevented from reaching the intestine occasions the pale-colored fæces. The treatment is simple: an emetic or purgative given occasionally, so as to solicit the return of the bile to its ordinary channels; light tonics; unirritating diet, etc. **I. al'bus,** chlorosis. **I. atax'icus,** severe and often fatal form, generally due to acute yellow atrophy of liver. **I., black,** jaundice with blackness of skin; melæna; melæmia. **I., blood,** I., hæmatogenous. **I. cæru'leus,** blue jaundice; cyanopathy. **I., catar'rhal,** jaundice consequent on cholecystitis, catarrh of the gall-ducts from hyperæmia, irritation from abnormal bile, etc. **I. chol'icus,** I., hepatogenous. **I., feb'rile,** Weil's disease. **I. fla'vus,** jaundice. **I. gravida'rum,** jaundice of pregnant women; I. from puerperal septicæmia. **I. gra'vis,** I. ataxicus. **I., hæmatogen'ic** or **hæmatog'enous,** jaundice due to abnormal secretion of bile or coloring matter of bile in the blood, or to accumulation of reabsorbed bile. **I., hepat'ic, hepatogen'ic,** or **hepatog'enous,** jaundice due to retention of bile, or its reabsorption in the liver from obstruction to its outlet into the intestines. **I. infan'tum,** yellow gum, yellow gown; affection frequently dependent upon obstruction of the choledoch duct by the meconium; it requires time, and castor oil occasionally. **I. malig'nus,** I. ataxicus. **I., mechan'ical,** I., hepatogenous. **I. me'las,** black jaundice; melæna. **I. muco'sus,** I. from presence of inspissated mucus. **I. neonato'rum,** I. infantum. **I. ni'ger,** I., black. **I. of obstruc'tion,** I., hepatogenous. **I., pernic'ious,** I. gravis. **I., red,** erythema. **I. of reten'tion,** I., hepatogenous. **I. saturni'nus,** lead jaundice; earthy-yellow hue in saturnine cachexy. **I., traumat'ic,** I. due to injury of intestines. **I., ty'phoid,** I. gravis. **I. vir'idis,** green jaundice; icterus when the skin is of a green or olive hue.

Ictodes fœtidus, ik-to'dees fe'tid-us. Dracontium fœtidum; symplocarpus.

Ictus, ik'tus (a stroke or blow). Blow or stroke, as *I. solis,* stroke of the sun, coup-de-soleil. Pulsation of an artery; sting of a bee or other insect; stab. **I. cor'dis,** impulse of the heart. **I. cor'dis et arteria'rum,** pulse. **I. epilep'ticus,** epileptic attack. **I. san'guinis,** apoplexy. **I. so'lis,** sunstroke.

Ide'a. Mental conception or representation of an object. **I., automat'ic,** idea arising without any provocation or suggestion from without. **I. chase,** mental state, as in acute mania, in which ideas come so rapidly that they seem to chase one another. **I., fixed,** persistent monomania on one fixed subject.

Ideal, i-de'al. Mental, notional, fancied. **I. diseases,** diseases of the imagination.

Ideales, id-e-al'ees. Affections of the mental faculties.

Ideation, i-de-a'shun. Cerebration. Establishment of a distinct mental representation or idea of an object. *Ideational insanity* is unsoundness of mind exhibited in delusions and mental alienation.

Iden'tical points. Points in the retinæ of both eyes which correspond.

Ident'ist. One who considers the virus of gonorrhœa and of hard and soft chancre to be one and the same.

Ideo-dynamic, id'e-o-dy-nam'ik. Ideo-motor.

Ideology, i-de-ol'o-je (*idea, logos,* discourse). Science of the mind; intellectual philosophy.

Ideomotor, id-e-o-mo'tor. Muscular movement resulting from complete engrossment by an idea which is automatic, although originating in the cerebrum. **I. cen'tre,** portion of gray matter which originates movements.

Ideopegma, id-e-o-peg'mah (*idea, pegnumi,* to fasten). Fixed idea.

Ideophrenia, id-e-o-fren'e-ah (*idea, phren,* mind). Disordered intellect.

Ideophrenic. See *Idiophrenic.*

Ideoplastic. Term to denote that stage of hypnotism when suggestion becomes action.

Ideosynchysis, id-e-o-sin'kis-is (*idea, sunchusis,* confusion). Delirium.

Idiacoroïris, id-e-ak-or-o-e'ris (*idios,* one's own, *kore,* pupil, *iris*). Formation of artificial pupil.

Idiapocausis, id-e-ap-o-kau'sis (*idio, apokausis,* burning). Spontaneous combustion.

Idiempre'sis (*idios,* one's own, *empresis,* combustion). Spontaneous combustion or inflammation.

Idio, id'e-o. In composition, proper, peculiar.

Idiocra'sia or **Idioc'rasis** (*idio, krasis,* mixture). Idiosyncrasy.

Idioctonia, id-e-ok-ton'e-ah (*idio, ktonos,* murder). Suicide.

Idiocy, id'e-o-se. Idiotcy; fatuity. Species of unsound mind characterized by more or less complete obliteration of the intellect and moral faculties. It may supervene on mania and melancholia, when it is termed dementia, but commonly depends upon original conformation. It may be symptomatic of organic disease of the brain which has come on after birth. It may commence during fœtal life, or result from wound or injury during or after birth; from chorea or epilepsy, from hydrocephalus, from faulty conformation, as hypertrophy or macrocephalia or microcephalia; or the heads may be plagiocephalic or scaphocephalic. The physiognomy is usually vacant, step unsteady, articulation imperfect. Idiocy is almost always incurable, but may often be palliated. **I., developmen'tal,** I. from arrest of brain-development. **I., epilep'tic,** I. having epilepsy as its cause. **I., hypertroph'ic,** I. due to hypertrophy of the brain. **I., plagio-cephal'ic,** I. due to malposition or malformation of the bones of the face or skull. **I., traumat'ic,** I. from external injury.

Idiometritis, id-e-o-met-re'tis (*idio, metra,* uterus. Parenchymatous inflammation of the uterus.

Idiomiasma, id-e-o-me-az'mah (*idios,* personal, *miasma,* contagion). Personal miasm; effluvia from decomposition of matter derived from the human body.

Idiomuscular contractions, id-e-o-mus'ku-lar kontrak'shuns (*idios,* one's own, *musculus*). Muscular contraction due to direct blows when other means are ineffective.

Idioneurosis, id-e-o-nu-ro'sis. Simple neurosis without structural change.

Idiopathia, id-e-o-path-e'ah (*idio, pathos,* affection). Primary disease; one not depending on any other.

Idiopathic, id-e-o-path'ik. Primary affections and their symptoms are so denominated—idiopathic fever, for example.

Idiop'athy. Idiopathia.

Idiophrenic, id-e-o-fren'ik (*idios, phren,* mind). Term applied to that form of insanity which is a result of cerebral disease.

Id'ioplasm. That part of protoplasm which has the power of transmitting personal peculiarities to the offspring.

Id'iopt (same etymon). One who is color-blind.

Idioptcy, id-e-opt'se (*idio, opsis,* vision). Color-blindness.

Idiospasm, id'e-o-spazm. Localized spasm.

Idiosyncrasia, id-e-o-sin-kraz'e-ah. Idiosyncrasy. **I. hæmorrhag'ica,** hæmatophilia. **I. olfacto'ria,** perversion of sense of smell; parosmia.

Idiosyncrasy, id-e-o-sin'kras-e (*idio, sun,* with, *krasis,* mixture). Peculiarity of constitution in which one person is affected by an agent which in numerous others might produce no effect. Thus, shellfish produce urticaria in some; others faint at the sight of blood, etc.

Idiot, id'e-ot (*idiotes,* ignorant person). One who is fatuous or does not possess sufficient intellectual faculties for the social condition. In law, one who has been without understanding from his birth, and whom the law presumes to be never likely to attain any. **I., cre'tinoid,** cretin.

Idiotcy, id'e-ot-se. Idiocy.

Idiotia, id-e-ot-e'ah. Idiocy. **I. endem'ica,** cretinism.

Idiot'ic. Affected with idiocy.

Idiotism, id'e-ot-izm. Idiocy.

Idiotismus, id-e-ot-iz'mus. Idiocy. **I. endem'icus,** cretinism.

Idiotropia, id-e-o-trop'e-ah (*idio, trepo,* to turn). Idiosyncrasy.

Ido'lum (*eidolon,* idea). Hallucination.

Id'os. Sweating.

Idroman'ia (*idro* for *hydro*). Mania for suicide by drowning.

Idrosadenitis, id-ros-ad-en-e'tis. See *Hidrosadenitis.*

Idrosis, id-ro'sis (*hidros,* sweat). Ephidrosis.

Idrotadenoma, id-rot-ad-en-o'mah. See *Hydrosadenitis.*

Idus, id'us. Sweat.

Ietrion, e-et-re'on. Iatrion.

Igasuria (ig-as-u're-ah) or **Igasurine,** ig-as-u'rin). Alkaloid from nux vomica, found in the mother-waters from which strychnia and brucia have been precipitated. It is less powerful than strychnia, but more so than brucia.

Igasuric (ig-as-u'rik) **acid.** Acid existing combined with strychnine in nux vomica and St. Ignatius's bean.

Ignatia amara, ig-na'she-ah am-ar'ah (bitter ignatia) (after St. Ignatius, the Jesuits having first carried it from the East to Europe). Ord. Apocynaceæ. Systematic name of the plant affording St. Ignatius's bean, Faba Indica, F. Sancti Ignatii or febrifuga. The seeds of Strychnos Ignatii, Ignatia (Ph. U. S.), are bitter and poisonous, containing a larger proportion of strychnia than is in nux vomica.

Ignatian'a Philippin'ica. Strychnos Ignatii.

Ignavia (ig-nav'e-ah) or **Ignav'itas** (laziness). Inertia. **I. par'tium genita'lium,** impotence.

Igneous, ig'ne-us. Relating to fire.

Ignipedites, ig-ne-ped-e'tees (*ignis,* fire, *pes,* foot). Hot-foot; burning sensation in soles of feet of soldiers, rheumatic patients, and others.

Ignipuncture, ig'ne-punk-ture (*ignis,* fire, *puncture*). Cauterization and puncturation combined.

Ignis, ig'nis. Fire. **I. actua'lis,** actual cautery; see *Cauterium.* **I. anima'lis,** animal heat. **I. cal'idus** (hot fire), violent inflammation preceding gangrene. **I. columel'læ,** erysipelas. **I. fat'uus,** jack-o'-lantern. **I. frig'idus** (cold fire), gangrene. **I. natura'lis,** animal heat. **I. occult'us,** anthrax. **I. Per'sicus,** anthrax; herpes zoster. **I. philosoph'icus,** phosphorus. **I. potentia'lis,** potential cautery; see *Cauterium.* **I. sa'cer,** erysipelas; herpes zoster; aphthæ. **I. sa'cer** or **volat'icus,** ignis Sylvaticus. **I. Sanc'ti Anto'nii,** erysipelas; anthrax. **I. Sanc'ti Igna'tii,** erysipelas. **I. Sylvat'icus** or **Sylves'tris,** wildfire rash; porrigo larvalis or crusta lactea or strophulus of infants; transient redness of the face and neck observed in hysterical and chlorotic females. **I. vita'lis,** animal heat. **I. vola'grius** or **volat'icus,** I. Sylvaticus.

Ignya (ig'ne-ah), **Ignye** (ig'ne-a), or **Ignyis,** ig'ne-is. Posterior part of knee-joint.

Ik'aja. Akasga.

Ikota. Form of religious insanity in women in Siberia.

Ikterus, ik'ter-us. Icterus.

Il, as a prefix. See *Im.*

Ilaphis, il'af-is. Arctium lappa.

Ilea, il'e-ah. Flanks.

Ileac passion, il'e-ak pash'un. Ileus.

Ileadelphus, il-e-ad-elf'us (*ileum*, *adelphos*, brother). Double monster united at the pelvis and below.

Ileïtis, il-e-e'tis. Inflammation of the ileum. **I. pustolo'sa**, typhoid fever.

Ileo, il'e-o. In composition, ileum or ilium.

Ileocæcal, il-e-o-se'k'l. Relating to the ileum and cæcum. **I. folds**, duplicature of peritoneum passing from mesentery to cæcum. **I. fos'sæ**, small pouches of peritoneum where ileum and cæcum unite. **I. recess'**, inferior ileocæcal fossa. **I. valve**, valve composed of folds of mucous membrane at the opening of the ileum into the large intestine.

Ileocholosis, il-e-o-kol-o'sis (*ileo*, *chole*, bile). Cholera morbus; biliary diarrhœa.

Ileocleisis, il-e-o-kli'sis (*ileum*, *kleisis*, occlusion). Occlusion of the ileum.

Ileocolic, il-e-o-kol'ic. Relating to the ileum and colon. **I. ar'tery**, branch of superior mesenteric artery. **I. valve**, ileocæcal valve.

Ileocolitis, il-e-o-kol-e'tis. Inflammation of the ileum and colon. Enteritis involving those regions.

Ileocolostomy, il-e-o-kol-os'tom-e (*ileum*, *colon*, *stoma*, mouth). Operation for establishing artificial opening between the ileum and colon.

Ileodicliditis, il-e-o-dik-lid-e'tis (*ileo*, *diklis*, valve). Inflammation about the ileocæcal valve. Typhoid fever.

Ileog'raphy (*ileum*, *grapho*, to write). Description of the ileum.

Ileoileostomy, il-e-o-il-e-os'to-me (*ileum*, *stoma*, mouth). Operation for establishing continuity between two portions of diseased or obstructed ileum.

Ileology, il-e-ol'o-ge (*ileum*, *logos*, discourse). Description of the ileum, from an anatomical or physiological standpoint.

Ileolumbar, il-e-o-lum'bar. Belonging to the ileum and lumbar region. **I. ar'tery** is given off by the hypogastric, opposite the base of the sacrum. It ascends behind the psoas muscle, and divides into two branches, ascending and transverse. **I. lig'ament**, ileolumbar or ileolumbovertebral ligament, vertebro-iliac ligament; broad membraniform, triangular ligament, extending horizontally from the transverse process of the fifth lumbar vertebra to the upper and posterior part of the iliac crest, uniting the vertebral column with the pelvis.

Ileon (il'e-on) or **Il'eum** (*eileo*, to turn, to twist). Longest portion of the small intestine, extending from the jejunum to the cæcum. So called from forming a number of convolutions.

Ileoparasit'icus. Parasite connected with the ileum.

Iliopolymelius, il-e-o-pol-e-mel'e-us (*ileum*, *polus*, many, *melos*, limb). Monster with excessive development of the ileum.

Ileoproctostomy, il-e-o-prok-tos'to-me (*ileum*, *proktos*, rectum, *stoma*, mouth). Operation for making artificial communication between the ileum and rectum.

Ileopyra, il-e-op'ir-ah (*ileo*, *pur*, fire, fever). Typhoid fever.

Ileorectostomy, il-e-o-rek-tos'to-me (*ileum*, *rectum*, *stoma*, mouth). Hybrid word for ileoproctostomy.

Ileosis, il-e-o'sis. Ileus.

Ileostomy, il-e-os'to-me (*ileum*, *stoma*, mouth). Operation of establishing communication between the ileum and any other organ or between the ileum and the external surface.

Ileotyphus, il-e-o-ti'fus. Typhoid fever.

Ileum, il'e-um. Ileon.

Ileus, il'e-us (*eileo*, to twist). Dangerous disease characterized by deep-seated pain in the abdomen and obstinate constipation; sometimes with stercoraceous vomiting. It is occasioned by hernia or other obstruction to the passage of the fæces. The term has been applied also to simple nervous colic, intussusception, and strangulation of the small intestine, etc.; volvulus. **I. fla'vus** or **icteroï'des**, icterus. **I. inflammato'rius**, enteritis confined to the small intestine. **I. vol'vulus**, volvulus.

Ilex (e'leks) **aquifo'lium.** Systematic name of the common holly. The leaves are tonic, astringent, and antiseptic, and have been prescribed in atonic gout, intermittents, dyspepsia, etc. The active principle, *Ilicine*, has also been used as an antiperiodic and antipyretic. **I. casse'na** or **cassi'ne**, Ilex vomitoria. **I. gla'bra**, ink-berry; N. American shrub, bark of which is tonic and antipyretic. **I. gongon'ha**, Brazilian shrub, leaves of which are diaphoretic and diuretic. **I. ma'jor**, from the berries of this tree juice may be expressed forming a slightly astringent emulsion with water, used by Spanish physicians in humid cough, hæmoptysis, etc. **I. ma'té**, Ilex Paraguensis. **I. myrtifo'lia**, species of S. United States; diuretic. **I. opa'ca**, American holly, growing throughout the Atlantic portion of the United States; possesses the same properties as I. aquifolium. **I. Paraguen'sis**, native of Paraguay; affords the celebrated mattee or maté, which is drunk in place of the Chinese tea by the people of Paraguay; Paraguay tea. **I. verticilla'ta**, black alder; winterberry of N. America; bark, Prinos (Ph. U. S.), is tonic, antiperiodic, astringent; used externally as a wash or cataplasm in gangrene and cutaneous affections. **I. vomito'ria**, *Dahoon*, *Southsea tea*, *Evergreen cassine*, *Casseena;* tree indigenous in Southern United States; leaves when dried are aromatic, stimulant, stomachic, and expectorant, and are used as a tea; when fresh they are emetic and cathartic.

Ilexan'thina. Yellow coloring matter from Ilex aquifolium.

Ilia, il'e-ah. Flanks; iliac bones; viscera; pudenda.

Iliac, il'e-ak. Relating to or connected with the flanks or the ilium. **I. ar'teries**, the primary iliacs arise from the bifurcation of the aorta, opposite the body of the fourth lumbar vertebra, and descend in a divergent manner until, opposite the sacro-iliac symphysis, they divide into two considerable trunks, the internal iliac or hypogastric, and the external iliac. The latter proceeds from the sacro-iliac juncture as far as the crural arch, when it assumes the name femoral artery. **I. bone**, ilium. **I. bur'sa**, subiliac bursa. **I. co'lon**, sigmoid flexure. **I. crest**, upper margin of the ilium; thick and curved like the italic *S.*; affords attachment to the broad muscles of the abdomen. **I. fas'cia**, fascia covering the iliopsoas muscle, passing under Poupart's ligament behind the femoral vessels under the name of ilio-pectineal fascia. **I. flex'ure**, sigmoid flexure. **I. fos'sæ** are two in number: the internal, the depression presented by the ilium on its interior, at the upper part of which the iliacus internus is lodged; and the external, an excavation on the outer surface of the same bone, occupied by the glutæi muscles. **I. fur'row**, groove on the surface of the body at position of iliac crest. **I. groove**, furrow for passage of iliopsoas tendon over margin of the pelvis. **I. mesoco'lon**, see *Mesocolon*. **I. mus'cle, inter'nal**, is situate in the iliac fossa and at the anterior and superior part of the thigh; it is broad, radiated, triangular, and attached above to the two upper thirds of the fossa iliaca and to the internal part of the iliac crest; below it terminates by a tendon common to it and the psoas magnus, and is fixed into the lesser trochanter. When this muscle contracts it bends the pelvis on the thigh, and conversely; it is also a rotator of the thigh outward, and prevents the trunk from falling backward. See *Iliopsoas*. **I. nerve**, external branch of iliohypogastric nerve. **I. notch**, great sacro-sciatic notch. **I. pas'sion**, ileus. **I. re'gions**, sides of the abdomen between the ribs and the hips. **I. spines**, spinous processes of the ilium, four in number, two anterior and two posterior. Of the anterior, one is superior, and affords origin to the sartorius muscle; the other, inferior, receives the tendinous origin of the rectus femoris. The posterior iliac spines are divided, like the anterior, into superior and inferior. They afford insertion to strong ligaments, uniting the ilium with

the sacrum. **I. veins,** these correspond with the distribution of the iliac arteries.

Iliacofemoral, il-i-ak-o-fem'o-ral. Relating to the ilium and thigh-bone.

Iliacomus'cular. Iliolumbar.

Iliacopsoas, il-i-ak-o-so'as. Iliopsoas.

Iliacotrochantericus, il-e-ak-o-tro-kan-ter'ik-us. Relating to the ilium and trochanter; iliacus internus muscle.

Ilia'cum os. Os innominatum.

Iliacus, il-e'ak-us. Iliac; iliac muscle, internal. **I. exter'nus,** glutæus medius; pyriformis. **I. inter'nus,** iliac muscle, internal. **I. mi'nor,** small muscle from anterior inferior spine of ilium inserted in anterior intratrochanteric line at its lower part, or into the iliofemoral ligament.

Iliadelphus, il-e-ad-el'fus (*ilium, adelphos,* brother). Monsters separate above, but united at and below the pelvis.

Ilial, il'e-al. Iliac.

Ilic'ic acid. Crystalline acid from leaves of Ilex aquifolium.

Ilicine, il'is-een. Crystallizable principle from leaves of Ilex aquifolium; antiperiodic; used as substitute for quinine.

Iliectomy, il-e-ek'to-me (*ileum, ektome,* excision). Excision of portion of the ileum.

Ilingos (il-in'gos) or **Ilin'gus.** Vertigo.

Il'io. In composition, relating to the ilium or ileon.

Ilio-abdominal, il'e-o-ab-dom'in-al. Obliquus internus abdominis.

Il'io-aponeuro'si-femora'lis. Tensor vaginæ femoris.

Ilio-aponeurotic (il'e-o-ap-on-u-rot'ik) **muscle.** Fascia lata muscle.

Ilio-aponeuroticus, il'e-o-ap-on-u-rot'ik-us. Relating to the ilium and fascia lata; tensor vaginæ femoris.

Iliocapsularis (il-e-o-kap-su-lar'is) or **Iliocapsulotrochantericus,** il-e-o-kap-su-lo-trok-an-ter'ik-us. Obturator internus.

Iliocaudal, il-e-o-kawd''l (*ilium, cauda,* tail). Relating to the ilium and coccyx; *iliococcygeal* would be the more exact term.

Iliococcyge'al. Relating to the ilium and coccyx. See *Iliocaudal.*

Iliocos'tal. Quadratus lumborum; sacrolumbalis.

Iliocostalis, il-e-o-kos-tal'is (*ilium, costa,* rib). Sacrolumbalis muscle; portion of quadratus lumborum between crest of ilium and twelfth rib. **I. cervical'is,** cervicalis muscle.

Iliocostocervicalis, il-e-o-kos-to-sur-ve-kal'is. Sacrolumbalis.

Iliofem'oral. Relating to ilium and femur; coxofemoral. **I. lig'aments,** see *Coxofemoral articulation.* **I. tri'angle,** triangle having its base between the upper part of the trochanter major and the anterior superior spine of the ilium, and its apex formed by lines projected posteriorly from the anterior superior spine and upward from the top of the trochanter major.

Iliofemora'lis. Iliofemoral; muscle between ilium and femur.

Iliohypogastric, il-e-o-hi-po-gas'trik. Relating to ilium and hypogastrium. **I. nerve,** musculocutaneous nerve, superior.

Ilio-inguinal, il'e-o-in'gwin-al. Relating to the ilium and groin. **I. nerve,** musculocutaneous nerve, inferior.

Ilio-ischio-trochantericus, il'e-o-is'ke-o-tro-kan-ter'ik-us. Glutæus minimus.

Iliolumbal'is or **Ileolum'bar.** Ileolumbar.

Iliolumbover'tebral lig'ament. Ileolubmar ligament.

Il'ion. Ilium.

Iliopatellaris, il-e-o-pat-el-lar'is. Rectus muscle of thigh.

Iliopectineal, il-e-o-pek-tin-e'al. Belonging to the ilium and pubic bone. **I. crest,** I. line. **I. em'inence,** formed by the junction of the ramus of the ilium with that of the pubis; affords attachment to the psoas minor muscle. **I. fas'cia,** iliopectineal ligament. **I. fos'sa,** Scarpa's triangle. **I. lig'ament,** continuation of iliac fossa from Poupart's ligament to iliopectineal line. **I. line,** prominence of bone separating true and false pelvis on inner surface of the ilium, terminating at the spine of the pubis. **I. tu'bercle,** iliopectineal eminence.

Iliopel'vic. Relating to ilium and pelvis, as iliopelvic abscess.

Ilioperoneal (il-e-o-per-o-ne'al) **muscle.** Occasional small fasciculus of biceps arising from the ilium.

Iliopretibialis, il-e-o-pra-tib-e-al'is. Sartorius.

Ilioprotu'leus. Triceps cruris; rectus of thigh.

Iliopsoas bursa, il-e-o-so'as bur'sah. Subiliac bursa. **I. muscle,** iliacus and psoas muscle considered as one.

Iliopsoïtis, il-e-o-so-e'tis. Inflammation of the iliopsoas muscle.

Iliopuberal (il-e-o-pu'ber-al) or **Iliopu'bic.** Relating to the ilium and region of pubes.

Ilio-pubi-costo-abdominal, il'e-o-pu'be-kos'to-ab-dom'in-al. Obliquus externus abdominis.

Iliosacral, il-e-o-sac'ral. Sacro-iliac.

Iliosacro-fem'oral. Glutæus major.

Ilioscapularis, il-e-o-skap-u-lar'is. Iliacus minor.

Iliosciatic, il-e-o-si-at'ik. Relating to ilium and ischium.

Ilioscrotal, il-e-o-skro't'l. Relating to ilium and scrotum. **I. nerve,** ilio-inguinal nerve; musculocutaneous superior.

Iliospinal, il-e-o-spi'nal. Relating to ilium and spine.

Iliospinalis, il-e-o-spin-al'is. Longissimus dorsi. Name also given to combination of latter muscle and several other muscles of the back.

Iliotibial, il-e-o-tib'e-al. Relating to the ilium and tibia. **I. band,** band of fascia from the fore part of the iliac crest to the outer tuberosity of the tibia.

Iliotrochanteric, il-e-o-tro-kan-ter'ik. Relating to the ilium and trochanter.

Iliotrochanterius, il-e-o-tro-kan-ter'e-us. Iliacus. **I. exter'nus,** I. medius. **I. mag'nus,** glutæus medius. **I. me'dius,** glutæus maximus. **I. par'vus,** glutæus minimus.

Iliotrochantineus, il-e-o-tro-kan-tin'e-us. Pyriformis.

Ilithy'ia. Lucina, the goddess who presided over parturient females, was so called by the Greeks and Romans.

Ilium (il'e-um) or **Ilion,** il'e-on. Hauch or hip-bone. Largest of three bones constituting os innominatum in fœtus and child; probably so called from its seeming to support the intestine ileum; or, perhaps, because its crest is curved upon itself (*eileo,* to twist). The posterior surface is called the dorsum, the internal the venter. The upper semicircular edge is the crista or spine, at the anterior part of which is the anterior and superior spinous process. At the back part of the spine are two spinous processes, the posterior and superior, and posterior and inferior. See *Iliac spines* and *Ileum.*

Illacrymatio, il-lak-re-mah'she-o (*il, lacryma,* tear). Involuntary and constant flow of tears on the cheek; epiphora.

Illaqueation, il-lak-we-a'shun (*laqueo,* to ensnare). Operation for restoring an ingrowing eyelash to its proper position by means of puncturing the lid and drawing the eyelash through the puncture.

Illecebra, il-les'eb-rah (*illicio,* to allure). Sedum. **I. ma'jor,** Sedum telephium.

Illecebrum (il-les'eb-rum) **achyran'tha.** Mexican plant with astringent flowers. **I. polygonoï'des,** Achyranthes repens. **I. vermicula're,** sedum.

Illegitimacy, il-le-jit'im-a-se. State of being illegitimate.

Illegitimate, il-le-jit'im-ate (*il,* negative, *legitimus,* legitimate). That which is contrary to law or which has not the conditions required by law, as an illegitimate birth—one out of wedlock. The term illegiti-

mate or bastard is also applied to diseases, as fevers, whose progress is anomalous. Sse *False.*

Illicium anisatum, il-lis'e-um an-is-at'um (*illicio,* to allure). *Yellow-flowered anise, Aniseed tree, Star anise.* The seeds are used, like the aniseed, as stomachic and carminative. The same tree furnishes the aromatic bark called cortex anisi stellati, cortex lavola. The fruit is officinal under the name Illicium (Ph. U. S. and Br.). **I. Florida'num,** *Florida anise tree, Poison bay, Star anise, Sweet laurel.* Evergreen shrub, the bark, leaves, etc. of which have a spicy odor like anise. **I. parviflo'rum,** shrub of Southern United States, having the flavor and properties of sassafras root. **I. religio'sum,** Japanese tree, active principle of which causes vomiting and convulsions, and fatal effects in large doses.

Illinitio, il-lin-ish'e-o (*il, lino,* to anoint). Inunction.

Illisio, il-lis'e-o (*il, lædo,* to strike violently). Fracture of the skull, with depression.

Illitio (il-lish'e-o) or **Illitus,** il-le'tus (*il, lino,* to anoint). Inunction.

Ill'ness. Disease. **I., month'ly,** menses.

Illos, il'los. One who squints.

Illosis, il-lo'sis (*illos,* eye). Distortion of the eyes. Strabismus. See *Helosis.*

Illumina'tion. Light derived from a luminous body. **I. of the eye,** lighting up of interior of the eye, as in ophthalmic examination; or by focusing pencil of rays of light obliquely on any part, as the cornea.

Illusio, il-lu'ze-o (*il, ludo,* to play). Illusion. **I. sen'sûs,** hallucination.

Illusion, il-lu'zhun. Hallucination; delusion. It differs, however, according to Tuke, from hallucination in being the false interpretation of a sensation actually perceived.

Illutamentum (il-lu-tam-en'tum) or **Illutatio,** il-lu-tah'she-o (*il, lutum,* mud). Act of covering any part of the body with mud for therapeutical effect, as in a mud-bath.

Ilosis, il-o'sis. Illosis.

Im, Il, In, Ir. In composition, generally mean *in;* occasionally, however, have the privative sense of *un.*

Image, im'aje. Representation of an object to the eye or mind. **I. of Purkin'je,** intraretinal image of the blood-vessels of the retina, seen in one's own eye by moving a lighted candle in front of the organ, so that the light may enter it obliquely. **I., subjec'tive,** visual hallucination.

Imaginarii, im-aj-in-ar'e-e. Affections of the sensory faculties.

Imagination, im-aj-in-a'shun (*imago,* image). Faculty of forming in the mind an assemblage of images and combination of ideas not always in direct connection with external objects.

Ima'go. Image; perfect insect after having completed its metamorphoses.

Imbecile, im'be-sil. Weak-minded; nearly allied to idiocy. A person is so called who was born mentally feeble or acquired it as a result of cerebral disease.

Imbecility, im-be-sil'it-e. Weakness, especially of the intellect; incoherency.

Imbecillis, im-bes'il-lis. Infirm.

Imbecillitas, im-be-sil'lit-as. Imbecility. **I. inge'nii,** idiocy, imbecility. **I. men'tis,** idiocy, imbecility. **I. ventric'uli,** atony or weakness of the stomach.

Imbellis ad venerem, im-bel'lis ad ven'er-em (powerless for venery). Not easily moved to sexual desire; impotent.

Imberbis, im-ber'bis (*im, barba,* beard). Devoid of beard.

Imbibition, im-bib-ish'un. Absorption; aspiration. Action by which a body becomes penetrated by a liquid or gas. See *Endosmose.* Reverse action has been called exbibition. Many phenomena of absorption are owing to imbibition. **I., doub'le,** endosmose.

Imbowelling, im-bow'el-ling. Operation of taking out the bowels.

Imbrex (a tile) **narium,** im'breks nar'e-um. Septum narium.

Imbricaria saxatilis, im-brik-ar'e-ah saks-at'il-is. Lichen saxatilis.

Im'bricate or **Imbricated,** im'brik-a-ted (*imbrex,* tile). Placed over each other like the tiles of a roof.

Imita'tion. Effort to copy some other act, interesting as a cause of chorea, epilepsy, or even of insanity; it is a mental contagion, according to Tuke.

Immediate auscultation, im-me'de-ate aus-kul-ta'shun. See *Auscultation.* **I. percus'sion,** see *Percussion.* **I. u'nion,** see *Intention.*

Immedicable, im-med'ik-a-b'l. Incurable.

Immersed, im-murst'. Word applied to a body which is depressed in another body, the surfaces being even.

Immersion, im-mur'shun. Variety of cold bath in which the body or a part is momentarily plunged at brief intervals, as a means of stimulation in fevers, mental and nervous diseases, etc. In microscopy, immersing of the objective (immersion lens) in liquid, so that rays falling obliquely on the edges will not be wholly reflected.

Immersus, im-mer'sus (*im, mergo,* to dip). Subscapularis muscle.

Immictio, im-mik'she-o. Enuresis.

Imminence, im'mi-nence (*immineo,* to hang over). Impending condition. Period preceding and foretelling invasion of a disease.

Immiscible, im-mis'se-b'l (*im,* neg., *misceo,* to mix). Incapable of being mixed.

Immissio, im-mis'se-o (*im, mitto,* to send). Insertion. **I. cathete'ris,** catheterism.

Immissor, im-mis'sor. Inserter of anything; catheter.

Immissorium, im-mis-so're-um. Instrument for insertion, as a catheter.

Immobilitas, im-mo-bil'it-as (*im, moveo,* to move, *habilis,* able). Want of power to move; incapability of being moved; see *Acinesia.* **I. pupil'læ,** immobility of the pupil; amaurosis.

Immobilization, im-mo-bil-i-za'shun. Act of making a part immovable, as in a splint.

Immoderantia (im-mo-der-an'she-ah) or **Immoderatio,** im-mo-der-ah'she-o (*im, moderor,* to be moderate). Intemperance.

Immovable apparatus, im-mov'a-b'l ap-par-a'tus. See *Apparatus.*

Immunity, im-mu'nit-e. Freedom from liability to infectious diseases through protection of the system by previous attack or other cause.

Im'munize. To produce or to acquire immunity from disease.

Immutans, im-mu'tans (*im, muto,* to change). Alterative.

Impacted, im-pak'ted (*in, pango,* to drive in). Wedged.

Impaction, im-pak'shun. Wedging; collision. Fracture of bone with depression of some fragments and projection of others.

Impalpable, im-pal'pa-b'l (*in,* not, *palpo,* to feel). Applied to powders which are so fine that the particles cannot be felt.

Impaludation, im-pal-u-da'shun (*im, palus,* marsh). Influence of marsh miasm. Predisposition of residents in malarial districts to malarial diseases.

Impaludism, im-pal'u-dizm (same etymon). Poisoning from marsh miasm. Impaludation.

Impar (*im, par,* equal). Odd; azygous. **I. gan'glion,** small coccygeal ganglion. **I. pharyn'gis,** middle constrictor of the pharynx.

Impatiens balsamina, im-pash'e-ens bal-sam-e'nah. Balsam weed, touch-me-not, ord. Balsaminaceæ. Resembles the other species in its properties. **I. ful'va** and **I. pal'lida,** *Touch-me-not, Jewel weed, Balsam weed, Slippers, Celandine, Quick-in-the-hand, Weathercocks, Snapweed;* indigenous plants found in low, moist ground in every part of the U. States. Ointment of leaves with lard used in hemorrhoids. Properties the same as those of **I. lu'tea, I. macula'ta,** or **I.**

no'li me tan'gere of Europe, common yellow balsam, which is emetic, cathartic, and diuretic.

Impatientia, im-pash-e-en'she-ah (*im, patior,* to suffer). Irritability. **I. vesi'cæ,** irritability of the bladder.

Impedimentum, im-ped-e-men'tum (obstruction). Anything that obstructs; obstacle to delivery of fœtus in preternatural parturition.

Imperatoria, im-per-at-o're-ah (*impero,* to command). *False pellitory, Yellow-grass, Great masterwort,* ord. Umbelliferæ. The roots are aromatic and bitter. Alkaloid derived from it is called *Imperatorine.* **I. ostruth'ium,** imperatoria. **I. sylves'tris,** Angelica sylvestris.

Imperforate, im-per'fo-rate (*im, per,* through, *foro,* to bore). Term applied to parts that are unnaturally closed, as the anus, vagina, etc.

Imperforatio, im-per-fo-rah'she-o. Imperforation. **I. a'ni,** atresia of the anus or rectum. **I. pupil'læ,** see *Synezisis.* **I. u'teri,** atresia of the uterus. **I. vagi'næ,** atresia of the vagina.

Imperforation, im-per-for-a'shun. Absence of a natural aperture, as of the mouth, anus, vulva, etc. It is congenital and dependent upon faulty conformation.

Imperial, im-pe're-al. Pleasant, cooling drink formed of bitartrate of potassium, sliced lemon, white sugar, and water.

Imperium, im-pe're-um (order). Prescription.

Impermeable, im-pur'me-a-b'l. Incapable of permeation, as a tight structure; applied also to watertight goods.

Imper'vious. Not admitting of a passage through, as a membrane.

Impetigines, im-pet-ij'in-ees. Superficial diseases of the skin; eczematoses.

Impetiginositas, im-pet-ij-in-os'it-as. Impetigo.

Impetiginous, im-pet-ij'in-us. Having the nature of, or relating to, impetigo.

Impetigo, im-pet-e'go (*impeto,* to attack). *Running scall* or *tetter, Crusted, Pustular,* or *Humid tetter* or *Scall, Cowrap.* A word at one time used generically to comprise syphilis, scorbutus, rachitis, elephantiasis, itch, tinea, scrofula, etc. By some it was described as a humid or running tetter, consisting of small pustules denominated psydracia; others included under it various forms of eczema and psoriasis. Some included all chronic eruptions under the head of impetigo, the acute forms being called exanthemata; superficial forms of skin disease also received this name. At the present day it is considered as a pustular cutaneous affection, with itching, the pustules being small and grouped together, and the crusts subsequently formed yellowish and scaly; some writers regard it only as a pustular eczema, eczema impetiginosum. **I. a'chor,** impetiginous eczema of scalp. **I. cap'itis,** I. of the scalp. **I. contagio'sa,** acute vesicopustular eruption, in many cases apparently epidemic among children, generally appearing first on the face or hands in isolated vesicles, followed in a few days by characteristic scabs. **I. eczemato'des,** eczema impetiginosum. **I. erysipelato'des** or **erythemat'ica,** inflammatory form of impetiginous eczema, erysipelatoid in appearance. **I. excorticati'va,** ichthyosis. **I. exe'dens,** I. rodens. **I. figura'ta,** figured scall; impetigo occurring in irregular clusters; porrigo lupinosa. **I., herpet'ic** or **herpet'iform,** chronic cutaneous affection of later stages of pregnancy, frequently fatal; pustules are in groups; sometimes annular, yellowish scabs form with surface beneath like that of eczema rubrum; herpes gestationis. **I. larva'lis,** impetiginous eczema covering the face like a mask. **I. parasita'ria,** I. contagiosa, under the view that it is of parasitic origin. **I. pel'lagra,** pellagra. **I. ro'dens,** chronic impetigo, especially of the face, accompanied with foul rodent ulceration; often regarded as a form of cancer or syphilis. **I. spar'sa,** I. irregularly and scatteringly diffused over the body; eczema impetiginodes. **I. sycosiform'is,** deep-seated impetiginous eczema of the upper lip, sometimes occurring after shaving. **I. syphilit'ica,** impetiginous syphiloderm. **I. ulcera'ta,** I. accompanied with ulcerations; I. rodens.

Impetum faciens, im'pet-um fas'e-ens (impulse-making). Vital principle.

Impetus, im'pet-us. Impetigo; paroxysm; attack. **I. san'guinis,** congestion of blood.

Implacental, im-pla-sen't'l. Devoid of placenta.

Implantation, im-plan-ta'shun (*im, planto,* to plant). Surgical operation intended to unite a divided intestine by placing the divided end into the intestine and securing by means of rings and sutures. Act of inserting or introducing anything into a part, by hypodermic injection, for example. Attachment, as of a ligament. Double monstrosity, one individual being developed on or at the expense of the other. A tooth is sometimes transplanted from one person to another. **I., crescen'tic,** Burns's ligament; Gimbernat's ligament.

Implant'ed. Attached; ingrafted; inserted; inoculated.

Implicated, im'plik-a-ted. Affected; said of fevers when two simultaneously attack a patient.

Implica'tion. Complication of morbid conditions; entwining, as in plexus of nerves.

Impluvium, im-plu've-um (*im, pluo,* to rain). Embrocation; shower-bath.

Imponderable, im-pon'der-a-b'l. Without weight.

Imponderables, im-pon'der-a-b'ls. Term formerly applied to heat, light, etc.

Importa'tion. Introduction from another region or foreign country of disease or causes of disease.

Impostem (im-post'em) or **Imposthume,** im-post'hume. Abscess.

Impotence (im'po-tence) or **Im'potency** (*im, potens,* able). Loss of power over one or more members; commonly, want of sexual vigor, incapacity for copulation, chiefly on the part of the male; also used synonymously with sterility. It may be due to mental disturbance.

Impotent, im'po-tent. Affected with impotence.

Impotentia, im-po-ten'she-ah. Adynamia; impotence. **I. coëun'di,** impotence. **I. concipien'di,** sterility in the female. **I. generan'di,** sterility. **I. gestan'di,** sterility in the female, so far as concerns her going to full term of gestation. **I. parturien'di,** sterility, usually from anatomical causes, interfering with birth of child. **I. vir'ilis,** impotence of the male.

Impoverished, im-pov'er-ish'd (having become poor). Epithet applied to humor deprived of part of its constituents, and particularly to the blood, which is considered impoverished when pale, without the proper consistence, and abounding in serum.

Impregnation, im-preg-na'shun. Fecundation; fertilization; pregnancy.

Impressibility, im-pres-sib-il'it-e. See *Sensibility* and *Hyperæsthesis.*

Impressio, im-pres'se-o. Depression. **I. angular'is,** depression in occipital lobe where petrous portion of temporal bone projects into cavity of cranium. **I. cardi'aca** or **car'dis,** depression on the liver where the apex of the heart presses against the diaphragm. **I. co'lica** or **co'li,** shallow impression on the under surface of the right lobe of the liver for the hepatic flexure of the colon; similar impression behind, *Impressio renalis,* is for the right kidney and suprarenal capsule. **I. rena'lis,** see *Impressio colica.* **I. suprarena'lis,** depression in right lobe of the liver for reception of suprarenal capsule. **I. vesica'lis,** fissure for gall-bladder.

Impression, im-presh'un (*in, primo,* to press). Indentations made on certain organs by others. Inequalities on bones which appear to be made by adjacent organs. **I., del'toid,** triangular depression on shaft of humerus for insertion of deltoid muscle.

Impressions (im-presh'uns), **dig'ital.** Depressions observable at the inner surface of the cranium, looking as if made with fingers.

Impressura, im-pres-su'rah. Impression. Evidence of taint or contamination, as with syphilis, scrofula, etc.

Impuber (im-pu'ber), **Impu'bes,** or **Impu'bis** (*in,*

puber, at age of puberty). One who has not attained that age.

Impudicus, im-pu-de'kus (*im*, *pudicus*, modest). See *Digitus*.

Im'pulse (*im*, *pello*, to drive). Force directly employed. Influence acting directly upon the mind, with a certain amount of determination or force. **I., car'diac**, beat of apex of the heart; see *Heart*. **I., diastol'ic**, back-stroke of the heart. Jog or stroke felt at the end of each pulsation, seeming to be owing to the refilling of the ventricles. **I., ex'piratory**, I. from nervous centre of respiration, producing the movement of expiration when inspiration is suspended. **I., heart**, I., cardiac. **I., in'spiratory**, I. from nervous centre of respiration, giving rise to inspiratory movement when expiration is suspended. **I., systol'ic**, I., apex.

Imputabil'ity (*im*, *puto*, to think). Soundness of mind that renders one responsible legally for his actions.

Imputrescible, im-pu-tres'si-b'l. Resisting putrescence.

In, in composition. See *Im*.

In extremis, in eks-tre'mis (at the extremity or point of death). Moribund; dying.

Inadequacy, in-ad'e-kwa-se. Insufficiency, as of the valves of the heart when affected with disease, or of the kidney, *renal inadequacy*, when it fails to secrete urine of proper specific gravity and there is diminution of urea and uric acid, the kidney becoming smaller and hardened.

Inalimental, in-al-e-men'tal (*in*, neg., *alimentum*, food). Devoid of nourishment.

Inanagenesis, in-an-ah-jen'es-is (*is*, *inos*, muscle, *anagenesis*, regeneration). Muscular regeneration; reproduction of muscular tissue.

Inanaphysis, in-an-af'is-is (*is*, muscle, *anaphysis*, growing again). Inanagenesis.

Inania, in-an'e-ah (emptiness). Iliac regions.

Inanimate, in-an'im-ate. Not possessed of life.

Inanitiation (in-an-ish-e-a'shun) or **Inanition**, in-an-ish'un. Emptiness. Exhaustion for want of nourishment; starvation.

Inap'petence or **Inappetency**, in-ap'pe-ten-se (*in*, *appeto*, to desire). See *Anorexia* and *Dysorexia*.

Inarticulate, in-ar-tik'u-late (*in*, *articulus*, joint). Without joint or articulation. Not distinct or intelligible, as sounds of the voice.

Inarticulatio, in-ar-tik-u-lah'she-o (*in*, *articulus*, joint). See *Enarthrosis*. Deficiency of articulation; state of being inarticulate.

Inassim'ilable. Not capable of assimilation.

Incandescence, in-kan-des'sence (*incandesco*, to glow). The condition of a substance in a white heat.

Incantation, in-kan-ta'shun (*in*, *canto*, to sing). Cure of diseases by charms, etc.

Incapacity, in-kap-as'it-e. Inefficiency; inability for certain duties or functions, as sexual incapacity or impotence.

Incarcerated, in-kar'sur-a-ted. See *Incarceration*.

Incarceratio, in-kar-sur-ah'she-o (*in*, in, *carcer*, prison). Incarceration. **I. intestino'rum**, inclusion of a portion of intestine in a sac, as in hernia. **I. intestino'rum inter'na**, see *Enteremphraxis*. **I. placen'tæ**, see *Placenta*.

Incarceration, in-kar-sur-a'shun. Hernia is said to be "incarcerated" when, owing to constriction about the neck of the hernial sac or elsewhere, it cannot be readily reduced. Also strangulation. See *Placenta*, *incarcerated*, *Enteroperistole*, and *Enteremphraxis*.

Incarnant, in-kar'nant (*in*, *caro*, flesh). *Sarcotic*. Promoting the regeneration of flesh or granulation.

Incarnatio, in-kar-nah'she-o. Incarnation. **I. un'guium**, ingrowing nail.

Incarna'tion. Growth of flesh or granulations; conversion into flesh. Formation and development of the germ in the ovum. Conception.

Incarnifica'tion. Incarnation.

Incas'sa. Intensely poisonous ordeal bark of Africa; a cardiac sedative.

Incendium, in-sen'de-um (*incendo*, to burn). Burning fever or burning heat. Inflammation; phlegmon; combustion. **I. sponta'neum**, combustion, human.

Incensio, in-sen'she-o. Incendium.

Incentivum, in-sen-te'vum. Stimulant; irritant.

Inception, in-sep'shun. Beginning, as of disease; intussusception; ingestion of food.

Incerniculum, in-sur-nik'u-lum (*incerno*, to sift). Strainer or sieve; pelvis of kidney.

Incest, in'sest (*in*, neg., *castus*, chaste). Sexual intercourse between persons whose close relationship makes marriage illegal.

In'cidence. Direction in which a ray of light falls or is reflected.

Incidentia, in-sid-en'she-ah (*incido*, to cut). Medicines to which was attributed the property of cutting thick or coagulated humors, as fixed alkalies, acids, etc.

Incile, in'sil-e. Fourth ventricle of brain.

Incincta, in-sink'tah (*in*, *cingo*, to gird). Pregnant.

Incineration, in-sin-er-a'shun (*in*, *cinis*, ashes). In pharmacy, a process by which substances are reduced to ashes. Cremation or cineration of a corpse.

Incised (in-siz'd) **wound**. Wound by cutting instrument.

Incisio, in-siz'e-o (*incido*, to cut). Cut; incision.

Incision, in-siz'yun. Methodical division of soft parts with a cutting instrument.

Incisive, in-si'siv. Relating or appertaining to the incisor teeth. **I. bone**, intermaxillary bone. **I. canal'**, see *Palatine canals*. **I. fos'sa**, depression in the superior maxillary bone above the incisor teeth. **I. nerve**, branch of the inferior dental nerve supplying the incisor teeth. **I. teeth**, incisor teeth; teeth occupying the anterior part of the upper and lower jaws, used for cutting food in the manner of cutting instruments. The two middle incisors of the upper jaw are at times called butter teeth.

Incisivus, in-siz-e'vus. Levator labii superioris proprius. **I. infe'rior**, levator labii inferioris; accessorius orbicularis oris. **I. lateral'is et pyramidal'is**, levator labii superioris alæque nasi. **I. me'dius**, depressor alæ nasi.

Incisor (in-si'sor) **teeth**. Incisive teeth.

Incisorium, in-sis-o're-um. Operating table; bistoury; scalpel.

Incisorius, in-sis-o're-us. Incisivus.

Incisura, in-sis-u'rah. Incision; notch; fissure. **I. acetab'uli**, acetabular notch. **I. astrag'ali**, I. tali. **I. auric'ulæ**, I. tragica. **I. aur'is**, fissure or groove of the auricle or pavilion, passing between the concha and tragus along the upper body of the cartilage of the concha. **I. cardi'aca**, notch on border of left lung for reception of apex of the heart. **I. cerebel'li**, see *Cerebellum*. **I. cerebel'li ante'rior et poste'rior**, see *Vermiform processes*. **I. clavicula'ris**, depression on the upper extremity of sternum for articulation with the clavicle. **I. crucia'lis**, crucial incision. **I. digas'trica**, digastric fossa. **I. ethmoïda'lis**, excavation in the middle line of the os frontis, separating the two orbital plates. **I. falcifor'mis**, external crural ring. **I. fibula'ris**, depression on the tibia for reception of the fibula. **I. fronta'lis**, supraorbital notch. **I. incisi'va**, groove on inner surface of upper jaw, forming with its fellow the anterior palatine canal. **I. interarytænoï'dea**, depression in larynx between arytenoid cartilages. **I. interclavicula'ris**, interclavicular notch. **I. inter trag'em et scaph'am**, I. auris. **I. intertrag'ica**, I. tragica. **I. ischiad'ica**, sciatic notch. **I. jugula'ris**, jugular notch. **I. lacryma'lis**, see *Sulcus lacrymalis*. **I. liena'lis**, hilus of spleen. **I. mandib'ulæ** or **maxil'læ inferio'ris**, sigmoid notch of inferior maxillary bone. **I. margina'lis**, I. cerebelli. **I. mastoï'dea**, digastric fossa. **I. nasa'lis**, nasal notch of frontal bone. **I. palati'na**, sphenopalatine notch. **I. perone'a**, I. fibularis. **I. rena'lis**, concave part of the kidney. **I. Santori'ni** or **Santorinia'na**, fissures in cartilaginous part of external auditory meatus. **I. scap'ulæ** or **scapula'ris**, suprascapular notch. **I. semiluna'ris**, term applied, from the shape, to various

notches or depressions, as I. cerebelli, I. clavicularis, I. fibularis, I. intertragica, I. mandibulæ, I. maxillæ inferioris. **I. septi**, fifth ventricle of brain; see *Ventricles*.

Incisuræ (in-siz-u're) (pl. of **Incisura**, notch or fissure) **costa'les.** Notches on sides of sternum for reception of costal cartilages. **I. interloba'res** or **interlobula'res pulmo'nis** or **pulmo'num**, fissures by which the lungs are divided into lobes. **I. tympan'-ica**, notches of Rivinus. **I. vertebra'les**, intervertebral notches.

Incisure, in-si'zhur. Incisura.

Incisus, in-se'sus. Incised. Incision.

Incitability, in-site-a-bil'it-e. Irritability.

Incitamentum, in-sit-am-en'tum. Stimulus.

Incitans, in-se'tans. Stimulant.

Incitatio, in-se-tah'she-o. Stimulation.

Incitomotor, in-si-to-mo'tor. Epithet applied to an action the reverse of excitomotor, as muscular motion, commencing in the nervous centres and exciting the muscles to contraction.

Inclavatio, in-klav-ah'she-o (*in*, *clavus*, a nail). Gomphosis. See *Wedged*.

Inclinatio, in-klin-ah'she-o (*inclino*, to bend down). Decline; inclination. **I. cœ'li**, climate.

Inclusio, in-klu'ze-o. Inclusion. **I. abdominal'is**, **I. cerebral'is**, etc., see *Inclusion*.

Inclusion, in-klu'zhun (*in*, *cludo*, to shut). Monstrosity shut up within another body, as in the abdomen, brain, ovary, testicle, etc.; or condition of such monstrosity. **I., fœ'tal**, fœtus in fœtu, or F. inclusus. **I. of germs**, theory that different species are created independently.

Incoherence (in-ko-he'rence) or **Incoherency**, in-ko-he'ren-se (*in*, *co*, *hæreo*, to stick). Want of dependence of one part on another. Condition of the mental manifestations in dementia, etc., such as confused language.

Incombustible, in-kom-bus'tib'l (*in*, neg., *comburo*, to burn up). Incapable of being consumed by fire.

Incompatible, in-kom-pat'ib'l (*in*, *competo*, to agree, *habilis*, able). A substance which cannot be prescribed with another without interfering with its chemical composition or medicinal activity. It may be a physiological or a chemical incompatible. The following statement exhibits the most common and dangerous possibilities of error from this source (Hare):

1. An acid should never be combined with an alkali.
2. An acid should never be added in any quantity to a tincture, as in the following prescription:

℞. Potassii iodidi, ʒij;
Acidi nitro-muriatici, fʒj;
Tinct. cinchonæ comp., q. s. fʒiij.—M.
S. Use as directed: a teaspoonful.

The acid is incompatible with the iodide of potassium, forming a chloride and setting free iodine, and would also change part of the alcohol in the tincture into an ether.

3. Alkalies should not be combined with alkaloids. Thus:

℞. Strychninæ sulph., gr. j;
Potassii iodidi, ʒij;
Syr. sarsaparillæ comp., fʒiij.—M.
S. Teaspoonful t. d.

The strychnine would be precipitated by the potassium salt, and the patient would get nearly all the strychnine in the last dose.

4. Potassium chlorate should not be ordered to be rubbed up with tannic acid or any other organic substance capable of oxidation, as it will explode. Permanganate of potassium is subject to the same rule.
5. Chlorate of potassium and ammonium chloride when mixed together may take fire.
6. Iron is incompatible with tannic acid, as it forms a tannate of iron or ink. As all the vegetable astringents contain tannic acid, they should none of them be used with iron except chiretta and columbo.
7. Tannic acid should never be added to solutions of alkaloids.
8. Gum arabic is not to be added to solutions of iron, lead, or the mineral acids.
9. Alcoholic solutions of camphor and similar resinous substances are incompatible with water.
10. Fluid extracts are incompatible with water, as the addition of water will precipitate them.
11. All salts not acid but alkaline in reaction are decomposed by acids.
12. All salts which are acid are decomposed by alkalies.
13. All vegetable acid salts are altered by mineral acids and are decomposed by alkalies.
14. Iodine and the iodides should not be given with alkaloids.
15. Corrosive sublimate, the salts of lead, iodide of potassium, and nitrate of silver should always be prescribed alone, except in the following instances: (*a*) Corrosive sublimate may be given with potassium iodide, since it will throw down a precipitate which redissolves and forms a double salt. (*b*) Nitrate of silver may be used with extract of opium or hyoscyamus.
16. Syrup of squill should not be given with ammonium carbonate, as it contains acetic acid. Ammonium chloride is not incompatible with it.
17. Cherry-laurel water should not be prescribed with morphine, as it may form the poisonous cyanide of morphine.
18. Chloral and potassium cyanide should never be placed in the same prescription, as they will decompose each other, setting free hydrocyanic acid.
19. Cocaine and borax when added together form an insoluble borate of cocaine. Boric acid and cocaine do not result in this formation.
20. Calomel and antipyrine are said to be incompatible, as are also sweet spirit of nitre and antipyrine.
21. Waters cannot be used in preparing saturated solutions of drugs, as they are already loaded with a volatile substance.

Incom'petence or **Incompetency**, in-kom'pe-ten-se. Inadequacy or insufficiency of an organ or function. **I. of the aor'tic and mi'tral valves of the heart**, see *Insufficiency*. **I., men'tal**, condition of mind resulting in irresponsibility of the individual.

Incomplete, in-kom-plete'. Term applied to inguinal hernia when the protrusion is not large enough to follow the course of the entire canal and make its exit at the external ring.

Incompressibility, in-kom-pres-sib-il'it-e (*in*, neg., *comprimo*, to squeeze together). Capability of being incompressible.

Incontinence, in-kon'tin-ence. Want of power to control certain functions or acts, as I. of fæces, incontinence as to fecal evacuations; I., seminal, spermatorrhœa; I. of urine, incontinence of urine.

Incontinentia, in-kon-tin-en'she-ah (*in*, *contineo*, to contain). Incontinence. Inability to retain the natural evacuations. Abuse of the pleasures of love. **I. al'vi**, diarrhœa; undue admixture of excrement; see *Incontinence*. **I. sem'inis**, spermatorrhœa. **I. uri'næ**, incontinence of urine.

Incoördination, in-ko-or-din-a'shun. Want of correspondence between mental and muscular action. Irregular muscular action, as in locomotor ataxia and other conditions. **I., locomo'tor**, muscular incoördination of locomotor ataxia and alcoholic intoxication.

Incorporation, in-kor-por-a'shun (*in*, *corpus*, a body). Operation by which medicines are mixed with soft or liquid bodies to give them a certain consistence. Thorough admixture of various substances.

Incrassantia, in-kras-san'she-ah (*in*, *crassus*, thick). Medicines once believed to possess the power of thickening the humors, as mucilaginous substances.

Incrassa'tion. Thickening; inspissation.

Increase, in'kreese (*in*, *cresco*, to grow). Augmentation of the size or weight of a body, by the application of new molecules around those already existing.

Incremable, in-krem'a-b'l. Incapable of being consumed by fire.

Incremation, in-kre-ma'shun. Cremation.

Increment, in'kre-ment. Growth, increase.

Incruciatio, in-kru-se-ah'she-o (*in*, *crucio*, to cross). Decussation. **I. nervo'rum optico'rum**, chiasm.

Incrustation, in-krus-ta'shun (*in*, *crusta*, crust). Act of forming a crust on the surface of a body. The crust itself. Calcareous or cartilaginous deposit in organs. Healing by scabbing or subcrustaceous cicatrization.

Incuba'tion (*incubo*, to lie upon). Word used in natural history for sitting of birds upon their eggs or development of the fecundated ovum. Maintenance of temperature of warm air, say of 98° Fahr., around a diseased part. Employed figuratively in medicine for the period that elapses between the introduction of a morbific principle into the animal economy and

the invasion of the disease. The following table (Vierordt) has been arranged to show the

PERIOD OF INCUBATION OF THE MORE IMPORTANT DISEASES.

(See *Eruptive Fevers* for the period of incubation of diseases of that class.)

Plague	2–7 days.
Diphtheria	2–3 "
Recurrent fever	6–9 "
Epidemic cerebro-spinal meningitis	4–5 " (S. Richter).
Malaria	About 14 days (6–20).
Asiatic cholera	2–4 days (also less), 36–45 hours (Banti) (also only 24–30).
Dysentery	3–8 days.
Yellow fever	2–3 "
Mumps	7–14 " (4–25), 20–22 hours, less often 14–18 (Rilliet and Lombard).
Pneumonia	Probably 4 days (2–7) (Caspar). At utmost, 2 days (N. Flindt).
Influenza	Stated at 5–11 days (Kormann).
Syphilis	3–4 weeks (up to appearance of local symptoms); most frequently 15–25, less frequently 20–30, days.
Second incubation	6–7 weeks.
Total length of time up to general affection	9–11 weeks.
Anthrax	4–7 days (appearance of carbuncle).
Glanders	3–5 days.
Erysipelas	15 hours; very latest, 61 hours.
Hydrophobia	20–59 days, very latest (Ph. Bauer).

Incubative, in'ku-ba-tiv. Relating to incubation, as the incubative period of a disease.

Incubator, in'ku-ba-tor (*incubo,* to hatch). Arrangement for hatching eggs artificially by preserving an equable temperature, or for developing and maintaining vitality in children prematurely born. An incubator is also employed in bacteriological work for development of certain forms of bacteria at a higher temperature than that usually required for others. See *Couveuse.*

Incubitio (in-ku-bish'e-o) or **Incubitus,** in-ku'bitus. Incubation.

Incubus (in'ku-bus) or **In'cubo.** Nightmare; wild-mare. Sensation of a distressing weight at the epigastrium during sleep, and of impossibility of motion, speech, or respiration; the patient awaking in terror after extreme anxiety. It often arises from difficult digestion or uneasy position or in consequence of severe emotions. The sensation of suffocation was formerly ascribed to the person being possessed; the male spirits were called *incubes,* the female *succubes.* **I. vigilan'tium,** daymare. This is produced during wakefulness, the sense of pressure being severe and extending over the abdomen; respiration frequent, laborious, and constricted; eyes fixed; sighing deep and violent; intellect undisturbed.

Incudeus, in-ku'de-us. Laxator tympani muscle.

Incunabula, in-ku-nab'u-lah. Swathing or swaddling clothes or bands.

Incuneatio, in-ku-ne-ah'she-o (*in, cuneus,* a wedge). Gomphosis. Impaction. See *Wedged.*

Incurable, in-ku'ra-b'l. Remediless; irremediable (*in, cura,* cure). Not susceptible of cure (applied to patients and diseases).

Incuria, in-ku're-ah (*in, cura,* care). Want of care; neglect.

Incursus arteriarum, in-kur'sus ar-ter-e-ar'um (*in, curro,* to run). Impulse; pulse.

Incurvation, in-kur-va'shun (*in, curvo,* to crook). Production of a curve; curved condition of a part.

Incus, in'kus (anvil). Small bone of the ear, so called from fancied resemblance to a smith's anvil; situate in the cavity of the tympanum between the malleus and orbicular bone.

Indagation, in-dag-a'shun (*indago,* to trace out). Examination of the vagina with the finger.

Indenta'tion. Notched condition produced by pressure, as of the teeth on the tongue in glossitis.

Index, in'deks (*indico,* to point out). Something that points as an indicator; forefinger, index finger. See *Digitus.* **I., alve'olar,** ratio of basialveolar to basinasal length of skull, the latter being taken at 100°. **I., bas'ilar,** ratio of prominence of skull, on plane surface anterior to basion, to prominence of whole skull. **I., cephal'ic,** index of cranium, especially in regard to ratio of maximum length to maximum breadth; skulls with a breadth-index above 80 are brachycephalic; from 75 to 80, mesaticephalic; below 75, dolichocephalic. **I., ceph'alo-fa'cial,** ratio of combined capacity of orbits and nasal fossæ to capacity of skull. **I., ceph'alo-na'sal,** ratio of capacity of nasal fossæ to that of skull. **I., ceph'alo-or'bital,** ratio of capacity of orbits to that of skull. **I., ceph'alo-rachid'ian** or **ceph'alo-spi'nal,** ratio between area of occipital foramen and capacity of skull. **I., cer'ebral,** ratio of largest diameters, or transverse diameters, of brain to antero-posterior. **I., cer'ebro-fa'cial,** I., cephalofacial. **I., cra'nial,** see *I., cephalic.* **I. of the ear,** ratio of breadth of ear to its length. **I., fa'cial,** ratio of greatest width of face to greatest length. **I., fron'tal,** ratio of smallest frontal diameter of skull to greatest transverse diameter. **I., fron'to-pari'etal,** ratio of smallest frontal diameter to greatest width of skull. **I., gnath'ic,** I., alveolar; see *I., cranial.* **I. of the head,** ratio of greatest height of face to greatest diameter. **I., hu'mero-ra'dial,** relative length of forearm to arm, latter being taken at 100. The index is higher in the fœtus and infant. **I., orb'ital,** ratio of vertical height of base of orbit to transverse width. **I., pel'vic,** ratio of antero-posterior to transverse diameter of pelvis. **I., refrac'tive,** ratio between sines of angles of incidence and refraction when a ray of light passing from one medium to another is refracted. **I., rhinocephal'ic,** ratio of capacity of nasal fossæ to that of the skull. **I., sac'ral,** ratio of maximum length of sacrum to maximum width. **I., scap'ular,** ratio of maximum length and width of scapula. **I., thora'cic,** ratio of antero-posterior diameter of the thorax to its maximum transverse diameter at the inferior extremity of the sternum.

Indian arrowwood, in'de-an ar'roh-wood. See *Euonymus.* **I. bread,** see *Lycoperdon tuber.* **I. cup,** Sarracenia purpurea. **I. hemp,** Cannabis Indica. **I. loaf,** see *Lycoperdon tuber.* **I. mal'low,** Abutilon avicennæ. **I. paint,** Hydrastis Canadensis. **I. phys'ic,** Gillenia trifoliata; small-flowered Gillenia stipulacea.

India-rub'ber. Caoutchouc.

Indican (in'de-kan) or **In'dicane.** Yellow acid material obtained from Isatis tinctoria, also from bloody perspiration, urine, etc.; in the urine especially in wasting diseases, peritonitis, constipation, etc., and giving that fluid a bluish coloration by its spontaneous decomposition. Excessive quantity of indican in urine is called *Indicanu'ria.*

Indicant, in'de-cant (*indico,* to point out). Anything pointing out the means to be used for cure of disease.

Indicanuria, in-dik-an-u're-ah. See *Indican.*

Indicating (in'de-kat-ing) **day.** The middle day of the septenary was so called because it was thought it would give indications of the crisis to occur on the last day of the septenary.

Indication, in-de-ka'shun. The object proposed in the employment of means for the cure of disease; manifestation afforded by the disease of what is proper to be done for its removal or alleviation; symptom.

Indicator, in'dik-a-tor. Extensor proprius indicis. See *Digitus* and *Index.*

Indifferent, in-dif'fer-ent. Not differentiated or capable of differentiation (in embryology).

Indigenous, in-dij'en-us (*indi,* in, *geno, gigno,* to generate). Inborn; native in a country, in opposition to exotic.

Indigestion, in-de-jest'yun (*in, digero,* to set in order). Lack of or difficulty in digestive action. If the symptoms are those of derangement of intestinal functions, it is called *intestinal indigestion;* dyspepsia. **I., al'kaline,** see *Dyspepsia.* **I., gas'tric,** stomachal indigestion or dyspepsia. **I., intes'tinal,** difficult digestion from causes acting in the intestine. It

occurs usually two or three hours after eating. **I., neu'tral,** see *Dyspepsia.*

Indigitation, in-dij-it-a'shun (*in, digitus,* finger). Intussusception.

Indignabundus (in-dig-nah-bun'dus) or **Indignatorius,** in-dig-na-to're-us (*indignari,* to be indignant). Rectus externus oculi.

Indigo, in'dig-o (*India*). A dye-stuff of a deep azure-blue color, obtained by a fermentative process from Indigofera anil (I. suffruticosa), I. argentea (I. articulata or tinctoria or glauca or colorata), and I. tinctoria or Indica; sometimes used by the apothecary for coloring preparations. It has been administered internally in spasmodic diseases, especially epilepsy, chorea, convulsions, etc. **I., Amer'ican wild,** Baptisia tinctoria. **I., false,** see *Sophora tinctoria, Galega officinalis.* **I. plant,** indigofera and indigo. **I. weed,** wild or yellow Sophora tinctoria.

In'digo-car'mine test. Used for testing urine for sugar by means of indigo, carmine, and sodium carbonate.

Indigofera, in-dig-of'er-ah (*indigo, fero,* to bear). See *Indigo, Sophora tinctoria.* **I. angustifo'lia,** species of E. Indies, from which indigo is procured; root is tonic and antipyretic. **I. anil,** W. Indian species, important source of indigo; root is employed in calculus and syphilis; leaves are tonic and antipyretic, and externally emollient. **I. argente'a** or **articula'ta,** species of E. Indies and Asia; seeds are anthelmintic, root is used in gonorrhœa, and root and leaves have similar therapeutic action to I. anil. **I. aspalathifo'lia,** species of E. Indies, root of which is given in aphthous conditions of the mouth; other parts are used in cancer and elephantiasis. **I. enneaphyl'la,** species of E. Indies, infusion of which is diuretic; juice is given in scurvy, syphilis, etc. **I. gla'bra,** of E. Indies, resembles I. anil. **I. glau'ca,** I. argentea. **I. In'dica,** I. tinctoria. **I. oblongifo'lia,** of Arabia, is employed in colic. **I. paucifo'lia,** wild indigo, is employed in the E. Indies, the root being cathartic; stem is used for a gargle in mercurial sore mouth. **I. tincto'ria,** common indigo plant of E. Indies; leaves are alterative and employed in inflammation of the liver, as well as externally over the bladder to promote urination; the root is antilithic. **I. trifolia'ta,** leaves of this E. Indian tree are tonic, alterative, astringent, and demulcent.

Indigotin, in-dig-o'tin. $C_{16}H_{10}N_2O_2$. Coloring matter of indigo, a blue uncrystallizable powder.

Indigouria, in-dig-oo're-ah (*indigo, ouron,* urine). When indican in urine becomes decomposed, indigo is found in the urine; hence the name.

Indigum, in'dig-um. Indigo.

Indisposition, in-dis-po-zish'un (*in, dispono,* to put in order). The state of being unwell; slight functional disturbance scarcely deserving the name of disease.

Indissoluble, in-dis-sol'u-b'l. Insoluble.

Indium, in'de-um. Very soft white metal; not important medically.

In'dol. Crystalline substance, C_8H_7N, to which has been ascribed the characteristic odor of fæces; one of the results of digestion in the small intestines.

Indolent, in'do-lent (*in, doleo,* to be in pain). Exhibiting little or no pain; slow in growth.

Indolentia, in-do-len'she-ah. Cessation or absence of pain.

Indoles, in'dol-ees (*inolesco,* to grow). Natural disposition or character. **I. an'imi,** natural disposition or character of mind. **I. mor'bi,** nature or character of a disease.

Indosynclonus, in-do-sin'klon-us (*Ind,* India, *sunklonos,* tremor). Beriberi.

Induced electricity, in-duced' e-lek-tris'it-e. Faradization.

Inductio, in-duk'she-o (*induco,* to lead in). Action of spreading a plaster upon linen or upon a surface.

Induction, in-duk'shun. Bringing on anything, as labor. See *Inductio.* **I., electric'ity of,** faradization.

Inductometer, in-duk-tom'et-ur (*induco,* to induce, *metron,* measure). Instrument for determining the degree of electrical induction.

Indu'cula (*induo,* to put on). Strait waistcoat.

Indumentum, in-du-men'tum (*induo,* to put on). Covering or surrounding of a part or organ. **I. cor'dis,** pericardium. **I. ner'vi** or **nervo'rum,** neurilemma; perineurium. **I. ventriculo'rum,** lining membrane of the ventricles of the brain. **I. vit'reum,** enamel.

Indurans, in-du'rans (*in, durus,* hard). Medicine which hardens the part to which it is applied.

Indurated, in'du-ra-ted (*in, durus,* hard). Hardened; applied to lesions with induration. Affected with induration or hardening, as indurated chancre.

Induratio, in-du-rah'she-o. Induration. **I. cu'tis,** scleroderma, sclerema cutis. **I. glandula'rum,** schirrous cancer of glandular structures. **I. Hunte'ri,** Hunterian or indurated chancre. **I. intestino'rum,** scirrhus of the intestines. **I. malig'na,** scirrhus. **I. re'num,** induration of the kidneys. **I. te'læ cellulo'sæ neonato'rum,** sclerema neonatorum; see *Induration.* **I. testic'uli** or **tes'tis,** inflammation and induration of the testicle. **I. thyreoï'deæ,** goitre. **I. ventric'uli scirrho'sa,** schirrus of the stomach.

Induration, in-du-ra'shun. Hardening. Hardness supervening occasionally in an inflamed part; a termination of inflammation, and owing to change in the nutrition of the part. **I. of are'olar** or **cel'lular tis'sue,** *Compact œdema of infants, Sclerosis, Skinbound disease, Skinbind, Skintight, Hidebound.* Disease attacking infants a few days after birth. Induration of the areolar tissue of the adult is a result of inflammation of the corium, chorionitis. Two forms have been described: acute, or sclerema elevatum, and chronic, or sclerema atrophicum. **I., atroph'ic pig'mentary,** alterations in pigment of the mucous membrane of the stomach, with atrophy of the glandular structure, induration being due to hyperplasia of the fibrous connective tissue. **I. of the brain, brown,** condition in which, after the congestive stage of pneumonia and valvular obstruction, pigment from the circulation is deposited in the structure of the lung. **I., cyanot'ic,** condition in which, after prolonged venous congestion, a hardened mass is formed of transuded blood and serum. **I., fi'brous,** interstitial pneumonia. **I., mi'tral,** thickening and hardening of the mitral valve, as in some forms of endocarditis. **I., pig'ment,** I., brown. **I., plas'tic, of pe'nis,** sclerosis of penis. **I., prim'itive, specif'ic,** syphilitic chancre.

Indurescentia, in-du-res-sen'she-ah. Induration, or production of it.

Indusium, in-du'ze-um (shirt, small tunic). Membranous covering or coat. Amnion.

Inebriant, in-e'bre-ant (*in, ebrio,* to intoxicate). Intoxicating.

Inebriation, in-e-bre-a'shun. Drunkenness.

Inebri'ety. Drunkenness; habitual intoxication.

Inedia, in-e'de-ah (*in, edo,* to eat). Fasting. Anorexia.

Inertia, in-er'she-ah (*iners,* inactive). Sluggishness, inactivity. **I. of the womb,** diminution and even total cessation of the contractions of the uterus during labor. Languor after expulsion of the fœtus; atony of the uterus; paralysis of the uterus.

Inesine, in'e-seen. Alkaloid from hairs of seeds of Strophanthus hispidus.

Inesis (in-e'sis) or **Inethmos,** in-eth'mos. Purgation, evacuation, excretion.

Infancy, in'fan-se (*in, fans,* speaking). Early childhood. Childhood, including age from birth till the seventh year. See *Age.*

Infans, in'fans. Infant, baby, child, one in infancy. In law one who has not attained the age of legal capacity, generally fixed at twenty-one years. **I. re'cens na'tus,** new-born child.

Infantia, in-fan'she-ah. Infancy.

Infanticide, in-fant'i-side (*infans,* child, *cædo,* to kill). Child-murder. Murder of a child newly born, or on the point of being born, by actual commission or omission of cares necessary to its preservation.

Infarct, in-farkt' (*in, farcio,* to stuff). Plug or obstruction in a canal or blood-vessel; extravasation of blood. Thick deposit in a tissue after long inflammation.

Infarction, in-fark'shun (*in, farcio,* to stuff). Obstruction of the intestines by undigested masses of food. Obstruction of other tissues or organs by embolism, extravasation, or infiltration. Infarct, or formation of the same.

Infarctus, in-fark'tus. See *Infarct* and *Infarction.* Obstruction. **I. hæmopto'icus Laennec'ii,** see *Hæmoptysis.* **I., hemorrhag'ic,** condition dependent on hyperæmia or congestion from capillary embolism; rupture and extravasation resulting from pressure of the blood within circumscribed spaces. **I. intestino'rum,** obstruction of the intestines. **I. lac'tei extremitat'um,** phlegmatia dolens. **I. lie'nis,** tumefaction of the spleen. **I. mam'mæ lac'teus,** knotty tumor of the female mammæ, owing to the accumulation and arrest of milk in the galactophorous ducts. **I. rena'lis,** obstruction in course of blood or urine in the kidney of the new-born. **I. u'teri,** obstruction of the womb or of the vessels of the womb.

Infectant, in-fek'tant (*inficio,* to taint). That which can taint or infect.

Infected, in-fek'ted. Tainted with morbid matter of disease.

Infectio, in-fek'she-o. Infection. **I. purulen'ta,** see *Pyohæmia.*

Infection, in-fek'shun. Material essential to, and concerned in the propagation and spread of, communicable diseases. Process by which disease is communicated to an individual by diseased germs from the external atmosphere. See *Contagion.* **I., pu'rulent,** pyohæmia. **I., pu'trid,** septicæmia. **I., sep'tic,** influence of septic germs on healing of wounds. **I. by vicin'ity,** power of extension of a tumor to neighboring parts, without seeming to be connected with the primary growths.

Infectious, in-fek'shus. See *Contagious.*

Infecund, in-fek'und. Sterile.

Infecundity, in-fek-un'dit-e (*in, fecundus,* fruitful). Unfruitfulness; sterility. See *Fecundity.*

Inferent, in'fer-ent. See *Afferent.*

Inferior, in-fe're-or. Lower.

Infibulation, in-fib-u-la'shun (*in, fibula,* clasp). An operation, formerly practised, consisting in passing a ring through the prepuce, after having drawn it over the glans, to prevent coition. In women, to preserve their chastity, the ring was passed through the labia majora.

Infiltrated, in'fil-tra-ted. Affected with infiltration.

Infiltration, in-fil-tra'shun (*in, filtro,* to filter). Effusion. Passage or effusion of a fluid into the areolæ of any texture, and particularly of the areolar membrane. The fluid effused is ordinarily the liquor sanguinis, sometimes blood or pus, fæces, or urine. When infiltration of a serous fluid is general, it constitutes anasarca; when local, œdema. **I., albu'minoid, albu'minous,** or **am'yloid,** amyloid degeneration; see *Lardaceous.* **I., black,** anthracosis. **I., calca'reous,** see *Cretifaction.* **I., choles'terine,** see *Lardaceous.* **I., col'loid,** colloid degeneration. **I., drop'sical,** œdema. **I., fat'ty,** see *Fatty.* **I., fi'brinous,** effusion of plastic lymph into the structure of inflamed tissue. **I., gelat'inous,** effusion of jelly-like matter into spaces between miliary tubercles. **I., med'ullary,** coalescence of affected glands of the intestine in typhoid fever. **I., my'eloid,** infiltration of bones with characteristic cells of medullary tumors. **I., œdem'atous,** œdema. **I., pig'mentary,** see *Pigmentation.* **I., pu'rulent,** see *Purulent* and *Hepatization.* **I., sangin'eous,** extravasation of blood; ecchymosis. **I., se'rous,** œdema. **I., tuber'cular** or **tuber'culous,** I. with tubercle. **I., wax'y,** see *Lardaceous.*

Infinitesimal, in-fin-it-es'im-al (*in, finitus,* limited). Unlimited. Epithet employed by the homœopathists for their endless subdivisions of drugs; the decillionth of a grain, for example, is an "infinitesimal dose."

Infinitovist, in-fin'it-ov-ist. One who believes that all organized bodies are the result of the development of germs encased in each other *ad infinitum.*

Infirm, in-firm' (*in, firmus,* firm). Not firm or sound; weak; feeble.

Infirmarium (in-fur-mar'e-um), **Infirmary** (in-fur'ma-re), or **Infirmatorium,** in-fur-mat-o're-um. Hospital.

Infirmity, in-furm'it-e. Disease which has become habitual, owing either to its chronic character or its numerous relapses.

Inflamed' (*in, flamma,* flame). Phlogosed. Affected with inflammation.

Inflammable (in-flam'ma-b'l). Liable to inflammation or to catch fire. **I. air,** carburetted hydrogen.

Inflammatio, in-flam-mah'she-o. Inflammation; phlegmon. **I. abdomina'lis,** inflammation of any of the abdominal viscera. **I. adhesi'va,** adhesive inflammation. **I. artic'uli maxil'læ inferio'ris,** inflammation of the articulation of the lower jaw. **I. au'ris,** otitis. **I. bronchio'rum,** bronchitis. **I. cæ'ci,** typhlo-enteritis. **I. cap'sulæ len'tis,** inflammation of membrane of the lens. **I. catarrha'lis,** catarrh. **I. cerebel'li,** cerebellitis. **I. clitor'idis,** I. of the clitoris; nymphitis. **I. conjuncti'væ,** see *Ophthalmia.* **I. cor'neæ,** keratitis. **I. cox'æ,** inflammation of the parts about the hips. **I. croupo'sa,** croupy inflammation. **I. cys'tidis fel'leæ,** I. of the gall-bladder. **I. deb'ilis,** see *Inflammation.* **I. epiglot'tidis,** epiglottitis. **I. erysipelato'des, erysipelato'sa,** or **erythe'ma,** erysipelatous inflammation. **I. exanthemat'ica,** exanthem. **I. exul'cerans,** ulcerative inflammation. **I. fau'cium,** cynanche, isthmitis. **I. gas'teris,** gastritis. **I. ge'næ,** gnathitis, melitis. **I. gingi'væ,** I. of the gum. **I. glandula'rum lymphatica'rum,** hydradenitis, lymphadenitis. **I. glandula'rum sublingua'lium,** I. of sublingual glands. **I. gu'læ,** œsophagitis. **I. hep'atis,** hepatitis. **I. hep'atis len'ta,** hepatitis (chronic). **I. inter'na,** empresma. **I. intestino'rum,** enteritis. **I. i'ridis,** iritis. **I. jec'oris,** I. of the liver. **I. laryn'gis,** laryngitis. **I. lie'nis,** I. of the spleen. **I. ligamento'rum,** I. of ligaments. **I. lin'guæ,** I. of tongue. **I. mediasti'ni,** mesodmitis. **I. medul'læ spina'lis,** myelitis. **I. mus'culi pso'as,** psoitis. **I. musculo'rum,** myositis. **I. musculo'rum abdomina'lium,** myocœliitis. **I. nervo'rum,** neuritis. **I. occul'ta,** latent inflammation. **I. oculo'rum,** ophthalmia. **I. œsoph'agi,** œsophagitis. **I. omen'ti,** epiploitis. **I. os'sis,** osteitis. **I. ova'rii,** oaritis. **I. pala'ti,** hyperoitis. **I. pancreat'is,** pancreatitis. **I. parenchymat'ica,** parenchymatitis. **I. parot'idum,** parotitis, cynanche parotidæa. **I. pec'toris,** pleurisy. **I. pec'toris acu'ta,** pneumonia. **I. peracu'ta,** hyperphlogosis, hyperphlegmasia. **I. pericar'dii,** pericarditis. **I. perior'bitæ,** ophthalmia. **I. perios'tei,** periostitis. **I. perios'tei or'bitæ,** periorbitis. **I. peritonæ'i,** peritonitis. **I. phagedæ'nica,** phagedæna. **I. pharynge'a** or **pharyn'gis,** pharyngitis; cynanche pharyngea. **I. phreni'tis,** phrenitis. **I. pleu'ræ,** pleuritis. **I. pneumon'ica,** pneumonia. **I. pulmo'num,** pneumonia. **I. re'num,** nephritis. **I. re'num succenturiato'rum,** paranephritis. **I. ret'inæ,** dictyitis, retinitis. **I. rheumat'ica,** inflammatory rheumatism. **I. sclerot'icæ,** sclerotitis. **I. scro'ti,** oschitis. **I. sep'ti transver'si,** diaphragmitis. **I. sin'uum fronta'lium,** I. of frontal sinuses. **I. stom'achi,** gastritis. **I. superfic'iei inter'na cor'dis,** endocarditis. **I. te'læ cellulo'sæ,** ethmyphytis. **I. te'læ fibro'sæ,** inohymenitis. **I. tes'tium,** hernia humoralis. **I. tonsilla'rum,** cynanche tonsillaris. **I. tor'pida,** asthenic inflammation. **I. tu'nicæ hyaloi'deæ,** hyalitis. **I. tym'pani,** tympanitis. **I. ure'thræ,** gonorrhœa. **I. usto'ria,** burn or scald. **I. u'teri,** metritis. **I. u'teri catarrha'lis,** see *Metritis.* **I. u'teri et peritonæ'i,** metroperitonitis. **I. u'vulæ,** uvulitis. **I. vaso'rum,** angeitis. **I. vaso'rum lymphatico'rum,** angeioleucitis. **I. ventric'uli,** gastritis. **I. ventric'uli et intestino'rum,** gastro-enteritis. **I. vesi'cæ,** cystitis. **I. vesi'cæ fel'leæ,** inflammation of the gall-bladder.

Inflammation (*in, flamma,* flame). Inflammation is

not easily defined, except by its symptoms and pathological changes. Simple accumulation of blood in the capillaries is hyperæmia, not inflammation. The latter requires, in addition, altered nutrition of the blood-vessels and of surrounding tissues. These may be thus described in an abstract (Green):

The process of inflammation comprises changes in the blood-vessels and circulation, exudation of fluid and of blood-corpuscles from the vessels, and changes in the inflamed tissues. All these changes go on together.

1. *Changes in the Blood-vessels and Circulation.*—Experiments on animals show that, as a rule, the first effect of injury is to cause dilatation of the arteries, which gradually extends to the veins and capillaries; this steadily and slowly increases for several hours, associated at the commencement of the process with acceleration in the flow of blood for a short time, followed by a considerable retardation in the circulation, the vessels still remaining dilated. Pulsation is now evident in the smallest arteries, and the stream is slow enough to allow of the distinction of individual corpuscles in the capillaries and smaller veins—perhaps even in the arterioles. The acceleration or determination of blood is not constant, and often subsides without the occurrence of any of the characteristic phenomena of inflammation. In some cases contraction occurs, after which dilatation with slowed stream commences. This dilatation with diminished velocity comes on slowly, is constant and permanent so long as the cause acts, and must be regarded as the essential vascular change of the inflammation. Narrowing of the veins by layers of leucocytes, among which there are no red corpuscles, now increases the obstruction to the circulation, which becomes slower and slower. The red corpuscles, with some white, accumulate in the capillaries, which appear as if distended by a red injection-mass. After a time all onward movement ceases in the capillaries, and their contents sway to and fro with the pulse. This is the stage of oscillation, and it is succeeded by that of stasis, in which no movement of any kind occurs. Finally, thrombosis or coagulation may take place.

2. *Escape of Fluid and of Blood-corpuscles from the Vessels.*—In most inflammations the escape of white corpuscles from the vessels is far in excess of that of the red; but in the most severe, in which stagnation is induced in a large number of capillaries, the usual state of affairs may be reversed. From such capillaries red corpuscles almost alone pass out, occupy the interstices of the tissues, and give the exudation a hemorrhagic character, whereas if the blood is in motion, most red corpuscles pass through the inflamed area, whilst the stickier white adhere to the wall. Intensity of injury and vascularity (*i. e.* number of capillaries) determine the proportion of red corpuscles in an exudation. They pass out chiefly from the capillaries, and several often escape in quick succession from one spot, giving rise to a red spot visible to the naked eye as a punctiform hemorrhage. No rupture of vessels occurs, as may be shown by injection. Both red and white corpuscles at first remain near the vessels whence they have escaped, but they are pushed away by other corpuscles, washed away by the escaping fluid, and the white corpuscles move away by their peculiar power of locomotion. Thus they may ultimately be found far from their source. It seems almost certain that Cohnheim's view is correct—viz. that all new cells found in inflamed tissues as a direct result of the injury which caused the process are escaped blood-corpuscles.

One of the earliest effects of the vascular changes in inflammation is increased exudation of fluid. The composition of inflammatory effusion is not constant. In the most acute inflammations it contains a large number of red corpuscles; in less severe, white corpuscles are greatly in excess of the red. The more severe the process, the more nearly does the fluid approach plasma in its composition and tendencies, whilst in the less severe it becomes very like the fluid in mechanical hyperæmia.

3. *Changes in the Inflamed Tissues.*—The tissues of an inflamed part are softer than natural, watery or solid-looking, and in either case the component tissues are blurred or altogether indistinguishable. Microscopically, the tissue-elements are at first separated by fluid and obscured by leucocytes and fibrin-filaments; the tissue-cells, when not obscured by leucocytes, are either structureless masses from coagulation-necrosis or are undergoing fatty degeneration; the tissue-fibres are swollen, less distinct, and ultimately degenerate. Red corpuscles are found in greater or smaller numbers in even moderately severe inflammations.

The Essential Lesion of Inflammation is, as Lister showed, a change in the vessel-wall resulting from an injury, which increases the friction naturally offered to the passage of the blood, and is a step toward death. There is no detectable structural alteration of the vessel, however. To cover all that we now know of the escape of fluid and corpuscles, it is necessary to assume that the molecular change not only increases the friction between the blood and the vessel-wall, but also that it renders the latter more porous.

The Clinical Signs of Inflammation are redness, heat, swelling, pain, and impaired function. *Redness* and *heat* may be taken together, as depending upon the quantity of blood passing through the part in a unit of time, which, as a rule, is greater than normal, the excess being most marked in the early stage of the process, when the part is bright red and hot. *Swelling*, beyond the most trivial due to dilated vessels, arises from exudation of fluid and corpuscles. It varies in amount with the distensibility of the part, being most marked in such as the scrotum and eyelids, least so in bone. When due to fluid (*œdema*), the affected part 'pits,' unless it is very tensely stretched. Swelling may be absent in cases of slight inflammation, in which the lymphatics suffice to carry away the increased exudation. *Pain* is due to pressure of the effusion on nerve-endings, perhaps also to chemical irritation of them. It is greater the more sensitive and the more rigid the part and the more rapid the effusion into it, as is seen in acute suppuration in a digital tendon-sheath. It is often throbbing from the increase of tension with each heart-stroke. *Impaired function* is due to the fact that every tissue is injured by inflammation.

Inflammations of the areolar and serous membranes greatly agree, and those of the mucous membrane and skin; the former being more active, and constituting the phlegmonous variety; the latter, the erythematic or erysipelatous. Of this variety is the diffusive inflammation produced by morbid poisons, as wounds occurring during dissection and in workers in bone, hence called bone fever. Inflammation may end by resolution, suppuration, gangrene, adhesion, effusion, or induration.

There is an instinctive kind of inflammation established for the union of divided parts, whether the union takes place immediately or by the aid of an intermediate body. This is the adhesive inflammation of some. See *Adhesion, Callus, Cicatrix.*

The term inflammation has been extended to include every local exaltation of the organic movements sufficiently great to disturb the harmony of the functions and disorganize the texture in which it is situate, and to irritations which do not induce disorganization of textures, and which were previously, and are still, called fevers. Inflammations have also been named, according to duration, density, local effects, etc., acute, passive, chronic, asthenic, sthenic, ulcerative, gangrenous, diffuse, etc. Embolic inflammation is caused by the plugging of an artery by a detached portion of fibrin or other substance driven into it by the action of the heart.

Examination of the blood drawn in inflammation exhibits increase of the fibrinous element—the average proportion of which, in healthy blood, is about three in the thousand. In inflammation it at times rises as high as ten. In fevers unaccompanied with

inflammation the proportion is natural or below the average; but whenever inflammation supervenes, it immediately rises.

External inflammation is easily detected by the characters already mentioned — internal, by disturbance of function and pain upon pressure; but the last sign is often not available. Both forms require the removal of all irritation and the reduction of vascular excitement and of nervous irritability by sedatives, refrigerants, counter-irritants, etc.

Inflammation is not always active. There is a form, inflammatio debilis, occurring in low conditions of the system and in broken-down constitutions, which requires stimulant rather than sedative treatment.

Inflamma'tion, adhe'sive. Variety of inflammation in which union of parts takes place by exudation of plastic matter; see *Inflammation* and *Adhesion.* **I., adynam'ic,** I., asthenic. **I., aplas'tic,** I. in which there is exudation of lymph not capable of forming tissue. **I., artic'ular,** arthritis. **I., asthen'ic,** I., generally chronic, attacking parts of the body that are in an unhealthy or weakened condition. **I. of blad'der,** cystitis. **I. of brain,** see *Encephalitis* and *Phrenitis.* **I. of cæ'cum,** typhlo-enteritis. **I., ca'seous** or **cheesy,** I. in which, from loss of watery constituents, the exudation becomes yellowish and cheesy. **I., catar'rhal,** catarrh. **I., chees'y,** I., caseous. **I. of co'lon,** colitis. **I., conges'tive,** inflammation resulting from intense hyperæmia. **I. by contigu'ity,** I. extending to parts in the vicinity. **I. by continu'ity,** I. extending through continuous tissue or tissues. **I., croup'ous,** I. accompanied with croupous or diphtheritic exudation. **I. of di'aphragm,** diaphragmitis. **I., diffu'sive,** see *Inflammation.* **I., diphtherit'ic,** inflammation accompanied with diphtheritic inflammation; diphtheritis. **I., dry,** I. without exudation. **I. of the ear,** otitis. **I., embol'ic,** inflammation resulting from existence of septic embolus in a blood-vessel. **I., erethit'ic,** inflammation with increased irritability of surface. **I., erysipel'atous,** erysipelas. **I., erythem'atous,** erythema; erysipelas. **I. of the eye,** ophthalmia. **I., exu'dative,** I. with exudation of serum, mucus, fibrin, or pus. **I., fi'brinous,** I. with increased exudation of fibrin. **I., gan'grenous,** gangrene. **I., gen'eral,** synocha. **I., gonorrhœ'al,** gonorrhœa. **I., health'y,** inflammation leading to healthy union of parts. **I. of the heart,** carditis; pericarditis; endocarditis. **I., hyperplas'tic,** inflammation attended with increased formation of connective tissue. **I. hypostat'ic,** inflammation due to passive hyperæmia of a part or organ, as in hypostatic pneumonia, bedsores, etc. **I., inter'nal,** inflammation deeply seated in the body. **I. intersti'tial,** I. of connective tissue of any part or organ. **I. of intes'tines,** enteritis. **I. of i'ris,** iritis. **I. of kid'ney,** nephritis. **I. of lar'ynx,** laryngitis. **I. of liv'er,** hepatitis. **I. of lungs,** pneumonia. **I. of Malpigh'ian bodies,** kidney, Bright's disease of. **I., mem'branous,** I., croupous or diphtheritic. **I. of mes'entery,** mesenteritis. **I., metastat'ic,** inflammation of a part conveyed from another inflamed part, perhaps at a distance, through the circulation. **I. of mouth,** stomatitis. **I. of mouth, pseu'domem'branous,** stomatitis, pseudomembranous. **I. of mouth, pulta'ceous,** aphthæ. **I. of mus'cles,** myositis. **I., necrot'ic,** intense inflammation leading to necrosis or death of the part affected. **I. of nerves,** neuritis. **I., neuroparalyt'ic** or **neuropath'ic,** inflammation resulting from weakened or lost nervous supply to a part. **I. of o'vary,** oaritis. **I., parenchym'atous,** I. of parenchyma of an organ. **I. of parot'id,** cynanche parotidæa. **I., pellic'ular,** diphtheritis. **I. of pericar'dium,** pericarditis. **I. of peritonæ'um,** peritonitis. **I., phageden'ic,** phagedæna. **I., phleg'monous,** cellulitis. **I., plas'tic,** I. with production of fibrinous or plastic material and excess of colorless corpuscles. **I. of pleu'ra,** pleuritis. **I., prolif'erous, of ear,** chronic inflammation of middle ear, with new formations, hypertrophied conditions, adhesions, obstructions, exostoses, etc. **I., pseudomem'branous,** I., croupous; I. with formation of false membrane. **I., pu'rulent,** I. leading to abscess. **I., pu'trid,** I. attended with or followed by putrid discharge. **I., re'flex,** I. in any organ, the result of wound or injury of another or distant organ. **I., rheumat'ic,** rheumatic inflammation. **I., sep'tic,** I. from absorption or introduction of septic matter, micro-organisms for example. **I., se'rous,** I. of serous membranes, accompanied by serous exudation. **I., specif'ic,** I. from specific cause, as syphilis. **I., spon'goid,** medullary sarcoma; hæmatodes fungus; see *Encephaloid.* **I., sthen'ic,** I. fully developed as to intensity of symptoms in strong and healthy individuals. **I. of stom'ach,** gastritis. **I., stru'mous,** I., scrofulous. **I., sympathet'ic,** I., reflex. **I. of tes'ticle,** orchitis; epididymitis; hernia humoralis. **I. of tongue,** glossitis. **I. of ton'sil,** tonsillitis; amygdalitis. **I., tor'pid,** I., passive. **I., tox'ic,** I. from poisoning, local or systemic. **I., traumat'ic,** I. resulting from wound or injury. **I., unhealth'y,** intense inflammation causing structural modifications. **I. of u'terus,** metritis. **I., vas'cular,** I. involving coats of vessels of any part or organ. **I. of vein,** phlebitis. **I. of womb,** metritis.

Inflammatiun'cula (dim. of **Inflammatio**). Superficial and often insignificant inflammation, as of the skin.

Inflam'matory. *Phlogistic.* Belonging to inflammation, as inflammatory fever, etc. Blood is said to be inflammatory when cupped or buffed. See *Corium phlogisticum.* **I. blush,** erythema.

Inflamma'tus. Inflamed.

Inflatine, in-flat'een. Alkaloid from seeds of Lobelia inflata.

Inflatio, in-flah'she-o (*in, flo,* to blow). Inflation; flatulent colic; emphysema; puffiness. **I. parotidæ'a,** cynanche parotidæa. **I. u'teri,** physometra.

Infla'tion. Distending or distension with gas or air; insufflation. **I., tympanit'ic,** tympanites.

Inflec'tion. Bending or curving inward.

Inflex'io (*in, flecto,* to bend). Bending or curving inward.

Inflex'ion. Bending or curving inward.

In'fluens (*in, fluo,* to flow). Afferent, as a nerve.

Influentia, in-flu-en'she-ah. Influenza.

Influen'za (Italian for *influence*), or **Influen'za Europæ'a.** Influence; epidemic catarrh. Severe form of catarrh, usually with marked constitutional symptoms, as great prostration, chills, excessive secretion from nose, larynx, and bronchial tubes, cough, headache, fever, cardiac oppression, etc., which often occurs epidemically, and generally affects a large number of persons in a community. See *Catarrh, epidemic.* **I., gas'tric,** form of influenza in which the stomach is greatly congested.

Influen'zoid (*influenza, eidos,* resemblance). Resembling influenza.

Inform'itas (*in, forma,* form). Deformation or deformity.

Infortu'nium (*in, fortuna,* fortune). Misfortune. Contrafissura.

In'fra. As a prefix, beneath.

In'fra-acro'mio-humera'lis. Deltoid muscle.

In'fra-aryglottidæ'us-arytæ'no. Epiglottideus inferior.

Infra-atloïdæ'us. Subatloidæus; second cervical nerve.

In'fra-ax'illary. Below or beneath the axilla.

Infra-axoïdæ'us. Subaxoidæus; third cervical nerve.

Infrabran'chial. Below the gills.

Infraclavic'ular. Situate beneath the clavicle, as the infraclavicular fossa.

Infracom'missure. Inferior commissure.

Infraconstric'tor. Inferior constrictor of pharnyx.

Infracos'tal. Relating to inferior surface of costa or rib.

Infracosta'lis. Muscular tissue and fascia from inferior surface of rib to inferior surface of a rib below.

Infrac'tion. Fracture, greenstick.

Infradiaphragmat'ic. Situate under the diaphragm.

Infragen'ual (*infra*, beneath, *genu*, knee). Subpatellar.

Infraglen'oid. Situate below the glenoid cavity.

Infraglot'tic. Situate below the glottis.

Infrahy'oid. Situate below the hyoid bone.

In'fra-in'guinal. Situate below the groin.

Inframam'mary. Situate beneath the mamma.

Inframax'illary. Submaxillary; relating to the lower jaw.

Inframaxillosternodym'ia. See *Cephalosomatodymia*.

In'fra-obli'quus. Inferior oblique muscle.

In'fra-occip'ital. Below the occiput.

In'fra-or'bital or **Infra-or'bitar.** Suborbitar; below the orbit. Inferior portion of orbit.

Infrapu'bian. Situate beneath the pubis. See *Subpubic*. **I. lig'ament,** triangular ligament.

Infrarec'tus (*infra*, *rectus*, straight). Rectus inferior oculi.

Infrascap'ular. Beneath the scapula.

Infrascapula'ris. Subscapularis.

Infraspi'nal. Infraspinous.

Infraspina'lis. Infraspinatus.

Infraspina'ta fos'sa. See *Infraspinatus*.

Infraspina'tus (*infra*, *spina*, spine). Situate beneath the spine of the scapula. **Infraspina'ta fos'sa,** large excavation on the posterior surface of the scapula, beneath its spine, filled by the **Infraspina'tus mus'cle,** broad, flat, and triangular, attached by its base to the three inner quarters of the fossa, and inserted, by a long tendon, into the middle part of the great tuberosity of the os humeri. It turns the arm outward, and, when the arm is elevated, carries it backward. **I. accesso'rius, mi'nor,** or **secun'dus,** superior part of infraspinatus muscle arising from spine of scapula.

Infraspi'nous. Below the spine of the scapula.

Infraster'nal. Below the sternum.

Infratem'poral. Below the temple.

Infrathora'cic. Below the thorax.

Infraton'sillar. Below the tonsil.

Infratrochanter'ic. Below the trochanter.

Infratroch'lear. Below the trochlea.

Infric'tion (*in*, *frico*, to rub). Inunction.

Infrigida'tion. Refrigeration.

Infring'ens (*in*, *frango*, to break). Corrigent.

Infundib'ula (pl. of **Infundibulum**) **of kid'ney.** See *Calix*. **I. of the lung,** terminal branches and lateral twigs given off from the respiratory cavities in which the smaller bronchial tubes terminate.

Infundib'ular or **Infundib'uliform.** Shaped like a funnel. **I. fas'cia,** funnel-shaped layer of membrane investing the spermatic cord.

Infundib'ulo-ova'rian. Relating to ovary and Fallopian tube.

Infundib'ulo-pel'vic. Relating to pelvis and Fallopian tube.

Infundib'ulum (*in*, *fundo*, to pour). Funnel, of which various kinds are employed in pharmaceutical operations. Name given to many parts resembling a funnel. See *Proventriculus* and *Pulmo*. In surgery, infundibula or funnels are used to direct steam or vapors, to conduct the actual cautery to certain morbid parts, etc. **I. of the brain,** depression in the inferior paries of the middle ventricle, above the pituitary gland; anciently regarded as a canal by which the fluid collected in the ventricles of the brain was evacuated and poured into the nasal fossæ. Funnel-shaped process forming prolongation of tuber cinereum and terminating in the pituitary body. **I. cer'ebri,** I. of the brain. **I. of the coch'lea,** this, with the modiolus, forms the nucleus around which the gyri of the cochlea pass; imperfect funnel, the apex of which is common with that of the modiolus, and the base is covered with the apex of the cochlea, termed cupola. **I. cor'dis,** conus arteriosus. **I. of the ear,** I. of the cochlea. **I. of eth'moid bone,** one of the anterior cells of that bone, broad and expanded above and narrow below; opening above into the frontal sinus; below into the anterior part of the middle meatus of the nasal fossæ. **I. of Fallo'pian tube,** see *Tube, Fallopian*. **I. of fron'tal si'nus,** I. of ethmoid bone. **I. of the heart,** conus arteriosus. **I. of the kid'ney,** see *Calix*. **I. lacryma'le,** lacrymal sac. **I. of na'sal fos'sæ,** I. of ethmoid bone. **I. ova'ricum,** I. of Fallopian tube; see *Tube, Fallopian*. **I. tuba'rum Fallo'pii,** see *Tube, Fallopian*. **I. ventric'uli,** œsophagus. **I. ventric'uli ter'tii cer'ebri,** I. of the brain.

Infu'sion (*infundo*, *infusum*, to pour in). Pharmaceutical operation consisting in pouring a hot or cold fluid upon a substance whose medical virtues it is desired to extract. Infusion (infusum) is also the product of this operation. In surgery, infusion is the act of introducing into the veins medicinal substances by aid of an instrument called an infusor. See *Infusor*. **I. of angustu'ra,** infusum cuspariæ. **I. of bark,** infusum cinchonæ. **I. of bear'berry,** infusum uvæ ursi. **I. of bu'chu,** infusum diosmæ. **I. of calum'ba,** infusum calumbæ. **I. of capsi'cum,** infusum capsici. **I. of cascaril'la,** infusum cascarillæ. **I. of cat'echu,** infusum catechu compositum. **I. of Cayenne' pep'per,** infusum capsici. **I. of cham'omile,** infusum anthemidis. **I. of chiret'ta,** infusum chiretæ. **I. of cincho'na,** infusum cinchonæ. **I. of cincho'na, red,** see *Infusum cinchonæ*. **I. of cincho'na, yel'low,** see *Infusum cinchonæ*. **I. of cloves,** infusum caryophilli. **I. of colum'bo,** infusum calumbæ. **I. of cuspa'ria,** infusum cuspariæ. **I. of dan'delion,** infusum taraxaci. **I. of digita'lis,** infusum digitalis. **I. of dulcama'ra,** infusum dulcamaræ. **I. of er'got,** infusum ergotæ. **I. of fox'glove,** infusum digitalis. **I. of gen'tian, compound,** infusum gentianæ compositum. **I. of gin'ger,** infusum zingiberis. **I. of hops,** infusum humuli. **I. of horse'radish, compound,** infusum armoraciæ compositum. **I. of ju'niper,** infusum juniperi. **I. of kous'so,** infusum cusso. **I. of lin'seed,** infusum lini compositum. **I. of mati'co,** infusum matico. **I. of mint, com'pound,** infusum menthæ compositum. **I. of or'ange-peel,** infusum aurantii. **I. of or'ange-peel, com'pound,** infusum aurantii compositum. **I. of parei'ra bra'va,** infusum pareiræ. **I. of pink'root,** infusum spigeliæ. **I. of quas'sia,** infusum quassiæ. **I. of rhat'any,** infusum krameriæ. **I. of rhu'barb,** infusum rhei. **I. of rose,** infusum rosæ compositum. **I. of roses, ac'id,** infusum rosæ acidum. **I. of sage,** infusum salviæ. **I. of sarsapari'la,** infusum sarsaparillæ. **I. of sas'safras pith,** infusum sassafras medullæ. **I. of sen'ega** or **sen'eka,** infusum senegæ. **I. of sen'na,** infusum sennæ. **I. of serpenta'ria,** infusum serpentariæ. **I. of ser'pentary,** infusum serpentariæ. **I. of simaru'ba,** infusum simarubæ. **I. of slip'pery elm,** infusum ulmi. **I. of snake'root,** infusum serpentariæ. **I. of spige'lia,** infusum spigeliæ. **I. of tar,** see *Pinus sylvestris*. **I. of thor'oughwort,** infusum eupatorii. **I. of tobac'co,** infusum tabaci. **I. of vale'rian,** infusum valerianæ. **I. of Virgin'ia snake'root,** infusum serpentariæ. **I. of wild cher'ry** or **wild-cher'ry bark,** infusum pruni Virginianæ.

Infu'sor. Instrument for injecting medicinal substances into the veins; a kind of funnel, the elongated apex of which was stopped by a metallic rod, which could be withdrawn when the apex was introduced into a vein.

Infuso'ria (said to be so called because noticed in infusions when left exposed to the air). Microscopic animalculæ found in various fluids, and multiplying by gemmation. **I., intes'tinal,** infusoria in intestines of man and other animals.

Infu'sum. Infusion. **I. aca'ciæ cat'echu,** I. catechu compositum. **I. ama'rum vino'sum,** vinum gentianæ compositum. **I. angustu'ræ,** I. cuspariæ. **I. anthem'idis** (Ph. B.), infusion of chamomile; dose, f ℥j to f ℥iss. **I. armora'ciæ, I. armora'ciæ compos'itum,** *Compound infusion of horseradish* (armoracia, sinapis, aqua bullient.); dose, f ℥j to f ℥iij. **I. auran'tii** (Ph. B.), *Infusion of orange-peel* (aurant. cort. amar., aqua destillat.); dose, f ℥j to f ℥ij. **I. auran'tii compos'itum** (Ph. B.), *Compound infusion of orange-*

peel (aurant. cort., limon. cort. recent., caryoph., aq. destill. bullient.); dose, f ʒj to ij. **I. bra'sii,** wort. **I. braye'ræ** (Ph. U. S. and Br.), *Infusion of brayera* (brayera, ʒj; boiling water, Oj); dose, half a pint. **I. bu'chu** (Ph. Br.), infusum diosmæ. **I. by'nes,** wort. **I. calum'bæ** (Ph. Br.), **calom'bæ,** or **colom'bæ,** *Infusion of calumba* or *columba* (calumbo, aq. fervent.); dose, f ʒiss to ʒiij. **I. cap'sici,** *Infusion of capsicum* or *Cayenne pepper* (capsic., aq. bullient.); dose, f ʒiss. **I. caryophyl'li** (Ph. Br.), *Infusion of cloves* (caryoph., ʒij; aq. destillat. bullient., f ʒx); dose, f ʒiss to f ʒij. **I. cascaril'læ** (Ph. Br.), *Infusion of cascarilla* (cascarilla, aq. bullient.); made also by percolation; dose, f ʒiss–ij. **I. cas'siæ sen'næ,** I. sennæ compositum. **I. cat'echu compos'itum, I. cat'echu** (Ph. Br.), or **I. aca'ciæ cat'echu,** *Compound infusion of catechu* (catechu, gr. clx; cinnam. cort., gr. xxx; aq. bullient. destillat., f ʒx; macerate for an hour and strain; Ph. U. S.); dose, f ʒj to f ʒij. **I. chira'tæ** (Ph. Br.), or **I. chiret'tæ,** *Infusion of chiretta* (chirettæ, ʒij; aq. destill. at 120°, f ʒx; infuse for half an hour and strain); dose, as a tonic, f ʒij–ij. **I. cincho'næ** or **I. cincho'næ lancifo'liæ,** *Infusion of cinchona, Infusion of bark.* The officinal *Infusum cinchonæ* (Ph. U. S.) is an infusion of yellow cinchona (cinchon. flav. in pulv., ʒj; acid. sulph. aromat., ♏xxx; aquæ, Oj); dose, same as last. Infusion of red bark—*Infusum cinchonæ rubræ*—may be similarly made. **I. cincho'næ compos'itum, I. cincho'næ flav'æ, I. cincho'næ lancifo'liæ, I. cincho'næ ru'bræ,** see *Infusum cinchonæ.* **I. colum'bæ,** I. calumbæ. **I. cuspa'riæ** (Ph. Br.), I. angusturæ, *Infusion of cusparia* or *angustura* (cuspar. cort., distilled water); dose, f ʒj to f ʒiij. **I. cus'so,** *Infusion of kousso* (kousso, boiling distilled water; Ph. B.). **I. digita'lis** (Ph. U. S. and Br.), **I. digita'lis purpu'rea,** *Infusion of foxglove, Infusion of digitalis* (digital., gr. lv; aq. bullient., f ʒviiss; alcohol, f ʒvj; water, q. s. to make half a pint; cinnamomi, gr. lv); dose, f ʒj. **I. dios'mæ,** *I. buchu, Infusion of buchu* (diosma or buchu, ʒss; aq. destillat. bullient., f ʒx); dose, f ʒiss. **I. dulcama'ræ,** *Infusion of dulcamara* (dulcamara, aq. destill. bullient.); dose, f ʒj–ij. **I. er'gotæ,** *Infusion of ergot* (ergot., aq. destillat. bullient.; Ph. B.); dose, as a parturifacient, f ʒij. **I. eupato'rii,** *Infusion of eupatorium* or *thoroughwort* (eupator., aq. bullient.); dose, f ʒij. **I. gentian'æ compos'itum** (Ph. Br.), *Compound infusion of gentian* (gentian. rad. sliced, aurant. amar. cort., cort. limonis recent., aqua destillat. bullient.); dose, f ʒj to f ʒij. **I. hu'muli,** *I. lupuli, Infusion of hops* (humuli, aqua bullient); dose, f ʒiss to f ʒiij. **I. jabora'ndi** (Ph. Br.), *Infusion of jaborandi* (jaborandi, ʒss; aq. destillat. bullient., f ʒx); dose, f ʒj–ij. **I. junip'eri,** *Infusion of juniper;* the common mode of making it is by macerating an ounce of juniper berries in a pint of boiling water; the whole may be taken in the twenty-four hours. **I. krame'riæ** (Ph. Br.), *Infusion of krameria* or *rhatany* (kramer., ʒss; aq. destillat. bullient., f ʒx); dose, f ʒiss. **I. li'ni** (Ph. Br.), **I. li'ni compos'itum,** or **I. li'ni usitatis'simi,** *Compound infusion of linseed, Flaxseed tea* (lini sem, gr. cl; glycyrrh. rad. exsiccat., gr. l; aquæ destillat. bullient., f ʒx); dose, a teacupful, *ad libitum.* **I. lu'puli** (Ph. Br.), infusum humuli. **I. mal'ti,** wort. **I. mati'cæ** (Ph. Br.), *Infusion of matico* (matico, ʒss; aq. destillat. bullient., f ʒx; Ph. B.); dose, f ʒiss to f ʒij. **I. men'thæ vir'idis,** *Infusion of spearmint, Mint tea* (menthæ virid., ʒij; aquæ bullient., Oss; infuse for an hour, and strain); dose, f ʒj to f ʒiij. **I. parei'ræ,** *Infusion of pareira brava* (pareir., ʒj; aq. bullient., Oj); dose, f ʒj or f ʒij. **I. pi'cis empyreumat'icæ liq'uidæ,** see *Pinus sylvestris.* **I. pi'cis liq'uidæ,** see *Pinus sylvestris.* **I. polyg'alæ,** infusum senegæ. **I. pru'ni Virginia'næ** (Ph. U. S.), *Infusion of wild cherry* or *wild-cherry bark* (prun. Virginian., ʒss; aquæ, f ʒxij; prepared by percolation); dose, f ʒj to f ʒiij. **I. quas'siæ** (Ph. Br.) or **I. quas'siæ excel'sæ,** *Infusion of quassia* (quassia lig., gr. lv; aq., f ʒx); dose, f ʒj to f ʒiv. **I. rhe'i** (Ph. Br.), *Infusion of rhubarb* (rhei, ʒij; aq., f ʒx); dose, f ʒj to f ʒiv. **I. ro'sæ ac'idum** (Ph. Br.), *Acid infusion of roses* (ros. Gallic., ʒij; acid. sulph. dil., f ʒj, aq. destillat. bullient., f ʒx; Ph. B.). **I. ro'sæ compos'itum** or **I. ro'sæ Gal'licæ,** *Infusion of the rose, Compound infusion of rose* (ros. Gallic., ʒiv; aq. bullient., Oiiss; acid. sulph. dil., f ʒiij; sacch. pulv., ʒiss); dose, f ʒiss to Oss. **I. sal'viæ,** *Infusion of sage, Sage tea* (salv., ʒss; aq. bullient., Oj; macerate for half an hour, and strain). **I. sarsaparil'læ,** *Infusion of sarsaparilla* (sarsaparill. contus., ʒj; aquæ bullient., Oj); dose, f ʒij to f ʒiv. **I. sas'safras** or **I. sas'safras medul'læ,** *Infusion of sassafras pith, Mucilage of sassafras pith* (sassafras medull., ʒij; aq. (frigid.), Oj; macerate for three hours, and strain); an emollient collyrium and a demulcent drink. **I. sen'egæ** (Ph. Br.), *Infusion of seneka* or *senega* (seneg., ʒss; aq. destill. bullient., f ʒx); dose, f ʒj to f ʒiij. **I. sen'næ** (Ph. Br.), *Infusion of senna* (sennæ, ʒj; zingiberis, gr. xxviij; aq. destillat. bullient., f ʒx); dose, f ʒj to f ʒiv, as a cathartic. *Black draught, Black dose, Black bottle, Haustus niger,* is usually formed of this infusion. It may be made of infus. sennæ, f ʒv; aq. cinnam., f ʒj; mannæ, ʒiv; magnes. sulph., ʒvj; dose, a wineglassful. **I. sen'næ compos'itum** (Ph. U. S.), *Compound infusion of senna.* A form of senna tea employed for its purgative action; dose, f ʒiv (senna, manna, sulphate of magnesium, fennel, boiling water). Popularly known as black draught. **I. serpenta'riæ** (Ph. Br.), *Infusion of Virginia snakeroot, Serpentaria,* or *Serpentary* (serpentar. rhizome, ʒij; aq. destillat. bullient., f ʒx); dose, f ʒiss. **I. simaru'bæ,** *Infusion of simaruba* (simarub. cort., aq. fervent.); dose, f ʒj to f ʒij. **I. spige'liæ,** *Infusion of pinkroot* or *spigelia* (spigel., ʒss; aq. bullient., Oj); dose, f ʒiv to Oss. **I. tab'aci,** *Infusion of tobacco* (tabac. fol., ʒj; aq. ferv., Oj); half of this administered per anum in strangulated hernia. **I. tarax'aci,** *Infusion of dandelion* or *taraxacum* (taraxac., ʒij; aq. bullient., Oj); dose, f ʒiss, as a diuretic, etc. **I. ul'mi,** *Infusion of ulmus* or *slippery elm, Slippery elm tea, Mucilage of slippery elm bark* (an ounce of slippery elm bark in a pint of boiling water). **I. u'væ ur'si** (Ph. Br.), *Infusion of uva ursi* or *bearberry* (uvæ ursi fol., ʒss; aquæ destill. bullient., f ʒx); dose, f ʒj to ij. **I. valeria'næ** (Ph. Br.), *Infusion of valerian* (valerian. rhizome, ʒij; aq. destillat. bullient., f ʒx); dose, f ʒiss to ij. **I. zingib'eris,** *Infusion of zingiber* or *ginger, Ginger tea* (zingib. contus., ʒss; aq. bullient., Oj); dose, f ʒiss to f ʒij, as a carminative.

In'ga. Genus of plants, ord. Leguminosæ, of S. America, possessed of astringent properties. Inga bark is used in S. America as a tonic astringent in diarrhœa, gonorrhœa, etc.

Ingen'ium (*in, geno,* for *gigno,* to generate). Characteristics of child at birth, as natural mental qualities. **I. mor'bi,** nature or genius of disease.

Inges'ta (*in, gero, gestum,* to bear or carry). Substances introduced by the stomach as food, condiments, drinks, etc.

Inges'tion (same etymon). Introduction of anything as food by the mouth. Appropriation of foreign matter by a cell, as in the amœba, amœboid cells, white corpuscles, etc.

Ingluvia'tion. Taking and retaining food into a cavity, as the crop, to be afterward digested.

Inglu'vies. Gluttony, insatiableness. Crop, or craw, or gorge of birds. First stomach or pouch of ruminant animals. Pharynx.

In'gluvin (*ingluvies,* gizzard). Preparation from the gizzard of a fowl, employed in vomiting, especially in vomiting of pregnancy, instead of pepsin.

Ingras'sias (after Ingrassias, Spanish physician), **apoph'yses, pro'cesses,** or **wings of.** Lesser alæ of the sphenoid bone.

Ingraves'cent (*in, gravesco,* to grow heavy). That which increases, as ingravescent apoplexy.

Ingravida'tion (*in, gravidus,* pregnant). Impregnation; fecundation; pregnancy.

Ingre'dient (*ingredior,* to enter in). One of the component parts, as of a prescription.

Ingres'sus. Entrance, as into a cavity. **I. supe'rior,** cardia.

In'grown nail. Onyxis. See *Nail.*

In'growth. Growth having its direction inward.

In'guen. Bubo, groin; oblique fold or depression separating the abdomen from the thigh; properly speaking, a line extending from the anterior and superior spinous process of the ilium to the middle part of the horizontal ramus of the pubis; genital organs. **I. gonorrhœ'um** or **gonorrho'icum**, gonorrhœal bubo; see *Bubo.* **I. indura'tum**, syphilitic bubo; see *Bubo, indurated.* **I. sup'purans**, bubo, suppurating. **I. syphilit'icum**, see *Bubo.* **I. virulen'tum**, see *Bubo.*

In'guinal. Belonging or relating to the groin; epithet given to various parts in the region of the groin. **I. ar'tery**, portion of the femoral artery situate immediately beneath the crural arch in the inguinal region. **I. canal'**, canal about two inches in length, proceeding obliquely downward, inward, and forward at the lower part of the abdomen; through which passes the spermatic cord in men and the round ligament of the uterus in women. This canal is formed inferiorly and anteriorly by the aponeurosis of the greater oblique muscle; posteriorly by the fascia transversalis, which is joined to the preceding aponeurosis, and forms with it a deep channel into which are received the lesser oblique and transversalis muscles. The inguinal canal has two apertures: one, the lower and inner, called the inguinal or abdominal ring, bounded by two strong tendinous pillars which fix it—the innermost to the symphysis, the outermost to the spine of the pubis. The upper and outer aperture, annulus abdominalis interior, apertura interior canalis inguinalis, is formed by the fascia transversalis. From the edge of this aperture arises a membranous funnel—a prolongation of the fascia transversalis—receiving the spermatic vessels, forming their proper sheath, and accompanying them as far as the testicle. On its inside lies the epigastric artery; above it is the lower edge of the transversalis muscle; and below it is bounded by the channel of the greater oblique. By following the oblique direction of this canal, and passing, consequently, on the outside of the epigastric artery, the viscera are displaced, so as to constitute internal inguinal hernia. **I. glands**, lymphatic glands or ganglions of the groin; there are two sets, one superficial, the other deep-seated. The former are larger, and on the average there are eight or ten, which are placed irregularly about Poupart's ligament. The latter, or deep-seated, are situate behind the others, around the femoral artery and vein. **I. her'nia**, see *Bubonocele* and *Hernia.* **I. re'gion**, region of the groin. **I. ring**, abdominal ring; inferior aperture of the inguinal canal.

Inguina'lis. Inguinal.

In'guino-abdom'inal. Relating to groin and abdomen.

Inguinocru'ral. Relating to groin and thigh.

Inguinocuta'neous. Relating to skin of the groin. Middle ramus of the anterior branch of the first lumbar nerve, because it sends numerous filaments to the groin, scrotum, and the skin of the superior part of the thigh.

In'guino-preperitone'al her'nia. Hernia with a peritoneal and an inguinal sac.

Ingulation, in-gu-la'shun (*in, gula,* throat). Introduction of anything into the throat.

Ingurgitation, in-gur-jit-a'shun. Deglutition.

Inhærens, in-he'rens. Inherent.

Inhalatio, in-hal-ash'e-o (*in, halo,* to breathe). Absorption, inhalation. **I. cu'tis,** see *Absorption.*

Inhala'tion. Act of drawing air or vapor, or remedial agent or anæsthetic in form of vapor, into the lungs. Absorption by the lungs. **I. of chlo'rine,** vapor chlori. **I. of co'nia,** vapor coniæ. **I. of cre'asote,** vapor creasoti. **I. diseas'es,** diseases due to inhaling dust or minute particles. **I. of hydrocyan'ic ac'id,** vapor acidi hydrocyanici. **I. of i'odine,** vapor iodi.

Inhalator (in-hal-a'tor) or **Inhalatorium,** in-hal-at-o're-um. Inhaler. See *Pulverization.*

Inhaler, in-ha'lur. Apparatus for inhalation of the steam of hot water, ether, chloroform, vapor of iodine, etc. in affections of the air-passages.

Inherent, in-he'rent (*in, hæreo,* to stick). Adhering or joined to anything. Innate; existing naturally in anything **I. caut'ery,** actual cautery, left in contact with a part until it is reduced to the state of a deep eschar.

Inher'itance. Qualities or possessions transmitted by heredity.

Inherited, in-her'it-ed (*in, hæres,* an heir). Acquired by heredity, as disease. See *Heredity.*

Inhib'it. To restrain or suppress.

Inhibition, in-hib-ish'un (*inhibeo,* to restrain). Action directed to restraint and prohibition, as of nervous influence acting upon the vascular system, etc. This may occur from a superior nerve-centre acting on an inferior one, or from influence carried to a particular region by an afferent nerve. See *Inhibitory.* **I., vasomo'tor,** action causing dilatation of blood-vessels by diminishing their tonicity.

Inhibitory, in-hib'it-o-re (*inhibeo,* to restrain). Term applied to nerves which, when methodically excited, repress the action of muscles to which they are distributed. Disorders of the inhibitory nerves—cardiac, respiratory, intestinal, and reflex—have been termed inhibitory or restraint neuroses. A nervous twig, separating from the vagus at the level of the thyroid cartilage in the rabbit and cat, and terminating in the inferior cervical ganglion, is a depressor nerve of the heart. When cut and the central end irritated, the effect is a diminution of the power and frequency of the action of the heart and dilatation of the vessels.

Inhumation, in-hu-ma'shun (*inhumo,* to put in the ground.) Sepulture of the dead in the earth. Digestion of substances in earth. Application of hot sand to the body.

Iniac (in'e-ak), **Inial** (in'e-al), **In'ian.** Relating to the inion.

In'iad. See *Inial.*

In'ial. Epithet proposed by Dr. Barclay for an aspect toward the plane of the ridge of the occiput. *Iniad* is employed by him adverbially to signify toward the inial aspect.

Iniencephalus, in-e-en-sef'al-us (*inion, encephalon*). Monster having encephalon in great part in the cranium, and in part out of it, behind, and a little beneath the cranium, which is open on its occipital portion. There may also be fissure of the vertebræ of the cervical and thoracic regions.

Iniodymus, in-e-od'im-us (*inion, duo,* to mingle). Monster with one body and two heads joined at the back part. See *Diprosopos.*

In'io-fa'cial. Relating to the inion and face.

In'io-glabel'lar. Relating to inion and glabella.

In'io-me'sial. Relating to inion and meson.

In'ion. Occiput or its ridge. Back part of the neck and the muscles of the occiput. Commencement of the spinal marrow. External occipital protuberance, which is taken as a guiding-point in craniometry.

Iniops (in'e-ops) or **Iniope** (*inion, ops,* the eye, the face). Monster double above the umbilicus, having two ears very near each other, or only one median ear, and above it, at a greater or less distance, a median orbit and eye, more or less imperfect. The rudimental face appears to be directly opposite the principal face.

Initis, in-e'tis (*is, inos,* a fibre). Inflammation of fibrous or muscular tissue. Muscular rheumatism.

Init'ium (*in, io,* to go). Beginning. **I. as'peræ arte'riæ,** larynx. **I. extu'berans co'li,** cæcum.

Inium, in'e-um. Inion.

Injaculatio, in-jak-u-lah'she-o (*in, jaculor,* to shoot). Acute pain in the stomach, with rigidity and immobility of the body. Projection of sperm into the vagina.

Inject'ed (*injicio,* to throw into). Term used to denote redness of the face and other parts caused by accumulation of blood in the capillaries. A subject or cadaver is said to be injected when its vessels have

been filled by the anatomist with an appropriate composition.

Injectio, in-jek'she-o. Injection. **I. apomorphi'næ hypoder'mica** (Ph. Br.) (apomorph. hydrochlorat., gr. ij; aquæ camphoræ, ℳc; dissolve and filter); dose for subcutaneous injection, ℳij–viij. **I. ergoti'ni hypoder'mica** (Ph. Br.) (ergotin, gr. c.; aquæ camphoræ, f℥iij; dissolve); dose, by subcutaneous injection, ℳiij–x. **I. hypodermat'ica, hypoder'mica,** or **subcuta'nea,** hypodermic injection. **I. morphi'næ hypoder'mica** (Ph. Br.) (morphin. hydrochlorat., gr. xcij; liquor. ammoniæ, acid. acetic., aquæ destillat., āā q. s.); dose, by subcutaneous injection, ℳj–v.

Injection, in-jek'shun. The act of introducing, by means of a syringe or other instrument, a liquid into a cavity of the body or beneath the external integument. The latter is called a hypodermic or subcutaneous injection. The liquid injected is also called an injection. Anatomists use injections—injectiones anatomicæ—for filling the cavities of vessels so that they may be rendered more apparent and dissection be facilitated; clyster, enema. **I., hypodermat'ic, hypoder'mic,** or **subcuta'neous,** hypodermic injection. **I., intes'tinal** or **rec'tal,** enema. **I., nu'trient,** rectal injection of nutritive fluids.

Injectiones anatomicæ, in-jek-she-o'nees an-at-om'-is-e. See *Injection.* **I. hypoder'micæ,** preparations recognized in the Ph. Br. for hypodermic application.

Injec'tor. Instrument or apparatus for making injections.

Injec'tum. Injection.

Ink'berry. Prinos glaber.

In'kneed. Entogonyancon; genu valgum.

In'let. Entrance; opening of a canal or cavity. **I. of pel'vis,** superior strait of the pelvis, through which the fœtus passes into the pelvic canal.

Innatatio, in-nat-ash'e-o (*in, nato,* to swim). Looseness of an exfoliated bone or a carious tooth.

Innate' (*in, nascor,* to be born). Inborn, indigenous, adnate. **I. diseas'es,** diseases with which the infant is born; they are not always hereditary.

Innerva'tion (*in, nervus,* nerve). The nervous influence necessary for the maintenance of life and the various functions. See *Nerves.*

Innodation (*in, nodus,* knot). Knotting together, as of the bowels.

Innominata (in-nom-in-at'ah) **arte'ria.** Innominate artery, brachiocephalic or right subclavian artery. The trunk common to the right primitive carotid and the subclavian, arising from the anterior part of the arch of the aorta, ascending obliquely to the right along the trachea, and, after a course of about an inch in length, dividing into two trunks, which go off at right angles; the external one, the right subclavian proper; the other, the superior or primitive carotid of the same side. **I. cartila'go,** cricoid. **I. cav'itas,** a cavity of the outer ear between the helix and anthelix. **I. fos'sa,** see *Fossa.* **I. lin'ea,** see *Iliopectinea linea.* **I. mino'ra os'sa** or **ossic'ula,** lesser ossa innominata; cuneiform bones of the tarsus. **I. tu'nica oc'uli,** sclerotic.

Innominat'æ ve'næ. Two or three veins arising on the anterior surface and right margin of the heart and opening into the auricle. Also the brachiocephalic veins, which correspond to the arteria innominata, being formed by the union of the internal jugular vein and the subclavian properly so called, corresponding to the common carotid and subclavian arteries.

Innom'inate ar'tery. See *Innominata arteria.*

Innominat'i ner'vi. Nerves of the fifth pair, of some anatomists.

Innominat'um fora'men. Foramen near the middle of the anterior surface of the pars petrosa of the temporal bone, for the passage of the Vidian nerve. **I. os,** ache-bone; aitch-bone; large flat bone forming the anterior and lateral parietes of the pelvis. In the first periods of life it is composed of three portions—the ilium, ischium, and pubis.

Innomina'tus (*in, nomen,* name). Without a name. See *Anonymous.*

Innutritio, in-nu-trish'e-o. Defective nutrition. **I. os'sium,** rachitis.

I'no (*is,* fibre). In composition, fibre.

Inoblast, i'no-blast (*is,* fibre, *blastos,* germ). Connective-tissue corpuscle; cell from which connective tissue is produced.

Inocar'pus edu'lis. South Sea chestnut; Fiji or Otaheite chestnut; the bark of this tree of the Indian Archipelago is astringent.

Inochondritis, in-o-kon-dre'tis (*is,* fibre, *chondros,* cartilage). Combined inflammation of tendon and cartilage.

Inoc'ulable (*inoculo,* to ingraft). Capable of inoculation or of being communicated by inoculation.

Inoculatio, in-ok-u-lah'she-o. Inoculation. **I. vacci'næ,** vaccination.

Inoculation, in-ok-u-la'shun. Operation by which a disease may be artificially communicated by introducing its virus into the economy by puncture or scratch made in the skin, *endermic inoculation.* When the word inoculation is used alone, it usually means that for the small-pox, variolation. See *Syphilization.* **I., cow'-pox,** vaccination. **I., Jenne'rian,** vaccination.

Inoculator in-ok'u-la-tor. One who practises inoculation; instrument for performing inoculation.

Inocystis, in-o-sis'tis (*is,* fibre, *kustis,* bag). Fibrous cyst.

Inodesma, in-o-dez'mah (*is,* fibre, *desma,* band). Fibrous band.

Inodular, in-od'u-lar (*inodes,* fibrous). Fibrous. **I. tis'sue,** fibrous tissue; cicatricial tissue; see *Tissue, inodular.*

Inœa, in-e'ah. Substance obtained by pressure from the seeds of Strophanthus hispidus, and said to be more powerful than digitaline in its action on the heart.

In'ogen. Substance in muscular tissue thought to become decomposed during contraction, but to be the cause of energetic muscular action.

Inogenesis, in-o-jen'es-is (*ino, genesis,* generation). Formation of fibres.

Inohyloma, in-o-hi-lo'mah (*ino, hule,* matter, *oma*). Fibrous tumor.

Inohymenitis, in-o-him-en-e'tis (*ino, humen,* membrane). Inflammation of the fibrous tissue.

In'olith (*is,* fibre, *lithos,* stone). Fibrinous calculus or concretion.

Ino'ma (*is,* fibre). Scirrhus; fibrous tumor; fibroma.

Inopexia, in-o-peks'e-ah (*ino, pexis,* coagulation). Increased coagulability of the fibrinogenous substance, especially in parturient women.

Inophlogis'ma (*is,* fibre, *phlogosis,* inflammation). Inflammation of fibrous tissue.

Inophlogo'sis (same etymon). Production of inflammation of fibrous tissue.

Inopol'ypus. Fibrous polypus. See *Polypus.*

Inorgan'ic. Unorganized; term applied to bodies which have no organs, such as minerals. Parts of the body, like the epidermis, devoid of blood-vessels and nerves have been called anorganic.

Inoscleroma, in-o-skler-o'ma (*ino, scleroma,* induration). Induration of the fibrous tissue.

Inosclerosis, in-o-skler-o'sis. Inflammation and induration of fibrous tissue.

Inosculation, in-os-ku-la'shun (*in, osculum,* small mouth). Anastomosis.

Ino'sic or **Inosin'ic acid.** Organic acid, a syrupy non-crystallizable liquid existing in muscular substance.

In'osin. Inosite.

In'osis (*ino,* fibre). Hyperinosis; fibre-formation, inogenesis.

In'osite or **In'osit** (*ino,* fibre). Muscle-sugar. Unfermentable sugar in muscle-juice, the kidneys, brain, lungs, liver, etc., and in urine in some diseases; also in leaves of Juglans regia.

Inosituria, in-os-it-u're-ah. Inosuria.

Inosteatoma, in-o-ste-at-o'mah (*ino, steatoma*). Tumor of a mixed fibrous and steatomatous character.

Inosuria, in-o-su're-ah (*inosite, ouron,* urine). Condition of the urinary secretion when it contains inosite.

In'quest (*in quæro,* to ask). See *Coroner.*

Inquies, in'kwe-ees (*in, quies,* rest). Agitation or trouble caused by indisposition. Restlessness.

Inquisitio (in-quiz-ish'e-o) **med'ico-lega'lis** (*in, quæro,* to search). See *Medico-legal.*

Inquisition, in-kwiz-ish'un (same etymon). Inquiry into the mental or other condition of an individual by commission appointed for that purpose.

Insaliva'tion. Mixture of the food with the saliva and other secretions of the mouth.

Insalu'brious (*in, salubris,* healthy). That which is unhealthy or injures the health.

Insanab'ilis (*in, sano,* to cure, *habilis,* able). Incurable.

Insane, in-sane' (*in, sanus,* sound). Crazy, mad, demented, deranged. One affected with mental aberration or of unsound mind. **I. ear,** hæmatoma auris. **I., paral'ysis of,** dementia paralytica.

Insan'ia. Insanity; mania. **I. cadi'va,** epilepsy. **I. gravida'rum,** I. of pregnancy. **I. lactan'tium,** I. occurring during the period of lactation. **I. lupi'na,** lycanthropia. **I. post-par'tum** or **puerpera'rum,** mania, puerperal.

Insanio'la. Eccentricity verging on insanity.

Insanitary, in-san'it-a-re. Not favorable to health.

Insan'itas. Insanity.

Insan'ity. Mental alienation or derangement, unsound mind, deranged intellect, craziness, madness, phrenzy, frenzy. Term including all the varieties of unsound mind—mania, melancholia, moral insanity, dementia, and idiocy. **I., affec'tive,** form in which the passions or emotions are affected. **I., al'ternating,** I., periodical. **I., ambi'tious,** monomania of grandeur. **I., cataton'ic,** see *Catatonia.* **I. of child'birth,** mania, puerperal. **I., chore'ic,** I. in young people, with exaggerated choreic movements. **I., cir'cular,** periodical insanity, with regular alternations of mania or melancholia. **I., com'pound,** I. showing disturbance of several mental faculties. **I., confu'sional,** rapidly developed fever, with mental confusion, incoherence, etc. **I., congen'ital,** varieties of i. noticed at birth, as idiocy or imbecility. **I., cretin'ic,** cretinism. **I., cy'clic,** I., circular. **I. of deliv'ery,** mania, puerperal. **I., demonomani'acal,** demonomania. **I., depres'sive,** melancholia. **I., diabet'ic,** I. associated with diabetes, usually melancholia. **I., erot'ic,** I. with tendency to sexual excitement, as satyriasis; erotomania. **I. of gesta'tion,** mania, puerperal. **I., homici'dal,** see *Homicidal.* **I., idea'tional,** or **I., ideophren'ic,** see *Ideation.* **I., incohe'rent,** dementia. **I., intellec'tual,** I., ideational; monomania. **I., mani'acal,** mania. **I., melanchol'ic,** melancholia. **I., mor'al,** see *Pathomania.* **I., paralyt'ic,** general paralysis of the insane. **I., par'tial,** monomania. **I., prepartu'rient** or **prepuer'peral,** puerperal insanity occurring before delivery. **I., puer'peral,** mania, puerperal. **I., relig'ious,** demonomania; insanity from religious zeal or running into religious expression. **I., Scyth'ian,** see *Scythian disease.* **I., se'nile,** delirium, senile. **I., suici'dal,** see *Suicide.*

Insanus, in-san'us. Insane.

Inscription, in-skrip'shun (*in, scribo,* to write). See *Matriculate.*

Inscriptiones (in-skrip-she-o'nees) or **Intersectio'nes tendin'eæ musculo'rum.** Tendinous portions crossing several muscles, and especially the straight muscles of the abdomen.

In'sect wound. Wound made by an insect, as the bee, mosquito, etc.; usually a punctured, frequently a poisoned, wound.

Insemina'tion (*in, semen,* seed). Ejaculation; dissemination.

Insenescence, in-sen-es'sence (*in, senesco,* to grow old). Act of attaining a green and vigorous old age.

Insensibility, in-sen-sib-il'it-e (*in, sensus,* feeling, *habilis,* able). Loss or absense of sensibility; it is common in cerebral affections, and may extend to every part or be limited to one or more. Bones, cartilages, ligaments, etc. are insensible in health, but acutely sensible in disease. Anæsthesia, local or general.

Insen'sible. Devoid of sensibility; not appreciable to the senses, as insensible pulse.

Insertion, in-sur'shun (*in, sero,* to ingraft). Attachment of one part to another, as bones, cartilages, and fibrous organs; of muscular fibres to a tendon or aponeurosis; of a tendon, aponeurosis, or ligament to a cartilage or bone. Act of inoculating or introducing a virus into the body. Graft.

Inses'sus (*insideo,* to sit in). Vapor-bath, the person being seated in a perforated chair, beneath which a vessel, filled with hot water or the hot decoction of some plant, is placed; sitz-bath. See *Bath, half,* and *Semicupium.*

Insident, in'sid-ent (*insideo,* to sit in or upon). Term applied to a film or pellicle swimming on or in the urine.

Insipientia, in-sip-e-en'she-ah (*in, sapiens,* wise). Silliness or simpleness; slight form of insanity. **I. ingen'ita,** imbecility.

Insitiency, in-sish'e-en-se (*in, sitis,* thirst). Absence of thirst.

Insitio, in-sish'e-o (*insero,* to ingraft). Grafting; inoculation; vaccination. **I. cilio'rum,** operation for formation of a new eyelid. **I. den'tis,** act of transplanting a tooth from one person to another. **I. variola'rum,** inoculation of small-pox.

Insola'tion (*in, sol,* sun). Exposure to the sun, sometimes had recourse to to rouse the vital forces when languishing or to produce irritation of the skin; sun-bath. Insolation is usually employed, however, in the same sense as coup de soleil or sunstroke, or heat-prostration. In pharmacy, the drying of chemical and pharmaceutical substances.

Insomnia, in-som'ne-ah (*in, somnus,* sleep). Sleeplessness, vigilance. This may constitute a true disease, or it may be connected with some other affection; an unequivocal sign of suffering in some organ, even when there is no apparent pain.

Insom'nium (*in, somnus,* sleep). Insomnia; dream.

Inspectio (in-spek'she-o) **med'ico-lega'lis** (*inspicio,* to look into). See *Medico-legal.*

Inspection, in-spek'shun (same etymon). Examination with the eye.

Inspergation, in-spur-ga'shun (*inspergo,* to sprinkle). Dusting by powder or sprinkling by spray.

Inspira'tion (*in, spiro,* to breathe). Action by which the air penetrates into the interior of the lungs, a movement opposed to expiration. The average quantity of air received into the lungs at each inspiration has been variously and diversely estimated by different observers as being from 6 to 100 cubic inches. From 20 to 25 cubic inches may be regarded as a fair average. **I., crow'ing,** peculiar inspiration of spasmodic croup; see *Asthma thymicum.* **I., mus'cles of,** see *Inspiratory.* **I. of ve'nous blood,** aspiration of blood toward the heart, occasioned by the approach to a vacuum produced by the dilatation of the thorax during inspiration.

Inspiratory, in'spir-at-o-re. Name given to muscles —for example, the diaphragm and intercostal muscles —which, by their contraction, augment the size of the chest, and thus produce inspiration. When deep inspirations are necessary, this action is aided by the contraction of the pectoralis major and pectoralis minor, subclavius, and other muscles. Most of them become inspiratory by taking their fixed point at the part which they ordinarily move, acting inversely and elevating the ribs.

Inspis'sant (*in, spisso,* to thicken). Any remedial agent rendering the blood thicker; the opposite of diluent.

Inspissation, in-spis-sa'shun. Act of rendering thick.

In'step. Neck of the foot. Projection at the upper part of the foot near its articulation with the leg, the tarsus.

Instillation, in-stil-la'shun (*in,* in, *stilla,* drop). Act of pouring a liquid drop by drop.

Instinct, in'stinkt (*instigo,* to impel). Action of the living principle whenever manifestly directing its operations to the health, preservation, or reproduction of a living frame or any part of it.

Instinctive, in-stink'tiv. Relating to or caused by instinct. Instinctive actions are the actions of the living principle. See *Emotional* and *Instinct.* Such actions of animals as are owing to impressions made on the sensory ganglia, exciting respondent motor influences that are propagated to the various muscles of the body, are termed Consensual. Consensual movements accompanying voluntary efforts without our consciousness are termed Associated.

In'stitutes of med'cine (*institutum,* principle). See *Theory of medicine.*

In'strument (*instruo,* to put together). Tool or agent; implement for surgical work.

Instrumen'ta. Male genital organs.

Instrumenta'rium. Collection of instruments.

Instrumen'tum. Instrument. **I. chirur'gicum,** surgical instrument. **I. digestio'nis,** digestive apparatus. **I. instrumento'rum,** the hand.

Insufficiency, in-suf-fish'e-en-se (*in, sufficio,* to suffice). Inadequateness to any end or purpose, as insufficiency or incompetency of the valves of the heart, a condition in which they are not adapted, as in health, to properly close the apertures; as *I., aortic,* when the aortic valves are thus affected by endocarditis, valvular rupture, etc. (see *Corrigan's disease*); *I., mitral,* when the mitral valve is similarly affected. Sometimes there is *muscular insufficiency,* as of the muscles of the eyes from want of equilibrium in the power of the muscles of the two eyes, or of antagonizing muscles in other parts of the body.

Insufflation, in-suf-fla'shun (*in, suf, flo,* to blow). Act of blowing a gas or vapor or powder into some cavity of the body, as tobacco smoke injected into the rectum, or air blown into the mouths of newborn children to excite the respiratory function, or of those asphyxiated by coal-gas, drowning, etc., or of those under narcotic influence of opium. Instrument devised for this purpose is called an *Insufflator.*

Insula, in'su-lah (island). Insula cerebri; lobule of liver; acinus. **I. cer'ebri,** island or insula of Reil. Intermediate lobe of the brain, lobus intermedius cerebri. A remarkable group of convolutions—gyri operti—within the fissure of Sylvius, called by Cruveilhier lobule of the fissure of Sylvius, lobule of the corpus striatum. The island of Reil, with the substantia perforata, forms the base of the corpus striatum. **I. fis'sure of Syl'vius,** I. cerebri. **I. hepat'ica** or **hep'atis,** lobule of the liver. **I. of Reil,** insula cerebri. **I. san'guinis,** blood-clot; see *Blood.*

Insulæ, in'su-le (pl. of **Insula**). See *Liver, Maculæ albæ.* **I. Pey'eri,** Peyeri glandulæ. **I. pulmona'les,** see *Pulmo.*

In'sular. Isolated; relating to island of Reil. **I. sclero'sis,** sclerosis disseminated in isolated spots in the brain and spinal cord.

In'sulated. Term applied in electricity to effect produced by an insulator or non-conductor.

Insula'tion. The prevention of free escape of electricity by supporting or surrounding the electrical machine with a non-conductor or a bad conductor, such as glass, rubber, shellac, etc.

In'sulator. Non-conductor of electricity, as glass or resin.

Insul'tus (*insilio,* to attack). Attack; paroxysm of disease. **I. apoplec'ticus,** apoplectic stroke.

Insur'ance of life. See *Life insurance.*

Insymmetric, in-sim-met'rik. Want of symmetry.

Integration, in-te-gra'shun (*integer,* whole). Union of several distinct parts into one.

Integ'rity (*integer,* whole). Entirety. Healthy exercise of all the functions. Virginity.

Integ'ument (*in, tego,* to cover). Anything serving to cover or envelop. The skin, including the cuticle, rete mucosum, and cutis vera, is the common integument or tegument of the body.

Integumen'ta fœ'tûs. Fœtal membranes.

Integumen'tum or **I. commu'ne.** Integument; skin. **I. ventriculo'rum,** velum interpositum.

In'tellect (*intelligo,* to understand, to know). Aggregate of the intellectual faculties—perception, formation of ideas, memory, and judgment. Their exercise constitutes intellection. **I., deranged,** insanity.

Intellec'tion. See *Intellect.*

Intellecto'rium commu'ne. Common centre of intelligence, mainly, in man at least, in the great hemispherical ganglia or cerebral hemispheres.

Intemperance, in-tem'per-ance (*in, tempero,* to temper). Immoderate use of food and drink, especially the latter, or of the appetites generally. See *Adephagia.*

Intemperies, in-tem-per'e-ees. Derangement in the constitution of the atmosphere and of the seasons; bad constitution; derangement in the humors of the body.

Intention, in-ten'shun (*in, tendo,* to stretch). Object which one proposes. In surgery, a wound heals *by the first intention* when cicatrization occurs without suppuration; by the *second intention,* when it occurs after the surfaces have suppurated. To obtain union by the first intention the edges of a recent wound must be brought in apposition, and kept together by adhesive plasters and a proper bandage. Union by granulations has been called *third intention.*

In'ter. In composition, between.

Interaccessorii, in-tur-ak-ses-so're-e. See *Intertransversales lumborum.*

Interacinous, in-tur-as'in-us. Between the acini.

Interanea, in-tur-an'e-ah (*intra,* within). Entrails.

Interarticular, in-tur-ar-tik'u-lar (*inter, articulus,* a joint). Terms applied to parts situate between the articulations, as I. cartilages, I. ligaments, etc.

Interarytænoid, in-tur-ar-it-e'noid. Between the arytenoid cartilages.

Interauricular, in-tur-aur-ik'u-lar. Between the auricles or external part of the ear; between the auricles of the heart.

In'terbrain. Thalamencephalon. See *Cerebrum.*

Intercadence, in-tur-ka'dence (*inter, cado,* to fall). Disorder of the arterial pulsations, a supernumerary pulsation occurring every now and then. Such pulse is said to be intercurrent.

Inter'calar or **Intercalary,** in-tur'kal-a-re (*intercalo,* to insert). Term applied to days which occur between those that are critical; also days of apyrexia in intermittent fevers.

Intercarot'id. Between the common carotids or between the external and internal carotids.

Intercellular, in-tur-sell'u-lar (*inter, cellula,* a small cell, a cellule). Between cells or cellules. **I. fluid,** liquor sanguinis. **I. pass'ages,** irregular passages through the substance of the lung, forming terminations of the bronchial tubes, and clustered with air-cells. **I. sub'stance,** see *Cytoblastema.*

Interceptio, in-tur-sep'she-o (*intercipio,* to intercept). A means of arresting the progress of the material cause of gout and rheumatism, consisting in covering the affected limbs with carded wool, surrounding them afterward with broad bandages from the fingers to the axilla, or from the toes to the groin. Retention; suppression. **I. intestino'rum,** ileus; obstruction of the bowels.

Intercervicals, in-tur-sur'vik-als. Intertransversales.

Interchondral, in-tur-kon'dral (*inter,* between, *chondros,* cartilage). Intercartilaginous.

Intercidence, in-tur'sid-ence (*inter, cado,* to fall). See *Intercalary* and *Intercadence.*

Intercilium, in-tur-sil'e-um (*inter, cilium,* eyelash). Part between the eyebrows.

Intercisio, in-tur-siz'e-o (*inter,* between, *cædo,* to cut). Intermittence, as of pulse.

Interci'sus (same etymon). Intermittent.

Interclav'icle. Osseous membrane or plate between the ends of the clavicle in some of the vertebrata.

Interclavicular, in-tur-klav-ik'u-lar. Between the clavicles. **I. lig'ament,** flat fibrous bundle placed

transversely above the extremity of the sternum, between the heads of the two clavicles. Its fibres are separated by small apertures traversed by vessels. It prevents the separation of the clavicles in the forced depression of the shoulder.

Interclavicularis, in-tur-klav-ik-u-lar'is. Occasional muscle between the sternoclavicularis muscles of opposite sides.

Interclu'sio (*intercludo*, to exclude). Suppression or stoppage, as **I. an'imæ**, interrupted respiration; temporary asphyxia.

Intercolum'nar fas'cia. See *Fascia*.

Intercon'dylar or **Intercondyloid,** in-tur-kon'dil-oid. Between the condyles, as I. eminence, I. fossa or notch, I. line, etc.

Intercostal, in-tur-kos'tal (*inter*, *costa*, rib). Situate between the ribs. **I. ar'teries,** these vary in number. There is constantly, however, a superior, arteria intercostalis superior or intercostalis subclavia, given off from the posterior part of the subclavian, and sending branches into the first two or three intercostal spaces; and there are generally eight or nine inferior or aortic intercostals arising from the lateral and posterior parts of the pectoral aorta, and ascending obliquely in front of the vertebral column, to gain the intercostal spaces, where they divide into a dorsal and an intercostal branch. **I. mus'cles** are distinguished into internal and external, the former inserted into the inner lip, the latter into the outer lip of the edge of the ribs. The fibres of the external intercostals are directed obliquely downward and forward; those of the internal, downward and backward. Both are inspiratory and expiratory muscles, according as they take their origin on the upper or lower rib. Small, fleshy fibres, seen occasionally at the inner surface of the thorax, descending obliquely from one rib to another, have been called infracostales. **I. nerve,** trisplanchnic nerve. The intercostal, costal, or dorsal nerves proceed from the anterior branches of the dorsal nerves. They are twelve in number, and are distributed especially to the muscles of the parietes of the chest and abdomen. **I. space,** interval separating one rib from that immediately above or below it. **I. veins,** these are distinguished like the arteries; the right superior one is often wanting. When it exists it opens into the back part of the subclavian. The same vein of the left side is very large, and communicates with the demi-azygos, receives the left bronchial vein, and opens into the corresponding subclavian. The right inferior intercostal veins open into the vena azygos; those of the left into the demi-azygos.

Intercostales (in-tur-kos-tal'ees), **exter'ni** and **inter'ni.** See *Intercostal muscles*. **I. lon'gi,** term to include infracostalis, iliocostalis lumborum, iliocostalis dorsi, and scaleni muscles.

Intercosta'rii. Intertransversales.

Intercostobrach'ial. Relating to intercostal and brachial regions.

Intercostohu'meral. Intercostobrachial. **I. nerves,** cutaneous branches of the second and third intercostal nerves.

In'tercourse, car'nal or **sex'ual.** Copulation.

Intercrural, in-tur-kru'ral. Between the legs or crura.

Intercuneal, in-tur-ku'ne-al. Between the cuneiform bones.

Intercur'rent (*inter*, *curro*, to run). Term applied to diseases which supervene at different seasons of the year, or do not belong to any particular season. Also applied to disease occurring in the course of another disease, as intercurrent pneumonia.

Intercutaneous, in-tur-ku-ta'ne-us. Subcutaneous.

Interden'tal. Between the teeth. **I. splint,** splint for fractured jaw, arranged to be held by wires between the teeth.

Interdentium, in-tur-den'she-um (*inter*, *dens*, tooth). Interval between teeth of the same order.

Interdigital, in-tur-dij'it-al (*inter*, *digitus*, finger). Between the fingers. **I. mem'brane,** membrane between the toes in web-footed animals. **I. space,** commissure between the fingers.

Interdigita'tion (same etymon). Dovetailing of parts, as of the ends of some muscles with those of others.

Interdigitium, in-tur-dij-ish'e-um. Corn or wart growing between the fingers or toes.

Interfascicular, in-ter-fas-sik'u-lar. Between the fasciculi of muscles, etc.

Interfemineum (in-ter-fem-in'e-um) or **Interfœmin'eum** (*inter*, between, *femen*, thigh). Between the thighs. Perineum; vulva; vagina.

Interfem'oral. Between the thighs.

Interference (in-ter-fe'rence), **ner'vous.** Inhibitory action of nerves.

Interfin'ium (*inter*, *finis*, boundary). Septum. **I. na'rium,** septum narium.

Interfollicular, in-ter-fol-lik'u-lar. Between the follicles.

Interforamin'ium. Perineum.

Interganglion'ic. Epithet for nervous cords placed between ganglia which they connect together.

Intergland'ular. Between glands.

Interglob'ular. Between globules.

Interhemispheric, in-tur-hem-is-fer'ik. Between hemispheres of the brain.

Interitus, in-ter'it-us (*intereo*, to perish). Death.

Interjec'tional speech. Use of inarticulate sounds, mingled or not with ordinary utterances.

Interju'gular. Between jugular processes or jugular veins.

Interlamel'lar or **Interlam'inar.** Between the lamellæ of a part, as I. spaces of the cornea.

Interlam'inar. Between laminæ. **I. plex'us,** whole series of absorbents between layers of muscular fibres of the intestines.

Interligamen'tous. Between ligaments.

Interlo'bar. Between lobes, as of the lungs.

Interlob'ular. Between lobules, as of the lungs. **I. fis'sures,** intervals between lobules of the liver: the narrower spaces are called fissuræ interlobulares, the wider, spatia interlobularia; see *Liver*. **I. plex'us of bil'iary ducts,** see *Liver*. **I. spaces,** angular interstices formed in the liver by apposition of several lobules. **I. tis'sue,** cellular tissue between pulmonary lobules. **I. veins,** see *Liver*.

Intermaxillary, in-tur-maks'il-lar-e (*inter*, *maxilla*, jaw). Between the maxillary bones. **I. bone,** incisive, palatine, or labial bone; bony portion wedged in between the two superior maxillary bones and supporting the upper incisors in the mammalia and also in the human fœtus.

Interme'dia ligamenta'lia or **ner'vea.** Tendinous portions which cross several muscles, and especially the straight muscles of the abdomen.

Interme'diate. Situate between. **I. vas'cular sys'tem,** capillary system.

Intermedium, in-tur-me'de-um. In pharmacy, ingredient in a prescription aiding suspension of other articles in an emulsion.

Intermem'branous. Between membranes.

Intermeninge'al. Between the meninges or membranes, as *I. hemorrhage* between the membranes of the brain.

Intermen'strual. Between menstrual periods or discharges.

Interment, in-tur'ment (*in*, *terra*, earth). Burying underground. **I., pre'mature,** burial alive.

Intermesenteric, in-tur-mes-en-ter'ik. Between the mesenterics.

Intermesoblast, in-tur-me'so-blast. Between layers of mesoblast.

Intermetacarpal, in-tur-met-a-kar'pal. Between the metacarpal bones.

Intermetatar'sal. Between metatarsal bones. **I. lig'aments,** ligaments concerned in articulation of metatarsal bones with one another.

Intermission, in-tur-mis'shun (*inter*, *mitto*, to put or send). Interval. Interval occurring between two paroxysms of intermittent or other disease, during which the patient is almost in his natural state. Intermission of the pulse is when in a given number of pulsations one or more may be wanting.

Intermit'tent. Having intermissions. **I. fe'ver,** ague; ague and fever; fever and ague; paludal or periodic fever; fever consisting of paroxysms, with complete apyrexia in the intervals. The chief types are quotidian, tertian, and quartan, the symptoms are those of a decided and completely marked cold stage or stage of concentration, paleness, collapse, impaired sensibility, and coldness, more or less diffused, followed by general rigors. After this occurs the hot stage or stage of expansion, the heat returning partially and irregularly, and at length becoming universal, and much above the standard of health; the pulse is now hard and strong, tongue white, urine high colored, thirst considerable. At length the sweating stage or stage of termination appears, the moisture usually beginning on the forehead, face, and neck, and soon extending universally, heat abating, thirst ceasing, the urine throwing down a sediment, and the functions being gradually restored to their wonted state. The tertian type is the most common; the quartan the most severe; the quotidian more readily changes into remittent and continued fever; the quartan has, generally, the longest cold stage; the tertian the longest hot. The chief exciting cause is marsh miasmata, malaria of the Italians, sometimes called ague poison, but it also occurs in districts where there are no marshy emanations, as those of a volcanic nature. The disease is apt to recur. The prognosis is, in general, favorable as far as regards life, but long-protracted intermittents may induce visceral obstructions and engorgements, which may end in dropsy. In some countries the disease is pernicious. The indications of treatment are to abate the violence of the paroxysm by the adoption of the general principles and remedies required in ordinary fever, and to prevent return of the paroxysm by the use, during the period of apyrexia, of purgatives, antiperiodics, as cinchona, quinia, etc., arsenic, and forcible impressions made on the mind of the patient. See *Bacillus malariæ*. **I. lig'ature,** see *Ligature*. **I., mask'ed,** dumb or masked ague. **I. pulse,** pulse having intermissions in its regular beat.

Intermu'ral (*inter*, *murus*, wall). Between the walls or coverings of an organ.

Intermus'cular. Between muscles. **I. aponeuro'ses,** aponeurotic laminæ or septa situate between muscles, to which they often give attachment.

Inter'nal. On the inside; epithet given to parts that look toward an imaginary central plane, dividing the body into two equal and symmetrical portions, as well as to those which correspond with a cavity, as the internal or inner surface of the arm, thigh, etc. **I. diseases,** those occupying the inner parts of the body. (For terms beginning with *Internal*, as I. carotid, etc., see *Carotid*, etc.)

Interna'sal. Between the nasal bones.

Interne (F.). See *House-surgeon.*

Interno'dal. Between nodes.

In'ternode. Phalanx. **I. of Ran'vier,** portion of medullated nerve-fibre between nodes of Ranvier.

Internodia digitorum (in-tur-no'de-ah dij-it-o'rum) **ma'nûs** (*inter*, *nodus*, a knot). Phalanges of the fingers. **I. d. pe'dis,** phalanges of the toes.

Internodium, in-tur-no'de-um. Internode; part of the fingers between the joints; phalanx.

Internu'clear. Between the nuclei.

Internuncial, in-tur-nun'she-al (*inter*, *nuncius*, messenger). Relating to a messenger or communication between parties; term applied by Mr. Hunter to the function of the nervous system, the nerves being called by him chordæ internunciæ.

Internun'cii or **Internun'tii dies,** in-ter-nun'she-e de'ez. Critical days.

Inter'nus. Internal. **I. au'ris** or **mal'lei,** tensor tympani.

Interocular, in-tur-ok'u-lar. Between the eyes.

Interor'bital. Between the orbits.

Interossei dorsales, in-tur-os'se-e dor-sal'ees. See *Interosseus manûs* and *I. pedis*. **I. palma'res,** see *Interosseus manûs* and *I. pedis*.

Interosseous, in-ter-os'se-us (*inter*, *os*, bone). Between the bones. **I. ar'teries of the forearm and hand.** Of these there are several. The compressor interosseous artery arises from the posterior part of the ulnar, below the bicipital tuberosity of the radius, passes backward, and divides into two branches: the one called anterior interosseous descends vertically, anterior to the interosseous ligament; the other, called posterior interosseous, passes above the ligament, appears at the posterior part, and divides into two great branches—the posterior recurrent radial and the posterior interosseous, properly so called. In the hand: 1. The dorsal metacarpal interosseous arteries are given off by the dorsalis carpi, a division of the radial artery. 2. The palmar interosseous arteries, arising from the convexity of the deep palmar arch, give off the middle interosseous arteries. 3. The dorsal interosseous of the index, proceeding directly from the radial artery. In the foot are distinguished: 1. The dorsal interosseous arteries, three in number, which arise from the artery of the metatarsus, a branch of the dorsalis tarsi. 2. The plantar interosseous arteries, also three in number, and arising from the plantar arch. **I. lig'aments,** ligaments seated between certain bones, which they unite, as between the radius and ulna, and the tibia and fibula. **I. mus'cles,** these occupy the spaces between the bones of the metacarpus and metatarsus, and consequently belong, some to the hand, others to the foot. **I. nerve,** branch given off by the median nerve, which descends before the interosseous ligament, accompanying the artery of the same name. **I. veins,** these have the same arrangement as the arteries.

Interos'seus inter'nus pri'mus. See *Interosseus manûs*. **I. ma'nûs,** these muscles are seven in number—two for each of the three middle fingers, and one for the little finger. Four are situate on the back of the hand, and three only in the palm. They are inserted into the metacarpal bones, and send a tendon to the tendon of the extensor communis. According to their office, they are, to each finger, an adductor and an abductor. The index has a dorsal abductor and a palmar one. The middle finger has two dorsal muscles for adductor and abductor, the ring finger has a dorsal adductor and a palmar abductor, and the little finger has only one interosseous abductor, which is palmar. These muscles produce abduction and adduction of the fingers, which they can also extend, owing to their connection with the extensor tendons. The first dorsal interosseous of the hand is sometimes called interosseus internus primus. **I. pe'dis,** the number, arrangement, shape, and uses of these are the same as in the preceding muscles. Four are dorsal, and three plantar; six belong to the three middle toes, and one to the little toe. The great toe is devoid of them. As in the hand, they are distinguished, in each toe, into abductor and adductor. **I. quar'tus,** prior annularis. **I. secun'dus,** prior medii digiti.

Interparietal, in-tur-par-i'et-al. Between the parietal bones. **I. bone,** bone found in the skulls of the children of the Peruvian races, lying in the upper angle of the occipital bone, where the parietal bones separate from each other; analogue of the interparietal bone of ruminants and carnivora.

Interpeduncular, in-tur-pe-dunk'u-lar (*inter*, *pedunculi*, peduncles). Between the peduncles of the encephalon; as *Interpeduncular space*, a lozenge-shaped interval behind the diverging peduncles of the crura of the cerebrum, in which are found the posterior perforated space, corpora albicantia, tuber cinereum, and pituitary body.

Interpellatus (in-tur-pel-lat'us) **mor'bus** (*interpello*, to interrupt). Disease whose progress is unequal and paroxysms irregular.

Interphalange'al. Between the phalanges.

Interpleuricostal. Between pleura and ribs. **I. mus'cles,** internal intercostal muscles.

Interpolated, in-tur'pol-a-ted (*interpolo*, to give a new form to). Intercalary.

Interpola'tion. Plastic operation for insertion of new material, as skin-grafting, etc.

Interpu'bic. Between the pubic bones. **I. disk,** fibro-cartilaginous symphysis of the pubis.

Interruptio (in-tur-rup'she-o) **menstrua'lis** or **menstruationis,** men-stru-ash-e-o'nis. Amenorrhœa.

Interscap'ular. Between the shoulders or scapulæ, the interscapular region. Interscapular cavities, cavitates scapulares, are depressions between the scapulæ and the spinous processes of the vertebræ.

Interscapu'lium. Spine of the scapula; space between the scapulæ.

Intersectio, in-tur-sek'she-o (*inter, seco, sectum,* to cut). Decussation; intersection. **I. nervo'rum optico'rum,** chiasm of optic nerve.

Intersection, in-tur-sek'shun. Point where two lines meet and cut each other. **I., aponeurot'ic,** fibrous bands which certain muscles present in their length, and by which they seem interrupted. They are found in the recti muscles of the abdomen, semi-membranosus, complexus, sterno-thyroideus, etc.

Intersectiones (in-tur-sek-she-o'nees) **tendin'eæ musculo'rum.** Lineæ transversæ; inscriptiones tendineæ musculorum.

Intersepimen'tum (*intersepio,* to fence about). Partition. **I. thora'cis,** mediastinum.

Intersep'ta horizonta'lia Pacchio'ni. Tentorium.

Intersep'tum (*inter, septum,* partition). Uvula; septum narium; diaphragm; intersepimentum. **I. na'rium,** septum narium. **I. virgina'le,** hymen.

In'terspace. Osseous masses occupying spaces between contiguous Haversian systems.

Interspi'nal. Between the spinous processes. **I. lig'aments,** these ligaments occupy the intervals between the spinous processes in the back and loins. In the neck they are replaced by the muscles of the same name. They prevent the too great flexion of the spine, and keep the spinous processes *in situ.* The outermost thickened portions of these are sometimes termed ligamenta apicum.

Interspinales (in-tur-spin-al'ees) **col'li.** These are twelve in number, and occupy, in two parallel rows, the intervals between the spinous processes of the cervical vertebræ, from the spinous process of the atlas and vertebra dentata to that between the last cervical and first dorsal vertebra. They are flat, thin, and quadrilateral, and contribute to the extension of the neck and throwing the head backward. **I. dor'si et lumbo'rum,** these muscles are of two kinds: one representing fleshy bundles of different lengths, applied upon the lateral surfaces of the spinous processes, from the third dorsal to the second lumbar vertebra. The other is covered by the preceding. They are situate on each side of the interspinal ligament, in small, short, flat bundles, passing from one spinous process to the second, third, or fourth above it. These muscles aid in extending the vertebral column, and incline it a little to one side when they act on one side only.

Interspi'nous. Between the spinous processes.

Interstices, in'tur-stis-es (*inter, sisto,* to place). Name given to intervals between organs; pores.

Interstitia intercostalia, in-tur-stish'e-ah in-tur-kos-tal'e-ah (same etymon). Intercostal spaces.

Interstitial, in-tur-stish'al. Occurring in the interstices of an organ, as absorption, keratitis, pregnancy, etc.; intercalary.

Interstitium, in-ter-stish'e-um. Interstice. **I. cilia're,** ciliary ligament. **I. intercosta'le,** intercostal space. **I. interos'seum antibrach'ii,** space between radius and ulna. **I. interos'seum cru'ris,** space between tibia and fibula. **I. jugula're,** throat.

Intersupercil'iary. Between the superciliary ridges.

Intertar'sal. Between the contiguous tarsal bones.

Intertinc'tus (*inter, tingo,* to dye). Discrete.

Intertrabecula, in-tur-trab-ek'u-lah. Thick band of cartilage between the trabeculæ of the cranium.

Intertrachelian, in-tur-trak-e'le-an (*inter, trachelos,* throat). Between the cervical vertebræ. See *Intertransversales colli.*

Intertragicus, in-tur-traj'ik-us. Muscle on front wall of cartilage of external auditory canal.

Intertransversales (in-tur-trans-vur-sal'ees) **col'li.** Small muscular bundles, quadrilateral, thin, and flat, situate, in pairs, in the intervals between the transverse processes of the neck, except between the first and second, where there is only one. They are distinguished into anterior and posterior intertransversales. The former are six in number; the latter five. These muscles bring the transverse processes of the neck nearer each other, and contribute to the lateral flexion of the neck. **I. lumbo'rum,** these are almost entirely fleshy, and ten in number, five on each side; are similar to the preceding in general arrangement, except that they are more marked and not placed in two rows. Each intertransverse space contains only one. They are quadrilateral and flat. The first occupies the space between the transverse processes of the first lumbar and the last dorsal vertebræ; the last is between that of the fourth and fifth lumbar vertebræ. These muscles incline the lumbar region laterally, and straighten it when inclined to one side. One set of these muscles, intertransversales mediales interaccessorii, passes from the accessory process of one vertebra to the mammillary process of the next.

Intertransversa'lis. Between the transverse processes of the vertebræ. **I. mus'cle,** see *Intertransversales.*

Intertransversa'rius. Intertransversalis.

Intertrans'verse. Between transverse processes of vertebræ.

Intertrigo, in-tur-tre'go (*inter, tero,* to rub). Chafing of skin from friction of folds or surfaces, as in young children. **I. a'ni** or **pod'icis,** chafing of the anus.

Intertrochanteric, in-tur-tro-kan-ter'ik. Between the trochanters.

Intertu'bular stro'ma. See *Kidney.* **I. sub'stance,** see *Tubule, dental.*

In'terval (*intervallum,* a rampart). Intermission; space between parts, time between paroxysms of fever, etc.; interstice. **I., lu'cid,** see *Lucid.*

Intervallary, in-tur-val'lar-e. Between paroxysms of disease.

Intervallum, in-tur-val'lum (same etymon). Interval, intermission, interstice. **I. intercosta'le,** intercostal space.

Interval'var or **Interval'vular.** Between valves.

Intervenium, in-tur-ven'e-um (*inter, vena,* a vein). Space between two veins.

Interventric'ular. Between the ventricles of the heart or brain. **I. sep'tum,** fibrous partition between the ventricles of the heart.

Intervertebral, in-tur-vurt'e-bral. Between the vertebræ. **I. car'tilages, fibrocar'tilages,** or **disks,** these organs are of a fibrocartilaginous nature, sections of a cylinder, flexible, whitish, resisting, and situated between the bodies of the vertebræ, from the space between the second and third as far as that between the last vertebra and sacrum. Their form is accommodated to that of the vertebra with which they are in connection, so that in the neck and loins they are oval, in the dorsal region nearly circular. **I. disks,** intervertebral cartilages. **I. fibrocar'tilages,** intervertebral cartilages. **I. gan'glion,** see *Vertebral nerves.* **I. sub'stance,** I. cartilage.

Intestabilis (in-tes-tab'il-is) or **Intestatus,** in-tes-tat'us (*in, testis,* testicle). Castrated.

Intes'tinal (*intus,* within). Enteric. Relating or belonging to the intestines. **I. juice,** succus entericus. **I. tube** or **tract,** the canal formed by the intestines from the pyloric orifice of the stomach to the anus.

Intestine, in-tes'tin. Bowel. A musculo-membranous canal, variously convoluted, extending from the stomach to the anus, and situate in the abdominal cavity, the greater part of which it fills. In man its length is six or eight times that of the body. It is divided into two principal portions, called small intestine and large intestine. The former, intestinum tenue, I. gracile or angustum, aræa, constituting nearly four-fifths of the whole length, begins at the

stomach and terminates in the right iliac region. It is divided into duodenum, jejunum, and ileum. Some anatomists give the name small intestine to the last two only, jejunoileum, intestinum mesenteriale, which are kept in place by the mesentery and form a large *paquet*, occupying the umbilical and epigastric regions, part of the flanks, of the iliac regions, and of the cavity of the pelvis. It is composed of—1. A serous membrane, which is peritoneal. 2. Muscular coat, whose fibres are very pale, and are placed, in part, longitudinally, but the greater part transversely. 3. Whitish mucous membrane, villous and forming folds or valves—valvulæ conniventes—at its inner surface, and furnished with a number of mucous follicles called glands of Lieberkühn, crypts or follicles of Lieberkühn, and in the duodenum with the glands of Brunner. 4. Areolar or submucous coat, of loose texture, supporting the mucous membrane. The arteries of the small intestine proceed from the superior mesenteric; its veins open into the vena porta. Its nerves proceed from the superier mesenteric plexus.

The large intestine, intestinum crassum or amplum, megalocœlia, forms a sequence to the small. It is much shorter, and is solidly attached in the regions of the abdomen which it occupies. It begins in the right iliac region, ascends along the right flank till beneath the liver, when it crosses the upper part of the abdomen, descends into the left iliac fossa, and plunges into the pelvic cavity to gain the anus. The great intestine is usually divided into three portions —the cæcum, colon, and rectum. It receives its arteries from the superior and inferior mesenterics. Its veins open into the vena porta. Its nerves are furnished by the mesenteric plexuses. Its lymphatic vessels, which are much less numerous than those of the small intestine, pass into the ganglions or glands seated between the different reflections of the peritoneum, which fix it to the abdominal parietes. The use of the intestines is, in the upper part, to effect the chylification of the food and the absorption of the chyle; in the lower, to serve as a reservoir, where the excrementitious portion of the food collects, and also as an excretory duct, which effects its expulsion. **I., large**, see *Intestine*. **I., prim'itive**, protogaster. **I., small**, see *Intestine*.

Intestino'rum læv'itas. Lientery.

Intestin'ula cer'ebri. Cerebral convolutions. **I. Meibo'mii**, Meibomius, glands of.

Intestin'ulum (dim. of **Intestinum**). Small intestine; cerebral convolution; umbilical cord.

Intestinum, in-tes-te'num. Intestine. **I. am'plum**, large intestine. **I. angus'tum**, small intestine. **I. cæ'cum**, cæcum. **I. cellula'tum**, colon. **I. circumvolu'tum**, ileum. **I. cras'sum**, colon; see *Intestine*. **I. glomerula'tum**, ileum. **I. gra'cile**, small intestine. **I. gran'de**, large intestine; colon. **I. gyra'tum**, ileum. **I. il'eum** or **involu'tum**, ileum. **I. lax'um**, colon. **I. lon'gum**, ileum. **I. ma'jus**, colon. **I. me'dium**, mesentery. **I. mesenteria'le**, see *Intestine*. **I. pancreat'icum**, duodenum. **I. perforat'um**, perforation of the intestines. **I. ple'num**, colon. **I. rec'tum**, rectum. **I. ten'ue**, small intestine.

In'tima (tu'nica) vaso'rum. Innermost coat of the blood-vessels developed on the inner surface of the membrane—capillary membrane—forming the wall of the capillaries.

In'timum un'guis (*intimus*, inmost). Root of the nail. **I. vaso'rum**, lining membrane of blood-vessels.

Intol'erance. Inability to endure pain, light, etc.

Intonation (in-to-na'shun), **intes'tinal** (*intono*, to make a noise). Borborygmus.

Intortion, in-tor'shun (*in*, *torqueo*, to wrench). Distortion.

Intoxicatio, in-toks-ik-ash'e-o (*in*, *toxicon*, poison). Poisoning. **I. arsenica'lis**, arsenicism. **I. opia'ca**, meconism. **I. saturni'na**, saturnism.

Intoxication, in-toks-ik-a'shun. Poisoning; temulence. **I., alcohol'ic, chron'ic**, see *Temulence*. **I., antimo'nial**, stibialism. **I., digital'ic**, see *Digitalic*. **I., sat'urnine**, lead-poisoning, saturnine cachexy; aggregate of symptoms presenting themselves prior to an attack of lead-colic. **I., sep'tic**, septicæmia. **I., uræ'mic**, uræmia.

In'tra (L. *intra*). In composition, within.

In'tra-abdom'inal. Within the abdomen.

Intra-arachnoid, in'trah-ar-ak'noid. Within the arachnoid cavity.

In'tra-arte'rial. Within an artery or arteries or system of arteries.

Intra-articular, in'tra-ar-tik'u-lar (*intra*, within, *articulus*, joint). Relating to the interior of a joint.

Intracap'sular. Within the capsule of a joint.

Intracardiac, in-tra-kar'de-ak. Within the heart.

Intracer'ebral. Within the brain.

Intracervical, in-trah-sur'vik'l. Within the cervix or cervical canal of the uterus.

Intracostalis, in-trah-kos-tal'is. Internal intercostal muscle.

Intracra'nial. Within the cavity of the skull.

Intracruræus, in-trah-kru-re'us. Vastus internus.

Intracuta'neous. Within the skin.

Intracystic, in-tra-sis'tik (*intra*, *cyst*). Originating from the interior of a cyst or cysts; intravesical.

Intrader'mic. Intracutaneous.

Intrafœta'tion. Fœtal inclusion; fœtus in fœtû.

Intrahepat'ic. Within the liver.

Intrajug'ular. Within the jugular vein or process.

Intraligamen'tous. Within a ligament, as I. cyst.

Intralin'gual. Within the tongue. **I. sal'ivary glands**, see *Lingual glands* and *Salivary glands*.

Intralobular, in-tra-lob'u-lar. Within a lobule, as of the lung or liver.

Intramed'ullary. Within the medulla.

Intrameningeal, intra-men-in-je'al. Within the meninges—of the brain, for example, as I. apoplexy.

Intramu'ral (*intra*, within, *murus*, wall). Between the walls of an organ. See *Pregnancy, interstitial*. **I. inter'ment**, burial within city limits.

Intramus'cular. Within a muscle or fibres of a muscle.

Intranu'clear. Within a nucleus.

Intra-ocular, in'tra-ok'u-lar (*intra*, *oculus*, eye). Within the eye. **I.-o. ten'sion**, increased hardness of the eyeball.

In'tra-or'bital. Within the orbit.

In'tra-os'seous. Within the substance of a bone.

Intrapari'etal (*intra*, *paries*). Within the walls of any organ or growth; intramural.

Intrapel'vic. Within the pelvis.

Intraperitoneal, in-tra-per-it-o-ne'al. Within the cavity of the peritoneum.

Intraplacental, in-tra-pla-cen'tal. Within the placenta.

Intrapleu'ral. Within the cavity of the pleura.

Intrapo'lar. Between the poles, as of an axis or of a galvanic battery.

Intrapulmonary, in-tra-pul'mo-nar-e. Within the lung.

Intrarec'tus. Rectus oculi internus.

Intrarhachidian (in-tra-rhak-id'e-an) or **Intraspi'nal.** Within the medullary or spinal canal.

Intrathoracic, in-tra-tho-ras'ik. Within the cavity of the thorax.

Intratu'bal. Within the Fallopian tube.

Intratympan'ic. Within the cavity of the tympanum.

In'tra-ure'thral. Within the urethra.

In'tra-u'terine (*intra*, *uterus*). Within the womb.

Intravaginal, in-tra-vaj'i-nal. Within the vagina.

Intravasation, in-trav-as-a'shun (*intra*, *vas*, vessel). Entrance into vessels of matters formed outside of them or in their parietes.

Intravascular, in-tra-vas'ku-lar. Within a vessel or vessels.

Intravenous, in-tra-ve'nus. Within the veins. **I. infu'sion** or **injec'tion**, introduction of a fluid into a vein.

Intraventric'ular. Within a ventricle of the brain or heart.

Intraver'tebral. Intraspinal.

Intravesical, in-tra-ves'ik'l. Within the bladder.

Intricatura, in-trik-at-u'rah (*in, tricor*, to make difficulties). Decussation; interlacing. **I. nervo'rum optico'rum**, chiasm of optic nerves.

Intrinsic, in-trin'sik (*intra, secus*, toward). Applied to the internal muscles of certain organs, as those of the ear, tongue, and larynx. Internal diseases were called *Intrinseci*.

In'tro (L.). In composition, within.

Introcession, in-tro-ses'shun (*introcedo*, to enter into). Depression or subsidence.

In'troflexed (*intro*, within, *flexus*, bent). Bent or curved inward.

Introïtus, in-tro'it-us (*intro, io*, to go). Entrance, as of a tube or cavity. **I. pel'vis**, pelvic inlet; see *Pelvis*. **I. vagi'næ**, external aperture of vagina; see *Vagina*.

Intromission, in-tro-mis'shun (*intro, mitto*, to send). Act of introducing one body into another, as the penis into the vagina.

Intropelvimeter, in-tro-pel-vim'et-ur. Instrument to measure the diameters of the pelvis.

Intror'sion. Act of turning inward. Invagination of mesoderm and endoderm in the embryo.

Introsusception, in-tro-sus-sep'shun (*intro, suscipio*, to receive). Intussusception. **I. entro'pium**, entropion.

Introver'sion. Invagination; sunken or depressed condition of a part.

Intuba'tion (*in, tubus*, tube). Introduction of a tube; catheterism. **I. of the lar'ynx**, passage of a tube into the larynx and trachea to relieve obstruction to breathing, as in croup or diphtheria.

In'tubum. Cichorium endivia. **I. errat'icum**, Cichorium intybus.

Intumescence, in-tu-mes'sence (*intumesco*, to swell). Augmentation of size in a part or in the whole of the body. *Intumescentiæ* formerly denoted an order of diseases, including polysarcia, pneumatosis, anasarca, œdema, physconia, and pregnancy.

Intumescentia, in-tu-mes-sen'she-ah. Intumescence. **I. ganglifor'mis**, ganglion of Gasser; see *Facial nerve*. **I. lac'tea mamma'rum**, distension of the breasts with milk. **I. lie'nis**, tumefaction of the spleen. **I. malig'na**, malignant swelling. **I. semiluna'ris**, ganglion of Gasser.

In'tus inver'sus (*intus*, within, *inversus*, inverted). Transposition of the viscera.

Intussusception, in-tus-sus-sep'shun (*intus*, within, *suscipio*, to receive). In physiology, the mode of increase peculiar to organized bodies, as absorption, imbibition, etc. In pathology, the introduction of one part of the intestinal canal into another, which serves it as a sort of vagina or sheath; generally, the upper part of the small intestine is received into the lower. At times the invaginated portion separates and is voided per anum, the patient recovering. The disease is, however, very dangerous. **I., u'terine**, introversion of the uterus.

Intussusceptum, in-tus-sus-sep'tum. The part affected with intussusception, as the bowel.

Intussuscipiens, in-tus-sus-sip'e-ens. The part, as the bowel, receiving the other part in intussusception.

Intybum, in'tib-um. Cichorium intybus.

In'tybus. Cichorium intybus. **I. angus'tus**, Lactuca virosa. **I. horten'sis** or **sati'vus**, Cichorium endivia.

Inula, in'u-lah. See *Inula helenium*. **I. Britan'nica**, I. dysenterica. **I. Chinen'sis**, tonic, stimulant, and antiperiodic, and externally applied to buboes, boils, etc. **I., com'mon**, I. helenium. **I. conyzæ'a**, I. dysenterica. **I. dysenter'ica**, systematic name of the lesser inula. Plant once considered antidysenteric. **I. helen'ium**, elecampane, common inula. The root, *Inula* (Ph. U. S.), has been used in dyspepsia, cachexia, pulmonary affections, etc. **I., less'er**, I. dysenterica. **I. squarro'sa**, Conyza squarrosa.

In'ulin. Amyloid substance, a carbohydrate, in Inula helenium, Arnica montana, etc. White soluble powder, stimulant expectorant; dose, 1 to 3 grains. Used in making inulin bread for diabetic patients, as it antagonizes the action of ferments.

Inunction, in-unk'shun. Act of rubbing in an ointment or liniment—unction, infriction. Inunction of the whole body has been recommended in scarlatina, measles, and in scrofulous or tuberculous cachexia. Liniment. See *Hydrargyrentripsis*.

Inundation, in-un-da'shun (*inundo*, to flow over). Depuration.

Inustion, in-ust'yun (*in, uro, ustum*, to burn). Cauterization; caustic.

Inusto'rium. Caustic; cauterium.

Inus'tum (same etymon). Burn.

Invaginated, in-vaj'in-a-ted (*in, vagina*, a sheath). Received into another part, as into a sheath. **I. bandage** is one in which the strips or tails pass through appropriate slits or buttonholes.

Invaginator, in-vaj'in-a-tor. Instrument devised for the radical cure of hernia by invagination. See *Invagination*.

Invagination, in-vaj-in-a'shun. Intussusception. Also operation which consists in introducing one end of a divided intestine into the other, with the view of restoring the continuity of the intestinal canal. See *Anastomosis, intestinal*. Operation for radical cure of crural hernia, consisting in introducing into the crural canal a thick tent of charpie, which by compression and adhesive inflammation obliterates the neck of the hernial sac.

Invalescence, in-val-es'sence. Convalescence.

Invalid, in'val-id (*in, validus*, strong). One out of health.

In'validing. Removal from the army of a soldier who has become, from infirmity, unfit for service.

In'validism. Condition of an invalid.

Invalitudo, in-val-it-u'do (*in, valetudo*, health). Infirmity.

Invasion, in-va'zhun (*in, vado, vasum*, to go). Beginning of an attack or paroxysm of disease.

Invermination, in-vur-min-a'shun (*in, vermino*, to have worms). Condition attended with presence of intestinal worms. Helminthiasis.

Inversio, in-vur'she-o (*in, verto*, to turn). Inversion or turning inside out. **I. palpebra'rum**, entropion. **I. u'teri**, hysteroptosis, inversion of the uterus. **I. vagi'næ**, prolapse of vagina. **I. vesi'cæ**, inversion of the bladder. **I. vesi'cæ urina'riæ fis'sæ**, exstrophy of the bladder.

Inversion, in-vur'shun. See *Inversio*.

Invert sugar. Combination of dextrose and levulose; a variety of glucose which turns the polarized ray sinistrad.

Invert'ebral or **Invert'ebrate**. Devoid of vertebræ. Animals so arranged are called *Invertebrata*. See *Animal kingdom* and *Vertebrata*.

Invertentia, in-vur-ten'she-ah. Absorbents, antacids.

Invert'in. See *Ferments*.

Investitura (in-ves-te-tu'rah) **funic'uli umbilica'lis** (*in, vestis*, a garment). See *Funiculus umbilicalis*.

Invetera'ta (*in, vetus*, old). Chronic.

Inviril'ity. Absence of virility.

Inviscant, in-vis'kant (*in, viscum*, bird-lime). Thickening.

Inviscatio (in-vis-kah'she-o) **oc'uli**. Morbid adhesion of the eyelids to each other or to the globe of the eye. Gluing together of the eyelids by viscid secretion.

Inviscation, in-vis-ka'shun. Insalivation.

Involu'crum (*involvo*, to fold in). Covering; hence, involucra cerebri, membranes of the brain; involucra nervorum, sheaths of nerves. **I. cor'dis**, pericardium. **I. cor'poris commu'ne**, integument. **I. cor'poris vit'rei**, retina. **I. lin'guæ**, see *Tongue*. **I. membrana'ceum**, decidua reflexa. **I. nati'vum**, skin. **I. nervo'rum**, neurilemma; perineurium. **I. re'ti compara'tum**, retina.

Involumen'tum. Involucrum.

Invol'untary (*in, voluntas*, will). Not under the influence of the will.

Involu'tion (*involvo*, to roll in or on). Return to a natural condition; as I. of the uterus, return to its normal state as it was before pregnancy.

Involventia, in-vol-ven'she-ah. Demulcents.

Iodal, i'o-dal. Hydride of triiodacetyl, C_2I_3OH, being similar in composition to chloral, I_3 being substituted for Cl_3. Substance prepared by treating iodine with alcohol and nitric acid; anæsthetic.

Iodantipyrine, i-od-ant-e-pi'reen. Iodopyrine.

Iodated, i'o-da-ted. Iodized. **I. milk,** see *Milk.*

Iodethyl, i-od-eth'il. Ethyl iodide.

Iode'tum. Iodide. **I. ammo'nicum,** ammonium iodide. **I. ferro'sum,** ferrous iodide. **I. hydrargyr'icum,** hydrargyri iodidum rubrum. **I. hydrargyro'sum,** mercury protiodide. **I. ka'licum,** potassium iodide. **I. plum'bicum,** lead iodide.

Iodhydrate, i-od-hi'drate. Hydriodate and hydriodide.

Iodhydric, i-od-hi'drik. Hydriodic. **I. ac'id,** hydriodic acid. **I. e'ther,** hydriodic ether; iodethyl.

Iodhydrin, i-od-hi'drin. Product of action of muriatic acid on glycerin, in which a molecule or more of iodine replace one or more of hydroxyl.

Io'dic. Containing iodine; as iodic acid, produced by action of nitric acid on tincture of iodine.

Iodide, i'o-dide. Saline combination of iodine with a simple body other than oxygen.

Iodidum, i-o'did-um. Iodide. **I. hydrar'gyri chlor'idi,** mercury, iodide of chloride of. **I. hydrargyr'icum,** hydrargyri iodidum rubrum. **I. hydrargyro'sum,** hydrargyri iodidum.

Iodina rhombifolia, i-o-deen'ah rhom-be-fo'le-ah. Species of genus Santalaceæ, of S. America; bark and wood are astringent.

Iodine, i'o-deen (*iodes,* of a violet color, from the violet vapor it exhales when volatilized). *Iodum* (Ph. U. S.). It is contained in the mother-waters of certain fuci; it is solid, in the form of plates; of bluish-gray color, of metallic brightness, and smell similar to that of chloride of sulphur. Its s. g. is 4.9. When heated it becomes volatilized and affords the vapor which characterizes it. With oxygen it forms iodic acid, and with hydrogen hydriodic acid. Iodine and the iodides have been employed with success in the treatment of goitre and of some scrofulous affections, in glandular hypertrophy, and in skin diseases; for injections of various diseased cavities, for inhalation in bronchial and catarrhal affections, etc. It is apt, however, to induce cholera morbus, signs of great nervous irritability, iodomethe, frontal headache, coryza, lacrymation, acne, pharyngitis, etc., and emaciation of the mammæ. When these symptoms, collectively termed iodism, iodosis, and iodinia, are urgent, the dose may be diminished, or wholly discontinued and afterward resumed. When exposed to the air in a room it is an effective antibromic. Iodine paint is a tincture twice as strong as the officinal tincture, applied in cases where more active counter-irritation is needed. The Br. Ph. contains Linimentum iodi, iodine liniment. Solution of iodine and iodide of potassium in glycerin forms iodized glycerin, a caustic application in lupus, ulcers, etc. See *Bath, iodine,* and *Alimentation, iodic.* **I. bath,** see *Bath, iodine.* **I. cy'anide,** CNI, destructive to lower forms of animal life; useful for preserving collections of insects, etc. **I., inhala'tion of,** vapor iodi. **I. lin'iment,** see *Iodine.* **I. paint,** see *Iodine.*

Iodined, i'o-dined. Iodized.

Iodin'eum, Iodinium (i-o-din'e-um), **Iod'inum,** or **Io'dium.** Iodine.

Iodinia, i-o-din'e-ah. See *Iodine.*

Iodism, i'o-dizm. See *Iodine.*

I'odized. Iodined, iodated; impregnated or affected with iodine or its preparations, as I. oil, I. camphor, etc. **I. glyc'erin,** see *Iodine.* **I. hy'dride,** solution of iodine in amyl hydride. When applied to the skin, the latter vaporizes, leaving the iodine equally distributed on the surface. It is employed in open scrofulous sores, indolent bubo, fetid ulcerations, etc. It is also a deodorizer and a convenient method of administering iodine by inhalation.

Iodoform, i-od'o-form. *Iodoformum* (Ph. U. S. and Br.). Teriodide of formyl, formerly called sesquiiodide of carbon—so called from its analogy to chloroform. CHI_3. Obtained by adding to an alcoholic solution of iodide of potassium, chlorinated lime, the resulting iodate of lime being separated from the iodoform by the addition of boiling alcohol. Besides the medical properties of iodine, which render it useful in scrofula, syphilis, etc., it is anodyne, anæsthetic, antiseptic, and disinfectant. It is used externally as an ointment. It is given internally in cirrhosis of the liver, consumption, diabetes, and other affections. It is used externally in ointments. It is in crystalline plates of a citrine color, and is volatile, and may be given in the same cases as iodine and the iodides. Dose, gr. i–iij three times a day. See *Carbonis sesquiiodidum.* **I. gauze,** see *Gauze.* **I. oint'ment,** unguentum iodoformi.

Iodoform'ize. To subject a part to thorough iodoform dressing.

Iodofor'mum. Iodoform.

Iodohydrar'gyrate of potas'sium. See *Iodine.*

Iodhydrate, i-od-hi'drate. Hydriodate.

I'odol. Tetraiodopyrrol. C_4I_4NH. Yellowish-white, odorless, and tasteless powder derived from action of iodine on pyrrol in alcoholic solution; antiseptic, antibromic, and anæsthetic; used externally in ulcers, surgical dressings, ozæna, abscesses, caries, etc., and for dusting; internally as substitute for iodine.

Iodomethe, e-od-om'e-the (*iodine, methe,* drunkenness). See *Iodine.*

Iodopegæ, e-od-o-pa'ge (*iodum, pege,* spring). Mineral waters containing iodine.

Iodophenacetin, e-o-do-fen-as'et-in. Substance produced when a cold saturated solution of phenacetin, acidulated with hydrochloric acid, is treated with iodine. It is antiseptic.

Iodophenine, i-o-do-fe'neen. A derivative of phenacetin; antiseptic.

Iodophthisis, e-od-o-te'sis (*iodum, phthisis,* wasting). Loss of flesh and strength produced by iodine.

Iodopyrine, i-o-do-py'reen. Colorless crystalline substance; substitutive product of antipyrine, one atom of hydrogen being replaced by one of iodine; antipyretic and antiarthritic.

Iodoqui'nia, sul'phate of. Quinia, iodide of sulphate of.

Iodo'sis. See *Iodine.*

Iodosul'phate of cinch'onine. Proposed as a substitute for iodoform, being made by precipitating a solution of sulphate of cinchonine by a solution of iodine and iodide of potassium.

Iodotan'nin. Solution of iodine in water, with the assistance of tannic acid.

Iodother'apy. Treatment of disease with iodine.

Io'dum (Ph. U. S.). Iodine.

Iodure'tum. Iodide. **I. ammo'nii,** see *Iodine.* **I. am'yli,** see *Iodine.* **I. hydrargyr'icum,** mercury biniodide. **I. hydrargyro'sum,** hydrargyri iodidum. **I. ka'licum,** potassium iodide. **I. plumb'icum,** lead iodide. **I. potas'sicum,** potassium iodide. **I. so'dicum,** sodium iodide. **I. sul'phuris,** sulphuris iodidum.

I'on (*ion,* going). Viola; Vaccinium baccifera. Element which appears in electrolysis at the positive or negative plate—kathion at the negative, anion at the positive plate.

Ionia, e-o'ne-ah. Teucrium chamæpitys.

Ionid'ion or **Ionidium** (e-o-nid'e-um) **angustifo'lium,** Mexican plant of genus Violaceæ, used in dropsy. **I. brevicau'le,** S. American species, root of which is emetic. **I. calceola'ria,** species of S. America, resembling ipecacuanha and having similar therapeutic properties. **I. heterophyl'lum,** Chinese species; emetic, as is also **I. lana'tum,** a Brazilian plant. **I. Marcuc'ci** or **Marcu'tii,** cinchunchulli, S. American plant, said to be identical with I. microphyllum and I. parviflorum, said to be particularly efficacious in the mal de S. Lazaro of Colombia. **I. microphyl'lum** and **I. parvifio'rum,** two S. American species, the root of which is called huichunchulli; action is like that of ipecac. **I. poaya,** Brazilian plant; root is emetic, as is that of the W. Indian plant *I. strictum,* and that of the Brazilian plant *I. urticæfolium.* The

root of *I. suffruticosum*, of E. Indies, is demulcent in simple and specific urethritis and other urinary diseases.

Ionium, e-o'ne-um. Iodine.

Ionta, e-on'tah. Excretions; excreta.

Ion'thos or **Ion'thus** (*ion*, the violet, *anthos*, flower). Violet eruption; unsuppurative, tubercular tumor, stationary, chiefly on the face. Disease of or connected with the hair-follicles, as acne, sycosis, etc. Geneias. **I. ac'ne**, acne. **I. come'do**, see *Comedo*. **I. corym'bifer**, gutta rosea. **I. furun'culus**, furunculus. **I. syco'sis**, sycosis. **I. va'rus**, acne. **I. va'rus puncta'tus**, acne punctatus.

Io'num. Iodine.

Iotacism, i-o'tah-sizm (from the Greek letter *Iota*). Defective articulation from inability to pronounce the palatals *j* and *g* soft.

Ip'ecac. Apocynum androsæmifolium, Euphorbia corollata, Gillenia trifoliata, ipecacuanha, triosteum. **I., Amer'ican**, Apocynum androsæmifolium. **I., wild**, Euphorbia ipecacuanha, Triosteum perfoliatum, Asclepias curassavica.

Ipecacoan'ha. Ipecacuanha.

Ipecacuan'ha. In common parlance abridged to ipecac, and in Ireland to hippo. Pharmaceutical name of the root of Cephaëlis or Callicocca ipecacuanha, nat. ord. Cinchonaceæ; obtained from Psychotria emetica of Peru. The odor of the root, ipecacuanha root, Ipecacuanha (Ph. U. S.), is faint and peculiar; taste bitter, subacrid, and mucilaginous; water and alcohol extract its virtues, which depend on a peculiar principle called emetia. It is emetic in large doses; expectorant and sudorific in smaller. Dose, as an emetic, gr. xv to xxx. Euphorbia corollata, Pedilanthus tithymaloïdes. **I., bas'tard**, Asclepias curassavica, Triosteum perfoliatum. **I., brown**, root of Cephaëlis ipecacuanha. **I., Caroli'na**, Podophyllum peltatum. **I., Ger'man**, vincetoxicum. **I. of the Isle of France**, Tylophora asthmatica. **I., white**, is obtained from different species of Richardsonia and inidium, and from Viola ipecacuanha or Pombalea ipecacuanha.

Ipecacuan'hic ac'id. $C_{14}H_9O_7$. Brown acid derived from root of Cephaëlis ipecacuanha.

I'po. Resin derived from bark of Strychnos Tieuté. Upas. See *Antiaris toxicaria* and *Upas*. **I. toxica'ria**, see *Upas*.

Ipomœ'a acetosæfo'lia (*ips*, an insect infesting the vine, *homoios*, like, from its twisting round other plants). Species of Convolvulaceæ of S. America and W. Indies, used externally in ascites and arthritis; sap is cathartic. **I. aquat'ica**, species of E. and W. Indies; cathartic, and used externally for abscesses. **I. bata'tas**, sweet potato. **I. batatoï'des**, see *Convolvulus jalapa*. **I. bo'na nox**, moon-flower, grows in E. and W. Indies; bark of root is cathartic. **I. cæru'lea**, E. Indian species; seeds are cathartic. **I. cathar'tica**, juice is drastic cathartic. **I. cymo'sa**, E. Indian species; leaves make an emollient application to suppurating surfaces; seeds are laxative. **I. digita'ta**, roots of this species from E. Indies, Africa, and S. America are cathartic. **I. gemel'la**, E. Indian species; demulcent in aphthous stomatitis. **I. jala'pa** or **jalap'pa**, Convolvulus jalapa. **I. macrorrhi'za**, Convolvulus jalapa. **I. Mexitlan'ica**, see *Convolvulus jalapa*. **I. muricoï'des**, Mexican species, used for baths in cases of paralysis. **I. nil**, Convolvulus nil. **I. opercula'ta**, see *Batata de purga*. **I. Orizaben'sis**, see *Convolvulus jalapa*. **I. pandura'ta**, wild jalap or potato, man-root; indigenous in U. States; cathartic. **I. pur'ga**, see *Convolvulus jalapa*. **I. renifor'mis**, E. Indian species; diuretic, alterative. **I. re'pens**, I. aquatica. **I. Schiedea'na**, see *Convolvulus jalapa*. **I. sim'ulans**, a tree of Tampico, the source of Tampico jalap. **I. stans**, Mexican species, root of which is cathartic. **I. subtril'oba**, root of this Peruvian species is drastic cathartic. **I. turpe'thum**, E. Indian jalap; root and stems are purgative.

Ir. As a prefix, has the signification of *Im.*

I'ra. Rage.

Iracun'dus. Rectus externus oculi.

Iral'gia, Ireal'gia, or **Iridalgia**, ir-id-al'je-ah (*iris*, *algos*, pain). Pain in the iris.

Ireoncion, ir-e-on'se-on (*iris*, *onkos*, hook). Iriancistron.

Ireoperisphinx'is (*iris*, *peri*, around, *sphinxis*, constriction). Operation on the iris, consisting of formation of artificial pupil by bringing all parts of the iris to a central point.

I'rian. Relating to the iris.

Iriancis'tron, Iriankis'tron, or **Iridancistron**, ir-id-an-sis'tron (*iris*, *ankistron*, hook). Hooked instrument used in the formation of an artificial pupil.

Iridadenosis, ir-id-ad-en-o'sis (*iris*, *aden*, gland). Disease of glands of region of iris.

Iridæmia, ir-id-e'me-ah (*iris*, *haima*, blood). Hemorrhage of the iris.

Iridal, i'rid-al. Relating to the iris.

Iridalgia, ir-id-al'je-ah (*irido*, *algos*, pain). Iralgia.

Iridallochrosis, ir-id-al-lok'ros-is (*iris*, *allos*, different, *chrosis*, coloration). Change in pigmentation of the iris,

Iridancis'tron. Iriancistron.

Iridareosis, ir-id-ar-e-o'sis (*irido*, *araiosis*, diminution). Atrophy of the iris.

Iridaux'e or **Iridauxesis**, ir-id-aux-a'sis (*irido*, *auxesis*, augmentation). Staphyloma of the iris; prolapse of the iris; hypertrophy of the iris from exudation of fibrin into its tissue.

Iridectome, i-rid-ek'tome (*irido*, *ektome*, excision). Knife for performance of iridectomy.

Iridectomedialysis, ir-id-ek-to-med-e-al'is-is (*irido*, *ektome*, excision, *dialusis*, separation). See *Coretomy*.

Iridectomy, i-rid-ek'to-me (*irido*, *ektome*, excision). Excision of the iris and establishment of artificial pupil.

Iridectropium, ir-id-ek-tro'pe-um (*iris*, *ektropion*, eversion). Eversion of part of iris.

Iridelcosis, ir-id-el-ko'sis (*iris*, *helcosis*, ulceration). Ulceration of the iris.

Iridencleisis (ir-id-en-kli'sis) (*irido*, *en*, *kleio*, to close), **Iridencleis'mus**, or **Iridenklei'sis**. See *Coretomy*.

Iridentropium, ir-id-en-tro'pe-um (*iris*, *entropion*, inversion). Inversion of the iris.

Irideremia, ir-id-er-e'me-ah (*irido*, *eremos*, deprived of). Absence of iris, either apparent or real, congenital or acquired.

Iridescent, ir-id-es'sent. Shining with many changing colors. **I. vision**, peculiar vision dependent on alterations in epithelium of the cornea from pressure. There are borders of various hues around artificial lights. Halo vision.

Irid'esis or **Iridodesis**, ir-id-od'es-is (*iris*, *deo*, to bind). Ligature of the iris; operation for artificial pupil, consisting in opening the cornea to admit the canula forceps, and by it drawing out a portion of the iris near its ciliary attachment, and strangulating a piece of it by means of a thread of moistened silk.

Iridian, i-rid'e-an. Iridal.

Iridin, i'rid-in. Cholagogue oleoresin procured from root of Iris versicolor.

Iriditis, ir-id-e'tis. Iritis.

Ir'ido. In composition, *iris*.

Iridoallochrosis, ir-id-o-al-lok'ro-sis. Iridallochrosis.

Iridocele, i-rid-o-se'le (Eng. i'rid-o-seel) (*irido*, *kele*, tumor). Prolapse of the iris through wound or lesion of the cornea.

Iridochorioiditis, ir-id-o-ko-ri-oid-e'tis. Inflammation commencing with the iris and secondarily affecting the choroid. When the primary disease is in the choroid, it is termed choroidoiritis; it may be primary or consecutive, traumatic, plastic, purulent, sympathetic, or syphilitic. **I., se'rous**, cyclitis.

Iridochoroidal, i-rid-o-ko-roid'al. Relating to iris and choroid; iridoptosis; ptosis iridis.

Iridochoroidi'tis. Iridochorioiditis.

Iridocinesis, ir-id-o-sin-a'sis (*irido*, *kinesis*, motion). Muscular movement of the iris.

Iridocoloboma, ir-id-o-kol-o-bo'mah. Coloboma iridis. Portion of iris removed in iridectomy.

Iridocyclitis, ir-id-o-sik-le'tis. Inflammation of the iris and ciliary circle. **I., fi'brinous** or **plas'tic,** I. with plastic effusion around the iris, ciliary body, and capsule of lens.

Iridocyclochorioiditis, ir-id-o-sik-lo-ko-re-oid-e'-tis. Inflammation of the iris, ciliary body, and choroid coat of the eye.

Iridodesis, ir-id-o-da'sis. Iridesis.

Iridodial'ysis (*irido, dialusis,* separation). Coretomy.

Iridodonesis, ir-id-o-don-a'sis (*irido, doneo,* to shake). Tremulousness of the iris from dislocation of the lens or other causes. See *Hippus.*

Iridoencleisis, ir-id-o-en-kli'sis. Coretomy.

Iridokine'sis. Iridocinesis.

Iridokoloboma, ir-id-o-kol-o-bo'mah. Iridocoloboma.

Iridol, ir'id-ol. White acicular hydrocarbon from wood-tar.

Iridoleptynsis, ir-id-o-lep-tin'sis (*iris, leptunsis,* thinning). Atrophy and thinning of the iris.

Iridomalacia, ir-id-o-mal-as'e-ah (*irido, malakia,* softness). Mollescence or softening of the iris, especially after rheumatic inflammation.

Iridomedial'ysis. Iridomesodialysis.

Iridomelano'ma or **Iridomelano'sis** (*irido, melano,* to color black). Deposition of black matter on the tissue of the iris.

Iridomesodialysis, ir-id-o-mes-o-de-al'is-is. Detachment of adhesions of central borders of iris.

Iridomo'tor. Concerned in the movements of the iris.

Iridonco'sis, Iridon'cus, or **Ironco'sis** (*irido, onkos,* swelling). Tumefaction or thickening of the iris; iridauxesis.

Iridoparal'ysis. Paralysis of the iris.

Iridoparesis, ir-id-o-par'es-is (*irido, paresis,* paralysis). Partial paralysis of the iris.

Iridoperiphacitis (ir-id-o-per-e-fas-e'tis) or **Iridoperiphaki'tis** (*irido, peri,* around, *phacitis,* inflammation of the lens). Inflammation of the anterior hemisphere of the capsule of the lens.

Iridoperisphynxis, ir-id-o-per-e-sfinks'is (*irido, peri,* around, *sphunxis,* constriction). Circular muscular fibres in vicinity of sphincter.

Iridophlebocol'pus (*irido, phleps,* vein, *kolpos,* sinus). Venous sinus of the iris.

Iridoplania, ir-id-o-plan'e-ah (*irido, plane,* wandering). Iridadenosis; hippus.

Iridoplegia, ir-id-o-plej'e-ah (*irido, plege,* stroke). Iridoparalysis.

Iridoptosis, ir-id-o-to'sis. Ptosis iridis; prolapse of the iris.

Iridor'rhagas or **Iridor'rhox** (*irido, rhox,* fissure). Fissure of the iris. See *Coloboma.*

Iridorrho'ge (*irido, rhoge,* fissure). Iridorrhagas.

Iridoschisma, ir-id-o-sis'mah (*irido, schisma,* fissure). Coloboma iridis; iridorrhagas.

Iridosteresis, ir-id-o-ster-a'sis (*irido, steresis,* privation). Irideremia.

Iridotenclei'sis. Iridencleisis.

Ir'idotome. Instrument for performing iridectomy.

Iridotomencleisis, ir-id-o-to-men-kli'sis (*irido, tome,* section, *enkleio,* to include). Coretomy.

Iridotomedialysis, ir-id-o-to-med-e-al'is-is (*irido, tome,* section, *dialusis,* separation). See *Coretomy.*

Iridotomy, ir-id-ot'o-me (*irido, tome,* section). See *Coretomy.*

Iridotromus, ir-id-ot'ro-mus (*irido, tromos,* trembling). Iridodonesis; hippus.

Irigen'ium. Verbena officinalis.

I'rine. Camphoraceous substance, $C_8H_{16}O_2$, from root of Iris Florentina.

Iriod'esis. Iridodesis.

I'ris (so called from resembling the rainbow in its variety of colors). A membrane stretched vertically at the anterior part of the eye, in the midst of the aqueous humor, in which it forms a circular, flat partition separating the anterior from the posterior chamber. It is perforated by a circular opening called the pupil, which is constantly varying its dimensions, owing to the varying contractions of the fibres of the iris. Its posterior surface has been called uvea, from the thick black varnish covering it. The pigmentary stratum on its free surface appears to be bounded by a delicate but finely defined line, which has been described as a special membrane—membrana pigmenti or limitans, or limitans Pacini or Jacobi Arnold or Zinnii. The greater circumference of the iris is adherent to the ciliary processes and circle. It has an external plane of radiated fibres, dilatator iridis, and an internal one of circular fibres, sphincter pupillæ or iridis, which serve the one to dilate, the other to contract, the aperture of the pupil. The iris receives the ciliary nerves. Its arteries are furnished by the long ciliary arteries, which form two circles by their anastomoses—the one very broad, near the great circumference, the other smaller and seated around the circumference of the pupil. The veins of the iris empty themselves into the vasa vorticosa and into the long ciliary veins. The iris regulates by its dilatation or contraction the quantity of luminous rays which are necessary for distinct vision. The different colors of the iris occasion the variety in the colors of the human eye. See *Membrana pupillaris, Herpes iridis.* **I., cleft of,** coloboma iridis. **I., colobo'ma of,** coloboma iridis. **I., com'mon,** I. Germanica. **I., fis'sure of,** coloboma iridis. **I. Florenti'na,** Florentine iris or orris, ord. Iridaceæ; the rhizome of this plant is extremely acrid in its recent state, and when chewed excites a pungent heat in the mouth, continuing for several hours. When dried the acrimony is lost or nearly so, and the smell is very agreeable; it is expectorant. The orris root of the shops is said to consist of the rhizomes of three species—I. Florentina, I. pallida, and I. Germanica. **I. fœtidis'sima,** stinking iris; the root is antispasmodic and narcotic. **I. German'ica,** flower-de-luce, common iris or orris; the fresh roots are powerfully cathartic, and are given also in dropsies. **I., hernia of,** I., prolapse of. **I. hexago'na,** I. versicolor. **I., inflamma'tion of,** iritis. **I. lacus'tris,** dwarf flag, dwarf lake iris; has the properties of I. versicolor. **I., lake, dwarf,** I. lacustris. **I., lig'ature of,** iridesis. **I. lu'tea,** I. pseudacorus. **I. nos'tras,** I. Germanica. **I. palus'tris,** I. pseudacorus. **I., prolapse' of,** iridauxesis. **I. pseudac'orus,** yellow waterflag; the root has an acrid, styptic taste. It is an errhine, sialagogue, and astringent. The expressed juice is diuretic, and used as an application to serpiginous and other cutaneous affections. Rubbed on the gums or chewed, it is said to cure toothache. **I., staphylo'ma of,** iridauxesis. **I., stink'ing,** I. fœtidissima. **I., trem'ulous,** see *Hippus.* **I. versic'olor,** blue flag. The rhizome is an active cathartic and diuretic. Iris (Ph. U. S.) is the rhizome and rootlets of this plant. **I. Virgin'ica,** slender blue flag, and **I. ver'na** are said to have virtues like those of I. versicolor. **I. vulga'ris,** I. Germanica.

Irisa'tion. Iridescence.

Irish moss. See *Chondrus.*

Irisitis, i-ris-e'tis. Iritis.

Iritis, i-re'tis. Inflammation of the iris. The chief symptoms are—change in the color of the iris; fibres less movable; teeth-like processes shooting into the pupil; pupil irregularly contracted, with the ordinary signs of inflammation of the eye. If the inflammation does not yield, suppuration takes place, and, although the matter may be absorbed, the iris remains immovable. When the iritis results from syphilis, gonorrhœa, rheumatism, gout, small-pox, or scrofula, it requires specific treatment according to its cause. Mercury is given freely in some forms of iritis, along with attention to other means advisable in ophthalmia. When the inflammation is seated in the serous covering, it is termed iritis serosa. When the iritis is marked by a tendency to new formation, which may become developed into a pseudo-membrane, it is called plastic iritis. **I., plas'tic,** see *Iritis.* **I. se'rous,** aquomembranitis; see *Iritis.*

Irit'omy. Iridotomy.

Iron. Ferrum. **I., ac'etate of,** ferri acetas. **I. and alumin'ium, sul'phate of,** ferri et aluminii sulphas. **I. and ammo'nia** or **ammo'nium, ci'trate of,** ferri ammonio-citras. **I., ammo'niated,** ferrum ammoniatum. **I. and ammo'nium, tar'trate of,** ferri ammonio-tartras. **I., ammo'nio-chlo'ride of,** ferrum ammoniatum. **I., ammo'nio-ci'trate of,** ferri ammonio-citras. **I. and ammo'nium, sul'phate of,** ferri et ammoniæ sulphas. **I., arse'niate of,** arseniate of iron. **I. bark,** Eucalyptus resinifera; see *Kino.* **I., black ox'ide of,** oxydum ferri nigrum. **I., bro'mide of,** ferri bromidum. **I., car'bonate of, efferves'cing,** ferri carbonas effervescens. **I., car'bonate of, precip'itated,** ferri subcarbonas. **I. car'bonate of, sac'charated,** ferri protocarbonas. **I., car'buret of,** graphites. **I., chlo'ride of,** ferri chloridum. **I., ci'trate of,** ferri citras. **I., ci'trate of magnet'ic ox'ide of,** see *Ferri ammonio-citras.* **I. ferrocyan'uret of,** Prussian blue. **I., ferroprus'siate of,** Prussian blue. **I. fil'ings, pur'ified,** ferri limatura purificata. **I., hy'drated ox'ide of,** ferrum oxydatum hydratum. **I., hy'drated perox'ide of,** ferrum oxydatum hydratum. **I., hy'drated tritox'ide of,** ferrum oxydatum hydratum. **I., hydri'odate of,** ferri iodidum. **I., hydrobro'mate of,** ferri bromidum. **I. by hy'drogen,** ferri pulvis. **I., hydro-ox'ide of,** ferrum oxydatum hydratum. **I., hypophos'phite of,** ferri hypophosphis. **I., i'odide** or **io'duret of,** see *Iodine* and *Ferri iodidum.* **I., lac'tate of,** ferri lactas. **I. li'quor,** ferri acetas. **I. lung,** siderosis. **I. and magne'sia, citrate of,** ferri et magnesii citras. **I., magnet'ic ox'ide of,** oxydum ferri nigrum. **I., mu'riate of,** ferri chloridum. **I., ni'trate of, solu'tion of,** see *Tinctura ferri muriatis.* **I., ox'alate of,** ferri oxalas. **I., ox'ide of, sac'charated,** ferri oxidum saccharatum. **I., perchlo'ride of,** ferri chloridum. **I., perox'ide of,** ferri subcarbonas. **I., perox'ide of, moist,** ferrum oxydatum hydratum. **I., persul'phate of,** see *Ferri sulphas.* **I., persul'phate of, solu'tion of,** see *Ferri sulphas.* **I., phos'phate of,** ferri phosphas. **I., pills of, com'pound,** pilulæ ferri compositæ. **I. and potas'sa** or **potas'sium, tar'trate of,** ferrum tartarizatum. **I., potas'sio-ci'trate of,** see *Ferri ammonio-citras.* **I., pow'der of,** ferri pulvis. **I., protocar'bonate of,** ferri protocarbonas. **I., protox'ide of, lac'tate of,** ferri lactas. **I. pyri'tes,** ferri sulphuretum. **I., pyrophos'phate of,** ferri pyrophosphas. **I., Quevenne's,** ferri pulvis. **I. and qui'nia, ci'trate of,** ferri et quiniæ citras. **I. and qui'nia, hydri'odate of,** see *Quinia, iodide of iodhydrate of.* **I., reduced,** ferrum redactum. **I., sesquichlo'ride of,** ferri chloridum. **I. sesquini'trate, solu'tion of,** see *Tinctura ferri muriatis.* **I., sesquiox'ide of,** ferri subcarbonas. **I., sodioci'trate of,** see *Ferri ammonio-citras.* **I., solu'tion of ci'trate of,** liquor ferri citratis. **I. and strych'nia, ci'trate of,** ferri et strychniæ citras. **I., subcar'bonate of,** ferri subcarbonas. **I., subsul'phate of, solu'tion of,** see *Ferri sulphas.* **I., suc'cinate of,** ferri succinas. **I., sul'phate of,** ferri sulphas. **I., sul'phate of, gran'ulated,** ferri sulphas granulata. **I., sul'phuret of,** ferri sulphuretum. **I., tan'nate of,** ferri tannas. **I., tar'tarized,** ferrum tartarizatum. **I., terni'trate of, solu'tion of,** see *Tinctura ferri muriatis.* **I., tritohydroferrocy'anate of,** Prussian blue. **I., vale'rianate of,** ferri valerianas. **I. weed,** Vernonia noveboracensis. **I. wire,** ferri filum. **I. wood,** Carpinus betulus.

Ironcosis, ir-on-ko'sis. Iridoncosis.

I'ros. Fever. Scirrhus of the spleen. Erysipelas.

Irra'diating. Radiating from a central point or focus. Pain is often of this character.

Irradiation, ir-ra-de-a'shun (*ir, radius,* a ray). Shooting or proceeding from a centre, as I. pain. Similar direction in which rays of light pass outward. Similar shape sometimes assumed by fractures.

Irreducible, ir-re-du'se-b'l. Epithet given to fractures, luxations, herniæ, etc. when they cannot be reduced after use of all ordinary methods.

Irreg'ular (*ir, regula,* a rule). Anomalous. Term applied to the type of a disease, and to the pulse when its beats are separated by unequal intervals.

Irreme'diable. Incurable.

Irreptio, ir-rep'she-o (*ir, repo,* to creep). Attack.

Irrespirable, ir-res'pir-a-b'l. That cannot be breathed, as some gases, or that cannot maintain life when breathed.

Irrhythmia, ir-rhith'me-ah (*ir* for *in,* negative, *rhuthmos*). Want of rhythm, or irregularity, as of heart's action.

Irriga'tion (*ir, rigo,* to water). Act of watering or moistening. Methodical application of water to an affected part, to keep it constantly wet or for purposes of cleansing.

Irrigator, ir'ri-ga-tor. Apparatus for practising irrigation, as of wounds or cavities.

Irritabil'itas (*irrito,* to excite). Irritability. **I. Halleria'na,** irritability. **I. morbo'sa,** see *Subsultus tendinum.* **I. vesi'cæ,** see *Irritable bladder.*

Irritabil'ity. Inherent power, contractility, excitability, etc. Power possessed by all living organized bodies of being acted upon by certain stimuli, and of moving responsive to such stimuli. Muscular and nervous irritability are of this kind. Mental condition characterized by petulence, impatience, etc. See *Contractility.* **I., far'adic,** contractions of muscles caused by an induced galvanic current.

Ir'ritable (*irrito,* to excite, *habilis,* capable). Endowed with irritability. Every living organized tissue is irritable; that is, capable of feeling an appropriate stimulus and of moving responsive to such stimulus. Impressible, as applied to persons, habit, or temper. **I. bladder,** condition in which there is constant desire to pass water.

Irritamen, ir-rit-ah'men. Irritant; stimulus.

Irritamen'tum. Erethism; irritant; stimulus. **I. metal'licum,** galvanism.

Ir'ritant. That which causes irritation or pain, heat, and tension; mechanically, as puncture, acupuncture, or scarification; chemically, as the alkalies and acids; or in a specific manner, as cantharides. **I., ner'vous,** irritant acting through the nerves, as by sympathy.

Ir'ritated. See *Irritation* and *Inflamed.*

Ir'ritating poi'son. See *Poison.*

Irritatio, ir-re-tah'she-o. Erethism; irritation.

Irrita'tion. State of a tissue or organ in which there is excess of vital movement, commonly manifested by increase of circulation and sensibility. It is a common precursor of inflammation. Erethism. **I., mor'bid,** constitutional irritation, irritative fever, pseudo-fever; excitement after injuries done to the body or to any part thereof. **I., spi'nal,** rhachialgia, principal symptom of which is pain in the back.

Ir'ritative fe'ver. Irritation, morbid.

Irrorra'tion (*ir, ros,* dew). Irrigation.

Is. Fibre.

Isadelphia, is-ad-el'fe-ah (*isos,* equal, *adelphos,* brother). Double monstrosity in which both bodies are equally and perfectly developed and possessed of independent vital organs, and which are united by parts of little significance.

Isapiol, i-sap'e-ol. $C_{12}H_{14}O_4$. Substance isomeric with apiol, with similar physiological properties.

Is'ca. Boletus igniarius.

Ischæmia, is-ke'me-ah (*ischo, haima,* blood). Morbid retention or suppression of habitual flux of blood, as of hemorrhoidal or menstrual flux or of epistaxis. See *Hæmatostatica.* Local arterial anæmia, in which the blood is prevented from flowing into the parts for which it is destined. Cerebral ischæmia, for example, is produced in the nervous tissue of the brain by obliteration or obstruction of the arteries of the encephalon. **I., cer'ebral,** see *Ischæmia.* **I. of op'tic disks,** I. retinæ. **I. ret'inæ,** anæmic condition of the retina, with sudden and complete blindness of both eyes; ischæmia of the optic disks.

Ischæ'mon or **Ischæmum,** is-ke'mum. Medicine which restrains or stops bleeding; hæmostatic.

Ischas, is'kas (dried fig). See *Ficus.*

Ischesis, is'kes-is (*ischo,* to restrain). Suppression or retention of a discharge or secretion.

Ischiac, is'ke-ak, Ischiatic,

Ischiadelphia, is-ke-ad-el'fe-ah. Condition of an ischiadelphus or ischiopagus.

Ischiadelphus, is-ke-ad-el'fus (*ischion, adelphos,* a brother). Ischiopages.

Ischiadic, is-ke-ad'ik. Ischiatic.

Ischiadicus (is-ke-ad'ik-us) **mor'bus.** Neuralgia femoro-poplitæa. **I. ner'vus,** sciatic nerve.

Ischiadocele, is-ke-ad-o-se'le (Eng. is-ke-ad'o-seel). Ischiocele.

Ischiagra, is-ke'ag-rah (*ischion, agra,* a seizure). Ischiatic gout; femoro-popliteal neuralgia.

Ischial, is'ke-al. Relating to the ischium.

Ischialgia, is-ke-al'je-ah (*ischion, algos,* pain). Ischiagra; femoro-popliteal neuralgia.

Ischias, is'ke-as. Ischiagra. **I. infebrico'sum,** coxalgia. **I. nervo'sa anti'ca,** neuralgia femoro-prætibialis. **I. nervo'sa Cotun'nii,** neuralgia femoro-poplitæa. **I. nervo'sa digita'lis,** neuralgia cubito-digitalis. **I. nervo'sa posti'ca,** neuralgia femoro-poplitæa. **I. rheumat'ica,** neuralgia femoro-poplitæa. **I. à spargano'si,** phlegmatia dolens.

Ischiatic (is-ke-at'ik) or **Ischiad'ic.** Sciatic; relating to the ischium or to parts connected with it. The sciatic notches are formed by this bone; the ischiatic spine belongs to it, and gives attachment to the small sacrosciatic ligament. The tuberosity of the ischium, os sedentarium, tuber ischii, is formed by it, receiving the insertions of different muscles of the thigh, and forming the projection on which the body rests when seated. **I. ar'tery,** sciatic artery. It arises singly from the hypogastric or with the gluteal, and seems to be really a continuation of the trunk of the hypogastric. It issues from the pelvis at the lower part of the great sciatic notch. **I. notches,** notches, greater and lesser, of the ischium. **I. re'gion,** sciatic region; region of the hip. **I. vein,** this presents the same arrangement as the artery.

Ischiati'tis. Inflammation of sciatic nerve.

Ischiatocele, is-ke-at-o-se'le (Eng. is-ke-at'o-seel). Ischiocele.

Ischidrosis, is-kid-ro'sis (*ischo,* to restrain, *hidros,* sweat). Suppression of perspiration.

Ischigalactic, is-ke-gal-ak'tik (*ischo,* to restrain, *gala,* milk). Checking secretion of milk.

Ischioan'al. Relating to ischium and anus.

Ischioblennia, is-ke-o-blen'ne-ah (*ischo,* to restrain, *blenna,* mucus). Suppression of mucous discharge.

Ischiobul'bar. Relating to the ischium and the bulb of the urethra.

Ischiobulbo'sus. Part of superficial transverse perineal muscle from ischium to bulb of urethra.

Ischiocap'sular. Relating to ischium and capsule of hip-joint.

Ischiocaverno'sus. Belonging to the ischium and corpus cavernosum. **I. mus'cle,** small, long, flat muscle surrounding origin of the corpus cavernosum, fixed below to the inner side of the tuberosity of the ischium, and above to the root of the penis, where it is confounded with the fibrous membrane of the corpus cavernosum. It draws the root of the penis downward and backward. The ischiocavernosus of the female is arranged nearly as in the male, but is less bulky. It arises by aponeurosis from the tuberosity of the ischium, and terminates by embracing the corpus cavernosum of the clitoris, contributing to erection of the latter. It is the depressor clitoridis of Meckel. **I. ure'thræ,** bulbo-cavernosus.

Ischiocele, is-ke-o-se'le (Eng. is'ke-o-seel), **Ischiatoce'le,** or **Ischiadoce'le** (*ischion, kele,* tumor). Ischiatic or sciatic hernia, in which the viscera issue by the great sciatic notch; a rare disease.

Ischioclito'rian ar'tery. Division of the internal pudic which furnishes the two arteries of the clitoris, the superficial and deep-seated. **I. nerve,** superior branch of the pudic nerve distributed to the clitoris.

Ischioclitoria'nus. Connected with the ischium and clitoris, as I. muscle. See *Ischiocavernosus* (in the female).

Ischioclitorid'ian. Relating to the ischium and clitoris.

Ischiococcygeus, is-ke-o-kok-se-je'us. Relating to the ischium and coccyx. Muscle passing from sacro-sciatic ligament and crest of ischium to lateral portion of last sacral and two upper coccygeal vertebræ. Part of levator ani arising from obturator fascia.

Ischiodidymus, is-ke-o-did'im-us (*ischium, didumos,* twin). Double monster in which the individual is united at the hip.

Ischiodym'ia (*ischion, duo,* to mingle). See *Somatodymia.*

Ischiofem'oral. Relating to ischium and femur.

Ischiofemora'lis. Adductor magnus of thigh. **I. mag'nus,** ischiotibialis internus. **I. par'vus,** gracilis internus.

Ischiofemoroperoneus, is-ke-o-fem-or-o-per-o-ne'us (*ischion, femur, perone,* fibula). Biceps flexor cruris.

Ischion, isk'e-on. Ischium.

Ischioneural'gia. Neuralgia femoro-poplitæa. Sciatica.

Ischiopa'ges (*ischion, pago,* to fasten). Monstrous union of two fœtuses attached to each other by the ischia. The monster is called *Ischiopagus.* See *Hypogastrodidymus.* **I. tet'rapus,** monster with four legs. **I. tri'pus,** monster with three legs.

Ischioperine'al. Relating to ischium and perineum. Transversus perinæi.

Ischiophthisis, is-ke-o-te'sis. Phthisis or wasting suppuration of the hip-joint. See *Coxarum morbus.*

Ischiopoplitifemoral'is. Semimembranosus.

Ischiopoplititibial'is. Semimembranosus.

Ischiopretibial'is. Semitendinosus.

Ischioprostat'ic. Name given to fibres of transversus perinæi muscle which go to the prostate.

Ischiopu'bic. Relating to ischium and pubes.

Ischiopu'bicus infe'rior. Muscle arising from falciform ligament and inserted into symphysis pubis. **I. supe'rior,** muscular fibres occasionally found in tendinous arch of pelvic fascia.

Ischiopubiprostat'icus. Transversus perinæi.

Ischiorec'tal. Relating to ischium and rectum, as I. abscess, I. fascia, etc. **I. fos'sa,** perineal fossa.

Ischiosa'cral. Relating to ischium and sacrum.

Ischioscambo'sis (*ischion, skambosis,* bending). Bending or curvature of the ischium.

Ischio'sis. Femoro-polipitæal neuralgia.

Ischiosubclitorid'ian. Ischioclitorianus.

Ischiotib'ial. Relating to ischium and tibia.

Ischiotibial'is. Ischiotibial. Muscles in some of the lower animals, analogues of human biceps flexor cruris and part of glutæus maximus muscles, and semimembranosus and semitendinosus muscles.

Ischiotrochanterianus (is-ke-o-tro-kan-ter-e-an'us) or **Ischiotrochante'rius.** Two small fleshy bundles, long and flat, which arise, the superior on the outside of the sciatic spine, the inferior behind the tuberosity of the ischium. Both are attached to the tendon of the obturator internus, which they accompany into the fossa of the trochanter. They rotate the lower limb outward; they can also turn the pelvis on the femur in standing on one foot.

Is'chio-urethral'is. Transversus perinæi.

Ischium (is'ke-um) or **Is'chion** (*ischuo,* to support, or *ischo,* to arrest, to retain, because that bone serves as a base or support for the trunk when one is seated; see *Ischiatic*). Hucklebone, seatbone. Lowermost of the three portions composing the os innominatum of the fœtus and young individual. The inferior region of the same bone is called ischium in the adult, although the ancients designated by the word ischion the capsular ligament of the coxofemoral, as well as the articulation itself. Haunch.

Ischnogyria, isk-no-jir'e-ah (*ischnos,* weak, *guros,* circle). Imperfectly developed convolutions of the brain.

Ischnophony, isk-nof'o-ne (*ischnos,* weak, *phone,* voice). Slenderness or weakness of voice; stuttering.

Ischnotes, isk-no'tees. Emaciation; consumption.

Ischno'tia or **Isch'notis.** Emaciation; consumption.

Isch'nous (*ischnos,* thin). Very thin; consumptive; emaciated.

Is'cho (*ischo,* to restrain). In composition, arrest, retention.

Ischoblen'nia (*ischo, blenna*, mucus). Suppression of a mucous discharge.

Ischocenosis, isk-o-sen-o'sis (*ischo, kenosis*, evacuation). Retention or suppression of an evacuation.

Ischocholia, isk-o-kol'e-ah (*ischo, chole*, bile). Retention or suppression of the biliary secretion.

Ischocœ'lia or **Ischocoil'ia** (*ischo, koilia*, bowels). Constipation.

Ischocop'ria (*ischo, kopros*, excrement). Constipation.

Ischogalactia, isk-o-gal-ak'te-ah (*ischo, gala*, milk). Want of milk in the mammæ. Suppression of lacteal secretion.

Ischolochia, isk-o-lok-e'ah (*ischo, locheia*, lochial discharge). Suppression of the lochial discharge.

Ischomenia, isk-o-men'e-ah (*ischo, menes*, menses). Amenorrhœa.

Ischophonia, isk-o-fo'ne-ah (*ischo, phone*, voice). Impediment in speech; stammering. See *Balbuties*.

Ischosper'mia (*ischo, sperma*, sperm). Retention or suppression of the spermatic secretion.

Ischuretic, isk-u-ret'ik (*ischo, ouron*, urine). Relating to ischuria. Medicine that causes suppression of urine; also applied to medicine that relieves that condition. Diuretic.

Ischuria, isk-u're-ah. Stoppage of urine. Retention of, or impossibility of discharging, the urine. Suppression of the secretion. *Renal ischuria, Ischuria renalis, Anuria, Anuresis, Nephranuria.* Ischuria vera is that in which, the urine having accumulated in the bladder, the patient is unable to pass it, notwithstanding the constant distressing inclination. In false ischuria, paruria inops, p. retentionis renalis, ischuria notha or spuria, owing to disease of the kidney or ureters the urine cannot reach the bladder. Ischuria has received other names, according to the seat and character of the obstacle opposing the exit of the urine, as renal, ureteric, vesical, urethral, and calculous ischuria. Vesical ischuria is generally used synonymously with retention of urine. **I. aton'ica**, ischury due to atony or paralysis of the bladder. **I. cystit'ica**, I. from inflammation of the bladder. **I. cystolith'ica**, I. caused by stone in the bladder. **I. cystophlegmat'ica**, cystirrhœa. **I. cystopleg'ica**, I. from paralysis of the bladder. **I. cystospast'ica**, I. caused by spasm of the bladder. **I. dysu'ria**, dysuria. **I. gravida'rum**, I. of pregnancy and parturition. **I. nephrit'ica, nephrolith'ica, nephropleg'ia**, suppression of urine from causes originating in the kidney, as from inflammation, calculus, or paralysis. **I. neurot'ica**, I. as a result of hysteria, chorea, or epilepsy. **I. perinæa'lis**, obstruction to passage of urine through the urethra in the perineal region. **I. phimo'sica**, see *Phimosicus*. **I. rena'lis**, suppression of urine from causes existing in the kidney; see *I. nephritica*. **I. spasmod'ica**, I. due to spasm of bladder. **I. spu'ria**, see *Ischuria*. **I., true**, I. vera. **I. ureter'ica, ureterit'ica, urethrolith'ica, ureteropy'ica**, suppression of urine from causes in the ureters, as inflammation, calculus, pus, etc. **I. urethral'is**, ischuria from causes in the urethra, as inflammation, phymosis, calculus, or other concretions, etc. **I. urethral'is a phimosi**, see *Phimosicus*. **I. ve'ra or vesica'lis**, suppression of urine from causes seated in the bladder; retention of urine. See *Ischuria*.

Ischu'ric. Ischuretic.

Ischury, isk'u-re. Ischuria.

Ischys, is'kis. Strength.

Isertia (is-er'she-ah) **coccin'ea.** Tree of S. America, leaves of which are applied to tumors. Bark is febrifuge, and also employed in hepatic diseases.

I'singlass (G. *hausen*, a sturgeon, and *blase*, bladder). Ichthyocolla. **I., Bengal'**, agar-agar. **I., Jap'anese**, substance obtained from seaweed in China; used in the formation of jellies under the name seaweed jelly. **I. plas'ter**, emplastrum ichthyocollæ; see *Sparadrapum adhæsivum*.

I'sis nob'ilis. See *Coral*.

Island of Reil. Insula cerebri.

Isnar'dia (after D'Isnard, French botanist) **alternifo'lia.** Ludwigia alternifolia. **I. palus'tris**, Ludwigia palustris.

I'so (*isos*, equal). In composition, equal.

Iso-amylamine, i-so-am-il'am-een. $C_5H_{13}N$. Ptomaïne from putrefaction of yeast in cod-liver oil; alkaline liquid, strong neurotic poison.

Isoam'ylene. Pental.

Isoapiol, i-zo-ap'e-ol. Substance obtained from apiol, affecting the vaso-motor apparatus.

Isobutylphe'nol i'odide. Cresol iodide.

Isochromatic, i-zo-kro-mat'ik (*iso, chroma*, color). Having the same color.

Isochronous, is-ok'ron-us (*iso, chronos*, time). That which takes place in the same time or in equal times, as pulsation of arteries in various parts of the body.

Isoco'ria (*iso, kore*, pupil). Equality in diameter of the two pupils.

Isodromus, is-od'ro-mus (*iso, dromos*, course). Isochronous.

Isodynamic, i-so-di-nam'ik (*iso, dunamis*, power). Equal in power or force.

Isola'tion. Insulation.

I'solator. Insulator.

Isoline, i'so-leen. $C_{14}H_{17}N$. Substance found in quinoline.

Isologous, i-sol'og-us. Identical in composition.

Isolusin, i-so-lu'sin (*iso, luo*, to wash). Bitter substance in Polygala Virginiana. See *Polygala senega*.

Isomeric, i-som'er-ik (*iso, meros*, part). Agreeing in composition, but differing in properties; the condition being termed *Isom'erism;* applied to the replacing of one element in a crystalline salt by another, the form remaining unaltered.

Isometropia, i-so-met-ro'pe-ah (*isos*, equal, *metron*, measure, *ops*, eye). Equal refraction of both eyes.

Isomorphous, i-so-mor'fus. Having the same or similar crystalline form, *Isomor'phism.*

Isonan'dra gut'ta. See *Gutta-percha*.

Isonaphthol, i-so-naf'thol. Naphthol.

Isonitrosoantipyrine, i-so-ni-tro-so-an-te-pi'reen. Green compound produced by action of acid nitrites on antipyrine.

Isopathotherapy, i-so-path-o-ther'ap-e (*isos*, equal, *pathos*, disease, *therapeuo*, to cure). Isopathy.

Isopathy, i-sop'ath-e (*iso, pathos*, disease). Cure of disease by the disease itself or its products, under the hypothesis that every contagious disease contains in its contagious matter the means for its cure; thus, that variola may be cured by homœopathic doses of variolous matter; syphilis, by venereal matter, etc. The term parallelism of diseases has been used for the disposition of diseases to anastomose with each other or to wear each other's livery.

Isopep'sin. Parapeptone.

Isophloroglu'cin. Saccharine substance produced in manufacture of acetic acid from Prunus cerasus.

Isopho'ria (*isos*, equal, *phoreo*, to carry). Equal tension of the vertical muscles of each eye.

Isopropyl'amine. See *Propylamine*.

Isop'ters (*iso, opter*, observer). Relative sharpness of vision of retina at various distances from macula.

Isop'yrine. Bitter alkaloid obtained from root of *Isopyrum thalictroïdes*, plant of Southern Europe.

Isoscope, i'so-skope (*isos*, equal, *skopeo*, to see). Instrument for examining the position of vertical and horizontal lines in the movements of the eyes.

Isoterebin'thine. $C_{10}H_{16}$. Hydrocarbon found in oil of turpentine from Pinus maritima.

Isothermal, i-so-thur'mal (*isos*, equal, *therme*, heat). Of equal degrees of heat.

Isotoma (is-ot'o-mah) (*isos*, equal, *tome*, incision) **longiflo'ra.** W. Indian lobeliaceous plant; cathartic; in large doses irritant toxical purgative.

Isotonic, i-so-ton'ik (*isos*, equal, *tonos*, tone or tension). Having equal tone or tension, as a muscle thus unaffected by stimulation.

Isotropic, i-so-trop'ik (*isos*, equal, *trope*, turning). Having equal powers, as of refraction, muscular contractility, etc.; the condition is called *Isotropy*.

Isotropy, i-sot'ro-pe. See *Isotropic*. **I. of the o'vum**, combination of nuclei of the two sexual elements in fecundation.

Is'sue (*ex, eo*, to go out). Result, as of a disease;

fonticulus. **I. peas,** Aurantia curassaventia; see *Fonticulus.*

Isth'mion. Isthmus; pharynx.

Isthmitis, isth-mi'tis. Inflammation of isthmus of the fauces. See *Cynanche pharyngea* and *Angina.*

Isthmium, isth'me-um. Isthmus.

Isthmocatar'rhus. Catarrh of the fauces.

Isthmodynia, isth-mo-din'e-ah (*isthmus, odune,* pain). Pain in the fauces.

Isthmopathi'a. Disease of isthmus of fauces.

Isthmoplegia, isth-mo-plej'e-ah (*isthmus, plege,* a stroke). Paralysis of the fauces.

Isthmopol'ypus. Polypus of the fauces.

Isthmopyra, isth-mop'ir-ah (*isthmos,* neck, *pur,* fire). Inflammation of the fauces.

Isthmorrhagia, isth-mor-rhaj'e-ah (*isthmos, rhegnumi,* to break forth). Hemorrhage from the fauces.

Isth'mos. Isthmus; pharynx.

Isth'mospasm. Spasm of isthmus of the fauces.

Isthmoty'phus. Gangrenous angina; cynanche maligna.

Isth'mus, Isth'mion, or **Isth'mium.** Tongue of land joining a peninsula to a continent or separating two seas; a narrow pass. **I. of the brain,** I., encephalic. **I., cer'ebral,** I., encephalic. **I., encephal'ic** or **of the enceph'alon,** narrowed and constricted portion of the encephalic mass, between the cerebrum, the cerebellum, and the medulla oblongata, corresponding to the free margin of the tentorium cerebelli, and comprising the pons Varolii and middle peduncles of the cerebellum, the peduncles of the cerebrum, the tubercula quadrigemina, the superior peduncles of the cerebellum, and the valve of Vieussens. **I. of Eustach'ian tube,** I. tubæ Eustachii. **I. of Fallo'pian tube,** narrow part of that canal. **I. of the fau'ces,** strait separating the mouth from the pharynx; formed above by the velum palati and uvula; at the sides by the pillars of the fauces and the tonsils; and below by the base of the tongue. The fauces. **I. of fossa ova'lis,** prominent arch formed above the fossa ovalis by the union of the two pillars which bound the cavity; annulus ovalis. **I. of Guyon,** I. of the uterus. **I., gy'ral,** junction of precentral and procentral gyri in the brain. **I. gy'ri fornica'ti,** slight contraction at back part of gyrus fornicatus. **I. he'patis,** pons hepatis; see *Lobulus anonymus.* **I. of Müller,** internal os uteri. **I. of o'viduct,** I. of Fallopian tube. **I. pharyn'go-nasa'lis,** posterior isthmus of fauces. **I. pharyn'go-ova'lis,** anterior isthmus of fauces. **I. pros'tatæ,** middle lobe of prostate; see *Prostate.* **I. of thy'roid gland,** narrow band uniting the two chief lobules of the thyroid gland. **I. tu'bæ Eustach'ii,** narrow portion of cartilaginous portion of that canal. **I. tu'bæ Fallo'pii,** I. of Fallopian tube. **I. ure'thræ,** membranous part of male urethra; more constricted part of female urethra; see *Urethra.* **I. u'teri,** see *Uterus.* **I. Vieussen'ii,** isthmus of the fossa ovalis; see *Ovalis fossa.*

Ital'ian juice. Extractum glycyrrhizæ.

Ital'icus mor'bus (Italian disease). Syphilis.

Itch. Psora. **I. animal'cule,** see *Psora.* **I. of an'imals,** scabies ferina. **I., ar'my,** disease described by some as distinct from ordinary scabies, seeming to be engendered by the filth of camp-life, but supposed by others to be prurigo mixed with eczema and lichen. **I., ba'ker's,** see *Psoriasis.* **I., bar'ber's,** sycosis. **I., Bed'ouin,** lichen tropicus, with vesiculation. **I., brick'layer's,** eczema impetiginodes. **I., cow'-pox,** cutaneous eruption appearing after the fourteenth day from vaccination, and consisting of isolated vesicles, often filled with a puriform fluid. **I., drunk'ard's,** psora ebriorum. **I., frost,** pruritus hiemalis. **I., gro'cer's,** see *Psoriasis.* **I., in'sect,** see *Psora.* **I., lum'berman's,** I., prairie. **I., mi'te,** see *Psora.* **I., Norwe'gian,** see *Radzyge.* **I., prai'rie,** pruritus hiemalis occurring in those engaged in agricultural pursuits and others wearing coarse dyed clothes. **I., su'garba'ker's,** eczema in persons so occupied. **I., swamp,** I., prairie. **I., vene'real,** scherlievo. **I., wash'erwoman's,** eczema lotricum; see *Psoriasis.* **I., wa'tery,** scabies lymphatica. **I. weed,** Veratrum viride.

Itch'ing. Sensation, more inconvenient than painful, seated especially at the surface of the body, and provoking the patient to scratch the part. It may be either an external or an internal sensation; that is, produced by an external body or by some modification in the organic actions of the itching part.

Iter (e'tur) (a way or passage) **chor'dæ ante'rius.** Canal of Huguier; canal in external wall of cavity of tympanum for exit of chorda tympani. **I. chor'dæ poste'rius,** canal in external wall of cavity of tympanum for entrance of chorda tympani. **I. den'tis,** see *Gubernaculum dentis.* **I. femin'eum,** perineum. **I. ad infundib'ulum,** opening in floor of third ventricle leading to the infundibulum; vulva. **I. a pala'to ad au'rem,** Eustachian tube. **I. ad quar'tum ventric'ulum,** aquæductus Sylvii. **I. a ter'tio ad quar'tum ventric'ulum,** aquæductus Sylvii. **I. ad ter'tium ventric'ulum,** vulva. **I. uri'næ** or **urina'rium,** urethra.

Ithagenes, ith-aj'en-ees (*ithus,* straight, *genos,* race). Indigenous.

Ithycyphus, ith-e-sif'us (*ithus,* straight, *kuphos,* humpbacked). Having posterior angular curvature of spine.

Ithylordus, ith-il-or'dus (*ithus,* straight, *lordos,* bent forward). Having anterior angular curvature of spine.

Ithyphallus, ith-e-fal'lus (*ithus,* straight, *phallos,* penis). Amulet in the form of an erect penis, anciently worn around the neck as an alexiteric.

Ithyscolios, ith-e-skol'e-os (*ithus,* straight, *skolios,* crooked). Having antero-posterior curvature of spine.

Itinera'rium (*iter,* a way). Conductor; director.

Itis, e'tis. Suffix denoting inflammation; as encephalitis, inflammation of the encephalon; pleuritis, inflammation of the pleura.

I'va. Teucrium iva. **I. arthrit'ica** or **commu'ne,** Ajuga chamæpitys, Teucrium chamæpitys. **I. frutes'cens,** shrub of Mexico; febrifuge. **I. moscha'ta Monspelien'sium,** Ajuga iva; Teucrium iva. **I. pecan'ga,** Smilax sarsaparilla.

I'vain. Bitter substance from Achillea moschata.

I'vory. Tusk of the elephant; chiefly composed of phosphate of lime, and used for the fabrication of pessaries, artificial teeth, handles of instruments, etc. Formerly, when calcined to whiteness, it entered into some pharmaceutical preparations, was regarded as astringent and anthelmintic, and was called *spodium.* Dentine is the ivory of the human tooth. See *Tooth.* **I., black,** see *Carbo animalis.* **I., veg'etable,** Phytelephas macrocarpa; Sagus amicarum.

I'vy. Hedera helix, Kalmia angustifolia. **I., Amer'ican,** Ampelopsis quinquefolia. **I., Amer'ican poi'son,** Rhus toxicodendron. **I., bar'ren,** Hedera helix. **I., big,** Kalmia latifolia, Hedera helix. **I., black,** Hedera helix. **I., climb'ing,** Rhus radicans. **I., com'mon,** Hedera helix. **I., creep'ing** or **Eng'lish,** Hedera helix. **I., five-leaved,** Ampelopsis quinquefolia. **I., gout,** Ajuga chamæpitys. **I., ground,** Glecoma hederacea; Hedera helix; Convolvulus sepium; Ajuga chamæpitys; Vinca minor. **I. gum,** gum from Hedera helix; stimulant and emmenagogue. **I., poi'son,** Rhus toxicodendron.

Ix'ia. Varix; Viscum album.

Ixi'ne (*ixos,* bird-lime). Atractylus gummifera; Carlina acaulis.

Ixo'des ric'inus (*ixodes,* tenacious, parasitic). Tick, woodtick. Animal parasite, immersing its proboscis in the skin, and often exciting great irritation there.

Ixo'ra bandac'ca or **bandhu'ca.** Rubiaceous plant of E. Indies; root is employed in malarial fevers, diarrhœa, and dysentery, and externally in cutaneous affections. **I. coccin'ea,** of Eastern and Southern Asia, has similar therapeutic action. **I. lanceola'ta,** root is used for toothache.

Ix'us. Viscum album.

Ix'ya, Ix'ye, or **Ix'ys.** The ilia, flanks, and loins; most frequently the last.

Ixyomyeli'tis (*ixya, muelos,* marrow). Inflammation of the spinal marrow in the lumbar region.

J.

Jaboran'di. Leaves of several species of pilocarpus, and of other plants with similar therapeutic properties, have this name. See *Pilocarpus.*

Jaboran'dine. Pilocarpine.

Jaboric (jab-or'ik) **ac'id.** Substance obtained from pilocarpidine by precipitation with excess of nitrate of silver.

Jaboridine, jab-or'id-een. Amorphous substance derived from oxidation of pilocarpidine.

Jaborine, jab'or-een. Alkaloid, $C_{11}H_{16}N_2O_5$, resembling atropia, produced by exposing concentrated acid solution of pilocarpine to heat.

Ja'ca In'dica. Thymus mastichina.

Jacaran'da (Brazilian name) **caroba.** Caroba. **J. Brazil'ia'na,** caroba. **J. lancifol'ia'ta,** leaves of this Colombian species are used in gonorrhœa, syphilis, and purulent cystitis. **J. proc'era,** caroba.

Jace'a ramosis'sima. Centaurea calcitrapa. **J. tri'color,** Viola tricolor.

Jacens, jas'ens (*jaceo,* to lie). Sick.

Jack of the but'tery. Sedum acre. **J. in the hedge,** alliaria. **J. weed,** Ranunculus arvensis.

Jack'et, bark. Quilted jacket containing cinchona, worn by those affected with malarial disease. See *Bark.* **J., plas'ter,** plaster-of-Paris jacket employed as a support in spinal disease.

Jackso'nian (after J. Hughlings Jackson). Term applied to a form of epilepsy. See *Epilepsy.*

Jack'son's pec'toral sy'rup. Prescription of Prof. Samuel Jackson of Philadelphia, at one time extensively prescribed, the ingredients of which were sassafras pith, gum arabic, sugar, muriate of morphia, and water.

Jacobœa, jak-o-be'a. Senecio Jacobæa.

Ja'cob's char'iot (after Dr. Jacob of Dublin). Aconitum napellus. **J.'s coat,** tunica Jacobi. **J.'s lad'der, false,** Polemonium reptans. **J.'s mem'brane,** tunica Jacobi. **J.'s staff,** Verbascum thapsus. **J.'s sword,** Iris pseudacorus. **J.'s ul'cer,** lupus; chancroid.

Ja'cobson, nerve of. See *Petrosal ganglion.* **J., ve'nous sys'tem of** (after Prof. Jacobson of Copenhagen), see *Venous system.*

Ja'cobson's anastomo'sis. See *Petrosal ganglion.*

Jacquin'ia (from Jacquin, French botanist) **armil'la'ris.** Bracelet-wood, W. Indian currant; used in dental caries and as a sudorific.

Jacta'tion or **Jactitation,** jak-te-ta'shun (*jacto,* to toss about). Extreme anxiety or excessive restlessness, a symptom in serious diseases.

Jactator, jak-tah'tor (*jacto,* to throw). Vas deferens.

Jactita'tio, Inquietude; jactation.

Jactura (jak-tu'rah) (*jacto,* to throw) **substan'tiæ.** Discoloration of surface from external injury.

Jag'gery. Spirit (arrack). See *Toddy.*

Jal'ap (*Chalapa* or *Xalapa,* its native place). Exogonium purga; Convolvulus jalapa; Phytolacca decandra. **J., black,** true jalap, Ipomœa purga. **J., Brazil'ian,** root of Ipomœa operculata. **J. can'cer root,** Phytolacca decandra. **J., com'pound pow'der of,** pulvis jalapæ compositus. **J., com'pound tinc'ture of,** tincture jalapæ composita. **J., East In'dian,** Ipomœa turpethum. **J., ex'tract of,** extractum jalapæ. **J., fu'siform, light male,** see *Convolvulus jalapa.* **J., In'dian,** Ipomœa turpethum. **J., male,** Orizaba root; root of Ipomœa turpethum. **J., res'in of,** resina jalapæ. **J., Tampi'co,** root of Ipomœa simulans, purga de Sierra Gorda of Mexico. **J., tincture of,** tinctura jalapæ. **J., true,** Ipomœa purga. **J., Vera Cruz,** Ipomœa purga. **J., white,** root of Convolvulus mechoacanha. **J., wild,** Convolvulus panduratus.

Jala'pa. Convolvulus jalapa. **J. al'ba,** Convolvulus mechoacanha. **J. officina'rum,** officinal jalap.

Jalap'ic acid. $C_{62}H_{106}O_{35}$. Result of action of baryta on jalapin.

Jal'apin, $C_{34}H_{56}O_{16}$. Resinous glucoside derived from root of Ipomœa Orizabensis, homologous with convolvulin; drastic cathartic. See *Convolvulus jalapa.*

Jalap'inol. $C_{13}H_{24}O_3$. Crystalline substance resulting from decomposition of jalapin.

Jala'pium. Jalapin. See *Convolvulus jalapa.*

Jalap'pa. Convolvulus jalapa. **J. al'ba,** Convolvulus mechoacan.

Jalo'pa. Convolvulus jalapa.

Jamaic'a. See *West Indies.* **J. bark tree,** Bursera gummifera.

Jamaicine, jam-a'seen. See *Geoffræa inermis.*

Jambo'sa. Genus of Myrtaceæ, several species of which are edible. **J. vulga'ris,** rose-apple, is astringent in its leaves and bark, fruit is febrifuge, and seeds are used for diarrhœa and dysentery.

Jambo'sin. Crystalline principle derived from jambosa.

Jam'bul. Remedy of recent introduction in treatment of diabetes.

James's analep'tic pills. See *Analeptica.* **J.'s pow'der,** see *Antimonial powder.*

James'town weed. Datura stramonium.

Janiceps, jan'is-eps (*Janus,* divinity with two faces, *caput,* head). Double monster, the two bodies intimately united above a common umbilicus, and a double head, with the faces looking in opposite directions.

Janipha (jan'if-ah) **man'ihot.** Jatropha manihot.

Jan'itor (*janua,* door). Pylorus.

Janito'res marsu'pii. Marsupial bones.

Janitrix, jan'e-trik (*janua,* door). Porta vena.

Janus (two-headed god). Dicephalus. See *Janiceps.*

Japaconine, jap-ak'on-een. $C_{26}H_{41}N_2O_2$. Alkaloid very similar to aconine.

Jasmine, jas'meen. Jasminum.

Jasminum (jas'min-um) **angustifo'lium.** Narrow-leaved jasmine; bitter root is used in herpetic and other eruptions. **J. Arab'icum,** Coffea Arabum. **J. floribun'dum,** Abyssinian plant, leaves of which are anthelmintic. **J. nervo'sum,** species in Cochin China, parts of which are used as depurants. **J. officina'le,** jessamine, jasmine, ord. Jasmineæ. Plant is indigenous to India. The flowers have a fragrant smell and bitter taste. They afford by distillation an essential oil—oil of jasmine—much esteemed in Italy for rubbing paralytic limbs and the cure of rheumatic pains. **J. pubig'erum,** leaves of this plant of China and India are used in ophthalmia. **J., revolu'tion,** root of this E. Indian species is used in ringworm. **J., sam'bac,** an Arabian jasmine employed in eye affections and as a galactagogue.

Jas'per. Jaspis.

Jaspis, jas'pis. Precious stone formerly supposed capable of arresting hemorrhage, and curing stone when worn as an amulet. Internally used as a stomachic and cardiac excitant and in epilepsy.

Jataman'si. Sumbul.

Jateorrhiza (jat-e-or-rhe'zah) **palma'ta** and **J. calum'ba.** Plants native of Mozambique, considered by some as the source of calumba.

Jatropha curcas, jat'ro-fa kur'kas (*iaomai,* to heal, *trepho,* to nourish). Nat. order Euphorbiaceæ. Seeds of this plant (Pinhones Indicis, purging, physic, or Barbadoes nut) afford an oil—oleum infernale, O. ricini majoris—given like castor oil, to which it is nearly allied. The oil is used externally in chronic rheumatism and skin diseases. Leaves are rubefacient, juice is hæmostatic. They contain a peculiar acid, jatrophic or igasuric. The seeds of **Jat'ropha multif'ida** are called purging-nuts, and give out a similar oil. **J. elas'tica,** see *Caoutchouc.* **J. glandulif'era** or **glauc'a,** Bombay plant, juice of which is

used in opacity of cornea, and oil of seeds externally in chronic rheumatism. **J. gossypifo'lia**, bellyache bush of S. America and W. Indies, oil and seeds of which are purgative. **J. man'ihot**, bitter cassava; plant affording cassada or cassava root, ricinus minor, manioc, mandioc, mandioca, magnoc, maniot, yucca, maniibar, aipi, Aipima coxera, apipoca, janipha. The juice of the root is extremely acrid and poisonous; after being fermented it becomes harmless, and is used for the intoxicating liquor tucupi. What remains after expressing is made into cakes or meal, farinha, of which the cassada or cassava bread is formed; the latter constitutes a principal food of the inhabitants of the parts where it grows. Fecula of the root forms tapioca, cipipa, fæcula tapioca, amylum manihoticum, very nutritious, and prepared in the same manner as sago. A factitious tapioca is met with, of small, smooth, spherical grains, supposed to be prepared from potato starch, and sold under the name of pearl tapioca. **J. multif'ida**, coral plant, tyleberry, of Brazil and W. Indies, resembles J. curcas; oil of the seeds is purgative. **J. oil**, oil of seeds of J. curcas, resembling croton oil. **J. opiif'era**, Brazilian species, emeto-cathartic. **J. pur'gans**, J. curcas. **J. tril'oba**, Aleurites triloba. **J. umbella'ta**, species from Surinam, tonic and emollient.

Jaundice, jan'dis (*jaune*, yellow). Icterus. **J. ber'ry** or **tree**, Berberis vulgaris. **J., black**, melæna. **J., blue**, cyanopathy. **J., car'diac**, J. from congestion of veins of liver, from valvular insufficiency of the heart. **J., catar'rhal**, see *Icterus*. **J., conta'gious**, yellow fever. **J., epidem'ic**, epidemic acute yellow atrophy of liver. **J., false**, J. resulting from decomposition of blood and release of its coloring matter. **J., fa'tal**, hepatitis, diffused. **J., feb'rile**, Weil's disease. **J., green**, icterus viridis. **J., hæmatog'enous**, J., false. **J., hepatog'enous** or **hepatogen'ic**, J. from obstruction to the bile in its natural channels, bile being absorbed into the blood. **J., intermit'tent**, J. of malarial origin. **J., lead**, icterus saturninus. **J. of new'-born**, icterus neonatorum. **J., mala'rial**, J., intermittent. **J., malig'nant**, icterus gravis. **J., men'strual**, icterus menstrualis. **J., obstruc'tive**, J. caused by obstruction of biliary or hepatic canals. **J., paradox'ical**, Addison's disease. **J., red**, redness of the skin, without fever. **J., reten'tive**, J., obstructive. **J., sat'urnine**, J., lead. **J., sim'ple**, catarrhal icterus. **J., spring**, icterus vernalis. **J., white**, chlorosis.

Jaundiced, jan'dis'd. Affected with jaundice.

Jav'a tea. Leaves from Orthosyphon staminæus; diuretic.

Javanine, jav'an-een. Alkaloid derived from calisaya bark of Java.

Jaw. Maxillary bone. **J., big**, actinomycosis. **J., lock** or **locked**, trismus. **J., lump'y**, J., big. **J., Wolf's**, deformative variety of hare-lip.

Jaw disease, phos'phorus, fos'for-us. See *Phosphorus*. **J. necro'sis**, see *Phosphorus*. **J. necro'sis, exanthem'atous**, form of necrosis similar to that induced by phosphorus, consequent on eruptive fevers.

Jaw'bone. Maxillary bone.

Jaw'-jerk. Motion produced by tapping the jaw while the mouth is open.

Jecinus, jek'in-us. Liver.

Jecoral, jek'or-al. Hepatic.

Jecoraria, jek-or-ar'e-ah. Marchantia polymorpha.

Jecorarius, jek-or-ar'e-us. Bilious, as a diarrhœa or flux; hepatic.

Jecorin, jek'or-in (*jecur*, liver). Substance obtained from liver of the horse.

Jecoris vomica, jek'or-is vom'ik-ah. See *Hepatitis*. **J. v. larda'ceum**, see *Liver*.

Jecorose, jek'or-oze. Hepatic.

Jectigatio, jek-te-gah'she-o (*jactura*, throwing). Species of epilepsy or convulsion. Spasm of heart or other part of the body.

Jecur, jek'ur. Liver. **J. uteri'num**, placenta.

Jeffersonia Bartoni (jef-fer-so'ne-ah bar-to'ne) or **diphyl'la** (after President Jefferson). *Common twinleaf, Yellow root, Rheumatism root, Helmet pod, Ground-squirrel pea.* Indigenous plant, nat. ord. Berberideæ; emetic, tonic, expectorant, antisyphilitic, and antirheumatic.

Jejunal, je-ju'nal. Relating or appertaining to the jejunum.

Jejunectomy, jej-u-nek'to-me (*jejunum*, *ektome*, excision). Excision of portion of jejunum.

Jejuniosus, je-ju-ne-o'sus. Jejunal; fasting.

Jejunitas, je-ju'nit-as (*jejunus*, empty). Hunger, fasting.

Jejunitis, jej-u-ne'tis. Inflammation of the jejunum.

Jejunium, je-ju'ne-um. Hunger, fasting.

Jejuno-ileostomy, je-ju'no-il-e-os'to-me (*jejunum*, *ileum*, *stoma*, mouth). Establishment of an artificial aperture between the jejunum and ileum.

Jejuno-ileum, je-ju'no-il'e-um. Portion of small intestine between duodenum and ascending colon. See *Intestine*.

Jejunostomy, je-ju-nos'to-me (*jejunum*, *stoma*, mouth). Establishment of an aperture of communication in the jejunum, for admission of food in cancer of the pylorus, etc.

Jejunum, je-ju'num (*jejunus*, empty). Part of the small intestine comprised between the duodenum and ileum; so called because almost always found empty in the dead body.

Jel'ly. Substance of soft consistence, tremulous and transparent, obtained by appropriate treatment from animal or vegetable matters. **J. of the cord**, gelatin of Wharton. **J., rice**, see *Oryza*. **J., sea'weed**, see *Isinglass*. **J., wa'ter**, Brasenia hydropeltis; Hydropeltis purpurea. **J., Wharto'nian** or **Whar'ton's**, gelatin of Wharton.

Jenkinsonia antidysenterica, jen-kin-so'ne-ah ante-dis-en-ter'e-kah (after Jenkinson, English botanist). Pelargonium antidysentericum.

Jennerian, jen-ne're-an. Relating to Jenner, discoverer of vaccination, or to vaccination.

Jequiritin, jek-ir'it-in. Principle derived from sprouting jequirity seeds, giving them their characteristic properties. An infusion is used by oculists in ophthalmia.

Jequirity, jek-ir'it-e. Abrus precatorius.

Jer'gon. See *Arrow-poison*.

Jerk. Sudden and spasmodic muscular action; as *jaw-jerk* of muscles of mastication; *knee-jerk*, generally mentioned as "patellar tendon reflex" of quadriceps femoris muscle, and diminished or absent in certain diseases of the spinal cord. See *Reflex*.

Jerking respiration, jurk'ing res-pir-a'shun. See *Respiration*.

Jerks. Epidemic chorea. See *Mania, dancing*.

Jeroffieris. Dianthus caryophyllus.

Jeru'salem oak of Amer'ica. Chenopodium anthelminticum.

Jervic (jur'vik) **acid.** $C_{14}H_{10}O_{12}$. Crystalline substance derived from white hellebore root.

Jervine, jur'veen. $C_{27}H_{47}N_2O_3$. White alkaloid derived from different species of veratrum.

Jeseminum, jes-em-e'num. Jasminum officinale.

Jes'samine. Jasminum officinale. **J., yel'low**, Gelseminum nitidum or sempervirens.

Jes'uits' bark. Cinchona.

Jeticucu. Name given in Brazil to various forms of ipomæa.

Jew'bush. Pedilanthus tithymaloïdes.

Jew'el weed. Impatiens balsamina; I. fulva.

Jew's ear. Peziza. **J.'s harp**, Trillium latifolium.

Jig'ger. Pulex penetrans.

Jimpson (jim'son) or **Jimston weed**, jim'ston weed (corr. from Jamestown). Datura stramonium.

Jinked. A veterinary term denoting sprained in the back.

Jiqui'tiba. Pyxidaria macrocarpa.

Joannesia princeps, jo-an-na'ze-zah prin'seps. Anda.

Jobert (zho-bare'), **su'ture of.** See *Suture*.

Joe pye. Eupatorium perfoliatum; E. purpureum.

Johannesia, jo-han-na'ze-ah. Joannesia.

John'ny jump'er or **jump-up.** Viola tricolor.

Johns'wood or **Johns'wort.** Hypericum.

Joint. Articulation; arthrosis. **J., ball-and-sock'et,** enarthrosis. **J., con'dyloid,** articulation admitting of various movements with circumduction. **J. disease,** see *Charcot* and *Arthropathy.* **J., dove'-tail,** suture. **J., e'vil,** elephantiasis nodosa. **J., false,** pseudarthrosis. **J., gin'glymoid,** ginglymus. **J., gli'ding,** arthrodia. **J., hinge,** ginglymus. **J., hyster'ical,** pseudarthrosis. **J., ir'ritable,** violent knee-joint symptoms, sometimes long after injury of the part. **J. oil,** synovia. **J., spi'ral** or **screw-hinged,** spiral form of ginglymus, as at the elbow. **J., stiff,** ankylosis. **J., syphilit'ic,** pulpy disease. **J. weed,** Polygonum articulatum.

Joint'ed. Articulated.

Jon'quil. Term applied to various forms of Narcissus.

Jo'vis flos (flower of Jove). Crocus. **J. glans,** juglans.

Ju'cato calleloe. Phytolacca decandra.

Judæus, ju-de'us. Stone found in Judæa, Palestine, etc., formerly esteemed diuretic and lithontriptic.

Ju'das tree. Red bud. Bark of Cercis Canadensis; astringent in diarrhœa, leuchorrhœa, etc.

Judgment, juj'ment (*judico,* to judge). Faculty of the intellect by which ideas are compared and their relative worth appreciated.

Judicatorii dies, ju-dik-at-o're-e de'es. Critical days.

Judicium, ju-dis'e-um (*judex,* judge). Judgment.

Juga (ju'gah) (pl. of **Jugum,** yoke) **alveola'ria.** See *Alveolar arches.* **J. cerebra'lia,** prominences on the inner surface of the bones of the cranium between the digital impressions. **J. cervi'cis u'teri,** arbor vitæ uterina. **J. cru'rum medulla'rium,** optic thalami. **J. pe'nis,** spring forceps to compress the urethra in incontinence of urine.

Jugal, ju'g'l. Zygomatic. **J. bone,** malar bone. **J. pro'cess,** zygoma. **J. re'gion,** region of the cheek-bone.

Jugale (ju-gal'e) **os.** Malar bone.

Jugalis, ju-gal'is. Zygomatic. **J. sutu'ra,** suture uniting the os malæ or os jugale with the superior maxillary bone; sagittal suture.

Juglans, jug'lans (quasi *Jovis glans*). J. cinerea, J. regia. **J., black,** Juglans nigra. **J. cathart'ica** or **cine'rea,** *Butternut, Oil nut, White walnut,* ord. Juglandaceæ. Inner bark of the root of this tree, *Juglans* (Ph. U. S.), abundant in the United States, is used in medicine, in the form of extract, as an efficacious and mild laxative, in doses of five to twenty grains, in cases of constipation. **J. fraxinifo'lia,** species growing in W. Indies and Southern United States; bark is diaphoretic, parts of fruit are laxative, emetic, and anthelmintic. **J. ni'gra,** *Black juglans, Black walnut;* indigenous. Rind of the unripe fruit is said to remove ringworm and tetter. Decoction is anthelmintic. **J. re'gia,** *Juglans, Walnut, French nut, Bannut tree, Welsh nut;* unripe fruit was formerly esteemed anthelmintic and vermifuge; used also in gout and chronic cutaneous affections. Leaves are astringent, aromatic, and antistrumous. The oil of the seeds is laxative and anthelmintic, especially for tapeworm. The green rind of the walnut has been celebrated as an antisyphilitic and used as a diet drink. The kernel is an agreeable article of dessert, but, like all nuts, is difficult of digestion.

Jug'lone. $C_{10}H_6O_3$. Principle from Juglans regia; sternutatory.

Ju'go-max'illary. Relating to the jugular vein and maxillary bone, as the masseter muscle.

Ju'gular (*jugulum,* yoke, throat). Relating to the throat or neck. **J. fos'sa,** cavity in the petro-occipital suture, formed by the petrous portion of the temporal bone and by the occipital bone, and lodging the origin of the internal jugular vein, sometimes called the *thimble-like cavity.* **J. veins,** these are situate at the lateral and anterior parts of the neck, two on each side—one external, the other internal. 1. *External jugular vein* is of less size than the internal, descends almost vertically along the anterior and lateral part of the neck, from the cervix of the lower jaw to the subclavian vein, into which it opens a little above the internal jugular. It is formed by the internal maxillary, superficial temporal, and posterior auricular veins. This vein is commonly opened in bleeding in the neck. 2. *Internal jugular vein, vena apoplectica,* larger and more deeply seated than the preceding, descends vertically along the anterior and lateral part of the neck, from the posterior part of the foramen lacerum posterius as far as the subclavian vein. It commences at the sinus of the jugular vein, and receives the blood returning by the sinus of the dura mater and that of the facial, lingual, pharyngeal, superior thyroid, occipital, and diploic veins.

Jugularis, ju-gu-lar'is. Jugular.

Jugulate, ju'gu-late (*jugulo,* to strangle). To cut the throat; hence, to check abruptly or suddenly, as by remedies directed to a disease.

Jugulation, ju-gu-la'shun (*jugulo,* to strangle). Sudden cutting short of a disease by remedial agents.

Jugulo-cephalic, ju'gu-lo-sef-al'ik (*jugulum,* throat, *cephale,* head). Relating to the throat and head; term applied to veins thus distributed.

Jugulum, ju'gu-lum (dim. of **Jugum,** a yoke). Clavicle, throat; see *Suprasternal.* **J. u'teri,** neck of the uterus.

Jugum, ju'gum. Yoke. See *Juga.* **J. pe'nis,** forceps or compressor of that organ, worn in incontinence of urine. **J. petro'sum,** eminentia arcuata.

Juice. Jus. **J., aliment'ary,** gastric and intestinal juice, acting upon the food passing through the stomach and intestines. **J. of broom,** succus scoparii. **J. canals',** canals or spaces in connective tissue, origin of lymphatic vessels. **J., can'cer,** cancer-juice. **J. of coni'um,** succus conii. **J. of dan'delion,** succus taraxaci. **J., diges'tive,** J., alimentary. **J., enter'ic,** succus intestinalis. **J., expressed,** fluid secreted by gastric glands during digestion; see *Succus.* **J. of hem'lock,** succus conii. **J., intes'tinal,** succus intestinalis. **J., Ital'ian,** extract of Italian licorice. **J., joint,** synovia. **J., mus'cle,** see *Muscle-juice.* **J., ner'vous,** nervous fluid. **J., nu'clear,** J., nutrient. **J., nu'trient,** plasma of blood. **J., pancreat'ic,** secretion from the pancreas, acting particularly upon starchy food. **J., Span'ish,** extract of Spanish licorice.

Jujuba, ju-ju'bah. Jujube.

Ju'jube. Fruit of Rhamnus zizyphus or Zizyphus vulgaris, ord. Rhamneæ, native of the south of Europe, formerly ranked among the pectoral fruits; has an agreeable sweet taste. Fruits of two other species, Zizyphus jujuba, Rhamnus jujuba, Mansana arborea, native of the E. Indies, and Z. lotus, Rhamnus lotus, Zizyphus nitida or sativa or sylvestris of Africa, possess properties similar to those of Z. vulgaris. **J. paste,** paste of jujubes.

Julapium, ju-lap'e-um. Julep. **J. cam'phoræ** or **camphora'tum,** mistura camphoræ.

Julep (ju'lep) or **Ju'leb.** Sweet drink; demulcent, acidulous, or mucilaginous mixture. **J., cam'phor,** mistura camphoræ. **J., chalk,** mistura cretæ. **J., mint,** see *Mint julep.*

Juliana caryophyllata, ju-le-an'ah kar-e-o-fil-lat'-ah. Grows in Mexico; antispasmodic.

Ju'lus. First down upon the chin.

Jumble (jum-b'l) **beads.** See *Abrus precatorius.*

Jumentous, ju-men'tus (*jumentum,* beast of burden). Like a horse or other beast of burden; applied to the odor of urine.

Jump'ers. See *Convulsionnaires.*

Junctional, junk'shun-al. Connective.

Junctura, junk-tu'rah (*jungo,* to join). Articulation; commissure of brain. **J. serrat'ilis,** articulation by suture.

Juncture, junk'shur. Junctura. Critical time.

Juncus odoratus, jun'kus o-do-rat'us (*jungo,* to join, rushes being used for bands). Camel's hay, sweet rush, ord. Gramineæ. Dried plant, generally procured from Turkey and Arabia; has an agreeable smell and warm, bitterish taste; was formerly used as a stomachic and deobstruent.

Jungle fever, jun'g'l fe'ver. Hill fever. Variety of remittent occurring in the jungle districts of India.

Juniper, ju'nip-ur. Name of different varieties of Juniperus. **J. ber'ries** or **fruit,** fruit of Juniperus communis. **J. tree,** Juniperus communis.

Junip'eri cacu'mina. Tops of juniper.

Juniperin, ju-nip'er-in. Resinous material obtained from juniper berries.

Juniperum vinum, ju-nip'er-um ve'num. Wine impregnated with juniper berries.

Juniperus communis, ju-nip'er-us kom-mu'nis. Juniper tree, family Coniferæ. Berries of the fruit, *Juniperus* (Ph. U. S.), etnagh berries, are ordered in the pharmacopœias. Their odor is strong, but not unpleasant; taste warm, pungent; properties dependent on essential oil, which they yield to both water and alcohol. Dose, ℈j to ʒss, rubbed with sugar. In Holland juniper berries are used for flavoring gin. Oleum juniperi (Ph. U. S. and Br.) possesses the virtues of the plant. **J. ly'cia,** supposed to afford the true frankincense, olibanum; by some, however, supposed to be the product of an amyris, and by others of Boswellia floribunda or papyrifera. Olibanum has a peculiar and aromatic odor, taste bitterish and slightly pungent, partly soluble in alcohol, and forming a milky emulsion when triturated with water; formerly used in dysentery and hæmoptysis, but is now employed only as a perfume in the sick-room. **J. oxyced'rus,** brown-berried juniper; cade-oil plant, prickly cedar; grows in south of Europe, Siberia, etc. By combustion of the wood, liquid tar, oleum cadinum, oleum juniperi empyreumaticum, oleum juniperi pyrolignici, oil of cade, is obtained; employed externally in chronic cutaneous and other diseases; the fruit is used in amenorrhœa, hysteria, and leucorrhœa. **J. sabi'na,** common or barren savin; covershame. Odor of savin tops, *Sabina* (Ph. U. S. and Br.), is strong and disagreeable; taste, hot, acrid, and bitter, depending on essential oil. They are stimulant, emmenagogue, anthelminthic, and abortive; externally irritant. Dose, internally, gr. v to x of the powder. As a local irritant they are applied in powder or formed into cerate. The essential oil, Oleum sabinæ (Ph. U. S. and Br.), oil of savin, has the virtues of savine. Dose, two to five drops. Ointment of savin is used as a stimulant application to blisters. **J. Suec'ica,** J. communis. **J. Virginia'na,** red cedar, known throughout the United States as savine; is often used for the same purposes.

Junk (*juncus,* bulrush). Pad or sling for a fractured limb.

Junk'et. Curds and whey.

Juno Lucina, ju'no lu-se'nah (goddess of childbirth). Ilithyia.

Juno's tears. Verbena officinalis.

Junod's (zhu'no's) **boot.** Instrument which adapts itself to the leg and foot, and is furnished with suction-pump for exhausting the air; intended to draw blood away from the body.

Jupiter, ju'pit-ur. Tin. Scalp.

Jupiter's (ju'pit-ur's) **beard.** Sempervivum tectorum.

Juribali. Tree in the forests of Pomeroon, ord. Monogynia; bark in powder or infusion is febrifuge.

Jurinæa (ju-rin-e'ah) or **Jurinea cyanoides** (ju-rin-e'ah se-an-o-e'des) or **pollich'ii** or **tomento'sa.** Plant of Siberia and Caucasus, leaves of which are used in scarlatina.

Juripeba, ju-re-pa'bah. Solanum paniculatum.

Jurisprudence, medical, ju-ris-pru'dence med'ik'l (*jus,* law, *prudentia,* knowledge). Word often used synonymously with *Legal medicine;* at times employed for embodied laws and regulations relating to teaching and practice of medicine.

Jurubeba, ju-ru-ba'bah. Solanum paniculatum. Alkaloid resembling solanine, called jurebebine, is derived from it.

Ju'ry of ma'trons. Jury of women empanelled under a writ *de ventre inspiciendo,* to try the question whether a woman is with child or not.

Jury-mast, ju're-mast. Fixed apparatus employed in treatment of Pott's disease.

Jus. Soup; broth; bouillon. See *Broth.* **J. bovi'num,** beef tea. **J. coagula'tum,** jelly. **J. gas'tricum,** gastric juice. **J. jela'tum,** jelly.

Jusculum, jus'ku-lum (dim. of **Jus**). Broth; see *Jus.* **J. ni'grum Lacedæmonio'rum,** *Black broth of the Lacedæmonians.* Celebrated mess in antiquity, supposed to be made of hog's blood, resembling perhaps modern black pudding.

Jusquiamus, jus-kwe'am-us. Hyoscyamus.

Jussiæa, jus-se-e'ah. Several varieties are used as astringents, especially *J. repens* in N. America in diarrhœa, and *J. Swartziana* in the W. Indies.

Justicia adhatoda, jus-tish'e-ah ad-hat-o'dah (after Justice, Scotch botanist). Adhatoda. **J. bival'vis,** a small shrub of India used locally in gout. **J. ecbol'ium,** Malabar plant, the root of which, and the leaves, are considered lithontriptic. **J. gendarus'sa,** root is used in China and India in rheumatism and febrile affections, also in dysentery and dyspepsia; the leaves as emetic. **J. pectoral'is,** West India plant, slightly astringent, aromatic, balsamic.

Jus'to-ma'jor. Unusually large. **Justo-mi'nor,** unusually small. Terms applied to pelves so constituted.

Jute, joot. Fibre of different varieties of Corchorus used externally in many surgical cases in which lint and sponges are generally employed. It is often used carbolized.

Juvans, ju'vans (*juvo,* to aid). A medicine or substance relieving a disorder; adjuvant.

Juvenis, ju'ven-is. A youth. One at period of adolescence.

Juventa (ju-ven'tah) or **Juventas** (ju-ven'tas) or **Juventus,** ju-ven'tus. Adolescence; puberty.

Juxtaposition, juk-ta-po-zish'un (*juxta,* near to, *pono,* to place). Situation near by; the successive application of new molecules upon those forming the primitive nucleus. Opposed to *intussusception.*

K.

Most of the terms under K, derived from the Greek, are found under the letter C.

K. Letter formerly used to designate compound of gold; symbol of kalium, potassium. Abbr. for kathode or kathodic (also *Ka*).

Kaawy. Indian drink prepared from maize.

Kab'ala. Cabal.

Kadsu'ra Chinen'sis. Magnoliaceous shrub of China; tonic and stomachic.

Kæmpferia galanga, kemp-fer'e-ah gal-an'gah (after Kæmpfer, German naturalist). See *Maranta galanga.* **K. rotun'da,** zedoary, ord. Zingiberaceæ. Roots of this Ceylonese plant are stimulant and carminative. According to some, the *round zedoary* is furnished by Curcuma zerumbet; the long, *Zedoaria longa,* by Curcuma zedoaria.

Kageneckia oblonga, kag-en-ek'e-ah ob-lon'gah. Lyday wood of Chile; antiperiodic.

Kahincæ radix, ka-hin'sa rad'iks. Caincæ radix.

Kairine, ki'reen. $C_{10}H_{13}NO,HCl,H_{20}$. Hydrochlorate of artificial alkaloid prepared from chinoline; crystalline powder, of saline, bitter, nauseous taste, freely soluble in water, less soluble in alcohol, insoluble in ether. A very powerful antipyretic, producing diaphoresis and emesis, sometimes followed by collapse. Dose, gr. ij-x.

Kairolina (ki-ro-le'nah) or **Kairoline.** Antipyretic resembling kairine, but less efficient.

Kajeput, kah'je-put. Cajeput.

Kakaoste'arin. Cacaostearin.

Kakatrophy (kak-at'ro-fe) or **Kakot'rophy.** Ill-nutrition; anæmia.

Kakerlakism, kak'er-lak-iz'm (D. *Kakkerlak,* cockroach, which comes out only in the dark). Albinism. See *Albino.*

Kak'ke. Japanese disease similar to beri-beri.

Kakochymi'a. Cacochymia.

Kakodyl, kak'o-dil. C_4H_6As. Compound radical obtained by distillation of arsenious acid with potassium acetate; colorless, viscous liquid of nauseous odor, with strong affinity for oxygen, taking fire spontaneously in contact with air; insoluble in water, soluble in water and ether; poisonous.

Kakosmia, kak-oz'me-ah (*kakos,* foul, *osme,* smell). Repugnant smell. **K., subjec'tive,** disturbance of the olfactory nerve or centre, either from hysteria or from disease, giving rise to the perception of an offensive smell.

Kala azar. Black death of E. Indies; beri-beri.

Kalanchoe glandulosa, kal-an'ko-e glan-du-lo'sah. Fruit of this Abysinnian tree is used as a parturifacient. **K. lacinia'ta,** juice is used in E. Indies as an antipyretic. **K. pinna'ta,** leaves are employed as a poultice in the E. Indies.

Ka'li. Potash; potassium. **K. ace'tas,** potassii acetas. **K. aëra'tum,** potassii carbonas. **K. bichro'micum,** potassii bichromas. **K. caus'ticum,** potassa fusa. **K. caus'ticum cum cal'ce,** potassa cum calce. **K. chlo'ricum,** potassæ murias hyperoxygenatus. **K. chro'micum ac'idum,** potassii bichromas. **K. chro'micum fla'vum,** potassii bichromas. **K. chro'micum neutra'le,** potassii bichromas. **K. chro'micum ru'brum,** potassii bichromas. **K. hydriodin'icum,** see *Potassæ hydriodas.* **K. hypermangan'icum,** potassii permanganas. **K. iner'mis,** see *Salsola kali.* **K. ni'tricum,** potassii nitras. **K. oxal'icum acid'ulum,** potassium oxalate. **K. præpara'tum,** potassii subcarbonas. **K. præpara'tum e tar'taro,** see *Potash.* **K. pu'rum,** potassa fusa. **K. so'da,** see *Salsola kali.* **K. spino'sum cochlea'tum,** salsola kali. **K. subcarbo'nas,** potassii subcarbonas. **K. sul'phas,** potassii sulphas. **K. sulphure'tum,** potassii sulphuretum. **K. sulphu'ricum,** potassii sulphas. **K. tartariza'tum,** potassii tartras. **K. e tar'taro,** see *Potash.* **K. vitriola'tum,** potassii sulphas.

Kalicum hydras, kal'ik-um hid'ras. Potassa fusa.

Kaligenous, ka-lij'en-us (*kali, gennao,* to beget). Producing potash.

Kalimeter, kal-im'et-ur. Alkalimeter.

Kaline, ka'line. Alkaline.

Ka'lium. Potassium. **K. ioda'tum,** potassii hydriodas. **K. ioda'tum hydrargyra'tum,** potassii hydrargyro-iodidum.

Kalmia angustifolia, kal'me-ah an-gus-te-fo'le-ah (after Kalm, the Swedish botanist). *Ivy, Narrow-leaved kalmia* or *laurel, Dwarf laurel, Sheeplaurel, Lambkill, Sheep poison,* ord. Ericaceæ; same virtues as K. latifolia. So also have K. cuneata and K. hirsuta. **K., broad'-leaved,** K. latifolia. **K. glau'ca,** *Swamp laurel, Pole laurel;* virtues similar to those of K. latifolia. **K. latifo'lia,** *Broad-leaved kalmia, Calico bush, Laurel, Mountain* or *rose* or *broad-leaved laurel, Big ivy, Spoonwood, Calf kill, Lambkill, Sheep poison.* This plant kills sheep and other animals. The Indians use it as a poison. The powdered leaves have been applied in tinea capitis, and a decoction for the itch; the powder, mixed with lard, in herpes. **K., nar'row-leaved,** K. angustifolia.

Kalo. Arum esculentum.

Kamala, kam-al'ah. Glands and hairs from capsules of Mallotus Philippiensis (Rottlera tinctoria); Rottlera tinctoria.

Ka'mas root. Camassia esculenta.

Kamee'la. See *Rottlera tinctoria.*

Kamphur, kam'fur. Camphor.

Kan'dahar sore. Delhi boil.

Kan'dol. Kanadol, candahol. A volatile constituent of coal tar, proposed as a local anæsthetic. Possibly identical with rhigolene.

Kankroid, kan'kroid. Cancroid.

Kaolin, ka'ol-in. Pure silicate of alumina, earth obtained from decomposition of felspar, sometimes used as an absorbent, for coating pills, etc.

Kaphur, ka'fur. Camphor.

Kaposi's (kap-o'si's) **disease.** Atrophoderma pigmentosum, parchment skin.

Karabitus. Phrenitis.

Kar'apat. Castor oil.

Karena, kar-a'nah. Carena.

Karkinoma, kar-kin-o'mah. Carcinoma.

Karson-khayi. Swietenia Senegalensis.

Karwah thistle (kar'wah this't'l) **oil.** See *Argemone Mexicana.*

Karyochylema, kar-e-o-kil-a'mah. Achromatin, caryoplasm.

Karyokinesis, kar-e-o-kin-a'sis (*karuon,* nut, *kinesis,* motion). The process of indirect cell or nucleus division. First, from the chromatin is formed the wreath, rosette, or spirem, followed by the aster (star-shaped); then pithos (barrel-form), followed by the diaster (double star); subsequently the protoplasm separates into two parts, in each of which the chromatin arranges itself into a coil, the whole called dispirem. Two daughter nuclei are thus derived from one mother nucleus.

Karyol'ysis (*karuon,* nut, *luo,* to loose). Segmentation of the nucleus.

Karyomito'ma or **Karyomitosis,** kar-e-o-mit-o'sis (*karuon,* nut, *mitos,* thread). Flemming's term for indirect division of the nucleus.

Karyom'iton. Chromatin.

Karyoplasm, kar'e-o-plasm. Protoplasm of nucleus.

Karyosoma (kar-e-o-so'mah), **Kar'ysome** (*karuon,* nut, *soma,* body). Irregular nucleolar body developed from remains of a germinal vesicle.

Karyostenosis, kar-e-o-sten-o'sis. Direct division of cell-nucleus.

Kassader (kas-sah'der) or **Kassauder,** kas-saw'der. Convolvulus panduratus.

Kata-. For words beginning thus, and not found here, see *Cata-*.

Katabolism, kat-ab'ol-ism. The change in cells whereby their molecule is rendered less complex and contains less force; retrograde metamorphosis.

Katadicrotism, kat-a-dik'ro-tizm (*kata, dikrotos,* double beat). Term denoting a divided or double pulsation in the downward stroke of the sphygmograph.

Katalepsy, kat'a-lep-se. Catalepsy.

Katal'ysis. Catalysis.

Kataphasia, kat-af-az'e-ah. Morbid repetition of a word or part of a word.

Kat'aplasm. Cataplasm.

Katasarca, kat-ah-sar'kah (*kata, sarx,* flesh). Anasarca.

Katastaltica, kat-as-tal'te-kah (*kata, stello,* to repress). Astringents.

Katatonia, kat-at-on'e-ah (*kata, tonos,* tension). Mental derangement progressing from melancholia and mania to imbecility and tonic spasms.

Katelectrotonus, kat-el-ek-trot'on-us. Catelectrotonus.

Katharsis. Catharsis.

Kath'ode (*kata, hodos,* way). The negative pole of a galvanic battery.

Kathodic, kath-od'ik. Pertaining to negative pole. **K. clo'sure contrac'tion,** muscular contraction occurring upon closure of the circuit when the kathode is placed over the motor point. **K. o'pening contrac'tion,** the same when the circuit is opened.

Kathod'ic. Relating to kathode or negative pole of a battery. **K. clo'sure contraction,** see *Cathodic.* **K. opening contraction,** see *Cathodic.*

Kation. See *Cathion.*

Kava, kav'ah. Ava; Piper methysticum.

Kaviac, kav'e-ak. Caviare.

Keep'er. Armature of a magnet.

Ke'fir or **Ke'phir.** Fermented milk produced by kefir seed.

Keh'rer's opera'tion. Transverse incision in Cæsarean operation through anterior convex surface of uterus at level of os uteri internum.

Keita. Monsonia ovata.

Kekui, Kekuna, or **Kekune oil.** See *Aleurites triloba.*

Kelectome, ke'lek-tome (*kele,* tumor, *ektome,* excision). Instrument like a cutting punch, introduced through a trocar into a tumor to extract its solid contents.

Ke'lis (properly **Chelis**) (*chele,* claw of crab). Cancroid; keloid.

Keloid, ke'loid (properly **Cheloid**) (*chele,* claw of crab, *eidos,* resemblance). A rare variety of round or oval recurrent fibrous growth, usually on the chest, neck, or arms, the fibres growing in trabeculæ. Cancroid. **K. of Ad'dison,** morphœa. **K. of Alibert,** keloid.

Kelology, ke-lol'o-je (*kele,* hernia, *logos,* discourse). Description of hernia.

Kelotomia, ke-lo-tom'e-ah. Celotomy; herniotomy.

Kelotomy, ke-lot'o-me. Celotomy.

Kelp. Impure mineral alkali obtained by burning certain marine plants. See *Soda.* Large dark seaweed.

Keme. Cucurbita citrullus.

Ken'give. Cucurbita citrullus.

Kennelwort, ken''l-wurt. Scrophularia nodosa.

Kenopho'bia (*kenos,* empty, *phobos,* fear). Dread of open spaces.

Keno'sis. Evacuation; inanition.

Kenospudia, ken-o-spu'de-ah. Somnambulism.

Kent'ish's oint'ment. Linimentum terebinthinæ.

Kentrokinesis, ken-tro-kin-a'sis (*kentron,* spur, *kinesis,* motion). Excito-motor action.

Kephal'ic. Cephalic.

Keph'alins. Radicals in brain-tissue, forming an amorphous mass.

Kephalom'eter. Cephalometer.

Kephalon, kef'al-on. Cephalon; large skull.

Kephalothryptor, kef-al-o-thrip'tor. Cephalothryptor.

Kera-. For words beginning thus, and not found here, see *Cera-*.

Keracele, ker'a-seel (*keras,* horn, *kele,* tumor). Hard tumor on the hoof of a horse.

Keraphyllocele, ker-a-fil-lo-se'le (Eng. ker-a-fil'lo-seel) (*keras,* horn, *phullon,* leaf, *kele,* tumor). Hard tumor connected with hoof of horse.

Ker'asin. Substance found in cerebral tissue.

Keratectasia, ker-at-ek-taz'e-ah (*keras,* horn, *ektasis,* dilatation). Prominence or protrusion of the cornea.

Keratectomy, ker-at-ek'to-me (*keras,* horn, *ektome,* excision). Excision of the cornea; extraction of cataract; incision into anterior chamber of the eye. Ceratotomy.

Keratiasis, ker-at-e'as-is. Ceratiasis.

Keratin, ker'at-in. Ceratin.

Keratiniza'tion. Hardening, as of the nails.

Keratitis, ker-at-e'tis. Ceratitis. **K., dot'ted,** aquomembranitis. **K., interstit'ial,** inflammation of interstitial lamellæ of cornea. **K. puncta'ta,** aquomembranitis.

Kerato, ker'a-to. See *Cerato.*

Keratocele, ker-at-o-se'le (Eng. ker'at-o-seel). Ceratocele.

Keratochromatosis, ker-at-o-kro-mat-o'sis (*keras, chroma,* color). Discoloration of the cornea.

Keratoconjunctivitis, ker-at-o-kon-junk-tiv-e'tis. Inflammation of cornea and conjunctiva.

Keratoconom'eter (*keras, konos,* cone, *metron,* measure). Instrument for determining amount of astigmatism by reflective power of the cornea.

Keratoconus, ker-at-o-ko'nus. Staphyloma of cornea; ceratoglobus.

Keratocricoid, ker-at-o-kri'koid. Ceratocricoid; cricothyroid.

Keratodeitis, ker-at-o-de-e'tis. Keratitis.

Keratodeocele, ker-at-o-de-o-se'le (Eng. ker-at-o'de-o-seel). Ceratocele.

Keratodeonyxis, ker-at-o-de-o-niks'is. Ceratonyxis.

Keratoderma, ker-at-o-dur'mah (*keras,* horn, *derma,* skin). Cornea.

Keratodermatitis, ker-at-o dur-mat-e'tis. Ceratitis.

Keratodermatocele, ker-at-o-dur-mat-o-se'le (Eng. ker-at-o-dur-mat'o-seel) (*keras,* horn, *derma,* skin, *kele,* tumor). Ceratocele.

Keratodermatomalacia, ker-at-o-dur-mat-o-mal-ah'she-ah (*keras, derma,* skin, *malakia,* softening). Abnormal softness of the skin of the cornea.

Keratodes, ker-at-o'dees. Ceratodes; horny.

Keratogenous, ker-at-oj'en-us (*keras, gennao,* to engender). Causing or producing horny tissue or growth, as K. membrane of the skin.

Keratoglobus, ker-at-o-glo'bus. Hydrophthalmia; buphthalmia.

Keratoglossus, ker-at-o-glos'sus. Ceratoglossus.

Keratohyoïdeus, ker-at-o-he-o-e'de-us. Muscle of inferior mammalia, bringing near to one another the cornua of the hyoid bone.

Keratoid, ker'at-oid. Ceratoid.

Kerato-iritis, ker-at-o-ir-e'tis. Inflammation of the iris and cornea. See *Aquomembranitis.*

Keratoleucoma, ker-at-o-lu-ko'mah. Albugo; leucoma.

Keratolysis, ker-at-ol'is-is (*keras, lusis,* loosening). Loosening of the cuticle. The class *Keratoses* of skin diseases includes pityriasis and exfoliative dermatitis.

Keratoma, ker-at-o'mah (*keras,* horn, *oma,* growth). Excessive increase of horny tissue; callosity.

Keratomalacia, ker-at-o-mal-as'e-ah. Keratodermatomalacia.

Keratome, ker'at-ome. Ceratotomus; cataract knife; knife for incision of the cornea in iridectomy.

Keratomeningitis, ker-at-o-men-in-je'tis. Ceratitis.

Keratomeninx, ker-at-o-men'inks (*keras,* horn, *meninx,* membrane). Cornea.

Keratometer, ker-at-om'et-ur (*keras,* horn, *metron,* measure). Instrument to measure astigmatism of the cornea.

Keratomus, ker-at'om-us. Ceratotomus.

Keratomycosis, ker-at-o-me-ko'sis (*keras, mukes,* fungus). Chronic keratitis with fungoid growth on the cornea, probably due to a microbe. *Mycotic Keratitis.*

Keratonosis, ker-at-on-o'sis. Ceratosis.

Keratonosus, ker-at-on'os-us (*keras*, horn, *nosos*, disease). Disease of horny layer of skin, hair, nails, and secretory apparatus of the skin.

Keratonyxis, ker-at-o-niks'is. Ceratonyxis.

Keratopharyngeus, ker-at-o-far-in-ge'us. Ceratopharyngeus.

Keratoplasia, ker-at-o-plaz'e-ah (*keras*, *plasis*, formation). Formation of horny layer of epidermis.

Keratoplasty, ker'at-o-plas-te (*keras*, *plasso*, to form). Plastic operation on the cornea; trephining of the cornea.

Keratorrhexis, ker-at-or-rheks'is (*keras*, *rhexis*, rupture). Rupture of the cornea.

Keratoscleritis, ker-at-o-skler-e'tis. Inflammation of cornea and sclerotic coat.

Keratoscope, ker'at-o-skope (*keras*, *skopeo*, to observe). Instrument for examining and testing meridians of curvature of the cornea by observing the images formed by reflection from its anterior surface. The process is called *Keratos'copy*.

Keratose, ker'at-oze. Horny.

Keratoses, ker-at-o'sees (pl. of **Keratosis**). Skin affections with hypertrophy of epidermis and horny or warty growths.

Keratosis, ker-at-o'sis. Change to horny tissue; excessive growth or disease of horny tissue. See *Keratoses*. **K. circumscrip'ta**, circumscribed growth. **K. diffu'sa**, ichthyosis. **K. follicula'ris, pila'ris**, or **spinulo'sus**, papules resulting from distension of hair-follicles; ichthyosis follicularis. **K. ob'turans**, mass of horny scales acting as a plug to the external auditory canal. **K. pigmento'sa**, verruca senilis.

Keratostaphylinus, ker-at-o-staf-il-e'nus. Ceratostaphylinus.

Ker'atotome. Ceratotomus; cataract knife; knife for incision of the cornea in iridectomy.

Keratot'omy, ker-at-ot'o-me (*keras*, horn, *tome*, incision). Incision of the cornea, used especially in cataract operation.

Kerectasia, ker-ek-taz'e-ah (*keras*, *ektasis*, distension). Distension or bulging of the cornea, probably as a sequel of keratitis.

Kerectomy, ker-ek'to-me. Keratectomy.

Kerion (ke're-on) or **Ke'rium** (honeycomb). Suppurative inflammation of the hair-follicles of the scalp, destroying the hair-pulp and causing the falling off of the hair. A form of parasitic sycosis. See *Favosus*.

Kerk'ring, valve of. Valvulæ conniventes.

Kermes, kur'meez. One species of the genus kermes lives on a green oak, Quercus cocifera, growing abundantly in Southern France, Spain, and islands of the Grecian Archipelago, and is called coccus ilicis, kermes animal, cocci granum, coccum, C. baphicum or infectorium or tinctorium or scarlatinum, etc. The kermes inhabiting it has the appearance of a small, spherical, inanimate shell; its color is reddish brown, and it is covered with ash-colored dust. This is the kermes of the shops, now only used in dyeing, but formerly as an aphrodisiac, analeptic, and antiabortive. **K., min'eral**, antimonii sulphuretum præcipitatum and a. sulphuretum rubrum.

Kernel, kur'n'l. Tubercle; enlarged lymphatic gland.

Ker'nels, wax or **wax'ing.** Enlarged lymphatic vessels. **K., yolk**, nucleus of yolk.

Kerosolene (ker'o-so-leen) or **Ker'osene oil.** Liquid product of the destructive distillation of coal, of very low specific gravity, not easily managed as a general anæsthetic, but employed locally in spray.

Kervah, kur'vah. Ricinus communis.

Ketch'up. Catchup, catsup. Pickle prepared from the liquor of the mushroom, walnut, tomato, etc.

Ketmia Ægyptiaca, ket'me-ah e-jip-te'ak-ah. Hibiscus abelmoschus.

Ke'tones. Organic compounds, a class of generally volatile liquids, products of first stage of oxidation of secondary alcohols, and corresponding to aldehydes, similar derivatives of the primary alcohols.

Key. Instrument for extracting teeth, having a claw at right angles to its handle; tooth-key. Apparatus for making and breaking electrical circuit.

Keyri cheiri. Cheiranthus cheiri.

Khaya Senegalensis, ka'yah sen-e-gal-en'sis. Swietenia Senegalensis.

Khee'sah. Flesh-glove of India, made of goat's hair, to preserve the cleanliness of the skin.

Khus-khus. Andropogon muriaticus.

Kiaster, ke-as'ter (properly **Chiaster**) (*chiazo*, to cross). Species of bandage, having the form of the Greek letter χ, which the ancients used for approximating and maintaining in contact fragments of the fractured patella. It was applied in the form of the figure 8.

Kibisitome, kib-is'it-ome (*kibisis*, pouch or bladder, *tome*, incision). Cystotome.

Kickia arboria, kik'e-ah ar-bor'e-ah. Milky juice of stem of this Javanese plant is purgative and anthelmintic.

Kidin'ga or **Kidin'go pe'po** (literally a crampy pain caused by evil spirits). Exanthematous affection, similar to dengue, occurring in Zanzibar; scarlatinoid rash with rheumatic pains and fever, swelling of glands, etc.

Kidney, kid'ne. The kidneys or reins, the secretory organs of the urine, are two glands situate deeply, the one on the right, the other on the left side, in the hypochondres, at the sides of the lumbar vertebræ, behind the peritoneum, and in the midst of an abundant fatty areolar tissue, *tunica* or *capsula adiposa*. The kidney is reddish-brown, oval in form, and flattened on two surfaces; has, at its internal margin, a deep fissure, by which the renal vessels and nerves enter or quit the organ, and the ureter issues. It resembles pretty accurately the haricot or kidney bean. Two substances are readily distinguishable in it: the outer, *secerning*, *cortical*, *glandular*, or *vascular*, which secretes the urine; and the inner, *tubular*, *medullary*, *uriniferous*, *conoidal*, or *radiated*, appearing under the form of small cones or unequal papillæ or mammillæ, each resulting from the union of small capillary tubes, adherent by one of their extremities to the cortical substance, and opening by the other at the summit of the cone into calices, membranous tubes, more or less numerous, transmitting the urine of the papillæ to the pelvis of the kidney. Between the tubules and renal vessels is the intertubular stroma, especially in the cortical substance, and toward the apices of the papillæ in very young human beings or in other animals. By the *pelvis* is meant a small membranous sac of an irregularly oval shape, at the base of which are the orifices of the calices, and the other extremity of which is continuous with the ureter. The kidney is surrounded by a fibrous membrane proper to it, perinephrus, tunica propria or albuginea. The renal artery is distributed to the corpora Malpighiana, forming a pellet of convolutions, which is received into a flask-like dilatation of the ureter, Bowman's capsule, and through which, it is conceived, the watery portion of the urine is separated. The blood then becomes venous, and is distributed by different veins—*portal veins* of the kidney—to the convoluted tubes through which the proper urine is secreted; thence the blood passes into the renal vein. The intermediate vessels between the Malpighian bodies and the convoluted tubes have been termed the portal system of the kidney. See *Ferrein, pyramids of Corpora Malpighiana*, etc. The following weights and measurements of the kidneys have been recently given (Vierordt), from various authorities:

Weight, right kidney	102 g. (E. Bischoff)–150 g. (Bloseld).
" left kidney	118 g. (E. Bischoff)–150 g. (Bloseld).
Length	108–114 mm. (Luschka).
Breadth	54–63, at upper part frequently 72.
Thickness	34–45.
Tunica albuginea	0.1–0.2 thick.
Cortical substance	9 (Toldt)–10 thick.
Medullary substance	16.

In the new-born	cortex 1.8 mm., medulla 8.31 thick.
Child, 3 months old	cortex 2.8, medulla 10.2 thick.
Tortuous uriniferous tubules	0.05 diameter.
Straight uriniferous tubules	0.045 "
Glomeruli	0.2.
Pyramidal processes	0.4 thick.
Uriniferous pores of the papillæ	0.7 deep.
Pelvis of kidney	140–180 wide.
Ureters	320–340 long (Luschka 270), 5–6 wide.

Orificium in the bladder 2 long, separated 14 from one another and 180 from internal orifice of the urethra.

Kidney, am'yloid, see *Kidney, lardaceous,* and *Kidney, Bright's disease of.* **K. bean,** Phaseolus vulgaris. **K., bran'ny,** appearance like bran in fatty infiltration of chronic inflammation of the kidneys. **K., Bright's dis'ease of the,** *Albuminuria, Cachectic* or *Associated nephritis, Renal cachexia, Inflammation of the Malpighian corpuscles, Disease of Bright, Granular degeneration* or *Disorganization of the kidney, Granular kidney of Bright, Cachectic nephritis.* Bright's disease was formerly defined as a granular disease of the cortical part of the kidney, characterized by the secretion of urine which contains albumen and is of less specific gravity than natural, and which destroys by inducing other diseases. It was first described by Dr. Richard Bright of London. By some it was made to include only one particular form of renal disease, in which the tubules are inflamed, *tubal nephritis;* by others it included parenchymatous nephritis, interstitial nephritis, and amyloid or lardaceous degeneration. Under the head of Bright's disease are comprised, according to recognized authority, all diseases of the kidney productive of albuminuria. Two forms have been described, the acute and chronic, different varieties of which have been referred to by writers on the subject.

Acute Bright's disease, variously called *Acute tubal, tubular, parenchymatous, catarrhal,* or *desquamative nephritis, Acute albuminuria, Acute renal dropsy,* is an affection of the whole kidney, more or less, but especially the epithelial or gland-cells lining the urinary tubuli. The cells become atrophied and disintegrated, and by their desquamation block up the tubes; the renal circulation becomes obstructed, the kidneys are congested, serum and fibrin are effused, the former causing an albuminous condition of the urine, while the fibrin, having the broken-down cells entangled with it, passes off in the urine in epithelial tube-casts. When there is no such desquamative process, it is called *non-desquamative disease of the kidney.* The chief symptoms are fever, usually moderate, dull pain in the loins, vomiting, dropsy, anæmia, and uræmic indications. The urine is scanty, with suppression, has a large amount of albumin, and deposits a thick sediment exhibiting the results of disintegration; its specific gravity is high.

Chronic Bright's disease, Chronic albuminuria, includes several varieties: 1. *Chronic catarrhal nephritis, Large white kidney.* The symptoms are loss of flesh, adynamia, anæmia, disturbance of the digestive organs, dropsy, increased arterial tension, uræmic symptoms. The urine is generally diminished in amount, but markedly albuminous, with a decided sediment; there is often dropsy, serous inflammation, valvular cardiac disease, albuminuric retinitis, etc. There are anæmia and fatty degeneration of the kidney, and the tubes are loaded with fatty epithelium and casts; the kidney contracts in size from the attendant destruction of epithelium. 2. *Granular* or *Red granular kidney,* also called *Contracted granular, Gouty,* or *Cirrhotic kidney, Chronic desquamative* or *Interstitial nephritis,* a disease characterized by albuminous urine, persistent desquamation of epithelium, atrophy of the kidney, granular epithelial casts, seen in the urine on microscopic examination, etc. It is more common in the male sex, and is usually due to syphilis, gouty diathesis, chronic alcoholism, etc. The kidneys are red, and often contain cysts or calcareous deposits, without thinning of the cortical substance. There may be fatty degeneration and desquamation of the epithelium, with fatty degeneration of arteries in various parts of the body. Palpitation, dyspnœa (cardiac or pulmonary), valvular disease, headache, dizziness, dimness of vision from albuminuric retinitis, may all be present. The urine is more plentiful, the specific gravity low, the amount of albumin scanty. 3. *Fatty kidney* or *Fatty degeneration of the kidney,* seen either in its enlarged form as the *mottled kidney* or with contraction of the organ, may occur as the result of acute desquamative nephritis. 4. *Lardaceous, Amyloid,* or *Waxy kidney,* which usually occurs in connection with constitutional affections, such as phthisis, scrofulous abscess, constitutional syphilis, etc., and is characterized by the form of infiltration known as the lardaceous or waxy. See *Lardaceous.* The kidney is large and pale, the urine is increased in quantity, but pale, and there is a good deal of albumin.

The treatment adopted for these various conditions of Bright's disease cannot be summarized in the space of a single paragraph. (For tests for albumin in the urine, see *Urine, examination of.*)

The following synoptical table presents a clear exposition of the whole subject (Prof. J. M. DaCosta, M. D.):

TABLE EXHIBITING THE CLINICAL DIFFERENCES BETWEEN THE PRINCIPAL FORMS OF BRIGHT'S DISEASE.

Acute Cases, in which Dropsy occurs quickly and is extensive.

ACUTE BRIGHT'S DISEASE; ACUTE DESQUAMATIVE OR TUBAL NEPHRITIS; ACUTE PARENCHYMATOUS NEPHRITIS; ACUTE RENAL DROPSY.	Caused mostly by exposure or scarlet fever. Dropsy extensive, generally begins in the eyelids or in the feet; usually febrile symptoms; uræmia may be met with. Disease most common in childhood and among young adults. Recoveries frequent, but disease may terminate in the large white kidney.	Urine usually scanty, deep-colored, of high specific gravity, containing much albumen, often blood; also blood-casts; casts, many of large size, covered with epithelium and a few hyaline casts; and free epithelial cells, cloudy and granular.	Kidneys enlarged, congested, or mottled, shedding epithelium; cortical substance increased; cones usually redder than cortical substance. Dilated convoluted tubes, distended with swollen, cloudy epithelium; at ends of tubules also blood or plugs of fibrin. Tubules darker and denser than normal.

Chronic Cases, in which Dropsy is variable in amount and may be absent.

CHRONIC INFLAMMATORY FORM; CHRONIC TUBAL NEPHRITIS; CHRONIC PARENCHYMATOUS NEPHRITIS; LARGE WHITE KIDNEY.	History often of antecedent acute inflammatory attack; dropsy a prominent symptom. Uræmic phenomena not uncommon; among them at times uræmic coma with its usual symptoms. Inflammations of serous membranes also not uncommon. Hypertrophy of heart, especially of the left ventricle. Recovery possible but doubtful; may pass into fatty kidney.	Urine in normal or in increased quantity; albumen generally in considerable amount; granular epithelial casts; some hyaline casts; at times compound granule cells and partially fatty epithelium; casts with fragments of epithelium or a little fat; no blood-casts.	Kidneys enlarged, capsules easily stripped off, cortical substance increased in volume; cones may be of natural color; tubes often irregularly distended, and filled with granular epithelium here and there slightly fatty, and with detritus. Thickening of intertubular matrix.

FATTY BRIGHT'S KIDNEY.	Persistent and obstinate dropsy, coming on gradually; face pale and puffed; hypertrophy of heart affecting often both sides. Always fatal.	Urine contains much albumen, fatty casts, fatty epithelial cells, free oil. Spec. grav. variable, usually from 1015 to 1030. Quantity variable, generally moderate or diminished; urea diminished.	Kidneys enlarged and very fatty; sometimes have a mottled look. The tubes, especially the convoluted ones, full of highly-fatty epithelium and free oil.
WAXY KIDNEY; LARDACEOUS OR AMYLOID DEGENERATION OF THE KIDNEY.	Follows usually exhausting and wasting diseases, syphilis, caries, and long-continued suppuration. Rare in very early and in advanced age. Dropsy trifling, except late in disease; great emaciation; striking sallowness of face; liver and spleen enlarged; diarrhœa; much thirst; heart not affected; nervous symptoms infrequent. Unfavorable prognosis.	Urine increased, contains much albumen, but few casts, which are pale and transparent or highly refracting. The casts may or may not give the mahogany-red reaction with a watery solution of iodine. Spec. grav. low, yet usually above 1010; urea normal or slightly diminished.	Kidneys enlarged, smooth, and waxy-looking; capsule easily detached; cortex pale, anæmic; reddish-brown discoloration on testing with watery solution of iodine; cones often dark and congested. Morbid process at first chiefly along renal vessels.
CHRONIC CONTRACTION OF THE KIDNEY; CIRRHOSIS OF THE KIDNEY; INTERSTITIAL NEPHRITIS; GRANULAR KIDNEY; GOUTY KIDNEY.	Dropsy slight, frequently absent; face sallow, yet not so much so as in the waxy disease; often headache and retention of urea, tendency to coma and to convulsions; impoverished blood; hypertrophy of the heart; epistaxis; liver may be cirrhosed; retinitis. Most common between forty and sixty years of age. May exist for years unsuspected; is a very chronic disease and incurable; may lead to death by apoplexy.	Urine more copious than in health, yet extremely small amount of albumen, this at times temporarily absent; hyaline and large finely granular casts; altered epithelium; a little oil. Spec. grav. low; rarely above 1010, much oftener below; urea not decreased until late in disease.	Kidneys waste slowly, become dense and contracted; capsule very adherent; surface often granular; thickness of the cortical substance diminished; cysts common. There is hypertrophy of connective tissue; compression and atrophy of gland-elements and of tubules. Cardio-vascular changes. Tissue-changes in renal ganglia.

K., cirrho'sis of, see *Kidney, Bright's disease of.* **K., cirrhot'ic,** see *Kidney, Bright's disease of.* **K., consump'tion of,** *Tubercular disease of the kidney;* tubercular degeneration of the kidney, accompanied usually with ulceration. **K., contract'ed,** small kidney sometimes resulting from chronic nephritis; see *Bright's disease.* **K., cys'tic,** cystic disease or degeneration of kidney. **K., drop'sy of,** hydronephrosis. **K., fat'ty,** see *Kidney, Bright's disease of.* **K., fat'ty degenera'tion of,** see *Kidney, Bright's disease of.* **K., float'ing,** kidney, movable. **K., gout'y,** see *Kidney, Bright's disease of.* **K., gran'ular,** see *Kidney, Bright's disease of.* **K. head,** see *Pronephros.* **K., hob'nail,** K., granular. **K., horse'shoe,** fatty comformation in which the lower ends of the two kidneys are united by a transverse portion across the spine, thus forming a crescent or horseshoe. **K., inflamma'tion of,** nephritis. **K., larda'ceous degenera'tion of,** see *Lardaceous* and *K., Bright's disease of.* **K., mot'tled,** K., spotted; see also *Kidney, Bright's disease of.* **K., mov'able** or **float'ing,** condition of the kidney, usually congenital, in which the elongated renal vessels permit the kidney to be moved in certain directions. The tumor formed by it, felt on pressure, may be mistaken for disease of other parts. **K., non-desquam'ative disease of,** see *Kidney, Bright's disease of.* **K. plant,** Baccaris pilularis. **K., primor'dial,** corpus Wolffianum; mesonephros. **K., se'nile,** K. atrophied from old age. **K., spot'ted,** *Mottled kidney;* condition of the kidney resulting from the combination of shrivelling of that organ and fatty degeneration of the epithelia of the urinary tubuli; see *Kidney, Bright's disease of.* **K., sur'gical,** nephritis, surgical. **K., tuber'cular disease of,** kidney, consumption of. **K., wax'y,** see *Lardaceous* and *Kidney, Bright's disease of.* **K., white,** fatty or amyloid degeneration of that organ. **K. wort,** Cotyledon umbilicus; Saxifraga stellaris.

Kiesteïne, ki'es-te-een. Properly *Kyesteïne, Kiesteïn, Kyestin* or *Kyesteïn, Kystein, Kiestin, Kiestine, Cyesteïne* or *Cyesteïn, Kiestheïn* (*kuo,* to be pregnant, *esthes,* a garment or pellicle). Peculiar albuminoid pellicle forming on the urine of a pregnant female when it is allowed to stand for a few days; whitish, opalescent, slightly granular, resembling the fatty substance that swims on the surface of cool soups. It is no longer considered a valuable aid in the diagnosis of early pregnancy.

Kiëstinic, ke-es-tin'ik. Relating or appertaining to kiesteine.

Kile. Ulcer.

Kilian's (kil'e-an's) **pelvis.** Halesteretic pelvis —*i. e.* deformed by loss of lime salts; similar to osteomalacia.

Kill-lamb. Andromeda mariana.

Killbastard, kil-bas'tard. Juniperus sabina.

Killherb, kil'urb. Orobanche major.

Killosis, kil-lo'sis. Strabismus.

Kilogramme, kil'o-gram (*chilioi,* a thousand). The weight of a thousand grammes—two pounds eight ounces one drachm and twenty-four grains Troy.

Kilolitre, kil'o-le'tr (*chilioi,* a thousand, *litre,* a litre). Measure containing a thousand litres.

Kilometre, kil'o-me'tr (*chilioi,* a thousand, *metron,* measure). Measure of one thousand metres.

Kimis, ke'mis. Kumyss.

Kina kina, ke'nah ke'nah. Cinchona.

Kinæsthesia (kin-ees-tha'she-ah) or **Kinæsthesis,** kin-ees-tha'sis (*kineo,* to move, *aisthesis,* perception). Muscular sense; perception of motion.

Kinæsthesiometer, kin-ees-the-se-om'et-ur. Instrument for testing muscular sense.

Kinæsthesis, kin-ees-tha'sis. Sense of movement.

Kincough (kin'kof) or **Kindcough,** kind'kof. Whooping cough.

Kinesia, kin-a'ze-ah (*kineo,* to move). Motion.

Kinesiatrics, kin-e-se-at'riks (*kinesis,* motion, *iatros,* physician). Movement cure.

Kinesic, kin-e'sik. Pertaining to movement.

Kinesimeter (kin-e-sim'et-ur) or **Kinesiom'eter** (*kinesis,* motion, *metron,* measure). Apparatus to measure the extent of motion.

Kinesioneurosis, kin-es-e-o-nu-ro'sis. Nervous affection attended with abnormal movements.

Kinesipathy, kin-e-sip'ath-e (*kinesis,* motion, *pathos,* disease). *Cinesipathy, Movement cure, Motor-pathy.* Theory of disease resulting from excess or defect of muscular action. A mode of treating diseases by gymnastics or appropriate movements proposed by Ling, a Swede; hence called *Lingism.*

Kinesither'apy (*kinesis,* motion, *therapeuo,* to cure). Exercise or movement applied to treatment of disease.

Kinesodic, kin-es-od'ik (*kinesis,* motion, *hodos,* way). Term to designate the nervous substance concerned in the conduction of motorial impulses,

Kinetic, kin-et'ik (*kineo*, to move). Motory.

King'cure. Pyrola maculata.

King's e'vil. Scrofula. **K.'s yel'low**, orpiment.

Kings'hood. Reticulum.

Kinic acid, ki'nik as'id. See *Acid*, *kinic*, and *Cinchona*.

Kinici acetas, kin'e-se as-e'tas. Quinia, acetate of.

Kininum (kin-e'num) or **Kinium**, kin-e'um. Quinine.

Kink, dumb (Teut. *kink*, twist in a rope). Form of whooping cough complicated with gastro-enteritis. **K. in the head**, see *Insanity*.

Kinkina, kin-ke'nah (Peruv. *kina*). Cinchona.

Ki'no (Ind.). African, E. Indian, or Amboyna kino; it is the inspissated juice of Pterocarpus marsupium (Ph. U. S. and Br.). On wounding the bark the kino flows drop by drop. A West India variety, Jamaica kino, is derived from Coccoloba uvifera or seaside grape; and a Botany Bay kino is the concrete juice of Eucalyptus resinifera or brown gum tree of New Holland, nat. ord. Myrtaceæ. Kino consists chiefly of tannic and gallic acids, oxide of iron, and coloring matter; it comes in fragments of a dark ruby-red color, easily pulverized; it is powerfully astringent, and used in diarrhœa, dysentery, hemorrhage, leucorrhœa, etc. Dose, gr. x to xxx, in powder. **K., Amboy'na**, kino. **K., Amer'ican**, inspissated juice of Coccoloba uvifera or seaside grape. **K., Austra'lian**, astringent derived from eucalyptus. **K., Bengal'**, astringent gum of several varieties of butea, containing kino-tannic acid in large quantities. **K., bu'tea** or **E. In'dian**, K., Bengal. **K., eucalyp'tus**, K., Australian. **K. gum**, kino. **K., West In'dian**, K., American.

Kinometer, kin-om'et-ur (*kineo*, to put in motion, *metron*, measure). Instrument to estimate degree of uterine displacement dependent upon pelvic tumor or inflammation.

Kinone (ki'none) or **Kui'none.** Substance derived from decomposition of kinic acid.

Kinotannic (ki'no-tan'nik) **acid.** Most important constituent of kino; variety of tannic acid.

Kinova (kin-o'vah) **bit'ter** or **bit'ters.** Acid kinovic; kinovin.

Kinovic (kin-o'vik) **acid.** Acid, kinovic, and cinchona.

Kinovin, kin-o'vin. Quinovin, kinovic bitter, $C_{30}H_{48}O_8$. Originally from Quinquina nova or new bark; also from calisaya bark and other cinchonas; bitter white principle, giving bitter character to some barks.

Kionorrhaphia, ke-on-or-rhaf'e-ah (*kion*, uvula, *rhaphe*, suture). Staphylorrhaphy.

Kiotome, ki'o-tome (*kion*, a pillar or support, *tome*, incision). Instrument invented by Desault to cut accidental *brides* or filaments in the rectum and bladder; used also for the removal of the tonsils. It is composed of a flat silver sheath, open at one edge, provided with a cutting blade, which, forced through the opening, divides all the parts with which it comes in contact.

Kippernut, kip'per-nut. Bunium bulbocastanum.

Ki'rate. Weight of four grains.

Kiriaghuma. Gymnema lactiferum.

Kirrhonosis, kir-rho-no'sis (*kirros*, yellow). Cirrhosis.

Kirrhosis, kir-rho'sis (*kirrhos*, yellow). Cirrhosis.

Kirronese. Icteric coloration; discolored as if by jaundice.

Kirschwasser, kersh'was-ser. Cherry-water; alcoholic liquor obtained from cherries bruised with their stones by distillation after fermentation. See *Spirit*.

Kiskitomas nut. Hickory nut.

Kissingen, mineral waters (kis'singen, min'er-al wa'ters) **of.** At this resort in Bavaria are several tonic, laxative, and alterative springs, the Ragoczy or Rakoczy being the most important, containing, besides carbonic acid, sodium chloride, carbonate of lime, magnesium sulphate, chlorides of potassium and magnesium, chloride of lithium, bromide and iodide of sodium, and carbonate of iron. This water quickens the circulation and stimulates the secretions of the mucous membranes generally, but especially those of the alimentary canal. It has been imitated in *Artificial Kissingen* or *Rakoczy water*.

Kite'tail plug. Tampon made by tying pieces of cotton or cloth to a string at intervals, similar to a kite-tail, used to control uterine hemorrhage.

Kiwisch's method, ke'wish's meth'ud. Use of hot vaginal injections to induce premature labor.

Klaprothii sulphas, klap-roth'e-e sul'phas (after Klaproth, the German chemist). Cadmii sulphas.

Klaprothium sulphuricum, klap-roth'e-um sul-fu're-kum. See *Cadmii sulphas*.

Kleidarthrocace, kleid-arth-rok'as-e (*kleis*, clavicle, *arthron*, joint, *kakos*, evil). Dislocation of the clavicle.

Kleptomania, klep-to-man'e-ah (*klepto*, to steal). Mania or insanity with irresistible propensity to steal.

Klikuschi. Hysterical or hystero-epileptiform endemico-epidemic of women of Kursk and Orel, resembling acute mania.

Klinocephalia, klin-o-sef-al'e-ah. Clinocephalia.

Klinocephalic, kli-no-sef-al'ik. Clinocephalic.

Klip'das. See *Hyrax Capensis*.

Klo'nus. Clonus.

Klopemania, klo-pe-man'e-ah (*klope*, theft). Kleptomania.

Knead'ing Shampooing; a form of massage.

Knee. Genu. **K., cham'bermaid's**, K., housemaid's. **K. of cor'pus callo'sum**, genu of corpus callosum. **K., encir'cled hoof**, crusta genu equinæ. **K., house'maid's**, inflammation of the bursa in front of the patella; apt to inflame and enlarge from effusion in those in whom it is subjected to much pressure; hence its name. It is a form of capsular rheumatism.

Knee-cap. Patella.

Knee-clo'nus. Knee-jerk; knee-phenomenon; patellar reflex; patellar-tendon reflex. See *Reflex*.

Knee-el'bow post'ure. Position upon the elbows and knees resorted to for purpose of examination and treatment.

Kneeholly, ne'hol-le. Roscus.

Knee-jerk, ne'-jerk. Produced by tapping the quadriceps or patellar tendon while the leg is hanging loosely over the opposite knee; it is increased during certain conditions of the nervous system, and diminished or absent in others; knee-clonus.

Knee-joint, ne'-joint. Genu.

Knee-pan, ne'-pan. Patella.

Knee-phenom'enon. Knee-jerk.

Knee-scab, ne'-skab. Crusta genu equinæ.

Knidosis, nid-o'sis. Cnidosis.

Knife. Cutting instrument used in surgery to divide the soft parts, differing from the bistoury or scalpel in being usually larger. The most common knives are the following: **K., Adams's**, K. for operation on the iris, with straight edge and oblique point. **K., amputa'tion**, this is the largest knife used in surgery; formerly it was curved, now it is straight, and provided with one or two edges. **K., cat'aract**, such a knife is intended to perform the section of the transparent cornea, and is so shaped as to exactly fill the small wound made by it, and thus to prevent the discharge of the aqueous humor until the section is completed; a cutting instrument—a picker or cystitome—is also employed for opening the capsule. **K., Ches'elden's**, knife with a fixed handle, very convex on its edge, concave on the back, used by Cheselden in lithotomy. **K., cor'nea**, cataract knife used for section of cornea. **K., crook'ed**, a knife crooked and concave on its cutting edge; formerly employed in amputation of the limbs. **K., crotch'et**, a steel instrument composed of a round staff furnished with a handle at one extremity, and at the other with a curved knife; formerly used to cut to pieces monstrous fœtuses in utero, and to open the head when necessary. **K., double-edged**, *Catling;* a knife the blade of which is straight and sharp on both sides; used for disarticulating bones and for cutting the soft parts between the bones in amputation of the leg

and forearm. **K., Fer'gusson's,** knife used in operation for cleft palate, having edge at acute angle. **K., her'nia,** curved bistoury for division of constriction in strangulated hernia. **K., iridec'tomy,** knife with triangular blade for incision of the cornea in this operation. **K., lentic'ular,** instrument used in the operation of trepanning for removing inequalities in the inner table of the skull left by the crown of the trephine around the opening made by it. Is formed of a lenticular button fixed at the extremity of an iron staff; convex on one side, flat on the other; sharp at both edges, and mounted on an ebony handle. **K., lith-ot'omy,** large knife, the narrow blade of which, four inches in length, sharp in its whole extent, and at an obtuse angle with the handle, was used in the lateral operation. **K., pol'ypus,** polypotome. **K., root'-cutting,** in pharmacy a knife by which roots and other ligneous matters are divided in pharmaceutical processes. **K. en serpette,** knife of the shape of a serpette or pruning-knife, invented by Desault for dividing the bony paries of the maxillary sinus to extract fungi from it. **K., Von Graefe's,** long slender knife used by Von Graefe particularly in senile cataract.

Knifesman, nifes'man. One who is addicted to operating in almost all cases, or who is not a conservative surgeon.

Knit'ting. Process of repair of fractured bone.

Knob'weed. Collinsonia centaurea.

Knock-kneed, nok'-need. Genu valgum; entogonyancon.

Knot. Tubercle. **K., clove-hitch,** see *Clove-hitch.* **K., germ** or **lymph,** local enlargements in lymphatic glands, indicating increased cell-action. **K., Pack'er's,** compressive bandage used for arresting hemorrhage from the temporal artery or its branches, made with a double-headed roller, five ells long; is called by some surgeons *solar* or *oblique chevestre* or *capistrum.* **K., Staf'fordshire,** knot for tying pedicles, a combination of loop and reef-knot. **K., sur'geon's,** double knot made by passing the thread twice through the same noose; used frequently in ligation of arteries, the umbilical cord, etc.

Knotberries, not'ber-rees. Rubus chamæmorus.

Knotgrass, not'grass. Polygonum aviculare.

Knotroot, not'root. Collinsonia Canadensis.

Knotweed, not'weed. Collinsonia Canadensis. Polygonum aviculare.

Knowltonia (nole-ton'e-ah) **grac'ilis** (after Knowlton of the botanic garden at Eltham, Eng.). Nat. ord. Ranunculaceæ. Grows in S. Africa; has same properties as K. rigida, leaves and roots of which are used as substitute for cantharides. Acrid plant of S. Africa, used by Cape colonists as a blister in rheumatism.

Knuck'le. Prominence produced by flexion of a finger; loop of intestine.

Koch's lymph. Tuberculin; advocated by Koch in hypodermic treatment of tuberculosis and lupus, as a therapeutic method or as a means of diagnosis. See *Bacillus tuberculosis* and *Tuberculin.*

Kœnig's manomet'ric flames. Flame pictures characteristic of the vowels, and varying with the pitch of the voice, produced in a revolving mirror by vibrations of the voice against a membrane.

Kohl salat (cabbage salad). Coldslaw.

Koinomiasmata, koi-no-me-as'mat-ah (*koinos,* common). See *Miasm.*

Ko'kum. Garcinia purpurea. **K. but'ter,** see *Garcinia purpurea.*

Kola, ko'lah. Cola acuminata. **K. acumina'ta,** Cola acuminata. **K., fe'male,** Cola acuminata. **K. nut,** nut of Garcinia kola or Sterculia acuminata; see *Cola.*

Kolerus, kol'er-us. Dry ulcer.

Kollerism (kol'ler-izm) or **Kollerization,** kol-ler-i-za'shun. Production of anæsthesia by cocaine, so called after Koller, who is credited with early advocacy of it.

Kollonema, kol-lo-na'mah (*kolla,* glue, *nema,* tissue). Myxoma.

Kolotyphus, kol-o-ti'fus. Typhoid fever.

Kolpocystocele, kol-po-sis-to-se'le (Eng. kol-po-sis'-to-seel). Prolapse of the bladder into the vagina.

Kolpodesmorrhaphy, kol-po-des-mor'rhaf-e (*kolpos,* vagina, *desmos,* bond, *rhaphe,* seam). Partial closure by suture of the labia majora; colporrhaphy.

Kolpoecpec'tasis. Dilatation of the vaginal canal.

Kolpohysterectomy, kol-po-his-ter-ek'to-me. Vaginal hysterectomy.

Kolpokleisis, kol-po-kli'sis (*kolpos,* vagina, *kleio,* to shut up). Operation for obliteration of the vagina by paring the mucous surfaces and bringing them together by suture.

Kolpoperineoplasty, kol-po-per-in-e'o-plas-te (*kolpos,* vagina, *perineum, plasso,* to form). Operation for the cure of complete prolapse of the uterus.

Kolporraphy (kol-por'ra-fe) or **Kolpor'rhaphy** (*kolpos,* vagina, *rhaphe,* suture). Elytrorrhaphy; colporraphy. Operation of closing the vagina by suture.

Kolpostenotomy, kol-po-sten-ot'o-me (*kolpos,* vagina, *stenos,* narrow, *tome,* incision). Incision for stricture or atresia of the vagina.

Kolpotomy, kol-pot'o-me (*kolpos,* vagina, *tome,* incision). Incision into the vaginal wall. Elytrotomy; laparo-elytrotomy.

Kol'to. Plica.

Komma bacillus, kom'mah bas-il'lus. Cholera bacillus. See *Spirillum choleræ Asiaticæ.*

Kooch'la-tree. Strychnos nux vomica.

Koor'chee. See *Nerium antidysentericum.*

Koos'so. Hagenia Abyssinica.

Kooyah root. See *Valeriana.*

Kopio'pia or **Kopyopia,** kop-e-op'e-ah. Fatigue of vision; weakness of sight.

Kopp's asth'ma. Thymic asthma; spasm of the glottis.

Kordellestris syphilitica, kor-del-les'tris sif-il-it'-ik-ah. Caroba.

Ko're and **Ko'ro** (*kore,* pupil). For words commencing with this prefix, as *Korectomy, Koredialysis, Koreplastice, Korotomy,* etc., see corresponding words beginning with C, as *Corectomy,* etc.

Kor'is. Cimex.

Koros'copy. Retinoscopy.

Koryza, ko-ri'za. Coryza.

Ko'sin. Crystalline substance derived from kousso flowers; used as a tæniacide.

Kos'mos. See *Acosmia.*

Kos'sein. Yellowish amorphous bitter powder from Hagenia Abyssinica, used as a substitute for kousso.

Kos'so. Hagenia Abyssinica.

Koumis (koo'mis), **Kou'mish, Kou'miss,** or **Kou'-myss.** Kumyss.

Kous. See *Valeriana.*

Koussin (koos'sin) or **Kous'sine.** See *Hagenia Abyssinica.*

Kous'so. Brayera.

Krame'ria (after Kramers, German botanists). *Rhatany, Ratanhy.* Nat. ord. Polygaleæ; is a native of Java; root has a bitter taste, and is astringent, diuretic, and detergent. Dose, gr. x-xx. Krameria (Ph. U. S. and Br.) is the root of K. triandra and K. tomentosa. **K. ixi'na,** ratanhy of the Antilles, has similar virtues; Savanilla ratanhy is from the same plant. **K. trian'dra,** krameria.

Krania, kra'ne-ah. See *Cornu mas.*

Kraurosis, kraw-ro'sis (*krauros,* dry). Atrophy, dryness, shrivelling, as of mucous membrane of the vagina.

Krause, cor'puscles of. Terminal nerve-corpuscles, similar to those of Pacini, met with in the conjunctiva, genitals, etc. **K., end-bulbs of,** K., corpuscles of.

Kreasoton, kre-as-o'ton. Creasote.

Kreatic nausea, kre-at'ik naw'she-ah. See *Nausea.*

Kreatine, kre'at-in. Creatine.

Kreatinine, kre-at'in-een. $C_4H_7N_3O$. See *Creatine.*

Kreatophagous, kre-at-of'a-gus (*kreas,* flesh, *phago,* to eat). Carnivorous.

Kreosoton, kre-o-so'ton. Creasote.

Kre'sol. Substance found in urine in two forms, ortho- and para-kresol.

Kresylic (kres-il'ik) **acid.** See *Carbolic acid, impure.*

Kretinismus, kre-tin-iz'mus. Cretinism.

Krinosin, krin'o-sin. Nitrogenized fatty substance of the brain.

Krön'lein's her'nia. Preperitoneal inguinal hernia.

Kryptophanic (krip-to-fan'ik) **ac'id.** Acid found in urine.

Krystalline, kris'tal-line. See *Crystalline.*

Kua kaha. Curcuma longa.

Küchenmailer's scis'sors. Instrument with a probe-pointed and sharp blade for division of the cervix.

Kuh'nia eupatorioï'des. Hog-weed, fallow-weed, of the U. States, employed in diarrhœa, dysentery, colic, dyspepsia, etc.

Kujawah. Conveyance in India for transportation of the sick and wounded.

Kukui oil. See *Aleurites triloba.*

Kumbecephalic, kum-be-sef-al'ik (*kumbe,* canoe, *kephale,* head). Boat-shaped head.

Kumiss (ku'mis), **Ku'myss, Kou'myss, Kou'mis, Ki'mis,** or **Kou'miss.** Beverage resembling sour buttermilk, without being greasy; originally prepared in Tartary from mare's milk, which is allowed to stand for some days in a leathern churn till it becomes sour, and is then bottled for use. It is employed in complaints arising from feeble digestion, and is rather nutritious than exhilarating; but from the same material the Burats and the Kirghez prepare an intoxicating spirit called *aracu,* in which they indulge to excess. Kumiss is manufactured in the United States by fermenting cow's-milk with yeast and grape-sugar, and is used as a food in wasting diseases and in affections of the kidney.

Kunaree. Nerium odorum.

Kuri'dah oil. Purgative and anthelmintic oil, seeds of Carapa Guianensis.

Kurung oil. Oil expressed from Pongamia glabra, used in parasitic diseases.

Kussander, kus-san'der. Convolvulus panduratus.

Küss'maul's coma. Coma, jactitation, rapid heart, and dyspnœa, occurring during death in diabetes, as described by Küssmaul. **K.'s disease,** acute atrophic spinal paralysis.

Kutubuth. Arabic name for a species of melancholy in which the patient is never quiet at any one place. See *Cuttubuth.*

Kwass. Fermented liquor made from oatmeal.

Kwoso, kwo'so. Hagenia Abyssinica.

Ky'anal. Aniline.

Ky'anized. Placed in bichloride of mercury for preservation; named after Kyan, the originator.

Kyanosis, ke-an-o'sis. Cyanopathy.

Kyaput'ty. Caieput.

Kyesteïne, ki'es-te-een. Kiesteine.

Kyestinic, ki-es-tin'ik. Kiestinic.

Kyklitis, kik-le'tis (*kuklos,* circle). Cyclitis.

Kyllopodia, kil-lo-pod'e-ah (*kullos,* crooked, *pous,* foot). Kyllosis; club-foot.

Kyllosis, kil-lo'sis (*kullos,* crooked, lame). Congenital distortion of the feet, *Clubfoot, Poltfoot, Stumpfoot, Talipes.* Of this there are many varieties. In one the foot, instead of resting on the soil by the whole plantar surface, touches it only with the metatarsophalangian articulations; it seems as if turned backward and broken upon the leg; *Pes* or *Talipes equinus, Hippopus, Oxypodia, Tipfoot, Horsefoot.* In other cases the foot is twisted inward, *Varus, Talipes varus, Blæsopodes, Blæsopus, Cylloepus, Cyllopoda, Cyllopodion, Loripes, Crossfoot,* so that it rests only on the ground on its outer edge; or it may be twisted outward, *Valgus, Talipes valgus, Outbow foot,* or rest only on its inner edge or on the back part of the heel, *Talipes calcaneus, Heel clubfoot;* in the *Flatfoot* or *Splayfoot, Duckfoot, Pes planus, Splatfoot, Talipes equino-valgus, Spurious valgus, Sarapus, Platypus, Platypodia,* the plantar surface of the foot is flattened instead of being concave.

These deformities are rarely accidental, are almost always congenital, and may be rectified, at an early period, by proper mechanical means to strengthen the foot gradually and restore its proper shape and direction; if these means fail, the tendons and muscles concerned in the deformity may be divided. A similar affection of the hand is called *Club-hand, Manus curta.*

Club or *Clubbed fingers* are also met with, and a condition of the penis has been described which has received the name of *Club* or *Clubbed penis.* See *Penis.*

Kymograph (ki'mo-graf) or **Kymographion,** ke-mo-graf'e-on (*kuma,* wave, *grapho,* to describe). Wave describer or measurer, self-registering, and exhibiting the relation between the waves of the pulse and the undulations produced by respiration.

Kymoscope, ki'mo-skope (*kuma,* wave, *skopeo,* to see). Apparatus for examining and registering pulsations.

Ky'na. Pastinaca opoponax.

Kynu'ric ac'id. Acid found in dog's urine.

Kyphosis, ke-fo'sis. Cyphosis; posterior curvature of the spine. **K. inflammato'ria,** vertebral disease. **K. paralyt'ica,** vertebral disease.

Kyphoskoliosis, ke-fos-ko-le-o'sis (*kuphos,* gibbous, *skolios,* crooked). Gibbosity of the spine.

Kystein, ki'stien. Kiesteine.

Kysthitis, kis-the'tis (*kusthos,* vagina). Inflammation of the vulva and of the mucous membrane of the vagina.

Kysthoptosis (kis-thop-to'sis) or **Kysthopropto'sis** (*kusthos,* vagina, *pipto,* to fall). Prolapse or inversion of the vagina.

Kystis, kis'tis. Cyst.

Kystotome, kis'to-tome. Cystitome.

Kystotomy, kis-tot'o-me. Cystotomy.

Kyttarrhagia, kit-tar-rhaj'e-ah (*kuttarion,* alveolus, *rhago,* to break forth). Discharge of blood from an alveolus.

L.

L. Abbreviation of Left and of Libra, a pound.

Labarium, lab-ah're-um (*labor*, to fall). Looseness of the teeth.

Labarraque's solu'tion. Solution of chlorinated soda.

Labdacism, lab'da-sizm. Lallation.

Labdamen, lab-dah'men. Cistus creticus.

Labdanum, lab-dah'num. See *Cistus creticus*.

Labe, lah'be (*labe*, act of grasping). Invasion. First paroxysm of fevers.

Labeo, lah'be-o. Inflammatory swelling of the lip; one having thick lip.

Labes, lah'bees. Inflammatory swelling of the lips; macula.

Labia (lah'be-ah) (pl. of **Labium**) **cer'ebri.** Edge of cerebral hemispheres projecting over corpus callosum. **L. cun'ni,** lips of the vulva. **L. exter'na,** lips of the vulva; labia majora. **L. inter'na** or **mino'ra,** nymphæ; labia minora. **L. majo'ra,** lips of the vulva. **L. o'ris,** lips. **L. puden'di,** lips of the vulva. **L. puden'di mino'ra,** nymphæ. **L. u'teri,** lips of the cervix uteri.

La'bial (*labium*, lip). Relating or appertaining to the lips or the labia. **L. ar'tery,** the facial artery of the majority of anatomists, has had this name given to it. The labial arteries, properly so called, coronary arteries of the lips, are two in number: the superior arises from the facial, above, and very close to, the commissure of the lips, is large and tortuous, and distributed to the upper lip; the inferior arises from the facial, at a considerable distance from the commissure, and proceeds in a serpentine course into the substance of the lower lip, to which it is distributed. **L. bone,** small bone in the fœtus between the superior maxillary bone and the intermaxillary bone. **L. glands,** a multitude of mucip-arous follicles, round, prominent, and separate from each other, found on the inner surface of the lips below the mucous membrane. **L. veins** are distinguished, like the arteries, into superior and inferior, which open into the facial vein, a division of the internal jugular.

Labialis, lab-e-al'is. Orbicularis oris.

La'bials. Sounds of certain consonants as made by the lips.

Labidometer (lab-id-om'et-ur) or **Labimeter,** lab-im'et-ur (*labis*, forceps, *metron*, measure). Scale adapted to the handles of the forceps, indicating the distance of the blades from each other when applied to the head of the child *in utero*.

La'bile (*labor*, to fall off). Term in electricity applied to a current which is passing and touches the skin in a sensitive place, as over the course of a nerve.

Labio-dentals, la'be-o den'tals (*labium*, lip, *dens*, tooth). Sounds produced by approximation of the upper teeth and lower lip.

Labio-glosso-laryngeal, la'be-o-glos'so-lar-in-je'al. Relating to lip, tongue, and larynx.

Labio-glosso-pharyngeal, la'be-o-glos'so-far-in-je'al. Relating to lip, tongue, and pharynx.

Labio-mental, la'be-o-men'tal. Relating to lip and chin.

Labio-nasal, la'be-o-na'sal. Relating to lip and nose; applied to sounds produced by them together.

Labio-palatine, la'be-o-pal'at-ine. Relating to lips and palate.

Labioplastic, la-be-o-plas'tik. Relating to the formation of a new lip, as an operation for such purpose.

Labiotenaculum, la-be-o-ten-ak'u-lum. Tenaculum for seizing the lip in hare-lip operation.

Labis (lab'is). Forceps.

Labitome, lab'e-tome (*labis*, forceps, *tome*, incision). Cutting forceps; cephalotome.

Labium, lab'e-um. Lip. **L. lepori'num,** hare-lip. **L. tympan'icum,** free margin of the osseous lamina of the cochlea; the labium vestibulare being a sharp margin of the denticula lamina overhanging the labium tympanicum. **L. ure'thræ,** lateral edges of meatus urinarius. **L. u'teri,** outermost margin of cervix uteri. **L. vestibula're,** see *L. tympanicum*.

Lab'lab. Dolichos.

La'bor. Parturition. **L., breech,** labor in which breech presents. **L. chair,** obstetric chair; chair in which a parturient woman is placed during delivery. **L., com'plicated,** see *Parturition*. **L., dif'ficult,** dystocia. **L., dry,** labor neither preceded nor attended with discharge of liquor amnii. **L., foot'ling,** labor in which the foot presents. **L., forced,** see *Parturition*. **L., impracticable,** see *Parturition*. **L., inert',** see *Inertia of the womb*. **L., instrument'al,** labor assisted by instruments. **L., labo'rious,** see *Laborious*. **L., metastat'ic,** labor in which the uterine and other muscular force is temporarily suspended, the nervous power seeming to be directed in other channels. **L., missed,** uterogestation, in which, through want of parturient action, the fœtus is retained in utero beyond the ordinary term. **L., mor'bid,** dystocia. **L., multip'arous,** labor at birth of several children at a time. **L., nat'ural, nor'mal,** or **physiolog'ical,** labor easily accomplished without accident or bad result. **L. pains,** see *Pains*. **L., pow'erless,** see *Parturition*. **L., precip'itate,** see *Parturition*. **L., pre'mature,** parturition (premature). **L., preternat'ural,** parturition in a preternatural state; see *Parturition*. **L., show,** see *Parturition*. **L., ver'tex,** L. in which the vertex presents.

Labo'rans (*labor*, disease). Sick.

Laboratorium, lab-o-rat-o're-um. Laboratory. **L. chym'icum** or **pharmaceu'ticum,** see *Pharmacopœia*.

Laboratory, lab'or-at-o-re (*laboro*, to work). Workshop; place for preparing chemical or pharmaceutical products, etc.

Laboriosus, lab-o-re-o'sus. Laborious; sick.

Laborious, la-bo're-us (*labor*, labor or difficulty). Delivery is laborious when attended with more difficulty and suffering than usual. Labor requiring the use of instruments. See *Dystocia* and *Parturition*.

Labrisulcium, lab-re-sul'she-um (*labrum*, *sulcus*, furrow). See *Cheilocace* and *Stomacace*.

La'brum. Lip; upper lip of mammal. **L. cer'ebri,** infundibulum of the brain.

Labrusca, lab-rus'kah. Bryonia alba.

Laburnum, lab-ur'num. Cytisus laburnum.

Labyrinth, lab'ir-inth. Place full of turnings, the exit of which is not easily discoverable. Aggregate of parts constituting the internal ear, *Labyrinthic cavity of the ear*. It is situate between the tympanum and meatus auditorius internus, and is composed of several cavities communicating with each other in the dried bone, as the vestibule, cochlea, semicircular canals, etc. The *bony* or *osseous labyrinth* is lined by periosteum, and also by a pulpy membrane constituting the *membranous labyrinth*, *Labyrinthus membranaceus*, on which the auditory nerve is regularly dispersed. This membrane forms two sacs in the vestibule, called *sacculus vestibuli* and *sacculus* respectively, resembling in shape that of the bony cavities containing them. Each sac contains calcareous matter, constituting the *otoliths* or *earstones* and *otoconia* or *eardust*. When the sac is laid open, upon the upper and outer part a partition appears, partaking of the nature of the sac, and called by Meckel *septum vestibuli nervoso-membranaceum*. The term *Labyrinth* is also applied to the lateral portions of the ethmoid bone, formed of large irregular cells. **L., bo'ny,** see *Labyrinth*. **L., ethmoid'al,** lateral masses of ethmoid bone. **L. of kid'ney,** cortical substance around uriniferous tubules. **L., mem'branous,** see *Labyrinth*. **L., olfac'tory,** L., ethmoidal. **L., os'seous,** see *Labyrinth*.

Labyrinthal (lab-ir-inth'al), **Labyrinthic** (lab-ir-

inth'ik), or **Labyrinth'ius.** Relating or appertaining to the labyrinth. **L. cav'ity of ear,** labyrinth.

Labyrinthus, lab-ir-in'thus. Labyrinth. **L. au'ris in'timæ,** see *Labyrinth.* **L. du'rus,** *see Labyrinth.* **L. ethmoïda'lis,** labyrinth, ethmoidal. **L. membrana'ceus** or **mol'lis,** see *Labyrinth.* **L. os'seus,** see *Labyrinth.* **L. pu'bicus** or **pudenda'lis,** pudendal plexus.

Lac. Lacca; laqueus; milk. **L. ammoni'aci,** mistura ammoniaci. **L. amyg'dalæ,** emulsio amygdalæ. **L. asafœt'idæ,** mistura asafœtidæ. **L. a'vis,** albumen ovi. **L. bovi'num** or **bu'bulum,** cow's milk. **L. capri'num,** goat's milk. **L. concre'tum,** condensed milk. **L. equi'num,** mare's milk. **L. fermen'tans,** kumyss. **L. fœmin'eum,** woman's milk. **L. guai'aci,** mistura guaiaci. **L., gum,** lacca. **L. hirci'num,** goat's milk. **L. ma'ris,** sperm. **L. plas'ter, antisep'tic,** see *Plaster, lac.* **L. pres'sum,** curd. **L. pri'mum puer'peræ,** colostrum. **L., seed,** lacca. **L., shell,** lacca. **L., stick,** lacca. **L. sul'phuris,** sulphur præcipitatum. **L. ter'ræ,** magnesii carbonas. **L. virgina'le** or **vir'ginis,** virgin's milk.

Lacca, lak-kah (*lakah,* Arab.). *Stick, Gum, Seed,* or *Shell lac.* Substance formed by an insect, deposited on different species of tree, chiefly in the East Indies; for example, on Croton lacciferum and two species of Ficus—F. religiosa and F. Indica. When melted it is called *shell-lac.* Lac was at one time used as a tonic and astringent, and still forms part of dentifrices.

Lacerated, las'er-a-ted (*lacero,* to tear). Torn, as a lacerated wound.

Laceration, las-er-a'shun (*lacero,* to tear). Rupture. Act of tearing or rending; breach made by tearing or rending, as lacerated wound. Laceration is practised by surgeons in a special operation for cataract, in which the opening is widened by laceration of its sides. Laceration is also practised subcutaneously with a needle or tenotome applied to vascular growths.

Lacerator, las'er-a-tor. Instrument employed for laceration.

Laceratura, las-er-at-u'rah. Lacerated wound.

Lacerta, lah-ser'tah. Lizard. **L. a'gilis,** European sand-lizard, formerly used in skin diseases, cancerous and venereal affections. The powdered bones are now used in India, being regarded as a stimulant and aphrodisiac. **L. aquat'ica,** see *Ectozoa.*

Lacerti (lah-ser'te) (pl. of **Lacertus,** muscle) **cor'dis.** Columnæ carneæ. **L. musculo'rum,** see *Muscular fibre.*

Lacertosus, lah-ser-to'sus. Muscular.

Lacertuli cordis, lah-ser'tu-le kor'dis (dim. of **Lacertus**). Columnæ carneæ.

Lacertulus, lah-sert'u-lus (dim. of **Lacertus**). Small muscle.

Lacertus, lah-ser'tus. Brachium; muscle. See *Muscular fibre.* **L. fibro'sus,** semilunar fascia.

Lacerum, las'er-um (*lacer,* torn). Anything torn or appearing as if torn. **L. fora'men ante'rius,** irregular opening formed by the sphenoid, occipital, and petrous portion of the temporal bone, closed by cartilage, and forming a kind of fontanelle, situated at the termination of the petro-occipital suture. **L. fora'men poste'rius** is formed by the occipital bone and the inferior edge of the petrous portion of the temporal bone. Through it the internal jugular vein, the eighth pair of nerves, and accessory nerve pass out of the cranium. **L. fora'men supe'rius,** sphenoidal fissure.

Lachanon, lak'an-on (*lachaino,* to dig). Potherb; vegetable used as food.

Lachesis, lak'es-is. Genus of reptiles, *Viperinæ;* greenish poison obtained from fangs of snake in Brazil, and having a place in the homœopathic materia medica. **L. pic'ta,** see *Arrow-poison.* **L. rhombea'ta,** *Flammon;* poisonous serpent common in the lower forests of Peru.

Lachnanthes tinctoria, lak-nan'thees tink-to're-ah (*lachne,* wool, *anthos,* flower). *Redroot;* indigenous; astringent and tonic. Used in phthisis.

Lach'ryma. Tear. See *Vitis vinifera.*

Lach'rymal. Lacrymal.

Lachryma'tion. Lacrymation.

Lacinia, las-in'e-ah. Hem or fringe.

Laciniæ (las-in'e-e) (pl. of **Lacinia**) **tuba'rum Fallo'pii.** Fringes of Fallopian tube. See *Tube, Fallopian.*

Laciniated, las-in'e-a-ted (*lacinia,* fringe). Fringed, as the laciniated extremities of the Fallopian tubes.

Lacmus, lak'mus. Lichen roccella. **L. tincto'rius,** lichen roccella.

Laconicum, la-kon'ik-um (used by the Lacones or Lacedæmonians). Vaporarium. See *Stove.*

Lacrima (lak're-mah), **Lacruma** (lak'ru-mah), or **Lacryma,** lak're-mah. Tear. See *Vitis vinifera.*

Lacrimatio, lak-re-mah'she-o. Lacrymatio. **L. sanguin'ea,** see *Dacryhæmorrhysis.*

Lacrimation, lak-re-ma'shun. Lacrymatio.

Lac'rimatome. Lacrymatome.

Lacrymal, lak're-mal. Relating to tears. **L. appara'tus,** see *Lacrymal passages.* **L. ar'tery** proceeds from the ophthalmic and distributes its principal branches to the lacrymal gland. **L. bone,** unguis os. **L. canal'** or **duct,** *Nasal canal* or *duct,* is formed by the superior maxillary bone, os unguis, and os turbinatum inferius, and is seated in the outer paries of the nasal fossæ. It transmits the tears which have been absorbed at the great angle of the eye by the puncta lacrymalia into the nasal fossæ. **L. car'uncle,** caruncula lacrymalis. **L. cyst,** see *Dacryops.* **L. duct,** lacrymal canal. **L. fos'sa,** slight depression at the upper part of the orbit, lodging the lacrymal gland. **L. gland,** this is seated in a depression of the frontal bone at the upper, anterior, and outer part of the orbit. It is about the size of an almond, of oval shape, flattened above and below, and composed of several small lobules, and consists of two distinct parts, the *orbitar*—glandula lacrymalis superior or orbitaria—situated in the lacrymal fossa, and the *palpebral*—glandula lacrymalis inferior or accessoria or palpebralis—enclosed in the substance of the upper eyelid. This gland has seven or eight excretory ducts opening behind the upper eyelid. It secretes the tears and pours them on the globe of the eye by the excretory ducts. **L. groove,** bony channel lodging the lacrymal sac, seated at the anterior and inner part of the orbit, and formed by the os unguis and the ascending process of the upper jaw-bone. **L. her'nia** or **tu'mor** occurs when the tears enter the puncta, but cannot pass to the nose, and accumulate; by Anel called dropsy of the lacrymal sac. **L. mus'cle,** tensor tarsi. **L. nerve,** smallest of the three branches formed by the ophthalmic nerve, distributed particularly to the lacrymal gland and upper eyelid; in its course giving off a sphenomaxillary and a malar filament. **L. papil'la,** see *Lacrymal puncta.* **L. pass'ages,** organs concerned in the secretion of tears, in spreading them over the eye, and taking them up again to transmit them into the nasal fossæ. There are the *lacrymal gland, L. caruncle, L. puncta, L. ducts, lacrymal sac,* and *nasal duct,* together forming the lacrymal apparatus. **L. punc'ta, tear puncta,** or **lacrymal points,** two small, round, and contractile openings situated in the centre of a tubercle or papilla, papilla lacrymalis, tuberculum lacrymale, near the inner commissure of the eyelids, and continuous with the lacrymal ducts. These ducts—lacrymales canaliculi, canales or ductus lacrymales, ductus lacrymales laterales or punctorum lacrymalium, cornua lacrymalia or limacum, colliciæ punctorum lacrymalium, canaliculi limacum—are two in number, a superior and an inferior, extending from the puncta to the lacrymal sac. They are formed by a delicate prolongation of the conjunctiva, which is continuous with the mucous membrane of the lacrymal sac, the saccus or sinus or lacus lacrymalis, dacryocystis, infundibulum lacrymale. **L. sac,** see *Lacrymal puncta.* **L. tu'bercle,** see *Lacrymal puncta.* **L. tu'mor,** L. hernia. **L. veins** accompany the artery of the same name, and open into the ophthalmic and palpebral veins.

Lacrymalis, lak-re-mal'is. Lachrymal.

Lacrymatio, lak-re-mah'she-o. Lacrymation.

Epiphora. Profuse secretion of tears from any cause; weeping. **I. sanguin'ea,** flow of bloody tears.

Lacrymation, lak-re-ma'shun. Lacrymatio. **L., sanguin'eous,** flow of bloody tears.

Lacrymatome (lak're-ma-tome) or **Lacrymotome,** lak're-mo-tome (*lacryma, tome,* incision). Instrument for cases of stricture or obstruction of the lacrymal glands.

Lacrymine, lak're-meen. Substance discovered in tears. See *Tears.*

Lactagogue, lak'ta-gog. Promoting secretion of milk.

Lactalbumen, lakt-al-bu'men (*lac,* milk, *albumen*). Casein.

Lactans, lak'tans (*lacto,* to give milk). Nursing; suckling.

Lactarium, lak-tar'e-um (*lac,* milk). Food prepared from milk. Milk diet or food.

Lacta'rius. Milky.

Lactas, lak'tas. Lactate, salt of lactic acid.

Lactatic, lak-tat'ik. Influencing the secretion and excretion of milk.

Lactation, lak-ta'shun (*lacto,* to give milk). Production of milk. Suckling; including that by the mother, by another party, by hand, etc. **L. cal'culus,** see *Calculi.*

Lacteal, lak'te-al. Lactic; like milk; lactiferous vessel. **L. sac,** see *Lactiferous vessels.* **L. swell'ing,** lactiferous swelling. **L. tu'mor,** galactocele.

Lacteals, lak'te-als. Chyliferous vessels.

Lactein, lak'te-in. Milk, solidified or condensed.

Lactens, lak'tens (*lacteo,* to suck). Sucking child.

Lacteous, lak'te-us. Lactic.

Lactes, lak'tees. Mesentery, pancreas, small intestines.

Lactescent, lak-tes'sent. Resembling milk.

Lacteus, lak'te-us. Lactic.

Lactic, lak'tik. Lacteal, milky. Appertaining to, or resembling or containing, milk. **L. ac'id,** $C_3H_6O_3$, acidum lacticum (Ph. U. S.), acid of milk, caseic acid. It has been used in atonic dyspesia, being considered one of the gastric acids secreted in health. As a morbid element in rheumatism, see *Rheumatism.*

Lacticans, lak'te-kans (*lac,* milk). Nurse.

Lacticinium, lak-te-sin'e-um. Lactarium.

Lacticus, lak'te-kus. Lactic.

Lactiferous, lak-tif'er-us (*lac, fero,* to carry). Galactophorous or milk-conveying. **L.** or **Lac'teal swell'ing,** tumefaction of the breast, supposed by Sir Astley Cooper to arise from a large collection of milk in a lactiferous tube, the result of chronic inflammation of the tube near the nipple, with closure of its aperture and obliteration of the canal for an inch or more. **L. ves'sels** or **ducts,** galactophorous ducts, excretory ducts of the mammary gland, each of which, running toward the nipple, dilates beneath the areola into an elongated sacculus, the *lacteal sac, receptacle,* or *sinus.*

Lactifuge, lak'te-fuje (*lac, fugo,* to drive away). Medicines which dispel milk.

Lactigo, lak-te'go (*lac,* milk). Porrigo larvalis; crusta lactea.

Lactin, lak'tin. Sugar of milk.

Lactinated, lak'tin-a-ted. Relating or appertaining to lactin or sugar of milk, which, being hard, is used for the division and dilution of substances. Powders thus formed have been called *lactinated powders.*

Lactinia, lak-tin-e'ah (*lac,* milk). Food prepared with milk.

Lactipotor, lak-tip'o-tor (*lac, poto,* to drink). Milk-drinker.

Lactis (lak'tis) **concretio'nes.** Knotty tumors of the female mammæ from accumulation and retention of milk. **L. redundan'tia,** copious or excessive flow of milk. **L. reten'tio,** retention or suppression of milk. **L. sanguinolen'ti excre'tio,** secretion or excretion of blood or blood-like milk.

Lactisugium, lak-te-su'je-um (*lac, sugo,* to suck). Breast-pump.

Lactivorous, lak-tiv'or-us (*lac, voro,* to devour). Using a milk diet exclusively, or nearly so.

Lactobiose, lak-to'be-ose. Galactose.

Lactocele, lak-to-se'le (Eng. lak'to-seel) (*lacto, kele,* tumor. See *Galactocele.*

Lactolin, lak'to-lin. Milk, solidified or condensed.

Lactometer, lak-tom'et-ur (*lac, metron,* measure). Instrument for measuring the quantity of cream in milk.

Lac'tone. Inflammable fluid from dry distillation of lactic acid.

Lactophosphas, lak-to-fos'fas. Lactophosphate, or combination of lactate and phosphate of the same base.

Lactophosphate (lak-to-fos'fate) **of lime.** Calcis lactophosphas.

Lactoprotein, lak-to-pro'te-in. Albuminoid substance precipitated by a solution of nitrate of mercury after removing casein from milk by acetic acid, and the albumen by heat.

Lactoscope, lak'to-skope. Galactoscope.

Lactose, lak'toze (*lac,* milk). Sugar of milk.

Lactoserum, lak-to-se'rum. Whey.

Lactosuria, lak-to-su're-ah (*lactose, ouron,* urine). Urine containing sugar of milk, observed occasionally in pregnant women.

Lactuca, lak-tu'kah (*lac,* milk, so called from its milky juice). *Lettuce, Garden lettuce,* ord. Compositæ. A wholesome salad; the seeds possess a quantity of oil, which, in emulsion, has been advised in ardor urinæ, etc. Lactuca (Ph. Br.) is the flowering herb of L. virosa. **L. Canaden'sis,** Canadian species; laxative. **L. elonga'ta,** see *L. virosa.* **L. florida'na,** Mulgedium floridanum. **L. fœt'ida,** L. virosa. **L. grave'olens,** L. virosa. **L. mari'na,** Fucus vesiculosus. **L. sati'va,** lactuca. **L. scari'ola** possesses a stronger degree of bitterness than L. sativa; it has similar virtues with L. virosa. **L. sylves'tris,** L. scariola. **L. villo'sa,** Mulgedium acuminatum. **L. viro'sa,** *Strong-scented lettuce;* the odor of this plant, the leaves of which are used in medicine, is strongly narcotic, and the taste bitter. They are narcotic, diuretic, and aperient, and have been used in dropsies. The inspissated *Lactucarium* (Ph. U. S.), *Lettuce opium,* resembles in odor and appearance those of opium, and are, like it, narcotic, but uncertain. Dose, gr. j to x, and more. Water distilled from lettuce is used in France as a mild sedative. The active principle, *Lactucin,* has been derived from lactucarium. *L. elongata, Wild lettuce* of the United States, has been employed for L. virosa.

Lactu'carin. Crystalline substance from lactucarium.

Lactucarium, lak-tu-ka're-um. Concrete milk-juice of Lactuca virosa. See *Lactuca.*

Lactucimen, lak-tu'sim-en (*lac,* milk). Aphthæ.

Lactucimina, lak-tu-sim'in-ah. Aphthæ.

Lactucin, lak'tu-sin. See *Lactuca.*

Lactumen, lak-tu'men (*lac,* milk). Porrigo larvalis; strophulus.

Lactumina, lak-tu'min-ah. Aphthæ.

Lacuna, lak-u'nah (dim. of **Lacus,** lake or deep ditch). Fossa or ditch; small cavity in a mucous membrane, the parietes of which secrete a viscid humor; used synonymously with *crypt;* also the external opening of such cavity. In embryology, space between vitellus and vitelline membrane; anterior fontanelle. **L. cer'ebri,** infundibulum of the brain; pituitary gland. **L. cryp'ta,** fontanelle. **L. mag'na,** see *Urethra.* **L. sul'cus** or **sul'culus la'bii superio'ris,** hollow of the upper lip under the nose.

Lacunæ, lak-u'ne (pl. of **Lacuna**). See *Urethra.* **L., absorp'tion,** L., Howship's. **L. of bone,** dark stellate spots, with thread-like lines radiating from them, seen under high magnifying power; first believed to be solid *osseous* or *bone-corpuscles* or *cells, Corpuscles of Purkinje,* but now regarded as excavations in the bone, *Sacculi chalicophori,* with minute tubes or canaliculi proceeding from them, and communicating with the Haversian canals. Lacunæ and canaliculi are fibres concerned in the transit of nutrient fluid through osseous tissue. **L. Graafian'æ,** mucous follicles of the

vagina. **L., Haver'sian,** L. between Haversian lamellæ. **L., How'ship's,** condition in rarefying osteitis, in which the edge of the melting bone-tissue is broken by shallow curves or deeper semicircular excavations, the concavity being outward, between every two of which there is an angular projection of the intervening portion of the bone. **L., intervil'lous,** sinuses of maternal portions of placenta, having free villi suspended in them. **L. Morgagni,** see *Urethra.* **L. muco'sæ,** mucous follicles. **L. muco'sæ vul'væ,** L. Graafianæ. **L. palpebra'rum,** Meibomius, glands of. **L. of the tongue,** foramen cæcum.

Lacunar, lak-u'nar (*laquear,* arched roof or ceiling). Roof of a chamber; hence **L. or'bitæ,** roof of the orbit. **L. ventric'uli quar'ti supe'rior,** valvula Vieussenii.

Lacus lacrimalis, lak'us lak-re-mah'lis. See *Lacrymal puncta.* **L. lacrymalis, lacrima'rum,** or **lacryma'rum** (*lacus,* lake or cistern), small space in the inner angle of the eye between the lids, toward which the tears flow, and at which the triangular canal formed between the closed lids terminates. **L. sanguin'eus,** utero-placental sinus.

Ladanum, lad-an'um. See *Cistus creticus.*

La'dies' man'tle. Alchemilla. **L. slip'per, showy,** Cypripedium spectabile. **L. slip'per, stemless,** Cypripedium acaule. **L. slip'per, yellow,** Cypripedium luteum. **L. smock,** Cardamine pratensis.

Lady Crespigny's (cres-pe'ne's) **pills.** See *Pilulæ aloës et kinæ kinæ.* **L. Hesketh's** (hes'keth's) **pills,** see *Pilulæ aloës et kinæ kinæ.* **L. Webster's** (web'stur's) **pills,** see *Pilulæ aloës et kinæ kinæ* and *Pilulæ aloës et mastiches.*

Ladybird (la'de-burd), **Ladybug** (la'de-bug), or **Ladycow,** la'de-kow. Coccinella septempunctata.

Lady's thumb. Polygonum persicaria.

Lædens, le'dens (*lædo,* to hurt). Anything hurtful or injurious as to the economy.

Læmoparalysis, le-mo-par-al'is-is (*laimos, pharynx*). Paralysis of throat or œsophagus.

Læmoscirrhus, le-mo-skir'rhus (*laimos, pharynx, scirrhus*). Cancer of pharynx or œsophagus.

Læmostenosis, le-mo-sten-o'sis (*læmus, stenosis,* narrowness). Narrowness of pharynx or œsophagus, from inflammation or from malignant disease. **L. scirrho'sa,** scirrhous constriction of the pharynx or œsophagus.

Læmus, le'mus. Pharynx, œsophagus.

Laënnec's cirrho'sis. Atrophic form of cirrhosis.

Læsio, le'ze-o (*lædo,* to hurt). Lesion. **L. contin'ui,** see *Continuity, solution of.*

Lætificantia, le-tif-e-kan'she-ah (*lætifico,* to make glad). Medicines used as cordials, in depression of spirits, etc.

Lævigatio, le-ve-gah'she-o (*lævis,* light, smooth). Levigation.

Lævitas intestinorum, le've-tas in-tes-tin-o'rum (*lævis,* smooth). Lientery; slippery serous surface of peritoneum.

Lævogyre (le'vo-jire) or **Lævogyrous,** le-vo-ji'rus (*lævus,* left, *gyrus,* turn). Possessing the property of turning rays of polarized light to the left.

Lævoro'tatory. Lævogyre.

Lævulin, le'vu-lin. Synarthrose.

Lævulose, le'vu-loze. Levulose.

Lævulosuria, le-vu-lo-su're-ah. Condition of urine in which levulose is detected in it.

La Fayette mix'ture. Compound copaiba mixture, containing copaiba, cubebs, liquor potassæ, sweet spirits of nitre, etc.; used in gonorrhœa.

Lag teeth. Molar teeth.

Lag'avous. Loose or lax.

Lagena, lag'e-na (large earthen vessel). Cochlea of oviparous animals.

Lagentomum, lag-en'to-mum (*lagos,* hare, *tome,* section). Hare-lip.

Lager beer. See *Cerevisia.*

Lagerstræmia (lag-er-stre'me-ah) or **Lagerstrœmia,** lag-er-stre'me-ah (from *Lagerstrœm,* Swede). Genus of Asiatic trees; crape myrtle; Indian lilac. Several species are used: **L. hirsu'ta,** in syphilis; **L. regi'næ** (queen's flower, bloodwood), as an astringent, narcotic, and purgative; **L. specio'sa,** in stomatitis and as a diuretic.

Lagnea (lag-ne'ah), **Lagneia** (lag-ni'ah), or **Lagni'a** (*lagneia*). Coition; satyriasis; sperm.

Lagnesis, lag-na'sis (*lagnes,* lustful). Furor femininus; nymphomania. **L. fu'ror masculi'nus,** satyriasis. **L. salac'itas,** satyriasis.

Lagneuma, lag-nu'mah. Coition; sperm.

Lagnosis, lag-no'sis (*lagnes,* lustful). Satyriasis.

Lagocephalous, lag-o-sef'al-us (*lagos,* hare, *kephale,* head). Having head like a hare.

Lagocheilus, lag-o-ki'lus (*lagos,* hare, *cheilos,* lip). Hare-lip.

Lagones, lag'on-ees. Flanks.

Lagonoponos, lag-on-op'on-os (*lagones, ponos,* suffering). Pleurodynia.

Lagophthalmia (lag-of-thal'me-ah), **Lagophthalmos** (lag-of-thal'mos), or **Lagophthalmus,** lag-of-thal'mus (*lagos,* hare, *ophthalmos,* eye). Hare's eye; vicious arrangement of the upper eyelid, which is so retracted that it cannot cover the globe of the eye during sleep, owing to paralysis of the orbicularis muscle; condition said to be natural in the hare when asleep. Also Geum urbanum.

Lagostoma, lag-os'to-mah (*lagos,* hare, *stoma,* mouth). Hare-lip.

Laguncularia (small flask) **racemosa,** lag-un-kular'e-ah ras-e-mo'sah. White mangrove; white buttonwood of America and Africa; astringent.

Laity, la'it-e (*laos,* people). Formerly, the people as distinguished from the clergy; more frequently, however, employed in the sense of the people as distinguished from those of the learned professions generally. A layman is one of the laity.

Lake'weed. Polygonum hydropiper.

Lalia, lal'e-ah (speech). The voice articulated.

Lallation, lal-la'shun. Lullaby speech; vicious pronunciation, especially that in which the letter *l* is improperly doubled or softened or substituted for *r;* baby talk.

Laloneurosis, lal-o-nu-ro'sis. Neurosis or nervous affection of speech or of the voice.

Lalopathy, lal-op'ath-e (*lalia, pathos,* disease). Defect in speech or in use of the voice.

Lalophobia, lal-o-fo'be-ah (*lalia, phobos,* fear). Stammering, as if from dread of using the voice.

Laloplegia, lal-o-plej'e-ah (*lalia, plege,* stroke). Paralysis of the tongue or of articulated speech.

Lalythrosyne, lal-ith-roz'in-e. Loss of memory.

Lam'ac. Acacia gummi.

Lamarckism, lam'ark-izm (from Lamarck, French botanist). Theory of descent of animal life and of vegetation from a common stock; also opposite theory to that of natural selection.

Lambda, lamb'dah. Greek letter Λ. Point of meeting of sagittal and lambdoid sutures, a guiding-point in some craniometrical examinations.

Lambdacism, lamb'da-sism (from the Greek letter Λ, *lambda*). Lallation.

Lambdoid (lamb'doid) or **Lambdoi'dal** (Λ, *lambda, eidos,* shape, resemblance). Anatomists have given the name **L. su'ture,** *Sutura lambdoïdalis* or *lambdoïdes* or *lambdoïdea* or *proræ,* to the suture formed by the parietal bones and the occipital, because it resembles the letter Λ (*lambda*) of the Greeks, the *occipito-parietal suture.* In this suture the ossa Wormiana are most frequently met with. The denticulations are distinctly marked.

Lambitivum, lam-bit-e'vum (*lambo,* to lick). Linctus.

Lamb'kill. Kalmia latifolia.

Lamb'killer. Andromeda mariana.

Lamb's quar'ters. Chenopodium album.

Lamella, lam-el'lah. Small plate; scab; lamina. **L. carno'sa,** portion of parietal mesoblast. **L. cerati'na,** portion of epiblast. **L. coria'ria,** portion of parietal mesoblast. **L. medulla'ris,** portion of epiblast giving origin to cerebrospinal axes and organs of senses. **L. mesenter'ica,** portion of visceral mesoblast. **L. muco'sa,** portion of hypoblast. **L. plan'a,** planum os. **L. renal'is,** portion of blastoderm giving

origin to kidneys and generative organs. **L. vasculo'sa**, portion of visceral mesoblast.

Lamellæ. Disks. Gelatin disks for ophthalmic use, containing alkaloids, as *L. atropinæ* (Ph. Br.), disks of atropine, each containing $\frac{1}{5000}$ gr. of sulphate of atropine; *L. cocainæ* (Ph. Br.), disks, each containing $\frac{1}{200}$ gr. of hydrochlorate of cocaine; *L. physostigminæ* (Ph. Br.), each containing $\frac{1}{1000}$ gr. of physostigmine. **L., bone**, thin plates forming basis of bony tissue. **L., bronch'ial**, lamellæ or mucous folds of the gills of fishes. **L., cerebel'lar**, laminæ of the cerebellum. **L., concen'tric** or **Haver'sian**, osseous plates around Haversian canal. **L., crib'riform**, lamina cribrosa. **L., invest'ing**, L., concentric. **L., med'ullary**, bony lamellæ constituting wall of medullary cavity of some bones. **L., os'seous**, L., bone. **L., perineu'ral**, L. of areolar tissue around a nerve. **L., trian'gular**, fibrous lamina between choroid plexus of third ventricle.

Lamellar (la-mel'lar), **Lam'ellate**, or **Lam'inated.** Composed of thin laminæ or leaves, as lamellar or laminated tissue; areolar tissue.

Lame'ness. The act of halting or limping. **L., u'terine**, a condition of the lower extremity induced by pressure on the nerves situate within the pelvis.

Lamina, lam'in-ah (a plate). A thin, flat part of a bone, plate, or table, as the cribriform lamina or plate of the ethmoid bone. Lamina and lamella are generally used synonymously, although the latter is properly a diminutive of the former. **L. ax'ilis**, axial plate. **L., Bow'man's**, Bowman's layer. **L. central'is**, folium centrale. **L. choroï'dea**, choroid plexus; septum lucidum. **L. cilia'ris**, ciliary zone; zonula of Zinn. **L. cine'rea**, thin layer of gray substance between corpus callosum and optic chiasm; striatum cinereum. **L. concha'rum**, inner portion of lateral masses of ethmoid bones. **L. connec'tens**, posterior cerebral commissure. **L. cor'nea**, a yellowish band or a thickening of the lining membrane of the ventricle, by which the vena corporis striata is overlaid in the lateral ventricle of the brain; pons Tarini; tænia fornicis. **L. Cor'tii**, membrana tectoria. **L. cribrifor'mis**, cribriform plate of ethmoid. **L. cribro'sa**, portion of sclerotic coat of eye for passage of optic nerve; anterior perforated space; anterior portion of fossula inferior. **L. cribro'sa cer'ebri**, grayish-white lamina in front of anterior extremity of optic tract. **L. cribro'sa me'dia**, middle part of fossula inferior. **L. cribro'sa oc'uli**, L. cribrosa. **L. denta'ta**, fascia dentata. **L. denticula'ta**, a remarkable covering of the outer fifth of the vestibular surface of the osseous zone, called *denticulata* from a beautiful series of teeth forming its outer margin and projecting into the vestibular scala of the cochlea. The *membrane of Reissner*, *membrana vestibularis*, arises from the inner part of the limbus, and extends upward at a considerable angle with the osseous spiral lamina. **L. dermal'is**, L. gastralis. **L., elas'tic**, Bowman describes an anterior and a posterior elastic lamina investing the fibrous part of the cornea, the former transparent, glossy, and structureless, the latter the membrane of Demours or Descemet; see *Aqueous humor*. **L., fibrocuta'neous**, parietal mesoblast. **L., fibrointes'tinal**, visceral mesoblast. **L. fus'ca**, see *Sclerotic*. **L. fus'ca of cho'roid**, see *Choroidea tunica*. **L. gastral'is**, epiblast previous to development of mesoblast. **L. gen'u**, small lamina from genu of corpus callosum forming floor of septum pellucidum; lamina to pituitary body. **L., gray**, L. cinerea. **L. gris'ea**, gray column of spinal cord. **L. mastoï'dea**, basal plate of mastoid process of temporal bone. **L. medulla'ris**, layer of nerve-fibres in embryo which afterward become external layer of cortex of brain; medullary layer of denticular nucleus; valve of Vieussens. **L. medulla'ris triangula'ris cer'ebri**, lyra. **L. modi'oli**, L. spiralis ossea. **L. neuroderma'lis**, epiblast. **L., nu'clear**, nuclear layer. **L., ob'turator**, L. cinerea. **L., ol'ivary**, olivary body. **L. papyra'cea**, planum os. **L. perfora'ta, ante'rior**, locus perforatus anticus. **L. perfora'ta, poste'rior**, see *Tarini, pons*. **L. peritonæ'i exter'na**, outer lamina or fold of the peritoneum. **L. peritonæ'i interna**, visceral layer of same. **L. pigmen'ti**, fine membrane between choroid and retina. **L. pri'ma cu'tis**, epidermis. **L. quadrigem'ina**, gray matter constituting roof of aqueduct of Sylvius. **L. reticula'ris** or **reticula'ta**, see *Corti*. **L. semicircula'ris**, white nervous layer between thalamus opticus and corpus striatum. **L. spiral'is**, a partition between the scalæ of the cochlea. The largest part of this, next the modiolus, is formed of bone. The remainder, or part next the opposite side of the scalæ, is composed of a cartilaginous membrane called by Valsalva *Zona* or *Zonula cochleæ*. By some anatomists the lamina is divided into a Zona ossea and Z. mollis. By others it is considered to consist of four laminæ: Zona ossea, next to the modiolus; Z. coriacea or choriacea or mediana or nervia, on the outer side of this; Z. vesicularis; and Z. membranacea, which is, perhaps, the lining membrane of the cochlea. The middle portion of the membranous zone, between the inner and the outer clear belt, is the portio or zona or habenula pectinata. At the apex of the cochlea the lamina spiralis terminates by a pointed, hook-shaped process, hamulus or rostrum. The crista spiralis is the portion of the tympanal wall of the ductus cochlearis resting on the lamina spiralis, and is continuous with the membrana basilaris. **L. spiral'is membrana'cea**, see *Corti* and *Membrane, basilar*. **L. suprachorioï'dea**, external layer of choroid. **L. tecto'ria**, inferior lemniscus. **L. termina'lis**, L. cinerea. **L. transver'sa**, vermis superior posterior. **L. triangula'ris**, triangular portion of great wing of sphenoid. **L. tympan'ica**, anterior bony wall of tympanum and external auditory meatus. **L., vas'cular**, endochorion. **L. velamento'sa**, see *Corti, organ of*. **L. of ver'tebra**, broad, flat part of its arch; see *Vertebra*. **L. vit'rea**, internal table of skull. **L., vit'reous**, membrane lining interior of choroid coat of the eye.

Lam'inæ arcua'tæ. Arciform fibres. **L. of cerebel'lum**, laminæ of white matter covered with gray matter passing outward from centre of white matter. **L. cran'ii**, tables of the skull. **L. dorsa'les**, dorsal laminæ; two oval masses on each side of the primitive groove of the embryo, which approach to form a groove in which are lodged the future brain and spinal marrow. **L. spongio'sæ na'si**, turbinated bones. **L. ventra'les** or **viscera'les**, thickened prolongations of the serous layer of the germinal membrane, by their union forming the anterior wall of the trunk of the new being. **L. vertebra'les**, vertebral plates.

Laminage, lam-in-azh' (Fr.). Compression of fœtal skull with a view of flattening the head for easy delivery.

Laminar membrane, lam'in-ar mem'brane. See *Membrane, laminar*.

Laminaria (lam-in-ar'e-ah) **con'ica** or **digitata**, dij-e-tat'ah. *Tangle, Sea tangle, Sea girdle, Sea wand, Cairn-tangle, Dead man's toe, Oar weed.* One of the Algæ eaten in Scotland, and hawked about the streets with the pepper dulse. It contains a large amount of iodine. Tents and bougies are made of it, the tents being employed in stricture of the lacrymal passages and to dilate the neck of the uterus. The leaf of a seaweed—species of Laminaria—is employed in the Himalayas under the name of goitre leaf, because chewed by the inhabitants where goitre prevails.

Laminated, lam'in-a-ted. Lamellar or laminar.

Lamina'tion. Condition of being arranged in laminæ or layers. Cutting up the fœtal skull in slices in embryotomy.

Lamine, lam'een. Alkaloid from Lamium album. Hæmostatic. Used hypodermically in form of sulphate.

Laminectomy, lam-in-ek'to-me (*lamina, ektome*, excision). Excision or removal of laminæ of a vertebra.

Laminitis, lam-in-e'tis. Inflammation of a lamina. Acute inflammation of the laminæ of the hoof of lower animals.

Lamium album, lah'me-um al'bum (*lama*, ditch or bog). Dead or white archangel nettle, ord. Labiatæ. Infusions of this plant have been used in uterine

hemorrhage and leucorrhœa. **L. amplexicaul'e,** dead nettle, henbit; naturalized; flowering from May to October; tonic, diaphoretic, and laxative. **L. folio'sum,** L. album. **L. monta'num,** Melittis melissophyllum. **L. Plin'ii,** Melittis melissophyllum. **L. ru'brum,** galeopsis.

Lamprophonus, lam-pro-fo'nus (*lampros,* clear, *phone,* voice). Having a clear, distinct voice.

Lampsana, lamp-san'ah. Lapsana.

Lampyris (lam'pir-is) **noctil'uca** (*lampo,* shine, *oura,* tail). Cicindela.

Lana philosophorum (lan'ah fil-os-o-fo'rum) or **philosophica** (wool of philosophers). Zinci oxidum.

Lanaria, lan-ar'e-ah (*lana,* wool). Saponaria, Verbascum nigrum.

Lancelet, lans'let. Lancet.

Lanceola, lan-se'o-lah. Lancet.

Lanceolate, lan'se-o-late (*lanceola,* small spear). Having the shape of a small spear.

Lancet, lan'set (*lancea,* lance or spear). Surgical instrument used in phlebotomy, scarification, etc., composed of two parts—handle and blade. The handle is made of two small plates of ivory, bone, or shell movable on the blade, for whose preservation they are intended. The blade is formed of well-polished steel. The employment of a lancet for opening abscesses, etc. is called *Lancing.*

Lancinating, lan'sin-a-ting (*lancino,* to strike or thrust through). Species of pain which consists in lancinations or shootings similar to those that would be produced by the introduction of a sharp instrument into the suffering part. In cancer especially this kind of pain is felt.

Lancing, lan'sing. See *Lancet.* **L. the gums,** see *Gum lancet.*

Lancisi (lan-che'se), **nerves of.** Striæ longitudinales. See *Corpus callosum.*

Land'dry's disease or **paralysis.** See *Paralysis, acute ascending.*

Land-scurvy. Purpura hæmorrhagica.

Lanes'sin. Preparation similar to lanolin, derived from wool-fat.

Lan'gerhaus, cells of. Cells of epithelium constituting the simplest forms of terminations of nerves.

Lan'gier's her'nia. Hernia across Gimbernat's ligament.

Lan'guage cen'tre. See *Centre* and *Aphasia.*

Languor, lan'gwor. Faintness; species of atony, depression, or debility, generally coming on slowly.

Laniarii dentes, lan-e-ar'e-e den'tees (*lanio,* to tear). Canine teeth.

Lanoleum, lan-o'le-um. Lanolin.

Lanolin, lan'ol-in (*lana,* wool, *oleum,* oil). Cholesterin fat obtained from sheep's wool; whitish, odorless substance, forming an excellent basis for ointments; it readily passes through the skin.

Lantana, lan-tan'ah. *Sagetree, Blueberry.* Leaves of this indigenous plant form a fine-scented tea, like D. camara, or Bahama tea, and L. pseudothea, or Brazil tea. The tea is used as a diaphoretic; several species of Lantana are employed for their diuretic and diaphoretic effects. From *L. Brasiliensis* the alkaloid *Lantanine* has been obtained, used as an antipyretic.

Lantanine, lan'tan-een. Alkaloid from Lantana Brasiliensis, Yerba santa; antiperiodic and antipyretic.

Lanthopia (lan-tho'pe-ah) or **Lanthopine,** lanth'o-pin (*lanthano,* to remain concealed, *opium*). Alkaloid, $C_{23}H_{25}NO_4$, homologous with papaverine, in white prism. See *Porphyroxin.*

Lanugo, lan-u'go (*lana,* wool). Soft, fine hair on different parts of the body, especially in the young, or in the fœtus from the fifth month; down. **L. pri'ma,** the first beard. **L. pudendo'rum,** pubes. **L. sil'iquæ hirsu'tæ,** see *Dolichos pruriens.*

Lanuvium, lan-u've-um (*lana,* wool). Vulva.

Laos, lah'os. Tin.

Lapactic, lap-ak'tik (*lapazo,* to evacuate). Cathartic, laxative.

Lapagma, lap-ag'mah. Evacuation.

Lapara, lap'ar-ah. Flanks, loins, abdomen; diarrhœa.

Laparectomy, lap-ar-ek'tom-e (*lapara, ektome,* excision). Enterectomy.

Laparenterotomy, lap-ar-en-ter-ot'om-e. Laparoenterotomy.

Laparocatarrhus, lap-ar-o-kat-ar'rhus. Catarrh of the intestines.

Laparocele, lap-ar-o-se'le (Eng. lap'ar-o-seel) (*lapara, kele,* rupture). Lumbar hernia, through separation of the fibres of the quadratus lumborum, and protrusion of the aponeurosis of the transverse muscle on the outside of the mass common to the sacrolumbalis and longissimus dorsi; abdominal hernia.

Laparocholecystotomy, lap-ar-o-kol-e-sis-tot'om-e (*lapara, chole,* gall, *kustis,* bladder, *tome,* incision). Abdominal section to open the gall-bladder.

Laparoclysis, lap-ar-ok'lis-is (*lapara, klusis,* washing out). Washing out the peritoneal cavity.

Laparocolectomy, lap-ar-o-kol-ek'tom-e (*lapara, colon, ektome,* excision). Colectomy. Excision of the colon through the abdominal wall.

Laparocolotomy, lap-ar-o-kol-ot'om-e (*lapara, colon, tome,* incision). Abdominal incision and operation on the colon.

Laparocolpotomy, lap-ar-o-kolp-ot'om-e (*lapara, kolpos,* vagina, *tome,* incision). Laparo-elytrotomy.

Laparocystectomy, lap-ar-o-sist-ek'tom-e (*lapara, kustis,* cyst, *ektome,* excision). Operation by abdominal incision for removal of cystic tumor.

Laparocystidotomy (lap-ar-o-sist-id-ot'om-e) or **Laparocystotomy,** lap-ar-o-sist-ot'om-e. Suprapubic lithotomy. See *Lithotomy.* Laparotomy for removal of extra-uterine fœtus.

Laparo-elytrotomy, lap-ar-o-el-it-rot'om-e (*lapara, elutron,* vagina, *tome,* section). *Gastro-elytrotomy.* Operation for extraction of the fœtus by abdominal incision in cases of deformity. Cæsarean section.

Laparo-enterotomy, lap-ar-o-en-ter-ot'om-e (*lapara, enteron,* intestine, *tome,* incision). Operation of opening the abdomen and intestinal canal for the removal of disease.

Laparogastrotomy, lap-ar-o-gas-trot'om-e (*lapara, gaster,* stomach, *tome,* incision). Gastrotomy.

Laparohysterectomy, lap-ar-o-his-ter-ek'tom-e (*lapara, hustera,* uterus, *ektome,* excision). Operation for removal of the uterus through the abdominal wall.

Laparohystero-oöphorectomy, lap-ar-o-his'ter-o-o-o-fer-ek'tom-e. Cæsarean section; C. hysterectomy; Porro's operation.

Laparohysteropexy, lap-ar-o-hys'ter-o-peks-e (*lapara, hystera,* uterus). Fixation of the uterus by operation, as in prolapsus uteri, that organ being attached anteriorly to the abdominal wall.

Laparohysterotomy, lap-ar-o-his-ter-ot'om-e. Operation on uterus through abdominal wall.

Laparo-ileotomy, lap'ar-o-il-e-ot'om-e (*lapara, ileum, tome,* incision). Operation of opening the ileum by incision through the abdominal wall.

Laparokolpotomy, lap-ar-o-kol-pot'om-e (*lapara, kolpos,* vagina, *tome,* incision). Laparo-elytrotomy.

Laparomyitis, lap-ar-o-me-e'tis (*lapara, mus,* muscle). Inflammation of a muscle of the abdomen.

Laparomyomectomy (lap-ar-o-mi-om-ek'tom-e) or **Laparomyomotomy,** lap-ar-o-mi-om-ot'om-e (*lapara, mus,* muscle, *ektome,* excision, or *tome,* incision). Operation for removal of myoma or muscular tumor by incision through the abdominal wall.

Laparonephrectomy, lap-ar-o-nef-rek'tom-e (*lapara, nephros,* kidney, *ektome,* excision). Excision of kidney by operation through the abdominal wall.

Laparonephrotomy, lap-ar-o-nef-rot'om-e (*lapara, nephros,* kidney, *tome,* incision). Nephrotomy by operation through abdominal wall.

Laparosalpingectomy, lap-ar-o-sal-pin-gek'tom-e (*lapara, salpinx,* tube, *tome,* incision). Operation by abdominal incision for removal of Fallopian tube.

Laparosalpingotomy, lap-ar-o-sal-pin-got'om-e. Operation upon Fallopian tube through abdominal wall. Laparosalpingectomy.

Laparoscope, lap'ar-o-skope (*lapara, skopeo,* to see).

Instrument for inspection or examination of the abdomen, *Laparoscopy.*

Laparosplenectomy, lap-ar-o-splen-ek'tom-e. Splenectomy; excision of the spleen by abdominal incision.

Laparosplenotomy, lap-ar-o-splen-ot'om-e. Operation upon the spleen through the abdominal wall.

Laparotome, lap'ar-o-tome. Instrument designed for laparotomy.

Laparotomist, lap-ar-ot'om-ist. One who performs laparotomy.

Laparotomy, lap-ar-ot'om-e. Operation on any abdominal viscus or cavity through the abdominal wall. Gastrotomy. Cœliotomy is a more correct term, as expressing an operation on the abdomen. The peritoneum may or may not be cut.

Laparotyphlotomy, lap-ar-o-tif-lot'om-e (*lapara, tuphlos,* blind, *tome,* incision). Typhlotomy or operation on the cæcum through the abdominal wall.

Laparysterot'omy. Laparohysterotomy.

Lapathin, lap'ath-in. Chrysophanic acid.

Lapathum (lap'ath-um) **acu'tum.** Rumex acutus. **L. aquat'icum,** Rumex hydrolapathum. **L., Chinese,** rheum. **L. horten'se,** Rumex patientia. **L. orienta'le,** rheum. **L. praten'se,** Rumex acetosus. **L. sanguin'eum,** Rumex sanguineus. **L. scuta'tum,** Rumex scutatus. **L. sylves'tre,** Rumex acutus, R. obtusifolius. **L. unctuo'sum,** Chenopodium bonus Henricus.

Lapathus, lap'ath-us. Rumex acutus. Lapathum.

Lapaxis, lap-aks'is. Evacuation.

Lape, lah'pe. Mucus.

Laph'a. Arum maculatum.

Lapidillum, lap-id-il'lum (*lapis,* stone). Scoop for extracting stone from the bladder.

Lapillation, lap-il-la'shun (*lapillus,* small stone). Lithiasis; lithogenesis.

Lapilli (lap-il'li) **glan'dulæ pinea'lis.** See *Pineal gland.*

Lapillus, lap-il'lus (dim. of **Lapis,** stone). Small stone; gravel; grain of sand.

Lapis, lap'is. Calculus. **L. accip'itrum,** hieracites. **L. æro'sus,** calamina. **L. ammoni'aci,** see *Ammoniac gum.* **L. anima'lis,** blood. **L. Arme'nius,** see *Melochitis.* **L. aur'eus,** urine. **L. bezoard'icus,** bezoar. **L. cæru'leus,** cupri sulphas. **L. calamina'ris,** calamina. **L. carne'olus,** cornelian. **L. caust'icus,** potassa cum calce, potassa fusa. **L. coll'ymus,** see *Ætites.* **L. contrayer'væ,** pulvis contrayervæ compositus. **L. cy'anus,** L. lazuli. **L. divi'nus,** cuprum aluminatum; employed to make an eye-water. **L. fulmin'eus,** see *Ceraunion.* **L. hemati'tes,** hæmatites. **L. heracle'us,** magnet. **L. inferna'lis,** argenti nitras. **L. inferna'lis alkali'nus,** potassa fusa. **L. inferna'lis sep'ticus,** potassa cum calce. **L. Juda'icus,** Judæus (lapis). **L. laz'uli,** stone of a beautiful blue color, opaque; composed of silex, alumina, carbonate and sulphate of lime, oxide of iron, and water; formerly regarded as purgative and emetic, and given in epilepsy. **L. Malucen'sis,** bezoard of the Indian porcupine. **L. mitiga'tus,** nitrate of silver, mitigated or diluted with potassium nitrate. **L. naut'icus,** magnet. **L. ophthal'micus,** L. divinus. **L. ophthal'micus St. Ivesii,** L. divinus. **L. Phœnici'tes,** Judæus (lapis). **L. porci'nus,** bezoard of the Indian porcupine. **L. prunel'læ,** potassæ nitras fusus sulphatis paucillo mixtus. **L. pu'micis,** pumex. **L. sar'dius,** cornelian. **L. sep'ticus,** causticum commune, potassa fusa. **L. specula'ris,** septum lucidum. **L. syderi'tis,** magnet. **L. Syri'acus,** Judæus (lapis). **L. vi'ni,** potassæ supertartras impurus.

Lappa, lap'pah (Ph. U. S.) (*labo,* to lay hold of). Arctium lappa, Galium aparine, lippitudo. **L. glab'ra** or **ma'jor,** burdock; root is diaphoretic and diuretic; used in syphilis, scrofula, and skin diseases. **L. mi'nor,** xanthium.

Lappula hepatica, lap'pu-lah hep-at'ik-ah. Agrimony.

Lapsana, lap'san-ah. *Dockcresses, Swine's cress, Nipplewort.* This plant is a lactescent bitter, and has been chiefly employed as an external application to sore nipples, skin diseases, etc.

Lap'sus. Falling. **L. pilo'rum,** falling of hairs; alopecia. **L. un'guium,** falling off of nails, etc.

Laquear, lak'we-ar (arched roof or ceiling). Vault; fornix; lacunar. **L. vagi'næ,** part of the vagina in which the cervix uteri terminates; see *Vagina.*

Laquearia, lak-we-ar'e-ah. Corpus callosum.

Laqueus, lak'we-us (noose, snare). Cord, ligature, or bandage, with running knots; a noose or loop; a fillet; bandage or fillet of any kind attached by means of a loop upon any part, with the view of fixing it, as in labor where a hand or foot presents, or to facilitate extension in luxations and fractures. A prominent band in the brain, *Lemniscus,* behind the brachium posterius of the corpora quadrigemina, marking the course of the superior division of the fasciculus olivaris. **L. cer'ebri,** lemniscus; see *Laqueus.* **L. gut'turis** (noose of the throat), violent inflammation of the tonsils, in which the patient appears as if suffocated by a noose; gangrenous cynanche. **L. pedun'culi,** lemniscus; see *Laqueus.* **L. umbilica'lis,** umbilical cord.

Larch. Pinus larix.

Lard. Adeps, A. suillus, A. præparatus. **L., ben'zoated,** unguentum benzoini. **L., prepared,** adeps præparatus.

Lardacein, lar-das'e-in. An animal proteid occurring in amyloid degenerations of different organs.

Lardaceous, lar-da'shus. Epithet given to certain organic alterations in the textures, whose aspect and consistence resemble lard or wax, constituting lardaceous or cholesterine disease, lardaceous, waxy, cellulose, colloid, hyaloid, vitreous, albuminoid or albuminous, and amyloid degeneration or infiltration, bacony disease, Virchow's degeneration, morbus lardaceus or amyloïdes or cereus; from their waxy appearance also called ceroma. It appears to be an exudation from the blood, being found always intimately associated with the blood-vessels; the organs most apt to be affected are the liver, kidneys, spleen, and lymphatic glands, but it may occur in any soft part.

Lardeus (lard'e-us) or **Lardiform,** lard'e-form. Lardaceous.

Lardum (lar'dum) or **Laridum,** lar'id-um. Adeps.

Lar'icin. Agaricin.

Lar'icis cor'tex (Ph. U. S.). Bark of Pinus larix.

Larinoid, lar'in-oid (*larinos,* fat, *eidos,* resemblance). Resembling lard; lardaceous.

Lar'ix. Pinus larix. **L. America'na,** *Hackmatack, Tamarack;* the bark of this N. American tree is diuretic. **L. commu'nis,** Pinus larix. **L. decid'ua,** Pinus larix. **L. Europæ'a,** Pinus larix. **L. pyramida'lis,** Pinus larix.

Larkspur (lark'spur), **branch'ing.** Delphinium consolida.

Larrea (lar're-a) **glutino'sa** or **Mexicana,** meks-e-kan'ah (after J. A. de Larrea, Spanish savant). Creasote plant, ord. Zygophyllaceæ. A shrub growing in South-western United States and Northern Mexico, abounding in strong-scented resinous matter; used externally and internally in rheumatism and syphilitic and other pains.

Larva, lar'vah (mask). Larve, grub, or vermiform condition of an insect; first change it experiences after leaving the ovum. Larves of insects are occasionally developed in the intestinal canal from ova swallowed. See *Ectozoa.*

Larvaceous (lar-va'shus) or **Lar'val.** Masked; term applied to fevers, larvaceous fevers; to gout, larvaceous gout, arthritis larvata, etc. See *Masked.* Giving the face an appearance like a mask, as in some skin diseases.

Larviparous, lar-vip'ar-us. Ovoviviparous.

Laryngalgia, lar-in-gal'je-ah. Neuralgia of the larynx.

Laryngeal (lar-in-je'al). Relating to or belonging to the larynx, as L. nerves, etc. **L. ar'teries** are given off from the thyroid arteries. The superior thyroid artery has also been called laryngeal a. **L. cough,** cough, perhaps of nervous form, from the larynx, but not from lung disease. **L. cri'sis,** acute

spasm of the larynx in tabes dorsalis; see *Crises*. **L. diseases**, see *Larynx, diseases of*. **L. nerves** are two in number—superior and inferior. The superior laryngeal nerve is given off from the trunk of the pneumogastric, at the upper and deep part of the neck; it passes downward and inward, behind the internal carotid artery, and divides into two secondary branches: one, external, distributing its filaments on the outside of the larynx to the sternothyroid, hyothyroid, constrictor inferior, cricothyroid muscles, etc.; the other, internal, crosses the thyrohyoid membrane and gives filaments to the epiglottis, the mucous membrane of the pharynx and larynx, to the arytenoid gland, the arytenoid and cricothyroid muscles, and ultimately intermingles with the inferior laryngeal nerve. The inferior laryngeal nerves or recurrents arise from the trunk of the pneumogastric within the thorax; ascend in the furrow separating the trachea from the œsophagus, to be distributed on the neck after having been reflected—the left around the arch of the aorta, the right around the corresponding subclavian. **L. paral'ysis**, paralysis of muscles connected with the larynx. **L. phthi'sis**, phthisis, laryngeal. **L. pouch'es**, small *culs-de-sac* leading from the anterior part of each ventricle of the larynx upward, between the superior ligaments on the inner side and the thyroid cartilage on the outer, reaching as high as the upper border of that cartilage at the sides of the epiglottis. **L. sound**, sound heard in respiration through the larynx. **L. spaces**, the three cavities into which the larynx is divisible. **L. veins** open into the internal jugular. **L. voice**, see *Voice*.

Laryngeche, lar-in-je'ke (*laryngo*, *eche*, sound). Laryngeal sound heard through the stethoscope during breathing and speaking.

Laryngectomy, lar-in-jek'to-me (*larynx*, *ektome*, excision). Operation for excision or extirpation of the larynx.

Laryngemphraxis, lar-in-jem-fraks'is (*laryngo*, *emphraxis*, obstruction). Obstruction of the larynx.

Laryn'gic. Laryngeal.

Laryngismus, lar-in-jiz'mus. Spasm of the glottis, giving occasion to contraction or closure of the opening. Laryngeal vertigo. **L. paralyt'icus**, paralysis of recurrent laryngeal nerve in horses; "roaring" results. **L. strid'ulus**, spurious croup or pseudocroup; asthma thymicum; laryngospasm.

Laryngitis, lar-in-je'tis. Inflammation of the larynx; inflammation of mucous membrane of larynx. This disease in some meaure resembles croup, but is usually devoid of the peculiar sonorous inspiration of the latter. There is pain upon pressing the larynx, and while laryngitis is a disease of more advanced life, croup attacks children. Membraniform exudation is also absent, probably because, the inflammation being seated above the glottis, the coagulable lymph is readily expectorated. It requires the most active treatment. Various forms of laryngitis have been described, such as catarrhal laryngitis, acute and chronic; chronic glandular laryngitis, or follicular disease of the larynx, dysphonia clericorum or clergymen's sore throat; phthisical laryngitis, or laryngeal phthisis, diffuse cellular laryngitis, acute œdematous laryngitis, gouty laryngitis, etc. Simple laryngitis is called by some mucous laryngitis, laryngitis acuta or mucosa acuta, to distinguish it from submucous laryngitis or œdema of the glottis. Chronic laryngitis may be a form of laryngeal phthisis, but may exist independently. **L. acu'ta**, laryngitis; see *Larynx, diseases of* (table). **L., atroph'ic**, chronic laryngitis with glandular atrophy of part affected. **L., catar'rhal**, see *Laryngitis*. **L., chron'ic**, see *Phthisis laryngea* and *Larynx, diseases of* (table). **L., chron'ic follic'ular**, see *Laryngitis*. **L. croupo'sa**, croup. **L., desic'cative**, L., dry. **L., diffuse' cel'lular**, diffuse inflammation of laryngeal cellular tissue, with effusion of lymph or pus into subjacent or adjacent tissues; a dangerous affection. **L., diphtherit'ic**, croup; diphtheria of larynx. **L., dry**, laryngitis attended with cough, aphonia, and heat, but without increased secretion; dry granular inflammation of larynx. **L. exudati'va**, croup. **L., fe'tid**, L. with croupy exudation on the mucous membrane. **L., follic'ular** or **gland'ular**, L. affecting especially the follicles or glands. **L., hypertroph'ic**, chronic laryngitis with glandular hypertrophy of part affected. **L., in'fantile**, croup. **L. membrana'cea**, croup. **L., mock**, affection of the larynx due to hysteria. **L. muco'sa acu'ta**, laryngitis. **L., mu'cous**, laryngitis (simple). **L., œdem'atous**, œdema of the glottis. **L., phleg'monous**, inflammation of submucous connective tissue of larynx, with œdema, abscess, etc. **L., phthis'ical**, L., tubercular. **L. polypo'sa**, croup; L. with polypous growths. **L. pseudomembrana'cea**, croup. **L. seropurulen'ta**, œdema of the glottis. **L., se'rous**, œdema of larynx. **L., sim'ple**, see *Laryngitis*. **L. spasmod'ica**, see *Cynanche trachealis*. **L., subglot'tic**, inflammation of vocal cords. **L., submu'cous**, œdema of the glottis. **L., suf'focative**, L., œdematous; croup; diphtheria of larynx. **L., syphilit'ic**, see *Larynx, diseases of* (table). **L. et tracheï'tis chron'ica**, see *Phthisis laryngea*. **L. et tracheï'tis infant'ilis**, croup. **L., tuber'cular**, tuberculosis of larynx, laryngeal phthisis, with characteristic local and constitutional symptoms of tubercular infection; see *Larynx, diseases of* (table).

Laryngo, lar-in'go. In composition, larynx.

Laryngocace, lar-in-gok'as-e (*laryngo*, *kakos*, bad). Croup; cynanche trachealis.

Laryngocatarrhus, lar-in-go-kat-ar'rhus. Catarrh affecting the larynx and trachea.

Laryngocentesis, lar-in-go-sen-ta'sis (*laryngo*, *kentesis*, puncturing). Operation of puncture of larynx.

Laryngo-et-tracheo-phthisis, lar-in'go-et-trak'e-o-te'sis. Laryngeal phthisis.

Laryngofission (lar-in-go-fish'un) or **Laryngofissure**, lar-in-go-fis'shur (*laryngo*, *findo*, *fissum*, to cleave). Operation of opening or separating cartilages of larynx for removal of large intralaryngeal growths, thus causing a *laryngofissure*.

Laryngography, lar-in-gog'raf-e (*laryngo*, *graphe*, a description). Anatomical or physiological description of the larynx.

Laryngology, lar-in-gol'o-je (*laryngo*, *logos*, discourse). Treatise on the larynx; anatomy or physiology of the larynx.

Laryngometry, lar-in-gom'et-re (*laryngo*, *metron*, measure). Measurement of the larynx.

Laryngonecrosis, lar-in-go-nek-ro'sis. Necrosis of cartilages of larynx.

Laryngoparalysis, lar-in-go-par-al'is-is. Paralysis of the larynx. See *Aphonia*.

Laryngopathy, lar-in-gop'ath-e (*laryngo*, *pathos*, disease). Disease of the larynx.

Laryngophantom, lar-in-go-fan'tom (*laryngo*, *phantos*, visible). Papier-maché model or apparatus of the larynx for practising examination of that organ.

Laryngopharyngeal, lar-in-go-far-in-je'al. Relating to larynx and pharynx.

Laryngopharyngeus, lar-in-go-far-in-je'us. Constrictor pharyngis inferior muscle.

Laryngophony, lar-in-gof'on-e (*laryngo*, *phone*, voice). Laryngeal voice; tracheal voice. Sound heard in health, when the stethoscope is placed over the larynx when a person speaks. The voice appears to pass immediately up to the ear of the auscultator. Tracheophony—a sound similarly heard over the trachea—is more intense. See *Pectoriloquy*.

Laryngophthisis, lar-in-go-te'sis. Laryngeal phthisis.

Laryngoplasty, lar-in'go-plas-te (*laryngo*, *plasso*, to form). Plastic operation on the larynx.

Laryngoplegia, lar-in-go-plej'e-ah (*laryngo*, *plege*, stroke). Paralysis of the larynx.

Laryngorrhagia, lar-in-gor-rhah'je-ah. Hemorrhage of larynx.

Laryngorrhœa, lar-in-gor-rhe'a (*laryngo*, *rheo*, to flow). Abnormal mucous discharge from the larynx.

Laryngoscope, lar-in'go-skope. Larynx speculum, speculum laryngis. Instrument on the same principle as the ophthalmoscope, which, by means of a mirror, enables the larynx to be inspected. Glottiscope.

Laryngoscopic, lar-in-go-skop'ik (*laryngo, skopeo,* to view). Relating to the laryngoscope or examination of larynx.

Laryngoscopy, lar-in-gos'kop-e (same etymon). Use of the laryngoscope; inspection of the larynx. When self-examination is practised it is called autolaryngoscopy.

Laryngospasm, lar-in'go-spazm. Spasm of the larynx. Asthma thymicum or laryngismus stridulus. Spasmodic croup.

Laryngospasmopsellismus, lar-in-go-spas-mo-selliz'mus (*larynyo, spasmos,,* spasm, *psellismus,* stammering). Spasmodic stammering audible in the larynx, without ability to use the voice orally. When tetanic in character it is called *Laryngotetanopsellismus.*

Laryngostasis, lar-in-gos'tas-is (*laryngo, stasis,* settling, stagnation). Cynanche trachealis; croup.

Laryngostenosis, lar-in-go-sten-o'sis (*laryngo, stenosis,* contraction). Contraction or narrowness of the larynx.

Laryngotetanopsellismus, lar-in-go-tet-a-no-selliz'mus (*laryngo, tetanus, psellismus,* stammering). See *Laryngospasmopsellismus.*

Laryngotome, lar-in'go-tome (*laryngo, tome,* incision). Instrument for performance of laryngotomy.

Laryngotomy, lar-in-got'o-me (*laryngo, tome,* incision). Operation of opening the larynx to extract a foreign body or to remedy obstruction of the glottis; sometimes erroneously called bronchotomy and tracheotomy. It is called *Cricoid l., Thyroid l.,* when incision is made through the cricoid and thyroid cartilages, respectively. **L., me'dian,** thyreotomy. **L., supe'rior,** L. through the thyreohyoid membrane, *Thyreohyoid laryngotomy.*

Laryngotracheal, lar-in-go-trak-e'al. Relating to larynx and trachea.

Laryngotracheïtis, lar-in-go-trak-e-e'tis. Inflammation of larynx and trachea. Tracheitis with diphtheritic exudation; croup.

Laryngotracheophthisis, lar-in-go-trak-e-o-te'sis. Tubercular laryngitis; tuberculosis of the larynx.

Laryngotracheopyra, lar-in-go-trak-e-op'ir-ah (*laryngo, trachea, pur,* heat). Croup.

Laryngotracheotomy, lar-in-go-trak-e-ot'o-me. Laryngotomy extended to the trachea.

Laryngotyphus, lar-in-go-ti'fus. Laryngeal affection attending or following typhus fever.

Laryngydrops, lar-in-jid'rops (*laryngo, hudrops,* dropsy). Œdema of the larynx.

Larynx, lar'inks. Apparatus of voice situate at the superior and anterior part of the neck, and at the top of the trachea, with which it communicates. It is composed of four cartilages—the thyroid, cricoid, and two arytenoid; is moved by a number of muscles and lined by mucous membrane, having certain membranous reflections, constituting the superior and inferior ligaments of the glottis, etc. Its superior or pharyngeal opening is called osteum pharyngeum or aditus laryngis, orificium superius laryngis, hyperglottis, rima hyperglottica, and fissura laryngea pharyngis. The larynx is destined to give passage to the air in respiration, and to impress upon it certain modifications which constitute voice. Its dimensions vary in different individuals; in men it is always larger and situate lower than in women. The weight of the larynx has been estimated at 28.5 grammes. **L., artific'ial,** metal substitute for extirpated larynx. **L., benign growths of,** see *Larynx, diseases of* (table). **L., bronch'ial** or **bronch'o-trache'al,** inferior l. in birds, one on each bronchus. **L., diseases of,** the principal diseases of the larynx are exhibited in the table (see pp. 618-621), including the differential symptoms of each disease, by Prof. G. M. Lefferts, M. D. **L., pellic'ular** or **plas'tic inflamma'tion of,** cynanche trachealis; croup. **L. spec'ulum,** laryngoscope. **L., trache'al,** L., bronchial.

Lasanum, las'an-um. Close-stool; obstetric chair.

Lascivia (las-siv'e-ah) or **Lascivitas,** las-siv'it-as. Satyriasis.

Lascivus (las-se'vus) or **Lasciv'ious.** Libidinous.

La'ser. Laserpitium; asafœtida.

Laserpitium, laz-ur-pish'e-um. A term applied formerly both to a plant and its juice. **L. as'perum,** L. latifolium. **L. latifo'lium,** *White gentian;* root is bitter and tonic. **L. monta'num,** L. siler. **L. si'ler,** *Heartwort, Sermountain;* seeds and roots are aromatic. **L. trifolia'tum,** L. siler.

Lassitude, las'se-tude (*lassus,* tired). Fatigue, during which the functions are performed with less vigor than usual.

Lat'a. Miryachit.

Latania Borbonica, lat-an'e-ah bor-bon'ik-ah. Bourbon palm; pulp is astringent.

Latebra, lat'eb-rah (hiding-place). *Vitelline cavity.* Spherical swelling formed in an impregnated egg by the dipping down of the white yolk into the centre of the yellow yolk.

Latency, la'ten-se. Condition of being latent or concealed. **L., pe'riod of,** see *Latent period.*

Latens in ore, lah'tens in o're (lying hid in the mouth). Pterygoideus internus.

Latent, la'tent (*lateo,* to lie hid). Epithet applied to certain diseases or states of disease in which the symptoms are so concealed and obscure as to escape observation, as latent inflammation, latent period of small-pox. **L. pe'riod,** period of incubation of diseases.

Laterad, lat'er-ad (*latus,* side). Term used adverbially to signify toward the lateral aspect.

Lateral, lat'er-al. Relating to the side. **L. as'pect,** see *Mesial.* **L. col'umn,** column of spinal cord situate between the antero-lateral and postero-lateral fissures. **L. opera'tion,** see *Lithotomy.* **L. plates,** portion of mesoblast on the outside of the provertebræ. **L. si'nuses,** see *Sinuses.*

Lateralis, lat-er-al'is. Lateral. **L. na'si,** fasciculus of compressor nasi; depressor alæ nasi. **L. ster'ni,** costosternalis.

Lateral'ity. Excess of development laterally.

Lat'eri-rec'tus. Rectus capitis lateralis.

Lateritious, lat-er-ish'us (*later,* a brick). Epithet applied to the brickdust-like sediment occasionally met with in the urine of fever. See *Urate.*

Lat'ero-cer'vical. At the side of the neck.

Lat'ero-dor'sal. At the side of the back.

Lateroflexion, lat-er-o-flek'shun (*latus, flexus,* bending). Bending to one side, as of the uterus.

Lateroposition, lat-er-o-po-zish'un. Displacement laterally.

Lateropulsion, lat-er-o-pul'shun. Abnormal impulse to lateral movement, as in paralysis agitans.

Lateroretroversion, lat-er-o-re-tro-ver'shun. Retroversion with lateral displacement, as of uterus.

Lateroversion, lat-er-o-ver'shun. Lateral deviation or displacement.

Latescentis (lat-es-sen'tis) **chor'dæ mus'culus** (muscle of the hidden cord). Palmaris longus.

Latex (lat'eks) or **L. ni'veus** (snowy liquor). Milk; milky juice.

Lathyris, lath'ir-is. Euphorbia lathyris.

Lathyrism, lath'ir-izm. Affection resembling beriberi, arising from the use of lathyrus as an article of diet.

Lathyrus, lath'ir-us. Several varieties are known in Europe, Spain especially, the ripe seeds of which are narcotic. If young and tender they are an article of diet. See *Lathyrism.*

Latibulum, lat-ib'u-lum (*lateo,* to lie hid). The *foyer* of a febrile poison, from which it spreads to produce febrile paroxysms.

Latica, lat'ik-ah (*lateo,* to lie hid). Species of quotidian remittent, with paroxysms very long and accompanied with latent fever.

Latices lactei, lat'e-sees lak'te-e. Receptaculum chyli.

Latissimo-condyloïdeus, lat-is'sim-o-kon-dil-o-e'deus. Epitrochleo-anconæus.

Latissimus (superlative of **Latus,** broad) **colli,** lat-is'sim-us kol'le. Platysma myoides. **L. dor'si,** flat quadrilateral muscle situate at the posterior, lateral, and inferior region of the trunk; attached to the posterior half of the outer lip of the crest of the

A DIFFERENTIAL TABLE OF THE SYMPTOMS

		Anæmia.	Hyperæmia.	Laryngeal Hemorrhage.	Acute Laryngitis.	Chronic Laryngitis.	Tubercular Laryngitis.
Functional or Subjective Symptoms.	*Voice.*	Unreliable, easily fatigued, occasional failure, sometimes functional aphonia.	Generally somewhat hoarse.	Lost in hæmatoma of the vocal cord or cords. Unaffected in hæmoptysis.	Hoarse, becoming aphonic.	Hoarse, uncertain, easily fatigued, often lost in laryngitis sicca, impaired in chorditis tuberosa.	Aphonic in earlier stages, completely lost in advanced disease.
	Respiration.	Unembarrassed, unless incipient pulmonary tuberculosis.	Unembarrassed.	Sometimes seriously affected in large hæmatoma of the arytæno-epiglottic fold or of the vocal cord. Unaffected in hæmoptysis.	Not embarrassed, as a rule, in adults, unless œdema, then stridor, dyspnœa, and even apnœa. In children, frequently, laryngismus stridulus.	Not embarrassed in ordinary cases, sometimes seriously in subglottic chronic laryngitis, may be in laryngitis sicca from accumulation of crusts.	Early hurried and short, greatly embarrassed with advance of pulmonary disease. If dyspnœa be laryngeal, it is due to chronic œdema.
	Deglutition.	Unaffected.	Some dryness, stiffness, perhaps slight soreness.	Some pain and interference in hæmatoma of the arytæno-epiglottic fold.	Painful from associated pharyngeal inflammation.	Unaffected.	Extremely difficult and painful, from the advent of infiltration and ulceration, to termination. If epiglottis is involved, pain greatly increased.
	Pain.	Occasionally slight tickling or sense of irritation.	Sensation of dryness or of a foreign body.	No localized pain.	Sensation of tightness and constriction, tender to external pressure.	Sense of laryngeal fatigue, in ordinary cases intense discomfort in laryngitis sicca.	Only experienced during functional acts.
	Cough.	Variable, slight, irritative.	Desire to clear the throat.	Sense of irritation, possible disposition to cough.	Dry, hard, shrill, metallic, aphonic, when exudation, moist. In children, croupy.	Not usually present, frequent disposition to clear the throat. In laryngitis sicca at times violent, the expectorated crusts being tinged with blood.	Greatly influenced by the stage and progress of the pulmonary tuberculosis. Secretion from laryngeal ulcers a thick, tenacious, semi-opaque, ropy mucus.
Physical or Objective Signs.	*Color.*	Abnormally pale and anæmic.	Bright red, diffuse, or partial congestion.	Rounded, deep-red, purplish tumor in hæmatoma. Blood in small masses or streaks, unmixed with saliva or mucus, in hæmoptysis.	Intense, bright red, uniformly increasing, superficial hyperæmia. Translucent if œdema occurs.	Deep red and injected, vocal cords show grayish discoloration or a yellowish red.	Dull gray with slightly yellowish tinge, solid and semi-opaque aspect.
	Ulcer.	None.	None.	Single, small point of erosion, vocal cords, ventricular bands, or anterior face of the arytænoid cartilages in hæmoptysis.	Slight erosion of edges, vocal cords occasionally in severe cases.	Indolent ulcers over processus vocali occasionally, are always flat or cone-shaped.	Grayish-yellow color, surface ragged and worm-eaten, edge irregular and flush with surrounding tissues, no areola, ulcers coalesce and form large superficial ones.
	General appearance of Lesion.	Anæmia, no hypertrophy nor inflammatory changes.	Bright red congestion and slight swelling of mucous membrane, vocal cords, interarytænoid commissure, ventricular bands.	Dependent upon the size, position, form of the hæmatoma. In hæmoptysis a small, single, always superficial point of erosion.	Some inflammatory swelling, entire mucous membrane. In adults, but slight narrowing. In children, with subglottic laryngitis marked narrowing. If œdema, dangerous stenosis.	In old cases general hyperplastic thickening of the mucosa and permanent dilatation of blood-vessels. In chorditis tuberosa small, rounded nodules on the edges of vocal cords. In subglottic chronic laryngitis, considerable diminution in size of infraglottic space.	Tubercular infiltration of membrane covering arytænoids, and their commissure, gives rise to club-shaped arytænoids. Infiltration of epiglottis gives the turban-shaped epiglottis. Chronic œdema will alter form of laryngeal parts, as will perichondritis and necrosis of cartilages.

OF THE PRINCIPAL LARYNGEAL DISEASES.

Secondary Syphilitic Laryngitis.	Tertiary Syphilitic Laryngitis.	Malignant Growths.	Non-malignant Growths.	Neuroses (Sensation).	Neuroses (Motion).
Impaired or temporarily lost if vocal cords are involved.	Impaired or lost by ulceration or destruction of vocal cords or cicatricial deformity.	Quickly lost in intrinsic, later in extrinsic. In intrinsic, in earlier stages, due to the immobility of affected side of the larynx.	Very variable, from slight hoarseness to complete aphonia, dependent upon location and size of the neoplasm.	Slightly hoarse, inability to produce high tones, vocal fatigue, due to unilateral or bilateral paralysis of the external tensors.	Voice completely lost in bilateral recurrent laryngeal paralysis, weakened in unilateral. In both bilateral and unilateral paralysis of the abductors, voice but little impaired. In paresis of the abductors, voice lost. In bilateral paralysis of the internal tensors, voice weakened.
Unembarrassed.	No interference with respiration in ulcerative stage, unless œdema occur. Severe dyspnœa, with perichondritis, and in stenosis due to cicatrization.	Early embarrassed in intrinsic, later in extrinsic, in both cases finally, urgent dyspnœa and tracheotomy.	Rarely embarrassed, only with large papillomata in adults. In children, small larynx and multiple papillomata, dyspnœa common.	No actual embarrassment, sometimes imaginary, in nervous or hysterical patients.	In bilateral paralysis of the abductors, inspiratory dyspnœa. In the other forms of laryngeal paralysis, practically no interference with respiration.
Painful from associated pharyngeal lesions.	Sometimes difficult or painful from associated pharyngeal lesions, may be from destruction of epiglottis or cicatricial distortion of laryngeal parts.	Early affected in extrinsic, later in intrinsic, finally impossible.	Only impaired in rare cases, in which epiglottis or aryepiglottic fold is involved.	Imperfect, owing to anæsthesia of the mucous membrane and paralysis of the depressor muscles of the epiglottis.	Unaffected.
No localized pain.	No localized pain.	Pain constant, sharp, lancinating, radiating to the ears. Is more characteristic and prominent in extrinsic than in intrinsic.	Characteristically absent.	In neuralgia of the throat intense, localized pain, usually unilateral, radiating to ear.	No localized pain.
None.	None.	Cough, with sputa tinged with blood, pus-cells, and necrotic tissue, characteristic odor, offensive and fetid.	In large or multiple growths, sense of irritation leading to slight cough.	In nervous laryngeal cough, shrill, metallic, or deep, vibrating, frequent paroxysmal, and continued, lasting days, weeks, and months.	None.
Erythema of a peculiar mottled appearance, and dusky, sombre hue, dark red or purplish.	Abnormal colored mucous membrane covers the smooth, rounded tumefaction or the diffuse, gummatous infiltration. Ulcer, deep red color.	Epithelioma, deep, angry red. Sarcoma, generally grayish, semi-opaque, sometimes pinkish or reddish.	Papillomata, grayish-white or pinkish-white. Fibromata, bright red. Cystomata, a yellow or reddish-white, on vocal cords translucent.	Normal.	Usually slight hyperæmia of vocal cords.
Superficial, round, or ovoid bright-yellow color, no areola, slightly excavated, secretes yellow pus, has a few necrotic shreds of tissue.	Deep, with sharp-cut edges, dark-red areola, excavated surface, profuse purulent secretion, necrotic tissue, has a crater-like aspect.	A ragged, ulcerating mass, central portion depressed and fissured, yellowish-gray, dirty color. Notable inflammatory area of redness about it, dense, cartilaginous feeling to the touch in epithelioma.	None.	None.	None.
Mottled erythema, red or purplish color. Some swelling of tissues, due to infiltration of the mucosa and venous turgescence.	Gummata and ulceration, as above. Vigorous and extensive cicatrization may destroy normal contour of larynx, distort its lumen, encroach upon the breathing space, impair vocal function, and generally alter its form.	Epithelioma, a broadly infiltrating, irregular mass, rapidly ulcerating. Sarcoma, a rounded, reddish, soft, fleshy tumor, rarely ulcerating, developing insidiously, progressing slowly.	Varies with the pathological nature of the neoplasm.	Paralysis of external tensors will change normal form of glottis during phonation.	Position of the vocal cords varies with the form of paralysis.

A DIFFERENTIAL TABLE OF THE SYMPTOMS OF

		Anæmia.	Hyperæmia.	Laryngeal Hemorrhage.	Acute Laryngitis.	Chronic Laryngitis.	Tubercular Laryngitis.
Physical or Objective Signs.	*Location of Lesion.*	Entire laryngeal mucous membrane.	Hyperæmia most active. I. ventricular bands. II. ventricles. III. vocal cords. IV. arytæno-epiglottic folds.	Hæmatoma. I. vocal cords. II. arytæno-epiglottic folds. Hæmoptysis. I. erosion vocal cords. II. ventricular bands. III. anterior face of arytænoid cartilages.	Inflammatory process most active in those parts where mucous membrane is loosely attached, *i. e.* arytæno-epiglottic folds, arytænoid commissure, ventricular bands.	Hyperplasia. I. ventricular bands. II. interarytænoid commissure. III. vocal cords, rarely.	I. Inter-arytænoid commissure. II. arytænoid cartilages. III. arytæno-epiglottic folds. IV. vocal cords. V. epiglottis, in order of frequency of the infiltration and ulceration.
Accessory, Physical, or Objective Signs.	*Pharynx.*	Abnormally pale and anæmic, except pillars of the fauces, which present line of redness.	In passive hyperæmia, engorgement of venous plexus, at base of tongue. In active, bright, diffuse congestion.	Caution in diagnosis, hemorrhages may come from pharynx, gums, or tongue in hæmoptysis.	Perhaps a preceding or associated acute pharyngitis.	Probably chronic pharyngitis, chronic follicular pharyngitis, or elongated uvula.	In rare cases acute tubercular infiltration and ulceration.
	Naso-pharynx.	Uninvolved.	Uninvolved.	Caution in diagnosis, hemorrhage frequently comes from nose or vault of the pharynx in hæmoptysis.	Ordinarily an accompanying acute naso-pharyngitis.	Usually obstructive lesion of the nose, chronic naso-pharyngitis, perhaps hypertrophied pharyngeal or faucial tonsils.	In very rare cases acute tubercular infiltration and ulceration.
	Lungs.	Very often incipient tuberculosis.	Perhaps acute bronchitis.	Caution in diagnosis, if hemorrhage is from lungs, trachea coated with blood, auscultate lungs, use laryngoscope.	May follow acute bronchitis.	Possibly in old cases, co-existent chronic bronchitis.	In every case either primarily, synchronously, or subsequently involved.
	Diathesis Cachexia.	Very often the tubercular.	None.	Hemorrhagic diathesis, debility of phthisis, anæmia, malnutrition, vicarious menstruation, pregnancy.	Catarrhal. In children, struma, lymphatic habit.	Catarrhal.	Always the tubercular diathesis.
Miscellaneous.		May occur with general anæmia, hemorrhagic loss, chlorosis, Bright's disease, diabetes.	Invariable accompaniment of the exanthemata.	Strain of the voice, violent vocal exercise are exciting causes of hæmatoma of vocal cords. Chronic laryngitis with erosion is a predisposing one in hæmoptysis. May be a result of traumatism, in hæmatoma.	Usually secondary to an inflammatory process, involving some portion of the air-tract above the larynx.	Probably never a primary disease, but result of a chronic rhinitis, chronic naso-pharyngitis, or nasal stenosis.	The occurrence of laryngeal lesions in pulmonary phthisis, serious complication, average duration of life after their advent eighteen months. If laryngeal disease is primary or simultaneous with pulmonary, the tubercular infection is virulent and active.

ilium, to the posterior surface of the sacrum, to the spinous processes of the six or seven last dorsal vertebræ, to all those of the loins, and to the last four false ribs, and inserted by a strong tendon at the posterior edge of the bicipital groove of the humerus. This muscle carries the arm backward, depressing it, and making it turn on its axis; it also draws backward and downward the prominence of the shoulder. When, suspended by an arm, we make an effort to raise ourselves, it draws the trunk toward the arm. It can also raise the ribs by assuming its fixed point on the humerus and become an inspiratory muscle—dorso-humeralis. **L. pec'toris**, pectoralis superficialis.

Latitudo humeri, lat-e-tu'do hu'mer-e (*latus*, broad). Scapula.

Latour bark. Bark of Strychnos nux vomica.

Latrine, lat-reen'. Receptacle for excrement, as a box or vessel.

Lattice (lat'tis) **work.** Cancelli.

Latus, lat'us. Broad. **L. a'ni**, levator ani.

Laucania, lau-kan'e-ah. Fauces and œsophagus; chin.

Laudable, lawd'a-b'l. Healthy; normal; term applied to healthy pus.

Laudania (lawd-an'e-ah) or **Laudanin**, lawd'an-in. Base found in opium, $C_{20}H_{25}NO_4$, in colorless prisms.

Laudanosia (lawd-an-o'she-ah) or **Laudanosine**, lawd'an-os-in. Alkaloid derived from opium—$C_{21}H_{27}NO_4$—without therapeutic value.

Laud'anum (perhaps from *laudatum*, praised or praiseworthy). Formerly any anodyne. Every preparation of opium, solid or liquid, but particularly the extract and tincture; now almost entirely restricted to *Tinctura opii* (which see). **L. Abba'tis Rousseau'**, Abbe Rousseau's drops; preparation made from opium, honey, beer-yeast, water, and alcohol. **L., denar'cotized**, L. made of denarcotized opium. **L., deo'dorized**, tinctura opii deodorata. **L., Ford's**, vinum opii. **L., liq'uid**, tinctura opii. **L. liq'uidum Hoffman'ni**, vinum opii. **L. liq'uidum Sydenham'i**, vinum opii. **L. opia'tum**, extractum opii. **L., Rousseau's'**, laudanum Abbatis Rousseau. **L. sim'plex**, extractum opii. **L., Syd'enham's**, vinum opii. **L., War'ner's**, ammoniated tincture of opium.

Laugh. Risus. **L., canine'** or **sardon'ic**, canine laugh. See *Risus sardonicus*.

Laughing. Risus. **L. gas**, nitrogen, gaseous oxide of.

Laughter, laf'ter. Risus.

Laurel. Kalmia latifolia; laurus: Magnolia macrophylla. **L., broad'-leaved**, Kalmia latifolia. **L., cher'ry**, Prunus laurocerasus. **L., com'mon**, Prunus

THE PRINCIPAL LARYNGEAL DISEASES (*Continued*).

Secondary Syphilitic Laryngitis.	Tertiary Syphilitic Laryngitis.	Malignant Growths.	Non-malignant Growths.	Neuroses (Sensation).	Neuroses (Motion).
Erythema. I. vocal cords. II. ventricular bands. III. arytæno-epiglottic folds. Mucous patch. I. upper surface vocal cords. II. epiglottis. Ulcer at any point.	Ulceration occurs. I. epiglottis. II. vocal cords. III. ventricular bands. IV. inter-arytænoid commissure, in order of frequency.	Intrinsic, ventricular bands. Extrinsic, pharyngo-laryngeal orifice.	Usually at or near glottis.	Abnormal sensations, pain, localized sense of foreign body, etc., at any point in laryngeal cavity.	Vocal cords.
Symmetrical, dull red or purplish, erythema with sharp line of demarcation, soft palate, and pillars of fauces. Mucous patches and superficial ulcers, latter rare.	Aside from gummata or active ulceration, commonest deformity is from cicatricial adhesion of soft palate to pharyngeal wall.	In extrinsic or pharyngo-laryngeal carcinoma, lower pharynx involved with, usually, mouth of œsophagus.	Uninvolved.	Anæsthesia, hyperæsthesia, paræsthesia, or neuralgia, as of larynx. Hypertrophy of adenoid tissue at base of tongue, varix in same locality, chronic follicular pharyngitis, etc.	Uninvolved.
Uninvolved.	Occasionally ulceration at the vault of the pharynx.	Uninvolved.	Uninvolved.	Perhaps adenoid growths.	Uninvolved.
Uninvolved.	Uninvolved.	Uninvolved.	Uninvolved.	Uninvolved.	Possibly pleuritic adhesions at apex of lungs, specially right.
Secondary syphilitic, 4–6 months after infection, except ulcer.	Tertiary syphilitic, 5–15 years after infection, up to any period.	Cachexia a late manifestation, more delayed in intrinsic than in extrinsic. In some cases intrinsic absent.	None.	Neurasthenic, hysterical, hypochondriacal.	None.
A chancre of pharynx (usually tonsil) and of larynx (epiglottis) is rare, but not unknown, local induration, glandular involvement, and early (2 to 4 weeks) appearance of eruption aid diagnosis.	In vast majority of instances ulceration follows gummatous deposit so quickly that latter is never seen.	Little or no involvement of lymphatic glands of neck in intrinsic. Early and often extensive involvement in extrinsic. In extrinsic cancer marked displacement of larynx.	Cases of myxomata, adenomata, lipomata, angiomata, enchondromata, and mixed tumors are very rare.	Uterine disease, ovarian irritation, etc., a cause of parœsthesia, larynx or pharynx.	The central lesions, lesions of the trunk of the nerves, or the peripheral causes that may give rise to above paralyses, are many and varied.

laurocerasus. **L., dwarf,** Kalmia angustifolia. **L., great,** Rhododendron maximum. **L., ground,** Epigæa repens. **L., moun'tain,** Kalmia latifolia, rhododendron. **L., nar'row-leaved,** Kalmia angustifolia. **L., pale,** Kalmia glauca. **L., poi'son,** Prunus laurocerasus. **L., rose,** Kalmia latifolia **L., sheep,** Kalmia angustifolia. **L., swamp,** Kalmia glauca. **L., sweet,** Illicium floridanum. **L. water,** Aqua laurocerasi; Prunus laurocerasus. **L., white,** Magnolia glauca.

Laure'lia sempervir'ens. Chili sassafras; Peruvian nutmeg; the seeds are aromatic.

Laurentia pinnatifida, law-ren'she-ah pin-nat-if'-id-ah. Pepper dulse; species of Algæ, eaten in Scotland.

Laureola, law-re'ol-ah. Daphne laureola.

Laur'in. Compound of glyceril and lauric acid found in Laurus nobilis.

Laurocer'asi fo'lia. Cherry-laurel leaves; fresh leaves of Prunus laurocerasus.

Laurocerasus, laur-o-ser'as-us (*laurus* and *cerasus*, cherry tree). Prunus laurocerasus.

Laurus, lawr'us. *Daphne, Laurel, Sweet bay;* ord. Lauraceæ. The leaves and berries have a sweet, fragrant smell and an aromatic, astringent taste. Sweet bay has been advised as a stomachic and carminative, sometimes employed as a fomentation and in glysters. Infusion of the fruit is employed in impetigo. **L. æstiva'lis,** L. benzoin. **L. Alexandri'na angustifo'lia,** Ruscus hypoglossum. **L. Apollo'nis,** laurus. **L. ben'zoin,** *Spice wood, Spice bush, Benjamin bush, Allspice bush, Wild allspice, Spice berry, Fever wood, Fever bush.* Indigenous shrub; all parts have a spicy, agreeable flavor, which is strongest in the bark and berries. Infusion or decoction of the small branches is said to be vermifuge and an agreeable drink in low fevers. The bark has been used in intermittents; the berries, dried and powdered, for allspice. The oil of the berries is excitant. **L. cam'phora** or **camphorif'era,** see *Camphor.* **L. canel'la,** L. cassia. **L. cas'sia,** species of Laurus yielding *Casia, Cassia, Canella, Wild cinnamon, Malabar cinnamon.* Bark and leaves abound with the flavor of cinnamon, for which they may be substituted, but they are much weaker. The unopened flower-buds are used in the same manner. **L. cer'asus,** Prunus cinnamomoïdes. **L. cinnamomoï'des,** Nectandra cinnamomoïdes. **L. cinnamo'mum,** common bark, obtained also from *Cinnamomum aromaticum,* is stimulant and carminative, and is employed chiefly as a grateful aromatic to cover the taste of nauseous remedies. Dose, gr. x–xx. The *flowers,* called *Cassiæ flores,* possess aromatic and astringent virtues, and may be used wherever cinna-

mon is required. Volatile oil of the bark—*Oleum cinnamomi, Oil of cinnamon*—is officinal in the Ph. U. S. and Br. **L. cubeb'a,** Piper cubeba. **L. culil'aban** or **culil'awan,** tree affording *Cortex culilawan* or *culilaban, Culilawan, Culitlawan, Cortex caryophylloïdes* or *Caryophylloïdes Amboinensis.* Bark resembles sassafras in appearance and properties, and is used in Java as a condiment. **L. malabath'rum,** see *Malabathrum.* **L. no'bilis,** laurus. **L. parvifio'ra,** leather-leaved laurel of W. Indies. Leaves are aromatic and tonic. **L. per'sea,** Persea gratissima. **L. pseudoben'zoin,** L. benzoin. **L. sas'safras,** *Persea sassafras, Sassafras.* Indigenous in the United States. Sassafras wood and root, *Sassafras radix,* and especially the bark of the root, *Sassafras radicis cortex, Sassafrus* (Ph. U. S.), have been considered stimulant, sudorific, and diuretic. Virtues depend upon the essential oil, oleum sassafras, the odor of which is not unlike that of fennel. It has been used in cutaneous diseases, chronic rheumatism, etc., in infusion, which has also been taken as tea; see *Saloop.* The pith of the stems, *Sassafras medulla* (Ph. U. S.), abounds in gummy matter, which it readily imparts to water, forming a limpid mucilage, much employed as a collyrium in ophthalmia and as a drink in dysentery, catarrh, etc. (one drachm of the pith to a pint of boiling water).

Lautissima vina, law-tis'sim-ah ve'nah (superlative of **Lautus,** elegant). Wines thoroughly purified or strongly impregnated with myrrh.

Lavacrum, lav-ak'rum (*lavo,* to wash). Bath; lotion. **L. ophthal'micum,** collyrium.

Lavage, lav-azh' (F.) (*lavo,* to wash). Washing; washing out of the stomach by repeated injection and ejection of water through a stomach-tube.

Lavamen'tum (*lavo,* to wash). Clyster.

Lavandula, la-van'du-lah, **L. ve'ra** (*lavo,* to wash, from being used in baths). *Common lavender,* ord. Labiatæ. Odor of lavender flowers, *Lavandula* (Ph. U. S.), is fragrant and agreeable; taste warm and bitterish—depending upon the essential oil. It has been used as a stimulant, particularly in the form of the oil, oleum lavandulæ (Ph. U. S. and Br.); the dried leaves are errhine. **L. angustifo'lia,** lavandula. **L. latifo'lia,** lavandula; L. spica. **L. officina'lis,** lavandula. **L. spi'ca** or **ve'ra,** *French lavender,* yields oil of spike; used as a liniment in paralysis and in veterinary medicine. **L. stœch'as,** cassidony; French lavender; flowers are expectorant and antispasmodic. **L. ve'ra,** true lavender; lavandula. **L. vulga'ris,** lavandula; L. spica.

Lava'tion. Lavage. **L. of the blood,** intravenous injection of water.

Lave'ment (F.). Enema.

Lavender (lav'en-dur), **common.** Lavandula. **L., fe'male,** Lavandula latifolia. **L., French,** Lavandula spica. **L., sea,** Statice Caroliniana; Statice limonium. **L., spike,** Lavandula spica.

Lavendula, la-ven'du-lah. Lavandula.

Lav'er. Ulva latissima. **L., broad green,** Ulva latissima. **L. German'icum,** Veronica beccabunga. **L., lacin'iated pur'ple,** Ulva umbilicalis. **L. odora'tum,** Sisymbrium nasturtium. **L., pur'ple,** Porphyria laciniata.

Laville's liq'uid. A gout nostrum said to contain the active principle of colocynth, quinia, cinchona, with unimportant salts of lime.

Lavipedium, la-ve-pe'de-um (*lavo,* to wash, *pes,* foot). Pediluvium.

Lawsonia alba, law-so'ne-ah al'bah (after Dr. J. Lawson) or **iner'mis.** *Smooth Lawsonia, Henna;* East Indian and African plant, the root of which is slightly astringent. In India the root of the *Lawsonia spinosa* is employed in lepra and other cutaneous affections.

Lax (*laxus,* loose). Diarrhœa.

Laxans, laks'ans (*laxo,* to loosen). Laxative; relaxant.

Laxatio, laks-ah'she-o. Relaxation.

Laxative, laks'at-iv. Medicine which gently opens the bowels; mild purgative.

Laxativus, laks-at-e'vus. Laxative. **L. In'dicus,** cambogia.

Laxator auris internus, laks-at'or aw'ris in-ter'nus. L. tympani major. **L. tym'pani ma'jor,** muscle arising from the spine of the sphenoid bone and from the cartilage of the Eustachian tube, and inserted by a tendon into the apophysis of Rau. It relaxes the membrana tympani. **L. tym'pani mi'nor,** very small muscle extending from the upper part of the external auditory canal, and inserted at the inferior part of the process of the handle of the malleus. Its existence is denied by most anatomists.

Laxitas, laks'it-as. Atony, laxity. **L. al'vi,** diarrhœa. **L. gingiva'rum,** relaxed condition of gums. **L. ingesto'rum** or **intestino'rum,** diarrhœa. **L. scro'ti,** relaxation of the scrotum; pendulous scrotum. **L. ventric'uli,** debility or atony of the stomach.

Laxity, laks'it-e. Laxness. Condition of a tissue when loose or relaxed, or of one which wants tone.

Lay'er, an'imal germ. Epiblast. **L., bacil'lar, of ret'ina,** tunica Jacobi or outermost layer of the retina. **L., base'ment,** membrana propria. **L., blastoder'mic,** germ-layer. **L., Bow'man's,** anterior elastic layer of cornea beneath epithelial layer. **L., cell,** see *Cell.* **L., cell'ular,** cellular coat. **L., claus'tral,** see *Claustral* and *Spindle-layer.* **L., cor'neal,** stratum corneum; epiblast. **L., cor'tical,** cortex of brain. **L., cremas'teric,** cremaster muscle; cremasteric fascia. **L., cutic'ular,** cuticle; cuticular membrane; external limiting membrane; hyaline layer at free end of columnar cell; see *Operculum* and *Cell-membrane.* **L., der'mal,** epiblast. **L., embryon'ic,** germ-layer. **L., epithe'lial,** cellular coat. **L., exter'nal blastoder'mic,** epiblast. **L., fundamen'tal,** primitive embryonic layer. **L., gelat'inous,** stratum gelatinosum. **L., germ** or **germ'inal,** segments of blastoderm, as hypoblast, mesoblast, epiblast. **L., gran'ular,** stratum granulosum; layer contiguous to cement of tooth; granular stratum of epidermis. **L., Hen'le's,** Henle's sheath; layer of cells forming external portion of inner root-sheath of hair, the inner portion being *Huxley's layer.* **L., horn'y,** stratum corneum. **L., Hux'ley's,** see *L., Henle's,* and *Huxley.* **L., in'ner germ,** hypoblast; stratum intermedium, substantia intermedia, mesoblast. **L., intes'tinal,** hypoblast. **L., lat'iced,** reticular layer. **L., Malpigh'ian,** rete mucosum. **L., mid'dle germ,** mesoblast. **L., mu'cous,** hypoblast **L., mus'cular,** layer characterized by presence of muscular fibres. **L., ner'vous,** epiblast. **L., neuroder'mal,** epiblast. **L., nu'clear,** stratum granulosum. **L., oöph'orous,** external portion of ovary. **L., osteogenet'ic,** portion of periosteum or of perichondrium contiguous to surface of bone or of cartilage, from which bone is to be developed. **L., outer germ,** epiblast. **L., pap'illary,** thick portion of corium adjacent to epidermis. **L., per'forated,** internal elastic coat. **L., pigment'al,** pigment-layer of retina; posterior layer of iris. **L., plas'ma,** layer of blood-corpuscles near wall of vessel, called *Sluggish* or *Still layer,* because they do not move as rapidly as those directly in the current. **L., prick'le-cell,** stratum spinosum of epidermis. **L., pri'mary germ'inal,** epiblast and mesoblast. **L., prim'itive** or **primor'dial,** original epiblast and hypoblast. **L., retic'ular,** corium, not including the papillæ or its deeper and innermost portion; second layer of iris; stratum lacunosum. **L. of rods,** bacillar layer of retina. **L., sen'sory,** epiblast. **L., se'rous,** epiblast; inner layer of pericardium. **L., skin,** epiblast. **L., slug'gish,** see *L., plasma.* **L., spin'dle,** layer of vertical fusiform cells seen in section through a convolution of the brain. **L., still,** L., plasma; see *Still layer.* **L., subpap'illary,** layer under papillary layer of skin; stratum vasculosum cutis. **L., superpap'illary,** rete mucosum. **L., troph'ic,** hypoblast. **L., vas'cular,** third layer of iris; deepest portion of visceral plate of mesoblast. **L., veg'etative germ,** hypoblast. **L., zo'nular,** stratum zonale.

Lay'ers of blastoder'ma. Epiblast, mesoblast, hypoblast.

Layman, la'man. See *Laity.*

Lazar. Leper.

Lazaret (laz-ar-et') **fever.** Low fever of crowded

lazarettos, where the air is overloaded with exhalations from the patients.

Lazaretto, laz-ar-et'to (*lazar*, a leper, from Lazarus.) Solitary edifice in most seaports of magnitude, intended for the disinfection of men and goods proceeding from places where communicable diseases prevail. **L. fe'ver,** form of fever breaking out among those who are crowded together in a small space.

Lazulite, laz'u-lite. Lapis lazuli.

Leach. Hirudo; physician.

Leach'craft. Medicine.

Leach'man. Physician.

Lead, led. Plumbum. **L., ac'etate of,** plumbi superacetas. **L., black,** graphites. **L., car'bonate of,** plumbi subcarbonas. **L., chlo'ride of,** plumbi chloridum. **L. col'ic,** see *Colica metallica.* **L., i'odide** or **io'duret of,** plumbi iodidum. **L. line,** blue line seen on the gums after poisoning by lead. **L. lo'tion,** lotion in which some salt of lead, as the subacetate, is an important ingredient. **L., ni'trate of,** plumbi nitras. **L., nitrosac'charate of,** plumbi nitrosaccharas. **L., o'leate of,** see *Emplastrum plumbi* and *Oleates.* **L., ox'ide of, semivitrified,** plumbi oxidum semivitreum. **L. pal'sy,** paralysis saturnina. **L. paral'ysis,** paralysis induced by the poison of lead. **L. poi'soning,** morbid phenomena induced by lead received into the system. **L., red,** plumbi oxidum rubrum. **L. rheu'matism,** *Lead neuralgia;* neuralgic and spasmodic pains caused by the poison of lead. **L., subcar'bonate of,** plumbi subcarbonas. **L., superac'etate of,** plumbi superacetas. **L., tan'nate of,** see *Tannin.* **L. wa'ter,** liquor plumbi subacetatis dilutus. **L., white,** plumbi subcarbonas.

Leader, le'dur (that which leads). Tendon.

Leading, led'ing. Familiar name for lead-poisoning of those engaged in smelting.

Leadwort, led'wurt. Plumbago Europæa. **L., Cape,** Plumbago Capensis.

Leaf, sour. Andromeda arborea.

Lean'ness. Emaciation.

Leap (bound, jump). Muscular movement or movements by which the body is detached from the soil by the forcible and sudden extension of the lower limbs, previously flexed upon the pelvis.

Leap'ing ague, a'gyu. Disease said by Scotch writers to be characterized by increased efficiency but depraved direction of the will, producing an irresistible propensity to dance and move about in a fantastic manner. See *Mania, dancing.*

Leather flower, leth'ur flow'ur. Clematis viorna. **L. jack'et,** eucalyptus. **L. wood,** Dirra palustris.

Leav'en. See *Leven.*

Leber's disease. Hereditary atrophy of the eyeball.

Lecane, lek'an-e (a bowl). Pelvis.

Lecanic, lek-an'ic. Pelvic.

Lec'ca gum. See *Lacca.*

Lecheneion, lek-en-i'on. Torcular Herophili.

Lecherous, letch'er-us. Libidinous.

Lecho, lek'o (*lechos*, bed). Puerpera; lying-in woman.

Lechopyra, lek-op'ir-ah (*lecho, pur*, fire). Puerperal fever.

Lecithigenous, les-e-thij'en-us (*lekithos*, yolk, *gennao*, to produce). Producing yolk.

Lecithin, les'e-thin (*lekithos*, yolk of egg). Substitution derivative of glycerin; waxy crystallizable substance obtained from yolk of egg, nervous and cerebral tissues, amniotic fluid, bile, etc.

Lecithoid, les'e-thoid. Resembling yolk of an egg.

Lecithophore, les-ith'o-for (*lekithos*, yolk of egg, *phoreo*, to bear). Cell-layer constituting the floor of the segmentation cavity in the human ovum and that of mammals generally.

Lecithos (les'e-thos) or **Lecithus,** les'e-thus. Yolk of egg. See *Ovum.*

Lecithymen, les-ith-e'men (*lekithos*, yolk, *hymen*, membrane). Vitelline membrane.

Leco, le'ko. Penis.

Lecontia Virginica, le-kon'she-ah vir-jin'ik-ah. Peltandra Virginica.

Lectisternium, lek-te-stern'e-um (*lectus* bed, *sterno*, to spread). Arrangement of a bed to adapt it to a particular disease. Supplication, with the Romans, in times of public danger, when couches were spread for the gods, and their images were taken down from their pedestals and placed upon them around the altars.

Lectualis, lek-tu-al'is (*lectus*, bed). Epithet applied to protracted disease.

Lectulus (lek'tu-lus) (dim. of **Lectus,** bed). Litter or cradle. **L. medica'tus,** pad of herbs for fomentation; see *Fomentation.* **L. stramin'eus,** straw splint.

Ledoy'en's disinfect'ing flu'id or **liq'uid.** Solution of nitrate of lead (plumb. nitrat., ℥j; aquæ, f℥j); used as an antiseptic and antibromic.

Ledum latifolium, le'dum lat-e-fo'le-um. Labrador tea, ord. Ericaceæ; grows in damp places in Canada and the United States. Leaves have a pleasant odor and taste, and have been used as tea; they are also pectoral and tonic. **L. palus'tre,** marsh tea, ord. Ericineæ; this plant has a bitter, subastringent taste, and was formerly used in Switzerland in place of hops; the leaves have been chewed and applied to burns.

Lee. Feculence; lixivium; ley; lye; urine.

Leea macrophylla, le'ah mak-ro-fil'lah. E. Indian plant; root has been prescribed in ringworm. **L. sambuci'na,** shrub of E. Indies; juice of leaves is stomachic and febrifuge, and used externally in inflammation of the eyes; the root in gastralgia. **L. staphyle'a,** root of this Malabar plant is used in colic; leaves are used in dyspepsia.

Leech. Hirudo. See *Ectozoa.* Physician. See *Leach.* **L., artifi'cial,** antlia; bdellometer. **L., horse,** veterinary surgeon. **L., mechan'ical,** L., artificial.

Leech'craft. Medicine; art of healing.

Leech'dom (*leech, dom*, termination denoting condition or state). Medicine; art of healing.

Leech'ing. Drawing blood by the use of leeches.

Leech'wort. Plantago lanceolata.

Leek. Allium porrum.

Lees, soap. Liquor potassæ.

Left-brained. One who has power of speech centrally located in the left subfrontal convolution.

Leg. Portion of the lower extremity extending from the knee to the foot; it consists of three bones, tibia, fibula, and patella, and a great number of muscles, vessels, and nerves. The projection formed by the muscles at the back part of the leg has received the name of calf of the leg. **L. asleep',** familiar name for the obtunding of sensation produced by pressure on the great nerve of the leg. As the nerve-fibres gradually recover from the effect of the pressure a pricking sensation is experienced, familiarly known under the name *Pins and needles.* **L., Barba'does** or **Coch'in,** elephantiasis of the leg. **L., Do'ver's,** hypochondriasis. **L. fe'ver,** fever occurring in Africa with exanthematous eruption and pain in the legs. **L., lawn-ten'nis,** rupture of muscle or muscles of the calf of the leg from over-exercise in this game. **L., milk, swelled,** or **white,** phlegmasia alba dolens.

Legitimate, lej-it'im-ate (*lex*, law). Epithet applied to things which are according to rule or law; a legitimate child is one conceived or born during marriage. Legitimate diseases are those which follow a regular march.

Legna (leg'nah) (fringed edge), **Legnon** (leg'non), or **Legnum,** leg'num. Orifice of the pudendum muliebre or of the uterus.

Legumin, leg-u'min (*lego*, to gather). All kinds of pulse, as peas, beans, etc.; so called because usually gathered by the hand, instead of being reaped. See *Casein.*

Leichen, leik'en. Lichen.

Leidenteria, li-den-ter'e-ah. Lientery.

Leimanthium Virginicum, li-man'the-um vir-jin'ik-um (*leimon*, meadow, *anthos*, flower). Melanthium Virginicum.

Leiocephali, li-o-sef'al-e (*leios*, smooth, *kephale*,

head). People characterized by straight and wavy hair.

Leiocome, li'o-kome. Dextrin.

Leiodermia, li-o-dur'me-ah (*leios*, smooth, *derma*, skin). Glossy or smooth skin seen in some cutaneous affections; xeroderma.

Leiomyoma, li-o-me-o'mah (*leios*, smooth, *myoma*). Tumor mainly composed of smooth muscular fibres, as of the bowel, urinary bladder, etc.

Leiopus, li'o-pus (*leios*, smooth, *pous*, foot). One affected with flat-footedness, splay-footedness (leiopodia, liopodia).

Leiphæmi, li-phe'me. Pale or anæmic persons.

Leiphæmia, li-phe'me-ah (*leipo*, *haima*, blood). Poverty or paucity of blood.

Leiphæmos, li-phe'mos (same etymon). Vicious state of the blood, as anæmia; patient laboring under this condition.

Leipo, li'po (*leipo*, to fail). In composition, want, defect.

Leipodermia, li-po-dur'me-ah (*leipo*, *derma*, skin). Want of foreskin or prepuce.

Leipodermus, li-po-dur'mus. One who wants part of his skin; especially one who wants the prepuce.

Leipomeria, li-po-mer'e-ah. Lipomeria.

Leipopsychia, li-po-sik'e-ah (*leipo*, *psuche*, breath of life). Syncope.

Leipothymia, li-po-thim'e-ah (*leipo*, *thumos*, mind). Syncope.

Leipyrias, li-pir'e-as (*leipo*, *pur*, fire). Species of continued fever with burning heat of internal parts and coldness of extremities. Semitertian fever.

Leirion, li're-on. Lilium candidum.

Lei'ter's coil. Device by means of which water of any temperature is kept running through coils of metal or rubber, which can be adjusted to any part of the body.

Le'ma or **Le'me.** Discharge from the eyes; drying up of natural glandular secretion from the eyelids; lippitudo.

Lemithocorton, lem-ith-o-kor'ton. Corallina Corsicana; helminthocorton.

Lemma, lem'mah. Cortex; feculence; furfur; sediment; sheath, as neurilemma, sarcolemma, etc.

Lemnian (lem'ne-an) **earth.** Compound of aluminium coming from the island of Lemnos.

Lemniscus, lem-nis'kus. Pessary; tent; bundle of nerve-fibres in pons and crus cerebri, upward prolongation of interolivary tract; penis; cephalic glands; see *Laqueus*. **L., infe'rior** or **low'er**, layer of nerve-fasciculi in tegmentum, proceeding from inferior corpora quadrigemina. Its lateral portion is called *lateral lemniscus*. The portion terminating in upper portion of corpora quadrigemina is called *superior*, *upper*, or *median lemniscus*.

Lem'on. See *Citrus medica*. **L. acid**, citric acid. **L. balm**, melissa. **L., ground**, Podophyllum montanum. **L. juice**, see *Citrus medica*. **L. juice, artificial**, see *Citrus medica*. **L. peel**, see *Citrus medica*. **L. scur'vy-grass**, Cochlearia officinalis; possesses antiscorbutic properties. **L. tree**, see *Citrus medica*. **L., wild**, Podophyllum montanum.

Lemonade, lem-un-ade'. Lemon-juice diluted with water and sweetened. See *Citrus medica*. **L., dry**, citric or tartaric acid reduced to powder and mixed with sugar. **L., magne'sian**, magnesii citras. **L., ni'tric**, nitric acid considerably diluted with water and sweetened. **L., sulphu'ric**, and **L., tartar'ic**, are made with sulphuric and tartaric acids respectively.

Lem'ons, salt of. Oxalic acid.

Lemosite, lem-os'it-e. Chassie; lippitudo.

Leniceps, len'e-seps. Uterine forceps, consisting of two blades fastened to a horizontal handle, and made immovable when applied.

Leniens, len'e-ens (*lenio*, to assuage). Laxative, lenitive, demulcent, emollient.

Le'nis (gentle). Lenitive.

Lenitive, len'it-iv. Medicine which allays irritation or palliates disease; laxative medicine; a lenitive electuary is one that purges gently.

Lenos, le'nos. Torcular Herophili.

Lens. Lentil. Piece of glass or other material made of such shape as to refract rays of light falling upon it. It is called *concave l.*, *convex l.*, etc. according to its shape. Crystalline lens. Ervum lentis. **L., ab'sence of**, aphakia. **L., achromat'ic**, lens so made as to correct chromatic aberration. **L., bifo'cal**, one made for presbyopic hypermetropia, the upper and lower surfaces being ground for distant and near objects respectively. **L., cicatric'ular**, mass in mature ovum produced by blending of germinal vesicle and peripheral layer of ovum. **L., converg'ent** or **converg'ing**, lens of such shape as to cause rays of light to converge to a focus. **L., crys'talline**, crystalline. **L., disloca'tion of**, may take place into the vitreous, the anterior chamber, or under the conjunctiva. **L., dispers'ing** or **diverg'ent** or **diverg'ing**, lens of such shape as to cause rays of light to diverge from a focus. **L. esculen'ta**, Ervum lens. **L., Stokes's**, a convex and a concave lens of same focal distance, movable upon each other, with which diagnosis of astigmatism may be made. **L., suspen'sory lig'ament of**, see *Suspensory*.

Lent rose. Narcissus pseudonarcissus.

Lenticonus, len-te-ko'nus. Cone-shaped protrusion from surface of crystalline lens.

Lenticula, len-tik'u-lah (dim. of **Lens**). Freckle; eruption of lenticular fever; papula lenticularis; lentigo. See *Ephelides*.

Lenticular, len-tik'u-lar. Having the shape of a lens or lentil, as lenticular bone. **L. gan'glion**, ophthalmic ganglion. **L. papil'læ**, papillæ circumvallatæ of the tongue.

Lenticulares glandulæ, len-tik-u-lah'rees glan'du-le. Lenticular glands; mucous follicles having the shape of a lentil, observed especially toward the base of the tongue.

Lenticulo-optic, len-tik'u-lo-op'tic. Relating to the lenticular nucleus.

Lentic'ulo-stri'ate. Relating to lenticulate nucleus and corpus striatum.

Lentic'ulo-thal'amic. Relating to lenticulate nucleus and thalamus opticus.

Lenticulus, len-tik'u-lus. Orbicular bone.

Lentiginous (len-tij'in-us) or **Lentiginose**, len-tij'in-oze. Affected with eruption of lentigo.

Lentigo, len-te'go. Freckles; sun-spots. See *Ephelides*.

Len'til. Ervum lens.

Lentiscinum vinum, len-tis'sin-um ve'num (*lentiscus*, mastich tree). Wine impregnated with mastich.

Lentiscus vulgaris, len-tis'kus vul-gar'is. Pistacia lentiscus.

Lentitia, len-tish'e-ah. Lentor.

Lentitis, len-te'tis. Inflammation of the lens; phacitis.

Lentitudo, len-te-tu'do. Torpor.

Lentor, len'tor (*lentus*, clammy). Torpor; viscidity or siziness of any fluid. See *Gluten*.

Lentous, len'tus. Tenacious.

Lenum (le'num) or **Le'nus** (pool). Torcular Herophili.

Le'o. Leontiasis.

Leon, le'on (*leon*, lion). In composition, lion.

Leonotis leonurus, le-o-no'tis le-o-nu'rus (*leon*, *ous*, ear.) Wild dagga; lion's tail; minaret flower, ord. Labiatæ. S. African plant of a peculiar smell, nauseous taste, and narcotic effect, employed in chronic cutaneous diseases. It is smoked like tobacco, and its leaves are cathartic and emmenagogue. In some districts of Cape Colony Leonotis ovata is used for the same purpose. **L. nepetefo'lia**, indigenous to Africa; ashes are used as an application to ringworm; in S. America the plant is used for rheumatism, as a diaphoretic. **L. ova'ta**, see *Leonotis leonurus*.

Leontiasis, le-on-te'as-is. Lepra on the face, from its fancied resemblance to the face of the lion; *Leonine* and *Leontine lepra;* also multiple leprosy attacking various parts of the body.

Leontice thalictroïdes, le-on'te-se thal-ik-tro-e'dees. Caulophyllum thalictroïdes.

Leontion, le-on'she-on. Leontiasis.

Leontodon taraxacum, le-on'to-don tar-aks'ak-um (*leon, odous*, tooth). Dandelion; pissabed, ord. Compositæ. The young leaves are sometimes eaten as salad. The roots are also roasted and used as a substitute for coffee. The root, *Taraxacum* (Ph. U. S), Taraxaci radix, is aperient and diuretic.

Leontopodium, le-on-to-pod'e-um (*leon, pous*, foot). Alchemilla.

Leonurus cardiaca, le-on-u'rus kar-de'ak-ah (*leon, oura*, tail; lion's tail). Motherwort, throatwort, ord. Labiatæ; grows in America and Europe. Nauseous bitter, and hence used in hysteria and other nervous affections, also in amenorrhœa and bronchitis, etc. **L. lana'tus**, Ballota lanata.

Leopard's (lep'ard's) **bane**. Arnica montana; Doronicum pardalianches.

Leopold (le'o-pold) **lip**. See *Lip, Leopold's*.

Leper, lep'er. See *Leprous*.

Lepia campestris, lep'e-ah kam-pes'tris. Thlaspi campestre. **L. sati'va**, Lepidium iberis.

Lepidine, lep'id-een (*lepis*, scale or husk). Base derived from coal-oil, $C_{28}H_{40}O$; also base, $C_{10}H_9N$, from quinoline; bitter principle from Lepidium iberis, used as an antipyretic.

Lepidium, lep-id'e-um. *Pepperwort, Cress, Peppergrass*, ord. Cruciferæ. Antiscorbutic. **L. campes'tre**, Thlaspi campestre. **L. ibe'ris**, this plant possesses a warm, pungent taste, like other cresses, and is antiscorbutic, antiseptic, and stomachic. **L. latifo'lium**, **L. olera'ceum**, of New Zealand, **L. piscid'ium** of S. Sea Islands, **L. procum'bens** of Southern Europe, **L. rud'erale** of Europe and America, have all been used for their antiscorbutic effect. **L. sati'vum**, green mustard; this plant possesses warm, stimulating properties, and is used like L. iberis. **L. squama'tum**, Cochlearia coronopus. **L. Virgin'icum**, American wild peppergrass, has been used as antiscorbutic, and in diarrhœa, dropsy, etc.

Lepido, lep'id-o (*lepis*, scale). In composition, scale.

Lepidodes (lep-id-o'dees) or **Lepidoïdes**, lep-id-o-e'dees. Squamous.

Lepidosarcoma, lep-id-o-sar-ko'mah. Fleshy tumor, covered with scales, described as noticed especially in the interior of the mouth.

Lepidosin, lep-id-o'sin. Analogue in fishes of human dentine.

Lepidosis, lep-id-o'sis. Scaly disease. **L. ichthyi'asis**, ichthyosis. **L. ichthyi'asis cornig'era**, horny excrescences. **L. lep'ra**, psoriasis. **L. lepri'asis**, lepra. **L. pityri'asis**, pityriasis. **L. psori'asis**, psoriasis; eczema squamosum.

Lepidotis clavata, lep-id-o'tis klav-at'ah. Lycopodium clavatum.

Lepira, lep'ir-ah. Lepra.

Lep'is. Scale.

Lepisma, lep-iz'mah. Squamous portion.

Lepoid, le'poid (*lepos*, bark, *eidos*, resemblance). Rough brownish crust sometimes seen on the countenances of elderly persons; probably a variety of epithelioma or lupus.

Leporinum labium, lep-or-e'num lab'e-um (*lepus*, hare). Hare-lip. **L. ros'trum**, hare-lip.

Leporinus oculus, lep-or-e'nus ok'u-lus. Lagophthalmia.

Leposteophyton (lep-os-te-of'it-on) or **Lepsteophytum**, lep-os-te-of'it-um (*lepis, osteon*, bone, *phuton*, vegetation). Thin scale of bone, the result of a morbid growth.

Lepra, lep'rah (*lepros*, scaly). Leprosy. Term applied to various affections very different in character: 1. To the *Leprosy of the Jews, Eastern leprosy, Leuce, Lepidosis, Lepriasis canescens, Lepra mosaica, L. Judæorum, Judaica*, or *Hebræorum*—a variety of the *Alphos* or *Lepra alphoïdes*. The eruption was, generally, not scaly, but consisted of smooth, shining patches, on which the hair turned white and silky, and the skin, with the muscular flesh, lost its sensibility. It was incurable. 2. To the *Elephantiasis* or *Lepra of the Arabs* (see *Elephantiasis*); and, 3. To the *Lepra of the Greeks*, which includes all the varieties met with at the present day. It is characterized by scaly patches of different sizes, but having always nearly a circular form. The three chief varieties of this lepra are—

1. *Lepra alphoïdes, alba*, or *albida, Lepidosis, Lepriasis albida, Alphos, Morphœa alba, Vitiligo alphus, Albaras alba, Albaræs, Albaros, White leprosy, Alphous disease.* Affection characterized by white patches, surrounded by a rose-colored areola, appearing here and there on the surface; depressed in the middle. A blotchy and not dangerous form of the disease, common in Arabia, is termed *Baras*. Under a more hideous form, called *Djedam*, the joints swell, sluggish and spreading ulcers form, causing frightful sores on various parts, and death gradually supervenes.

2. *Lepra nigricans*, or *Melas*, or *Maculosa nigra, Vitiligo melas* or *nigra, Morphœa* or *Albaras nigra, Melas, Lepidosis lepriasis nigricans, Black leprosy*, in which the scales are livid, the size of half a dollar, and diffused over the body, but less widely than in the *Alphoïdes*. French pathologists usually admit three species of lepra—scaly, crustaceous, and tubercular.

3. *Lepra vulgaris, Lepidosis lepriasis vulgaris*, characterized by glabrous scales, whitish, size of a crown-piece; preceded by smaller reddish and glossy elevations of the skin, encircled by a dry, red, and slightly elevated border, often confluent; sometimes covering the whole body except the face.

When associated with syphilis, lepra is called *Syphilitic lepra, L. syphilitica*.

Lepra appears to be endemic in some parts of the world. Imperfect and faulty nutriment contributes to its development. Other forms of lepra have been described.

Lepra al'ba or **al'bida**. See *Lepra*. **L. alboras**, psoriasis. **L. alope'cia**, alopecia following lepra or psoriasis. **L. alphoi'des**, L. vulgaris; psoriasis guttata, psoriasis nummulata. **L. alpho'sis**, psoriasis. **L. anæsthet'ica**, anæsthetic leprosy; elephantiasis anæsthetica. **L. Ar'abum**, elephantiasis Arabica. **L. Astu'rica**, see *Pellagra*. **L., black**, mal del Pinto. **L. borea'lis**, radzyge. **L. circina'ta**, psoriasis, circinate form. **L. crusta'cea** or **crusto'sa**, psoriasis; black leprosy. **L. cu'tis**, leprosy of skin. **L. diffu'sa**, psoriasis diffusa. **L. elephan'tia**, elephantiasis Græcorum. **L. elephanti'asis**, see *Leprosy*. **L. fungif'era** or **fungifor'mes**, elephantiasis papillaris; frambœsia. **L. gangræno'sa**, ngerengere. **L. glab'ra**, anæsthetic leprosy. **L. Græco'rum**, lepra, psoriasis. **L. Hebræo'rum**, see *Lepra*. **L. ichthyo'sis**, ichthyosis. **L. Ital'ica**, pellagra. **L. of the Jews**, **L. Judæo'rum** or **Juda'ica**, see *Leprosy*. **L. junctura'rum**, L. mutilans. **L., le'onine** or **leon'tine**, leontiasis. **L. leu'ce**, anæsthetic leprosy. **L. Lombardica**, pellagra. **L. maculo'sa**, macular form of leprosy. **L. maculo'sa ni'gra**, L. nigricans. **L. Malabar'ica**, leprosy of Malabar. **L. Mediolanen'sis**, pellagra. **L. me'las**, black leprosy; lepra nigricans. **L. mercuria'lis**, eczema mercuriale. **L. morphœ'a**, macular form of leprosy. **L. Mosa'ica**, see *Lepra*. **L. mu'tilans**, *Joint evil;* form of anæsthetic leprosy, in advanced stages of which parts become deeply gangrenous and drop off. **L. nervo'rum**, anæsthetic leprosy; diffuse tumefaction of nerves. **L. ni'gricans**, black leprosy; also psoriasis with unusually dark patches. **L. nodo'sa**, tubercular form of leprosy. **L. Norve'gica**, radzyge and spedalskhed. **L. nummula'ris**, psoriasis nummularis. **L. occidenta'lis**, leprosy; elephantiasis Græcorum. **L. orienta'lis**, elephantiasis Arabum. **L. phlegmat'ica**, leprosy. **L. pso'rica**, psoriasis. **L. puncta'ta**, psoriasis guttata. **L. scabio'sa**, scabies crustosa. **L. septentriona'lis**, radzyge and spedalskhed. **L. squamo'sa**, impetigo. **L. syphilit'ica**, syphilitic form of psoriasis; see *Lepra*. **L. Tau'rica**, leprosy of the Taurians, of the Crimea, or of the Cossacks, supposed to have been brought to the Crimea by troops on the march. **L. tuberculo'sa**, tubercular form of leprosy. **L. umbro'sa**, black leprosy. **L. universa'lis**, general psoriasis. **L. ve'ra**, leprosy; elephantiasis Græcorum; see *Lepra*. **L. vulga'ris**, psoriasis in large patches; see *Lepra*. **L. of Wil'lan**, psoriasis.

Leprelcosis, lep-rel-ko'sis (*lepra*, *helkosis*, ulceration). Ulceration from leprosy.

Lepriasis, lep-re'as-is. Psoriasis; leprosy. **L. al'bida**, psoriasis. **L. ni'gricans**, lepra nigricans. **L. vulga'ris**, lepra vulgaris.

Lepricus (lep're-kus) or **Lepro'des**. Leprosy.

Lepromorphe, lep-ro-mor'fe (*lepra*, *morphe*, form). Variety of leprosy involving the bones.

Leprophthalmia, lep-rof-thal'me-ah. Leprous form of ophthalmia. One so affected is a *Leprophthalmus*.

Leprosa'rium or **Lepro'sery**. Hospital for lepers.

Leprosis (lep-ro'sis) or **Lepros'itas**. Leprosy.

Leprosy, lep'ro-se. Chronic endemic constitutional affection produced by infection with bacilius lepræ, attended with infiltration, changes in the nutrition of parts, and the appearance of varying cutaneous eruptions in the different organs and tissues of the body, ending in wasting away, intense diarrhœa, and death in almost all cases. The tubercular and anæsthetic forms of leprosy are those generally described. **L., anæsthet'ic**, leprous disease implicating the nerves, so that from hyperæsthesia at first there soon supervenes entire loss of sensibility, occasionally with paralysis and disordered nutrition, ulceration, and mortification. Elephantiasis anæsthetica. See *Lepra* and *Lepra mutilans*. **L., artic'ular**, lepra mutilans. **L., black**, lepra nigricans. **L. of Cos'sacks**, lepra Taurica. **L. of the Crime'a**, see *Lepra Taurica*. **L., cuta'neous**, tubercular leprosy; leprosy affecting tissues of the skin; pemphigus leprosus. **L., dry**, leprous disease of hot climates, attended with circumscribed muscular atrophy of hand; anæsthetic leprosy. **L., East'ern**, elephantiasis Arabum; see *Leprosy*. **L., Ital'ian**, pellagra; lepra mutilans; arthroleprosis. **L., Lombard'ian**, pellagra. **L., mac'ular**, L. with spots of various degrees of discoloration. **L. of Mal'abar**, elephantiasis Arabum. **L., nod'ular**, tubercular leprosy. **L., North'ern** or **Norwe'gian**, radezyge and spedalskhed. **L., scab'by**, psoriasis. **L. of the Tau'rians**, see *Lepra Taurica*. **L., trophoneurot'ic**, anæsthetic leprosy. **L., true**, elephantiasis Græcorum. **L., tuber'cular**, leprosy attended with tubercular growths on the external or internal parts of the body, usually on the face, which it disfigures; ulceration and mortification or extensive destruction of parts usually occur. **L., white**, form of anæsthetic leprosy; macular form, the spots being white; lepra alphoïdes.

Leprotic (lep-rot'ik) or **Leprous**, lep'rus. Relating to or resembling or affected with leprosy.

Leprurethrorrhœa, lep-ru-re-thror-rhe'ah. Mucous urethral discharge in or after leprosy.

Lep'sis. Attack of disease.

Leptandra (lep-tan'drah) **purpu'rea** (*lepto*, *aner*, a man). *Physic root, Black root, Whorlywort, Culver's root, Brinton root, Bowman root.* Root is bitter and nauseous, and when fresh emetic and cathartic. **L. Virgin'ica**, indigenous plant, growing throughout the United States; root, *Leptandra*, is officinal.

Leptandrin, lep-tan'drin. Bitter resinous matter from Leptandra Virginica; cholagogue cathartic.

Lepthymenia, lep-thim-en'e-ah. Leptohymenia.

Lep'to (*leptos*, light). In composition, thin, light.

Leptocephalia, lep-to-sef-al'e-ah (*lepto*, *kephale*, head). Monstrosity with an abnormally small head.

Leptochasmus, lep-to-kaz'mus (*lepto*, *chasme*, a gap). Having angle of 94° to 114°, formed by crossing at punctum alæ vomeris of two lines projected from that point to punctum spinæ nasalis posterioris and punctum foraminis magni anterius.

Leptochroa (lep-tok'ro-ah) or **Leptochros**, lep'to-kros (*lepto*, *chroa*, color). Fineness or thinness of skin.

Leptochymia, lep-to-kim'e-ah (*lepto*, *chumos*, juice). Morbid thinness of the juices.

Leptodermia, lep-to-dur'me-ah (*lepto*, *derma*, skin). Thinness or fineness of skin.

Leptohymenia, lep-to-him-en'e-ah (*lepto*, *humen*, membrane). Thinness or delicacy of membrane.

Leptomeningitis, lep-to-men-in-je'tis (*lepto*, *meninx*, membrane). Inflammation of thin membranes, as arachnitis meningitis, and encephalitis. **L., spi'nal**, inflammation of pia mater and arachnoid of spinal cord.

Leptomeninx, lep-to-men'inks (*lepto*, *meninx*, membrane). Arachnoid, alone or with pia mater.

Leptomeria, lep-to-mer'e-ah (*lepto*, *meros*, part). Fineness or delicacy of bodily formation or build.

Leptomitus, lep-tom'it-us (*lepto*, *mitos*, thread). Fungous growth on the skin.

Leptophonia, lep-to-fo'ne-ah (*lepto*, *phone*, voice). Weakness or delicacy of voice.

Leptorrhine, lep'tor-rheen (*lepto*, *rhis*, nose). Having nasal index less than 48°.

Leptosper'mum flaves'cens (*lepto*, *sperma*, seed). Australian plant; astringent. **L. leucaden'drum**, Melaleuca cajaputi. **L. scopa'rium**, antiscorbutic.

Leptothrix, lep'to-thriks (*lepto*, *thrix*, hair). Genus of micro-organisms having thin filamentous cells (Cohn). According to others, any filamentous bacterium. **L. autumna'lis**, the harvest-bug; important medically only on account of the irritation caused by it on the skin. **L. bucca'lis**, *Alga of the mouth*, a microscopic parasitic plant developed in some forms of aphthous inflammation, but detected also in the buccal secretions of healthy persons, and said to produce caries of the teeth; and in discharges from the lacrymal duct, evacuations of typhus fever, etc. **L. epiderm'idis** or **epidermal'is**, variety of leptothrix detected in the epidermis, supposed to cause erythrasma; see *Bacillus epidermidis*. **L. innomina'ta**, L. buccalis. **L. lacryma'lis**, parasitic cheesy growth in smaller lacrymal canals. **L. max'ima bucca'lis**, large form of L. buccalis. **L. pulmona'lis**, L. buccalis.

Leptotrich'ia. Fineness of hair; leptothrix.

Leptotrophia, lep-to-trof'e-ah (*lepto*, *trophe*, nourishment). Light nutrition or diet.

Leptus (lep'tus) **America'nus**. American harvest-mite. Same effects as L. autumnalis; it is identical with it, according to some. **L. autumna'lis** or **ir'ritans**, Leptothrix autumnalis.

Leptyn'sis (*leptuno*, to make thin). Emaciation.

Leptyntica, lep-tin'te-kah. Attenuants.

Leptysmus, lep-tiz'mus. Emaciation.

Lerema (ler-a'mah) or **Leresis**, ler-a'sis (*lereo*, to speak foolishly). Foolish loquacity. See *Dementia*.

Leros, le'ros. Delirium. See *Dementia*.

Les'bian love. Sexual intercourse between women.

Leseolus, les-e'ol-us. According to Paracelsus, transparent salt which cured jaundice; hence *Leseoli morbus*, jaundice.

Lesion, le'zhun (*lædo*, *læsum*, to injure). Derangement, disorder; morbid change, either in exercise of functions or in texture of organs. *Organic lesion* is synonymous with *organic disease*. **L. of continu'ity**, see *Continuity*, *solution of*. **L. of nutri'tion**, morbid change in the process of nutrition.

Letalitas, le-tal'it-as (*letum*, death). See *Mortal*.

Lethal, le'thal. Mortal.

Lethalis, le-thal'is (*lethum*, death). Lethiferous, mortal.

Lethalitas (le-thal'it-as) or **Lethality**, le-thal'it-e. See *Mortal*.

Lethargic, le-thar'jik (*lethe*, oblivion, *argos*, inactive), Relating to or affected with lethargy.

Lethargy, leth'ar-je. Constant stupor or torpor from which it is almost impossible to arouse the individual; if aroused, he speedily relapses into his former condition. **L., Af'rican**, African sleeping sickness. **L., ne'gro**, African sleeping sickness.

Lethea, leth-e'ah (*lethe*, oblivion). Papaver.

Letheon, le'the-on (*lethe*, oblivion). A name at first given to ether when inhaled as an anæsthetic.

Lethiferous, leth-if'er-us (*lethe*, oblivion, *phero*, to bear). Death-bearing; deadly; causing sleep.

Lethum, la'thum. Death.

Letterwort, let'ur-wurt. Hellebore.

Let'ting blood. Bloodletting.

Lettuce, let'tus. Lactuca. **L., blue**, Mulgedium acuminatum. **L., false**, Mulgedium floridanum. **L., In'dian**, see *Calumba*. **L., o'pium**, see *Lactuca*. **L., strong-scent'ed**, Lactuca virosa. **L., white**, Nabalus albus. **L., wild**, Lactuca elongata.

Letum, la'tum. Death.

Leucæmia, lu-ke'me-ah (*leuco*, *haima*, blood). Con-

dition of the blood in which it is deficient in coloring matter. See *Leucocythæmia.*

Leucæmic, lu-ke'mik. Leucocythæmic.

Leucæthiopia, lu-ke-the-o'pe-ah (*leuco, Aithiops,* Ethiopian). Albino negro. See *Albino.*

Leucæthiops, lu-ke'the-ops. Albino.

Leucangeii'tis (*leuco, angeion,* vessel). Inflammation of the lymphatics.

Leucania, lu-kan'e-ah. Laucania.

Leucanthemum, lu-kan'the-mum (*leuco, anthemon,* flower). Anthemis nobilis, Matricaria chamomilla. **L. vulga're,** Chrysanthemum leucanthemum.

Leucasmus, lu-kaz'mus (*leukos,* white). Whitening; blanching. Deficiency of pigment-formation in the skin. **L. cu'tis,** see *Achroma* and *Leucoderma.* **L. figura'tus,** circumscribed leucoderma; vitiligo; see *Achroma.* **L. universa'lis,** albinism; see *Albino.*

Leuce, lu'se. Herpes exedens, lepra alba.

Leucelectrum, lu-sel-ek'trum (*leuco, elektron,* amber). Succinum (album).

Leuchæmia, lu-ke'me-ah. Leucæmia.

Leucic acid, lu'sik as'id (*leukos,* white). Acid obtained by subjecting leucin to action of nitric acid.

Leucin, lu'sin. White crystalline substance resulting from the disintegration of albuminous substances well supplied with nitrogen; found in the pancreas, spleen, thymus, etc., and is produced in gangrene of the liver, spleen, lungs, etc., in the urine of typhoid fever, and in acute yellow atrophy of the liver (*Leucinosis*), leucin being one of its chief products.

Leucino'sis. Acute yellow atrophy of the liver.

Leucis'mus. Albinism.

Leucitis, lu-se'tis. Sclerotitis.

Leuco, lu'ko (*leukos,* white). In composition, white.

Leucoblasts, lu'ko-blasts (*leuco, blastos,* shoot). Cells in red marrow of bones, possibly at a later period red corpuscles; leucoplast; leucocyte.

Leucochroos, lu-kok'ro-os (*leuco, chroa,* skin). White skin.

Leucocyte, lu'ko-site (*leuco, kutos,* cell). Amœboid or lymphoid cell; white blood-corpuscle. See *Cytoid, Globules of the blood,* and *Sarcophyte.*

Leucocythæmia, lu-ko-sith-e'me-ah (*leuco, kutos,* cell, *haima,* blood). Leucæmia; white-cell blood. Condition of the blood consisting in a superabundant development of the white corpuscles — *Polyleucocythæmia*— a disease at times accompanied by enlargement of the spleen and liver, and by increased size of the lymphatic glands (organs which are concerned in hæmatosis or *Lymphæmia*), anæmia, fever, hemorrhages, etc. It is usually fatal. It is the *Leucocytosis* of Virchow. The red corpuscles are diminished in number. **L., ad'enoid,** same condition, alterations in blood being due to enlargement of lymphatic glands in various parts of the body. **L., essen'tial,** chronic form of l. commonly met with. See *Leucocythæmia.* **L., gan'glionar** or **ganglion'ic,** L., adenoid. **L., idiopath'ic,** L., essential. **L., lymphat'ic,** L., adenoid. **L., med'ullary** or **myelogen'ic,** L. affecting medullary tissue of bones. **L., progres'sive,** L., essential. **L., splen'ic,** L. in which the spleen is particularly involved; cachexia splenica.

Leucocytogenesis, lu-ko-se-to-jen'es-is. Formation or development of white corpuscles or leucocytes.

Leucocytoma, lu-ko-se-to'mah. Tumor, elements of which resemble white corpuscles or leucocytes.

Leucocytosis, lu-ko-se-to'sis (*leuco, kutos,* cell). See *Leucocythæmia.*

Leucocytotic, lu-ko-se-tot'ik. Relating or appertaining to leucocytosis.

Leucodendron, lu-ko-den'dron (*leuco, dendron,* tree). Melaleuca cajaputi.

Leucoderma (lu-ko-dur'mah) or **Leucodermia** (*leuco, derma,* skin). See *Achroma, Albinism, Vitiligo.*

Leucohæmia, lu-ko-he'me-ah. Leucocythæmia.

Leucoinoitis, lu-ko-in-o-e'tis (*leuco, is,* fibre). Inflammation of white fibrous tissues, bronchial especially.

Leucoium, lu-koi'um (*leuco, ion,* violet). Lunaria rediviva. **L. lu'teum,** Cheiranthus cheiri. **L. ver'num,** spring snowflake; bulb is applied to abscesses.

Leu'col. Leukoleolinum; quinoline.

Leucolachanum, lu-ko-lak'an-um. Valerian.

Leucolein, lu-ko'le-in. Leukoleinum; leucoline.

Leucoma, lu-ko'mah. Leucoma and albugo are often used synonymously to denote white opacity of the cornea. Both are essentially different from nebula of the cornea, the latter being usually the result of chronic ophthalmia and an effusion of milky serum into the texture of the delicate continuation of the conjunctiva over the cornea; the others are the result of violent, acute ophthalmia or keratitis. In this state thick, coagulable lymph is extravasated from the arteries into the substance of the cornea. On other occasions the disease consists of a firm, callous cicatrix on this membrane, the effect of a wound or ulcer with loss of substance. Also albumin; conjunctiva; leucoplakia. **L. adhæ'rens,** white opacity of cornea, with adhesion of iris to back part of cornea; anterior synechia. **L. al'bum,** albugo. **L. gerontox'on,** arcus senilis. **L. margarita'ceum,** see *Margaritaceus.*

Leucomaïne, lu-ko-ma'in (*leucoma,* white of egg). Term variously applied, at first to cadaveric alkaloids (now called ptomaïnes) detected in different forms of excreta; then to toxic alkaloids resulting from action of bacterial ferments on albuminoid substances; latterly to animal alkaloids detected in the healthy living animal body, and described as entirely distinct from ptomaïnes. The leucomaïnes proper are divided into two distinct groups—1, the Uric Acid group, because resembling that acid in chemical combination, including adenine, hypoxanthine, guanine, xanthine, heteroxanthine, paraxanthine, carnine, pseudoxanthine, gerontine, and spermine; 2, the Creatinine group, because resembling it in chemical composition, including cruso-creatinine, xantho-creatinine, amphicreatine, and two yet unnamed bases. Several other bases are yet unstudied or not clearly understood. The following table by Vaughan and Novy presents a useful list of the known leucomaïnes:

Formula.	Name.	Discoverer.	Source.	Physiological action.
$C_5H_5N_5$	Adenine.	Kossel.	Nuclein-containing organs.	Non-poisonous; muscle stimulant.
$C_5H_4N_4O$	Hypoxanthine.	Scherer.	Nuclein-containing organs.	Non-poisonous; muscle stimulant.
$C_5H_5N_5O$	Guanine.	Unger.	Nuclein-containing organs, guano.	Non-poisonous; muscle stimulant.
$C_5H_4N_4O_2$	Xanthine.	Marcet.	Nuclein-containing organs, calculi.	Non-poisonous; muscle stimulant.
$C_6H_6N_4O_2$	Heteroxanthine.	Salomon.	Urine.	
$C_7H_8N_4O_2$	Paraxanthine.	Thudichum, Salomon.	Urine.	Poisonous.
$C_7H_8N_4O_3$	Carnine.	Weidel.	Liebig's meat extract.	Non-poisonous; muscle stimulant.
$C_4H_5N_5O$	Pseudoxanthine (?)	Gautier.	Muscle.	
$C_5H_{14}N_2$	Gerontine.	Grandis.	Liver of dogs.	Poisonous.
C_2H_5N (?)	Spermine.	Schreiner.	Sperma, in tissues of leucocythæmics.	Non-poisonous.
$C_5H_8N_4O$	Cruso-creatinine.	Gautier.	Muscle.	
$C_5H_{10}N_4O$	Xantho-creatinine.	Gautier.	Muscle.	Poisonous.
$C_9H_{19}N_7O_4$	Amphi-creatinine.	Gautier.	Muscle.	
$C_{11}H_{24}N_{10}O_5$	Unnamed.	Gautier.	Muscle.	
$C_{12}H_{25}N_{11}O_5$	Unnamed.	Gautier.	Muscle.	
$C_7H_{12}N_4O_2$	Unnamed.	Pouchet.	Urine.	
$C_3H_5NO_2$	Unnamed.	Pouchet.	Urine.	
$C_{34}H_{60}N_2O_5$	Salamandarine.	Zalesky.	Salamander.	Poisonous.

Leucomatorrhœa, lu-ko-mat-or-rhe'ah (*leucoma, rheo,* to flow). Increased whitish secretion or flow, as of saliva, albumen (as in albuminuria), vaginal secretion (leucorrhœa).

Leucomatosis, lu-ko-mat-o'sis. Increase of albumen in a part, as cornea, articulations, etc. Amyloid degeneration.

Leucomelanous, lu-ko-mel'an-us (*leuco, melas,* black). Epithet applied to those having pale skin and dark hair.

Leucomma, lu-kom'mah. Leucoma.

Leucomoria, lu-ko-mo're-ah (*leuco,* feeble, *moria,* fatuity). Form of erratic melancholy.

Leucomycosis, lu-ko-me-ko'sis (*leuco, mukes,* fungus). Leucocythæmia, from belief that it is of germ origin.

Leucomyelitis, luk-o-me-el-e'tis (*leuco, muelos,* marrow). Inflammation of white matter of spinal cord. Tabes dorsalis.

Leucomyelopathy, lu-ko-mi-el-op'ath-e (*leuco, muelos,* marrow, *pathos,* disease). Disease of white matter of spinal cord.

Leuconecrosis, lu-ko-nek-ro'sis. Form of dry gangrene, the opposite in appearance to anthraconecrosis.

Leuconos'toc. Genus of family of Coccaceæ in chains or links surrounded with a gelatinous sheath.

Leuconymphæa, lu-ko-nimf-e'ah. Nymphæa alba.

Leucopathia, lu-ko-path-e'ah (*leuco, pathos,* affection). See *Albino, Chlorosis.* Achromatosis; leucoderma. **L. acquis'ita,** vitiligo. **L. congenita'lis,** albinism. **L. genera'lis,** albinism. **L. partia'lis,** L. limited as to space occupied. **L. universa'lis,** albinism.

Leucophagium, lu-ko-faj'e-um (*leuco, phago,* to eat). Blanc-mange.

Leucophlegmasia (lu-ko-fleg-maz'e-ah) or **Leucophlegmatia,** luk-o-fleg-mah'she-ah (*leuco, phlegma,* phlegm). Dropsical habit; hydrocachexia; anasarca; œdema; emphysema. **L. Æthiop'um,** cachexia Africana; chthonophagia. **C. do'lens puerpera'rum,** phlegmasia alba dolens.

Leucophlegmatic, (lu-ko-fleg-mat'ik. Having disposition to general dropsy, with other leucæmic symptoms.

Leucophthalmous, lu-kof-thal'mus (*leuco, ophthalmos,* eye). Having unusual whiteness of eye.

Leucopiper, lu-kop'ip-ur. Piper album.

Leucoplakia, lu-ko-plak'e-ah (*leuco, plax,* surface). Whiteness of surface, as in L. buccalis; chronic inflammation of the tongue with whitish patches; ichthyosis of the tongue.

Leucoplasia, lu-ko-plaz'e-ah. Leucoplakia.

Leucoplast, lu'ko-plast (*leuco, plasso,* to form). Leucoblast.

Leucoplaxia, lu-ko-plaks'e-ah. Leucoplakia.

Leucops, lu'kops. Leucophthalmus.

Leucopyria, lu-ko-pir'e-ah (*leuco, pur,* fire). Hectic fever.

Leucorrhagia, lu-kor-rhah'je-ah. Excessive leucorrhœal discharge.

Leucorrheic (lu-kor-rhe'ik), **Leucorrhe'al** (same etymon as **Leucorrhœa**). Relating or appertaining to leucorrhœa.

Leucorrhœa, lu-kor-rhe'ah (*leuco, rheo,* to flow). The whites, uterine catarrh. *Uterine leucorrhœa,* more or less abundant discharge of white, yellowish, or greenish mucus, resulting from acute or chronic inflammation, or from irritation of the membrane lining the genital organs of the female. *Vaginal Leucorrhœa* or *Catarrh* has been termed *Blennorrhœa* or *Fluor albus vaginæ, Leucorrhœa, Medorrhœa vaginæ, Vaginitis, Elytroblennorrhœa, Colporrhœa. Uterine leucorrhœa* has received the names *Fluor albus uteri* or *metricalis, Catarrhus uteri, Leucorrhœa* or *Medorrhœa uteri, Metroblennorrhœa, Blennometritis, Blenmetrorrhœa, Metroblennozemia, Metrocatarrhus, Metroleucorrhœa.* It is often attended with pain and a sense of heaviness in the loins, abdomen, and thighs, disordered digestive functions, etc. There are few women not occasionally subject to moderate leucorrhœa. Attention to the general health, change of air, keeping up a perspirable state of the surface by flannel worn next the skin, the horizontal posture, etc., do more than pharmaceutical agents, which are almost entirely confined to astringent injections, which may be employed when the discharge is great. *Vulvar leucorrhœa* sometimes occurs in childhood especially; and *Cervical leucorrhœa,* originating in the cervix uteri, chiefly mucous, at the child-bearing period. **L. ana'lis,** see *Hæmorrhois.* **L., cer'vical,** see *Leucorrhœa.* **L., in'fantile,** see *Leucorrhœa.* **L., intra-u'terine,** uterine leucorrhœa; see *Leucorrhœa.* **L. masculi'na,** gonorrhœa. **L., men'strual,** leucorrhœa in girls who do not menstruate properly, the discharge seeming to be a substitute for the healthy menstrual sanguineous flow. **L., mu'cous,** opaque, cheesy discharge from the vagina. **L. Nabo'thi,** see *Parturition.* **L., tu'bal,** leucorrhœa from Fallopian tube. **L., u'terine,** see *Leucorrhœa.* **L., vagi'nal,** see *Leucorrhœa.* **L., vul'var,** see *Leucorrhœa.*

Leucorrhois, luk-or'rho-is (*leuco, rheo,* to flow). See *Hæmorrhois.*

Leucoses, lu-ko'sees. Diseases of the lymphatic apparatus; anæmia in its various forms.

Leucosis, lu-ko'sis. Leucoma; paleness; anæmia; albinism; achromatosis; disease of lymphatic system.

Leucotin, lu'ko-tin. $C_{21}H_{20}O_6$. Chief ingredient in paracoto bark.

Leucous, lu'kus. White; applied to people with fair complexion and red or yellow hair.

Leucuresis, lu-ku-re'sis (*leuco, ouron,* urine). Albuminuria.

Leukæmia (lu-ke'me-ah) or **Leukhæmia,** lu-ke'-me-ah. Leucæmia.

Leuke, lu'ke. Leprosy.

Leukhæmic, lu-ke'mik. Leucæmic.

Leuk'ocyte. Leucocyte.

Leukocyto'sis. Leucocytosis.

Leukoder'ma. Leucoderma.

Leukoleinum, lu-ko-le-e'num (*leuco, elaion,* oil). *Leucolein, Chinolein, Chinolin, Quinolin.* The product of the dry distillation of coal, mixed with picolin, anilin, and other substances in mineral tar; procured also by heating quinia, cinchonia, and strychnia with as concentrated a ley of potassa as can be made.

Leukon, lu'kon. White of egg.

Leva'men (*levo,* to raise). Palliative remedy; remission.

Levant' worm'seed. Artemisia santonica.

Levator, lev-at'or (*levo,* to raise). Elevator; term applied to certain muscles; instrument to raise bone, etc. **L. a'læ na'rium** or **na'si,** dilator naris; nasal portion of L. labii superioris alæque nasi. **L. an'guli o'ris,** small, flat, long, quadrilateral muscle, arising from the fossa canina and inserted at the commissure of the lips, where it is confounded with the triangularis; it raises the corner of the mouth and draws it toward the ear. **L. an'guli scap'ulæ,** muscle passing from posterior tubercles of fourth or fifth cervical vertebræ to superior angle of scapula and vicinity. **L. a'ni,** muscle situate at the lower part of the pelvis; broad, flat, quadrilateral, and broader above than below. It represents a kind of membranous partition closing the outlet of the pelvis, and its upper concavity is opposed to that of the diaphragm. It is attached above to the posterior surface of the body of the pubis, to the upper part of the obturator foramen, and to the spine of the ischium, and is inserted into the coccyx, into an aponeurotic line common to it and its fellow, and into the lateral parts of the rectum. This muscle supports the rectum, raises it, and carries it upward during evacuation of excrement. It can also compress the bladder and vesiculæ seminales, and thus favor the expulsion of urine and sperm. **L. a'ni par'vus,** transversus perinæi. **L. auric'ulæ** or **au'ris,** attollens aurem. **L. cau'dæ bre'vis,** sacro-coccygeus superior. **L. clavic'ulæ,** muscle of lower animals (sometimes anomalous in man as slip of levator anguli scapulæ), arising from transverse processes of several cervical vertebræ, as from the second (*cleido-epistropheus*), the fourth and fifth (*scalenus anticus accessorius*), and the sixth (*clei-*

do-cervicalis imus), and passing to the clavicle. **L. coccy'gis**, coccygeus. **L. glan'dulæ thyreoï'deæ**, muscle occasionally found connected with the upper border or isthmus of the thyroid gland, and attached superiorly to the body of the os hyoides or to the thyroid cartilage. Several anomalous muscles are so named, slips from crico-thyreoideus, sterno-thyreoideus or thyreo-hyoideus muscles. **L. glot'tidis**, genio-epiglotticus. **L. hu'meri**, mastoido-humeralis. **L. hu'meri inter'nus**, coraco-brachialis. **L. intesti'ni rec'ti**, L. ani. **L. la'bii inferio'ris**, small muscle situate before the symphysis menti; attached by its apex to a fossette at the side of the symphysis in the inferior maxillary bone. Its fibres proceed, diverging and vanishing in the manner of a tuft on the skin of the chin; this muscle raises the chin and pushes upward the lower lip. **L. la'bii superio'ris alæ'que na'si**, fleshy, thin, triangular muscular bundle situate at the sides of the nose; arises from ascending process of the superior maxillary bone; its fibres descend divergingly, to be inserted into the ala of the nose and in the upper lip. This muscle raises the upper lip and ala nasi, which it draws a little outward. **L. la'bii superio'ris ma'jor** or **pro'prius**, thin, flat, quadrilateral muscle situate at the middle and inner part of the face; arising from os malæ and os maxillare superius, and inserted into the upper lip which it raises, at the same time carrying it a little outward. **L. la'bii superio'ris mi'nor**, portion of L. labii superioris alæque nasi, inserted into the upper lip. **L. labio'rum commu'nis**, L. anguli oris. **L. lin'guæ**, styloglossus. **L. men'ti**, L. labii inferioris medius posterior. **L. na'si pro'prius**, anomalous muscular fibres beneath the compressor naris. **L. oc'uli**, rectus superior oculi. **L. œsoph'agi**, crico-œsophageus anterior. **L. pala'ti** or **pala'ti mol'lis**, long, narrow muscle arising from the lower surface of the pars petrosa and cartilage of the Eustachian tube, and inserted into the substance of the velum palati; its use is to raise the velum palati. **L. pal'pebræ superio'ris**, long, small, thin muscle, situate at the upper part of the orbitar cavity; by its posterior extremity inserted into the little ala of the sphenoid bone, immediately in front of the foramen opticum, and by its anterior expanded extremity terminating at the upper margin of the tarsal cartilage of the eyelid. It raises the upper eyelid, draws it backward, and sinks it into the orbit. **L. pe'nis**, compressor venæ dorsalis. **L. perinæ'i**, L. ani; also vaginal speculum intended to raise the perineum to facilitate uterine exploration. **L. pharyn'gis**, stylo-pharyngeus, palato-pharyngeus. **L. pharyn'go-larynge'us**, stylo-pharyngeus. **L. pro'prius scap'ulæ**, L. anguli scapulæ. **L. pros'tatæ**, anterior fibres of the levator ani, embracing the prostate; compressor prostatæ. **L. pupil'læ**, rectus superior oculi. **L. quin'tus a'ni**, coccygeus. **L. scap'ulæ** or **an'guli scap'ulæ**, muscle so called because it is attached to the upper and internal angle of the scapula; situate at the posterior and lateral part of the neck, and at the upper part of the back. It is long, flat, and broader above than below; inserted into the superior internal angle of the scapula, and into the tops of the transverse processes of the first four cervical vertebræ. It depresses the prominence of the shoulder by raising the posterior angle of the scapula, on which it impresses a kind of rotary motion; it can also draw the head to one side. **L. scap'ulæ pro'prius**, levator scapulæ. **L. scro'ti**, cremaster. **L. ure'thræ**, portion of the transversus perinæi muscle; Wilson's muscle. **L. u'vulæ**, azygos muscle. **L. ve'li palati**, peristaphylinus internus.

Levatores (lev-at-or'ees) **costa'rum bre'ves.** Muscles from transverse processes of the seventh cervical and all the dorsal vertebræ except the last two ribs. **L. c. lon'gi**, muscles to outer surfaces of lower ribs from transverse process of vertebra second above each costo-vertebral articulation; supracostales.

Leven, lev'en (*levo*, to raise). Ferment.

Lever, le'vur (*levo*, to raise). Inflexible rod turning round a fixed point and used for moving bodies, bearing burdens, or raising them. The point on which the lever moves is called the fulcrum, hypomochlion. Force moving the lever is called the power; weight to be moved, the resistance. There are three kinds of levers. A lever of the first kind has the fulcrum between the power and resistance, as motion of head or neck, the first cervical vertebra forming the fulcrum. A lever of the second kind has the resistance between the fulcrum and power, as in raising on tiptoe, the fulcrum being the ground under the toes. A lever of the third kind has the power between the fulcrum and resistance, as in flexion of the forearm or the arm, elevation of the arm, etc. In the human body the bones represent levers; the muscles of locomotion are powers; the weight of parts to be moved constitutes the resistance. The fulcra are, at times, the joints; at others, the ground, etc.

An obstetric lever, or vectis, is an instrument curved at the extremity, and having a fenestra; used to assist the extraction of the child's head when instrumental aid is necessary, either as a lever proper or as a tractor. Levers are also used by dentists for extracting stumps, etc.

Leviathan penis, le-vi'ath-an pe'nis. Penis of the whale, formerly given in dysentery, leucorrhœa, impotence, etc.

Levigated, lev'e-ga-ted. Having the consistence of fine powder.

Levigation, lev-e-ga'shun (*lævigo*, to make smooth). Operation by which bodies are reduced to very fine powder, as by trituration, elutriation, etc.

Levisticum, le-vis'tik'um. Ligusticum levisticum.

Levulin, lev'u-lin. Lævulin.

Levulose (lev'u-loze) (*lævus*, left) or **Læv'ulose.** Fruit-sugar, isomeric with dextrose; possesses the power of rotating plane of polarized light to the left. $C_6O_{12}H_6$. Gummy substance associated with glucose in fruits, and pathologically in urine in diabetes.

Lexipharmac, leks-e-far'mak (*lexis*, cessation, *pharmakon*, drug or poison). Alexipharmic.

Lexipyretic, leks-e-pir-et'ik (*lexis*, cessation, *pur*, fire). Febrifuge.

Ley, li. Lixivium, lye. **L., soap**, liquor potassæ.

Leyden battery, li'den bat'ter-e. Electrical battery containing a number of Leyden jars which are connected with one another on the inner and outer side. **L. jar.** Jar coated with tin foil for the purpose of charging it with electricity.

Leysera gnaphaloïdes, li-se'rah naf-al-o-e'des (after Fr. W. von Leyser of Halle). S. African plant, ord. Compositæ, emollient and used at the Cape in catarrh, bronchitis, and even in phthisis.

Liatris odoratis'sima, dog tongue; herb, native of the Southern United States; leaves have an odor of vanilla, **L. scario'sa** and **L. squarro'sa**, *Throatwort, Sowwort, Backache root, Devilsbite, Blazing star, Prairie pines, Rough root*, are called, from reputed powers in bites from rattlesnakes, *Rattlesnake's master*. Roots bruised are applied to the wound; decoction in milk is given externally. **L. spica'ta**, *Gayfeather, Button snakeroot, Devil's bit, Colicroot*, ord. Compositæ; indigenous plant, in the Middle and Southern States, with purple compound flowers like a spike; root is diuretic; used in gonorrhœa and as a gargle in sore throat.

Libanotis annua, lib-an-o'tis an'nu-ah (frankincense tree). Athamanta Cretensis. **L. corona'ria**, rosmarinus. **L. Creten'sis**, Athamanta Cretensis. **L. hirsu'ta**, Athamanta Cretensis.

Libanotus (lib-an-o'tus) or **Libanus**, lib'an-us. Frankincense. See *Juniperus lycia*.

Liber pharmaceuticus, le'ber far-mah-su'tik-us (pharmaceutical book). Dispensatory.

Liberation, lib-er-a'shun. Setting free. **L. of the arms**, operation of bringing down arms of fœtus when in presenting they are placed against the side of the head.

Libidinis (lib-id'in-is) **se'des** (seat of lust). Clitoris.

Libidinous, lib-id'in-us (*libido*, lust). Lewd; lustful.

Libido, lib-e'do. Desire; necessity, as L. urinæ, de-

sire to evacuate the bladder; L. intestini, desire to evacuate the bowels; L. sexualis, sexual desire, etc. Prurigo; salacitas.

Libos, le'bos (*leibo*, to weep). Defluxion from the eyes.

Libra, le'brah. Pound.

Licentiate, li-sen'she-ate (*licet*, it is permitted). One licensed to practise his profession.

Lichanos, lik'an-os. Index finger. See *Digitus*.

Lichen, li'ken. Diffuse, dry, red papular eruption, accompanied by a troublesome sense of tingling or pricking; some forms are varieties of eczema. Also a plant so called. **L. a'grius** or **a'grius fe'rox**, wild lichen, is distinguished by pimples in clusters or patches, surrounded by a red halo, the cuticle growing gradually harsh, thickened, and chappy; often preceded by general irritation, as itching, desquamation, fissures, etc. In addition to antiphlogistics, cooling applications may be used to allay itching. Eczema papulosum. **L. annula'tus**, circinate form of lichen on the trunk, generally chronic eczema folliculare. **L. aphtho'sus**, ord. Lichenaceæ, is cathartic and anthelmintic. **L. ar'borum**, L. pulmonarius. **L., arthrit'ic**, see *L. circumscriptus*, *L. lividus*, *L. pilaris*. **L. barba'tus plica'tus**, L. plicatus. **L. cani'nus**, ash-colored ground liverwort; cryptogamous plant long considered capable of curing rabies canina; used also in mania and spasmodic asthma. **L. car'rageen**, Fucus crispus. **L. cetra'ria**, cetraria. **L. cine'reus terres'tris**, L. caninus. **L. circina'tus**, cutaneous affection with well-defined red circular groups of acne-like papules; pityriasis rosea. **L. circumscrip'tus** is characterized by clusters or patches of papulæ, having a well-defined margin and an irregularly circular form, continuing for six or eight weeks. **L. coccif'erus**, L. pyxidatus. **L. cor'neus**, lichen with elevated horny patches. **L. eczemato'des**, eczema lichenodes. **L., eczem'atous**, eczema. **L. eryngifo'lius**, L. Islandicus. **L. fe'rus**, lichen agrius. **L. flor'idus hir'tus**, L. plicatus. **L. gyra'tus**, coalescence of several circles of lichen circumscriptus. **L. hæmorrha'gicus**, purpuric papules or maculæ at ends of follicles on the skin. **L., herpet'ic**, L. agrius; L. herpetiformis. **L. hir'tus**, L. plicatus. **L., hypertroph'ic**, condition of skin in which there are flat fungous vegetations; mycosis fungoïdes; lichen corneus. **L. of in'fants**, strophulus. **L. invetera'tus**, chronic obstinate form of L. agrius, in which the skin is rough and dense. **L. Island'icus**, Iceland lichen, I. liverwort, I. moss; inodorous plant with bitter mucilaginous taste; tonic, demulcent, nutrient. Dose, ʒj to iv, being first steeped in water holding carbonate of potash in solution to extract the bitter, and then boiled in milk. Bitter principle extracted from it is variously termed *Cetrarin*, *Cetrarinum*, *Cetrarium*. Lichenin has been given in intermittents. **L. lacinia'tus**, L. saxatilis. **L. liv'idus**, papulæ are dark red or livid without fever, and more permanent. It requires the mineral acids and bark. **L. men'ti**, sycosis. **L., net'tle**, lichen urticatus; hair lichen. **L. obtu'sus**, form of L. ruber with round, flat, circumscribed patches. **L. parieti'nus**, Parmelia parietina. **L. pila'ris**, modification of the nettle lichen, papulæ appearing at the roots of the hair. **L. pla'nus**, chronic eruption of crimson-red papules, flattened, smooth, occurring on the front of the forearm above the wrist, the waist, place of attachment of the garter, etc., with pruritus. **L. plica'tus**, plant applied by Laplanders as astringent to bleeding vessels and to excoriated parts. **L. prurigino'sus**, see *Strophulus*. **L. pulmona'rius**, *Oaklungs*, *Tree lungwort*, *Hazel crottles*, *Hazel raw*; substringent, somewhat acid plant, formerly used in lung diseases. **L. pyxida'tus**, cup-moss; substringent; decoction used in whooping cough. **L. reticula'tus**, L. pulmonarius. **L. rocel'la**, *Litmus*, *Orchil*, *Canary archell*, *Chinny weed*, *Herb archell*, *Turnsole*; used to allay cough in phthisis. Blue pigment, *Litmus*, is used as delicate test for acid, in the urine for example, being reddened by acids. Its blue color is restored by alkalies. **L. ru'ber**, this includes L. ruber acuminatus and L. planus, and sometimes L. ruber obtusus. **L. ruber acuminat'us** is a papulo-squamous disease, the papules and scales gradually forming a rough corneous crust. **L. ru'ber plan'us**, see *L. planus*. **L. saxat'ilis**, moss formerly held in high estimation in head affections. **L. scrofulo'rum** or **scrofulo'sus**, chronic papular disease of trunk of body of scrofulous persons. **L. sim'plex**, eruption of red papulæ, appearing first on the face or arms, and afterward extending over the body, preceded by slight febrile irritation, which usually ceases when the eruption appears, with an unpleasant sense of tingling during the night. **L. spu'rius**, L. caninus. **L. stella'tus**, Marchantia polymorpha. **L. tincto'rius**, L. saxatilis. **L. trop'icus**, prickly heat, summer rash. Pimples are bright red and of the size of a small pin's head, with heat, itching, and pricking, as if by needles. It is local, produced by excessive heat, and disappears when the weather becomes cooler or the individual is inured to the climate. An eczematous affection called chuna, produced by the same cause, is described by Tschudi as prevalent in the elevated parts of Peru. **L. urica'tus** or **net'tle li'chen** consists of papulæ accompanied by wheals like those of nettle rash. A variety of this is said to be called, in America, *blights*. Urticaria papulosa. **L., vac'cine**, see *Roseola*. **L., wall**, Parmelia parietina. **L., wild**, Lichen agrius.

Licheniasis adultorum, lik-en-e'as-is ad-ul-to'rum. Lichen. **L. stroph'ulus**, strophulus.

Lichenic, li-ken'ik. Pertaining to lichens.

Lichenin, li'ken-in. $C_6H_{10}O_5$. Substance in colorless masses from cetraria, other lichens, etc. It resembles granulose. See *Lichen Islandicus*.

Lichenoid, li'ken-oid (*lichen*, *eidos*, resemblance). Resembling lichen. Chronic spreading eruption on the tongue. Starchy substance from Iceland moss, more soluble than lichenin.

Lichenous, li'ken-us. Relating or appertaining to lichen.

Lichens, li'kens. Order of perennial cryptogamic plants deriving their nourishment from the air.

Licinium, lis-in'e-um (*linum*, thread). Tent.

Licorice, lik'or-is. Glycyrrhiza. **L. bush** or **vine**, Abrus precatorius. **L., com'pound mix'ture of**, mistura glycyrrhizæ composita. **L., com'pound pow'der of**, pulvis glycyrrhizæ compositus. **L., ex'tract of**, extractum glycyrrhizæ. **L., In'dian** or **Jamaica**, Abrus precatorius. **L. stick**, extractum glycyrrhizæ.

Liculmen, lik'ul-men. Garum.

Lid. Covering; eyelid. **L., gill**, operculum. **L., gran'ular**, trachoma.

Lieberkühn's (le'ber-kun's) **crypts**, **fol'licles**, or **glands** (so called from their first describer). Fine, columnar, blind sacs, the openings of which are from one-twentieth to one-thirtieth of a line in diameter, so closely placed over the whole of the small intestine as to give the mucous membrane a general sieve-like or perforated appearance. They secrete the succus entericus or intestinal juice. **L.'s jel'ly**, alkali-albumen from action of strong caustic potash on egg-albumin.

Lien, le'en. Spleen. **L. accesso'rius**, lienculus. **L. in'gens**, tumefaction of the spleen. **L. succenturia'tus**, lienculus.

Lienal, li'en-al (*lien*, spleen). See *Splenic*.

Lienculus, le-en'ku-lus (dim. of **Lien**, spleen). Small supernumerary, accessory, or supplementary spleen.

Lienitis, le-en-e'tis. Inflammation of spleen.

Lienocele, le-en-o-se'le (Eng. le-en'o-seel) (*lien*, spleen, *kele*, hernia). Hernia of the spleen.

Lieno-intestinal, li'en-o-in-tes'tin-al. Belonging to spleen and intestine.

Lienomalacia, le-en-o-mal-ah'se-ah (*lien*, *malakia*, softening). Softness or softening of the spleen.

Lienteric, li-en-ter'ik. Relating to the lientery.

Lientery, li'en-ter-e (*leios*, smooth, slippery, *enteron*, intestine). Lienteric diarrhœa. Frequent liquid evacuations, the food only half digested; condition always symptomatic of great irritation in the intestinal canal, the sensibility of which is so much aug-

mented that it cannot bear the sojourn of the food in it.

Life. State of organized beings, during which, owing to the union of an unknown force with matter, they are capable of performing functions different from those that regulate other natural bodies. Life has only a limited duration, beyond which, the organic functions ceasing to be executed, the body is given up to the agency of chemical affinity. *Organic life* includes the functions inservient to composition and decomposition, as digestion, respiration, circulation, calorification, absorption, secretion, and nutrition. *Animal life* includes the functions which connect man and animals with external bodies, as the understanding, sensations, locomotion, and voice. **L., change of,** menopause. **L., dura'tion of,** see *Longevity.* **L. everlast'ing,** Gnaphalium margaritaceum. **L. everlast'ing, plan'tain,** Antennaria plantaginifolia. **L. everlast'ing, sweet-scent'ed,** Gnaphalium polycephalum. **L., expecta'tion of,** see *Longevity.* **L. insur'ance,** contract entered into, usually by an insurance company, to pay a certain sum of money on a person's death, on condition of his paying an annual premium during life. The medical practitioner may be applied to to certify that the life of the insured is one that is insurable according to the rules of the company. **L., organ'ic,** term used to denote the phenomena of life, as digestion, respiration, etc. **L. root,** Senecio aureus. **L., ta'ble of,** statistics arranged in tabular form of the lives and deaths occurring among a certain number of people. **L., val'ue of,** see *Longevity* and *Mortality.*

Ligament, lig'a-ment (*ligo,* to bind). Name given to fibrous structures which serve to unite bones and to form articulations, hence called interosseous and articular ligaments. They are of a white, close texture, are but little extensible, and difficult to break. Also any membranous fold retaining an organ in its situation.

TABLE OF THE PRINCIPAL LIGAMENTS.

1. *Of the Lower Jaw.*	Capsular ligament. Suspensory ligament of the stylo-glossus. Lateral ligament.
2. *Connecting the Head with the first and second Vertebræ, and these with each other.*	Two capsular ligaments between atlas and head. Circular ligament. Two capsular between atlas and axis. Perpendicular ligament. Two lateral or moderator ligaments. Transverse ligament and its appendices.
3. *Of the other Vertebræ.*	Anterior common. Crucial intervertebral. Ligaments running from the edge of the bony arch and spinous process of one vertebra to that of the next. Interspinous ligament. Ligamentum nuchæ. Intertransverse. Capsular. Posterior or internal common.
4. *Of the Ribs, Sternum, etc.*	Capsular of the head of ribs. Capsular of the tubercles. Ligamenta transversaria interna. Ligamenta transversaria externa. Ligamenta cervicis costarum externa. Ligamentous fibres running from the margins of the extremities of the ribs to the corresponding cartilages. Radiated ligaments from cartilage of ribs to the sternum. Capsular ligaments of the cartilages of the ribs. Proper membrane of sternum. L. of cartilago ensiformis. Tendinous expansions over the intercostales, etc.
5. *Of the Pelvis.*	Two transverse — one superior, one inferior. Iliosacral. Capsular of the sacroiliac synchondrosis.
Of the Pelvis (continued).	Two sacroischiatic—posterior and anterior, with the superior and inferior appendices. Longitudinal of os coccygis. Inguinal ligament. Capsular of symphysis pubis. Ligament of foramen thyroideum.
6. *Of the Clavicle.*	Radiated ligament. Capsular. Interclavicular. Ligamentum rhomboideum. Claviculo-acromial. Conoid. Trapezoid.
7. *Of the Scapula.*	Anterior triangular. Proper posterior.
8. *Of the Shoulder-joint.*	Capsular.
9. *Of the Elbow-joint.*	Capsular. Brachio-ulnar. Brachioradial. Coronary of the radius. Anterior and posterior accessory.
10. *Carpal Extremity of Radius and Ulna, and between those bones.*	Intermuscular of the os humeri. Interosseous ligament. Oblique or chorda transversalis cubiti. Capsular.
11. *Between Forearm and Wrist.*	Capsular. Two lateral. Mucous.
12. *Of the Carpus.*	Annular. Capsular. Short ligaments—oblique, transverse, capsular, and proper.
13. *Between Carpal and Metacarpal Bones.*	Articular lateral. Straight, perpendicular, etc.
14. *Between the Extremities of the Metacarpal Bones.*	Interosseous, at the bases and heads—dorsal, lateral, palmar.
15. *At the base of the Metacarpal Bone of the Thumb, and at the first joint of the Fingers.*	Capsular. Lateral.
16. *Of the first and second joints of the Thumb and second and third joints of the Fingers.*	Capsular. Lateral.
17. *Retaining the Tendons of the Muscles of the Hand and Fingers in situ.*	Annular. Vaginal or flexor tendons. Vaginal or crucial of the phalanges. Accessory of the flexor tendons. Posterior annular. Vaginal of extensors. Transverse of extensors.
18. *Connecting the Os femoris with the Os innominatum.*	Capsular and accessory slips. Round or teres ligament. Cartilaginous ligament. Double cartilaginous ligament. Ligamenta mucosa.
19. *Of the Knee-joint.*	Lateral—internal and external. External short lateral ligament. Posterior ligament. Ligament of the patella. Capsular. Ligamentum alare—majus et minus. Ligamentum mucosum. Two crucial—anterior and posterior. Transverse.
20. *Connecting Fibula and Tibia.*	Capsular. Interosseous. Anterior superior. Posterior superior.
21. *Connecting the Tarsal with the Leg Bones.*	Anterior ligament of the fibula. Posterior of fibula. Deltoid of tibia. Capsular.
22. *Of the Tarsus.*	Capsular. Short ligaments. Capsular, broad superior, and lateral ligaments, connecting astragalus and naviculare. Superior, lateral, and inferior, fixing the os calcis to the cuboid bone. Long, oblique, and rhomboid, forming the inferior ligaments. Superior superficial, interosseous, and inferior transverse ligaments, fixing the navicular and cuboid bones. Superior lateral and plantar, which fix the os naviculare and cuneiform.

Of the Tarsus (contin'd).	Superior superficial and plantar, connecting the os cuboides and os cuneiforme externum.
	Dorsal and plantar, uniting the cuneiform bones.
	The proper capsular of each bone.
23. *Between Tarsus and Metatarsus.*	Capsular.
	Dorsal, plantar, lateral, straight, oblique, and transverse.
24. *Connecting the Metatarsal Bones.*	Dorsal, plantar, and lateral, connecting the metatarsal bones.
	Transverse ligaments.
25. *Of the Phalanges of the Toes.*	Capsular.
	Lateral.
	Annular.
	Vaginal of the tendons of the peronei.
	Laciniated.
26. *Retaining the Tendons of the Muscles of the Foot and Toes in situ.*	Vaginal of the tendon of the flexor longus pollicis.
	Vaginal and crucial of the tendons of the flexors of the toes.
	Accessory of the flexor tendons of the toes.
	Transverse of the extensor tendons.

Lig'ament, acces'sory. One that strengthens or renders more perfect an articulation. The coracohumeral ligament is an accessory to the shoulder-joint. **L., ad'ipose,** mucous ligament of knee-joint. **L., al'ar,** odontoid ligaments; crescentic folds of synovial membrane at knee-joint. **L., Allen Burns's,** L., Hey's. **L., an'nular,** see *Annular.* **L., an'nular, of the car'pus,** see *Annular.* **L., an'nular, of the ra'dius,** see *Annular.* **L., an'nular, of the tar'sus,** see *Annular.* **L., ante'rior, of the blad'der,** a portion of the superior pelvic aponeurosis, which becomes attached to the front of the neck of the bladder. Many other ligaments in the body are designated as *anterior* from their position and relation to other parts. **L., arc'uate,** ligamentum arcuatum of diaphragm. **L., arte'rial,** fibrous remains of fœtal ductus arteriosus. **L., artic'ular,** capsular ligament; interspinous ligament. **L., a'ry-epiglot'tic,** arytenoepiglottic folds. **L., atloax'oid,** see *Atloidoaxoid ligaments.* **L. of Bark'row,** vertical fibres passing through a fatty pad in the upper part of the olecranon fossa. **L. of Ber'tin,** L., ilio-femoral. **L. of Big'elow,** part of the ilio-femoral ligament. **L., broad, inflamma'tion of,** see *Parametritis.* **L., broad, of liv'er,** suspensory ligament of the liver. **L., broad, of lung,** see *Pleura.* **L., broad, of u'terus,** see *Uterus.* **L. of Burns,** see *Fascia lata.* **L., Cam'per's,** perineal fascia. **L., cap'sular,** see *Capsular.* **L., car'bolized,** ligature, antiseptic. **L. of Carcassone,** the inferior layer of the middle perineal aponeurosis. **L., car'pal,** ligaments uniting carpal bones. **L., cat'gut,** ligature, antiseptic. **L., caud'al,** fibrous bands connecting two lower coccygeal vertebræ with the skin above them. **L., cen'tral,** terminal thread of spinal cord. **L., cer'vical supraspi'nal,** see *Supraspinosa ligamenta.* **L., check,** odontoid ligaments. **L., cil'iary,** ligamentum pectinatum. **L. of Colles,** triangular l.; see *Gimbernat's ligament.* **L., con'jugal,** L. uniting the heads of opposite ribs across the back of an intervertebral disk. **L., co'noid,** see *Coraco-clavicular* and *Conoid ligament.* **L., cor'aco-clavic'ular,** see *Coraco-clavicular.* **L., cor'acoid,** thin ligament extending from coracoid process of scapula to internal edge of suprascapular notch. **L., cor'onary, of liv'er,** a reflection formed by the peritoneum between the posterior margin of the liver and the lower surface of the diaphragm; see *Falx* and *Coronary.* **L. cor'onary, of ra'dio-ul'nar articula'tion,** ligaments uniting radius and ulna. **L., costoxi'phoid,** xiphoid ligament. **L., cot'yloid,** see *Cotyloid.* **L., cru'cial,** see *Crucial.* **L., cru'ciform,** see *Cruciform.* **L., del'toid,** see *Deltoid.* **L., dentic'ulate,** ligamentum denticulatum. **L., dor'solum'bo-supraspi'nal,** see *Supraspinous ligaments.* **L., Douglas's,** recto-uterine folds. **L., fal'ciform,** see *Falciform.* **L. of Fallo'pius,** crural arch. **L., fem'oral,** see *Fascia lata.* **L., Flood's,** reflection of fibres of the coraco-humeral ligament through the capsular opening. **L., fun'diform,** outer portion of the anterior annular ligament of the leg, forming a loop around the peroneus tertius and extensor longus digitorum muscles. **L., gas'tro-col'ic,** greater omentum. **L., gas'tro-hepat'ic,** lesser omentum. **L., gastroli'enal,** L., gastrosplenic. **L., gas'tropancreat'ic,** peritoneal fold connecting pancreas and stomach. **L., gastrophren'ic,** see *Gastrophrenic.* **L., gastrosplen'ic,** peritoneal fold between stomach and hilum of spleen. **L., Gim'bernat's,** see *Gimbernat.* **L., gle'noid,** see *Glenoid.* **L., glenoi'deo-brach'ial,** three ligaments of the shoulder-joint are so called. **L. glenoi'deo-hu'meral,** L., Flood's. **L., glos'so-epiglot'tic,** see *Glosso-epiglottic.* **L., hepat'ico-col'ic,** peritoneal fold between right lobe of liver and ascending mesocolon. **L., Hey's,** falciform process of fascia lata. **L., Hunt'er's,** round ligament of uterus. **L., il'io-fem'oral,** *L. of Bertin, Ligament of Bigelow;* firm fibrous fasciculus, descending from the anterior inferior spine of the ilium to strengthen the capsular ligament. **L., il'io-lum'bar,** L. from transverse process of fifth lumbar vertebra to crest of ilium, sacro-iliac articulation, and adjacent region. **L., il'io-pectine'al,** part of pelvic fascia attached to ilio-pectineal line and capsular ligament of hip-joint. **L., il'io-pu'bic,** Poupart's ligament. **L., infrapu'bian,** triangular ligament. **L., in'guinal,** Poupart's ligament. **L., interclavic'ular,** see *Interclavicular ligament.* **L., intercru'ral,** ligamenta subflava. **L., interlob'ular,** processes of pleura passing into fissures of lung. **L., intermax'illary,** pterygomaxillary ligament. **L., intermetatar'sal,** see *Intertarsal ligament.* **L., interos'seous,** see *Interosseus ligament.* **L., metacar'pal,** see *Metacarpal ligament.* **L., mu'cous,** synovial fold of knee-joint passing to point below lower margin of patella. **L., ob'turator,** O. membrane. **L., orbic'ular,** annular l. of radius. **L. of o'vary,** see *Ovarium.* **L., pal'mar infe'rior,** metacarpal ligament. **L., pec'tinate,** ligamentum pectinatum. **L., plan'tar,** see *Plantar ligament.* **L., Pou'part's,** crural arch. **L., pu'bic,** posterior edge of upper portion of falciform process of fascia lata attached to crest of the pubes. **L. of Retz'ius,** L., fundiform, **L., rhom'boid,** costo-clavicular ligament. **L., round,** see *Round* and *Teres ligamentum.* **L. of Schlemm,** glenoideo-brachial ligaments. **L., subova'rian,** extends from ovary to Fallopian tube. **L., suspen'sory,** ligament the use of which is to suspend any organ, as clitoris, crystalline lens, diaphragm, liver, penis, etc.; see *Suspensory.* **L., s., of blad'der,** see *Urachus.* **L., s., of lens,** ciliary zone. **L., s., of liv'er,** see *Suspensory.* **L., s., of tes'ticle,** gubernaculum testis. **L., s., of tooth,** odontoid ligaments. **L., s. vagi'nal,** ligamenta vaginalia. **L., sutu'ral,** thin layer of fibrous membrane interposed between the adjacent margins of bones in immovable joints, as between the cranial and facial bones. **L., tar'sal,** layer of fibrous membrane beneath the orbicularis muscle, seeming to support the eyelids and retain the tarsal cartilages in their position. **L., trap'ezoid,** see *Coraco-clavicular* and *Trapezoid.* **L., trian'gular,** see *Perineal fascia* and *Triangular.* **L. of Weit'brecht,** *Ligamentous cord of W.;* bundle of fibres on the anterior aspect of the interosseous ligament of the middle radio-cubital articulation. **L. of Wins'low,** posterior l. of knee-joint; see *Genu.* **L., Y-shaped, of Big'elow,** ilio-femoral ligament. **L. of Zinn,** *Tendon of Zinn;* tendon from which the inferior rectus muscle of the eye arises in common with the rectus internus and rectus externus.

(For other ligaments not here referred to, see *Table of Ligaments.*)

Ligamenta alaria, lig-am-en'tah al-ar'e-ah. Odontoid ligaments. **L. annula'ria,** annular ligaments. **L. ap'icum,** see *Interspinal ligament.* **L. capitulo'rum dorsa'lia,** transverse dorsal bands between the fingers, between the ligamenta dorsalia. **L. capitulor'um volaria,** anterior accessory ligaments of the metacarpo-phalangeal articulations. **L. co'li,** see *Colon.* **L. interlobula'ria pulmo'num,** interlobular tissue. **L. intervertebra'lia,** intervertebral cartilages. **L. la'ta u'teri,** see *Uterus.* **L. Mauchar'ti,** odontoid ligaments. **L. rotun'da u'teri,** round ligaments of the uterus. **L. subfla'va** (*sub, flavus,* yellow),

ligaments interposed between the laminæ of the vertebræ from the axis to the sacrum. **L. suspenso'ria,** see *Suspensory.* **L. tar'sea lata,** see *Tarsea lata (ligamenta).* **L. thy'reo-arytænoï'dea,** thyreo-arytenoid ligaments. **L. vagina'lia,** annular ligaments. **L. voca'lia,** thyreo-arytenoid ligaments.

Ligamentaris (lig-am-en-tar'is) or **Ligamentosus,** lig-am-en-to'sus. Ligamentous.

Ligamentous, lig-a-men'tus. Having the character of, or relating to, a ligament. **L. cord of Weit'brecht,** ligament of Weitbrecht.

Ligaments (lig'a-ments), **broad, of the u'terus.** See *Uterus.* **L., cer'vical,** see *Cervical.* **L., check,** odontoid ligaments. **L. of the lar'ynx, infe'rior,** thyreo-arytenoid ligaments. **L., sa'cro-sciat'ic,** see *Sacro-sciatic ligament.* **L., thyrohy'oid,** see *Thyrohyoid membrane*; see also *Ligament, Ligamenta, Ligamentum.* **L., u'tero-sac'ral,** two strands of tissue from the sides of the sacrum to lateral aspect of supravaginal portion of neck of uterus.

Ligamentum, lig-am-en'tum. Ligament. **L. arcua'tum exter'num,** thickened upper margin of the anterior lamella of the transversalis fascia. The tendinous arch across the upper part of the psoas magnus muscle, on each side of the spine, is called the *Ligamentum arcuatum internum.* **L. arterio'sum,** see *Arterial duct.* **L. bre've,** short membranous structure behind each flexor tendon of the fingers near its insertion. **L. capsula're,** capsular ligament. **L. cilia're,** ciliary ligament. **L. conoï'des,** conoid ligament. **L. coracoï'deum,** see *Coracoid.* **L. cruci-a'tum cru'ris,** see *Ligamentum transversum cruris.* **L. denta'tum,** denticulatum ligamentum. **L. Fallo'pii,** crural arch. **L. ili'o-pu'bicum,** crural arch. **L. infundib'ulo-ovar'icum,** see *Ovarium.* **L. infundib'ulopel'vicum,** see *Ovarium.* **L. i'ridis,** ciliary ligament. **L. la'tum,** suspensory ligament of the liver. **L. la'tum pulmo'nis,** see *Pleura.* **L. membrana'ceum,** glosso-epiglottic ligament. **L. muco'sum,** triangular prolongation containing a few ligamentous fibres, and extending from the anterior part of the knee-joint below the patella to the front of the intercondyloid notch. **L. nu'chæ,** cervical ligament. **L. palpebra'le inter'num,** see *Orbicular muscles.* **L. patel'læ,** see *Patella.* **L. pectina'tum,** festooned processes of the fibres of the iris, lying in an elastic fibrous tissue continuous with the membrane of Demours. **L. pi'sohamat'um,** accessory ligament from the apex of pisiform bone to the hook of the unciform bone. **L. pi'so-metacar'peum,** from pisiform bone to anterior surface of the base of the fifth, fourth, and third metacarpal bones. **L. posti'cum Winslow'ii,** see *Genu.* **L. Poupart'i,** crural arch. **L. rotun'dum ova'rii,** see *Ovarium.* **L., Schlemm's,** glenoideobrachial ligaments. **L. spira'le,** musculus cochlearis. **L. suspenso'rium den'tis,** see *Odontoid ligaments.* **L. suspenso'rium he'patis,** suspensory ligament of the liver. **L. suspenso'rium len'tis,** ciliary zone. **L. suspenso'rium tes'tis,** gubernaculum testis. **L. suspenso'rium vesi'cæ,** see *Urachus.* **L. talo-calcaneum, L. talo-crurale, L. talo-fibulare, L. talonaviculare, L. talo-tibiale,** accessory ligaments connecting the astragalus with the bones of the leg, with the os calcis, and with the scaphoid bone. **L. te'res,** teres ligamentum. **L. transver'sum cru'ris,** the anterior annular ligament of the ankle includes an upper and lower band: the former, the *ligamentum transversum cruris*; the latter, the *ligamentum cruciatum cruris.* **L. trapezoï'des,** trapezoid ligament. **L. triangula're,** triangular ligament. **L. u'rachi suspenso'rium,** see *Urachus.* **L. Vesa'lii,** crural arch.

Ligate, li'gate. See *Ligature.*

Ligatio, le-gah'she-o. Fascia; ligature. **L. lin'guæ,** aphonia.

Ligation, li-ga'shun. Act of applying a ligature. In aneurism the ligature is applied on the side of the disease nearer to the heart, *proximal ligation,* or on the side farthest from the heart, *distal* ligation. **L., Anel's,** the ligature is applied close above the aneurism, with no intervening branch. **L., Bras'dor's,** the ligature is applied just below the aneurism. **L., Hun'ter's,** here the ligature is applied at some distance above the aneurism, so as to have an intervening branch. **L., War'drop's,** ligature is applied to the trunk a little below the first branch, or to the first branch a little below its origin from the trunk. See *Ligature.*

Ligatura, lig-at-u'rah. Ligature; fascia. **L. glan'dis,** phimosis.

Ligature, lig'a-ture. This word has various acceptations: 1. The thread with which an artery or vein is tied to prevent or arrest hemorrhage. 2. Cord, thread, or wire used for removing a tumor, etc. 3. Bandage used for phlebotomy. *Ligature* is sometimes erroneously applied to the act of tying an artery or other vessel, *ligation* or *deligation* being the correct term. When the artery alone is tied, the ligature is said to be *immediate*; when surrounding parts are included, *mediate.* Ligature occasions obliteration or adhesion of the arterial parietes by cutting through the middle and internal coats; the adhesion being favored by the formation of a coagulum, which acts in some degree as a barrier against the impulse of the blood, and subsequently disappears by absorption. **L., antisep'tic,** *Antiseptic suture*; catgut soaked in emulsion of olive oil and deliquesced carbolic acid was suggested by Lister in the ligation of arteries; it does not act as a foreign body, the ends being absorbed. Ligatures of other materials—silk, silkworm gut, silver, etc.—are rendered aseptic by boiling, antiseptic by being soaked in various solutions. **L., asep'tic,** see *L., antiseptic.* **L., dis'tal,** ligature applied to an artery beyond an aneurism. **L., elas'tic,** India-rubber ligament employed to strangulate foreign growths or for other purposes. **L., intermit'tent,** application of a tourniquet above the seat of a poisoned wound to interrupt the current of blood, except when relaxed by the surgeon, so that as little as possible at a time of the poison shall pass into the circulation. **L. of i'ris,** iridesis. **L., sol'uble,** animal ligature, as of catgut, that may be absorbed when introduced into the living tissues.

Light, lite. Extremely rare fluid diffused over the universe, emanating from the sun and fixed stars, traversing more than four millions of leagues in a minute; passing through transparent bodies, which refract it according to their density and combustibility; and arrested by opaque bodies, by which it is reflected at an angle equal to the angle of incidence. It is the cause of color in all bodies, being entirely reflected by white surfaces and absorbed by black; is decomposed in passing through a transparent prism into seven rays—red, orange, yellow, green, blue, indigo, and violet. **L., cal'cium,** very bright light produced by heating lime to a white heat in flame of oxyhydrogen.

Light'ning. See *Astrape.* **L. blind'ness,** impairment of vision from momentary exposure to intense light, as of lightning. **L. or L.-like pains,** peculiar sharp lancinating pains characteristic of locomotor ataxia.

Lights, Lungs. **L., ri'sing of the,** cynanche trachealis.

Ligneous, lig'ne-us (*lignum,* wood). Woody; having the character or appearance of wood, as ligneous scirrhus.

Lignification, lig-nif-i-ka'shun. Amyloid degeneration.

Lignin (lig'nin) or **Lig'nine** (*lignum,* wood). Ligneous or woody fibre; the fibrous structure of vegetable substances; modification of cellulose.

Lignum agallochi veri, lig'num ag-al'lo-ke ver'e. Agallochum. **L. al'oës** (wood of aloes), agallochum. **L. aspal'athi,** agallochum. **L. benedic'tum,** guaiacum. **L. Brasilia'num ru'brum,** hæmatoxylon Campechianum. **L. cæru'leum,** hæmatoxylon Campechianum. **L. Campechen'se,** hæmatoxylon Campechianum. **L. Campechia'num,** hæmatoxylon Campechianum. **L. campes'canum,** hæmatoxylon Campechianum. **L. colubri'num,** see *Strychnos.* **L. febrif'ugum,** quassia. **L. hæmatox'yli,** hæmatoxylon Campechianum. **L. In'dicum,** guaiacum, hæmatoxylon Campechianum. **L. infe'lix,** sambucus. **L. nephrit'-**

icum, Guilandina moringa (the wood). **L. pava'næ**, Croton tiglium. **L. quas'siæ**, see *Quassia*. **L. sanc'tum**, guaiacum. **L. sandal'inum**, see *Pterocarpus santalinus*. **L. sap'pan**, Hæmatoxylon Campechianum. **L. serpen'tum**, Ophioxylum serpentinum. **L. vi'tæ**, guaiacum.

Lignyodes, lig-ne-o'dees. Fuliginous.

Lignys, lig'nis. Fuligo.

Ligula (lig'u-lah) or **Lin'gula** (small tongue). Clavicle, glottis, and epiglottis; taenia or white matter in the fourth ventricle, from the lateral recess above nearly to the calamus scriptorius below. Measure containing three drachms and a scruple, or about half an ounce. Species of bandage or ligature.

Ligusticum, lig-us'te-kum (appertaining to *Liguria*). L. levisticum. **L. actæ'folium**, *White root;* indigenous; ord. Umbelliferæ. Root is aromatic and carminative. **L. capilla'ceum**, Æthusa meum. **L. car'yi**, carum. **L. fœnic'ulum**, anethum. **L. levis'ticum**, *Lovage;* ord. Umbelliferæ. Stimulant, carminative, emmenagogue, etc. **L. me'um**, Æthusa meum. **L. phellan'drium**, Phellandrium aquaticum. **L. podagra'ria**, *Goutweed;* British plant, used in gout. **L. sil'aüs**, Peucedanum silaüs.

Ligustrin, lig-us'trin. Bitter principle from bark of Ligustrum vulgare.

Ligustrum Ægyptiacum, lig-us'trum e-jip-te'akum (*ligo*, to bind, because used for bands). Lawsonia inermis. **L. vulga're**, privet, prim, privy, prim-print; ord. Oleaceæ; shrub growing wild in Europe and the United States. Leaves are astringent, bitter, and antigalactic; flowers have been employed in decoction in sore throat and ulcerous stomatitis; berries are cathartic.

Lilac (li'lak), **common.** Syringa vulgaris. **L. vulga'ris**, Syringa vulgaris.

Liliago (lil-e-ah'go) or **Liliastrum**, lil-e-as'trum (dim. of **Lilium**, lily). *Spiderwort.* Alexipharmic and carminative.

Lilium candidum, lil'e-um kan'did-um. *White lily;* ord. Liliaceæ. Infusion of the flowers in olive oil is emollient, and applied externally under the name of *Lily oil.* Scales of the bulb roasted are employed as maturatives. **L. conval'lium**, Convallaria maialis.

Lily, lil'e. Lilium. **L., ground**, Trillium latifolium. **L., May**, Convallaria maialis. **L., pond**, Nelumbium luteum. **L., pond, white**, Nymphæa odorata. **L., pond, yel'low**, Nuphar advena. **L., toad**, Nymphæa odorata. **L. of the val'ley**, Convallaria maialis. **L., wa'ter, lit'tle**, Brasenia hydropeltis. **L., wa'ter, sweet**, Nymphæa odorata. **L., wa'ter, sweet-scent'ed**, Nymphæa odorata. **L., wa'ter, white**, Nymphæa alba. **L., wa'ter, yel'low**, Nymphæa lutea. **L., white**, Lilium candidum, Nelumbium luteum.

Lima dentaria, le'mah den-tah're-ah. A dental file.

Limacum (lim-ah'kum) **cor'nua** (snails' horns). See *Lacrymal puncta.*

Limanchia, lim-an'ke-ah. Debility from hunger.

Limatura (filings) **ferri** (lim-at-u'rah fer're) or **mar'tis.** Iron filings, ferri limatura. **L. stan'ni**, see *Tin.*

Limax, le'maks. Helix, snail; cochlea.

Limb. Member of body attached to the trunk. See *Limbus* and *Membrum.* **L., pec'toral**, upper limb in man, anterior limb of other animals. **L., pel'vic**, lower limb in man, posterior limb of other animals.

Limbus (border) **acetab'uli.** Cotyloid ligament. **L. alveola'ris**, alveolar border or process. **L. cer'ebri**, posterior portion of corpus callosum. **L. conjuncti'væ**, annulus conjunctivæ; arcus senilis. **L. cor'neæ**, see *Cornea.* **L. fos'sæ ova'lis**, see *Ovalis fossa.* **L. lam'inæ spira'lis**, lamina denticulata. **L. lu'teus**, macula lutea; see *Foramen centrale.* **L. poste'rior cor'poris stria'ti**, tænia semicircularis. **L. sphenoïda'lis**, front edge of groove on sphenoid bone for optic commissure. **L. Syl'vii**, fissure of Sylvius.

Lime. Fruit like a small lemon, the juice of which is strongly acid; it is also antiscorbutic, etc.; a species of lemon, the fruit of Citrus acida or C. limetta.

Calx. **L., bone phos'phate of**, see *Cornu ustum.* **L., car'bonate of**, creta. **L., caus'tic**, quicklime. **L., chlo'ride of**, or **chlo'rinated**, calcis chloridum. **L., chlo'rite of**, calcis chloridum. **L., chlo'ruret of**, calcis chloridum. **L., hy'drate of**, see *Calx.* **L., hydrophos'phite of**, calcis hypophosphis. **L., hydrosul'phate of**, calcis sulphuretum. **L., hypochlo'rite of**, calcis chloridum. **L., lactophos'phate of**, calcis lactophosphas. **L. lin'iment**, linimentum calcis. **L., mu'riate of, solu'tion of**, see *Calcis murias.* **L. oxymu'riate of**, calcis chloridum. **L., phos'phate of**, see *Cornu ustum.* **L., phos'phate of, precip'itated**, see *Cornu cervi.* **L. sac'charate of**, see *Syrupus calcis.* **L., slaked**, see *Calx.* **L., solu'tion of**, aqua calcis. **L., sul'phate of**, calcis sulphas. **L., sul'phite of**, calcis sulphis. **L., sul'phuret of**, calcis sulphuretum. **L. wa'ter**, liquor calcis. **L. wa'ter, com'pound**, liquor calcis compositus.

Li'mic (*limos*, hunger). Relating to hunger.

Lim'itans. Limiting, as membrana limitans.

Limiting membrane, lim'it-ing mem'brane. See *Membrana limitans.*

Limitrophes, lim'it-rof-es (*limes*, boundary, *trophe*, nourishment). See *Trisplanchnic nerve.*

Limnemic (lim-ne'mik), **Limnæ'mic**, or **Limnhæ'mic** (*limne*, marsh, *haima*, blood). Epithet given to affections induced by paludal emanations.

Limnomephitis, lim-no-mef-e'tis (*limne*, marsh, *mephitis*, poisonous emanation). Marsh-miasm.

Limo, le'mo. Lemon.

Limoctonia, lim-ok-ton'e-ah (*limos*, hunger, *ktonos*, murder). Abstinence to death; death from hunger; suicide by hunger.

Limon, le'mon. See *Citrus medica.*

Limo'nis cor'tex (Ph. U. S. and Br.). Outer portion of rind or pericarp of fresh fruit of Citrus limonum. **L. suc'cus** (Ph. U. S.), freshly expressed juice of ripe fruit of Citrus limonum.

Limonium, lim-o'ne-um, Statice limonium. **L. ma'lum**, see *Citrus medica.*

Limophthisis, lim-o-te'sis (*limos*, *phthisis*, wasting). Wasting from privation of food.

Limopsoitos (le-mo-soi'tos) or **Limopsoitosis**, le-mo-soit-o'sis. Limphoitos.

Limopsora, le-mo-so'rah (*limos*, hunger, *psora*, itch). Cutaneous affection with itching, from fasting.

Limos, le'mos. Hunger.

Limosis, lim-o'sis. Stomach disease; morbid appetite; bulimia. Singular forms of depraved appetite are observed, especially in chlorosis, as well as during pregnancy, as chalk-eating, fondness for slate-pencils. **L. a'vens**, insatiable hunger. **L. cardial'gia**, cardialgia; pyrosis. **L. dyspep'sia**, dyspepsia. **L. em'esis**, emesis. **L. ex'pers**, anorexia. **L. ex'pers protrac'ta**, fasting. **L. fla'tus**, flatulence. **L. helluo'num**, gluttony. **L. pi'ca**, malacia.

Limotherapeia, le-mo-ther-ap-e'ah (*limos*, *therapeia*, treatment), **Limother'apy.** Hunger-cure; cure by fasting.

Lim'pets' eyes. Artificial eyes so called from fancied resemblance to the limpets, a univalve shell found adhering to rocks.

Limphoitos (lim-foi'tos) or **Limphoi'toris** (*limos*, hunger, *phoitos*, erratic insanity). Insanity from prolonged hunger.

Linagogus (lin-ag-o'gus) or **Linagogue**, lin'a-gog (*linum*, thread, *ago*, to lead). Instrument with which to direct a suture or thread.

Linamentum, lin-am-en'tum. Linteum; tent; charpie.

Linaria, lin-ar'e-ah. Antirhinum linaria. **L. cymbala'ria**, Antirhinum linaria. **L. elat'ine**, Antirhinum elatine. **L. vulga'ris**, Antirhinum linaria.

Linctuarium, link-tu-ah're-um (*lingo*, to lick). Linctus.

Linctus, link'tus. Thick, syrupy preparation of medicine. **L. al'bus**, looch album. **L. amygdali'nus**, looch album. **L. ad aph'thas**, mel boracis. **L. de bora'ce** or **bora'cicus**, mel boracis. **L. commu'nis**, looch album.

Lind'en tree. Tilia; T. Americana.

Line. Extent in length; twelfth part of an inch. The median line of the body is an imaginary line supposed to set out from the top of the head and to fall between the feet, so as to divide the body vertically into two equal and symmetrical parts; cord or thread; linteum; spine; Linum usitatissimum. **L., alve'olo-bas'ilar,** line from basion to alveolar point. **L., alve'olo-na'sal,** L. from nasal point to alveolar point. **L., atrope,** L. normal to plane of rotary axes of eye. **L., auric'ulo-bregmat'ic,** L. from auricular point of bregma, in craniometry. **L., ba'sio-alve'olar,** L., alveolo-basilar. **L., buc'cal,** ridge on anterior border of ramus of lower jaw. **L., Cam'per's,** see *Camper, profile line of.* **L., Eb'erth's,** L. of meeting of cells of cardiac muscle. **L., embryon'ic,** primitive trace in middle of area germinativa. **L., fa'cial,** Camper's line; see *Facial.* **L., gin'gival,** see *Gingivæ.* **L., glute'al,** curved lines on external or dorsal surface of the ilium. **L., il'io-pectine'al** or **innom'inate,** see *Iliopectinea linea.* **L., interauric'ular,** L. between two auricular points. **L., interju'gal,** L. between jugal points. **L., interme'diate,** Krause's membrane. **L-s, intertrochanter'ic,** lines, one separating neck of femur from the shaft; the other continuous with the posterior border of the trochanter. **L., Nélaton's,** diagnostic line for posterior dislocation of head of femur, taken from anterior superior spinous process of ilium to most prominent point of tuber ischii; the trochanter in such dislocations is always above this line. **L., oblique, external,** line from mental tubercle to anterior margin of the ramus of the jaw. **L., partu'rient,** axis of canal for passage of child in childbirth. **L., pectine'al,** part of ilio-pectineal line formed by pubic bone. **L., poplite'al,** line on shaft of tibia giving origin to the soleus. **L., prim'itive,** primitive streak. **L-s, tem'poral,** two lines on the parietal bone, to which are attached the temporal fascia and temporal muscle. **L., vis'ual,** L., axis.

Linea, lin'e-ah. Line. **L. al'ba,** tendinous, strong, and highly resisting cord, extending from the ensiform cartilage of the sternum to the symphysis pubis, with the umbilicus near its middle; formed by the decussation of the aponeurosis of the abdominal muscles. Its use is to limit the movement of the chest backward, to prevent it from separating too far from the pelvis, and to furnish a fixed point for the abdominal muscles in their contraction. Anterior peduncle of pineal gland. **L. as'pera,** *Rugged ridge;* rough projection at the posterior surface of the femur. **L. candid'ula abdom'inis,** L. alba. **L. centra'lis,** L. alba. **L. Douglas'ii,** semilunar fold of Douglas, a lunated edge in the posterior wall of the sheath of the rectus abdominis muscle. **L. em'inens,** ridge on posterior surface of patella; spine from top of pyramid of cerebellum; ridge on cricoid cartilage, on hyoid bone or scapula. **L. fronta'lis,** temporal crest. **L. fus'ca,** brown line; deposit of brown pigment, generally in the last months of pregnancy, and most plainly on the linea alba from the umbilicus down toward the symphysis pubis. **L. iliopectine'a,** iliopectinea linea. **L. innomina'ta,** iliopectinea linea. **L. interme'dia,** Krause's membrane. **L. poplite'a,** oblique line of tibia. **L. primiti'va,** primitive streak. **L. quadra'ti,** well-marked eminence on the back part of the shaft of the femur, giving attachment to the quadratus femoris muscle. **L. Spige'lii,** commencement of anterior aponeurosis and conjoined tendon. **L. splen'dens,** longitudinal fibrous band extending along the middle line of the pia mater of the cord on its anterior surface.

Lineæ (lin'e-e) (lines) **albican'tes.** White lines left where the skin, as of the abdomen or mammæ, has been greatly stretched. **L. arcua'tæ,** curved lines. **L. atroph'icæ,** linear atrophy of the skin. **L. cruciat'æ,** four ridges on internal surface of the occipital bone. **L. semicircula'res exter'næ,** curved lines. **L. semiluna'res,** lines bounding the outer margin of the recti muscles of the abdomen, formed by the union of the abdominal tendons; lines crossing these muscles are called lineæ transversæ. **L. semiluna'res Spige'lii,** semilunar notched inner edge of the fleshy portion of the transversalis abdominis, at the point where the muscular fibres connect with the tendinous or aponeurotic fibres, serving for the insertion of the muscle. **L. transver'sæ,** see *L. semilunares* and *Processus* or *Fasciculi teretes.*

Lineament, lin'e-ah-ment (*linea,* line). Delicate trait observed on the countenance, constituting its special character, enabling us to preserve its image, and the cause of resemblance to others; feature. First traces of organization in the embryo of man and animals.

Linear (lin'e-ar) or **Lin'eal** (*linea,* line). Epithet applied to very narrow fractures in which the fragments are scarcely separated. See *Atrophy, linear.* **L. crush'ing,** operation performed with the écraseur. **L. extrac'tion,** see *Cataract* (operations).

Lineola, lin-e'ol-ah (dim. of **Linea**). Small line.

Lineolæ mammarum, lin-e'ol-e mam-mah'rum. White lines on the breasts.

Lingism, ling'izm (after Ling of Sweden, the proposer). Kinesipathy.

Lingua, lin'gwah (*lingo,* to lick). Tongue. **L. a'vis,** see *Fraxinus excelsior.* **L. bo'vis,** Anchusa officinalis. **L. cani'na,** cynoglossum. **L. cervi'na,** Asplenium scolopendrium. **L. exig'ua,** epiglottis. **L. fræna'ta,** see *Ankyloglossa.* **L., progno'sis ex,** glossomantia. **L. propen'dula,** swollen or hypertrophied tongue. **L. serpenta'ria,** Ophioglossum vulgatum. **L. vit'uli,** swelling or hypertrophy of the tongue.

Linguadental, lin-gwah-den'tal (*lingua,* tongue, *dens,* tooth). Relating to the tongue and teeth.

Linguæ detentor, lin'gwe de-ten'tor. See *Glossocatochus.* **L. exonco'sis,** swelling of the tongue. **L. scal'pium,** instrument for removing mucous covering from the tongue.

Lingual, lin'gw'l. Relating to the tongue. **L. ar'tery** arises from the external carotid; after several tortuosities it reaches the base of the tongue, becomes horizontal, and, under the name *Ranine,* advances to the tip, to anastomose with its fellow. **L. glands,** intralingual glands. Conglomerate mucous glands collected about the posterior part of the dorsum of the tongue, into which the ducts of many of them open; others are found at the borders of the tongue, and a small group is on the under surface, called *Glands of Bauhin* and *G. of Nuhn,* from which several ducts open separately on the mucous membrane. **L. mus'cle,** small, long fasciculus of fibres hidden beneath the sides of the tongue, between the hyloglossus and styloglossus muscles on the outside and the genioglossus within. This muscle passes from the base to the tip of the tongue; it shortens the tongue, depresses its point, and can carry it to the right or left side. **L. nerve,** name given to the ninth pair or hypoglossus; it is generally applied to a branch given off from the inferior maxillary, or third branch of the fifth pair. Some of the filaments from it are distributed to the tongue, and said to have been traced as far as the papillæ; hence it has been regarded as the gustatory nerve. It is doubtless the nerve of general sensibility to the tongue. **L. vein** follows nearly the same distribution as the artery, and opens into the internal jugular vein.

Lingualis, lin-gwal'is. Lingual; lingual muscle.

Linguetta laminosa, lin-gwet'tah lam-in-o'sah (dim. of **Lingua**). Lingula.

Linguiform, lin'gwe-form (*lingua,* tongue, *forma,* form). Shaped like a tongue.

Lingula, lin'gu-lah (dim. of **Lingua**). Speculum of bone projecting backward from the posterior extremity of the carotid groove on the outer side of the internal carotid artery See *Ligula.* **L. auric'ulæ,** small cartilaginous prominence at upper part of lobe of ear. A depression in the cerebellum in front of the lingula is called *recessus.* **L. fis'tulæ,** epiglottis. **L. lamino'sa,** thin, transversely grooved lobule of gray substance derived from the anterior border of the cerebellum, intimately blended with the valve of Vieussens. **L. mandib'ulæ,** small odontoid process on front margin of inferior dental foramen. **L. of**

Wris'berg, nerve-fibres connecting motor and sensory roots of fifth pair of nerves.

Linguodental, lin-gwo-den'tal. Relating to the tongue and teeth.

Lini farina, le'ne fah-re'na. See *Linum usitatissimum.* **L. usitatis'simum sem'ina,** see *Linum usitatissimum.*

Liniment, lin'e-ment (**Linimenta,** plural of **Linimentum**) (*lino,* to anoint). Unctuous medicine containing usually oil or lard, employed externally in the form of friction. **L. of ac'onite,** linimentum aconiti. **L. of ammo'nia, com'pound,** see *Lotion, Granville's.* **L. of ammo'nia, strong,** linimentum ammoniæ. **L. of ammo'nia, subcar'bonate of,** linimentum ammoniæ carbonatis. **L., ammoni'acal,** linimentum ammoniæ. **L., an'odyne,** linimentum opii. **L. of belladon'na,** linimentum belladonnæ. **L., cam'phor,** linimentum camphoræ. **L. of cam'phor, com'pound,** linimentum camphoræ compositum. **L. of canthar'ides,** linimentum cantharidis. **L. of canthar'ides, cam'phorated,** linimentum e cantharidibus camphoratum. **L. of chlo'roform,** linimentum chloroformi. **L., cro'ton oil,** linimentum crotonis. **L. of i'odide of potas'sium and soap,** linimentum potassii iodidi cum sapone. **L. of i'odine,** linimentum iodi. **L., lime,** linimentum aquæ calcis. **L. of lime-water,** linimentum aquæ calcis. **L., mercu'rial,** linimentum hydrargyri. **L. of mus'tard, com'pound,** linimentum sinapis compositum. **L. of o'pium,** linimentum opii. **L., Saint John Long's,** counterirritant liniment used by a celebrated empiric at the commencement of the second quarter of the nineteenth century; said to have consisted of oil of turpentine and dilute acetic acid held in suspension by yolk of egg. **L., sim'ple,** linimentum simplex. **L., soap,** linimentum saponis. **L., soap, com'pound,** linimentum saponis compositum. **L., soap and o'pium,** linimentum saponis et opii. **L. of Span'ish flies,** linimentum cantharidis. **L. of subac'etate of lead,** linimentum plumbi subacetatis. **L., tur'pentine,** linimentum terebinthinæ. **L. of tur'pentine and ace'tic acid,** linimentum terebinthinæ aceticum. **L. of ver'digris,** linimentum æruginis. **L., vol'atile,** linimentum ammoniæ.

Linimentum, lin-e-men'tum. Liniment. **L. aconi'ti** (Ph. Br.), *Liniment of aconite* (aconite root, ℥xx; camphor, ℥j; rectified spirit, q. s. to make f℥xxx); in neuralgic and other pains, ♏xx or xxx being rubbed on the part. **L. æru'ginis** (ærugin., aceti, mellis despum.); used as an escharotic and detergent; diluted, as a gargle in venereal ulcerations and in foul ulcers. **L. al'bum,** ceratum cetacei, unguentum cetacei. **L. ad ambustio'nes,** L. aquæ calcis. **L. ammo'niæ** (Ph. U. S. and Br.), *Strong liniment of ammonia, Volatile liniment* (water of ammonia, ℥ivss; cottonseed oil, ℥xss); stimulating and rubefacient soap. **L. ammo'niæ carbona'tis,** *Liniment of subcarbonate of ammonia, Hartshorn and oil* (solut. subcarb. ammon., f℥j; olei oliv., f℥iij); stimulating liniment, used to relieve rheumatic pains, bruises, etc. **L. ammo'niæ compos'itum,** see *Granville's lotion.* **L. ammo'niæ sesquicarbona'tis,** linimentum ammoniæ carbonatis. **L. ammonia'tum ammo'nicum,** L. ammoniæ fortis. **L. Anglica'num,** L. ammoniæ fortis. **L. ad aph'thas,** mel boracis. **L. aq'uæ cal'cis,** *L. Calcis* (Ph. U. S. and Br.), *Liniment of lime-water, Lime liniment, Carron oil* (because used in the Carron iron-works in Scotland) (cottonseed oil, solution of lime, āā ℥viij); cooling and emollient application to burns and scalds. **L. arcæ'i,** unguentum elemi compositum. **L. belladon'næ** (Ph. U. S. and Br.), *Liniment of belladonna* (fluid extract of belladonna, f℥xix; camphor ℥j). **L. de bora'ce,** mel boracis. **L. cal'cis,** L. aquæ calcis. **L. cam'phoræ** (Ph. U. S. and Br.), *Oleum camphoratum, Camphor liniment, Liniment of camphor* (camphor., ℥iij; cottonseed oil, ℥xij); stimulant and discutient. **L. cam'phoræ compos'itum** (Ph. Br.), *Compound camphor liniment* (camphor., ℥ijss; ol. lavand., f℥j; sp. rectificat., f℥xv; liquor. ammon. fortior., f℥v); stimulant and discutient. **L. cantharid'ibus camphora'tum,** *Camphorated liniment of cantharides* (tinct. cantharid., ℥ss; ol. amygd. dul., ℥iv; sapon. amygd., ℥j; camphor., ℥ss); rubefacient and discutient. **L. canthar'idis** (Ph. U. S. and Br.), *Liniment of Spanish flies, L. of cantharides* (cantharides, ℥j; ol. terebinth., Oss); excellent liniment in adynamic cases. **L. chlorofor'mi** (Ph. U. S. and Br.), *Liniment of chloroform* (commercial chloroform, f℥ix; soap liniment, f℥xxiij); f℥ss to f℥j to be applied. **L. croto'nis** (Ph. Br.), *Croton oil liniment* (ol. tiglii, f℥j; ol. cajeput, spirit. rectificat., āā f℥iijss); rubefacient, causing an eruption when continued. **L. hydrar'gyri, L. hydrar'gyri compos'itum,** *Mercurial liniment, Liniment of mercury* (unguent. hydrarg., ℥j; aquæ ammoniæ, liniment. camphor., āā f℥j, Ph. B.); stimulant and discutient to venereal swellings, etc. **L, hyperi'ci,** see *Hypericum perforatum.* **L. i'odi** (Ph. Br.), *Liniment of iodine* (iod., ℥1½; potass. iodid., ℥ss; camphor., ℥¼; sp. rectif., f℥x); to paint a part. **L. o'pii,** *Liniment of opium, Anodyne liniment* (tinct. opii, liniment. saponis, āā f℥ij; Ph. Br.); anodyne and slightly rubefacient; see *Linimentum saponis et opii.* **L. plumba'tum,** unguentum plumbi superacetatis. **L. plum'bi subaceta'tis** (Ph. U. S.), *Liniment of subacetate of lead* (cottonseed oil, ℥iij; solution of subacetate of lead, ℥ij). **L. potas'sii io'didi cum sapo'ne,** *Liniment of iodide of potassium and soap* (saponis dur., potass. iodid., āā ℥iss; glycerin., f℥j; ol. limonis, f℥j; aq. destill., f℥x; Ph. B.). **L. sapona'ceum hydrosulphura'tum** (common soap, 500 p.; white poppy oil, 250 p.; sulphuret of potass., 100 p.; oil of poppy seed, 750 p.); in cutaneous affections, as psora, herpes, etc. **L. sapona'ceum opia'tum,** L. saponis et opii. **L. sapona'to-ammonia'to-camphora'tum,** L. camphoræ compositum. **L. sapona'to-camphora'tum,** L. saponis camphoratum. **L. sapo'nis** (Ph. U. S. and Br.), **L. sapo'nis camphora'tum** or **compos'itum,** *Steer's opodeldoch, Soap liniment, Compound soap liniment* (sapon. rasur., ℥v; camphor., ℥ijss; ol. rosmarini, f℥ivss; alcohol., f℥xlj; aquæ, q. s. to make Oiiiss); stimulant and anodyne, in bruises, local pains, etc. **L. sapo'nis compos'itum,** L. saponis camphoratum. **L. sapo'nis et o'pii,** *Soap and opium liniment, Bates's anodyne balsam* (saponis dur., ℥iv; opii, ℥j; camphoræ, ℥ij; olei rosmarin., f℥ss; alcohol, Oij); anodyne, in chronic rheumatism and local pains in general; see *Linimentum opii.* **L. sim'plex,** *Simple liniment* (ol. oliv., 4 p.; ceræ albæ, 1 p.); emollient; used in chaps, etc.; see *Unguentum ceræ.* **L. sina'pis compos'itum** (Ph. U. S. and Br.), *Compound liniment of mustard* (volatile oil of mustard, f℥j; extract of mezereum, gr. xl; camphor, ℥ij; castor oil, f℥vj; alcohol, q. s. to make f℥vss). **L. terebin'thinæ** (Ph. U. S. and Br.), *Turpentine liniment, Kentish's ointment* (resin cerate, ℥xiij; oil of turpentine, Oss); stimulant; applied to burns, etc. **L. terebin'thinæ ace'ticum,** *Liniment of turpentine and acetic acid* (ol. tereb., acid. acet., linim. camphor., āā f℥j. M.; Ph. B.); said to resemble St. John Long's liniment. **L. volat'ile,** L. ammoniæ carbonatis.

Lin'in. Drastic principle derived from Linum catharticum.

Linitis, lin-e'tis (*linon,* web made from linen or flax). Term suggested by the late Dr. Brinton for inflammation of the filamentous network of areolar tissue ensheathing the vessels of the stomach. When characterized by purulent infiltration or by interstitial abscess, it is called *Suppurative linitis* or *Phlegmonous gastritis.* When linitis is attended with hyperplasia of the connective tissue or hypertrophy of the muscular structure, it is called *Plastic linitis.*

Linnæa (lin-ne'ah) or **L. borea'lis** (after Linnæus). Ord. Caprifoliaceæ. This plant has a bitter, subastringent taste, and is used in fomentation in rheumatic pains. An infusion in milk is used in Switzerland for sciatica.

Linoleum, lin-o'le-um. Name given to preparations of flaxseed oil, having physical properties adapted to some purposes for which caoutchouc is used.

Linospermum, lin-o-sper'mum (*linon,* flax, *sperma,* seed). See *Linum usitatissimum.*

Lin'seed. See *Linum usitatissimum.*

Lint. Linteum. **L., pa'tent,** see *Linteum.*

Linteamen, lin-te-ah'men. Linteum, pledget.

Linteum, lin'te-um (*linum*, flax, linen). Linen cloth. Charpie. Soft, flocculent substance, made by scraping old linen cloth or by unravelling old linen cut into small pieces, employed in surgery as a dressing to wounds, ulcers, etc., either simply or covered with ointment. *Patent lint* is generally prepared out of cloth manufactured for the purpose, and is therefore more uniform in shape and consistence.

Linum, le'num. See *Linteum* and *Linum usitatissimum*. **L. aquili'num**, plant growing in Chili, has antiseptic and stomachic properties. **L. arven'se**, L. usitatissimum. **L. cathart'icum**, fairy lint, dwarf flax, *Purging flax*, *Mill mountain*, ord. Linaceæ. This plant is possessed of cathartic properties, and has a bitterish, disagreeable taste. **L. cru'dum**, see *Apolinosis*. **L. min'imum**, L. catharticum. **L. usitatissi'mum**, *Common flax*, *Line*. The seeds, *Linum* (Ph. U. S.), *Linseed*, *Flaxseed*, are inodorous and almost tasteless, yielding mucilage to warm water, and oil by expression. They are demulcent and emollient. Linseed, when ground into powder, *Lini farina* (Ph. Br.), *Flaxseed meal*, forms a good emollient poultice, the powder being stirred into boiling water. The oil, *Oleum lini*, *Flaxseed* or *Linseed oil*, is emollient and demulcent.

Liocome, le'o-kome (*leios*, smooth, *kome*, hairy scalp). Dextrin.

Liomyo'ma. Small and multiple muscular tumor.

Lion's foot. Nabalus albus, prenanthes. **L.'s tail**, leonurus.

Liopodia (le-o-pod'e-ah) or **Liopus**, le-o'pus. See *Leiopus*.

Lip. See *Lips*. In entomology, *labium* means the lower lip, *labrum* the upper. The lips are composed of different muscular fasciculi, nerves, and vessels, covered by the skin and mucous membrane of the mouth, the anterior aperture of which they circumscribe. They are inservient to mastication, pronunciation, etc., and are distinguished into *upper* and *lower*—*anocheilon* and *catocheilon*. They are placed in front of each jaw, forming between them the anterior aperture of the mouth. They unite at each side, forming the *angles* or *commissures* of the mouth, *Chalini*. Their free edge is covered with a mucous membrane of a more or less livid red. They receive their arteries from the external carotid. Their veins open into the two jugulars. Their lymphatic vessels descend into the ganglions situate beneath the chin. Their nerves are derived from the infraorbitar, mental, and facial. See *Labium* and *Labrum*. **L., Le'opold's**, form of erectile labial angioma with which the emperor Leopold of Germany was affected. It was pendulous, and whenever he was in a passion it would swell like a turkey-cock's comb, so as to hang down on his chin. **L. read'ing**, system of instruction of deaf-mutes, by which they are taught to read by observing persons' lips. **L. talk'ing**, system of instruction by which deaf-mutes are taught to talk.

Lipa, le'pah. Fat.

Lipacidæmia, lip-as-id-e'me-ah (*lipos*, fat, *acidus*, acid, *haima*, blood). Presence of fatty acids in the blood.

Lipacidu'ria (*lipos*, fat, *acid*, *ouron*, urine). Excess of volatile fatty acid in urine.

Lipæmia, lip-e'me-ah. Presence of fat in the blood.

Lipara, lip'ar-ah. Plasters containing much oil or fat.

Liparia, lip-ah're-ah. Polysarcia.

Liparocele (lip-ar-o-se'le) (Eng. lip'ar-o-seel) or **Lip'ocele** (*liparus*, *kele*, tumor). Fatty tumor, *Lipoma;* or fatty tumor of the scrotum, *Hernia pinguedinosa scroti*.

Liparoid, lip'ar-oid. Fatty.

Liparom'phalus (*liparos*, fatty, *omphalos*, navel). Fatty tumor situate at the navel; umbilical epiplocele.

Liparoscir'rhus. Fatty scirrhous tumor.

Liparotes, lip-ar'ot-ees. Obesity; polysarcia.

Liparotrichia, lip-ar-o-trik'e-ah (*liparus*, *thrix*, hair). Oiliness of the hair; seborrhœa capillitii.

Liparous, lip'ar-us. Fatty.

Liparus, lip'ar-us. Fatty.

Lipasma, lip-az'mah. Polysarcia. Unguent.

Lipe, lip'e. Fat.

Lipeman'ia. Lypemania.

Liphæmia, lip-he'me-ah. Leiphæmia; oligæmia.

Lipocele, lip-o-se'le (Eng. lip'o-seel) (*lipe*, *kele*, tumor). Fatty tumor.

Lipodermia, lip-o-dur'me-ah (*leipo*, to leave, *derma*, skin). Deficiency of skin, as of prepuce.

Lipodermus, lip-o-dur'mus. See *Leipodermus*.

Lipofibroma, lip-o-fib-ro'mah (*lipos*, fat). Fibrous form of lipoma; lipoma durum.

Lipogenous, lip-oj'en-us (*lipe*, *gennao*, to generate). Relating or pertaining to fatty formation; developed in fat, as lipogenous angioma.

Lipoma, lip-o'mah (*lipos*, fat, *oma*, tumor). Fatty tumor of an encysted or other character. When it contains cysts, it is called *Cystic lipoma*. A *fibrous lipoma*, *Steatoma Mülleri*, is a lipomatous tumor whose lobules are separated from one another by bands of fibrous tissue. **L. arbores'cens**, condition peculiar to serous and synovial membranes, the villous and polypoid appendages of which have undergone hyperplastic development. **L. colloï'des**, myxolipoma. **L., cys'tic**, see *Lipoma*. **L. du'rum**, L. with hypertrophied fibrous substance. **L., her'nial**, fatty hernial tumor, as of the scrotum. **L. myxomato'des**, myxosarcoma; tumor containing adipose and mucous tissues. **L., nævoid** or **telangiecto'des**, L. with increased vascular supply, like nævus.

Lipomatodes (lip-o-mat-o'dees) or **Lipomatoid**, lip-o'ma-toid. Lipomatous.

Lipomatosis, lip-o-mat-o'sis. Tendency or predisposition to the growth of lipomatous tumors. Fatty degeneration. **L., myoatroph'ic**, pseudo-hypertrophic muscular paralysis. **L. universa'lis**, obesity.

Lipomatous, lip-om'at-us. Having the nature of lipoma.

Lipomeria, lip-o-mer'e-ah (*leipo*, *meros*, part). Monstrosity from arrest of development or from defect. Deficiency of one or more of the parts; for example, in one who has only four fingers.

Lipomyxoma, lip-o-miks-o'mah. Tumor containing adipose and mucous tissues.

Lipopsychia, lip-o-sik'e-ah (*leipo*, *psuche*, breath). Syncope; adynamia; asthenia.

Liposarco'ma. Tumor with the blended characteristics of lipoma and sarcoma.

Liposar'cous (*leipo*, *sarx*, flesh). Thin; of slight build.

Liposis, lip-o'sis. Lipomatosis. See *Polysarcia*.

Liposphyxia, lip-o-sfiks'e-ah (*leipo*, *sphuxis*, pulse). Syncope.

Lipospongo'sis (*leipo*, *spongos*, sponge). Development of fatty and spongy growth.

Lipothymia, lip-o-thim'e-ah (*leipo*, *thumos*, mind). Syncope; excessive languor.

Lip'pa. Lippitudo.

Lip'per. Lepra; leprous.

Lip'pia grave'olens. Shrub of Texas and Mexico; demulcent and emmenagogue. Same properties belong to **L. Mexica'na**, which has the same habitat. **L. nodiflo'ra**, creeping vervain of E. and W. Indies, United States, etc.; leaves are used in dyspepsia and diarrhœa.

Lippitudo, lip-pe-tu'do. *Chronic conjunctivitis*, *Bleareye*, *Bleareyedness*, *Blearedness*. Copious secretion of the sebaceous humor of the eyelids, rendering them gummy; chronic inflammation of the tarsal margins, the eyelids being red, tumefied, and painful. Blepharadenitis. **L. angula'ris**, blepharadenitis of the angle of the eye. **L. neonato'rum**, ophthalmia neonatorum. **L. prurigino'sa**, psorophthalmia.

Lippus, lip'pus. One affected with bleareye.

Lips. Folds belonging to the genital organs of the female: 1. *Labia pudendi*, two membranous folds, thicker above than below, limiting the vulva laterally and extending from the inferior part of the mons Veneris to the perineum. They unite

anteriorly and posteriorly, forming commissures, the posterior of which is called *Fourchette*. Their outer surface is convex, formed of skin and covered with hair; the inner surface is white and covered by a mucous membrane continuous with that lining the other parts of the vulva. The space between the skin and mucous membrane is filled with a fatty tissue and fibrous bands, fibres of the constrictor vaginæ muscle, vessels, and nerves. 2. *Labia pudendi minora*, see *Nymphæ*. We speak also of the lips of a wound, ulcer, etc. when alluding to the edges of these solutions of continuity. See *Lip*.

Lipsis (lip'sis) **an'imi.** Syncope.

Lipsotrichia, lip-so-trik'e-ah (*leipsis*, forsaking, *thrix*, hair). Absence of hair; baldness; alopecia.

Lipu'ria (*lipos*, fat, *ouron*, urine). Fatty condition of the urine.

Lipus, le'pus. Fat.

Lipyria, lip-ir'e-ah (*leipo*, *pur*, fire). Malignant fever accompanied with cold extremities; term used by the old writers.

Liquamen, lik-wah'men (*liquo*, to dissolve). Liquid mixture; garum.

Liquamumia, lik-wah-mu'me-ah. Human fat.

Liquarium, lik-wah're-um (*liqueo*, to melt or dissolve). Simple syrup

Liquatio, lik-wah'she-o. Liquefaction.

Liquefacient, lik-we-fa'shent (*liqueo*, to be liquid, *facio*, to make). Medicinal agent which seems to have the power of liquefying solid depositions, as mercury, iodine, etc.

Liquefaction, lik-we-fak'shun. Transformation of a solid substance into a liquid, especially metals and fatty bodies. See *Fusion*.

Liquefactive degeneration, lik-we-fak'tiv de-jen-e-ra'shun. Form of degeneration seen in the simple softening of certain organs, as the brain, and the liquefaction of inflammatory products in the suppurative process.

Liq'uid, adhe'sive, May'nard's. Collodion. **L., amniot'ic,** liquor amnii. **L., blis'tering,** liquor epispasticus. **L. ceph'alo-rachid'ian,** cerebro-spinal fluid. **L., disinfect'ing, Burnett's,** see *Burnett's disinfecting liquid*. **L., disinfect'ing, Lab'arraque's,** liquor sodæ chlorinatæ. **L., disinfect'ing, of Larnaudès,** see *Zinci sulphas*. **L., disinfect'ing, Ledoy'en's,** see *Ledoyen's disinfecting liquid*. **L., glass,** potassium silicate. **L., Laville's,** Laville's liquid.

Liquidam'bar asplenifo'lia. Comptonia asplenifolia. **L. officina'lis,** see *Styrax*. **L., Orien'tal,** liquid storax. **L. peregri'na,** Comptonia asplenifolia. **L. styracif'lua,** *Sweet gum*, *White gum*, ord. Balsamineæ. Name of the tree affording *Liquidambar* and *Storax liquida*, *Styrax liquida*, or *Liquid storax*. Liquidambar is a resinous juice, at first of about the consistence of turpentine, by age hardening in a solid, brittle mass. The bark is used in diarrhœa and dysentery. *Styrax liquida* is obtained from this plant by boiling. It is used occasionally as a stomachic in the form of plaster.

Liquidum (lik'wid-um) **Haversia'num.** Synovia. **L. ner'veum,** nervous fluid.

Liquiritia, lik-ir-ish'e-ah. Glycyrrhiza.

Li'quor (*liqueo*, to be liquid). Name given to many compound liquids, and especially those the bases of which are water and alcohol. **L. ac'idi arsenio'si** (Ph. U. S.), solution of arsenious acid (acid. arsenios., gr. xxxvij; acid. hydrochloric., ♏lxvij; aquæ dest., q. s. to make Oss). It contains 4.6 grs. to every f ℥j. Properties of Fowler's solution. Dose, ♏j–vj. **L. ac'idi chro'mici** (Ph. Br.), solution of chromic acid; solution containing 25 per cent. of the acid; applied externally as a caustic. **L. æthe'reus,** æther. **L. æthe'reus sulphu'ricus,** spiritus ætheris sulphurici. **L. alu'minis compos'itus,** *Compound solution of alum* (alum, zinc sulphate, āā ℥ss; hot water, Oij; dissolve and filter through paper). Detergent and stimulant; used as a collyrium, when properly diluted, in ophthalmia; as injection in gleet, leucorrhœa, etc. **L. ex ammo'niâ et o'leo suc'cini,** spiritus ammoniæ succinatus. **L. ammo'niæ** (Ph. U. S.), *Aqua ammoniæ* (Ph. U. S.), *Solution of ammonia* (chloride of ammonium, lime, and water). Liquor ammoniæ may also be made by mixing one part of liquor ammoniæ fortior with two parts of distilled water. Its sp. gr. is 0.960. **L. ammo'niæ aceta'tis,** *L. ammonii acetatis* (Ph. U. S. and Br.), *Solution of acetate of ammonia* or *ammonium Spirit of Mindererus* (acid. acetic. dilut., Oj; ammon. carbonat., q. s.; add the salt to the acid until it is saturated). Sudorific; externally, cooling; dose, f℥ij to f℥j. **L. ammo'niæ fortior,** *Stronger solution of ammonia*, *Aquæ ammoniæ fortior*, *Stronger water of ammonia* (Ph. U. S.), is an aqueous solution of ammonia of the s. g. 0.900. Liquor ammoniæ is stimulant, antacid, and rubefacient. Dose, gtt. x to xx in water or milk. **L. ammo'niæ sesquicarbona'tis,** liquor ammoniæ subcarbonatis. **L. ammo'niæ subcarbona'tis,** *Solution of subcarbonate of ammonium*, *Water of carbonate of ammonia* (ammoniæ carbon., ℥iv; aquæ destillat., Oj). Use, the same as that of the carbonate of ammonium. **L. ammo'nii aceta'tis,** liquor ammoniæ acetatis. **L. ammo'nii aceta'tis for'tior** (Ph. Br.), strong solution of acetate of ammonium (ammon. carb., ℥xvss; acid. acetic., f℥l; aquæ destillat., q. s.); dose, ♏xxx–f℥j. **L. ammo'nii æthe'reus,** spiritus ammoniæ aromaticus. **L. ammo'nii aromat'icus,** spiritus ammoniæ aromaticus. **L. ammo'nii citra'tis,** *Solution of citrate of ammonium* (strong solution of citrate of ammonium, f℥v; distilled water, q. s. to make f℥xx); dose, f℥ij–v (Ph. Br.); given in cases of adynamic fever. **L. ammo'nii citra'tis for'tior** (Ph. Br.) (acid. citric., ℥xij; liquor ammonii fortior, f℥xj; aquæ dest., q. s.). **L. ammo'nii hydrothi'odis,** ammoniæ sulphuretum. **L. ammo'nii oleo'so-aromaticus,** spiritus ammoniæ aromaticus. **L. ammo'nii succin'ici,** spiritus ammoniæ succinatus. **L. ammo'nii vino'sus,** spiritus ammoniæ. **L. am'nii,** liquor of the amnion; fluid exhaled by the amnios and enveloping the fœtus during the whole period of uterogestation. It is often simply called *the waters*. In some women only five or six ounces are met with; in others it amounts to pints. It is limpid, yellowish, or whitish, exhales a faint smell, and has a slightly saline taste. It facilitates the dilatation of the uterus, and aids delivery by acting as a soft wedge inclosed in its membranes, *Bag of waters*. It is probably inservient to useful purposes in the nutrition of the fœtus. **L. am'nii, false,** fluid contained between the amnion and chorion in the early periods of fœtal existence. **L., an'odyne, Hoff'man's,** spiritus ætheris sulphurici compositus. **L. anod'ynus martia'lis,** alcohol sulphurico-ætherеus ferri. **L. anod'ynus terebinthina'tus,** prescribed in cases of gall-stone and of obstructions and indurations of the liver and spleen (Hoffman's anodyne liquor, ℥j; rectified oil of turpentine, ♐ij); dose, 5 to 10 drops. **L. antimo'nii chlo'ridi** (Ph. Br.) (purified black antimony, ℥j; hydrochloric acid, Oiv). Used only as source of oxide of antimony. **L. antimo'nii tartariza'ti,** *Solution of tartarized antimony* (antim. et potass. tartrat., gr. liv.; aq. destillat., Oj; spirit. vini rectif., f ℥vij). Emetic, like the vinum antimonii, and in the same dose. **L. antimo'nii terchlo'ridi,** see *Antimonium muriatum*. **L. arsenica'lis** (Ph. Br.), *Liquor potassii arsenitis* (Ph. U. S.), *Arsenical solution*, *Mineral solvent*, *Solution of arsenite of potassa* or *potassium*, *Fowler's solution of arsenic*, *Tasteless ague drops* (acid. arsenios., gr. xxxvij; potass. bicarbonatis, gr. xxxvij; spirit. lavand. comp., ♏cxxx; aquæ destillat., q. s. to make Oss); 100 minims of Fowler's solution contain nearly one grain of arsenious acid; dose, gtt. v–x. **L. arsenica'lis Biet'tii,** see *Arseniate of ammonia*. **L. arsenica'lis Pearso'nii,** see *Arseniate of soda*. **L. arsen'ici chlo'ridi,** *Hydrochloric solution of arsenic*, *Solution of chloride of arsenic* (arsenious acid, gr. lxiv; hydrochloric acid, f℥ij; distilled water, q. s. to make Oj). Each fluidounce contains four grains of arsenious acid or the equivalent quantity of terchloride. Properties the same as those of liquor arsenicalis; it is a substitute for, and imitation of, *De Valangin's arsenical solution*, *Solutio solventis mineralis*; dose, gtt. v to x. **L. arsen'ici** or **arsen'ii et hydrar'gyri io'-**

didi (Ph. U. S. and Br.), Donovan's solution; see *Arsenic and mercury, iodide of.* **L. atropi'næ sulpha'tis,** *Solution of sulphate of atropia* (atrophiæ sulph., gr. ix; aquæ camphoræ, f℥xviss; Ph. Br.); used by the oculist to dilate the pupil, a drop being placed on the eye. **L. ba'rii chlo'ridi,** baryta, muriate of, solution of. **L. Bellos'tii,** L. hydrargyri nitrici. **L. bismu'thi et ammo'niæ citra'tis,** *Solution of citrate of bismuth and ammonium* (bismuth. citrat., gr. dccc; aquæ ammoniæ, aquæ destillat., āā q. s. to make Oj) (Ph. Br.). Various other unofficinal formulæ for this solution have appeared under the incorrect name of *Liquor bismuthi.* **L. cal'cii chlo'ridi** (Ph. Br.) (calcii chlorid., gr. lxxxviij; aquæ destillat., f℥j); dose ♏x–xl. **L. cal'cis** (Ph. U. S. and Br.), *Aqua calcis, Solution of lime, Lime-water* (calcis aquæ, aquæ destillat., q. s.). Astringent, tonic, and antacid, and used in diarrhœa, diabetes, heartburn, etc., and as a lotion to foul and cancerous ulcers, etc.; dose, f℥ij to Oss in milk. The B. Ph. has *Liquor calcis saccharatus, Saccharated solution of lime* (slaked lime, ℥j; refined sugar, in powder, ℥ij; put them in a bottle containing distilled water Oj, shaking occasionally for a few hours, and separating the clear solution); dose, f℥ss to f℥j. **L. cal'cis chlorina'tæ,** *Solution of chlorinated lime* (made by triturating a pound of *chlorinated lime* with a gallon of water, shaking the mixture, filtering, and keeping in a well-stopped bottle; Ph. Br.). Used in the same cases as chlorinated lime; dose, ♏xx–f℥j. **L. cal'cis compos'itus,** *Aqua calcis composita, Compound lime-water* (lign. guaiac. ras., ℔ss; rad. glycyrrh., ℥j; cort. sassafras., ℥ss; semin. coriand., ℥ij; liquor. calcis, Ovj); stimulant, diaphoretic, and astringent, and used in cutaneous affections. **L. cal'cis muria'tis,** see *Calcis murias.* **L. cal'cis sacchara'tus,** see *Liquor calcis.* **L. carbo'nis deter'gens,** an alcoholic solution of coal-tar, containing, therefore, carbolic and other acids, tarry matter, etc. In emulsion with water it is used as a mouth-wash, injection for ulcers, and for gonorrhœa, parasitic affections, etc. **L. cerebrospina'lis,** cephalospinal fluid. **L. cere'ris,** cerevisia. **L. chlore'ti na'tri,** L. sodæ chlorinatæ. **L. chlo'ri,** see *Chlorine.* **L. chlorure'ti na'tri,** L. sodæ chlorinatæ. **L. chlorure'ti so'dæ,** L. sodæ chlorinatæ. **L. chy'li,** see *Chyle.* **L. cor'nu cer'vi,** liquor volatilis cornu cervi. **L. of Cotug'no,** Cotunnius, liquor of. **L. cu'pri ammonia'ti,** *Blue eye-water, Solution of ammoniated copper* (cupri ammoniat., ℥j; aquæ destill., Oj). Corrosive and detergent. Used externally to foul ulcers, and, diluted with an equal part of distilled water, applied by means of a hair pencil to specks and films on the eye. **L. cu'pri ammoniosulpha'tis,** liquor cupri ammoniati. **L. cu'pri sulpha'tis compos'itus** (cupri sulphat., alumin. sulphat., āā ℥iij; aquæ puræ, Oij; acid. sulph., ℥ij). Astringent in epistaxis, etc.; also called *Aqua styptica.* **L. Cyreni'acus,** benjamin. **L. Donova'ni,** see *Arsenic and mercury, iodide of.* **L. enter'icus,** succus entericus. **L. epispas'ticus,** *Blistering liquid* (cantharid. pulv., ℥viij; acid. acetic., f℥iv; æther, q. s.; Ph. B.). **L. exci'tans,** spiritus ammoniæ succinatus. **L. fer'ri aceta'tis** (Ph. U. S. and Br.) (solution of tersulphate of iron, f℥xivss; glacial acetic acid, f℥iv, f℥vj; water of ammonia, Oj; water and distilled water, of each q. s. to make one pint). Excellent chalybeate tonic; dose, ♏ij–x. **L. fer'ri aceta'tis for'tior** (Ph. Br.) (solution of persulphate of iron, f℥v; solution of ammonia, q. s; glacial acetic acid, liquefied, f℥iij; distilled water, q. s.); dose, ♏j–vj. **L. fer'ri alkali'ni,** *Solution of alkaline iron* (ferri, ℥ijss; acid. nitric., ℥ij; aquæ destillat., f℥vj; liq. potass. subcarb., f℥vj). Tonic, like other preparations of iron; dose, f℥ss–iss. **L. fer'ri chlor'idi** (Ph. U. S. and Br.), *Solution of chloride of iron* (prepared by the action of *muriatic* and *nitric acids* and *distilled water* on *iron wire*); dose, ♏iij–x. **L. fer'ri citra'tis** (Ph. U. S.), *Solution of citrate of iron* (citric acid, ℥iij; solution of tersulphate of iron, ℥xss; water of ammonia, f℥viiiss; water, q. s. to make f℥x). Used to prepare the ferri citras. **L. fer'ri dialysa'tus,** solution of dialyzed iron (strong solution of perchloride of iron, f℥vij; solution of ammonia, distilled water, āā q. s.; Ph. Br). Dose, ♏xx–f℥j. **L. fer'ri io'didi,** *Solution of iodide of iron, Syrupus ferri iodidi* (Ph. U. S.), *Syrup of iodide of iron* (iodin., ℥ij; ferri fil., gr. cclxvj; aquæ destill., q. s. to make Oj; sacchar., ℥xiv); dose, 20 or 30 drops. **L. fer'ri muriat'ici oxyda'ti,** see *Ferri chloridum.* **L. fer'ri muria'tis,** tinctura ferri muriatis. **L. fer'ri nitra'tis** (Ph. U. S.), *Solution of nitrate* or *ternitrate of sesquioxide* or of *sesquinitrate* or *pernitrate of iron* or of the *ferric nitrate.* Recommended in chronic diarrhœa and dysentery. Its virtues exactly resemble those of chloride of iron. (Solution of tersulphate of iron, f℥ij–f℥v; water of ammonia, f℥iij; nitric acid, f℥viiss; distilled water, water, āā q. s. to make ℥xx.) Dose, 10 to 20 drops. **L. fer'ri peraceta'tis** (made by oxidizing the protosulphate of iron to the teroxide, precipitating with ammonia, washing the hydrated peroxide thus formed, and expressing between linen and mixing with diluted acetic acid); dose, gtt. iij–x, largely diluted. **L. fer'ri perchlo'ridi** (Ph. Br.), see *Ferri chloridum.* **L. fer'ri perchlo'ridi for'tior,** see *Ferri chloridum.* **L. fer'ri pernitra'tis,** L. f. nitratis. **L. fer'ri persulpha'tis,** see *Ferri sulphas.* **L. fer'ri et qui'niæ citra'tis** (Ph. U. S.), solution of citrate of iron and quinine (citrate of iron and ammonium, gr. dlxviij; quinine, gr. cv; citric acid, gr. ccxlv; alcohol, f℥vj; distilled water to make f℥iv). Same medicinal properties as citrate of iron and quinine. Dose, ♏x–xx. **L. fer'ri sesquichlora'ti,** see *Ferri chloridum.* **L. fer'ri subsulpha'tis** (Ph. U. S.), see *Ferri sulphas.* **L. fer'ri tersulpha'tis** (Ph. U. S. and Br.), *Solution of tersulphate* or *persulphate of iron* (ferri sulph., ℥viij; acid. sulphuric., ℥iss; acid. nitric., aquæ destillat., āā q. s. to make ℥xx). Used in the formation of different chalybeate preparations. **L. follic'uli,** see *Folliculi Graafiani.* **L. fu'mans Boyl'ii,** solution of hydrosulphuret of ammonium; *Boyle's fuming liquor;* nauseating and emetic, and given in diabetes and diseases of excitement. **L., fu'ming, Boyle's,** liquor fumans Boylii. **L., fu'ming, of Liba'vius,** tin, muriate of. **L., gen'ital,** sperm. **L. gut'ta-per'chæ** (Ph. U. S. and Br.), *Solution of guttapercha.* Solution of gutta-percha, ℥j, in commercial chloroform, f℥vjss, with the addition of carbonate of lead, which by its weight subsides and carries down the coloring matter. Applied by means of a camel's-hair pencil in cutaneous affections, as erysipelas and eczema, and to indolent ulcers. **L. of harts'horn, vol'atile,** liquor volatilis cornu cervi. **L. hydrar'gyri et arsen'ici io'didi,** see *Arsenic and mercury, iodide of.* **L. hydrar'gyri bichlo'ridi,** liquor hydrargyri oxymuriatis. **L. hydrar'gyri chlo'ridi corrosi'vi,** L. hydrargyri oxymuriatis. **L. hydrar'gyri nitra'tis** (Ph. U. S.), *Solution of nitrate of mercury, Acid solution of nitrate of mercury* (mix nitric acid, f℥iij, with distilled water, f℥j, f℥iiiss; dissolve red oxide of mercury, ℥iv, in the mixture, and evaporate); applied externally as an escharotic to malignant and cancerous ulcers, chancres, boils, etc., with a camel's-hair brush, glass rod, match-stick, etc. **L. hydrar'gyri nitra'tis ac'idus,** L. hydrargyri nitratis. **L. hydrar'gyri ni'trici** (hydrarg., 120 p.; acid. nitr. (33°), 150 p.; distilled water, 900 p.); dose, two or three drops in a glass of water. **L. hydrar'gyri oxymuria'tis,** *L. hydrargyri perchloridi* (Ph. B.), *Solution of oxymuriate of mercury, Liquor* or *Solution of corrosive sublimate* or of *Van Swieten* (hydrarg. bichlor., ammon. chlorid., āā gr. x; aquæ destill., Oj; Ph. Br.); dose, f℥ss-i. **L. hydrar'gyri perchlo'ridi** (Ph. Br.), L. hydrargyri oxymuriatis. **L. hydrar'gyri pernitra'tis,** see *Hydrargyri nitras.* **L. hydrar'gyri supernitra'tis,** see *Hydrargyri nitras.* **L. hydrioda'tis arsen'ici et hydrar'gyri,** arsenic and mercury, iodide of. **L. intestina'lis,** succus entericus. **L. i'odi,** *Solution of iodine* (iodin., gr. xx; potass. iodid., gr. xxx; aquæ destillat., f℥j; Ph. B.). **L. i'odi compos'itus** (Ph. U. S.), *Compound solution of iodine, Lugol's solution* (iodin., ℥ss; potass. iodid., ℥j; aquæ destillat., f℥viij, f℥iij); dose, gtt. vj-xij, in sugared water. **L. lac'tis,** see *Milk.* **L. lithar'gyri**

subaceta'tis, L. plumbi subacetatis. **L. lithar'gyri subaceta'tis compos'itus**, liquor plumbi subacetatis dilutus. **L. lith'iæ efferves'cens**, *Effervescing solution of lithia* (lithiæ carbonat., gr. x; aquæ, Oj; mix and introduce in it as much carbonic acid gas as can be passed in with a pressure of about four atmospheres; Ph. B.); dose, f℥iv–viij. **L. lym'phæ**, see *Lymph.* **L. magne'siæ** or **magne'sii carbona'tis** (Ph. Br.) (magnes. sulph., sodii carb., aquæ destillat., and acid. carbonic.); dose, as antacid and laxative, f℥j–ij; see *Magnesia, fluid.* **L. magne'sii citra'tis** (Ph. U. S. and Br.) (magnes. carb., gr. cc; acid. citric., gr. cccc; syrup of citric acid, f℥ij; potass. bicarb., gr. xxx; aquæ, q. s. to make f℥xij); cathartic in doses of f℥xij; laxative in half that quantity or fractional doses; see *Magnesii citras.* **L. Mindere'ri**, liquor ammonii acetatis. **L. of Monro'**, *Solution of Monro,* solution used by Monro for the preservation of anatomical preparations; composed of alcohol at 22° or 24°, with a drachm of nitric acid to each pint. **L. Morgagnii**, Morgagni, humor of. **L. mor'phiæ aceta'tis**, **L. morphi'næ aceta'tis** (Ph. Br.), *Solution of acetate of morphia* or *morphinæ, Anodyne drops* (morph. acet., gr. ix; acid. acetic., dilut., ♏xviij; spirit. rectificat., f℥ss; aq. destillat., f℥iss); dose, ♏x–xxx. **L. mor'phiæ hydrochlora'tis** (Ph. Br.), *Solution of hydrochlorate* or *muriate of morphia* (hydrochlorate of morphia, gr. ix; dilute hydrochloric acid, ♏xviij; rectified spirit, f℥ss; distilled water, f℥iss); dose, ♏x–xxx. **L. mor'phiæ sulpha'tis**, *Solution of sulphate of morphia* (morphiæ sulphat., gr. viij; aquæ destillat., Oss); dose, f℥j–ij, containing from ½ to ¼ of a grain. **L. morphi'næ bimecona'tis** (Ph. Br.), *Solution of bimeconate of morphine* (morph. hydrochlor., gr. ix; aquæ ammoniæ, q. s.; acid. meconic., gr. vj; spirit. rectificat., f℥ss; aquæ destillat., q. s.); dose, ♏v–xxx. **L. mu'ci**, see *Mucus.* **L. na'tri oxymuriat'ici**, L. sodæ chlorinatæ. **L. oleo'sus Syl'vii**, spiritus ammoniæ aromaticus. **L. o'pii sedati'vus**, *Battley's solution of opium.* Empirical preparation by a London druggist of that name. An aqueous solution of opium, evaporated to dryness to get rid of the acid resin, redissolved in water, and a small portion of alcohol added to give it permanence; but devoid of many of the narcotic effects of opium. **L. o'pii sedati'vus** (Haden's), see *Tinctura opii.* **L. o'vi al'bus**, albumen ovi. **L. pancreat'icus**, see *Pancreas.* **L. pepsi'ni** (Ph. U. S.), solution of pepsin; liquid pepsin (pepsin. saccharat., gr. cccc; acid. hydrochloric., ♏cx; glycerin., f℥vij; aquæ, f℥xij); excellent preparation of pepsin; dose, f℥ss–f℥ij. **L. pericard'ii**, see *Pericardium.* **L. plum'bi aceta'tis**, liquor plumbi subacetatis. **L. plum'bi diaceta'tis**, liquor plumbi subacetatis. **L. plum'bi subaceta'tis** (Ph. U. S. and Br.), *Solution of subacetate of lead, Goulard's extract, Goulard's extract of lead* (plumb. acet., ℥iv, ℥iiss; plumb. oxid., ℥iij, gr. xxx; aquæ destillat., q. s. to make f℥xx). It is used externally, as a cooling astringent and discutient when diluted with distilled water. **L. plum'bi subaceta'tis dilu'tus** (Ph. U. S. and Br.), *Diluted solution of subacetate of lead, Lead-water, Goulard's lotion, Goulard water, White wash, Royal preventive* (liq. plumbi subacetat., f℥j; aquæ destillat., f℥v). Properties the same as the last, but feebler. **L. potas'sæ** (Ph. U. S. and Br.), *Solution of potash* or of *potassa, Soap lees, Soap ley* (potassii bicarb., ℥iiss; calcis, ℥j; aquæ destill., q. s. to make Oiss). It may also be obtained by dissolving potassa, ℥j, in distilled water, Oj. Internally, it should be given in sweetened water or in mucilaginous material; it is antilithic in cases of uric-acid calculi, diuretic, and antacid, and has been employed in scrofula and certain skin diseases. Externally, stimulant and escharotic; dose, ♏x–xx. **L. potas'sæ arseni'tis**, L. arsenicalis. **L. potas'sæ carbona'tis**, L. potassæ subcarbonatis. **L. potas'sæ citra'tis**, *Liquor potassii citratis* (Ph. U. S.), *Solution of citrate of potassa* or *potassium, Neutral mixture, Saline mixture* (acid. citric., ℥iss; potass. bicarbonat., ℥ij; aquæ, q. s. to make f℥xij). Employed in fever, usually combined with spiritus ætheris nitrosi, etc. **L. potas'sæ efferves'cens**, *Effervescing solution of potash, Potash-water;* filtered solution of bicarbonate of potash in water into which carbonic acid gas is passed (Ph. B.). **L. potas'sæ permangana'tis** (Ph. Br.) (potass. permanganat., gr. lxxxviij; aquæ destillat., Oj); dose, f℥ji–j; see *Potassii permanganas.* **L. potas'sæ subcarbona'tis**, *Oil of tartar, Saline oil of tartar, Solution of subcarbonate of potassium* (potass. subcarb., ℔j; aquæ destillat., f℥ xij); dose, gtt. x–xxx. **L. potas'sii arseni'tis** (Ph. U. S.), L. arsenicalis. **L. potas'sii citra'tis**, L. potassæ citratis. **L. potas'sii io'didi compos'itus**, *Compound solution of iodide of potassium* (potassii iodid., gr. x; iodin., gr. v; aquæ destillat., Oj imp.); dose, f℥j. **L. potas'sii permangana'tis**, see *Potassii permanganas.* **L., prop'agatory**, sperm. **L. prostat'icus**, prostatic liquor; see *Prostate.* **L. pu'ris**, see *Pus.* **L. san'guinis**, *Blood liquor*, a term given to one of the constituents of the blood, the other being the red particles; the *Hæmatoplasma, Plasma* of Schultz, *Lymph, Coagulable* or *Plastic lymph,* the *Mucago* or *Mucilage* of Harvey and others, and the *Intercellular fluid* of Lehmann. It is the effused material from which the cells obtain the constituents of the different tissues and secretions; see *Blood.* **L. of Scar'pa**, vitreous humor of the ear. **L. sem'inis**, *Spermatic liquor;* homogeneous transparent fluid, containing spermatozoids and seminal granules; see *Sperm.* **L. so'dæ** (Ph. U. S. and Br.), *Solution of soda, Solution of caustic soda* (sodii carbonat., ℥v; calcis, ℥iss; aquæ destillat., q. s. to make Oiss); same properties as liquor potassæ. **L. so'dæ arsenia'tis**, see *Arseniate of sodium.* **L. so'dæ carbona'tis**, *Solution of carbonate of sodium* (sodii carbon., ℥iss av.; aquæ destillat., Oj imp.); antacid; dose, one or two tablespoonfuls, diluted with water. **L. so'dæ chlora'tæ** (Ph. U. S. and Br.), L. sodæ chlorinatæ. **L. so'dæ chlo'ridi**, L. sodæ chlorinatæ. **L. so'dæ chlorina'tæ**, liquor sodæ chloratæ (Ph. U. S.), *Labarraque's solution* or *disinfecting liquid, Solution of chlorinated soda* (calcis chlorinat., ℥xx; sodii carbonat., ℥xxv; aquæ, q. s. to make Oxiv); used in same cases as the chloride of lime. Internally, 10 drops to a fluidrachm for a dose. Diluted with water it is an excitant and disinfectant in various external diseases. **L. so'dæ efferves'cens** (Ph. Br.), solution prepared by adding sodium bicarbonate, gr. xxx, to water, Oj; acidulous water, simple. **L. so'dæ oxymuriat'icæ**, L. sodæ chlorinatæ. **L. so'dii arsenia'tis** (Ph. U. S. and Br.) (sodii arseniat., gr. xxiij; aquæ destillat., f℥v); dose, ♏ij–v; see *Arseniate of soda.* **L. so'dii carbol'ici**, solution of sodic carbolate. **L. so'dii ethyla'tis** (Ph. Br.), solution of sodium ethylate (metallic sodium, gr. xxij; ethylic alcohol, f℥j); used as a caustic. **L. so'dii silica'tis** (Ph. U. S.), solution of silicate of sodium, used by surgeons for making immovable dressings. **L., spermat'ic**, semen. **L. strych'niæ** or **strychni'næ hydrochlora'tis** (Ph. Br.) (strychnine, gr. ix; dilute hydrochloric acid, ♏xiv; rectified spirit, f℥ss; distilled water, f℥iss); dose, ♏v–x.; see *Strychniæ murias.* **L. styp'ticus**, L. ferri chloridi. **L. styp'ticus Loofii**, see *Ferri chloridum.* **L. styp'ticus Ruspi'ni**, styptic, Ruspini's. **L. subarachnoidea'lis**, cerebrospinal fluid. **L. sulphu'rico-æthe'reus**, sulphuric ether. **L. sulphu'rico-æthe'reus constrin'gens**, collodion. **L. sulphu'ricus alcoolisa'tus**, spiritus ætheris sulphurici. **L. Swietenis, syphilit'icus Turneri**, or **of Van Swieten**, L. hydrargyri oxymuriatis. **L. tar'tari emet'ici**, L. antimonii tartarizati. **L. vesicans**, cantharidal collodion. **L. of Villate**, astringent escharotic solution employed in caries and fistula (liquid subacetate of lead, crystallized sulphate of copper, sulphate of zinc, and white vinegar). **L. volat'ilis cor'nu cer'vi**, spirit of hartshorn; bone spirit. A solution of subcarbonate of ammonia impregnated with empyreumatic oil. **L. volat'ilis os'sium**, L. volatilis cornu cervi. **L. zin'ci chlo'ridi** (Ph. U. S. and Br.) (zinc, granulated, ℥vj½; nitric acid, ♏c; precipitated carbonate of zinc, gr. cxxxvj; hydrochloric acid, water, āā q. s. to make Oj); a powerful disinfectant, and used to preserve bodies for dissection. **L. zin'ci sulpha'tis cum cam'phorâ**, lotion for ulcers, or, diluted with water, a collyrium.

Liquorice, lik'o-ris. See *Glycyrrhiza* and *Extractum glycyrrhizæ.*

Lirioden'drine. Aromatic bitter from fresh bark of root of Liriodendron tulipifera; considered by some identical with piperine.

Liriodendron (lir-e-o-den'dron) or **Lirioden'drum** (*leirion,* lily, *dendron,* tree). *Tulip* or *Poplar tree, Tulip-bearing* or *American poplar, White wood, Cypress tree* (New England). Bark—*Liriodendron* (Ph. U. S.)—especially of the root of this tree, indigenous in the United States, is a strong aromatic, tonic bitter; active principle separated is *Liriodendrin.* It is employed in dysentery, dyspepsia, and in intermittent fevers.

Lis'franc's amputation. Amputation at tarsometatarsal articulation. See *Amputation.*

Lisianthus, liz-e-an'thus. Shrub of genus Gentianaceæ, species of which have medical properties of gentian; several species are used medicinally.

Lisp'ing. Defective dental speech, the *s* being pronounced like *th.*

Lis'sauer's angles. Angle formed by lines drawn in the median plane of the skull, with fixed base line extending from occipital protuberance to junction of vomer and sphenoid. **L.'s tract,** tract of minute fibres where the lateral and posterior columns of the spinal cord meet.

Lissencephalia, lis-sen-sef-al'e-ah (*lissos,* smooth, *enkephalos*). Condition in higher animals in which the hemispheres of the brain are smooth and the convolutions are not numerous.

Lissenceph'alous (*lissos,* smooth, *enkephalos,* brain). Condition of the cerebrum in which the convolutions are smooth or of small number. Liencephalous.

Lis'terine. Antiseptic solution consisting, it is said, of benzoic acid, boric acid, borax, oil of peppermint, thymol, alcohol, oil of wintergreen and eucalyptol, and water.

Listerism, lis'ter-izm. Antiseptic or aseptic principles of surgery instituted by Sir Joseph Lister. See *Antiseptic.*

Listing's law. Has reference to movement of the eyeball, the movement from position of rest resulting in angle of rotation in second position, being the same as if the eye were rotated around a fixed axis perpendicular to the first and second positions of the line of vision.

Lis'ton's i'singlass plas'ter. Sparadrapum adhæsivum. **L.'s splint,** splint reaching from axilla to four inches beyond the foot, with lower end notched for convenience of application.

Lite, le'te. Plaster made of verdigris, wax, and resin.

Lithæ'mia (*lithos,* stone, *haima,* blood). Gouty or other condition with excess of uric acid or urates in the blood.

Lithagogectasia, lith-a-go-gek-tas'e-ah (*lithagogum, ektasis,* dilatation). Lithectasy.

Lith'agogue (*lithos, ago,* to expel). Remedy supposed to possess the power of expelling calculi.

Lithagogum, lith-a-go'gum. Medicine used for the expulsion of calculus.

Lithanthrakokali, lith-an-thrah-kok'al-e. Anthrakokali.

Lithanthrax, lith-an'thraks (*litho, anthrax,* a coal). Carbo fossilis.

Litharge, lith'arj (*litharguros, litho, arguros,* silver). Plumbi oxidum semivitreum; impure lead oxide. **L. of gold** or **of sil'ver,** see *Plumbi oxidum semivitreum.*

Lithargyri acetum, lith-ar'jer-e as-e'tum. Liquor plumbi subacetatis.

Lithargyr'ium, Lithargyrum (lith-ar'jer-um), or **Lithargyrus,** lith-ar'je-rus. Plumbi oxidum semivitreum.

Lith'ate. Compound of lithic acid with a base. Urate. **L. of so'dium,** urate of sodium.

Lithectasy, lith-ek'ta-se (*lithos, ektasis,* dilatation). Dilatation of the neck of the bladder and membranous urethra for extraction of calculus.

Lithec'tomy (*lithos, ektome,* excision). Lithotomy.

Lith'enate. See *Urate.*

Lithe'nic ac'id. Uric or lithic acid.

Lith'epsy (*lithos, epso,* to boil). Lithodialysis.

Lith'ia. Formation of stone, gravel, or concretions in human body. Lithiasis. Affection in which the eyelids are edged with small, hard, and stone-like concretions. **L. rena'lis,** formation of calculi in the kidney; nephrolithiasis. **L. rena'lis areno'sa,** gravel. **L. vesica'lis,** calculi, vesical. **L. wa'ter, a'ërated,** see *Lithia, carbonate of.*

Lith'iæ carbo'nas. Lithia, carbonate of. **L. ci'tras,** lithiæ citras.

Lithiasis, lith-e'as-is (*lithiasis*). Disease characterized by excessive formation of lithates; lithia. **L. bilia'ris,** biliary calculus. **L. conjuncti'væ,** calcareous concretions in the Meibomian secretion. **L. cys'tica,** calculi, vesical. **L. glan'dulæ lacrima'lis,** lacrymal calculus. **L. nephrit'ica,** gravel; nephrolithiasis. **L. palpebra'lis,** see *Chalazion.* **L. præpu'tii,** formation of preputial calculus. **L. pulmo'num,** formation of concretions in the lungs, occasioning at times lithophthisis, phthisis calculosa. **L., re'nal** or **rena'lis,** see *Calculus* and *Nephrolithiasis.* **L. rena'lis areno'sa,** gravel. **L. vesica'lis,** calculi, vesical.

Lith'iate. Urate.

Lithic, lith'ik. Belonging to lithic or uric acid or to stone; also an antilithic. **L. ac'id,** uric acid. **L. ac'id diath'esis,** lithuria. **L. cal'culi,** see *Calculi, urinary.* **L. diath'esis,** lithuria. **L. sed'iments,** see *Lithuria.*

Lithii ben'zoas (Ph. U. S.). Benzoate of lithium, from decomposition of lithium carbonate with benzoic acid. Antiarthritic. **L. bro'midum,** *Lithium bromide.* Compound possessing the peculiar virtues of the bromides; a valuable hypnotic, exerting a special influence in nervous irritability, such as the neuroses. Dose, gr. x three times a day. **L. carbo'nas,** lithium carbonate. **L. ci'tras,** lithium citrate. **L. sali'cylas,** $2LiC_7H_5O_3,H_2O$, salicylate of lithium; a mixture of eleven parts of salicylic acid and three parts of lithium carbonate in twenty-five parts of water; white odorless powder, used in rheumatism and gout. Dose, gr. xx–xl.

Lithioceno'sis. See *Lithocenosis.*

Lith'ion. See *Lithia.*

Lithio-picrocarmine, lith'e-o-pik-ro-kar'meen. Stain for sections, used in microscopy.

Lith'io-theobro'mine sal'icylate. Made like diuretin, lithium being substituted for sodium; diuretic in cardiac dropsy.

Lithium, lith'e-um. Reddish-white metal, lightest solid known (sp. gr. 0.594), and valued in its combinations. One of the series of metals of the alkalies, like sodium and potassium. See *Lithia.* **L., ben'zoate of,** lithii benzoas. **L. car'bonate,** Li_2CO_3, *Lithia carbonate, Lithii carbonas* (Ph. U. S.), *Lithium carbonicum.* A salt found in certain mineral waters, which has been serviceable in lithuria by its power of dissolving uric acid and the urates; hence it has been suggested separately in that morbid condition. It may be obtained by decomposing chloride of lithium by means of carbonate of ammonium. Dose, gr. v to x. It has also been injected into the bladder in cases of deposition of lithuria and oxaluria. Aërated lithia-water is an artificial preparation consisting of a solution of carbonate of lithium in water containing carbonic acid. **L. carbon'icum,** lithia, carbonate of. **L., cit'rate of,** *Citrate of lithium, Lithii citras* (Ph. U. S.), is made by the action of citric acid on carbonate of lithium. It has been given in gout. Dose, gr. x to gr. xx. **L. dithiosal'icylate,** compound of dithiosalicylic acid and lithium, employed in gout and rheumatism. **L. sal'icylate,** white soluble powder, used in rheumatism in daily doses of a drachm.

Lithiuria, lith-e-u're-ah. Lithuria.

Lithobexis, lith-o-beks'is (*lithos, bex,* cough). Cough with calculous expectoration.

Lithocenope, lith-o-sen'o-pe (*lithos,* stone, *kenoo,* to evacuate). Instrument for extraction of calculus in lithotrity.

Lithocenosis, lith-o-sen-o'sis (*lithos, kenosis,* evacua-

tion). Evacuation of fragments of calculi resulting from lithotrity.

Lithocenot'icus. Pertaining to lithocenosis.

Lithoclast, lith'o-klast (*lithos, klao,* to break). Instrument used in lithotrity; lithotrite.

Lithoclastia (lith-o-klas'te-ah) or **Lith'oclasty.** Lithotrity.

Lithoclysmia, lith-o-kliz'me-ah (*lithos, klusma,* clyster). Litholysis practised by injection of chemical solutions into the bladder.

Lithocystotomy, lith-o-sis-tot'o-me (*lithos, kustis,* bladder, *tome,* incision). Lithotomy.

Lithocysturia, lith-o-sist-u're-ah (*lithos, kustis,* bladder, *ouron,* urine). Irritation or morbid condition of the bladder induced by calculi.

Lithodectasy, lith-o-dek'ta-se (*lithos, hodos,* way, *ektasis,* dilatation). Lithectasy.

Lithodes, lith-o'dees. Lithoid; having calculous infiltration.

Lithodialysis (lith-o-de-al'is-is) or **Lithol'ysis** (*lithos, dialuo,* to dissolve). Dissolving of a stone in the bladder. Breaking up of a calculus into small pieces easy of extraction.

Lithodrassic, lith-o-dras'sik (*lithos, drasso,* to seize). Lithotrity; forceps for seizing the broken calculus.

Lithofel'ic or **Lithofellin'ic.** Relating to biliary calculus. **L. acid,** acid found in intestinal concretions ($C_{20}H_{36}O_4$) from the bile.

Lithofractor, lith-o-frak'tor. Lithotrite.

Lithogenia (lith-o-jen'e-ah) or **Lithog'eny** (*lithos, gennao,* to generate). Formation of calculi.

Lithogenous, lith-oj'en-us. Causing formation of calculus; relating to lithogeny.

Lith'oid or **Lithoid'al** (*lithos, eidos,* resemblance). Resembling stone.

Lithoidosis, lith-oid-o'sis. Lithæmia.

Lithokelyphopædion, lith-o-kel-e-fo-pe'de-on. Lithopædion with adherent fœtal membranes.

Lithokelyphos, lith-o-kel'e-fos. Lithopædion encased by calcified fœtal membranes.

Lithokonion (*lithos, konis,* to break into powder). Instrument for breaking calculi into powder.

Litholabon (lith-ol'ab-on) or **Litholabum,** lith-ol'ab-um. Instrument used in extracting stone from the bladder; lithotomy forceps.

Litholapaxy, lith'o-lap-aks-e (*lapaxis,* evacuation). Removal of calculous fragments in lithotrity by irrigation.

Litholein, lith-o'le-in. Mineral oil containing no fat; antiseptic.

Lithology, lith-ol'o-je (*lithos,* stone, *logos,* treatise). Discourse or description of stone or calculus.

Litholysis, lith-ol'is-is (*lithos, luo,* to dissolve). Lithodialysis.

Litholyte, lith'o-lite. Instrument for conveying solvents of calculi into the bladder.

Litholytic, lith-o-lit'ik. Lithontriptic.

Lithomala'cia (*lithos, malakia,* softness). Softening of a calculus.

Lithometra, lith-o-me'trah (*lithos, metra,* uterus). Osseous or other concretion of the uterus.

Lithonephritis, lith-o-nef-re'tis. Calculous nephritis; stone in the kidney; renal calculus.

Lithonephrotomy, lith-o-nef-rot'o-me (*nephros,* kidney, *tome,* incision). Removal of stone by incision into the kidney.

Lithonlytic, lith-on-lit'ik (*lithos, luo,* to dissolve). Lithontriptic.

Lithonthryptic, lith-on-thrip'tik (*lithos, thrupto,* to break up). Lithontriptic.

Lithontriptic (lith-on-trip'tik), **Lithonthryp'tic, Litholyt'ic,** or **Lithonlyt'ic** (*lithos, thrupto,* to break up). Remedy believed capable of dissolving calculi; antilithic.

Lithopædion, lith-o-pe'de-on (*lithos, pais,* child). Fœtus; petrified fœtus retained in the uterus or abdominal cavity.

Lithoph'agus (*lithos, phago,* to eat). A stone-eater.

Lith'ophone (*lithos, phone,* sound). Instrument with which to determine the presence of a stone in the bladder by its striking against it.

Lithophthisis, lith-o-te'sis. See *Calculi, pulmonary,* and *Lithiasis pulmonum.*

Lithoplatomy, lith-o-plat'o-me (*lithos, platus,* wide). Operation of dilating the urethra for extraction of stone.

Lithoplaxy, lith'o-plaks-e (*lithos, plasso,* to strike). Lithotrity.

Lithop'riny or **Lithoprisy,** lith-op'ris-e (*lithos, prio,* to saw). Operation of sawing a calculus, the saw being called a lithoprion. Lithotrity.

Lith'os (*lithos*). Calculus.

Lithoscope, lith'o-skope. Instrument for detection and examination of calculus.

Lithospermum, lith-o-spur'mum (*lithospermon, litho, sperma,* seed). Genus of Borragineæ. Seeds are stimulant diuretic. **L. officinal'e,** *Gray millet, Bastard alkanet, Littlewale,* ord. Borragineæ. Its seeds were formerly supposed, from their stony hardness (*sperma*), to be efficacious in calculous affections. They have also been considered diuretic. **L. villo'sum,** Anchusa tinctoria.

Lithotecnion, lith-o-tek'ne-on (*lithos, teknon,* child). Lithopædion.

Lithoterethrum (lith-o-ter-e'thrum), **Lithotere'tron,** or **Lithothere'thron** (*lithos, tero,* to rub). Lithotrite.

Lithothlibia, lith-o-thlib'e-ah (*lithos, thlibo,* to crush). Crushing of a friable calculus between a finger passed by the rectum or vagina as far as the *bas-fond* of the bladder and a catheter introduced into the bladder.

Lithothrypsis, lith-o-thrip'sis (*lithos, thrupto,* to break in pieces). Lithotrity.

Lithothryptor, lith-o-thrip'tor. See *Lithotrite.*

Lithotome, lith'o-tome (*lithos, tome,* an incision). Lithotomus. This name has been given to a number of instruments of different shapes and sizes which are used in the operation for the stone, to cut the neck or body of the bladder. They ought with more propriety to be called *Cystotomes.* The *Lithotome caché* of Frère Côme is the most known, and is still occasionally used. It is composed of a handle and a flattened sheath, slightly curved; in this there is a cutting blade which can be forced out by pressing upon a *bascule* or lever to any extent that may be wished by the operator. A *Double lithotome* was used by Dupuytren in his bilateral operation. See *Lithotomy.*

Lithotomia, lith-o-tom'e-ah. Lithotomy. **L. su'pra pu'bem,** the high operation of lithotomy.

Lithotomist, lith-ot'o-mist. One who practises lithotomy or makes a specialty of such operations.

Lithot'omus. Lithotome.

Lithotomy, lith-ot'o-me. *Lithocystotomy.* Operation by incision by which a stone is extracted from the bladder. The methods of operation are reducible to five principal, each of which has experienced numerous modifications:

1. The *Method of Celsus, Methodus Celsiana, Cystotomia cum apparatu parvo, Apparatus minor, Cutting on the gripe.* This consisted in cutting upon the stone after having made it project at the perineum by means of the fingers introduced into the rectum. The method was attended with difficulty of dividing the parts neatly, injury to the bladder, as well as the occasional impossibility of drawing down the stone. It is sometimes called Methodus Guytoniana, from Guy de Chauliac having endeavored to remove from it the discredit into which it had fallen in his time. It was termed apparatus minor from the small number of instruments required in it.

2. *Apparatus major;* invented in 1520 by John de Romani, a surgeon of Cremona, and communicated by him to Mariano Santo di Barletta, whence it was long called *Mariano's method, Sectio Mariana.* It was called also *Cystotomia* or *Methodus cum apparatu magno,* from the number of instruments required in it. An incision was made on the median line, but the neck of the bladder was not comprehended in it; it was merely dilated. The greater apparatus was liable to many inconveniences, as ecchymosis, contusion, inflammation of the neck of the bladder, abscesses, fistulæ, etc. A modification of this method, by Mr. George Allarton of England, has

been called the *Median* or *Allarton's operation*. It consists in dividing the perineum and the membranous portion of the urethra, passing a probe down to the staff and into the bladder as a guide for the finger through the prostatic portion of the urethra into the bladder, thus dilating the passage so as to allow of the introduction of the forceps.

3. The high or suprapubic operation, hypogastric cystotomy, suprapubic lithotomy, laparocystotomy, epicystotomy, was first practised by Peter Franco in the sixteenth century. It consisted in pushing the stone above the pubis by the fingers introduced into the rectum. Rousset afterward proposed to make the bladder rise above the pubis by injecting it. The method had fallen into discredit when Frère Côme revived it. It is used when the calculus is very large. It was practised by opening first the membranous part of the urethra upon the catheter passed into the canal. Through this incision a catheter having a spear-pointed stilet was introduced into the bladder. An incision was then made into the linea alba, above the symphysis pubis, of about four or five fingers' breadth, and the peritoneum detached to avoid wounding it. The stilet was pushed through the bladder, and used as a director for the knife, with which the bladder was divided anteriorly as far as the neck, and the stone extracted.

4. The lateral operation, hypocysteotomy, lateral cystotomy, cystauchenotomy, cystotrachelotomy, urethrocystauchenotomy, urethrocysteotrachelotomy, lateral section or apparatus, so named from the prostate gland and neck of the bladder being cut laterally, was probably invented by Peter Franco. It was introduced into France by Frère Jacques de Beaulieu. In England it received its earliest and most important improvements from the celebrated Cheselden. It is the method practised at the present day, according to different modes of procedure. In this method the patient is placed upon a table; his legs and thighs are bent and separated, the hands being tied to the feet. The perineum is then shaved, and a staff introduced into the bladder, the handle being turned toward the right groin of the patient. An oblique incision is now made from the raphe to the middle of a line drawn from the anus to the tuberosity of the ischium of the left side, and, taking the staff for a guide, the integuments, areolar tissue of the perineum, membranous portion of the urethra, transversus perinæi muscle, bulbo-cavernosus, some fibres of the levator ani, the prostate and neck of the bladder are successively divided. For this latter part of the operation the knife, the beaked bistoury, bistouri or lithotome caché, cutting gorget, etc., is used according to the particular preference. The forceps are now introduced into the bladder, and the stone extracted. In the operation care must be taken not to injure the rectum or the great arterial vessels distributed to the perineum.

The method of *Urethro-cysteo-aneurysmatotomy* consists in dividing the prostate in part only, the enlargement of the wound being effected by a peculiar dilator.

The *Bilateral operation* is founded on that of Celsus. It consists in making an incision posterior to the bulb of the urethra and anterior to the anus, involving both sides of the perineum by crossing the raphe at right angles; an incision is then made through the membranous part of the urethra, and the prostate may be cut bilaterally.

Buchanan's operation. Dr. Buchanan of Glasgow suggested the use of a rectangular staff, the angle being placed about three inches from the point, the portion beyond the angle being deeply grooved at the side. When introduced, the angle of the staff is made to correspond to the apex of the prostate. The surgeon, introducing his finger into the rectum, inserts a bistoury in front of the anus with the blade horizontal and its edge turning to the left, pushing it straight into and along the groove to the stop at its extremity. While slowly withdrawing the bistoury he makes a curved incision through the soft parts, about an inch and a half long, round the upper and left side of the rectum.

The *Quadrilateral operation*, proposed by Vidal de Cassis, was a modification of the bilateral operation, to be employed when the calculus was unusually large, but it was quadrilateral only so far as the number of prostatic incisions was concerned, the external incision being bilateral.

5. *Lithotomy by the rectum, Recto-vesical lithotomy, Proctocystotomy, Recto-vesical section, Rectal cystotomy,* was proposed by Vegetius in the 16th century, but it was never noticed until M. Sanson, in the year 1817, attracted attention to it. It consists in penetrating the bladder through the paries corresponding with the rectum by first cutting the sphincter ani and rectum about the root of the penis, and penetrating the bladder by the neck of that organ, dividing the prostate, or by its *bas-fond.*

Lithotomy *in women*, from the shortness of the urethra, is a comparatively insignificant operation. The majority of such calculi can be readily removed by urethral dilatation and extension, or by lithotrity. *Urethral lithotomy* is objectionable on account of the frequency of incontinence of urine as a result. *Vaginal* or *vesico-vaginal lithotomy* is sometimes demanded, the stone being removed by an incision into the bladder through the vaginal septum, which is afterward closed by stitches. An operation now abandoned, practised by Celsus and revived by Lisfranc, was called the *Vestibular operation*, because the incision was made across the centre of the vestibular space.

Lithot'omy, Al'larton's. See *Lithotomy.* **L., bilat'eral,** see *Lithotomy.* **L., Buchan'an's,** see *Lithotomy.* **L., Cel'sian** or **of Cel'sus,** see *Lithotomy.* **L. Civiale's,** incision is made in the middle line of the perineum. **L., Dupuytren's,** a form of bilateral operation, with the incision made in front of the anus. **L., hypogas'tric,** suprapubic cystotomy. **L., lat'eral,** lateral cystotomy. **L., marian, me'dian,** or **prerec'tal,** see *Lithotomy* (apparatus major). **L., perine'al,** cystotomy, perineal. **L., quadrilat'eral,** see *Lithotomy* (lateral operation). **L., rec'tal,** see *Lithotomy* (by the rectum). **L., rec'to-perine'al** or **rec'to-ves'ical,** see *Lithotomy* (by the rectum). **L. by the rec'tum,** see *Lithotomy.* **L., re'nal,** nephrolithotomy. **L., suprapu'bic,** suprapubic cystotomy; see *Lithotomy* (the high or suprapubic operation). **L., ure'thral,** see *Lithotomy* (in women). **L. by the vagi'na** or **vagi'nal,** see *Lithotomy* (in women). **L., ves'ico-vagi'nal,** see *Lithotomy* (in women). **L., vestib'ular,** see *Lithotomy.*

Lithotony, lith-ot'o-ne (*lithos, teino,* to stretch). Puncture of the bladder above the pubes and formation of a fistula through which the calculus is extracted.

Lithotresis, lith-o-tra'sis (*lithos, tresis,* perforation). Lithotrity; perforating a vesical calculus.

Lithotripsis (lith-o-trip'sis) or **Lithotripsy,** lith'o-trip-se (*lithos, tribo,* to rub down). Lithotrity. Diminishing the size of a calculus with a lithotriptor.

Lithotriptic, lith-o-trip'tik. Remedies preventing formation of calculi.

Lithotrip'tor. Instrument for breaking calculi into fragments sufficiently small to be voided through the urethra.

Lithotrite. See *Lithotrity.*

Lithotrit'ia. Lithotrity.

Lithotritor, lith-ot're-tor. Lithotriptor; lithotrite.

Lithot'rity or **Lithot'riture.** *Lithotrypsy, Lithotripsy, Lithothripsy.* Operation of comminution of calculus with a lithoclast.

Lithotrypetæ, lith-o-tre-pa'te. See *Lithotrity.*

Lithotrypter'ion or **Lithotrypter'ium.** Small lithotrite.

Lithotryptor, lith-o-trip'tor (*lithos, tripter,* a rubber). Lithotrite.

Lithoxiduria, lith-oks-id-u're-ah (*lithos, oxide, ouron,* urine). Discharge of urine containing lithic or xanthic oxide.

Lithuresis, lith-u-re'sis (*lithos, ouresis,* making water). Passing small calculi with the urine.

Lithuria, lith-u're-ah (*lithos*, *urine*). *Lithic* or *Lithic-acid diathesis*. Condition of the system in which deposits of lithic acid and lithates take place in the urine. Lithæmia. See *Urine*.

Lithurorrhœ'a (*lithos*, *ouron*, urine, *rheo*, to flow). Diabetes with calculous urine.

Lithus, lith'us. Calculus.

Lit'mus. Lichen roccella. **L. paper**, see *Lichen roccella*.

Litra, le'trah. Litre; pound.

Litre, le'ter. Measure equivalent to 61.028 English cubic inches.

Litsæa cubeba, lit-se'ah cu-beb'ah. Piper cubeba. **L. monopetal'ah**, mild astringent bark of this E. Indian tree is used in diarrhœa and indigestion. **L. piperi'ta**, Piper cubeba. **L. Zeylan'ica**, Ceylonese species, bark of which is stimulant, emmenagogue, and vermifuge.

Lit'ter. Arrangement for transportation of the sick or wounded.

Little's disease. Muscular rigidity, of congenital type.

Lit'tlewale. Lithospermum officinale.

Lit'toral (*litus*, the sea-shore). Living on the sea-shore.

Littré, glands of. See *Urethra*. **L.'s her'nia**, strangulation of the bowel by adventitious bands or enteric diverticula; diverticular hernia. **L.'s opera'tion**, colotomy in the inguinal region.

Li'tus (*linio*, *litum*, to anoint). Liniment.

Livedo, liv-a'do. Cutaneous blueness due to cold (L. calor'ica) and mechanical causes (L. mechan'ica).

Liv'er. Largest gland in the body. An azygous, unsymmetrical, and very heavy organ, occupying the whole of the right hypochondrium and part of the epigastrium. Weighs about 50 ounces. *Above*, it corresponds to the diaphragm; *below*, to the stomach, transverse colon, and right kidney; *behind*, to the vertebral column, aorta, and vena cava; and *before*, to the base of the chest. Its upper surface is convex; the lower, irregularly convex and concave. It possesses five lobes: right lobe, left lobe, lobus quadratus, lobus caudatus, and lobus Spigelii; five ligaments: longitudinal, lateral, right and left, coronary, and round; five fissures, the longitudinal, lodging in the fœtus, the ductus venosus, and umbilical vein; in the adult called the round ligament; fissure of ductus venosus or back part of longitudinal; transverse or portal fissure, which receives sinus of vena porta and the hepatic artery, hepatic duct, hepatic nerves, and lymphatics; fissure for gall-bladder and fissure for vena cava. See *Falx*. The blood-vessels of the liver are very numerous. The hepatic artery and vena porta furnish it with the blood necessary for its nutrition and the secretion of bile. The hepatic veins convey away the blood which has served those purposes. The lymphatic vessels are very numerous. The nerves are also numerous, and proceed from the pneumogastric, diaphragmatic, and the hepatic plexuses.

The following are estimates of dimensions and weights of the liver and its component parts:

Weight,	1617 g. (Blosfeld)–1981 g. (Dursy).
Average volume,	1692 cm. (Krause).
Length,	320 mm.
Breadth (from obtuse to sharp margin),	190–210.
Greatest thickness (nearer obtuse margin),	65–75.
Incisura interlobularis,	40 deep.
Porta hepatis,	50 long.
Venæ intralobulares,	0.027–0.07 (Krause).
" interlobulares,	0.018–0.036.
Lobules,	1.1–2.3 long, 0.8–1.5 broad.
Liver cells,	0.022 long, 0.8–0.017 broad.
Interlobular cystic ducts,	0.035–0.064 diameter.
Ligamentum teres,	9 broad, 6 thick.
" ductus venosi,	about 3 broad, 30–40 long.
Ductus hepaticus, 25 long	(Luschka), 4.5–5.6 thick }
" cysticus, 35 "	" 2.3 wide } (Krause).
" choledochus, 68 "	(Krause), 5.6–7.5 wide }

The intimate structure of the liver consists of a number of lobules—*hepatic lobules*—composed of *intralobular* or *hepatic* veins which convey the blood back that has been inservient to the secretion of bile. The *interlobular* plexus of veins is formed by branches of the vena porta, which contain both the blood of the vena porta and the hepatic artery, both of which are considered to furnish the pabulum for the biliary secretion. The biliary ducts form an *interlobular plexus*, having an arrangement similar to the interlobular veins. The general opinion is that the blood of the vena porta furnishes the bile, whilst the hepatic artery affords blood for the nutrition of the liver. Besides bile, the liver forms sugar and urea and assimilates glycogen.

The liver is liable to a number of diseases. The principal are *hepatitis* or *inflammation*, *cancer*, *atrophy*, *biliary calculi*, *encysted* and other *tumors* or *tubercles*, *hydatids*, etc.

The word Liver is applied to several substances having a brownish color analogous to that of the liver, and composed of sulphur and some other body. See *Potassii sulphuretum*, *Liver of sulphur*. *L. of antimony* is the semivitreous sulphuret.

Liv'er, acces'sory. Extra or accessory part of liver attached to its left extremity by a fold of peritoneum. **L., albu'minous**, *Amyloid*, *Lardaceous*, *Scrofulous*, or *Waxy liver*; altered nutrition of the liver, in which its substance is transformed so as to deserve those epithets. **L., am'yloid**, L., albuminous. **L., ap'oplexy of**, extravasation of blood in the hepatic tissue or beneath its capsule; hemorrhagic infarct. **L., at'rophy of**, condition dependent on chronic interstitial hepatitis. **L., at'rophy of, acute** or **yellow**, hepatitis, diffused. **L., ba'cony**, L., albuminous. **L., car'diac**, chronic congestion of the liver, accompanied with pulsation, associated with disease of the right side of the heart. **L., cirrho'sis of**, L., atrophy of (nutmeg liver); see *L., nutmeg*. **L., col'loid**, L., amyloid. **L. disease**, any morbid condition of the liver. **L., drunk'ard's**, L., cirrhotic, from abuse of alcohol; L., nutmeg; condition in which there are fatty deposits and degeneration of the liver-cells. **L., fat'ty**, adiposis hepatica. **L., fat'ty degenera'tion of**, adiposis hepatica. **L., float'ing**, unnaturally movable liver, due to a relaxed condition of the hepatic ligaments. **L., gin** or **gin-drink'er's**, L., nutmeg. **L., gran'ulated** or **gran'ular**, cirrhosis of the liver. **L., hob'nail**, cirrhosis of the liver. **L., hyper'trophy of**, **L., larda'ceous**, L., albuminous. **L., left**, spleen. **L., mam'millated**, cirrhosis of the liver. **L., mov'able**, L., floating. **L., nut'meg**, appearance of the liver when cut across, resembling that of the section of a nutmeg; supposed by some to be the result of intemperance in the use of alcoholic drinks, but occurring under other causes. The terms *Whiskey liver*, *Gin-drinker's liver*, occasionally applied to it, are consequently not distinctive. *Pigment liver*, as it sometimes appears in those who die from the effects of malarious fevers, is of a steel-gray or blackish or, not unfrequently, chocolate color—a condition produced by an accumulation of pigment matter in the vascular apparatus of the gland. **L., pig'ment**, see *Liver, nutmeg*. **L., scrof'ulous**, L., albuminous. **L., si'lex**, form of hard and elastic syphilitic liver in the child. **L., soft'ening of, acute**, hepatitis, diffused. **L. spot**, chloasma. **L. starch**, glycogenic matter. **L. su'gar**, see *Saccharum*. **L., tuber'culated**, cirrhosis of the liver. **L., tu'beriform**, L., nutmeg. **L., wan'dering**, L., floating. **L., wast'ing of, acute**, hepatitis, diffused. **L., wax'y**, L., albuminous. **L., whis'key**, L., nutmeg; interstitial hepatitis.

Liv'ergrown. Having a large liver.

Liv'erweed. Hepatica triloba.

Liv'erwort. Hepatica triloba, Marchantia polymorpha. **L., ground, ash-colored**, Lichen caninus. **L., Iceland**, Lichen Islandicus. **L., noble**, Hepatica triloba.

Liv'id. Discoloration dependent upon passive or active hyperæmia.

Livid'ity. State of being livid. *Cadaveric lividity* occurs in blueness of the surface a few hours after death, from subsidence and accumulation of the blood in dependent portions of the body.

Lividus musculus, liv'id-us mus'ku-lus. Pectinalis.

Liv'or. Blue or livid spot; suggillation. **L. emortua'lis** or **mor'tis**, discoloration on the surface of a corpse preceding the approach of decomposition; see *Suggillation*. **L. sanguin'eus**, see *Ecchymoma*.

Lix. Lye obtained from wood-ashes.

Lixivii (liks-iv'e-e) (*lix*, ashes) **ace'tas.** Potassii acetas. **L. tartariza'ta**, potassii tartras. **L. vitriola'ta**, potassii sulphas. **L. vitriola'ta sulphu'rea**, potassii sulphas cum sulphure.

Lixivial, liks-iv'e-al. Term for salts obtained by washing vegetable ashes, as the fixed alkalies.

Lixiviation, liks-iv-e-a'shun. The operation of washing wood-ashes with water to dissolve the soluble parts. The filtered liquor is the lye. Percolation.

Lixivium, liks-iv'e-um. Product of lixiviation; lye; any solution containing potassa or soda. In domestic practice a lye is made from wood-ashes and mixed with the ordinary basis of a poultice, to form a *lye cataplasm* or *poultice*, which is applied to whitlow and similar local inflammations. **L. ace'ticum**, potassii acetas. **L. ammoniaca'le**, liquor ammoniæ. **L. ammoniaca'le anisa'tum**, liquor ammonii anisatus. **L. ammoniaca'le aromat'icum**, spiritus ammoniæ aromaticus. **L. ammoniaca'le caus'ticum**, liquor ammoniæ. **L. caus'ticum**, liquor potassæ. **L. ka'li-vegetab'ilis**, watery solution of potassium carbonate. **L. magistra'le**, liquor potassæ. **L. sapona'rium**, liquor potassæ; caustic lye. **L. tar'tari**, liquor potassæ subcarbonatis. **L. vitriola'tum**, potassium sulphate.

Lixivus cinis, liks-e'vus sin'is. Lye ash. Potash of commerce.

Load'ed. Coated or furred, as the tongue. Also applied to the bowels when full of undigested food or accumulated fæces.

Load'stone. Magnet.

Loathing, lo'thing. Disgust.

Lo'bar. Relating to a lobe or lobes.

Lobaria Islandica, lo-bar'e-ah is-land'e-kah. Lichen islandicus. **L. pulmona'ria**, Lichen pulmonarius. **L. saxat'ilis**, Lichen saxatilis.

Lo'bate. Possessing lobes.

Lobated, lo'ba-ted. Divided into lobes.

Lobe. Round, projecting part of an organ, as of the liver, lung, or brain. **L., amyg'daloid**, amygdaloid tubercle of the brain. **L., an'nular**, operculum. **L., anon'ymous**, lobus quadratus of the liver. **L., ante'rior**, frontal lobe of the brain; lobus quadratus. **L., biven'tral**, wedge-shaped lobe of the cerebellum, situate behind the amygdala. **L., cau'date**, lobus caudatus. **L., cen'tral**, superior vermiform process of cerebellum. **L. of cerebel'lum**, lobus cerebelli. **L. of cer'ebrum**, these include the anterior, posterior, and middle lobes of the brain, and the hemispheres. **L. of cor'pus callo'sum**, gyrus fornicatus. **L., cu'neiform**, L., biventral; cuneus. **L., digas'tric**, L., biventral. **L., duode'nal**, lobus Spigelii; L. caudatus. **L. of the ear**, soft, rounded prominence terminating the circumference of the pavilion inferiorly, and pierced in those who wear earrings. **L., fal'ciform**, lobe of the cerebrum, including fornix, dentate convolution, etc. **L., fron'tal**, portion of hemisphere of cerebrum in front of central and Sylvian fissures. **L., fu'siform**, gyrus, subcollateral. **L., hepat'ic**, L. of the liver. **L., hidden**, insula of Reil. **L., infe'rior**, L., biventral. **L., interme'diate**, insula. **L. of the kid'ney**, pyramids of Malpighi. **L., lim'bic**, lobe formed by the gyrus fornicatus and anterior part of gyrus uncinatus. **L., lin'gual**, subcalcarine gyrus. **L. of the liver**, see *Liver*. **L. of the lung**, divisions of the lung containing minute terminal branches of bronchial tubes and pulmonary blood-vessels. **L., me'dian**, upper and lateral portion of cerebral hemisphere; vermiform process of cerebellum. **L. of medul'la oblonga'ta**, amygdalæ; L. of pneumogastric nerve, flocculus. **L., occip'ital**, lobe continuous with the parietal and temporal lobes. **L., olfac'tory**, gray matter in each hemisphere of the cerebrum terminating in the olfactory bulb. **L., op'tic**, corpora quadrigemina. **L., or'bital**, portion of cerebrum above the orbit. **L., pancreat'ic**, lobus caudatus; lobe, median. **L., pneumogas'tric**, flocculus. **L., quad'rate**, large lobe on superior part of the cerebellum, divided into anterior and posterior crescentic lobes; lobus quadratus of liver. **L., Spige'lian**, lobus Spigelii. **L., spi'nal**, flocculus. **L., square**, L., quadrate. **L., subpedunc'ular**, flocculus. **L., supe'rior**, L., temporo-sphenoidal; L., quadrate, of cerebellum. **L., tem'poro-sphenoid'al**, part of cerebrum having posterior part of fissure of Sylvius in front and above it, and the occipital lobe behind it.

Lobelac'rin. Acrid material from lobelia.

Lobelia, lo-be'le-ah. L. inflata. **L., blue**, L. syphilitica. **L. cardina'lis**, *Cardinal plant, Cardinal flower, Scarlet lobelia*, ord. Lobeliaceæ. Indigenous. Has beautiful carmine flowers; antisyphilitic and anthelmintic. **L. coccin'ea**, L. cardinalis. **L. Delissia'na**, Mexican species, used in nervous and pulmonary diseases. **L. infla'ta**, *Indian* or *Wild tobacco, Puke weed, Asthma weed, Eyebright, Emetic weed*. Lobelia (Ph. U. S. and Br.) is the leaves and tops of Lobelia inflata. It is emetic, and in smaller doses sedative, and a pectoral in croup, asthma, etc.; sudorific, cathartic, and an acro-narcotic poison. Twenty grains act as an emetic. The active principle is *lobelin*, and an acrid extractive known as lobelacrin has been separated. Lobeline is a yellowish syrupy liquid; its sulphate is a yellowish-white powder, and used, internally or subcutaneously, in dyspnœa and asthma. **L., pale-spiked**, L. spicata. **L. pinifo'lia**, S. African plant; root is excitant and diaphoretic, and sometimes used in Cape Colony as a domestic remedy in cutaneous affections, chronic rheumatism, and gout. **L., scar'let**, L. cardinalis. **L. spica'ta**, *Pale-spiked lobelia;* indigenous; is diuretic. **L. syphilit'ica**, *Blue lobelia, Blue cardinal flower*. Root is an emetic and a drastic cathartic. Has been used in syphilis.

Lobelianin, lo-be-le-an'in. Volatile principle obtained from lobelia.

Lobe'lic acid. Yellow acid from Lobelia inflata.

Lobelin (lo-be'lin) or **Lobeline**, lo-be'leen. See *Lobelia*.

Lobes, cer'ebral. See *Lobe*. **L. of the liv'er**, see *Lobule*. **L., op'tic**, quadrigemina tubercula.

Lobi, lo'be (*lobus*). See *Lobus*. **L. he'patis**, lobes of the liver. **L. medulla'res**, see *Papillæ of the kidney*. **L. pulmo'num**, see *Lung*.

Loblolly, lob-lol'le. See *Avena*. **L. boy** (water-gruel boy), attendant and aid to a ship's surgeon.

Lobopneumo'nia. Lobar pneumonia.

Lobular, lob'u-lar. Relating to a lobule or lobules, as lobular pneumonia, pneumonia anatomically characterized by nuclei of red or gray hepatization disseminated in variable numbers in one or both lungs. **L. bil'iary plex'us**, plexus of lobular hepatic ducts derived chiefly from the interlobular; this plexus forms the principal part of the substance of the lobule. **L. ve'nous plex'us**, the plexus between the interlobular portal veins and intralobular hepatic vein.

Lobula'ria marit'ima. Small shrub of S. Europe; seeds are used in urinary diseases, scurvy, etc.

Lob'ulate or **Lob'ulated.** In small lobes.

Lobula'tion. Condition of being arranged in lobules. **L. of the kid'ney**, division of the kidney into lobules, as in the fœtus.

Lob'ule (dim. of **Lobus**). Small lobe; convolution, as of the brain; acinus. **L. of cor'pus stria'tum**, insula cerebri. **L., cu'neate**, cuneus. **L. of the ear**, lobe of the ear. **L. of the fis'sure of Syl'vius**, insula cerebri. **L., fron'tal**, lobe, frontal. **L., fu'siform**, subcollateral gyrus. **L., hepat'ic**, see *Liver*. **L. of hippocam'pus**, uncinate gyrus. **L. of kid'ney**, pyramid of Malpighi. **L., lin'gual**, subcalcarine gyrus. **L. of the liv'er**, see *Liver*. **L. of the lung**, see *Lung*. **L., occip'ital**, cuneus. **L., or'bital**, corpora quadrigemina. **L., o'val**, paracentral gyrus. **L., pari'eto-occip'ital**, cuneus. **L., pneumogas'tric**, flocculus. **L., pul'monary**, L. of lung. **L., spermat'ic**, lobules of the testes. **L., sphenoid'al** or **tem'poral**, temporosphenoidal lobe. **L., trian'gular**, cuneus.

Lobuli, lob'u-le. See *Lobe, Lobule, Lobulus, Lobus*. **L. pulmona'les**, see *Lung*. **L. tes'tis**, see *Testicle*.

Lobuliza'tion. Lobulation.

Lob'ulous. Lobular.

Lobulus, lob'u-lus. Lobule. **L. accesso'rius ante'rior quadra'tus,** L. anonymus. **L. anon'ymus,** lobule in the liver between the passage for the round ligament and the gall-bladder, and less prominent but broader than the lobulus caudatus. From the lobulus anonymus a bridge runs across the passage for the round ligament called pons or isthmus hepatis. **L. auric'ulæ,** lobe of the ear. **L. cauda'tus** (*cauda,* tail), root or an angle of the lobulus Spigelii, advancing toward the middle of lower side of great lobe, and representing a kind of tail. Also termination of the helix and anthelix of the ear, which is separated from the concha by an extensive fissure. **L. centra'lis,** small lobule or prominence of the superior vermiform process of cerebellum, situated in the incisura anterior. **L. cerebel'li,** biventral lobe. **L. c. central'is,** superior vermiform process; see also *Flocculus* and *Cuneus.* **L. cer'ebri,** see *Cuneus, Subcollateral gyrus, Subcalcarine gyrus, Paracentral lobule, Præcuneus,* etc. **L. cor'poris striat'i,** insula. **L. cuneat'us,** cuneus. **L. fornicat'us,** gyrus fornicatus. **L. fusifor'mis,** subcollateral gyrus. **L. infe'rior,** see *Prostate.* **L. lingual'is,** subcalcarine gyrus. **L. marginal'is,** marginal gyrus. **L. me'dius,** see *Prostate.* **L. na'si,** see *Nasus.* **L. patholog'icus,** see *Prostate.* **L. pneumogas'tricus,** flocculus. **L. poste'rior,** L. Spigelii. **L. posti'cus papilla'tus,** L. Spigelii. **L. quadra'tus,** L. anonymus; quadrate lobe of cerebellum; præcuneus. **L. re'num,** Ferrein, pyramid of. **L.** or **Lo'bus Spige'lii,** situate near the spine, upon the left side of the great lobe of the liver, and of a pyramidal shape, projecting, like a nipple, between the cardia and vena cava at the small curvature of the stomach. **L. va'gi,** flocculus.

Lo'bus. Lobe. See *Lobulus.* **L. anon'ymus,** lobulus anonymus. **L. cauda'tus,** lobus caudatus. **L. central'is,** insula. **L. fornicat'us,** gyrus fornicatus. **L. fronta'lis, lim'bicus, lingual'is, quadrat'us,** etc., see *Lobus frontalis, Limbicus,* etc. **L. quadrangular'is,** see *Cerebellum.* **L. semilunar'is,** see *Cerebellum.* **L. supe'rior,** see *Cerebellum.*

Lo'cal (*locus,* a place). Topical; belonging to a place. Affections are called local—*Morbi locales*—when confined to a part without implicating the general system. A local application is one used externally.

Localization, lo-kal-i-za'shun. Designation of a particular part as the centre of certain physiological functions, or of pathological interest as the location of morbid processes. Concentration of such actions in a specified locality. **L., cer'ebral,** general disease exhibiting itself in brain symptoms; usually, however, applied to localization of cerebral disease, recent investigations having shown that certain parts of the brain have special physiological functions and are the centres of definite morbid processes, as in the following table (after Doubleday and Nagel):

Locality.	Cerebral Localization, Lesions, and Functions.
Upper third of the central convolutions.	The middle third of the central convolutions contains the centres for the movements of the arm of the opposite side. The upper part of the lower third of the central convolutions contains the centre for the muscles of one-half of the face, and the lower part contains the centre of the muscles of the lips and tongue.
Frontal convolutions.	These do not contain any motor-centres in their upper two-thirds The lowest frontal convolution on the left side contains the centre of speech.
Parietal convolutions.	Have no motor-centres, but are said to contain the centres of the cutaneous and muscular sensations.
Occipital convolutions.	These (especially the cuneus) contain the cortical centre for visual sensations, a lesion here producing hemiopia (only one-half of the field of vision being perceived), and occasionally a loss of visual memory.
Temporal convolutions.	These (especially the uppermost) contain the centre of hearing of the opposite side. The anterior part of the lobe contains the centre of smell.
Centrum ovale.	Contains the fibres of the various cortical centres; consequently injury may cause analogous symptoms, as an injury of the cortical portions: hemianopia, word-deafness, aphasia, and monoplegia.
Central ganglia.	These (caudate nucleus, lenticular nucleus, and thalamus opticus), when injured, produce temporary hemiplegia or hemianæsthesia. The posterior portion of the thalamus also contains the centre for part of the optic nerve.
Internal capsule.	Contains in its posterior limb the pyramidal tract, and injury produces complete hemiplegia on the opposite side of the body. The posterior extremity of the internal capsule contains the sensory tract, and injury produces hemianæsthesia, and sometimes loss of the special senses.
Corpora quadrigemina, Crura cerebri.	The anterior pair contain the fibres of the optic nerve, and injury to both causes total blindness. These contain the pyramidal tracts, sensory fibres, and nucleus of the third nerve.
Pons Varolii.	Contains the motor-fibres of the opposite side of the face, arm, and leg, and the nuclei of the fifth, the sixth, and the third nerve of the same side.
Medulla oblongata.	Contains the cardiac and respiratory centres, the nuclei of the hypoglossal, spinal accessory, and glosso-pharyngeal nerves, and the motor fibres for the opposite side of the body.
Cerebellum.	Affection of the cerebellum produces uncertainty of gait (ataxia) and a marked vertigo.
Crura ad pontem.	Affection of the crura ad pontem produces forced positions and forced movements.

(For localization in the spinal cord, see *Spinal.*)

A guide to the position of a lesion, so far as it is indicated by the electrical reactions, is offered in the following table (Steavenson and Jones):

Localization of Lesions from the Electrical Reactions.

A. Normal.	1. Healthy (shamming).		Cortex.
	2. Functional disturbance of		Corpus striatum.
			Peduncles.
			Pons.
			Lateral columns.
	3. Organic.		Peripheral nerves (very slight disease).
			Muscles.
B. Abnormal.	Quantitative alterations.	Augmented irritability.	Irritative process in: Brain.
			Irritative process in: Lateral column.
			Hyper-excitability in: Cornua.
			Hyper-excitability in: Nerve-muscle.
		Diminished irritability.	Alterations in nerve-muscle of spinal origin.
			Alterations in nerve-muscle of idiopathic origin.
			Alterations in nerve-muscle of post-regenerative origin.
	Quantitative and Qualitative.	Complete reaction of degeneration.	Destruction of anterior horn.
			Disease of multipolar cells.
			" trophic centres of nerve-muscle.
			Severe lesion of nerve-trunk.
		Partial reaction of degeneration.	Slight disease of multipolar cells.
			Disease of trophic centres of muscle.
			Slight disease of nerve-trunk.

Loch. Looch.

Loch'ades. Sclerotica.

Lochadi'tis. Sclerotitis.

Lochia, lok-e'ah (Vulg. lok'e-ah) (*lochos,* a woman in childbed). The cleansings. Serosanguineous discharge following delivery. During the first two or three days it is bloody, but afterward becomes green-colored, and exhales a disagreeable and peculiar odor. The lochia, in different stages, have received the names *Lochia cruenta, L. serosa,* and *L. alba* or *mucosa* or *lactea.* The duration, quantity, and character of the discharge vary according to numerous circumstances. It flows from the part of the uterus which formed a medium of communication between the mother and fœtus, and continues usually from fourteen to twenty-one days. See *Parturition.*

Lochial, lo'ke-al. Pertaining to the lochia.

Lochiocœlii'tis (*locheia,* childbirth, *koilia,* abdomen). Puerperal fever.

Lochiodochium, lok-e-o-do-ke'um. Lying-in hospital.

Lochiometra, lok-e-om-et'rah (*locheia, metra,* the uterus). Retained lochia, due to obstruction.

Lochion, lok'e-on. Childbed.

Lochiop'yra (*locheia,* childbirth, *pur,* fever). Puerperal fever.

Lochiorrhag'ia (*lochia, rhegnumi,* to break forth). Excessive lochial discharge.

Lochiorrhœ'a (*lochia, rheo,* to flow). Immoderate discharge of the lochia.

Lochio'rum reten'tio. Retention or suppression of the lochia; ischiolochia.

Lochioschesis, lok-e-os'kes-is (*lochia, schesis,* retention). Retention or suppression of the lochia.

Lochium, lok'e-um. Childbed.

Loch'o or **Loch'och.** Looch.

Lochocacocolpia, lok-o-kak-o-kol'pe-ah (*lochos,* childbirth, *kakos,* bad, *kolpos,* vulva). Putrescent puerperal kolpitis. Gangrene or ulceration of the vulva in the puerperal state.

Lochodochi'um (*lochos, dechomai,* to receive). Lying-in hospital.

Lochometri'tis (*lochos, metra,* uterus). Puerperal metritis.

Lochometrophlebi'tis (*lochos, metra,* uterus, *phlebitis*). Uterine phlebitis of the puerperal state.

Lochopyra, lok-op'ir-ah (*lochos, pur,* fire). Puerperal fever.

Lochos. Puerpera; a pregnant woman; childbirth.

Lochotyphus, lok-o-ti'fus (*lochos, tuphos,* stupor). Puerperal typhus fever, a contagious disease.

Lo'ci (pl. of **Locus,** place). Places. **L. mulie'bres,** uterus, vulva.

Lock fin'ger. Flexed, immovable position of the fingers from morbid growth in the metacarpo-phalangeal joint. **L. hos'pital,** hospital in England for gratuitous treatment of venereal diseases. **L.** or **locked jaw,** trismus.

Lock'ing. Act of fastening tightly together, as by a lock, as of the heads of twin children at birth, impeding labor. Term applied also to the coxofemoral articulation.

Loco (lo'ko) or **Lo'co disease'.** Name of disease of cattle in Kansas, attributed to a poisonous plant. **L. plant** or **L. weed,** name applied to varieties of Astragalus mollissimus.

Locoed, lo'kode. Affected with loco disease.

Locomobile, lo-ko-mo'b'l. Capable of locomotion.

Locomobil'ity or **Locomotil'ity.** See *Locomotion.*

Locomotion, lo-ko-mo'shun (*locus,* place, *moveo, motum,* to move). An action, peculiar to animal bodies, by which they transport themselves from place to place. It, as well as *musculation,* has also been used for the function of animal movements. The faculty is sometimes called *Locomotivity* and *Locomobility* or *Locomotility.* **L. of an ar'tery** is the movement produced in vessels having a curvature by the impulse of the blood sent from the heart, which tends to straighten the artery and causes the movement in question.

Locomotive, lo-ko-mo'tiv (same etymon). Relating to locomotion, as the locomotive or locomotory apparatus.

Locomotivity, lo-ko-mo-tiv'it-e. See *Locomotion.*

Locomo'tor or **Locomo'tory.** Locomotive. **L. atax'ia,** ataxy, locomotor.

Locoöphoritis, lo-ko-of-o-re'tis (*lochos, oöphoron,* ovary). Puerperal oöphoritis or puerperal oaritis.

Locoperitonitis, lo-ko-per-e-to-ne'tis. Peritonitis.

Loculamenta coli, lok-u-lam-en'tah ko'le (*locus,* compartment, cell). See *Colon.*

Locular, lok'u-lar (*loculus,* dim. of **Locus,** place). Divided into small spaces or compartments; unilocular, bilocular, multilocular, according as there are one, two, or many such spaces.

Loculus, lok'u-lus. Compartment; small space; areola.

Locus, lo'kus. Indefinite anatomical term meaning a place or spot. **L. cæru'leus,** a small eminence of dark-gray substance, opposite the crus cerebelli, which presents a bluish tint through the thin stratum covering it. A thin streak of the same color, continued up from this on either side of the fasciculi teretes, is called the *tænia violacea.* **L. cine'reus,** substantia ferruginea. **L. lu'teus,** the entire space covered by the mucous membrane connected with the sense of smell, of a yellow color in man. The term *regio olfactoria* designates only that region of the nasal mucous membrane where the nerves of smell split up and terminate. **L. ni'ger,** see *Peduncles of the brain.* **L. perfora'tus anti'cus** or **ante'rior,** a triangular flat surface of the brain, corresponding to the posterior extremity of each olfactory process in front of the optic tract, and near the entrance of the fissure of Sylvius, *Substantia* or *Lamina perforata anterior.* **L. perfora'tus posti'cus,** see *Tarini pons.* **L. ru'ber,** red nucleus.

Locust (lo'kust), **black.** Robinia pseudo-acacia. **L. plant,** Cassia Marilandica. **L. tree,** Robinia pseudo-acacia. **L., yel'low,** Cladrastis tinctoria.

Lo'cust-eat'ers. Acridophagi.

Lodged, loj'd. Wedged.

Lodoicea, lo-do-is-e'ah. See *Coco of the Maldives.*

Loeb'isch's for'mula. See *Christison.*

Lœ'me or **Lœmia,** le'me-ah (*loimos*). Plague.

Lœmicum, le'me-kum (*loimikos, loimos,* plague). Pertaining to the plague. See *Lœmology.*

Lœmocholosis, le-mo-kol-o'sis (*lœmos, chole,* bile). Fever, yellow.

Lœmocomium, le-mo-ko-me'um (*lœme, komeo,* to take care of). A hospital for those affected with plague.

Lœmography, le-mog'ra-fe. Loimography.

Lœ'moid. Relating to contagious diseases, the plague, etc.

Lœmologium, le-mo-loj'e-um. See *Lœmology.*

Lœmol'ogy (*lœmos, logos,* description). Doctrine of plague and pestilential diseases. Treatise on the same —*Lœmicum, Lœmologicum.*

Lœmophthalmia, le-mof-thal'me-ah. See *Ophthalmia.*

Lœmopyra, le-mop'ir-ah (*lœmos, pur,* fire, fever). Fever of contagious character; plague.

Lœ'mos (*loimos*). Plague.

Lœm-poc. Name applied to beri-beri in Java.

Loff'ler's solution. Methyl-blue stain used in microscopy.

Logadectomy, log-ad-ek'to-me (*logades, ektome,* excision). Excision of a part of the conjunctiva.

Logades, log'ad-ees (*logas,* white of the eye). Sclerotic.

Logaditis, log-ad-e'tis. Sclerotitis.

Log'ado-blennorrhœ'a. Purulent conjunctivitis.

Log'anin. Glucoside ($C_{25}H_{34}O_{14}$) from seeds of strychnos.

Logiatros, lo-ge-at'ros (*logos, iatros.* physician). In the bad sense, a physician without experience; a mere theorist. In the good sense, a rational physician; one who treats disease according to theoretical and scientific principles.

Logoman'ia or **Logomonoman'ia.** Monomania, chief symptom of which is talkativeness.

Logoneuroses, lo-go-nu-ro'sees (*logos, neuron,* nerve). Diseases of the mental activity.

Logopathy, lo-gop'a-the (*logos,* word, *pathos,* disease). Disordered speech dependent upon cerebral disease; dyslogia.

Logoplegia, lo-go-ple'je-ah (*logos, plege,* stroke). Form of aphasia in which the hearing of words fails to convey their meaning.

Logorrhœa, lo-gor-rhe'ah (*logos, rheo,* to flow). Morbid rapidity of speech.

Log'os. Reason.

Log'wood. Hæmatoxylon Campechianum.

Lo'hoch. Looch.

Loimia, loi'me-ah. Plague and other epidemic diseases.

Loimic, loi'mik (*loimos,* plague). Pertaining to plague.

Loimocholosis, loi-mo-kol-o'sis (*loimos, chole,* bile). Fever, yellow.

Loimography, loi-mog'ra-fe (*lœmo, grapho,* to describe). Description of the plague and pestilential diseases.

Loimology, loi-mol'o-je (*loimos, logos,* a discourse). Treatise on contagious epidemic diseases.

Loim'os. Plague.

Loins. Lumbi.

Loiseleuria procumbens, loi-se-lu're-ah pro-kum'-bens. *Azalea procumbens;* indigenous; ord. Ericaceæ. Astringent.

Loliaceum radice repente, lo-le-as'e-um rad-e'se re-pen'te (after Lolium). Triticum repens.

Lolline, lo'le-een. See *Lolium temulentum.*

Lolium annuum, lo'le-um an'nu-um. L. temulentum. **L. peren'ne,** ray darnel; red darnel; used in diarrhœa, amenorrhœa, etc. **L. temulen'tum,** *Cockgrass, Jum, Darnel;* poisonous in large doses. Species of the genus Lolium. *Loliine,* a volatile alkaloid derived from it, slows the action of the heart and reduces bodily temperature.

Lomi-lomi. Term given to form of massage in Sandwich Islands.

Lonchades, lon'kad-ees (for **Logades**). See *Sclerotic.*

Lonchaditis, lon-kad-e'tis (for **Logaditis**). Sclerotitis.

Lonchitis, lon-ke'tis (*lonche,* the head of a lance). Polypodium filix mas.

Lon'don paste. Paste composed of equal proportions of caustic soda and lime.

Long. Greater in length than breadth, as the long bones. Also applied to several muscles to distinguish them from others of similar function which are shorter. We say, for instance, long flexors and long extensors, in opposition to short flexors and short extensors.

Longævus, lon-je'vus (*longus,* long, *ævum,* age). Long-lived; macrobiotic.

Longanon (lon'gan-on), **Lon'ganum, Lon'gaon,** or **Lon'gas.** Rectum.

Longevity, lon-jev'it-e (*longus,* long, *ævum,* age). Prolongation of existence to an advanced age; also duration of life. The mean age at death of different classes and professions enables an estimate to be formed of the expectation or value of life in each.

Longheaded, long'hed-ed. Macrocephalic.

Longiductor, lon-je-duk'tor. Adductor longus.

Long'ings. Peculiar and whimsical desires of pregnant women or of those having suppressed uterine discharges.

Longiperoneus, lon-je-per-o-ne'us. Peroneus longus.

Longisection, lon-je-sek'shun. Longitudinal section.

Longissimus, lon-jis'sim-us (superlative of **Longus**). Term applied to parts which are very long in their relation to others. **L. cap'itis,** complexus minor. **L. cervi'cis,** transversalis colli; trachelo-mastoid. **L. dor'si,** muscle situate vertically at the posterior part of the trunk, filling in a great measure the vertebral furrows. It is attached to the posterior surface of the sacrum, to the transverse processes of all the lumbar and dorsal vertebræ, and inferior margin of the last seven or eight ribs, and maintains the vertebral column in a straight position, straightens it when bent forward, and can even carry it back. It also assists in the rotatory motion of the trunk. **L. fem'oris,** sartorius. **L. oc'uli,** obliquus superior oculi.

Longitu'dinal. Lengthwise. **L. si'nus,** subcranial sinus or canal from crista galli to tentorium.

Longsightedness, long-si'ted-nes. Presbytia; presbyopia. See *Hypermetropia* and *Hyperopia.*

Lon'gus. Long. **L. atlan'tis,** see *Longus colli.* **L. cap'itis,** rectus capitis anticus major. **L. col'li** (long muscle of the neck), situate at the anterior and superior part of the vertebral column; is attached to the anterior surface of the bodies of the first three dorsal and last six cervical vertebræ, to the intervertebral ligaments, the anterior edge of the transverse processes of the last five cervical vertebræ, and the tubercle on the anterior arch of the first; it bends the cervical vertebræ upon each other and upon the dorsal vertebræ. If the upper portion acts on one side only, it occasions the rotation of the atlas on the vertebra dentata, and consequently of the head on the neck. The upper and outer portion is called *Longus atlantis,* and the same name is given to the upper oblique portion, *Obliquus colli superior* of Luschka.

Lonicera brachypoda, lo-nis'er-ah brak-ip'o-dah. Ord. Caprifoliaceæ, Japanese plant. Infusion or decoction of the leaves is possessed of diuretic properties. **L. caprifo'lium,** caprifole; white Italian honeysuckle. Laxative, diuretic, tonic, etc. **L. Diervil'la,** Diervilla trifida. **L. Etrus'ca,** fruit of species from S. Europe; emetic and cathartic. **L. German'ica,** L. periclymenum. **L. Mariland'ica,** Spigelia Marilandica. **L. pericly'menum,** *Common woodbine, Honeysuckle;* slightly astringent and tonic, and formerly much used in gargles. **L. sempervi'rens,** *Scarlet* or *Trumpet honeysuckle;* indigenous. Syrup of the leaves has been given in asthma and in tonsillitis.

Looch, lo'ok (of Arabic extraction). Linctus. See *Eclegma* and *Eclectos.* The Paris Pharmacopœia has had several preparations of this kind, which were pleasant methods of administering demulcent, pectoral, and other remedies.

Loodiana (loo-de-an'ah) **disease.** Term applied to anthrax in India.

Lo'ok. Looch.

Loop. Anse. **L., Hen'le's,** narrow loop formed in the kidney, at the contiguous borders of the medullary and cortical portions, by the peculiar turning or looping of a urinary tubule. **L., obstet'rical,** fillet. **L. stitch,** see *Suture.*

Loose. Lax. See *Looseness.*

Looseness of the bow'els. Diarrhœa.

Loose'strife. Lythrum salicaria. **L., creep'ing,** Lysimachia nummularia. **L., four'leaved,** Lysimachia quadrifolia.

Lopez radix, lo'pez rad'iks. Root of an Indian tree, extolled in cases of colliquative diarrhœa.

Lophadia (lof-ad'e-ah) or **Lophia,** lof'e-ah. Back of the neck; upper part of the neck. The first vertebra of the back.

Lophocomus, lo-fo-ko'mus. Tufted or woolly state of the hair or scalp.

Lophos, lo'fos. Ridge or crest.

Lopima, lo'pe-mah. Fagus castanea.

Loquacity, lo-kwas'it-e (*loquor,* to speak). Act of speaking with volubility; sometimes a symptom of disease, and observable in hysteria, etc.

Loquelah, lo-kwe'lah (*loquor,* to speak). Voice, articulated. **L. abol'ita,** aphonia. **L. blæ'sa,** stammering; balbuties. **L. impedi'ta,** speaking with difficulty or confusion.

Lordo'ma. Lordosis.

Lordosis, lor-do'sis (*lordos,* curved, bent). Name given to curvature of the bones in general; particularly to that of the vertebral column forward, giving rise to the projection of the sternum called chicken-breasted or pigeon-breasted; lordosis has been called *Myopathic* or *Osteopathic* according as the muscles or the bones are the pathological causes. **L., lum'bar,**

projection of the lumbar vertebræ forward. **L. valgo'rum**, genu valgum.

Lordotic, lor-dot'ik. Pertaining to or affected with lordosis.

Loreta's method. Treatment of aneurism by introduction of a wire into the sac. **L.'s opera'tion**, dilatation of the pylorus with the finger in process of laparogastrotomy.

Loricatio, lor-e-kah'she-o (*lorico*, to incrust). In pharmacy, the application of a coating of clay or other substance to vessels which are to be exposed to fire.

Lorind matricis, lo'rind mat-re'sis. Pretended epilepsy of the womb.

Loripes, lor'ip-ees (*lorum*, thong, *pes*, foot). See *Kyllosis* and *Talipes varus*.

Lo'rus. Hydrargyrum.

Lostor'fer's cor'puscles. Granular masses found in blood of syphilitics.

Lot. Urine.

Lo'ta. See *Carate*. **L. mol'va**, see *Oleum morrhuæ*. **L. vulga'ris**, see *Oleum morrhuæ*.

Lotio, lo'she-o (*lavo*, *lotum*, to wash). Clyster; lotion. **L. cu'pri sulpha'tis camphora'ta**, lotion, camphorated. **L. flav'a**, **L. hydrar'gyra flav'a**, see *Hydrargyri oxymurias*. **L. hydrar'gyri ni'gra**, see *Hydrargyri submurias*. **L. ru'bra**, lotion, camphorated. Red wash, made of corrosive sublimate, red sulphuret of mercury, creasote, and water; used like yellow wash; see *Lotion, camphorated*. **L. sapona'cea**, see *Sapo*.

Lotion, lo'shun. Fluid external application, ordinarily applied by wetting linen in it, and keeping it on the part affected. **L., cam'phorated, of Bates**, Bates's camphorated water; red wash of copper sulphate, camphor, and other ingredients; diluted it forms Bates's collyrium; see *Lotio rubra*. **L., Goul'ard's**, liquor plumbi subacetatis dilutus; lead-water. **L., Gran'ville's antid'ynous** or **counter-ir'ritant**, the milder form is made of liq. ammon. fort., f℥j; sp. rosmarin., f℥vj; tinct. camphor., f℥ij. M. The stronger form is made of liq. ammon. fort., f℥x; spir. rosmar., f℥ss; tinct. camphor., f℥ij. M. The stronger lotion vesicates rapidly. A piece of linen folded six or seven times may be imbued with it and laid for a few minutes on the part to be irritated. **L., hydrocyan'ic** (hydrocyanic acid., f℥iv; rectified spirit of wine, f℥j; distilled water, f℥vss). Used with much success in impetigo, etc. **L., mercu'rial, black**, see *Hydrargyri submurias*. **L., mercu'rial, yellow**, see *Hydrargyri oxymurias*. **L. of potas'sium sul'phuret** (potassii sulphuret, ℥ij; saponis, ℥iss; aquæ calcis, f℥viiss; alcohol. dilut., f℥ij). Used in various chronic cutaneous diseases.

Lo'tium. Urine.

Lotu'ra (*lavo*, *lotum*, to wash). Lotion. **L. car'nium**, washings of flesh or dysenteric passages having such an appearance.

Lo'tus sylves'tris. Trifolium melilotus. **L. Virginia'na**, Diospyros Virginiana.

Loup'ing ill. Hydrorachitis in sheep, producing paraplegia.

Louse. Pediculus.

Lou'siness or **Lou'sy disease.** Phtheiriasis.

Lout'ron. Bath.

Lov'age. Ligusticum levisticum.

Love begot', illegitimate. **L. child**, illegitimate. **L. pea**, Abrus precatorius.

Love-ap'ple plant. Solanum lycopersicum.

Lo'vi's beads. Small hollow glass beads, constituting specific-gravity beads.

Low spir'its. Hypochondriasis.

Lower po'lar cir'cle (Barnes's). Inferior third of the uterine cavity.

Low'er, tu'bercle of (after Dr. Richard Lower). Small projection, the existence of which is by no means constant, found in the sinus venosus between the superior and inferior cava.

Loxarthrosis (loks-arth-ro'sis) (*loxos*, oblique, *arthron*, joint) or **Loxarth'rus.** Vicious deviation, distortion, or direction of the joints, without spasm or luxation, as in clubfoot.

Loxauchenus, loks-aw-ke'nus (*loxos*, *auchen*). Name of skulls in which line joining inion and basion describes an angle with the radius fixus varying from 14° to 26°.

Loxia, loks'e-ah (*loxos*, oblique). Wry-neck.

Loxic, loks'ik. Distorted; oblique.

Loxochordus, loks-o-kor'dus (*loxos*, oblique, *chorda*, cord). Angle formed by meeting of line between hormion and basion, with radius fixus between 15.5° and 33°.

Loxocoryphus, loks-o-kor'e-fus. Name of skulls in which line joining bregma and lambda describes an angle with radius fixus at from 17° to 29°.

Loxocyesis, loks-o-se-a'sis. Luxation or obliquity of gravid uterus.

Loxodontus, loks-o-don'tus. Name of skulls in which the line connecting subnasal and alveolar points forms an angle of from 50° to 88° with radius fixus.

Loxometopus, loks-o-me-to'pus. Name of skulls in which line joining bregma with nasal point describes an angle of from 33.5° to 47° with the radius fixus.

Loxophthalmus, loks-of-thal'mus (*loxos*, oblique, *ophthalmos*, eye). Strabismus.

Loxopisthius, loks-o-pisth'e-us. Name of skulls in which a line projected through lambda and inion describes an angle of from 95° to 106° with radius fixus.

Loxopisthocranius, loks-o-pis-tho-kran'e-us. Skulls in which line projected through lamba and opisthion forms with the radius fixus an angle of from 119° to 130°

Loxoprosopus, loks-o-pro-so'pus. Skulls in which line drawn from alveolar point to nasion forms with radius fixus an angle of from 75° to 89.5°.

Loxorhinus, loks-o-rhe'nus. Skulls in which a line projected from nasion to subnasal point forms with the radius fixus an angle of from 77° to 87.5°.

Loxotomy, loks-ot'o-me (*loxos*, *tome*, incision). Amputation by oblique incision.

Loy's disease. Pox in the horse.

Lozangia, loz-an'je-ah. Lozenge; tabella; trochiscus.

Loz'enge. Tabella; trochiscus.

Lozenges (loz'en-jes), **bark.** Tabellæ cinchonæ. **L., bis'muth**, trochisci bismuthi. **L., cat'echu**, trochisci catechu. **L. of cat'echu and magne'sia**, tabellæ antimoniales. **L., chlo'rate of potash**, trochisci potassii chloratis. **L. for the heartburn**, trochisci carbonatis calcis. **L., ipecacuan'ha**, trochisci ipecacuanhæ. **L., i'ron, reduced**, trochisci ferri redacti. **L., magne'sia**, tabellæ de magnesiâ. **L. of marsh'mallows**, tabellæ de althæâ. **L., mor'phia**, trochisci morphinæ. **L., morphia and ipecacuan'ha**, trochisci morphiæ et ipecacuanhæ. **L., o'pium**, see *Trochisci glycyrrhizæ cum opio*. **L. of oxal'ic acid**, tabellæ acidi oxalici. **L., pec'toral, black**, trochisci glycyrrhizæ glabræ. **L., pec'toral, of emetin**, trochisci emetinæ pectorales. **L., rhu'barb**, tabellæ de rheo. **L. of scam'mony and sen'na, compound**, tabellæ de scammonio et sennâ. **L., so'da, bicar'bonate of**, trochisci sodæ bicarbonatis. **L., Spit'ta's**, see *Trochisci glycyrrhizæ cum opio*. **L., steel, aromat'ic**, see *Tabellæ de ferro*. **L., sul'phur, compound**, tabellæ de sulphure compositæ. **L., sul'phur, simple**, tabellæ de sulphure simplices. **L. of sul'phuret of an'timony**, tabellæ antimoniales. **L., tan'nin**, trochisci acidi tannici. **L., Wis'tar's**, trochisci glycyrrhizæ cum opio.

Lubido, lu-be'do. Strong desire; libido. **L., intes'tinal**, desire to go to stool.

Lubricantia, lu-bre-kan'she-ah (*lubrico*, to make slippery). Demulcents, emollients.

Lubrica'tion. Application of oily matter to any part to give it smoothness or softness.

Lubricity, lu-bris'it-e. Lasciviousness.

Lubricum caput, lu'bre-kum kap'ut (slippery or smooth head). Penis.

Lucæ (lu'se), **horizon'tal plane of.** Plane passing through axis of zygomatic arches.

Lucid, lu'sid (*luceo*, to shine). In medicine, a word particularly applied to the intervals of apparent rea-

son which occur in mental alienation; intervals of *lucidity*.

Lucifer-matchmaker's disease. See *Phosphorus*.

Lucif'ugus (*lux*, light, *fugio*, to shun). Dreading light.

Lucina, lu-se'nah (*lux*, light, surname of Juno and Diana). Goddess who presided over parturition. Parturition. **L. sine co'itu** or **concu'bitu** (parturition without copulation), parthenogenesis.

Luck'y-hood. Caul.

Lucomania, lu-ko-man'e-ah (*lukos*, wolf, *mania*). Lycanthropia.

Lucu'lia gratis'sima. E. Indian shrub; bark is antipyretic.

Lucuma, lu-ku'mah (S.). Fruit of the southern provinces of the coast of Peru and the north of Chili. **L. mammo'sa,** see *Mamme apple*. Other species are used as food or in confections. **L. salicifo'lia,** Mexican species; seeds are used in pleurisy; the bark is antiperiodic.

Lucumin, lu'ku-min. Bitter principle from a Peruvian species of lucuma; tonic and antipyretic.

Lucumorianus, lu-ku-mo-re-an'us (probably from *lux*, light, *moror*, to tarry). Continuing for several days; hence *dormitio leucomoriana*, morbid sleep persisting for several days.

Lu'dus Helmon'tii or **Paracel'si.** Calcareous stone used by the ancients in calculous affections. Term also applied to every species of calculous concretion occurring in the animal body.

Ludwigia palustris (lud-wig'e-ah pal-us'tris) **diffu'sa.** E. Indian species; vermifuge, diuretic, astringent. **L. wa'ter pur'slane,** *Phthisis-weed;* indigenous; used as a pectoral in asthma and chronic cough.

Lud'wig's angi'na. Sublingual and submaxillary cellulitis. See *A. Ludovici*. **L.'s gan'glion,** ganglion in wall of right auricle.

Lu'es (*luo*, to dissolve or melt away). Disease, plague, syphilis. **L. Cel'tica,** syphilis. **L. deif'ica,** epilepsy. **L. divi'na,** epilepsy. **L. dysenter'ica,** dysentery. **L. gonorrho'ica,** gonorrhœa impura. **L. In'dica,** frambœsia. **L. inguina'ria,** plague. **L. Panno'niæ,** fever, Hungary. **L. pestif'era,** plague. **L. Polo'nica,** plica. **L. Sarmat'ica,** plica. **L. scorbu'tica,** see *Purpura*. **L. seconda'ria,** secondary syphilis. **L. syph'ilis,** syphilis. **L. syphilo'des,** syphilis, pseudo-syphilis. **L. trichomat'ica,** plica. **L. vene'rea,** syphilis.

Luf'fa. Various species of this cucurbitaceous plant, growing chiefly in Asia and Africa, are used medicinally, particularly as drastic cathartics. **L. Ægypti'aca,** towel-gourd, washing-rag or gourd, of Egypt and Arabia, is used for personal washing.

Lug. Ear.

Lug'dus. Erysipelas.

Lu'gol's caus'tic i'odine. *Iodine caustic.* Solution of iodine and iodide of potassium, each ℥j in f℥ij of water. Used in lupus, etc. **L.'s i'odine lo'tion,** *Iodine lotion;* weak solution of iodine, gr. ij–iv, and iodide of potassium, gr. iv–viij, in water, Oj; used in ozæna, scrofulous ophthalmia, etc. **L.'s solu'tion of i'odine,** liquor iodini compositus.

Lujula (corr. of *Hallelujah*). Oxalis acetosella.

Lullaby (lul'a-be) **speech.** Lallation.

Lumbago, lum-ba'go (*lumbi*, loins). Soreness and stiffness of lumbar muscles and lumbo-dorsal fascia. *L. apostematosa*, *L. ab arthrocace*, *L. psoadica*. Pain in the loins from abscess. Psoadic lumbago may also be caused by inflammation of the psoas muscle. See *Psoitis*. **L. arthrit'ica,** L. of gouty origin, the periosteum of the spinal bones being affected. **L. a nisu** (*a nisu*, from effort), pain in the loins from bearing too heavy a burden. **L. rheumat'ica,** L. due to rheumatism of the lumbar muscles. **L. scorbu'tica,** L. attending or following scurvy.

Lum'bar (*lumbi*, loins). Belonging to the loins. **L. ab'scess,** *Psoas abscess;* abscess found on the side of the posas muscle or between that and the iliacus internus. Between these muscles is a quantity of loose areolar substance, and when an abscess takes place it can find no outlet except by a distant course, generally descending along the psoas muscle, forming a swelling immediately beneath Poupart's ligament; at times, however, extending down the thigh under the fascia. Severe hectic follows the bursting of the abscess, and often death. Its causes are scrofula, injury, etc. The system must be supported under the great reparative efforts required of it. **L. aponeuro'sis,** lumbar fascia. **L. ar'teries** are four or five in number on each side. They arise from the sides of the abdominal aorta, and pass behind the muscles situate in front of the lumbar portion of the spine, to gain the broad muscles of the abdomen. They give off spinal branches and anterior, posterior, and external muscular branches. **L. co'lon,** ascending colon. **L. enlarge'ment,** portion of spinal cord possessing a greater diameter, beginning at the 10th dorsal vertebra. **L. gan'glia,** ganglia of sympathetic located in lumbar region. **L. glands,** lymphatic glands located in lumbar region. **L. her'nia,** hernia located in the lumbar region. **L. nerves** are five in number, and issue from the vertebral column by the spinal foramina. The first lumbar nerve gives off three branches: the external or ilioscrotal, the middle or inguinocutaneous, and the internal or infrapubian. Along with the three pairs below it, it forms the lumbar plexus. **L. plex'us,** plexus formed by the union of the communicating branches of the anterior branches of the first four lumbar nerves. It is situate behind the psoas muscle and before the transverse processes of the lumbar vertebræ. It furnishes, besides the branches which proceed from the first pair, several filaments, that are distributed to the psoas muscle, to the iliacus, the integuments, and glands of the groin; and three great branches—the crural, obturator, and lumbosacral. **L. re'gion,** the loins; see *Lumbi*. **L. veins** have an arrangement analogous to that of the arteries of the same name. They communicate with the vertebral sinuses, azygous veins, etc., and pass into the vena cava inferior. **L. ver'tebræ,** the five vertebræ of the lumbar region.

Lumbaris, lum-bar'is. Lumbar; any muscle of the lumbar region. **L. exter'nus,** quadratus lumborum. **L. inter'nus,** psoas magnus.

Lum'bermen's itch. See *Itch, prairie*.

Lum'bi (pl. of **Lumbus**). The loin or loins; lumbar region. The posterior regions of the abdomen, comprised between the base of the chest and the pelvis. The parts which enter into the formation of the lumbar regions are: the skin; a considerable quantity of areolar texture; broad and strong aponeuroses—the latissimus dorsi, obliquus externus and obliquus internus abdominis, transversalis abdominis, quadratus lumborum, and the mass common to the sacrolumbalis, longissimus dorsi, and multifidus spinæ. These muscles surround the lumbar region of the vertebral column. The vessels, nerves, etc. of the loins are called lumbar.

Lumbidorsalis, lum-be-dor-sal'is. Spinalis dorsi.

Lumbifragium, lum-be-fraj'e-um (*lumbus*, loin, *fragium*, fracture). Lumbar hernia.

Lum'biplex. Lumbar plexus.

Lumbiplex'al. Relating to the lumbar plexus.

Lum'bo. In composition, relating to the loins or lumbar vertebræ.

Lum'bo-abdom'inal. Relating to the lumbar and abdominal regions.

Lum'bo-abdomina'lis. Lumbo-abdominal; muscle of inferior animals similar to the human transversalis abdominis.

Lumbocos'tal. Relating to the loins and ribs.

Lumbocostalis, lum-bo-kos-tal'is. Superficialis costarum muscle of lower animals, like the human serratus posticus; sacrospinalis.

Lumbodor'sal. Relating to the loins and back.

Lumbodynia, lum-bo-din'e-ah (*lumbo*, *odune*, pain). Lumbago.

Lumbofemora'lis. Psoas magnus.

Lum'bo-ili'acus. Psoas parvus.

Lum'bo-in'guinal. Relating to the loins and groin.

Lumbosacral, lum-bo-sa'kral. Belonging to the

lumbar and sacral regions or to the lumbar vertebræ and the sacrum. Large nerve given off from the anterior branch of the fifth lumbar pair, which descends into the pelvis before the sacrum to join the sciatic plexus.

Lum'brical. Relating to the lumbricus.

Lumbrica'les man'ûs. Four small, fleshy, thin, round, long, fusiform fasciculi situate in the palm of the hand. They arise from the tendons of the flexor communis digitorum, and are inserted at the outer and posterior side of the superior extremity of the first phalanges of the last four fingers. These muscles bend the fingers on the metacarpus and fix the tendons of the flexor digitorum communis. **L. pe'dis** are analogous to those of the hand in form, number, and arrangement.

Lumbricalis, lum-bre-kal'is. Resembling a lumbricus or earth-worm; lumbricoïdes. Name given to small muscles in the palm of the hand and sole of the foot.

Lumbricide, lum'bre-side (*lumbricus, cædo,* to kill). Anthelmintic especially destructive to Ascarides lumbricoïdes.

Lumbricid'ia anthelmint'ica. Andira anthelmintica. **L. legal'is,** Andira stipulacea.

Lum'briciform. Like a lumbricus.

Lumbricoïdes, lum-bre-ko-e'dees. Earth-worm; also enteric, long, round worm.

Lumbricus, lum'bre-cus (earth-worm). Ascaris lumbricoïdes. **L. la'tus,** bothriocephalus latus, tænia solium. **L. renal'is,** eustrongylus gigas. **L. te'res hom'inis,** ascaris lumbricoïdes.

Lum'bus Ven'eris (loin of Venus). Achillea millefolium. The loin.

Lu'men. Light, pupil; also employed in the same sense as foramen and spiramentum (air-hole), and hence extended to denote the calibre of a tube or vessel. **L. con'stans,** phosphorus.

Luminosity, lu-min-os'it-e. Condition of being luminous; phosphorescence.

Lu'minous. Affording light; shining.

Luna, lu'nah (moon). Silver; the moon. **L. Albi'ni,** sciatic notch, lesser. **L. imperfec'ta,** bismuth. **L. philospho'rum,** mercury. **L. potab'ilis,** silver nitrate.

Lunacy, lu'na-se. Insanity. See *Lunatic.*

Lu'nar (*luna,* moon, silver). Relating to the moon (see *Lunatic*) or to silver, as lunar caustic. **L. caus'tic,** silver nitrate.

Lunare (lu-nar'e) **os.** Semilunar bone; the second bone in the upper row of the carpus

Lunaria, lu-nar'e-ah (*luna,* moon). Menses. **L. peren'nis** or **redivi'va,** *Moonwort, Satin honesty;* diuretic, laxative, antiseptic.

Lunaris, lu-nar'is. Lunatic.

Lunatic, lu'na-tik. Relating to the moon; epithet given to diseases supposed to appear at certain phases of the moon, or to persons affected by them. A lunatic, at the present day, may be defined as one laboring under lunacy or mental alienation, *dementia accidentalis* or *adventitia;* that is, under any form of unsoundness of mind, except idiocy. In law, a lunatic is one who has had an understanding, but by disease, grief, or other accident has lost the use of his reason and become *non compos mentis.*

Lunaticus, lun-at'e-kus. Epileptic; lunatic; somnambulist. A writ *de lunatico inquirendo* is one granted for inquiry into the mental condition of one supposed to be insane.

Lunatism, lu'nat-izm. Periodical conjunctivitis; somnambulism, especially in the moonlight.

Luna'tum. Cuneiform bone.

Lune (*luna,* moon). Fit of lunacy or insanity.

Lunella, lu-nel'lah (dim. of **Luna,** moon). Hypopyon.

Lung. Essential organ of respiration, which is double, and occupies the two sides of the chest. The lungs, which are of a spongy, soft, flexible, compressible, and dilatable structure, fill exactly the two cavities of the thorax, and are separated from each other by the mediastinum and the heart. The right lung, which is shorter and broader than the left, is divided by two oblique fissures into three unequal lobes, *lobi* or *alæ pulmonum.* The left has only two lobes, and consequently only one fissure. At the internal surface of these organs, which is slightly concave, there is about the middle a pedicle formed by the bronchia and pulmonary vessels, and called by anatomists the *root of the lungs.* Essentially, the lungs are composed of prolongations and ramifications of the bronchia and of the pulmonary arteries and veins, the divisions of which are supported by a fine areolar tissue.

When the surface of the lungs is examined in a clear light, we may see, even through the pleura, that their parenchyma is formed by the aggregation of a multitude of small vesicles, of an irregularly spheroid or ovoid shape, full of air, and separated by white and opaque septa, constituting lozenge-shaped spaces, which are called *lobules—lobuli* or *insulæ pulmonales*—and which are separated by interlobular areolar tissue. These lobules do not communicate with each other. The series of air-sacs connected with the extremity of each bronchial twig has been called a *lobulette.* The vesicles are called air-cells, air- or lung-vesicles, spiramenta or spiramina, or cellulæ pulmonum. See *Cellules, bronchic.* They who regard the bronchial tubes as terminating in elongated cavities have termed those cavities air-sacs, infundibula, Malpighian vesicles, terminal cavities, etc., and the cup-like cavities observed in these have been called *alveoli.* They are the air-cells.

Along the partitions or septa is deposited in greater or less quantity *black pulmonary matter,* as it has been called, which seems to be normal. Sometimes it is seen in points, at others in spots. The color of the lungs varies according to age and other circumstances. In youth it is more red, and afterward grayish or bluish, often as if marbled. The pleura pulmonalis is their investing membrane. The air is carried to the lungs by means of the trachea and bronchia. The black venous blood which requires oxygenation is conveyed to them from the heart by the pulmonary artery, and when it has undergone this change it is returned to the heart by the pulmonary veins. The blood-vessels inservient to the nutrition of the lungs are the bronchial arteries. The pulmonary lymphatics are very numerous. Some are superficial, others deep-seated. They pass for the most part into the bronchial ganglions or glands. Nerves are furnished by the pulmonary plexus. The lungs are respiratory organs in which venous blood is oxygenated.

The following estimates have been made of the measurements, weight, etc. of the lungs (Krause):

DIMENSIONS (MM.), WEIGHT, AND VOLUME OF THE LUNGS.

	Men.		*Women.*	
	Right.	*Left.*	*Right.*	*Left.*
Weight at external surface	271	298	216	230
" internal surface	162	176	135	156
Antero-posterior diameter	203	176	176	162
Transverse diameter at root of lung	95	81	88	74
" " " base of lung	135	129	122	108

Weight of lung (containing a moderate amount of blood):
Men . . . . . 1300 g. (right, 682; left, 618).
Women . . . . . 1023 g. (" 541; " 482).
Soldier aged 22 . . . . . right, 517.5; left, 494 g.
Volume of lung free from air, 793–1230 cm. (right, 516–624; left, 456–585) (1023–1300 absolute gravity and 1056 specific gravity).
Lung in the cadaver, moderately filled with air (about three times as much) . . . . . right, 1577–1990; left, 1408–1805
Filled to utmost capacity . . . . . right, 5157; left, 4364
Weight of right lung . . 247 g. (E. Bischoff)–718 g. (Dursy).
Weight of left lung . . . 228 g. (E. Bischoff)–619 g. (Krause).
Lumen of the smallest bronchioles 0.18–0.22
Smallest lobules of the lung . . . . . 1 in diameter.
Alveoli . . . . . 0.12–0.38 in diameter.
When half filled . . . . . about 0.2 mm
Number of pulmonary vesicles, 1700–1800 millions (Huschke).

L., atelec'tasis of, imperfect expansion of the lungs at birth. **L., at'rophy of, se'nile,** emphysema senile. **L., black, of coal miners,** anthracosis. **L., broad lig'ament of,** see *Pleura.* **L. cal'culi,** calculi, pulmonary. **L., cancer of the,** phthisis, cancerous. **L. ca-**

pac'ity, breathing capacity. **L., cirrho'sis of**, cirrhosis of the lung. **L., coal, coal-miner's** or **col'lier's**, see *Anthracosis*. **L., collapse of the**, see *Atelectasis pulmonum*. **L., consump'tion of**, phthisis pulmonalis. **L. fe'ver**, bronchial catarrh; pneumonia. **L., fi'broid degenera'tion of**, cirrhosis of the lung. **L. flow'er**, Gentiana pneumonanthe. **L., hem'orrhage from**, hæmoptysis. **L., hepatiza'tion of**, see *Pneumonia* and *Hepatization*. **L., inflamma'tion of**, pneumonia. **L., per'forating ab'scess of**, purulent collection forming exterior to the lung, and afterward perforating its tissue, so that it is evacuated through the bronchial tubes. **L. proof**, Docimasia pulmonum. **L., root of**, see *Lung*. **L., spleniza'tion of**, see *Pneumonia* and *Splenization*. **L. stones**, calculi, pulmonary. **L. test**, L. proof. **L. test'er**, cylindrical bag of India rubber so arranged as to measure the quantity of air expelled by the lungs; form of spirometer. **L., tuber'cular disease of**, phthisis pulmonalis. **L. ves'icles**, see *Lung*.

Lung'wort. Medicinal plant, Pulmonaria officinalis; demulcent; a fluid extract of the leaves is used in fʒj doses. **L., cow's**, Verbascum nigrum. **L. tree**, Lichen pulmonarius.

Lunula, lu'nu-lah (dim. of **Luna**, moon). Onyx. **L. of Gianuz'zi**, demilune. **L. scap'ulæ**, notch, scapular or suprascapular. **L. un'guium**, white semilunar space on the nails near the root.

Lunulæ, lu'nu-le (pl. of **Lunula**). Two thin semilunar surfaces on either side of the corpus Arantii of the semilunar valves of the heart.

Lu'nule. Lunula.

Lupanine, lu'pan-een. $C_{15}H_{23}N_2O$. Base from Lupinus angustifolius, causing paralysis of the brain and augmenting reflex irritability of the medulla.

Lupa'ria. Aconitum lycoctonum.

Lupia, lu'pe-ah (*lupeo*, to harass). Wen; phagedenic ulcer; fungoid growth. **L. junctu'ræ**, spina ventosa. **L. scrofulo'sa**, scrofuloderma tuberculosum.

Lu'piform. Having the character or appearance of lupus.

Lupiin, lu'pe-in. Bitter glucoside from Lupinus luteus; not important medically. Another alkaloid, lupinidine, a liquid, has also been obtained from it.

Lupine. Lupinosus.

Lupinine, lu'pin-een. Alkaloid, $C_{21}H_{40}N_2O_2$, from the seeds of Lupinus luteus. Also alkaloid from seeds of Lupinus albus, and an independent amorphous mass from the same plant. They are paralyzants of the sensory and motory nervous apparatus.

Lupino'sis. Morbid affection of cattle, supposed to be from eating lupinus or fungoid growths on plants resulting from fermentation; the symptoms are fever, abdominal tumefaction, great debility, jaundice, etc.

Lupino'sus. Having the appearance of lupinus or lupine or its seeds.

Lupinotox'in (*lupinus*, *toxikon*, poison). Resinous principle from different species of lupinus, causing lupinosis.

Lupinus, lu-pe'nus. Under this term the *White lupin*, *Lupinus albus*, ord. Leguminosæ, is often meant. The meal is occasionally used as an anthelmintic and as a cataplasm. Other species of lupinus are employed therapeutically, but their action is similar to that of L. albus. Its alkaloid is somewhat similar to atropine in action, and its seeds are diuretic, emmenagogue, and anthelmintic, and are externally applied to wounds, ulcers, etc.

Lupiology, lu-pe-ol'o-je (*lupia*, wen, *logos*, description or understanding). Description of wens or other tumors, even if malignant.

Lu'poid (*lupus*, *eidos*, resemblance). Resembling lupus. **L. ul'cer**, see *Ulcer, lupoid*.

Lupoma'nia (*lupus*, wolf). Hydrophobia.

Lu'pous. Relating to lupus.

Lupuli'na. Lupuline.

Lupuline, lu'pu-leen. Lupulina (Ph. U. S.). Substance which exists in Humulus lupulus or hop. It is in the form of small, shining, yellowish grains or granular powder separated from the strobiles of Humulus lupulus; pulverulent and of aromatic odor. When analyzed it is found to contain resin, volatile oil, and a bitter principle, lupuline; aromatic and tonic, and, according to some, narcotic.

Lupulinic (lu-pu-lin'ik) **ac'id**. $C_{48}H_{82}O_{19}$. Obtained by action of dilute sulphuric acid on lupuline; lupulirrhetin accompanies it. **L. glands**, lupulina.

Lupuli'num (Ph. U. S.). Lupuline.

Lupulirrhet'in. Amorphous substance, $C_{10}H_{16}O_4$, from lupulin.

Lupulite, lu'pu-lite. Lupuline.

Lu'pulus. Humulus lupulus. **L. commu'nis, salicta'rius**, or **scan'dens**, Humulus lupulus.

Lu'pus (wolf). *Jacob's ulcer*, *Erosive ulcer of the derma*, *Eating tetter*. Tubercular excrescences, with ragged, spreading ulcerations, chiefly about the alæ nasi, where they destroy the skin, etc. for some depth. They sometimes appear in the cheek, circularly or in the shape of a sort of ringworm, destroying the substance, and leaving a deep and deformed cicatrix. A form of granuloma characterized by papules, macules, tubercles, or nodules, with a tendency to degeneration and atrophy. The investigations in regard to *tuberculin* of Koch have established the value of that agent as a means of diagnosis and also as a remedial agent in lupus. When hypertrophy accompanies cicatrization, the affection is called *Lupus hypertrophicus*, *Lupus with hypertrophy*. It almost always attacks the face. See also *Herpes exedens* and *Lycoïdes*. **L. ac'ne**, chronic papular form, generally combined with acne vulgaris. **L. anatom'icus**, verruca necrogenica. **L. cancro'sus**, cancer; lupus associated with epithelioma. **L., Cazenove's**, L. erythematodes. **L. cornu'tus**, L. exuberans. **L. dev'orans**, see *Lupus*. **L. discre'tus**, papules are separated. **L. dissemina'tus**, papules relatively few, but involving extensive surface; L. acne. **L. ec'zema**, L. erythematosus resembling eczema. **L. erythemato'sus** or **erythemato'des**, erythematous lupus; form characterized by small bright-red spots, elevated, and having in their centre the enlarged outlet of a sebaceous gland filled with yellow rows of dried-up epithelial cells and thickened sebaceous secretion. It is not attended with ulceration, and generally attacks the nose and cheeks. **L. erythemato'sus discoï'des**, type occurring early, in which the first efflorescences slowly increase by peripheral growth. **L. erythemato'sus dissemina'tus**, numerous patches occur after primary efflorescence, having no tendency toward peripheral growth. **L. ex'edens**, lupus accompanied with ulceration. **L. exfoliati'vus**, papules slowly disappear, leaving the atrophied surface smooth and shining. **L. exu'berans**, L. with various forms of excrescences, independent of, or accompanying, L. exulcerans. **L. exul'cerans**, type of L. vulgaris, characterized by ulceration of infiltrated skin. **L. frambœsioï'des**, L. exuberans. **L., fun'gous**, L. exuberans. **L. hæmorrhag'icus**, a variety of erythematosus in which hemorrhage appears in vesicles, etc. **L. hypertroph'icus**, form possessing extensive warty enlargements superimposed upon a thickened skin. **L. impetigino'sus**, variety of L. erythematosus in which crusts take the place of scales. **L. maculo'sus**, form of lupus having small non-elevated spots or patches. **L. milia'ris**, L. acne. **L. nodo'sus**, L. tuberosus. **L. nonex'edens**, in this form the tubercles spread, but do not become ulcerated. Here the deposit of a lower form of cell-tissue in place of the normal skin is greater than in the erythematous form. **L. papilla'ris** or **papillomato'sus**, L. exuberans. **L. prom'inens**, L. tuberosus. **L. ro'dens**, L. exulcerans. **L. scrofulo'sus**, scrofuloderma tuberculosum. **L. seba'ceus**, L. erythematosus, with marked involvement of the sebaceous glands. **L. serpigino'sus**, a later stage, where the morbid process extends from the periphery. **L. syphilit'icus**, specific lupus. **L. tuberculo'sis**, a form of L. vulgaris; form of lupus characterized by aggregating tendency of papules. **L. varico'sus**, nævus. **L. veg'etans**, type characterized by proliferation. **L. verruco'sus**, form in which papillary development occurs. **L. vo'rax**, herpes exedens; see *Lupus*. **L. vulga'ris**, form characterized by

brownish-red papules, macules, or tubercles of skin or mucous membrane, which undergo ulceration and cicatrization.

Lur'co. Glutton.

Lu'rid. Pale-yellow, sallow, as applied to the complexion.

Lur'keydish. Mentha pulegium.

Lu'ror (*leira*, pale). Paleness.

Lusch'ka, gland of. Coccygeal gland.

Lusch'ka's arachnoi'dal vil'li. Pacchionian bodies. **L.'s bur'sa,** pharyngeal bursa. **L.'s car'tilage,** small elastic cartilaginous nodule in anterior portion of vocal cord. **L.'s pharynge'al ton'sil,** amygdaloid gland at roof of pharynx.

Lusciositas, lus-she-os'e-tas. Strabismus; obliquity of vision; myopia.

Lusciosus, lus-she-o'sus. Blind, either totally or of one eye; short-sighted.

Luscitas, lus-se'tas (*lusciosus*, dim-sighted). Strabismus. The term has also been given to any case of obliquity in which the eye is fixed in an unnatural position.

Luscities, lus-sish'e-ees. Luscitas.

Luscus, lus'kus (one-eyed). Lusciosus.

Lu'sis. Washing.

Lust'garten's bacil'lus. Bacillus of syphilis.

Lustramentum, lus-tram-en'tum (*lustro*, to purify). Cathartic.

Lu'sus natu'ræ. A monstrosity or variation from the abnormal conformation.

Lute. Composition employed either for closing apertures in a pharmaceutical instrument or for covering the surface of retorts, tubes, etc. which have to support a great degree of heat. It is made of linseed meal and starch, or of clay and drying oil, or white of egg and lime, and that for covering vessels intended to be strongly heated is made of clay, sifted sand, and water.

Lu'tein. Yellow principle found in corpora lutea, yolk of eggs, and clotted blood.

Lute'ola (dim. of **Luteus**). Reseda luteola.

Lu'teum o'vi. Yolk of egg.

Lu'teus. Yellow.

Lutidine, lu'tid-een. Colorless liquid derived from tar by distillation. C_7H_9N.

Lu'tron or **Lu'trum** (*loutron*, *louo*, to wash). Bath. Also an ophthalmic medicine.

Lutrexanthe'ma (*loutron*, bath, *exanthema*, efflorescence). Eruption or exanthem caused by bathing.

Lux. Light.

Luxatio, luks-ah'she-o. Luxation. **L. imperfec'ta,** sprain. **L. incomple'ta,** partial dislocation. **L. len'tis,** dislocation of the crystalline lens into the anterior chamber or into the vitreous humor.

Luxation, luks-a'shun (*luxo*, to put out of place). Dislocation. Displacement of two or more bones whose articular surfaces have lost, wholly or in part, their natural connection, either owing to external violence (*accidental luxation*) or to disease of some of the parts about the joint (*spontaneous luxation*). Luxation is *complete* when the bones have entirely lost their natural connection; *incomplete—Luxatio imperfecta, Subluxation*—when they partly preserve it; and *compound* when a wound communicates with the luxated joint. The general indications of treatment are: 1. To reduce the protruded bone to its original place. 2. To retain it *in situ*. 3. To obviate any attendant or consequent symptoms. To reduce requires extension, counter-extension, and coaptation. Anæsthetics frequently assist the efforts of the surgeon by inducing more complete relaxation of the muscles.

Luxatu'ra. Dislocation.

Luxus (luks'us) **consump'tion** (*luxus*, excess). Consumption of an excess of albumen, which has not at any time been a constituent of the body, its combustion or oxygenation being then supposed to be effected in the blood.

Lu'zula campes'tris. *Field rush, Crowfeet, Black grass, God's grace,* and *L. pilosa, Hairy wood-rush,* of this country and Europe. It has been used in calculous cases.

Lyacon'itine. Alkaloid from Aconitum lycoctonum, with poisonous effects like those of curare.

Lycaconine, lik-ak'o-neen. Obtained by decomposing lyaconitine with boiling water.

Lycanche, lik-an'ke (*lyco, ancho*, to strangle). *Wolf quinsy, Wolf choak,* as *Cynanche* means *Dog choak.* Also hydrophobia. See *Lycoïdes.*

Lycanchis, lik-an'kis. Lycanche.

Lycanthrope, lik'an-thrope. See *Lycanthropia.*

Lycanthropia, lik-an-thro'pe-ah (*lyco, anthropos*, man). Lycanthropy. *Lycomania.* Variety of melancholy in which the person believes himself to be changed into a wolf, and imitates the voice and habits of that animal. One so circumstanced is called a *Lycanthrope, Lycanthropus.*

Lycanthropus, lik-an-thro'pus. See *Lycanthropia.*

Lycaum, le-ka'um. Lycanthropia.

Lychnidium, lik-nid'e-um (*luchnidion*) (dim. of **Luchnos**, a light). Innate vital or animal heat.

Lychnis (lik'nis) **chalcedon'ica.** Plant, parts of which are used for soap. **L. githa'go,** *Corn cockle, Rose campion;* naturalized European plant, ord. Caryophyllaceæ. The seeds are somewhat acrid, but not poisonous. At one time employed in cutaneous diseases and in hemorrhage, and as a topical application to ulcers and fistulæ. **L. officina'lis,** saponaria. **L. sapona'ria** or **sylves'tris,** saponaria.

Lychnium, lik'ne-um (*luchnos*, light). Innate vital or animal heat.

Lycium, lis'e-um (*lukion*). Medicinal substance obtained from the roots and branches of a thorny shrub growing in Lycia; astringent, and used in dysentery, ulcers of the gums, etc. By some it has been considered to be the catechu.

Lyco, le'ko (*lukos*, wolf). In composition, wolf.

Lycoctonine, lik-ok'to-neen. Alkaloid of Aconitum lycoctonum.

Lycodontes, lik-o-don'tees (*lyco, odous*, a tooth). Canine teeth.

Lycoïdes, lik-o-e'dees (*lyco, eidos*, form). Epithet for a species of cynanche, called also *Lupus* and *Strangulator*, and absurdly attributed to excessive retention of sperm in its reservoirs and its passage into the blood.

Lycomania, lik-o-man'e-ah (*lyco, mania*). Lycanthropia.

Lycoperdon, lik-o-pur'don (*lyco, perdo*, to break wind). *Puff ball, Bullfists, Mollipuffs;* ord. Fungi. Puff ball dries into a very fine, light-brownish dust, which is sometimes used as a mechanical styptic to arrest hemorrhage. **L. arrhi'zon,** lycoperdon. **L. cervi'num,** Elaphomyces granulatus. **L. gigante'um,** puff ball, used as a hæmostatic. **L. globo'sum,** lycoperdon. **L. guloso'rum,** L. tuber. **L. pro'teus,** *Common puff ball.* **L. tu'ber,** *Truffle* (pronounced *troofle*). Fleshy, firm body, unknown in its mode of reproduction, which is found underground in different parts of France and Italy. Is much esteemed as an aliment. It seems to belong to the champignons, and has a particular perfume. Aphrodisiac virtues have been ascribed to it. A Virginia truffle is called *Tuckaho.* It is the *Scleretium giganteum*, and is sometimes named *Indian bread* and *Indian loaf.*

Lycopersicum esculentum, lik-o-per'sik-um es-kulen'tum. Solanum lycopersicum. **L. po'mum amo'ris,** Solanum lycopersicum. **L. tubero'sum,** Solanum tuberosum.

Lyc'opin. Concentrated extract from Lycopus Virginicus.

Lycop'odine. Alkaloid from Lycopodium clavatum and L. complanatum. $C_{32}H_{52}N_2O_3$.

Lycopodium, li-ko-po'de-um (*lyco, pous*, foot). *Clubmoss, Wolfsclaw, Witchmeal;* ord. Lycopodiaceæ. Largest of European mosses. The dust or sporules of L. clavatum and other species of lycopodium (Ph. U. S.), which fills the capsules of its spikes, is very inflammable, and hence has been called *Vegetable sulphur* and also *Farina* or *Pulvis*, or *Semen*, or *Sulphur lycopodii.* It is used in France and the United States to roll pills in, and in medicine as a desiccative in the

excoriations to which infants are liable. **L. clava'tum**, lycopodium. **L. complana'tum**, common club-moss, ground pine; indigenous; same properties as Lycopodium selago. **L. officina'le**, L. clavatum. **L. recur'vum**, L. selago. **L. sela'go**, *Upright clubmoss, Fir clubmoss, Upright firmoss.* Decoction of this plant acts violently as an emetic and purgative, and was formerly, on this account, used as an abortive. It is employed to kill vermin.

Lycopus, lik'o-pus (*lyco, pous*, foot, from the likeness of the leaves). *Bugleweed, Water bugle, Water horehound, Gypsyweed, Paul's betony.* This indigenuos herb, nat. ord. Labiatæ, grows throughout the greater part of the United States. The whole herb is said to be slightly narcotic; is given in infusion (lycop., ℥j; aq. fervent., Oj); dose, Oss–Oj. **L. pu'mila**, lycopus. **L. sinua'tus**, *Water horehound, Gypsyweed, Paul's betony*, indigenous, has similar properties. **L. unifio'rus**, L. pumila. **L. Virgin'icus**, lycopus.

Lycorexia, lik-o-reks'e-ah. Hunger, especially of intense form.

Lycorrexis, lik-o-reks'is (*lyco, orexis*, appetite). See *Fames lupina.*

Lycosa tarentula, lik-o'sah tar-en'tu-lah. See *Tarentula.*

Lycostoma, lik-os'to-mah (*lyco, stoma*, mouth). Fissure of the palate.

Ly'dus. Blistering beetle.

Lye. Lixivium, ley. **L., dyspep'tic**, see *Fuligokali.* **L., med'ical**, see *Fuligokali.* **L. tea, Phys'ick's**, see *Fuligokali.*

Lyencephala, le-en-sef'al-ah (*luo*, to loosen, *kephale*, head). Low type of cerebral development in which the hemispheres, which are without folds, are connected only by a round commissure and the hippocampal commissure.

Lygismus, le-giz'mus (*lugismos, lugizo*, to bend). Luxation.

Lygmodes, lig-mo'dees (*lygmus*). Singultus.

Lyg'mus (*lugmos*). Singultus.

Lygodes, le-go'dees (*lugodes*). Singultus.

Lying-down state. Parturient state.

Lying-in. Puerperal state. **L.i.- state**, parturient state.

Lyma, le'mah (*luo*, to wash). Lochia; also filth or sordes (to be washed away).

Ly'me (*luma*). Lyma.

Lymph, limf (akin to *numpha*, water, by changing *n* into *l*). *Lympha, White blood, Lympha nutritia.* Name given to the fluid contained in the lymphatic vessels and thoracic duct. The properties and composition of lymph vary somewhat according to the part whence the lymphatic vessels obtain it. Generally, it is under the form of a transparent, slightly alkaline fluid, sometimes of a madder-red or yellowish color; of a spermatic odor and saline taste; soluble in water, the solution becoming turbid when mixed with alcohol. It coagulates; the clot becomes of a scarlet red if put in contact with oxygen, and of a purple red if placed in carbonic acid. Like the blood, the lymph consists of a fluid, *Liquor lymphæ*, in which *lymph-corpuscles* are suspended. Lymph is the product of internal absorption in different parts of the body; it flows along the lymphatic vessels, uniting with the chyle, and is poured into the veins, thus becoming one of the materials of the blood. **L., bo'vine**, vaccine lymph taken from that class of animals, being called *calf lymph* when from the calf. **L. chan'nel**, see *Lymph-sinus.* **L., coag'ulable**, fibrin; liquor sanguinis. **L. cor'puscles**, see *Lymph.* **L., corpus'cular**, inflammatory form of lymph, with colorless corpuscles. **L., croup'ous**, exudation during croup. **L., fi'brinous** or **fibrinoplas'tic**, tenacious form, speedily coagulable. **L. fis'tula**, see *Fistula.* **L. fol'licles**, term applied to lymphoid structures, as Peyer's patches, tonsils, etc. **L. glob'ules**, see *Lymph.* **L., glyc'erin**, see *Glycerin.* **L. hearts**, lymphatic hearts. **L., Koch's**, tuberculin. **L. plas'ma**, fluid portion of lymph suspending the corpuscular elements. **L., plas'tic**, liquor sanguinis. **L. se'rum**, lymph minus corpuscles and clot. **L. si'nus**, *L. channel;* a channel for passage of lymph. **L., vac'cine**, see *Vaccine.*

Lym'pha. Lymph. **L. ar'borum**, see *Sap.* **L. muculen'ta na'rium**, nasal mucus. **L. nutri'tia**, lymph. **L. pancreat'is**, see *Pancreas.* **L. pericar'dii**, see *Pericardium.* **L. plas'tica**, fibrin.

Lymphadenec'tasis (*lymph, aden*, gland, *ektasis*, dilatation). Dilatation of lymphatic gland.

Lymphaden'ia. Enlargement of lymphatic glands generally.

Lymphadenitis, lim-fad-en-e'tis (*lymph, adenitis*). Inflammation of lymphatic gland.

Lymphad'enoid. Resembling a lymphatic gland.

Lymphadenoma, lim-fad-en-o'mah. Neoplasm histologically composed of lymphoid elements; lymphosarcoma; lymphoma. Hodgkin's disease, in which there are numerous growths of this kind in various parts of the body. **L., anæmic**, pseudoleucocythæmia. **L. caverno'sum**, lymphangeioma. **L., mul'tiple**, general lymphadenoma.

Lymphadenosis, lim-fad-en-o'sis. Hodgkin's disease. **L., gen'eral**, Hodgkin's disease.

Lymphæductus, lim-fe-duk'tus (*lympha, ductus*, duct). Lymphatic vessels.

Lymphæmia, lim-fe'me-ah (*lymph, haima*, blood). A variety of leucocythæmia in which the lymphatic glands become greatly enlarged. See *Leucocythæmia.*

Lymphagogue, lim'fa-gog (*lymph, ago*, to drive). Any agent assisting in the production of lymph.

Lymphangeio'ma. Tumor of lymphatic vessels. **L. tubero'sum multiplex**, neoplasm of lymphatic vessels in the skin, perhaps a variety of fibroma molluscum.

Lymphangeitis, lim-fan-je-e'tis (*lymphangia, itis*). Angeioleucitis.

Lymphangia, lim-fan-je'ah (pl. of **Lymphangion**) (*lympha, angeion*, vessel). Lymphatic vessels.

Lymphangiectasis, lim-fan-je-ek'tas-is (*lymphangia, ektasis*, dilatation). Dilatation of lymphatic vessels.

Lymphangiectodes, lim-fan-je-ek-to'dees. Type of cutaneous hypertrophy affecting subcutaneous areolar tissue, which forms dendritic vegetations possessing new blood-vessels, and associated with dilated lymph-spaces and œdema.

Lymphangiography, lim-fan-je-og'ra-fe (*lymphangia, graphe*, description). Description of the lymphatic vessels.

Lymphangioïtis, lim-fan-je-o-e'tis. Angeioleucitis.

Lymphangiology, lim-fan-je-ol'o-je (*lymphangia, logos*, description). Treatise on the lymphatics.

Lymphangio'ma. Condition in which there is dilatation of the lymphatic vessels. **L. circumscrip'tum**, chronic eruption of vesicles associated in clusters and with dilated lymphatics. **L. tubero'sum**, appearance of papules or tubercles from same cause.

Lymphangiomyo'ma. Myoma or tumor involving muscular tissue and the lymphatic vessels.

Lymphangion, lim-fan-je'on. See *Lymphangia.*

Lymphangioncus (lim-fan-je-on'kus), **Lymphangon'cus**, or **Lymphangioma**, lim-fan-je-o'mah (*lympha, angeion*, vessel, *onkos*, tumor). Tumefaction of the lymphatics. **L. caverno'sum**, **L. colli cys'ticum**, congenital cyst of the neck. **L. cu'tis**, excessive development of lymph-elements in the corium, presenting a white glistening tuberculous appearance. **L. tubero'sum mul'tiplex**, type characterized by numerous nodules affecting more or less of the whole surface.

Lymphangiotomy, lim-fan-je-ot'o-me (*lymphangia, tome*, incision). Dissection of the lymphatic vessels.

Lymphangitis, lim-fan-je'tis. Angeioleucitis.

Lymphangoïtis, lim-fan-jo-e'tis. Angeioleucitis.

Lymphatic, lim-fat'ik. Relating to lymph or lymph-vessels. See *Phlegmatic.* **L. duct**, see *Lymphatic vessels.* **L. fis'tula**, lymph fistula. **L. gan'glions** or **glands**, see *Conglobate.* **L. hearts**, *Lymph hearts.* The frog and several other animals are provided with large receptacles for the lymph immediately under the skin, which exhibit distinct and regular pulsations like the sanguiferous heart. Their use appears to be to propel the lymph. **L. sys'tem**, system of organs

which are inservient to the formation and circulation of lymph. These are L. ganglions or glands. See *Conglobate* and *L. vessels*. **L. ves'sels**, arising at the surface of membranes and in the tissue of the organs; they carry into the veins the lymph. Lymphatic vessels are found in almost every part. They form two orders—one *superficial*, the other *deep*—frequently communicating with each other. Lymphatic vessels are smaller than the arteries and veins, are very thin, diaphanous, and cylindrical, but present here and there more or less considerable dilatations, caused by valves in their interior. All the branches before joining the principal trunks pass through lymphatic ganglions; are formed of an outer areolar membrane and an internal coat, similar to that of the veins; of the latter the valves are formed. All the lymphatics of the body ultimately discharge themselves at the junction of the subclavian and internal jugular veins. Two of these trunks are considerably larger than the others—the *thoracic duct* and the great trunk of the right side, the *right* or *lymph-duct*. The former receives the lymphatics of the abdomen of the lower extremities, the left side of the thorax, the left upper extremity, and the corresponding side of the head and neck; the latter receives those of the right upper extremity and of the right side of the head, neck, and thorax.

Lymph'atism. Lymphatic habit. Scrofula.

Lymphatitis, lim-fat-e'tis. Angeioleucitis.

Lymphatocele, lym-fat-o-se'le (Eng. lym'fat-o-seel). Tumor from dilatation of lymphatics.

Lymphenteritis, lim-fen-ter-e'tis. Enteritis with lymph or serous infiltration.

Lympheurysma, lim-fu-riz'mah (*lympha*, *eurusma*, dilatation). Lymphangiectasis.

Lymphitis, lim-fe'tis. Angeioleucitis; lymphangitis may be simple or virulent from chancre.

Lymphocele, lim-fo-se'le (Eng. lim'fo-seel). Tumor formed by abnormal collection of lymph.

Lymphochezia, lim-fo-kez'e-ah (*lympha*, *chezo*, to go to stool). Serous diarrhœa.

Lymph'ocyte (*kutos*, cell). Lymph-corpuscle.

Lymphoder'mia. Morbid condition of lymphatics of the skin. **L. pernicio'sa**, form of mycosis.

Lymphœde'ma. Œdema from obstruction of the lymphatics.

Lymph'oid (*lympha*, *eidos*, resemblance.) Lymph-like. **L. tis'sue**, adenoid tissue.

Lymphoma, lim-fo'mah. *Lymphoid tumor*, *Leukæmic* or *Leucæmic tumor*. Tumor composed of corpuscles resembling the cell-elements of lymphatic glands, *Adenoid tissue*. **L., malig'nant**, Hodgkin's disease.

Lymphoncus, lim-fon'kus (*lympha*, *onkos*, a tumor). Lymphangioncus. **L. i'ridis**, iridauxesis.

Lymphopyra, lim-fop'ir-ah (*lympha*, *pur*, fire, fever). Fever, adenomeningeal. Fever attending disease of the lymphatics.

Lymphorrhagia, lim-for-rhaj'e-ah (*lympha*, *rhegnumi*, to break forth). Discharge of lymph from a lymphatic vessel owing to lesion of its coats.

Lymphorrhœa, limf-or-rhe'ah (*lympha*, *rheo*, to flow). Escape of lymphatic fluid by spontaneous rupture or accidental wound, producing a fistulous opening of the lymphatic vessels.

Lymphosarcoma, lim-fo-sar-ko'mah. Sarcomatous tumor of a lymphatic gland with small round cells, like the lymph- or white blood-corpuscles, or pus- or granulation-cells. Lymphadenoma or Hodgkin's disease.

Lymphosis, lim-fo'sis. Preparation or elaboration of lymph.

Lymphostasis, lim-fos'tas-is. Stasis of lymph.

Lymphotomy, lim-fot'o-me (*lympha*, *tome*, incision). Dissection of the lymphatics.

Lymphotorrhœa, lim-fo-tor-rhe'ah. Lymphoid discharge from the ear.

Lymph'ous. Relating to lymph.

Lymphuria, lim-fu're-ah. Chyluria.

Lyngodes, lin-go'dees. Affected with hiccough. **L. fe'bris**, fever accompanied with hiccough.

Lynn wahoo'. Ulmus alata.

Lynx (hiccough). Singultus or hiccough.

Ly'pe (*lupe*, sadness). Despondency; melancholy.

Lypemania, lip-e-man'e-ah. Melancholy.

Lype'ria cro'cea (*luperos*, sad, from the dull color of the flowers). South African plant, ord. Scrophulariaceæ; the flowers closely resemble saffron in smell and taste, and possess similar medical virtues.

Lypothymia, lip-o-thim'e-ah (*lype*, *thumos*, the mind). Very great sadness.

Lyra, le'rah (*lura*, lyre). The under surface of the posterior part of the body of the fornix is impressed with numerous transverse and oblique lines, which have been so called from the resemblance they bear to the ancient lyre. Arborescent striæ in interior of cervix uteri. Rugous interior of vagina.

Lysia, lis'e-ah. Lysis.

Lysimachia nummularia, lis-e-mak'e-ah num-mular'e-ah. *Creeping Loosestrife*, *Moneywort*. Ord. Primulaceæ. This plant was formerly accounted vulnerary. It has been considered to possess antiscorbutic and astringent qualities, and has been used in leucorrhœa. **L. purpu'rea**, Lythrum salicaria. **L. quadrifo'lia**, *Four-leaved loosestrife*, *Crosswort*, indigenous plant, astringent; has been used as a stomachic and antiperiodic. **L. thyrsiflo'ra** or **vulga'ris**, common yellow loosestrife, used in diarrhœa, tuberculosis of the lungs, etc.

Ly'sis (*lusis*, solution). Termination of disease which is operated insensibly; that is, gradually and without critical symptoms.

Ly'sol. Brown oleaginous liquid, having odor of creasote, made in preparation of creasote by dissolving in fat and saponifying with addition of alcohol the portion of oil of tar which boils between 190° and 200° C. Soluble in water; antiseptic; stronger than carbolic acid; much less poisonous. Used chiefly in gynæcology and dermatology.

Lys'sa. Hydrophobia. **L. cani'na**, hydrophobia.

Lyssas, lis'sas. One affected with mania.

Lysseter, lis-se'ter. One affected with mania.

Lys'si (*lussa*, hydrophobia). Pustules or vesicles near the frænum of the tongue, seen in early period of hydrophobia.

Lys'sicus. Pertaining to hydrophobia.

Lyssine, lis'seen (*lussa*, hydrophobia). Term for the specific zymotic principle of hydrophobia.

Lyssinosis, lis-sin-o'sis. Inflammation of the lungs from inhalation of fine fibres of cotton.

Lyssodectus, lis-so-dek'tus (*lyssa*, *deko*, to bite). One bitten by a mad dog or actually laboring under hydrophobia.

Lyssodegma, lis-so-deg'mah. Bite of a mad dog.

Lyssodex'is. Bite of a mad dog.

Lyssoï'des. Like rabies.

Lyssopho'bia (*phobos*). Morbid fear of hydrophobia.

Lyte'rios (*luterios*, dissolving). Epithet given to signs which announce the solution of a violent disease.

Lythrum, lith'rum (*luthron*, blood and dust, on account of the color of the flowers of some species). Plant, ord. Lythraceæ; astringent and demulcent. **L. ala'tum**, milk-willow; leaves are used in Mexico in poultices and for cancerous ulcers. *L. album* and *L. lanceolatum* are similarly employed; Lythrum salicaria. **L. hyssopifo'lia**, Lythrum salicaria. **L. salica'ria**, *Common* or *Purple willow herb*, *Loosestrife*, ord. Lythraceæ; herb, root, and flowers possess a considerable degree of astringency, and are used, occasionally, in the cure of diarrhœa and dysentery, leucorrhœa, hæmoptysis, etc. *L. hyssopifolia* and *L. alatum*, indigenous, have similar properties.

Lyt'ta (*luttao*, to be mad). Insect, ord. Coleoptera. Coleopterous insect, a number of species of which are used for blistering purposes. **L. cæru'lea**, see *Cantharis*. **L. gi'gas**, vesicating beetle. **L. gi'gas mas**, see *Cantharis*. **L. ru'ficeps**, see *Cantharis*. **L. ru'fipes**, class Insecta, ord. Coleoptera; variety of lytta peculiar to Chili, more active as a vesicant than the cantharis or the Lytta vittata. **L. seg'etum**, see *Cantharis*. **L. vesicato'ria**, cantharis. **L. vitta'ta**, *Potato fly*; four species of Meloë that blister are found in the United States.

M.

M. This letter signifies, in prescriptions, minim, *manipulus*, a handful, and *Misce*, 'mix;' also myopia. See *Abbreviation*.

M. a. Abbv. for metre-angle.

Ma. Abbv. for milliampère.

Maagoni. Swietenia mahogani.

Mac. Abbv. for macera, macerate.

Macahalef. See *Calaf*.

Maca'ja but'ter. Oil product of seeds of Cocos aculeata.

Macapatli. Smilax sarsaparilla.

Macaro'ni. Paste moulded in cylindrical shape, and formed of rice or wheaten flour; eaten, when boiled, in soup; prepared with cheese, etc. See *Turundæ Italicæ*.

Macau'la. Contagious disease with eruption on the skin and mucous membranes, resembling tubercular syphilide.

Mace, mas. See *Myristica moschata*. **M. reed,** Typha latifolia.

Macedonisium, mas-e-do-nis'e-um (*Macedonia*). Smyrnium olusatrum.

Macene. $C_{10}H_{16}$. Active principle of mace.

Macer, mah'ser (lean). Gracilis.

Maceration, mas-e-ra'shun (*macero*, to soften by water). Operation consisting in infusing, without heat, a solid substance in a liquid, so as to extract its virtues.

Maceratum, mas-er-at'um. Product of maceration.

Macerona, mas-er-o'nah. Smyrnium olusatrum.

Macescere, mah-ses'er-e. Emaciate.

Macew'en's operations. 1. Procedure for rectification of knock-knee, consisting of section through femoral shaft above the condyles. 2. Radical cure of inguinal hernia by forming pad of sac, with which the internal ring is closed.

Machæra, mak-e'rah. Knife; penis.

Machæridion, mak-e-rid'e-on. Machærion.

Machærion, mak-e're-on (*machaira*, sword, *mache*, a fight). Knife; amputating knife.

Machæris, mak-e'ris (*machairis*). Knife; razor.

Machaönia (mak-ah-o'ne-ah) or **Machaö'nica ars** (called after Machaon). The healing art.

Machaö'nian. Pertaining to a physician.

Machinal, mak'e-nal (*mechane*, a contrivance). Epithet added especially by French writers to the word *movement*, to express that the will takes no part in it.

Machine, mah-sheen'. Compound instrument or arrangement for putting a body in motion.

Machlosyne, mak-los'e-ne (*machlos*, unchaste). Nymphomania.

Machlo'tes. Nymphomania.

Macies, mah'se-ees. Atrophy, emaciation. **M. infan'tum,** tabes mesenterica.

Macilentus, mas-e-len'tus (*maceo*, to be lean). Gracilis.

MacIntyre's splint. Splint applied posteriorly for fracture of the leg in method by suspension.

Macis, mah'sis. See *Myristica moschata*.

Macley'ine. Alkaloid from Macleya cordata of China and Japan. $C_{20}H_{19}NO_5$.

Macrantrus, mak-ran'trus. Term applied to skulls in which a vertical line falling on radius fixus from most prominent part of torus frontalis falls in front of that dropped from nasion by 4 to 9 mm.

Macrauchen, mak-rau'ken (*macro*, *auchen*, neck). Having a long neck.

Macrencephalus, mak-ren-sef'al-us. Term applied to skulls in which angle between lines projected from hormion to nasion and inion is from 156.5° to 170°.

Macrencranus, mak-ren-kra'nus. Term applied to skulls having a large cerebellar sector (20° to 27.50°).

Macritas (mak're-tas) or **Macritudo,** mak-re-tu'do (*maceo*, to be lean). Emaciation.

Macro, mak'ro (*makros*, long). In composition, long.

Macro-angiosis, mak'ro-an-je-o'sis (*macro*, *angeion*, vessel). Congenitally large blood-vessels of a limb.

Macrobiosis, mak-ro-be'o-sis (*macro*, *bios*, life). Longevity.

Macrobiotes, mak-ro-be'o-tees. Longevity.

Macrobiotic, mak-ro-be-ot'ik. Of long life. *Macrobiotics* is the macrobiotic art or art of long living.

Macrobiotus (mak-ro-be'o-tus) or **Macrobius,** mak-ro'be-us (*makrobios*). Macrobiotic.

Macrocarpin, mak-ro-karp'in. Neutral principle derived from root of Thalictrum macrocarpum.

Macrocephalia, mak-ro-sef-al'e-ah (*macro*, *kephale*, head). Condition in which the head is unusually large, as at birth, rendering labor difficult.

Macrocephalic, mak-ro-sef-al'ik (*macro*, *kephale*, head). Having a large head.

Macrocephalous, mak-ro-sef'al-us (*makros*, large, *kephale*, head). Affected with macrocephalia.

Macrocephalus, mak-ro-sef'al-us (one who has a large head). Epithet given to children born with heads so large that they seem to be hydrocephalic, but in which the unusual development is owing to the large size of the brain. Term also applied by Hippocrates to certain Asiatics with long heads. See *Capitones*.

Macrocephaly, mak-ro-sef'al-e. Macrocephalia.

Macrochasmus, mak-ro-kaz'mus. Term given by Lissauer to skulls with an angle of between 94° and 114°.

Macrocheilia, mak-ro-ki'le-ah *macro*, *cheilos*, lip). Preternaturally large lips.

Macrochiria (mak-ro-ki're-ah) or **Macrochei'ria** (*macro*, *cheir*, hand). Excessive development of the hands.

Macrocladus, mak-rok'lad-us (*makros*, large, *klados*, branch). Wild cabbage-palm, the young leaves of the tops of which are edible.

Macrocnemius, mak-ro-na'me-us (*makros*, large, *kneme*, leg). Possessing long legs.

Macrocnemum, mak-ro-na'mum (*makros*, long, *kneme*, interspace between two knots). Genus of the Cinchoneæ. **M. cinchonoï'des,** species growing in Peru. **M. corymbo'sum,** Condaminea corymbosa. **M. Humboldtia'num,** Cascarilla peluda, found in the Andes of Peru; bark is reputed to be febrifuge. **M. ros'eum,** species growing in the Andes; bark has astringent properties. **M. tincto'rum,** Condaminea tinctoria.

Macrocolia, mak-ro-ko'le-ah (*macro*, *kolon*, limb). Large limbs in general.

Macrocolous, mak-ro-ko'lus. Having long legs.

Macrocornea, mak-ro-kor'ne-ah. Large cornea.

Macrocosm, mak'ro-kozm (*macro*, *kosmos*, world). The universe.

Macrocosmic, mak-ro-koz'mic. Pertaining to macrocosm.

Macrocosmology, mak-ro-koz-mol'o-je (*makrokosmos*, macrocosm, *logos*, doctrine). Science of macrocosm; also mineralogy.

Macrocos'mus. Macrocosm.

Macrocytes, mak'ro-sites (*macro*, *kutos*, cell). Giant blood-corpuscles.

Macrocythæ'mia (*makros*, large, *kutos*, cell, *haima*, blood). Condition in which there is augmentation of the dimensions of the red corpuscles of the blood.

Macrocyto'sis (same etymon). Condition in which the red corpuscles are increased in size, becoming macrocytes.

Macrodactylia, mak-ro-dak-til'e-ah Condition in which the fingers and toes are abnormally long or hypertrophied.

Macrodactylus, mak-ro-dak'til-us (*macro*, *daktulos*, finger). Long-fingered.

Macrodont, mak'ro-dont (*makros*, large, *odous*, tooth). Having large teeth.

Macrogaster platypus, mak-ro-gas'ter plat'e-pus (*macro*, *gaster*, belly, *platypus*, flat-footed). Acarus folliculorum.

Macrogastrous, mak-ro-gas'trus. Having a large stomach.

Macrogenious, mak-ro-jen'e-us (*makros*, long, *geneion*, chin). Possessing a long lower jaw.

Macroglossa (mak-ro-glos'sah) or **Macroglos'sia** (*macro*, *glossa*, tongue). Large-tongued. See *Paraglossa.*

Macroglossus, mak-ro-glos'sus. One having a large tongue. See *Paraglossa.*

Macromaniacal, mak-ro-man-i'a-k'l (*makros*, large, *mania*). Affected with a delusion in which the objects appear larger than in reality.

Macromelia, mak-ro-mel'e-ah (*macro*, *melos*, limb). Excessive size of a limb.

Macrom'elus. One affected with macromelia.

Macromere, mak'ro-mere (*macro*, *meros*, part). Large cell in ova of certain animals. **M., ante'rior**, macromere in ovum which is to form either the cephalic or anterior extremity of the embryo.

Macronosiæ, mak-ro-nos'e-e (*macro*, *nosos*, disease). Chronic disease.

Macropanencephalous, mak-ro-pan-en-sef'al-us (*pan*, *enkephalos*). Large size and extra development of the whole head.

Macrophage, mak'ro-faj (*macro*, *phago*, to eat). Phagocyte composed of a large cell with one nucleus; the microphages are absorbed by the macrophages.

Macrophagus, mak-rof'ag-us (*macro*, *phago*). See *Phagocyte.*

Macrophallus, mak-ro-fal'lus (*macro*, *phallos*, male organ). Large size of the male organ.

Macrophonus, mak-ro-fo'nus (*macro*, *phone*, voice). One with a strong voice.

Macrophthalmus, mak-rof-thal'mus (*macro*, *ophthalmos*, eye). Having large eyes.

Macrophysocephalus, mak-ro-fiz-o-sef'al-us (*macro*, *phusa*, air, *kephale*, head). Caput succedaneum, a tumefied condition of the child's scalp in labor.

Macrop'ia. See *Macropsia.*

Macropiper, mak-rop'e-per (*macro*, *peperi*, pepper). Piper longum. **M. excel'sum**, Piper excelsum. **M. latifo'lium**, Piper methysticum.

Macropneuma (mak-ro-nu'mah) or **Macropnœa**, mak-ro-ne'ah (*makros*, long, *pneuma*, breathing). Deep breathing.

Macropnoös (mak-ro'no-os) or **Macropnus**, mak-rop'nus (*makros*, long, *pnoe*, deep breathing). Slow breathing.

Macropnus, mak-rop'nus. Long-breathed; one who breathes slowly.

Macropodia, mak-ro-pod'e-ah (*makros*, large, *pous*, foot). Condition in which the feet are abnormally developed.

Macropodus, mak-rop'o-dus (*macro*, *pous*, foot). One possessing large feet.

Macropous or **Macropus**, mak'ro-pus. Macropodus.

Macroprosopia, mak-ro-pros-o'pe-ah (*macro*, *prosopon*, face). Monstrosity with excessive size of face.

Macrop'sia. Vision in which objects appear to be too large.

Macror, mak'ror. Emaciation.

Macrorrhis, mak-ror'is (*macro*, *rhis*, nose). Long-nosed.

Macrosceles, mak-ros'e-lees (*macro*, *skelos*, leg). Long-legged.

Macroscelia, mak-ro-sel'e-ah. Condition in which the legs are abnormally developed.

Macroscope, mak'ro-skope (*macro*, *skopeo*, to see). Instrument for increasing apparent size of objects.

Macroscopic, mak-ro-skop'ik. Implying natural or enlarged appearance, in contrast with the microscopic.

Macrosiæ, mak-ro'se-e (*makros*, long). Chronic diseases.

Macrosis, mak-ro'sis. Augmented in size.

Macrosmatic, mak-roz-mat'ik (*macro*, *osmetos*, odorous). Possessing olfactory organs in a highly developed state.

Macrosomatia, mak-ro-so-mah'she-a (*macro*, *soma*, body). See *Giant.*

Macrosomatous, mak-ro-so'ma-tus. Giant-like; large-bodied.

Macrosomia, mak-ro-so'me-ah. See *Giant.*

Macrostoma, mak-ros'to-mah (*macro*, *stoma*, mouth). Congenital fissure of the lip at the angle of the mouth.

Macrostomatus, mak-ro-stom'at-us. Pertaining to macrostomia.

Macrostomia, mak-ro-stom'e-ah (*makros*, large, *stoma*, mouth). Condition characterized by abnormal development of the mouth.

Macrosyphilionthus, mak-ro-sif-il-e-onth'us (*makros*, large, *syphilis*, *ionthos*, eruption on the face). Large syphilitic macula.

Macrotarsous, mak-ro-tar'sus (*macro*, *tarsus*). Possessing long tarsi.

Macrotes, mak-ro'tees (*macro*, *ous*, ear). One with long ears.

Macrotia, mak-ro'te-ah. Preternaturally large or long ears.

Macrotin, mak'ro-tin. Resinous extract of Cimicifuga racemosa.

Macrotys racemosa, mak-ro'tis ras-e-mo'sah. Actæa racemosa.

Macula, mak'u-lah. Spot; permanent discoloration of some portion of the skin, often with a change of its texture. *Ephelis*, *Nævus*, *Spilus*, etc. belong to the maculæ. See also *Molecule.* The term *Macula* is also applied by Trousseau to a modification in the vascularity of the skin, an important symptom in cerebral fever, *Cerebral* or *Meningeal macula*, the skin being diffused with a bright-red tint wherever it may be pressed upon. **M. acus'tica**, nearly circular spot on the wall of the utriculus of the ear where the branch of the nervus acusticus reaches it. **M. al'ba** or **al'bida**, leucoderma. **M. arcua'ta**, arcus senilis. **M. argente'a**, see *Argenti nitras.* **M. au'rea**, see *Foramen centrale retinæ.* **M., cer'ebral**, see *Macula.* **M. cor'neæ**, caligo. **M. cor'neæ arcua'ta**, see *Gerotoxon.* **M. cor'neæ margarita'cea**, cicatrix on transparent part of the eye. **M. emortua'lis**, see *Suggillation.* **M. fla'va**, see *Foramen centrale retinæ.* **M. fus'ca**, ephelides. **M. germinat'iva**, see *Molecule.* **M., ger'minous**, macula germinativa. **M. hepat'ica**, chloasma nævus. **M. lenticula'ris**, ephelides. **M. lu'tea ret'inæ**, see *Foramen centrale.* **M. matrica'lis**, nævus. **M. matri'cis**, nævus. **M., meninge'al**, see *Macula.* **M. ni'gra**, see *Optic nerve.* **M. origina'lis**, nævus. **M. rubo'sa**, cloudiness of the retina. **M. semipelluci'da**, caligo. **M. sola'ris**, ephelides. **M. syphilit'ica**, peculiar stain remaining after syphilitic roseola.

Mac'ulæ al'bæ. White spots seen on serous membranes, especially on that investing the heart. **M. an'te oc'ulos volitan'tes**, metamorphopsia. **M. cæru'leæ**, discolorations occurring sometimes on the skin after pediculosis corporis. **M. cribro'sæ**, see *Auditory canal, internal.* **M. gangræno'sæ**, macules due to gangrene in its incipiency. **M. incer'ti color'is**, term applied by Plenck to nævus, artificial cutaneous discolorations, and to oily seborrhœa. **M. lac'teæ**, M. albæ. **M. tendin'eæ**, strophulus.

Mac'ular or **Maculate**, mak'u-late. Spotted.

Maculation, mak-u-la'shun. Formation of macules.

Maculicol'lis, mak-u-le-kol'lis (*macula*, spot, *collum*, neck). Hairy spots on the neck.

Maculiform, mak'u-le-form. Resembling macula.

Maculose, mak'u-lose. Spotted.

Maculous, mak'u-lus. Spotted.

Mad. Insane. **M. apple plant**, Solanum melongena. **M. doc'tor**, psychiater. **M., horn**, see *Mania.* **M. itch**, parasitic cattle disease characterized by excessive itching. **M., ra'ving**, see *Mania.* **M., stark**, see *Mania.*

Ma'dar. Mudar.

Madarosis (mad-ar-o'sis) or **Madaro'tes** (*madao*, to be bald). Loss of hair, particularly of the eyelashes.

Madarotic, mad-ar-ot'ik. Relating to madarosis.

Madarous, mad'ar-ous (*madoroo,* to make bald). Suffering from madarosis.

Mad'der, dy'er's. Rubia.

Madefaction, mad-e-fak'shun. Process of wetting.

Madelcon, mad-el'kon. Bdellium.

Madema, mad-a'mah (*madao,* to be bald). Madarosis.

Madescent, mad-es'sent. Giving off moisture.

Madesis, mad-a'sis (*madao,* to be bald). Depilation; loss of hair.

Madia, mad'e-ah. Genus of herbs of the Helianthoideæ. **M. oil,** oil from seed of Media sativa. **M. sati'va,** oil plant; grows in certain parts of California and Chile; an oil is obtained from the seeds.

Madisis, mad'is-is. Depilation; loss of hair.

Madisterium (mad-is-ta're-um) or **Madiste'rion** (*madizo,* to make bald). Tweezers for extracting hairs.

Madness. Insanity. **M., canine',** hydrophobia. **M., demen'tial,** dementia. **M., drunk'ard's,** delirium tremens. **M., mani'acal,** mania. **M., melanchol'ic,** melancholia. **M., monomani'acal,** monomania. **M., ra'ving** or **fu'rious,** mania.

Mador. Moisture; cold sweat.

Madorius, mad-o're-us. Mudar.

Madras' turmeric, tur'mer-ik. Coloring matter of vegetable origin.

Madu'ra foot. Mycetoma.

Mad'weed. Scutellaria lateriflora.

Mad'wort. Camelina sativa; vermifuge.

Mæa (*maia*). Midwife.

Mæleutherosis, me-el-u-ther-o'sis (*maia,* midwife, *eleutherosis,* freeing). The act of being delivered by a midwife.

Mæum'a. See *Parturition.*

Mæusiomania, me-u-se-o-man'e-ah (*maieusis,* parturition, *mania*). Puerperal mania.

Mæusiphobia, me-u-se-fo'be-ah (*maieusis, phobos,* fear), fear of childbirth.

Mæuter (me-u'tur) or **Mæutes,** me-u'tees. Accoucheur.

Mæutic, me-u'tik. Relating to obstetrics.

Mæu'tica ars. Obstetrics.

Mæutric, me-u'trik. Relating to a midwife or obstetrics.

Mæia, me-e'ah. Obstetrics.

Mænas, me'nas. Fury; type of mania.

Maësa (me-a'sah) **pic'ta.** Abyssinian tree; anthelmintic.

Mæusis, me-u'sis. Parturition.

Mæutria, me-u'tre-ah. Midwife.

Mafoutra. Tree of Madagascar; fruit possesses astringent qualities.

Magdalia (mag-dal'eah), or **Magdal'eon,** or **Mag'dalis** (*masso,* to knead, crumb of bread). Medicine as a pill, formed of bread; roll of plaster.

Magendie's (mah-zhon'de's) **fora'men.** Foramen of communication between subarachnoid space and fourth ventricle. **M.'s solution,** solution of morphia; strength, 16 grs. to fluidounce of water.

Magenta, ma-jen'tah. Red aniline stain.

Mag'got. Larva of insect. **M. pim'ple,** see *Acne.*

Magisterium, ma-jis-ter'e-um. Magistery. **M. bismu'thi,** bismuth subnitrate. **M. jalap'æ,** resin of jalap. **M. marcasi'tæ,** bismuth subnitrate. **M. plum'bi,** plumbi subcarbonas. **M. sul'phuris,** sulphur lotum. **M. tar'tari pur'gans,** potassii acetas.

Magistery, maj'is-ter-e (*magister,* master). Precipitates from saline solutions were formerly so called. Other medicines, the preparation of which was kept secret. **M. of bismuth,** bismuth subnitrate.

Magistral, maj-is'tral. *Extemporaneous.* Prescription so called—*Formula magistralis* or *extemporanea*—which is prepared extemporaneously; an *officinal* prescription—*Formula officinalis*—being such as has been prepared for some time before it is prescribed.

Magistrantia, maj-is-tran'she-ah (*magister,* master). Imperatoria.

Magma, mag'mah. Thick residuum, obtained after expressing certain substances to extract the fluid parts from them; salve of certain consistence. **M. reticula'tum,** reticulated magma; the gelatiniform substance found between the chorion and amnion in the early period of embryonic existence.

Mag'nes. Magnet. **M. arsenica'lis** (sulphur, white arsenic, and common antimony, of each equal parts. Mix by fusion). Corrosive. See *Magnetic plaster.* **M. epilep'siæ,** hydrargyri sulphuretum rubrum.

Magnesia, mag-ne'ze-ah. Alkaline earth whose metallic base is magnesium. *Calcined magnesia, Oxide of magnesium.* Is inodorous; in the form of a white, light, spongy powder; s. g. 2.3, requiring 2000 times its weight of water for solution; is antacid and laxative; dose gr. x to ʒj. **M., ac'etate of,** magnesii acetas. **M. aërat'a,** magnesii carbonas. **M. alba,** M. carbonas. **M. calcinat'a,** M. usta. **M., car'bonate of,** magnesii carbonas. **M. chlo'rinated, solution of,** not caustic, and therefore, for internal use or as an application to delicate tissues, preferable to chlorinated lime or chlorinated soda. **M., ci'trate of,** magnesii citras. **M., Din'neford's,** see *Magnesia, fluid.* **M. Edinburgen'sis,** M. carbonas. **M., efferves'cing** (magnes. carb., M. sulphat., sodæ bicarbon., acid. tartaric., ää partes æquales; to be pulverized, well dried, mixed, and inclosed in bottles hermetically sealed); dose a teaspoonful in half a tumbler of water, drunk in a state of effervescence. **M., fluid,** *Liquor magnesiæ carbonatis,* preparation in Ph. Br., consisting of a solution of carbonate of magnesia in carbonated water. It is also termed *Carbonated magnesia water, Aërated magnesia water, Solution of carbonate of magnesia,* and *Condensed solution of magnesia.* **M. le'vis** (Ph. Br.), *Light magnesia;* made by calcining light carbonate of magnesia; dose gr. x to lx; see *Magnesiæ carbonas.* **M. mi'tis,** magnesiæ carbonas. **M., mu'riate of,** magnesii chloridum. **M. ni'gra,** manganese, black oxide of. **M. opali'na,** mixture of antimony, potassium nitrate, and sodium chloride; emetic. **M. pondero'sa** (Ph. U. S.), heavy magnesia; prepared like light magnesia, the heavy carbonate of magnesium being used; both have the same therapeutic action. **M. sa'lis ama'ri,** magnesia carbonas. **M. sa'lis Ebsdamen'sis,** magnesiæ carbonas. **M. Satur'ni,** antimonium. **M. and so'da, sulphate of,** see *Soda, sulphate of.* **M., solu'tion of, condensed,** M. fluid. **M., subcar'bonate of,** magnesiæ carbonas. **M., subcar'bonate of, hy'drated,** magnesiæ carbonas. **M., sul'phate of,** magnesiæ sulphas. **M., sulphocar'bolate of,** see *Sulphocarbolate.* **M. ter'ra,** magnesia. **M. us'ta,** magnesia. **M. vitriola'ta,** magnesiæ sulphas.

Magne'siæ ace'tas. *Acetate of magnesia.* This salt is prepared by saturating carbonate of magnesia with acetic acid. It is of a syrupy consistence, and about four ounces is a dose. It acts like citrate of magnesium. **M. carbo'nas** or **subcarbo'nas,** *Magnesii carbonas* (Ph. U. S.), *Carbonate of magnesium.* Is inodorous, light, white, spongy, effervescing with acids, insoluble in water; antacid and laxative. **M. ci'tras,** *Citrate of magnesia;* saline preparation formed by saturating a solution of *citric acid* with *magnesia* or its *carbonate;* dose, an ounce. Agreeable magnesic solution, mildly laxative in dose of a half pint; *L. magnesii citratis* (Ph. U. S.), *Solution of citrate of magnesium, Solution of citrate of magnesia.* **M. hypocarbo'nas,** M. carbonas. **M. subcarbo'nas,** M. carbonas. **M. sul'phas,** $MgSo_4,7H_2O$, *Magnesii sulphas* (Ph. U. S.), *Sulphas magnesiæ purificata, Sulphate of magnesia, Sulphate of magnesium, Epsom salt;* its taste is bitter and disagreeable; is purgative and diuretic; dose, as a cathartic, ʒss to ʒij. **M. sul'phis** (Ph. U. S.), sulphite of magnesium, $MgSo_3,CH_2O$, prepared by double decomposition between magnesium sulphate and neutral sodium sulphite; dose, gr. xv–xxx; it has the same properties as the other sulphites. **M. vitriol'icum,** magnesiæ sulphas.

Magnesian (mag-ne'ze-an) **lemonade'.** Magnesiæ citras.

Magnesii carbonas, mag-ne'se-e kar-bo'nas. Magnesiæ carbonas. **M. chlo'ridum,** *Chloride of Magnesium,* bitter deliquescent salt, cholagogue cathartic in the dose of half an ounce to the adult. **M. ci'tras**

granula'tus (Ph. U. S.); (made by adding together carbonate of magnesium, citric acid, bicarbonate of sodium, sugar, alcohol, and distilled water); dose, one or two teaspoonfuls as laxative or cathartic, but generally given in the officinal solution; see *Liquor magnesii citratis*. **M. sul'phas,** magnesiæ sulphas.

Magnesio-effervescens, mag-ne'ze-o ef-fur-ves'sens. Containing magnesia and being effervescent.

Magne'sio-fer'ric ci'trate. Medicinal salt of inferior value.

Magnesite, mag'ne-zite. Native magnesium carbonate.

Magnesium, mag-ne'ze-um. See *Magnesia*. **M., car'bonate of,** magnesii carbonas. **M., chlo'ride of,** magnesii chloridum. **M. ci'trate,** magnesii citras. **M., ox'ide of,** magnesia usta. **M. sal'icylate,** used in typhoid fever as antiseptic and slightly laxative. **M., sul'phate of,** magnesii sulphas.

Mag'net. The loadstone. Native ferric oxide; also name of iron possessing magnetic powers. In pharmacy it is used to purify iron filings. **M., electro-,** magnet capable of exerting magnetic force only while influenced by an electric current. **M., Gruening's,** magnet employed for the purpose of removing particles of steel from the eye.

Magne'tes. Magnet.

Magnetic, mag-net'ik. Relating to magnetism. **M. flu'id,** a name given to the imponderable fluid to which the magnet owes its virtues; see *Magnetism, animal; mesmerism*.

Magnetico-electricity, mag-net'e-co-el-ęk-tris'it-e. See *Electromagnetism*.

Magnetinus, mag-net-e'nus. Potassæ supertartras impurus.

Magnetism (mag'net-izm), **an'imal.** *Mesmerism*. Highly impressible persons can be thrown into a kind of magnetic sleep designated *hypnotism* or *mesmerism*. See *Hypnotism*.

Mag'netite. Native iron oxide possessing magnetic properties.

Magnetization, mag-net-i-za'shun. Mesmerization.

Magnetized, mag'net-iz-ed. Mesmerized.

Magnetizer, mag-net-i'zer. Mesmerizer.

Magnetograph, mag-net'o-graf (*magnes*, magnet, *grapho*, to write). Instrument for recording intensity of magnetic force.

Magneto-induction, mag-net'o-in-duk'shun. Induced current produced by surrounding magnet with a coil of wire.

Magnetometer, mag-net-om'e-tur. Instrument for determining intensity of magnetic force.

Magneto-optic, mag-net'o-op'tik. Relating to magnetism and light.

Magnetotherapy, mag-net-o-ther'a-pe. Application of magnetism to the treatment of disease, as chorea, neuralgia, or hysteria.

Magnicaudatus, mag-ne-kawd-at'us (*magnus, cauda*, tail). Long-tailed.

Magniduc'tor. Adductor femoris magnus.

Magnitis, mag-ne'tis. Magnet.

Magnitudo corporis, mag-ne-tu'do kor'po-ris (size of the body). Stature. **M. gigante'a,** see *Giant*.

Magn'oc. Jatropha manihot

Magnolia fragrans, mag-no'le-ah fra'grans. Magnolia glauca. **M. glauc'a,** *Small magnolia, Swamp sassafras, Elk bark, Indian bark, White laurel, Sweet bay, Beaver wood, Beaver tree, White bay, Castor bay, Sweet* or *Laurel magnolia*, ord. Magnoliacæ. The bark is possessed of tonic properties resembling those of cascarilla, canella, etc. The same may be said of the *Magnolia tripetala* or *Umbrella, Umbrella tree;* the *M. acuminata* or *Cucumber tree*, the *M. grandiflora* and *M. macrophylla, Laurel, Elkwood, Silverleaf, Big leaf, White bay, Beaver-tree, Elk bark, Big bloom. Magnolia* (Ph. U. S.) is the bark of *Magnolia glauca, M. acuminata*, and *M. tripetala*.

Magnolin, mag-no'lin. Active crystalline principle of Magnolia tripetala.

Magnum Dei donum, mag'num da'e do'num (great gift of God). Cinchona. **M. os** (great bone), the third bone of the lower row of the carpus, reckoning from the thumb; the largest bone of the carpus, also called *Os capitatum*.

Maguey, mah-gwe'. Agave Americana.

Mahagoni, ma-hag'o-ne. Swietenia mahogani.

Mahamurree. Pali plague.

Mahmou'dy. Convolvulus scammonia.

Mahoe. Arbutilon Indicum.

Mahogany, ma-hog'a-ne. Gymnocladus Canadensis. **M., moun'tain,** Betula lenta. **M. tree,** Swietenia mahogani.

Maho'nia aquifo'lia. Berberis aquifolium. **M. champa'ca,** Michelia champaca.

Mahu'ra. Covolam.

Maia, mi'ah. Mæeia.

Maialic acid, mi-al'ik as'id. Acid derived from Convallaria maialis.

Maialine, mi'al-een. Alkaloid, identical with convallamarin, obtained from Convallaria maialis.

Maianthemum, mi-an'the-mum (*Maius*, May, *anthemon*, flower). Convallaria maialis.

Mai'denhair. M., Amer'ican, Adiantum pedantum. **M., Can'ada,** Adiantum pedantum. **M.. com'mon,** Asplenium trichomanoïdes. **M., golden,** polytrichum. **M., white,** Asplenium ruta muraria.

Mai'denhead. Virginity.

Maid-of-the-mead'ow. Spiræa ulmaria.

Maieia, mi-i'ah. Obstetrics.

Maier's (mi'urs) **si'nus.** Occasionally existent diverticulum of lacrymal sac receiving lacrymal ducts.

Maieuma, mi-u'mah. Parturition.

Maieusis, mi-u'sis. Parturition.

Maieuter, mi-u'ter. Accoucheur.

Maieutes, mi-u'tees. Accoucheur.

Maieutica (mi-u'te-kah) **ars** (*techne*, art of midwifery). Obstetrics.

Maieutical, mi-u'te-kal. Obstetrical.

Maihem, ma'hem. Mayhem.

Mail-ratour. Decoction of leaves of this plant is used by the East Indians in dysentery.

Maim'ing. Mayhem.

Mains. Instrument used in obstetrics, consisting of two spoons without fenestræ, mounted on wooden handles, the branches united by a steel *bride*.

Mairania uva ursi, mi-ran'e-ah u'vah ur'se (*mairo*, to shine—the leaves). Arbutus uva ursi.

Maize, maze. Zea mays. **M., Jap'anese,** Zea Japonica. **M., water,** Victoria regia.

Maize'na. See *Zea mays*.

Majan'themum. Maianthemum.

Major helicis, ma'jor hel'e-sis (larger muscle of helix). Narrow band of muscular fibres situate upon the anterior border of the helix of the ear, just above the tragus.

Ma'joram. Marjoram.

Majorana, maj-o-ran'ah. Origanum majorana. **M. horten'sis,** Origanum majorana. **M. Syri'aca,** Teucrium marum.

Makiah. The small leaves of Cannabis sativa.

Makrocephalus, mak-ro-sef'al-us. Macrocephalus.

Makrocythæ'mia (*macro, kutos, haima*). State of blood characterized by preternaturally large red disks.

Makrops'ia. Apparent increase in dimensions of objects due to change in the retina.

Mal (evil, injury). Any pain or suffering; usually implies epilepsy. **M. de la Baie de Saint Paul** (disease of the Bay of Saint Paul), *Mal Anglais, Mal de chien, Mal de Chicot, Mal des éboulements, Ottoway disease*. A syphiloid affection which prevailed in Canada from 1760 to 1780 and upward **M. de Laira,** *Barking disease*, an epidemic hysteroidal affection, a form of theomania which prevailed in several convents of Germany and elsewhere in the seventeenth century. **M. de mer,** seasickness.

Ma'la (*malum*, apple). Malar bone; cheek. **M. au'rea,** see *Citrus aurantium*.

Mal'abar itch. Disease due to scabies ferox.

Malabathrinum, mal-ab-ath're-num. Ancient name of an ointment and a wine, into which *malabathrum* entered.

Malabathrum, mal-ab-ath'rum (*malabathron*). *Cad-*

eji-Iddi. Leaves of a tree of the East Indies. Are believed to be a species of laurel. *Oleum Malabathri* is obtained from it.

Malacaturon, mal-ac-at'u-ron. Tree native of the Philippines; its sap is employed in dysentery, etc.

Malaccæ radix, mal-ak'ke rad'iks (Malacca root). Sagittarium alexipharmacum.

Malache, mal'ak-e. Malva rotundifolia.

Malachite, mal'a-kite (*malache,* mallow). Native green carbonate of copper.

Malachra (mal-ak'rah) **capita'ta.** Leaves of this species are employed as an anthelmintic.

Malacia, mal-ah'se-ah (*malakos,* effeminate). Depravation of taste, in which an almost universal loathing is combined with an exclusive longing for some particular article of food. If the patient desires substances that are noxious or not eatable, it constitutes *Pica, Depraved appetite.* These symptoms accompany several nervous affections—those of females in particular. In pregnancy it is common and termed *Longing.* **M. Africano'rum,** chthonophagia. **M. amphibles'troid,** affection of the retina characterized by softening. **M. cor'dis,** softening of the heart from inflammation or as a result of lesion of the function of nutrition. **M., vas'cular,** malacia in which excessive formation of new vessels exists.

Malacismus, mal-a-siz'mus (*malakos,* soft). Mollities.

Malaco, mal'ak-o (*malakos,* soft). In composition, soft.

Malacocataracta, mal-a-ko-kat-ar-ak'tah (*malakos,* soft). Soft cataract.

Malacoder'mos or **Malacodermus,** mal-ak-o-dur'mus. Having a soft skin.

Malacogas'ter (*malaco, gaster,* stomach). Gastromalaxia.

Malacoides, mal-ak-o-e'dees. Plant of Chili; in decoction it is employed as a febrifuge.

Malacoma, mal-ak-o'mah (*malakos,* soft, suffix *oma*). Preternatural softness of an organ or part of an organ.

Malacophonus, mal-a-ko-fo'nus (*malaco, phone,* voice). Of soft voice.

Malacopœa, mal-a-ko-pe'ah (*malako, poieo,* to make). Emollients.

Malacopœ'ous, mal-ak-o-pe'us. Emollient.

Malacos, mal'ak-os. Soft.

Malacosarcosis, mal-a-ko-sar-ko'sis (*malaco, sarx,* flesh). Softness of the muscular system.

Malacosarcus, mal-ak-o-sark'us (*malakos,* soft, *sarx,* flesh). Having soft flesh.

Malacosis, mal-ak-o'sis (*malakos,* soft). Preternatural softness of an organ or part of an organ. **M. cer'ebri,** see *Mollities cerebri.* **M. cor'dis,** see *Malacia cordis.* **M. hep'atis,** softening of the liver. **M. ute'ri,** softening of the uterus.

Malacosteon, mal-ak-os'te-on (*malaco, osteon,* a bone). Mollities ossium.

Malacosteosis, mal-a-kos-te-o'sis. Mollities ossium.

Malacostomous, mal-ak-os'to-mus (*malakos,* soft, *stoma,* mouth). Possessing soft jaws devoid of teeth.

Malacotomy, mal-ak-ot'o-me (*malakos,* soft, *tome,* incision). Laparotomy.

Malactica, mal-ak'te-kah (*malakos,* soft). Emollients, relaxants.

Malacyperoa, mal-as-ip-er-o'ah (*malakos,* soft, *hyperoa,* palate). Soft palate.

Mal'ady. Disease. **M., Eng'lish,** hypochondriasis. **M. of postboys,** disease observed to occur among mounted letter-carriers, as aneurysm of the aorta.

Malæ (mal'e) **os** (*malum,* apple, from its roundness). Cheek or malar bone, situate at the lateral and superior part of the face, and constituting the zygomatic region of the cheek. It is irregularly quadrilateral. Its outer surface is convex, covered by muscles and skin, and pierced with canals, called malar, through which vessels and nerves pass. Its upper surface is concave, forming part of the orbit. Its posterior surface is concave, and enters into the composition of the temporal fossæ. This bone is thick and cellular. It is articulated with the frontal, temporal, sphenoid, and superior maxillary bones, and is developed by a single point of ossification.

Malaga, mal'ag-ah. Species of wine obtained from Malaga, Spain.

Malagma, mal-ag'mah (*malasso,* to soften). Emollient cataplasm. Every local application having the property of softening organic tissues.

Malaise, mal-aze' (*mal,* ill, *aise,* ease). Indisposition. The feelings of discomfort preceding illness.

Malambo (mal-am'bo) **bark.** Matias.

Malamide, mal'am-eed. *Asparagin.* Principle found in asparagus and the shoots of various plants.

Malanders, mal'an-derz. Malandria.

Malandria, mal-an'dre-ah. Species of lepra or elephantiasis. *Malanders* or *Mallenders,* a disease of the horse, consists of a scurfy eruption on the inside of the hock or a little below it, as well as at the bend of the knee. It is called *Mallenders* in the foreleg, and *Sallenders* in the hind leg.

Malandriosus, mal-an-dre-o'sus. *Leprous.* Affected with malandria.

Malanea (mal-an'e-ah) **verticilla'ta.** Danais rotundifolia.

Malapari or **Malaparius.** Tree found in the Moluccas; bark and root act as antidotes to some poisons.

Malapraxis, mal-ah-praks'is. Malpraxis.

Ma'lar. Belonging to the cheek, as the malar bone. **M. pro'cess,** zygomatic process.

Malare (mal-ar'e) **os.** Malæ os.

Malaria, mal-a're-ah ([I.] bad air). See *Miasm.* **M., bacil'lus of,** see *B. malariæ.*

Malarial, mal-a're-al. Relating to, or connected with, malaria. Malarious.

Malari-labia'lis. Zygomaticus major muscle.

Malarioid, mal-a're-oid (*malaria, eidos,* resemblance). Resembling malaria or its effects.

Malarious, mal-a're-us. *Malarial.* Owing to, or connected with, malaria; as malarious soil or disease.

Malaris, mal-ar'is. Muscle constituting a part of the orbicularis palpebrarum.

Malassez's disease. Cystic testicle.

Malassimilation, mal-as-sim-il-a'shun. Imperfect assimilation or nutrition.

Malate (ma'late) **of i'ron.** Preparation made from the action of acidulous ripe apples on pure iron filings.

Malaxate, mal'aks-ate (*malasso,* to soften). To soften drugs by kneading. Process is called *malaxation.*

Malaxation, mal-aks-a'shun. See *Malaxate.* **M. of the eye,** manipulation of the eyeball following sclerotomy, consisting in pressure made on the eyeball with the fingers, thus keeping the margins of the incision separated and removing part of the aqueous humor.

Malaxia ventriculi, mal-aks'e-ah ven-trick'u-le (*malasso,* to soften). Softening of the stomach.

Malaxis, mal-aks'is (softening). Preternatural softness. **M. cor'dis,** see *Cardiomalacia.* **M. hepat'ica,** accumulation of fat in secreting cells of the liver.

Malax'is odora'ta. Native plant of the E. Indies; the juice is used there medicinally.

Malay, ma-la'. See *Homo.*

Malazissatus, mal-a-zis-sat'us (*malasso,* to soften). One in whom the testicles have not descended; used also synonymously with emasculatus.

Malce, mal'ke (torpor from cold). Chilblain.

Malcious, mal'she-us. Freezing.

Malconformation, mal-kon-form-a'shun. Malformation.

Male. Of the sex that begets young. Not female. What belongs to the male sex, as the male organs of generation. **M. or'gan,** penis.

Mal'e. Axilla.

Maleate, mal'e-ate. Salt of maleic acid.

Maleficium, mal-e-fish'e-um (*malus,* bad, *facio,* to make). Poisoning.

Malformation, mal-for-ma'shun (*malus,* bad, *forma,* form). Wrong formation of, or irregularity in the structure of, parts. See *Monster.*

Malgaigne's amputa'tion. Calcaneo-astragaloid disarticulation. **M.'s fos'sa,** superior carotid trian-

gle. **M.'s hooks**, hooks for maintaining in proper apposition the fractured patella.

Malgenic, mal-jen'ik (*malum*, disease, *gennao*, to engender). Giving rise to disease.

Malia, mal'e-ah. See *Equinia*.

Maliasmus, mal-e-az'mus. See *Malis* and *Equinia*.

Malic (ma'lik) **ac'id.** Acid derived from apple; obtained from other fruits also.

Mal'ice. Althæa.

Malice (mal'is) **prepense.** Premeditated conclusion to commit crime.

Malichorium, mal-e-ko're-um. See *Punica granatum*.

Malicorium, mal-e-ko're-um (*malum*, apple, *corium*, skin). See *Punica granatum*.

Malie, mal'e-e. Equinia.

Maliform, mal'i-form. Resembling the shape of an apple.

Malign, ma-line'. Malignant.

Malignancy, mal-ig'nan-se. Condition of being malignant. The cause of malignancy is still undetermined.

Malignant, ma-lig'nant (*malus*, bad). Term applied to any disease whose symptoms are so aggravated as to threaten the destruction of the patient, as malignant scarlet fever, malignant pustule, etc. A disease of a very serious character, although it may be mild in appearance.

Malingerer, ma-lin'ger-er. A simulator of disease. See *Feigned diseases*.

Malin'gering. Simulation of disease. See *Feigned diseases*.

Ma'lis. Cutaneous vermination. Cuticle or skin infested with animalcules—phtheiriasis, parasitismus superficiei. In Persia this affection is produced by the Guinea worm; in South America by the chigre; and in Europe, occasionally, by the louse. See *Equinia* and *Phtheiriasis*. **M. ac'ari**, scabies. **M. acridophago'rum**, locust-eating. **M. America'na**, inflammation of the skin due to the presence of the chigre. **M. a crinonibus**, cutaneous affection in children, in which numerous comedones are present. **M. dracun'culus**, dracunculus. **M. a ger'dia medinen'si**, dracunculus. **M. Gor'dii**, dracunculus. **M. œst'ri**, disease produced by the presence of the larvæ of the gad-fly in the nose or external ear. In cattle the larvæ are found under the skin. **M. pedicula'ris**, phtheiriasis. **M. pedic'uli**, phtheiriasis. **M. praten'sis**, cutaneous affection due to the presence of prairie ticks. **M. pu'licis**, eruption from flea-bites. **M. Transylva'nica**, disease occurring in Transylvania, accompanied by rheumatism and discharge of worms from the region of the knees. **M. Westphalien'sis**, disease resembling scurvy, occurring in Westphalia in the 16th century, in which the joints were affected.

Malleable, mal'le-a-b'l. Capable of being beaten into thin plates.

Mallear, mal'le-ar. Relating to the malleus.

Malleation, mal-le-a'shun (*malleus*, hammer). Affection described by Morgagni and others as a form of chorea, characterized by constantly hammering with one hand on the other, or on the knee or the side. Flagellation.

Malledius, mal-la'de-us. Tensor tympani.

Malleiform, mal-le'i-form. Shaped like a hammer.

Mallein, mal'le-in. Liquid of a yellowish color obtained from sterilized and filtered culture of bacillus mallei. It has been suggested to employ this fluid as an injection in glanders for diagnostic purposes.

Mallenders, mal'len-derz. Malandria.

Malleo-incudal, mal'le-o-in'ku-dal (*malleus*, hammer, *incus*, anvil). Relating to malleus and incus of the ear.

Malleolar, mal'le-o-lar (*malleolus*). Belonging to the ankles. **M. ar'teries** are two branches furnished by the anterior tibial about the instep; the one—the internal—passes transversely behind the tendon of the tibialis anticus to be distributed in the vicinity of the malleolus internus; the external glides behind the tendons of the extensor communis digitorum pedis and the peroneus brevis, and sends its branches to the parts which surround the outer ankle, as well as to the outer region of the tarsus.

Malleolus, mal-le'o-lus (dim. of **Malleus**, mallet). Two projections formed by the bones of the leg at their inferior part. The inner belongs to the tibia, the outer to the fibula. The ankles afford attachment to ligaments, and each has a sort of gutter in which certain tendons slide. See *Malleus*.

Malleomyces, mal-le-om'is-eez (*malleus*, hammer, *muces*, fungus). Schizomycetes occurring in pus of glanders, and thought to be the etiological factor in that disease.

Mallet, mal'let. Kind of hammer used with a gouge for removing or cutting bones in surgical and anatomical operations.

Malleus, mal'le-us (mallet). Longest and outermost of the four small bones of the ear, situate at the outer part of the tympanum, and united to the membrana tympani. It has: 1. An ovoid head—caput, capitulum—which is articulated behind with the incus, and is supported by a narrow part called the neck—cervix. Anteriorly, a long apophysis, which is engaged in the glenoid fissure, and called the apophysis or process, processus gracilis of Rau. It affords attachment to the anterior or externus mallei muscle. 2. A handle—manubrium—which forms an obtuse angle with the neck, and corresponds to the membrane of the tympanum, which it seems to draw inward. It is furnished at the upper extremity with a process—the processus brevis—to which the internus mallei is attached. **M. farcimino'sus**, see *Equinia*. **M. hu'midus**, equinia. **M., slen'der pro'cess of**, processus gracilis of Rau; see *Malleus*.

Mallotus (mal-lot'us) **Philippinen'sis.** Rottlera tinctoria.

Mal'low, com'mon. Malva. **M., com'pound decoc'tion of**, decoctum malvæ compositum. **M., In'dian**, Abutilon Avicennæ. **M., wild**, Malva sylvestris. **M., yel'low**, Abutilon Avicennæ.

Malls. Rubeola.

Malmsey, mahmz'e. Sweet wine from Madeira grapes.

Malnutrition, mal-nu-trish'un. Impaired nutrition; defective process of assimilation.

Malobathrum, mal-o-bath'rum. Malabathrum.

Malogranatum, mal-o-gran-at'um (*malum*, apple, *granum*, grain, having grainlike seeds). Pomegranate; punica granatum.

Malonate, mal'on-ate. Salt of malonic acid.

Malonetia (ma-lon-e'she-ah) **nit'ida.** South American species; reputed to be contained in curare.

Maloni bapcai. Seed of Indian plant employed as an external application in scabies.

Malope malacoïdes, mal'o-pe mal-ak-o-e'deez. Mallow-wort of Barbary.

Malpighi (mal-pe'ghe) (famous anatomist of Italy), **acini of.** Corpora Malpighiana. **M., bod'ies of**, Corpora Malpighiana. **M., glom'erule of**, see *Glomerule*. **M., pyr'amids of**, see *Papillæ of the kidney*.

Malpighia mourella, mal-pe'ghe-ah mu-rel'lah (after Malpighi). Bark of this shrub, a native of Cayenne, reputed to be febrifuge and useful in diarrhœa. **M. m. crassifo'lia**, Brysonia crassifolia. **M. m. gla'bra**, Barbadoes cherry; fruit is employed as a febrifuge, and the bark as an astringent.

Malpighian (mal-pig'e-an) **bod'ies.** Corpora Malpighiana; see also *Spleen*. **M. bod'ies, inflamma'tion of**, kidney, Bright's disease of the. **M. cor'puscles**, see *Corpora Malpighiana* and *Spleen*. **M. latifo'lia**, species growing in the Antilles; its bark is very similar to simaruba bark. **M. lay'er of the skin**, rete mucosum is sometimes so called. **M. u'rens**, cowhage cherry; fruit is edible, and possesses astringent properties like the root and bark. **M. ves'icles**, see *Lung*.

Malposition, mal-po-zish'un. Faulty position of the fœtus in the pelvis. *Malpresentation* refers to the faulty presentation of the fœtus, as by the shoulder, etc.

Malpractice, mal-prak'tis. Malpraxis.

Malpraxis, mal-praks'is. Bad management or treatment; also criminal abortion.

Malpresentation, mal-prez-en-ta'shun. See *Malposition.*

Malt. Maltum (Ph. U. S.) is the seed of Hordeum distichum caused artificially to germinate; barley made to germinate for the purpose of forming beer. It has been recommended in medicine as antiscorbutic, antiscrofulous, etc. **M. ex'tract,** made from an infusion with water at 165° F., draining and evaporating. Genuine extract contains the soluble ingredients of malt and the bitter of the hop. Employed in irritable forms of indigestion. **M. liq'uors,** alcoholic beverages prepared from malt, as beer, ale, and porter. **M. spir'it,** spirit distilled from malt.

Maltese (mal'tees) **cross.** Surgical dressing or compress made in form of a Maltese cross.

Mal'tha (*malatto,* to soften). Wax, particularly soft wax; also mixture of asphalt with petroleum.

Malthacodes, mal-thak-o'deez (*malthakos,* soft, *eidos,* resemblance). Emollient.

Malthacticus, mal-thak'te-kus. Emollient.

Malthaxis, mal-thaks'is. Mollities.

Mal'the. Maltha.

Mal'ti extrac'tum. Malt extract.

Maltine, mal-teen'. Diastase.

Maltobiose, malt-o-bi'oze. Maltose.

Maltodextrin, malt-o-deks'trin. Carbohydrate produced when starch is converted into maltose.

Maltose, mal'toze. Sugar, result of action of diastase on fecula of barley.

Mal'tum. Malt.

Malt'zey. Leprosy.

Ma'lum (*malus,* bad). Disease. Melum (apple); see *Pyrus malus.* **M. Ægypti'acum,** diphtheria. **M. Aleppen'se,** Bouton d'Aleppo. **M. articulo'rum,** gout. **M. cadu'cum,** epilepsy. **M. cadu'cum pulmo'num,** asthma. **M. ca'num,** see *Pyrus cydonia.* **M. Coen'se,** Averrhoa carambola. **M. coto'neum,** see *Pyrus cydonia.* **M. Cotun'nii,** neuralgia femoro-poplitæa. **M. hypochondri'acum,** hypochondriasis. **M. hyster'icum,** hysteria. **M. insan'um,** see *Solanum melongena.* **M. ischiad'icum,** neuralgia femoro-poplitæa. **M. laz'ari,** elephantiasis. **M. lycoper'sicum,** Solanum lycopersicum. **M. mi'nus,** see *Epilepsy.* **M. mor'tuum,** species of lepra in which the affected portions of skin seem to be struck with death. See *Pemphigus.* **M. per'forans pe'dis,** mycetoma. **M. pila're,** trichosis. **M. Pot'tii,** see *Pott's disease.* **M. prima'rium,** idiopathia. **M. re'gimen,** malpraxis. **M. Rust'ii,** disease of a tubercular character affecting the superior cervical vertebræ. **M. sclerot'icæ seni'le,** scleritis occurring in old people. **M. seni'le arteria'rum,** arteritis deformans due to old age. **M. seni'le articulo'rum,** arthritis deformans. **M. spino'sum,** Datura stramonium. **M. terres'tre,** Atropa mandragora. **M. vene'reum,** syphilis. **M. vertebra'le poste'rius,** necrosis affecting the spines of the vertebræ.

Ma'lus (apple tree). Pyrus malus. **M. auran'tia ma'jor,** Citrus aurantium. **M. commu'nis,** Pyrus malus. **M. dasyphyl'la,** Pyrus malus. **M. In'dica,** *Bilumbi biting-bing* of Bontius, ord. Rosaceæ. Juice of this is cooling, and is drunk as a cure for fevers; leaves, boiled and made into a cataplasm with rice, are famed in all sorts of tumors; juice, mixed with arrack, is drunk for the cure of diarrhœa. **M. limo'nia ac'ida,** see *Citrus medica.* **M. med'ica,** see *Citrus medica.* **M. sylves'tris,** Pyrus malus.

Mal'va (*malakos,* soft). *Malva sylvestris, Common Mallow,* ord. Malvaceæ. Leaves and flowers are chiefly used in fomentations, cataplasms, and emollient enemata; demulcent. *M. rotundifolia* has like virtues. **M. al'cea,** Alcea rosea, hollyhock, mallow; emollient. **M. angustifo'lia,** Mexican species; leaves and roots are emollient. **M. anseri'na,** M. rotundifolia. **M. arbo'rea,** Althæa rosea. **M. balsam'ica,** species of Southern Africa, where it is employed as an emollient. **M. commu'nis,** M. sylvestris. **M. ma'jor,** Alcea rosea. **M. moscha'ta,** see *Musk.* **M. o'pium,** an opium from India. **M. scopa'ria,** species growing in Peru; root is employed in diarrhœa.

Malvavis'cum (*malva, viscum,* bird-lime). Althæa.

Ma'ma pi'an. *Mother yaw;* ulcer of a bad aspect, which is the commencement of the pian, and which, after having destroyed the flesh, extends to the bones.

Mam'bi. Substance used in Peru to add to coca-leaves.

Mam'ei. From incisions made in the branches of this West Indian tree a copious discharge of pellucid liquor occurs, which is called *Momin* or *Toddy wine;* is diuretic, and esteemed to be a good antilithic. See *Mammea Americana.*

Mamelon. Nipple.

Mameluco, mam-e-lu'ko. In Brazil the hybrid between the white and Indian.

Mamilla, mam-il'lah (dim. of **Mamma**). See *Mamma.*

Mamil'læ arachnid'iæ. Papillæ renales.

Mamillaplasty, mam-il'ah-plas-te. Operation for the purpose of restoring a depressed nipple.

Mamilla'ria Lewin'i. Species furnishing muscale buttons; contains an exceedingly poisonous alkaloid called anhaloine. **M. sim'plex,** this plant is used as an emollient in external applications.

Mamillary, mam'il-la-re. Mammillary.

Mamillate (mam'il-ate) or **Mam'illated.** Resembling a mamma in shape.

Mamillifor'mis. Nipple-shaped.

Mamilloid, mam'il-loid (*mamilla,* nipple, *eidos,* resemblance). Resembling a nipple in shape.

Mam'ma (*mamma,* one of the earliest cries of the infant, ascribed to a desire for food). *Female breast* (*Mamilla* being the male breast). Glandular organ proper to *mammalia* intended for the secretion of milk. The mammæ exist in both sexes, but they acquire a much greater size in the female, especially during pregnancy and lactation. In women, at the central part of each breast, the skin suddenly changes color and assumes a rosy tint. It is of a reddish-brown in women who have suckled several children. This circle has a rugous appearance, owing to the presence of sebaceous glands, and is called *Areola* or *Aureola.* These glands—*Tubercles of the Areola*—furnish an unctuous fluid for defending the nipple from the action of the mouth of the suckling infant, and, according to some, milk. In the midst of the aureola is the nipple, a rosy conoidal erectile eminence, and at the surface of which the galactophorous ducts open. The breasts plus the space between are called the *bosom, sinus, colpus.* At times these terms are restricted to the space between the breasts. Mamma also means a nurse. In the animal the mamma is called the *Udder.* **M. aber'rans,** supernumerary mammary gland. **M. errat'ica,** supernumerary mammary gland possessing the true glandular character, situated in an abnormal position. **M., suspen'sory lig'ament of,** see *Suspensory.* **M., uterine,** cotyledon of the placenta.

Mam'mæ accesso'riæ. Glands situated on various parts of the body which secrete milk.

Mammæform, mam'me-form. Mammiform.

Mam'mal. Mammiferous animal (from *mamma*). An animal that suckles its young.

Mammalgia, mam-mal'je-ah (*mamma, algos,* pain). Neuralgia of the breast.

Mamma'lia. Division of vertebrata that suckle their young, including man. See *Vertebrata.*

Mam'mary. Relating to the breasts. **M. ab'scess,** mastodynia apostematosa. **M. are'ola,** zone around the nipple, of pink color in virgins and blondes; of darker and brown color in mothers and brunettes. **M. ar'teries** are three in number: 1. The *Internal mammary, Arteria sternalis, Internal thoracic.* It arises from the subclavian, and descends obliquely inward, from its origin to the cartilage of the third rib. Below the diaphragm it divides into two branches, one external, the other internal. From its origin until its bifurcation it gives branches to the muscles and glands of the neck, to the thymus, mediastinum, pericardium, and œsophagus. In each intercostal space it gives off *internal* and *external musculo-cutaneous* branches, and also on each side the *superior diaphragmatic.* Its two ultimate branches are distributed on the parietes of the

abdomen, and anastomose with the external mammary, intercostal, lumbar, circumflexa ilii, and epigastric arteries. 2. The *External mammary arteries* are two in number, superior and inferior. The *Superior external mammary, Superior thoracic,* is furnished by the axillary artery. It descends obliquely forward between the pectoralis major and pectoralis minor, to which it is distributed by a considerable number of branches. The *Inferior external mammary, Long* or *Inferior thoracic,* arises from the axillary artery, a little below the preceding; descends vertically over the lateral part of the thorax; curves afterward inward; becomes subcutaneous and divides into a number of branches, which surround the breast; gives branches to the pectoralis major, serratus major anticus, the intercostal muscles, the glands of the axilla, and the integuments of the breast. **M. gland** is the secretory organ of the milk; is situate in the substance of the breast, to which it gives shape. The tissue of this gland results from the assemblage of lobes of different size, united intimately by areolar tissue. Each is composed of several lobules, formed of round granulations, of a rosy white color, and the size of a poppy-seed. The glandular grains give rise to the radicles of the excretory canals of the mamma, which are called *galactophorous* or *lactiferous;* see *Lactiferous vessels.* These excretory vessels unite in ramusculi, rami, and in trunks of greater or less size; collect toward the centre of the gland; are tortuous, very extensible, and semi-transparent. All terminate in sinuses situate near the base of the nipple, which are commonly from 15 to 18 in number. These sinuses are very short, conical, and united by areolar tissue. From their summits a fasciculus of new ducts sets out, which occupy the centre of the nipple, and open separately at its surface. The arteries of the mammary gland come from the thoracic, axillary, intercostal, and internal mammary. The veins accompany the arteries; the nerves are furnished by the intercostals and brachial plexus; the lymphatic vessels are very numerous, and form two layers. They communicate with those of the thorax, and pass into the axillary ganglions.

The following measurements have recently been made of the mammary glands and their component parts (Vierordt):

Weight of both breasts, 222 g. (E. Bischoff); volume, 223 cm. (Raciborski).

Greatest length (along margin of pectoralis major)	128
Vertical height	111
Thickness (in a sagittal direction)	54
Sinus lactiferi	5–7 in diameter.
Ductus "	1.7–2.3
Mouth of ducts	0.6 wide.
Acini	0.12 (0.08–0.16).

M. phthi'sis, see *Phthisis.* **M. re'gion,** thoracic region containing mamma. **M. sarco'ma,** tumor of the color and texture of the mammary gland; dense and whitish; sometimes softer and brownish; often producing, on extirpation, a malignant ulcer with indurated edges; found in various parts of the body and limbs. **M. veins** follow the same course as the arteries, and have received the same denominations. The *internal mammary vein* of the right side opens into the superior cava; that of the left into the corresponding subclavian vein. The *external mammary veins* open into the axillary vein.

Mammate, mam'mate. Possessing breasts.

Mammea (mam'me-ah) **Africa'na.** Tree of Africa; fruit is edible. **M. America'na,** ord. Guttiferæ. Systematic name of the tree on which the mammee fruit grows. The fruit has a delightful flavor when ripe, and is much cultivated in Jamaica. **M. Asiat'ica,** Barringtonia speciosa.

Mammeata, mam-me-at'ah (*mamma*). One who has large breasts.

Mammella, mam-mel'ah (dim. of **Mamma**). Nipple.

Mammifer, mam'me-fer (*mamma, fero,* to bear). Mammal.

Mammiferous (mam-mif'er-us) **an'imal.** Mammal.

Mam'miform (*mamma, forma,* form). Mastoid.

Mammilla, mam-mil'lah (dim. of **Mamma**). Mamma (male), nipple; small prominence; papilla.

Mammillæ, mam-mil'le. See *Kidney.* **M. medulla're,** see *Mammillary.*

Mammilla'ria. Tuber cinereum.

Mammilla'ris (*mammilla*). Mastoid.

Mammillary, mam'mil-la-re (*mammilla*). Having the shape of a nipple. See *Mastoid.* **M. em'inence,** name given—1. To more or less marked prominences on the inner surface of the bones of the cranium, which correspond to the anfractuosities of the cranium. 2. To white, round, medullary tubercules, of the size of a pea, situate at the base of the brain, behind the gray substance from which the infundibulum of the brain arises. These *Mammillary tubercles, Corpora albicantia,* are united to each other by a small grayish band corresponding with the third ventricle. They receive the anterior prolongations of the fornix. Older anatomists, taking the nervous trunks, to which Willis first gave the name *olfactory nerves,* for simple appendages of the brain, called them, on account of their shape, *Carunculæ mammillares.* Vesalius, Fallopius, Columbus, and several others termed them *Processus mammillares cerebri ad nares.* They have also been called *Trigona olfactoria.* **M. pro'cesses,** tubercles which project backward from each of the superior articular processes of the lumbar vertebræ; see *Mammillary eminence* and *Mastoid process.*

Mammillated, mam'mil-la-ted. That which has mammiform projections on its surface. **M. liv'er,** cirrhosis.

Mammillation, mam-mil-la'shun. Granulation of some mucous membranes, as of the stomach. If in excess in the latter, it may be pathognomonic of polypus of the stomach.

Mammitis, mam-me'tis (*mamma, itis*). Inflammation of the mamma; mastitis.

Mammose, mam'mose. Mammate.

Mammula, mam'mu-lah (dim. of **Mamma**). Small breast.

Man. The chief and most perfect of the mammalia; in Greek, anthropos (*ana,* upward, *trepo,* to turn), because he alone, of all animals, possesses the natural power of standing erect. He is the only animal whose incisor teeth, wedged in a projecting jaw, are absolutely vertical. Man is especially distinguished from other mammalia by the faculty he possesses of classing his ideas and comparing them with each other, and connecting, representing, and transmitting them by signs and articulate sounds. He possesses in the highest degree the attributes of intelligence—memory, judgment, and imagination. Differences in figure, color, stature, etc. have caused naturalists to divide mankind into a number of races or varieties.

The following estimates have been made of the proportions of a man of medium size (Schadow):

Total length of a man	166.5 cm.
Length of arms expanded	
Distance between nipples	
Clavicular bones	
Both knees close together	21
Half the width of shoulder	
Length of neck	
Height of foot	8
From external to internal malleolus, front	
Length of upper arm (front)	34
" " " (on the side)	
Length of elbow	
Breadth below ribs *en face*	26
Length of foot (*profile*)	
Breadth of both calves *en face*	
" of shoulder-blade to breast (on the side)	24
" from glutæus to genital region	
Length of hand	
From sacral vertebra to umbilicus (on the side)	18.5
Calves above (on the side)	
Breadth of foot	10.5

A few dimensions may be added, after Krause:

	Men.	Women.
Height of sternal region	19 cm.	18 cm.
Height from scrobiculus cordis to umbilicus	18	18
Height from umbilicus to mons Veneris	14	16

	Men.	Women.
Circumference of abdomen around iliac regions	70 cm.	73 cm.
Circumference of abdomen around crest of ilium	81	84
Circumference of the upper arm	28	26
" of forearm at upper end	27	24
" of forearm at lower end	19	18
Breadth of carpus	6	5
Circumference of carpus	18	16
Breadth between trochanters	34	35
Circumference of thigh at upper end	51	49
" " in the middle	47	41
" " at lower end	35	32
Circumference of knee	34	32
" " leg below the knee	31	28
" " the calf	37	34
Length of foot (from the heel to the toes)	26	23

Dimensions and weight of the bones of the skeleton (fresh skeleton of a man aged 42) (Krause and Dursy):

	Men (cm.).	Women (cm.).	Weight of bone (g.).
Entire skeleton—height	162–172	151–162	*9814
Height of head (posteriorly)	14	13	†1115
Vertical length of vertebral column	70	68	‡1556
Length of sternum	18	16	80
" " clavicle	14.2	13.6	41
" " scapula (base)	16	14	134
Breadth of scapula (above)	12	10	
Length of acromion	6	5	
" " humerus	32	30	308
" " ulna	26	23	99
" " radius	24	22	90
" " hand	20	18	126
Height of os innominatum	22	19	⁋958
Breadth of crest of the ilium	28	30	
Length of femur	55	43	940
" " patella	4	4	39
" " tibia	39	34	530
" " fibula	37	33	78
" " foot	24	22	325

* Including teeth, intervertebral cartilages, and costal cartilages.
† Including teeth.
‡ Including intervertebral cartilages.
⁋ Whole pelvis (without sacrum).

Weight of vertebræ (fresh skeleton) (Dursy):

		Heaviest.	Lightest.
7 cervical vertebræ	144 g.	7th (28)	3d (16)
12 thoracic vertebræ	623 .	11th and 12th (81)	2d and 3d (34)
5 sacral vertebræ	526	3d (112)	5th (100)
Average,	54		

Dry skeleton (Bardeleben):

		Heaviest.	Lightest.
7 cervical vertebræ	52.2 g.	7th (9.9)	1st (5.7)
12 thoracic vertebræ	176.2	12th (21.4)	3d (10.7)
5 sacral vertebræ	154.1	3d (33)	1st (26.4)
Average,	16.8		

Manaca, man'a-kah. Root of Franciscea uniflora; vegetable mercury; antisyphilitic; purgative.

Manakin, man'a-kin (dim. of **Man**). Fantom.

Manchineel, man-chin-eel' ([S.] *mangana*, apple). Hippomane mancinella.

Mancurana, man-ku-ran'ah. Origanum.

Mancus, man'kus. Lame.

Mandarin, man'dar-rin. Mandarin orange.

Mandible, man'di-b'l (*mando*, to chew). Maxillary bone.

Mandibula, man-dib'u-lah (*mando*, to chew). Maxillary bone.

Mandibular, man-dib'u-lar. Pertaining to inferior maxilla. **M. angle**, angle formed by ramus of inferior maxilla in its relation to plane of body of the bone. **M. arch**, arch formed by tympanic plate of temporal bone and the inferior maxilla. **M. plate**, two osseous embryonic structures ultimately forming the lower jaw. **M. tu'bercle and dim'ple**, tubercle and spot occasionally located on cheek from two to four centimetres behind the angle of the mouth.

Mandibularis musculus, man-dib-u-lar'is mus'kulus. Masseter.

Mandibulate, man-dib'u-late. Possessing mandibles.

Mandib'ulo-condyl'ial tri'angle. Triangle with base between the condylia and the apex at the symphysion.

Mandib'ulo-cor'onial tri'angle. Triangle with base between the two coronia and apex at symphysion.

Mandib'ulo-fa'cial in'dex, M.-in'frafacial in'dex, or M.-su'prafacial in'dex. Indices determined by vertical projection measurements of lower jaw compared with facial.

Mandib'ulo-gon'ial tri'angle. One having base between the two gonia and apex at symphysion.

Mandib'ulum. Inferior maxillary bone.

Mandioc (man'de-ok) or **Mandio'ca.** Jatropha manihot.

Man'do (*mando*, to chew). Glutton.

Mandragora, man-drag'o-rah (*mandragoras*). Atropa mandragora. **M. acau'lis**, Atropa mandragora. **M. officina'lis**, Atropa mandragora. **M. verna'lis**, Atropa mandragora.

Mandragorites, man-drag-o-re'tees (*mandragorites, mandragora*). Wine in which the roots of mandrake have been infused.

Mandrake, man'drake. Atropa mandragora, Podophyllum peltatum, P. montanum. **M., Amer'ican**, Podophyllum peltatum, **M., ex'tract of**, extractum podophylli. **M., fe'male**, Mandragora vernalis. **M., male**, Mandragora autumnalis. **M., medic'inal**, Mandragora officinalis.

Mandrin, man'drin. The wire used to give rigidity to a flexible catheter during introduction.

Manducation, man-du-ka'shun (*manduco*, to chew). Mastication.

Manducatorius (man-du-kat-o're-us) **mus'culus.** Masseter.

Manducatory, man'du-ka-to-re (*manducatio*, mastication). Appertaining to mastication. **M. nerve**, see *Trigemini*.

Manec's paste. See *Paste*. **M.'s opera'tion**, operation for ligation of the innominate artery.

Manettia, mah-net'te-ah. Genus of the Cinchoneæ. **M. cordifo'lia, M. glab'ra**, root of this species possesses emetic properties. **M. lanceola'ta**, Ophiorrhiza lanceolata.

Manganate, man'gan-ate. Chemical salt, product of action of manganic acid and a base.

Manganese, mang'gan-eez. Metal pretty abundant in nature in an oxidized state. It is of a grayish-white color, hard and brittle, and destitute of magnetic properties. Specific gravity about 8. It is given internally in its salts or other compounds; albuminate, saccharate, peptonate, and dextrinate of m. have been recently introduced as tonics, in chlorosis particularly. **M. ar'senate**, arseniate of manganese; prepared by saturating solution of arsenic acid with freshly precipitated manganese carbonate. **M., black ox'ide of**, *Dioxide of manganese*, is used in preparing chlorine gas. **M., i'odide of**, this salt is prescribed, in pill and syrup, in the anæmia attendant on scrofula, phthisis, cancer, etc. **M. monox'ide**, MnO, substance of a light-green color. **M., salts of**, see *Manganese, sulphate of*. **M. sesquiox'ide**, Mn_2O_3, substance of a black or dark-brown color when in the hydrated state. **M., sul'phate of**, *Manganesii sulphas;* rose-colored soluble salt, isomorphous with magnesium sulphate; recommended as a cholagogue in doses of a drachm or two. *Salts of manganese* have been prescribed in chlorosis and amenorrhœa, and as substitutes for chalybeates generally. The subcarbonate and the oxide have been chiefly employed. **M., tetrox'ide of**, M., black oxide of.

Manganesic (man-gan-e'sik) **acid.** Name of acid derived from manganese.

Manganesii binoxidum, man-gan-e'se-e bin-oks'id-um. Manganese, black oxide of. **M. ox'idum ni'grum**, manganese, black oxide of. **M. perox'idum ni'grum nati'vum**, manganese, black oxide of. **M. protox'idi sul'phas**, manganese, sulphate of. **M. sul'phas**, manganese, sulphate of.

Manganesium, man-gan-e'se-um. Manganese. **M. ochra'ceum ni'grum**, manganese, black oxide of. **M. oxyda'tum nati'vum** or **ni'grum**, manganese, black

oxide of. **M. vitrario'rum**, manganese, black oxide of.

Manganeutes, man-gan-u'tees. Quack.

Manganeuticos, man-gan-u'tik-os. Relating to quackery.

Man'gani ox'idum ni'grum (Ph. U. S.). Black oxide or dioxide of manganese; tonic and alterative; used in syphilis, chlorosis, prurigo, scabies, pyrosis. **M. oxo'des nati'va**, manganese, black oxide of. **M. sul'phas** (Ph. U. S.), $MnSO_4$, made by heating native black oxide with concentrated sulphuric acid; cholagogue, cathartic, like sodium sulphate.

Mangania, man-gan'e-ah. Quackery.

Manganic acid, man-gan'ik as'id. See *Potassii permanganas.*

Manganicum superoxidum, man-gan'ik-um super-oks'id-um. Manganese, black oxide of.

Manganite, man'gan-ite. Manganesii oxidum nigrum.

Manganium, man-gan'e-um. Manganese.

Manganization, man-gan-i-za'shun. Adulteration.

Manganja, man-gan'yah. See *Arrow-poison.*

Mangano-ammonic, man'gan-o-am-mon'ik. Manganous and containing ammonium.

Manganon, man'gan-on. Philter.

Mangano-potassic, man'gan-o-pot-as'ik. Manganous and containing potassium.

Manganosum, man-gan-o'sum. Form of manganese contained in manganous compounds.

Man'ganous. Chemical term for manganese oxide.

Manganum, man'ga-num. Manganese. **M. oxyda'tum nati'vum**, manganese, black oxide of.

Mange, mainje. Itch of animals, technically scabies ferina. **M., Tex'as**, prairie itch.

Mangif'era (*mango*, fruit, *fero*, to bear) **fœ'tida.** Horse-mango; native of Cochin China and the Moluccas; fruit can be eaten. **M. Indica** or **domest'ica**, *Mango tree*, ord. Terebinthaceæ. Tree cultivated over Asia and South America. Mangos when ripe are juicy, of a good flavor, and so fragrant as to perfume the air to a considerable distance; are eaten either raw or preserved with sugar. From the expressed juice a wine is prepared; and the remainder of the kernel can be reduced to an excellent flour for bread. Also fruit of Garcinia mangostana. **M. pinna'ta**, Spondias mangifera. **M. racemo'sa**, Holigarna longifolia.

Man'go tree. Mangifera Indica.

Mangonisatio, man-go-ne-zah'she-o (*manganon*, deception). Falsification.

Mangonium, man-go'ne-um. Falsification.

Mangostan, man-go-stan'. Garcinia mangostana.

Mangostana, man-go-stah'na. Garcinia mangostana. **M. cambo'gia**, Garcinia cambogia. **M. Garcin'ia**, Garcinia mangostana.

Mangoustan (man-gu-stan') or **Mangosteen**, man-go-steen'. Garcinia mangostana.

Mangrove (man'grove), **black.** Avicennia nitida. **M., white**, Avicennia tomentosa.

Man'hood. Adult age.

Mania, ma'ne-ah (*mainomai*, to be furious). *Raving* or *Furious madness.* Disorder of the intellect in which there is erroneous judgment or hallucination, which impels to acts of fury; acute mental excitement; fury or frenzy. If the raving be not directed to a single object, it is mania properly so called; if to one object, it constitutes *monomania*, a term, however, usually given to melancholy. Mania attacks adults chiefly, women more frequently than men; prognosis is unfavorable. Separation is one of the most effective means of treatment, with attention to the corporeal condition and everything that can add to the mental comfort and turn thoughts away from the subjects of delusion. **M., acute**, see *Mania.* **M., alcohol'ic**, delirium tremens. **M., ambit'ious**, delirium grandiosum. **M., chron'ic delu'sional**, monomania, delusional. **M. contaminatio'nis**, mysophobia. **M. crapulosa**, dipsomania. **M., dan'cing**, *Dancing plague;* form of convulsion which has appeared, at various times, epidemically under the form of St. Vitus's dance, St. John's dance, tarantism, hysteria, Tigretier (in Abyssynia), and diseased sympathy, and which has been fully described by Hecker in his "Epidemics of the Middle Ages." See *Convulsionnaire.* **M. despon'dens**, mania characterized by depression. **M., ephem'eral**, mania of a transitory character. **M. epilep'tica**, see *Epilepsy.* **M., epilep'toid**, mania with symptoms resembling epilepsy. **M. erot'ica**, erotomania. **M. fix'a**, chronic mania. **M. furio'sa**, furious mania. **M. gra'vis**, mania of an acute and delirious character. **M. hallucinato'ria**, form observed after acute diseases, parturition, fevers, acute alcoholism, wasting diseases, etc. **M., homici'dal**, mania characterized by marked homicidal tendency. **M., hyster'ical**, M. with tendency to hysterical attacks, or the usual symptoms of hysteria. **M., incen'diary**, pyromania. **M., intellect'ual**, monomania. **M. intermit'tens**, mania periodical in character. **M. lac'tea**, mania, puerperal. **M., lead**, mania due to plumbism. **M. melancholi'ca**, melancholy. **M. mi'tis**, delirium. **M., mor'phine**, morphinomania. **M. a pathe'mate**, ungovernable passion; fixed delusion. **M. pel'lagra**, pellagra. **M. of persecu'tion**, mania persecutoria. **M. postmenstrua'lis**, mania of a maniacal character occurring after menstruation. **M. potato'rum**, delirium tremens. **M. a po'tû**, delirium tremens. **M. præmenstrua'lis**, mania of a maniacal character preceding menstruation. **M., puer'peral**, *Puerperal insanity;* mania which supervenes in the childbed state, usually within a week or ten days after delivery. Pathological lesions observed after death are not constant. The brain is generally almost exsanguious. **M. puerpera'rum acu'ta**, M., puerperal. **M. si'ne delir'io**, insanity unaccompanied with delirium; pathomania. **M. sub'ita**, mania of a transitory character. **M. sylves'tris**, melancholy. **M. a temulen'tiâ**, delirium tremens. **M., traumat'ic**, insanity due to traumatism.

Maniac, ma'ne-ak. Maniacal. One affected with mania. **M., period'ical**, one who is subject to recurring maniacal attacks.

Maniacal, man-i'a-kal. Maniac. **M. fury**, see *Mania.*

Maniacus, man-e'ak-us. Maniac.

Manica Hippocratis, man'e-kah hip-pok'rat-is (sleeve of Hippocrates). Conical flannel bag for straining liquid.

Manicocomium (man-e-ko-ko-me'um) or **Maniaco'mium** (*manikos, komeo*, to take care of). Lunatic asylum.

Manicula, man-ik'u-lah. Attack of mania in a mild degree.

Man'icure. One who beautifies the hand; also name of process of treatment.

Manicus, man'ik-us (*manikos*). Maniac.

Maniform, man'i-form. Resembling the shape of a hand.

Manigraphy, man-ig'raf-e (*mania, grapho*, to write). Description of mental diseases. Psychiatry.

Maniguetta, man-e-gwet'tah. Amomum grana paradisi.

Manihot (man'e-hot) **utilis'sima.** Jatropha manihot.

Manihotoxine, man-e-hot-oks'een. Exceedingly poisonous product derived from roots of Manihot utilissima.

Maniibar. Jatropha manihot.

Manikin, man'e-kin (dim. of **Man**). Fantom. Anatomical model, made of suitable material, for instruction.

Maniluvium, man-e-lu've-um (*manus, lavo*, to wash). Bath for the hands.

Manimetrum, man-e-met'rum (*manus*, hand, *metron*, measure). Cheirometer.

Man-in-the-ground. Convolvulus panduratus.

Manioc, man'e-ok. Jatropha manihot.

Maniodes, man-e-o'dees (*mania, odes*). A maniac; maniacal.

Maniopœus, man-e-o-pe'us (*mania, poieo*, to make). Giving rise to mania.

Maniplus, man'e-plus. A handful.

Manipulation, man-ip-u-la'shun (*manus*). Mode of

working. Term is applied to the manual examination and treatment of parts, as in parturition. **M., con'joined,** external manipulation or pressure in labor practised in conjunction with internal exploration or pressure.

Manipulus, man-ip'u-lus (*manus, pleo,* to fill). Handful; quantity of a substance capable of filling the hand. See *Fasciculus.*

Manistupration, man-e-stu-pra'shun. See *Man.*

Man-midwife, man-mid'wife. Accoucheur.

Manna, man'nah. Concrete saccharine exudation of Fraxinus ornus. See *Fraxinus.* **M., Brian'çon,** see *Pinus larix.* **M. briganti'na,** see *Pinus larix.* **M. Calabri'na,** see *Fraxinus ornus.* **M. croup,** semolina. **M., Hebrew,** Alhagi Maurorum. **M. larice'a,** see *Pinus larix.* **M. metallo'rum,** hydrargyri submurias. **M. tree,** Fraxinus ornus.

Mann-fruit. Root of Cyperus esculentus.

Mannikin, man'ne-kin. Fantom.

Mannin, man'nin. See *Fraxinus ornus.*

Mannioc, man'e-ok. Jatropha manihot.

Manniparous, man-nip'ar-us. Yielding manna.

Mannite, man'nite. See *Fraxinus ornus.*

Mannitic acid, man-nit'ik as'id. Acid, formula of which is $C_6H_{12}O_7$.

Mannitol, man'nit-ol. Mannite.

Mannitose, man'ne-toze. Chemical compound, formula of which is $C_6H_{12}O_6$.

Mannose, man'noze. Mannitose.

Man-of-the-earth. Convolvulus panduratus.

Manometer, man-om'et-ur. Instrument for determining blood-pressure or the tension of a vapor.

Manora, man-o'rah. Jasminum sambac.

Manoscope, man'o-skope (*manos,* thin, *skopeo,* to examine). Manometer.

Mansana arborea, man-san'ah ar-bo're-ah. See *Jujube.*

Mans'ford's plates. See *Galvanism.*

Man'slaughter. Involuntary or unpremeditated homicide.

Mansorius, man-so're-us (*mando,* to chew). Buccinator.

Manstupration, man-stu-pra'shun (*manus,* hand, *stupro,* to ravish). Masturbation.

Mantele, man-te'le (napkin). Bandage (body).

Mantia, man-te'ah. In English, *mancy,* a common suffix, from *manteia,* divination.

Mantile, man-te'le (napkin). Bandage (body).

Man'tle (*mantelum,* cloak). Panniculus carnosus. Also, at an early period of fœtal development, that portion of the cerebral hemisphere-vesicle forming the expanded or covering portion of the hemisphere.

Manual-exercise (man'u-al-eks'er-size) **bone.** See *Drill-bone.*

Manubrium, man-u'bre-um (*manus*). Handle of anything, as *manubrium mallei,* handle of the malleus. A kind of handle composed of two movable laminæ of horn, shell, or ivory united only at the extremity which holds the blade of the instrument, as in the common bleeding-lancet. **M. ma'nûs,** radius. **M. ster'ni,** uppermost broad part of the sternum; see *Sternum.*

Manuluvium, man-u-lu've-um (*manus,* hand, *lavo,* to wash). Hand-bath.

Ma'nus. Hand; part which terminates the upper extremity in man. It extends from the fold of the wrist to the extremity of the fingers; is divided into three parts—*carpus* or wrist, *metacarpus,* and *fingers.* The concave surface is called the *palm,* convex surface the *back.* The facility of being able to oppose the thumb to the fingers in order to seize objects forms one of the distinctive characters of the human hand. **M. cur'ta,** see *Kyllosis.* **M. he'patis,** see *Liver.* **M. je'coris,** see *Liver.* **M. par'va majo'ri adju'trix,** see *Digitus.* **M. va'ra,** talipomanus.

Manustupration, man-u-stu-pra'shun. Masturbation.

Manustuprator, man-u-stu-pra'tor. Masturbator.

Manyplies, man'e-plize (many plies or folds). Omasum.

Manz, glands of. Inconstant glands found at the border of the eyelids.

Manzani'ta. Leaves of Arctostaphylos glauca, of California; action like that of Uva ursi.

Maple, ma'p'l. Acer saccharinum. **M., ash-leaved,** Negundo aceroides. **M., great'er,** sycamore. **M., ground,** Heuchera cortusa. **M., red,** Acer rubrum. **M., rock,** Acer saccharinum. **M., striped,** Acer Pennsylvanicum. **M., su'gar,** Acer saccharinum; see *Saccharum acernum.* **M., Virgin'ia,** Acer rubrum.

Mappa (map'pah) **ven'tris.** Omentum.

Maprounea (map-ru'ne-ah) **Brasilien'sis.** Shrub, species of the Cratoneæ; native of Brazil, where a decoction of the root is used for enemas.

Maran'da. Tree, native of Ceylon; decoction of leaves is used in syphilis.

Maransis, mar-an'sis (*maransis*). Atrophy.

Maranta, mar-an'tah (after Maranta, a Venetian physician). Arrow root. **M. arundina'cea,** arrow root. **M. galan'ga,** ord. Zingiberaceæ; the *smaller galangal.* Two kinds of galangal are mentioned in the pharmacopœias: the *greater,* obtained from *Kæmpferia galanga,* and the *smaller,* from the root of *Maranta galanga.* The dried root is brought from China in pieces from one to two inches in length, but scarcely half as thick; branched; full of knots and joints, with several circular rings; of a reddish-brown color on the outside and brownish within. Was formerly much used as a warm stomachic bitter, and generally ordered in bitter infusions.

Marantic, ma-ran'tik (*maransis,* atrophy). Pertaining to atrophy, malnutrition, or marasmus. **M. thrombo'sis,** thrombosis of cerebral sinuses ocurring primarily in conditions of profound exhaustion and atrophy.

Maraschino, mar-as-ke'no. See *Spirit.*

Marasmat'ic. Marasmic.

Marasmic, mar-az'mik. Relating to marasmus; affected with marasmus.

Marasmius, mar-az'me-us. Genus of Agarics. **M. oveades,** champignon, edible fungus.

Marasmoid, mar-az'moid. Resembling or suffering with marasmus.

Marasmopyra, mar-as-mop'ir-ah (*marasmus, pur,* fever). Fever of emaciation in general; hectic fever.

Marasmous, mar-az'mus. Marasmic.

Marasmus, mar-az'mus (*marasmos*). Atrophy. **M. climacter'icus,** loss of weight and strength occurring in the aged. **M. inanito'rum,** marasmus due to excessive discharges, as of blood. **M. infanti'le,** marasmus occurring in infants, due to enfeebled constitution or lack of proper nourishment. **M. lactan'tium,** atrophy of young children; tabes mesenterica. **M. phthi'sis,** phthisis pulmonalis. **M. præmatu'rus,** marasmus due to diseased condition. **M. seni'lis,** progressive atrophy of the aged. **M. seni'lis cor'neæ,** arcus senilis. **M. syphilit'icus,** marasmus due to syphilis. **M. ta'bes,** tabes. **M. ta'bes dorsa'lis,** tabes dorsalis. **M. ta'bes purulen'ta,** marasmus caused by pus being absorbed. **M. ta'bes strumo'sa,** tuberculosis affecting the glands of the mesentery. **M. venena'ta,** marasmus due to poisoning of system with lead, etc.

Marasquino, mar-as-ke'no. See *Spirit.*

Marathrites, mar-ah-thre'tees (*marathron,* fennel). Wine impregnated with fennel.

Marathrophyllum, mar-ah-thro-fil'lum (*marathrum, phullon,* leaf). Peucedanum.

Marathrum, mar'ah-thrum (*marathron*). Anethum. **M. sylves'tre,** peucedanum.

Maraugia, mar-awj'e-ah (*maraugeo,* to dazzle). See *Metamorphopsia.*

Marble, mar'b'l. Marmor.

Marcasita, mar-kas-e'tah. Bismuth. **M. al'ba,** bismuth subnitrate. **M. plum'bea,** antimonium.

Marcasitæ magisterium, mar-kas-e'te maj-is-te're-um. Bismuth subnitrate.

Marcasite, mar-kas'ite. Bismuth.

Marcescent. mar-ses'sent. Shrivelled.

Marcgravia umbellata, mark-grah've-ah um-bel-lah'tah. South American and West Indian shrub, used in syphilis in those countries.

Marchantia polymorpha, mar-shon'te-ah pol-e-

mor'fah (after Marchant, a Parisian botanist). Liverwort, ord. Hepaticæ. This plant is mildly purgent and bitter, is recommended as aperient, resolvent, and antiscorbutic, and is used in diseased liver, etc.

Marcor, mar'kor (*marceo*, to wither). Emaciation; marasmus.

Marcores, mar-ko'rees (*marceo*, to wither). Atrophy; emaciation.

Marcory, mar'ko-re. Stillingia.

Mar'ea. Mountain sickness and mountain fever; puna.

Maremmatic, mar-em-mat'ik. Relating to Maremme; a name referring in particular to certain very malarious regions of Italy.

Mare's fat. Inula dysenterica. **M.'s tail,** Hippuris vulgaris.

Margarate, mar'gar-ate. Salt of margaric acid.

Margaretizza, mar-gar-et-iz'zah. Scherlievo.

Margaric acid, mar-gar'ik as'id. Acid produced from fat, having formula $C_{17}H_{34}O_2$.

Margarin, mar'ga-rin (*margaron*, pearl). A substitute for butter. See *Fat.*

Margarinic acid, mar-gar-in'ik as'id. Margaric acid.

Margarita, mar-gar-e'tah (*margarites*). Pearl.

Margaritaceous, mar-ga-re-ta'shus (*margarita*, pearl, mother-of-pearl). Resembling mother-of-pearl, as *Leucoma margaritaceum*, pearl-like leucoma.

Margaroid (mar'ga-roid) **tu'mor** (*margaron*, pearl). A form of cholesteatoma or pearl-like tumor.

Margaron, mar'gar-on. Pearl.

Mar'garyl. Chemical radical composed of margarin and stearin.

Margelis, mar-jel'is. Pearl.

Margellium, mar-jel'le-um. Pearl.

Marginate, mar'jin-ate. Having a margin.

Marginoplasty, mar'jin-o-plast-e (*margo*, margin, *plasso*, to mould). Formation of a border. **M., pal'pebral,** plastic operation in trichiasis.

Mar'go. Margin, border. **M. acu'tus,** see *Liver.* **M. denta'tus,** see *Retina.* **M. obtu'sus,** see *Liver.* **M. orbita'lis,** see *Orbit.*

Margosa (mar-go'sah) **tree.** See *Melia azedarach.*

Mar'gosin. Crystalline principle of azedarach.

Marie's disease. Acromegaly.

Marignia (mar-in'ye-ah) **acutifo'lia.** Black dammar.

Marigold (mar'e-gold), **diamond fig.** Mesembryanthemum crystallinum. **M., gar'den,** Calendula officinalis. **M., marsh,** Caltha palustris. **M., single,** Calendula officinalis. **M., wild,** Calendula arvensis.

Marine asthma, ma-reen asth'ma. Beri-beri.

Mariotte', experiment of. Celebrated experiment of the Abbé Mariotte, which consists in placing two small round spots on a wall at some distance from each other, standing opposite the left-hand object, and looking at it with the right eye, the left being closed. By walking backward until the distance from the object is about five times as great as the distance between the two, the latter will be found to disappear.

Mariotte's law. Law that volume of gases is inversely as the pressure. **M's. spot,** the blind spot in the retina.

Ma'ris. Ancient name of a measure containing 83 pints and 4 ounces.

Marisca, mar-is'kah (large fig). Ficus hæmorrhois.

Mariscous, mar-isk'us. Resembling hemorrhoids.

Marjolin (mar'jo-lin), **wa'tery ul'cer of.** See *Watery tumor of cicatrices.*

Marjoram (mar'jo-ram), **common.** Origanum. **M., sweet,** Origanum majorana. **M., wild,** Origanum.

Marjora'na. Majorana.

Mark, birth (*nævus*), **M., moth'er's, M. port wine, M., straw'berry, M., wine.** Nævus flammeus.

Marmalade, mar'ma-lade. Marmelade.

Marmalet, mar'ma-let. Marmelade.

Marmaros, mar'ma-ros (*marmarizo*, to shine). Marmor.

Marmaryga, mar-mar'e-gah (*marmairo*, to shine). Sparks or bright spots before the eyes.

Marmar'yge (*marmaruge*, splendor.) Appearance of sparks or coruscations before the eyes. See *Metamorphopsia.*

Marmarygodes, mar-mar-e-go'dees (*marmaruge*, splendor). Epithet, joined particularly to the word ophthalmos, to indicate a brilliant eye, a flashing eye. An eye which transmits the sense of imaginary objects. See *Metamorphopsia.*

Marmelade, mar'me-lade. Parts of quinces or other fruits confected with sugar and reduced to a pultaceous consistence. **M. of a'pricots,** marmelade prepared with two parts of ripe apricots deprived of their stones and one part of white sugar. **M. of Fer'nel,** M. of Tronchin. **M. of Tron'chin** or of **Fer'nel,** kind of thick looch, of agreeable taste, prepared with two ounces of *oil of sweet almonds*, as much *syrup of violets*, *manna* in tears, very fresh *pulp of cassia*, sixteen grains of *gum tragacanth*, and two drachms of *orange-flower water;* used as a laxative, demulcent, and pectoral.

Marmelata, mar-me-lat'ah. Marmelade.

Mar'mor (*marmairo*, to shine). *Marble.* White granular carbonate of calcium (Ph. U. S.). Used in pharmacy for the preparation of pure lime and the disengagement of carbonic acid.

Marmorate, mar'mo-rate. Marbled.

Marmorata aurium, mar-mo-rat'ah aur'e-um. Cerumen.

Marmoryge, mar-mor'e-ge (splendor). See *Metamorphopsia.* **M. Hippoc'ratis,** hemiopia.

Marriable, mar're-a-b'l. Nubile.

Marriageable, mar'rij-a-b'l. Nubile.

Mar'row. *Medulla.* Oily, inflammable, whitish or yellowish juice which fills the medullary canal of the long bones, the cancellated structure at the extremities of those bones, the diploë of flat bones, and the interior of short bones. Marrow is furnished by the medullary membrane, is fluid during life, and appears under the form of small points or brilliant grains after death. It is enveloped in the medullary membrane. **M., spi'nal,** medulla spinalis. **M., ver'tebral,** medulla spinalis.

Marrubiin, mar-ru'be-in. Bitter extractive of marrubium.

Marrubium, mar-ru'be-um. *Hoarhound, Horehound,* ord. Labiatæ. The leaves and tops are officinal (Ph. U. S.). Leaves have a moderately strong, aromatic smell, and a very bitter, penetrating, diffusive, and durable taste. It has been given in coughs and asthmas as a pectoral; Leonurus cardiaca. **M. al'bum,** marrubium. **M. German'icum,** marrubium. **M. ni'grum,** Ballota fœtida. **M. vulga're,** marrubium.

Mars (god of war). Ferrum. **M. solu'bilis,** ferrum tartarizatum.

Marsala, mar-sah'lah. Italian wine; contains about 18 per cent. of alcohol.

Marsdenia (marz-den'e-ah) **erec'ta.** Shrub of Eastern Europe and Asia Minor; the juice of the plant is an external vesicant, and poisonous internally. **M. tincto'ria,** East Indian species yielding indigo.

Marsh. Marshy districts give off emanations which are the fruitful source of disease and the cause of great insalubrity in many countries. The chief disease occasioned is intermittent fever. Hence it becomes important to drain such regions. Some marshy countries are not so liable to phthisis pulmonalis, and it has been found that where intermittents have been gotten rid of by draining, consumption has at times become frequent. The most unhealthy periods for residence in a marshy district are during the summer and autumnal heats, at which times the water becomes evaporated, and the marshy bottom is more or less exposed to the sun's rays. **M. gas,** hydrogen, carburetted; methyl hydride. **M. poi'son,** miasm (marsh). **M. root,** Statice Caroliniana. **M. rose'mary,** root of Statice Caroliniana; astringent. **M. tea,** Ledum palustre.

Marshmal'low. Althæa. **M. flowers,** flores althææ.

Marsh'all Hall's meth'od. Ready method. See *Drowning, resuscitation from.*

Marsh'all's vesti'gial fold. Fold of pericardium containing remnant of left superior vena cava.

Marsh's test. Qualitative test for arsenic; extremely delicate, and used in medico-legal investigations; action of sulphuric acid and zinc in a flask containing the suspected matter; if arsenic is present arseniuretted hydrogen will be formed, and make its escape with the nascent hydrogen, and form its characteristic impress on a porcelain plate held in front of the flame.

Marsh'wort. Helosciadium nodiflorum.

Marsh'y. Relating to a marsh or malarial neighborhood.

Marsipium, mar-sip'e-um (*marsipion*). Marsupion.

Mar'sum (*vinum*). Ancient wine of Marsia in Italy, which was used as an astringent in certain diseases of the mouth.

Marsu'pia (pl. of **Marsupium**) **patella'ria.** Alar ligaments of the knee,

Marsupial, mar-su'pe-al. See *Marsupion.*

Marsupialian, mar-su-pe-al'e-an. Marsupial.

Marsupialis, mar-su-pe-al'is. Ischiotrochanterianus; obturator internus.

Marsupiate, mar-su'pe-ate. See *Marsupion.*

Marsupion, mar-su'pe-on (*marsupion,* small sac or pouch). Sac or bag, with which any part is fomented. Also abdominal pouch in the kangaroo, opossum, etc., into which the young, born at a very early stage of development, are received and nourished with milk secreted from glands which open into the pouches. Such animals are termed *Marsupial, Marsupiate, Marsupialia.* See *Generation.* **M. cerebel'li,** posterior transverse fissure of the brain. **M. cer'ebri ante'rius,** anterior transverse fissure of the brain. **M. cer'ebri poste'rius,** posterior transverse fissure of the brain.

Marsupium, mar-su'pe-um. Marsupion; scrotum. **M. musculo'sum,** dartos.

Marsypion, mar-sip'e-on. Marsupion.

Martial, mar'shal (*Mars*). Chalybeate.

Martialis, mar-she-al'is. Chalybeate.

Mar'tin's opera'tion. Postero-anterior colporrhaphy with circular amputation of cervix uteri.

Mar'tis limatu'ra. Ferri limatura.

Martyn'ia angulo'sa. Herb, species of Martyniaceæ; has emollient properties.

Marum cortusi, mar'um kor-tu'se. Teucrium marum. **M. cre'ticum,** Teucrium marum. **M. Syri'acum,** Teucrium marum. **M. ve'rum,** Teucrium marum. **M. vulga're,** Thymus mastichina.

Maruta (mar-ru'tah) **cot'ula.** Anthemis cotula.

Mar'vel of Peru. Mirabilis jalapa.

Mas. Male; modiolus.

Mascarpio, mas-kar'pe-o (*mas,* male, *carpo,* to enjoy). Masturbator.

Maschaladenitis, mas-kal-ad-en-e'tis (*maschale,* axilla, *adenitis,* inflammation of a gland). Inflammation of the glands of the axilla.

Maschale, mas'kal-e. Axilla.

Maschaliæus, mas-kal-e-e'us. Axillary.

Maschaliatria, mas-kal-e-at-re'ah (*maschale,* axilla, *iatreia,* healing). Treatment of disease by applications made to the axilla.

Maschalis, mas-kal'is. Axilla.

Maschalister, mas-kal-is'ter. Axis.

Maschaloncus, mas-kal-on'kus (*maschale, onkos,* tumor). Tumor; bubo or swelling in the axilla.

Maschalopanus, mas-kal-o-pan'us (*maschale, panus,* tumor). Maschaloncus.

Maschalyperidrosis, mas-kal-ip-er-id-ro'sis (*maschale,* axilla, *huper,* excess, *hidrosis,* sweating). Excessive sweating of axilla.

Maschi. Virulent poison of British Guiana, made of the rootstalks of Arum venenatum.

Mascula, mas'ku-lah (imitating the male). Tribas.

Mas'culine. Of the male sex.

Masculus, mas'ku-lus (dim. of **Mas,** male). Male.

Masesis, mas-a'sis. Mastication.

Mase'ter. Masseter.

Mashua (S.). Tuberous root, of a flat, pyramidal shape, which is cultivated and cooked like the potato by the Serranos of Peru. The Indians use it as a medicine in dropsy, dyspepsia, and dysentery.

Mask. Bandage applied over the face in cases of burns, scalds, or erysipelas. **M., u'terine,** chloasma uterinum.

Masked, mask'd. Disguised, as a masked fever or one which is not clearly developed.

Masochism, mas'o-kizm (from Sacher Masoch, a writer on this subject). Sexual perversion, in which a member of one sex takes delight in being dominated, even to the extent of violence or cruelty, by one of the other sex.

Mass (*masso,* to knead). Compound from which pills are formed. **M., blue,** massa hydrargyri. **M., interme'diate cell,** mass of blastema forming mesonephros. **M. of interrup'tion,** corpora striata and thalami optici. **M., invest'ing,** tissue mass in embryo embracing part of notochord; later it forms the parachordal cartilages. **M., Vallet's,** massa ferri carbonatis.

Massa, mas'sah. Mass. **M. car'nea Jaco'bi Syl'vii,** see *Flexor longus digitorum pedis profundus perforans.* **M. copai'bæ** (Ph. U. S.), mass of copaiba (copaiba, ℥ij; magnesia, recently prepared, gr. lvj); to be made into pills, each of which will contain five grains of copaiba. **M. de dac'tylis,** paste, date. **M. explemen'ti,** cortical brain substance. **M. de extrac'to glycyrrhi'zæ,** pasta glycyrrhizæ gummata et anisata. **M. fer'ri carbona'tis,** mass of carbonate of iron; Vallet's mass (ferri sulph., ℥iij; sodii carbonat., ℥viij, gr. cccl; mel despumat., ℥iij; sacchar., ℥ij; syrup., aquæ destillat., āā q. s.). Vallet's mass is given as a hæmatic tonic in chlorosis and anæmia. Dose, gr. iij-v, in pill. **M. de gum'mi Arab'ico,** paste, marshmallow. **M. hydrar'gyri,** mass of mercury; blue mass (mercury, ℥v, gr. cxxij; glycyrrhiza, gr. cccl; althæa, ℥iv; glycerin, f ℥iij; honey of rose, f ℥ivss, to make ℥xvj). The officinal pill—blue pill—is three grains; each pill contains one grain of mercury; sialagogue, alterative, purgative. **M. ligamento'sa,** ligamentum calcaneo-astragaloideum interosseum. **M. de zizypho'rum fruc'tû,** paste of jujubes.

Mas'sæ (pl. of **Massa**) **os'sis sac'ri.** Lateral sacral masses.

Massage, mas-sazh' (*masso,* to knead). Shampooing.

Massema, mas-sa'mah. Mastication.

Massesis, mas-sa'sis. Mastication.

Masseter, mas-se'ter (*massomai,* to chew). *Maseter.* Muscle situated at the posterior part of the cheek, and lying upon the ramus of the lower jaw-bone; long, quadrilateral, and attached, above, to the inferior edge and inner surface of the zygomatic arch; below, it terminates at the angle of the jaw and outer surface and inferior margin of the ramus of that bone. It is composed of an intermixture of fleshy and aponeurotic fibres. It raises the lower jaw and acts in mastication. **M. inter'nus,** pterygoideus internus.

Masseteric, mas-se-ter'ik. Relating to the masseter muscle. **M. ar'tery** arises from the trunk of the internal maxillary or temporalis profunda posterior, and is distributed to the masseter muscle, after having passed, horizontally, through the sigmoid notch of the lower jaw-bone. **M. fas'cia,** continuation of the cervical fascia over the masseter muscle. **M. nerve** is given off from the inferior maxillary branch of the fifth pair. It passes through the sigmoid notch, and is distributed on the inner surface of the masseter. In luxation of the lower jaw this nerve is strongly stretched, and considerable pain, consequently, produced. **M. vein** has the same distribution as the artery; it opens into the internal maxillary vein.

Masseterine, mas'se-ter-een. Masseteric.

Masseterinus, mas-se-ter-e'nus. Masseteric.

Masseur (Fr.). Male individual who practises massage.

Masseuse (Fr.). Female practising massage.

Massicot, mas'se-kot. Plumbi oxidum semivitreum.

Massing, mas'sing (*masso,* to knead). Shampooing.

Massoia (mas-so'e-ah) **aromat'ica.** Species from

which massoy-bark is obtained, which has stomachic virtues.

Massotherapeutics, mas-so-ther-ah-pu'tiks (*masso,* to rub, *therapeuo,* to treat). Employment of massage for therapeutic purposes.

Massotherapy, mas-so-ther'ah-pe. Massage; massotherapeutics.

Massula, mas'su-lah (dim. of **Massa**). Molecule.

Mastaden, mas-tad'en (*mastos,* *aden,* gland). Mammary gland.

Mastadenitis, mas-tad-en-e'tis (*mastaden*). Inflammation of the mammary gland.

Mastalgia, mas-tal'je-ah (*mastos, algos,* pain). Pain in the breast.

Mastatrophia, mas-tat-rof'e-ah. Atrophy of mammary gland.

Mastauxe, mast-awks'e (*mastos,* breast, *auxe,* growth). Inflammation or distension of the breast.

Mastax, mas'taks. Mystax.

Masteccliymosis, mast-ek-ke-mo'sis (*mastos, ec, chumos,* juice). Mammary ecchymosis.

Mastema, mas-ta'mah. Masticatory.

Mas'ter of the woods. Galium circæzans.

Masterwort, mas'ter-wort. Angelica atropurpurea, Heracleum lanatum, imperatoria.

Mastesis, mast-a'sis. Mastication.

Masthelcosis (mast-hel-ko'sis) or **Mastelco'sis** (*mastos, helkos,* an ulcer). Ulceration of mammary gland or of the breast.

Mas'thos. Mamma.

Mas'tic. See *Pistacia lentiscus.*

Mastication, mas-te-ka'shun. Chewing. Action of bruising food in the mouth to prepare it for digestion in the stomach.

Masticatory, mas'te-ka-to-re. Chewing. Relating to mastication; also a substance chewed with the intention of exciting the secretion of saliva. **M. nerve,** see *Trigemini.* **M. spasm of the face,** trismus.

Mastich, mas'tik. See *Pistacia lentiscus.* **M. herb, common,** Thymus mastichina. **M. herb, Syrian,** Teucrium marum. **M. tree,** Pistacia lentiscus.

Mastiche, mas'te-ke (Ph. U. S. and Br.). Concrete resinous exudation from Pistacia lentiscus. See *Pistacia lentiscus.*

Mastichelæon, mas-te-kel-e'on (*mastich, elaion,* oil). See *Pistacia lentiscus.*

Mastichic acid, mas-tik'ic as'id. Acid having formula of $C_{20}H_{32}O_2$.

Mastichina gallorum, mas-te-ke'nah gal-lo'rum. Thymus lentiscus.

Masticin, mas'te-kin. Resin obtained from mastich, insoluble in alcohol.

Mas'ticol. See *Massicol.*

Masticus, mas'te-kus. Belonging to the mammary glands.

Mastigodes hominis, mas-te-go'dees hom'in-is. Trichocephalus.

Mastigoph'ora. Flagellata.

Mastigophorous, mas-te-gof'or-us (*mastix,* whip, *phoreo,* to bear). Having flagella.

Mastigopod, mas-tig'op-od (*mastix,* whip, *pous,* foot). Protozoa having flagella.

Mastigosis, mas-te-go'sis (*mastigoo,* to whip). *Flagellation.* Employed by the ancients as a remedy in many diseases. The *Flagellation* or *Scourging mania* was a form of theomania which prevailed in Europe in the 13th and 14th centuries. They who were affected with it were termed *Flagellants.*

Mastitis, mas-te'tis. Inflammation of the breast. Inflammation of the mammary gland of the pregnant or parturient female is vulgarly called a *weid* or *weed* and a *weed in the breast.* **M. adolescen'tium,** mastitis which may exist at time of puberty, observed in both sexes. **M. apostemato'sa,** abcess of the breast. **M. carcinomento'sa,** cancer of mamma. **M., chron'ic lob'ular intersti'tial,** interstitial inflammation of a chronic nature involving part of mammary gland. **M., circumscribed intersti'tial,** interstitial inflammation of mammary gland confined in extent. **M., cuta'neous phleg'monous,** inflammation involving areola of mamma. **M., diffuse intersti'tial,** interstitial inflammation of mamma involving entire gland. **M., gum'matous,** affection of a syphilitic character involving substance proper of mamma. **M. lactan'tium,** mastitis occurring during lactation. **M. metastat'ica,** metastatic mastitis occurring in mumps or puerperal fever. **M., parenchy'matous,** inflammation of the glandular element of the breast. **M., pe'tro-mam'mary,** mastitis, submammary. **M. puerpera'lis,** inflammation of the mamma in the childbed woman. **M., scrof'ulous,** mastitis, tubercular. **M. sep'tica,** mastitis due to bacteria in the gland. **M., submam'mary,** inflammation of submammary connective tissue. **M., supramam'mary,** inflammation of subcutaneous or supramammary connective tissue.

Mastix, mas'tiks (after *mastich*). See *Pistacia lentiscus.*

Masto (*mastos*). Prefix relating to the breast.

Mastocarcinoma, mas-to-kar-sin-o'mah (*masto, carcinoma*). Carcinoma of the breast.

Mastochondrosis, mas-to-kon-dro'sis (*mastos, chondros,* a cartilage). Cartilaginous formation in the breast.

Mastodealgia, mas-to-de-al'je-ah (*mastodes,* resembling a breast, *algos,* pain). Pain in the mastoid process.

Mastodeocentesis (mas-to-de-o-sen-te'sis) or **Mastodeoparacente'sis** (*mastodes,* resembling a breast, *kentesis,* puncture). See *Mastoideocentesis.*

Mastodes, mas-to'dees. Mastoid.

Mastodynia, mas-to-din'e-ah (*mastos, odune,* pain). Pain in the breasts; a form of neuralgia. See *Neuralgia mammæ.* Abscess of the breast; mammary abcess. Phlegmonous inflammation of the breast, running on to suppuration, generally in the childbed female. **M. polyg'ala,** extreme distension of the breast, as with milk.

Mas'toid (*mastoeides*) (*mastos, eidos,* resemblance). Having the form of a nipple. Relating to mastoid process. **M. an'gle,** postero-inferior angle of parietal bone. **M. an'trum,** name given to M. cells. **M. ap'erture,** opening of communication between the cavity of the tympanum and the mastoid cells. **M. ar'tery,** posterior branch of the external carotid. **M. canalic'ulus,** canal leading from jugular fossa to Glasserian fissure, transmitting auricular branch of pneumogastric nerve. **M. can'cer,** firm carcinomatous growth, the section of which resembles the boiled udder of the cow. **M. cav'ity,** cavity occasionally found, and supposed to be the result of coalescence of mastoid cells. **M. cells,** *Mastoid sinuses,* are situated in the mastoid process, communicate with each other, and open into the cavity of the tympanum. **M. diam'eter,** term applied to superior and inferior mastoidal measurements made from bone to bone; the latter is known as the bimastoid diameter. **M. em'issary vein,** venous channel connecting either posterior auricular or occipital vein with the lateral sinus through the mastoid foramen. **M. fora'men** is behind the mastoid process, and gives passage to a small artery of the dura mater and a vein which opens into the lateral sinus. **M. fos'sa** is a depression at the inner surface of the mastoid portion of the temporal bone, which forms part of the lateral sinus. **M. glands,** lymphatic glands behind the ear. **M.** or **Digas'tric groove,** groove at the inner side of the mastoid process, giving attachment to the posterior belly of the digastric muscle. **M. mar'gin,** name given to portion of occipital bone articulating with mastoid process of the temporal bone. **M. mus'cle, poste'rior,** splenius. **M. pro'cess** is at the inferior and posterior part of the temporal bone, and gives attachment to the digastric and mastoid muscles; it is the distinct prominence felt superficially behind each ear.

Mastoidal (mas-toid'al) or **Mastoid'eal.** Relating to mastoid process.

Mastoidealalgia, mas-toi-de-al-al'je-ah. Pain in mastoid portion of the temporal bone.

Mastoid'ean. Relating to the mastoid process.

Mastoideocentesis, mas-toi-de-o-sen-ta'sis (*kentesis,*

a puncture). Puncture of mastoidal sinuses, as for relief of retained morbid fluids.

Mastoïdes, mas-to-e'dees. Mastoid; having form of a nipple.

Mastoïdeum, mas-to-e'de-um. Mastoid bone.

Mastoïdeus, mas-to-e'de-us. Sternocleidomastoïdeus. **M. latera'lis,** complexus minor.

Mastïoditis, mas-to-id-e'tis. Mastoid inflammation.

Mastïodoconchalis, mas-to-id-o-kon-kal'is (*mastodes,* resembling a breast, *concha,* shell). Retrahens aurem.

Mastology, mas-tol'o-je (*mastos,* breast, *logos,* doctrine). Treatise relating to the breast or mammary gland.

Mastomenia, mas-to-men'e-ah (*mens,* month). Vicarious menstruation from the mamma.

Mastoncus, mas-ton'kus (*mastos, onkos,* tumor). Tumefaction of the nipple or of the breast itself. When of an adipous character it is termed *Mastopioncus* or *Mastopimeloncus.* **M. polygalac'ticus,** mastospargosis.

Masto-occipital, mas'to-ok-sip'i-t'l (*mastos, occiput*). Relating to mastoid process and occiput.

Mastoparectama, mas-to-par-ek'tah-mah (*mastos, parektama,* excessive distension). Immoderate distension of the mammæ.

Mastoparietal, mas-to-par-i'et'l. Relating to mastoid process and parietal bone.

Mastopathic, mas-to-path'ik. Relating to mastopathy.

Mastopathy, mas-top'ath-e (*mastos, pathos,* disease). Disease of the breast.

Mastopimeloncus, mas-to-pim-e-lon'kus (*mastos, pimele,* fat, *onkos,* tumor). Fatty tumor of the breast. See *Mastoncus.*

Mastopioncus, mas-to-pe-on'kus (*mastos, pion,* fat, *onkos,* tumor). Fatty tumor of the breast. See *Mastoncus.*

Mastorrhagia, mas-tor-rhaj'e-ah (*mastos, rhegnumi,* to break forth). Unusual flow of milk.

Mas'tos. Mamma.

Mastoscirrhus, mas-to-skir'rhus (*mastos, skirros,* hard tumor). Scirrhus of the breast.

Mastoscrophulosis, mas-to-skrof-u-lo'sis. Scrofulosis of mammary gland.

Mastosis, mas-to'sis. Mammary enlargement.

Mastospargosis, mas-to-spar-go'sis (*mastos, spargao,* to be full to bursting). Fulness of the breasts with milk.

Mastosyrinx, mas-to-sir'inks (*mastos, surinx,* a pipe). Fistula of the mamma.

Mastupration, mas-tu-pra'shun. Masturbation.

Masturbation, mas-tur-ba'shun (*manus,* hand, *stupro,* to ravish). Self-abuse. Excitement of the genital organs by the hand.

Masturbator, mas'tur-ba-tor. One given to masturbation.

Masturbatory, mas'tur-ba-to-re. Relating to masturbation.

Mastus, mast'us. Mamma; possessing large breasts.

Match'maker's disease. See *Phosphorus.*

Ma'te. See *Ilex Paraguayensis.*

Mate'ba. African palm; fruits are employed in febrile attacks and dysentery.

Mateco, mat-e'ko. Matico.

Mateine, mat-e'een. Caffeine obtained from leaves of Ilex Paraguayensis.

Matella, mat-tel'lah. Urinal.

Mater (*mater,* mother). Uterus. **M. du'ra,** dura mater. **M. herba'rum,** Artemisia vulgaris. **M. metallo'rum,** hydrargyrum. **M. mol'lis,** pia mater. **M. seca'lis,** ergot. **M. ten'uis,** pia mater.

Materia, ma-te're-ah (*mater,* mother [?]). Matter. **M. alimenta'ria,** see *Aliment.* **M. chirur'gica,** aggregate of agents employed by the surgeon, with the means of administering them and the rationale of their employment. **M. fibro'sa,** fibrin. **M. med'ica,** branch of medical science which treats of drugs, preparations thereof, and respective doses, and the physiological phenomena produced by them in the human economy. This is the most intrinsically valuable subdivision of medicine. (For a classification of the various articles of the materia medica see *Drugs.*) **M. med'ica, dynam'ical,** division of pharmacology considering the effects and uses of medicines; pharmacodynamics. **M. morbo'sa,** matter which is the cause of disease. **M. os'sea,** bony or earthy portion of bones; cement of a tooth. **M. pec'cans,** materies morbi. **M. perspirato'ria,** sweat. **M. saliva'ris,** ptyalin. **M. scytodeps'ica,** tannin. **M. siali'na,** see *Saliva.* **M. testa'cea den'tium,** see *Tooth.* **M. urino'sa,** urea.

Mate'rial. Matter. **M., form'ative,** protoplasm.

Mate'rialism. Spiritualism.

Materialista, ma-te-re-al-is'tah (*materia*). Druggist.

Materies, mat-e're-ees. Matter. **M. mor'bi,** matter which is the cause of disease.

Maternal, ma-ter'nal. Pertaining to the mother. **M. impres'sions,** impressions which in pregnant females are supposed to influence development and growth of the fœtus.

Maternity, ma-ter'ne-te (*maternus,* maternal). An establishment for the reception of pregnant women.

Matias, mat-e'as. Bark of South American tree, used in its native country in intermittents and as a tonic. Its principal constituent is a bitter resin. It is probably the same as the Malambo bark; the latter has been referred to *Croton Malambo.*

Maticin, mat-e'sin. See *Matico.*

Matico, mat-e'co. *Mateco, Matica, Soldier's tea* or *herb;* South American herb, ord. Piperaceæ. Tonic, stimulant, diuretic, and astringent; used both internally and externally. It is given in infusion made of one ounce of the leaves—*Matico* (Ph. U. S.), the leaves of Artanthe elongata—to a pint of boiling water. An active principle, *maticin,* has been derived from it.

Matlazahuatl. Disease similar to the plague, occurring in epidemic form among the natives of Mexico in the sixteenth century.

Matonia cardamomum, mat-o'ne-ah kar-dam-o'-mum. Amomum cardamomum.

Matorium, mat-o're-um. Ammoniac, gum.

Matourea (mat-oo're-ah) **Guianen'sis.** Species of Guiana, genus Scrophulaceæ, employed in leucorrhœa. **M. praten'sis,** species growing in Guiana, where it is employed as a vulnerary, internally and externally.

Matracium, mat-ras'e-um. Matrass; urinal.

Matrass, mat'ras. Glass vessel with a long neck and a round and sometimes oval body; used in pharmacy for distillation, digestion, etc.

Matres cerebri, mat'rees ser'e-bre. Meninges.

Matrhæmato'ma. Hæmatoma of the cerebral meninges.

Matricalia, mat-re-kal'e-ah. Remedies for disease of the uterus.

Matricalis, mat-re-kal'is. Relating to the uterus.

Matricaria, mat-re-kar'e-ah (Ph. U. S.) (*matrix,* womb, from its reputed virtues in affections of that organ). M. chamomilla, ord. Compositæ. The flowers resemble in their properties chamomile and tansy, and have been esteemed tonic, stomachic, emmenagogue, vermifuge, etc. See *Matricaria chamomilla.* **M. chamomil'la,** German chamomile; the flowers, *Matricaria* (Ph. U. S.), resemble matricaria in properties. **M. glabra'ta,** S. African plant, having the same properties as the other species of matricaria. **M. ino'dora,** Chrysanthemum inodorum. **M. leucan'themum,** Chrysanthemum leucanthemum. **M. multif'ida,** species found in S. of Africa, where it is used in skin diseases and rheumatism. **M. parthenoï'des,** plant closely resembling Chrysanthemum parthenium. **M. suave'olens,** M. chamomilla.

Matriculate, ma-trik'u-late (*matricula,* diminutive of **Matrix**). Roll, originally an army roll or register. One admitted into a university or college by enrolling or having his name enrolled. In this country it is only necessary to matriculate at the commencement of each session. One who has thus enrolled himself in an institution is called a *Matriculate.*

Matricyte, mat'ri-site (*mater,* mother, *kutos,* cell). Term applied to colorless blood-corpuscle of large

size which acts as mother-cell for small white corpuscles.

Matrisylva, mat-re-sil'vah (*mater*, mother, *sylva*, wood). Asperula odorata.

Matrix, mat'riks (from *mater*, mother, uterus). Blastema, cytoblastema, stomach, uterus. **M. of bone,** osseia. **M of hy'aline car'tilage,** substance of a granular character containing cells, and, when subjected to boiling, yielding chondrin. **M. pi'li,** hair papilla. **M. of a tooth,** substance of a tooth containing lime salts. **M. un'guis,** see *Nail.*

Matrona, mat-ro'nah (*mater*, mother). Midwife.

Matronalis, mat-ro-nal'is. Viola.

Mat'ted. Term applied to parts adherent or tangled, and due to inflammatory process.

Mat'tee. See *Ilex Paraguensis.*

Mat'ter. Any substance which enters into the composition of a body; pus. *To matter* is to suppurate or discharge pus or matter. **M., extrac'tive,** see *Extractive.* **M., fæcal,** see *Fæces.* **M., form'ative,** protoplasm.

Mat'ting of parts. Matting or growing together of organic parts.

Mat'toid (Ital. *mattoide*, like a madman). On the doubtful line between sanity and insanity; a crank.

Matula, mat'u-lah. Urinal.

Maturant, mat'u-rant. Making ripe; said of applications made to hasten maturation.

Maturate, mat'u-rate. Literally, to come to a head; applied to an abscess when suppuration occurs.

Maturation, mat-u-ra'shun (*maturo*, to ripen). Progression of an abscess toward maturity; state of maturity; coction.

Maturative, mat'u-ra-tive. Medicine which favors the maturation of an inflammatory process.

Maturatus, mat-u-rat'us. Concocted.

Mature'. Ripe; ready to be operated.

Maturity, ma-tu're-te. State of fruits and seeds when developed; state of an abscess in which the pus is completely formed. **M., preco'cious,** precocity.

Matzoon, mat'zun. Fermented milk used in Asia Minor.

Maud'lin. Achillea ageratum. **M. tan'sey,** Achillea ageratum. **M. wort,** Chrysanthemum leucanthemum.

Maumene's test. Perchloride-of-tin test for glycosuria.

Mauritia (mau-rish'e-ah) **flexuo'sa.** Palm tree of S. America yielding sago.

Mauvaniline, mo-van'il-een. Dye of violet color derived from aniline.

Mavacu'ri. Plant of British Guiana containing curare.

Ma'via. Erythrophlœum judiciale.

Maw. Stomach. **M. worm,** ascaris.

Maw-bound. Constipated.

Maxilla, maks-il'lah. Maxillary bone.

Maxilla'ris. Maxillary. **M. exter'na,** facial artery. **M. infe'rior,** lower jaw. **M. inter'na,** internal maxillary artery.

Maxillary, maks'il-la-re (*maxilla*, jaw, *masaomai*, to chew). Relating to the jaws. **M. ar'teries** are the *External* (see *Facial*) and the *Internal.* The latter arises from the external carotid with the temporal; it is remarkable for its complex course and the number of branches it transmits to the deep-seated parts of the face. Immediately after its origin it buries itself under the neck of the lower jaw, curving inward and downward; advances directly inward in the space between the two pterygoid muscles toward the maxillary tuberosity. It turns again, becomes vertical, and ascends into the bottom of the zygomatic fossa until, having arrived at the floor of the orbit, it takes a transverse direction, enters the sphenomaxillary fossa, and divides into several branches. See *Artery* (table). **M. bone,** *Maxilla*, name given to two bones which support the teeth. **M. b., infe'rior,** symmetrical, nearly parabolic bone, the middle portion of which is horizontal and called the *body;* the posterior is vertical, the angular portions being termed rami or branches. These have behind a parotidean edge, which forms, by uniting with the base, the angle of the jaw. The branches terminate above by two processes separated by the sigmoid notch, the anterior of which is called the coronoid, the posterior the condyloid process, or maxillary condyle, supported by a cervix or neck. The lower jaw has an alveolar edge which contains alveoli for the reception of teeth. The lower jaw-bone is developed by two points of ossification which unite at the symphysis; it is articulated with the temporal bone and the teeth. **M. b., supe'rior,** *Upper jaw-bone.* The upper jaw-bones are to the face what the sphenoid bone is to the cranium; they are articulated with all the portions composing it; they determine, almost alone, the shape of the face and give it solidity; their size is considerable, form unequal; they occupy the middle and anterior part of the face, and enter into the composition of the nasal fossæ, orbit, and mouth. Each superior maxillary bone articulates with its fellow, the ethmoid, frontal, nasal, lacrymal, palatine, inferior spongy, vomer, the teeth of the upper jaw, and sometimes the sphenoid bone, and is developed by four or five points of ossification. **M. glands,** lymphatic glands and channels situate along the ramifications of the internal maxillary artery. **M. line,** an imaginary line extending from the zygo-orbital point to corresponding opposite, constituting the superior M. line, and that from the zygo-maxillary the inferior. **M. nerves** are two formed of the second and third branches of the fifth pair. The *superior maxillary nerve* arises from the middle of the gangliform enlargement of the fifth pair; passes forward and issues from the cranium through the foramen rotundum of the sphenoid bone, enters the sphenomaxillary fossa, passes into the infra-orbital canal, and makes its exit to vanish on the cheek. It gives off the following branches: the orbital, posterior dental, and anterior dental, and terminates in the infra-orbital nerves, which are divided into superior, inferior, and internal. The *inferior maxillary nerve* is the largest of the three branches furnished by the fifth pair. It issues from the cranium by the foramen ovale of the sphenoid. Having reached the zygomatic fossa, it divides into two trunks: the one, superior and external, gives off the temporales profundi, masseterine, buccal, and pterygoids; the other, inferior and internal, the larger of the two, furnishes the inferior dental, lingual, and auricular. **M. plate,** embryonic structure originating from first visceral arch, and connecting the fronto-nasal processes to form the upper jaw. **M. pro'cess,** that portion of malar, inferior tubinated, and palatal bones which articulates with the superior maxilla. **M. ridge,** ridge of mucous membrane in which the teeth are developed. **M. si'nus,** antrum Highmorii. **M. veins** present the same arrangement as the arteries they accompany.

Max'illate. Having jaws.

Maxilliform, maks-il'le-form. Resembling the jaw-bone in shape.

Maxil'lo-ju'gal. Relating to jaw and maxilla.

Maxil'lo-labia'lis. Depressor anguli oris.

Maxil'lo-labinasal'is. Levator labii superioris alæque nasi.

Maxil'lo-narinal'is. Compressor naris.

Maxil'lo-pal'atine. Relating to maxilla and palate.

Maxil'lo-palpebra'lis. Orbicularis palpebrarum.

Maxillo-pharyngeal, maks-il'lo-far-in-je'al. Relating to maxilla and pharynx.

Maxillo-scleroticus, maks-il'lo-skle-rot'ik-us. Obliquus inferior oculi muscle.

Maxillo-suprafacial, maks-il'lo-su-prah-fa'she-al. Relating to maxilla and superior part of face.

Mayapple. Podophyllum peltatum. **M., mountain,** Podophyllum montanum.

Mayflower or **-weed.** Anthemis cotula.

Mayel'la. Curcuma longa.

May'hem. Act of depriving a person of a limb necessary for defence, or any useful part or organ.

May'nard's adhe'sive liq'uid. Collodion.

Maynoresin, ma-no-rez'in. Resin from Calophyllum longifolium.

Mays. Zea mays. **M. America'na,** Zea mays. **M. zea,** Zea mays.

May'weed. Maruta cotula.

May'worm, true. Meloë maialis.

Mayz (Ind.). Zea mays.

Maza. Mass; placenta.

Mazalysis, maz-al'is-is. Mazolysis.

Mazicus, maz'ik-us (*maza*). Relating to the placenta.

Mazischesis, maz-isk'e-sis (*maza, schesis,* holding, retention). Retention of the placenta.

Mazocacothesis, maz-o-kak-oth'e-sis (*maza, kakos, thesis,*). Abnormal position of placenta.

Mazodynia, maz-o-din'e-ah (*mazos, odune,* pain). Mastodynia.

Mazoïtis, maz-o-e'tis (*mazos,* breast, *itis*). Mastitis.

Mazology, ma-zol'o-je (*mazos, logos*). Treatise on mammals.

Mazolysis, maz-ol'e-sis (*maza, lusis,* solution). Separation of the placenta.

Mazolytic, maz-o-lit'ik. Relating to mazolysis; remedy producing expulsion of placenta.

Mazopathia, maz-o-path-e'ah (*maza, pathos,* disease). Disease of the placenta or originating from the placenta.

Mazopath'ic. Pertaining to placental disease.

Ma'zos. Mamma.

M'boundou. Akasga.

McMunn's elix'ir. See *Elixir of opium.*

Me'able. Capable of easy penetration.

Mead. Fermented honey or syrup. Hydromeli; melizomum.

Meadow bloom, med'o bloom. Ranunculus acris. **M. fern,** Comptonia asplenifolia. **M. gar'lic,** Allium Canadense. **M. pride,** see *Calumba.* **M. rue,** thalictron. **M. saf'fron,** Colchicum autumnale. **M. sweet,** Gillenia trifoliata, Spiræa ulmaria. **M. sweet, Amer'ican,** Spiræa lobata. **M., sweet, red,** Spiræa tomentosa.

Meal. See *Farina.*

Mealy, me'le. Resembling meal. **M. star'wort,** Aletris farinosa. **M. tree,** Viburnum dentatum.

Measles, meez'l's (from; G. *masern,* spotted). Rubeola; also diseased condition of pork; see *Trichiniasis.* **M., bas'tard,** rubella. **M., black,** see *Rubeola.* **M., con'fluent,** scarlatina. **M., false,** roseolæ. **M., French,** roseolæ. **M., Ger'man,** see *Rubeola.* **M., hemorrhag'ic,** black measles.

Meas'le-worm. Scolex of a tænia.

Measlings, meez'lings. Rubeola.

Measly, meez'le. Morbillous. **M. pork,** see *Measles.*

Measure (mezh'ur), **grad'uated.** Glass measure used in pharmacy, so divided as to indicate accurately the quantities of liquids.

Measurement, mezh'ur-ment. Mensuration. **M., Thomp'son's,** lithotrite provided with scale so as to indicate size of calculus within its grasp.

Measures, mezh'urs. See *Weights and Measures.*

Measuring (mezh'u-ring), **med'ical.** Mensuration.

Meat, meet. Some of the preparations of meat, as beef-tea, extract of beef, etc., are elsewhere referred to. **M. bis'cuit,** see *Biscuit, meat.* **M., condensed',** see *Extract of beef.* **M., extrac'tive of,** osmazome. **M. flour** is made of beef dried at a low temperature and ground into very fine powder, one pound representing four of flesh. **M., flu'id,** solution of meat in pepsin and hydrochloric acid; it contains the fibrinous and nutritious portions of meat. **M. juice** is obtained by a process described by Prof. Christison, at a temperature of about 220°, from fresh beef, and contains ozmazome, with the salts, sapid and odorous principles of meat. **M. poi'soning,** poisoning by meat containing ptomaïnes. **M. pow'der,** meat flour. **M., raw,** has been recommended in chronic diarrhœa when uncomplicated with organic lesion, the meat being minced with currant jelly or conserve of roses.

Meatoscope, me-at'o-skope. Speculum for examination of the urethra near the meatus.

Meatotomy, me-a-tot'o-me. Incision of angle of the meatus, effecting enlargement thereof; the knife being called a *Meatotome.*

Meatus, me-at'us (*meo,* to go). Passage or canal. **M. acus'ticus exter'nus,** auditory canal, internal. **M. audito'rius exter'nus,** auditory canal, external. **M. audito'rius inter'nus,** auditory canal, internal. **M. cæ'cus,** Eustachian tube. **M. cuticula'res,** pores of the skin. **M. cys'ticus,** cystic duct. **M. na'rium,** see *Nasal fossæ.* **M. Rivi'ni,** foramen of Rivini. **M. semina'les uteri,** Fallopian tube. **M. semina'rius,** corpus Highmori. **M. of Syl'vius,** interspace between anterior cornua of lateral ventricles of cerebrum. **M. urina'rius,** urethra. **M. urina'rius fœmine'us,** female urinary meatus. **M. urina'rius viri'lis,** male urinary meatus.

Mechameck, mech'a-mek. Convolvulus panduratus. **M. bind'weed,** Convolvulus panduratus.

Mechane, mek'a-ne. Machine.

Mechanema, mek-an-a'mah. Machine.

Mechanical, me-kan'e-kal (*mechane,* machine). Epithet given to irritating bodies which do not act chemically, as a mechanical irritant. **M.** or **Iatromathemat'ical physic'ians** are such as refer every function, healthy or morbid, to mechanical or mathematical principles—*medicina mechanica.*

Mechanico-therapy, mek-an'e-ko ther'ap-e. Mechanical treatment, as by medical gymnastics and massage.

Mechanics (me-kan'iks), **an'imal.** Part of physiology whose object is to investigate the laws of equilibrium and motion of the animal body.

Mechanism, mek'an-izm. Structure of a body; collection or aggregate of the parts of a machine; mode in which forces produce any effect, etc., as the mechanism of parturition.

Mechanology, mek-an-ol'o-je (*mechane, logos,* description). Treatise on machines or apparatus used in medicine or surgery.

Mechoaca'na ni'gra (from Mechoacan in Mexico). Convolvulus jalapa. **M. ni'gricans,** Convolvulus jalapa. **M., white,** convolvulus Mechoacan.

Mechoaca'næ rad'ix. Convolvulus Mechoacan.

Mecismus, mes-iz'mus (*mekos,* length). Condition characterized by unusual length of parts of the body.

Meckel''s car'tilage. See *Cartilage of Meckel.* **M.'s gan'glion,** sphenopalatine ganglion.

Mecometer, me-kom'e-tur (*mekos,* length, *metron,* measure). Graduated compass used at the Hospice de Maternité of Paris to measure the length of newborn infants.

Me'con. Meconium; opium; papaver.

Meconar'ceine. Derivative of narceine, in yellow soluble crystals; used in neuralgia, bronchitis, insomnia, etc.

Mec'onate. Salt of meconic acid.

Meconeuropathia, mek-o-nu-ro-path-e'ah (*mecon,* opium, *neuron,* nerve, *pathos,* disease). Morbid state due to opium habit.

Meconic acid, me-kon'ik as'id. Acid derived from opium, $H_3C_7HO_7$, from which solution of bimeconate of morphia is prepared.

Meconicum, me-ko'ne-kum (*mekon,* poppy). Opiate.

Meconidia (mek-o-nid'e-ah), **Mecon'idin,** or **Mecon'idine.** See *Porphyroxin.*

Meconin, mek'o-nin. Neutral substance obtained from opium.

Meconioid, mek-o'ne-oid. Resembling meconium.

Meconiorrhœa, mek-o-ne-or-rhe'ah. Discharge of meconium in excessive quantity.

Meco'nious. Of the nature of meconium.

Meco'nis. Poppy.

Meconismus, mek-o-niz'mus. Poisoning by opium.

Meconium, me-ko'ne-um (*mekonion,* inspissated juice of the poppy). Opium. Also the excrement, *Purgamenta infantis, Mecon,* passed by the infant a short time after birth. **M. theba'icum,** opium.

Mec'onoid. Relating to or resembling meconium.

Meconoiosin, mek-o-no-e'o-sin. Colorless substance in crystals derived from opium.

Meconologia, mek-o-no-loj'e-ah (*mekon,* opium, *logos,* description). Treatise on opium.

Meconophagism, mek-on-of'a-jism (*mekon*, opium, *phago*, to eat). Opium-eating.

Meconopsis diphylla, mek-on-op'sis de-fil'lah. Stylophorum diphyllum.

Medea, me'de-ah. Genital organs.

Medeïtis, med-e-e'tis. Inflammation of genital organs.

Medela, med-e'lah (*medeor*, to heal). Cure; therapeutics.

Medeni, med-e'ne. Cutaneous ulcerations like boils.

Medeola verticillifolia, med-e'o-lah ver-te-sil-le-fo'-le-ah (after Medea the sorceress). M. Virginica. **M. Virgin'ica,** ord. Smilaceæ. Indigenous herb growing in every part of the United States, the root of which resembles a small cucumber; diuretic.

Me'diad. Directed or situate toward the median plane.

Me'dial. Median.

Me'dian (*medium*, the middle). That which is situate in the middle. **M. ar'teries,** twigs supplying the fourth ventricle which originate from either the basilar or vertebral artery. **M. ar'tery,** small artery accompanying median nerve, originating from anterior interosseous artery. **M. artery of spinal cord,** artery originating from anterior spinal artery, passing along anterior median line of cord. **M. brown line,** brown line extending from xiphoid cartilage to symphysis pubis. **M. line,** vertical line supposed to divide the body into two equal parts, one right, the other left. **M. nerve** arises chiefly from the anterior branches of the last two cervical nerves and first dorsal. The fifth and sixth cervical pairs also send a branch, which separates from the musculo-cutaneous nerve. The median nerve descends on the inner part of the arm along the biceps muscle. Opposite the elbow-joint it buries itself behind the aponeurosis of that muscle, and engages itself between the two fasciculi of the pronator teres. Lower down it is between the flexors—sublimis and profundus—and passes, with their tendons, under the anterior annular ligament, then divides into five branches, which are distributed to the muscles of the thenar eminence, to the lumbricales, the integuments of the thumb, the index, middle finger, and outer part of the ring finger. This nerve gives no branches to the arm. In the forearm it furnishes filaments to all the pronator and flexor muscles, and one of them accompanies the anterior interosseous artery. It also gives off a filament to the integuments of the palm of the hand. **M. opera'tion of lithot'omy,** operation characterized by median incision of perineum, urethra, and prostate gland; see *Lithotomy*. **M. veins,** three of the superficial veins of the forearm are so called: the median basilic, the median cephalic, and common median; see *Basilic* and *Cephalic*.

Medianum, me-de-an'um. Mediastinum; mesentery.

Me'diary. Median.

Mediastinal, me-de-as-ti'nal. Relating to the mediastinum. **M. ar'teries** are very delicate arterial branches distributed in the areolar texture of the mediastinum. They are distinguished into anterior and posterior.

Mediastinitis, me-de-as-tin-e'tis. Inflammation of the mediastinum.

Mediasti'no-pericardi'tis. Inflammation involving mediastinum and pericardium.

Mediastinum, me-de-as-te'num (in *medio stans*, as being in the middle); *vulg.* me-de-as-ti'num. Membranous space formed by a double reflection of the pleura, extending from the spine to the posterior surface of the sternum. It is divided into superior and inferior, the latter subdivided into three, anterior, middle, and posterior. Superior m. lies above upper level of pericardium, and is bounded anteriorly by manubrium sterni and posteriorly by dorsal vertebræ. A plane extending from fourth dorsal vertebra to junction of manubrium with gladiolus is the imaginary dividing-line. It contains origin of sterno-hyoid and thyroid muscles and ends of longus colli, transverse aorta, innominate artery and vein, left carotid and subclavian arteries, superior cava, left superior intercostal vein, pneumogastric, cardiac, phrenic, and left recurrent laryngeal nerves, trachea, œsophagus, thoracic duct, thymus gland or its remains, and lymphatics. The inferior, being subdivided, may be described as inferior anterior, which is bounded in front by sternum, laterally by pleura, and posteriorly by pericardium. It contains origin of triangularis sterni muscles, internal mammary vessels of left side, and lymphatic glands and vessels permeating areolar tissues; inferior middle is the broadest portion, and contains heart, ascending aorta, superior cava, bifurcation of trachea, pulmonary arteries and veins, and phrenic nerves; inferior posterior is parallel with vertebral column, bounded anteriorly by pericardium and roots of lungs, posteriorly by vertebral column from inferior border of fourth dorsal vertebra downward, and laterally by pleura. It contains descending arch and thoracic portion of aorta, greater and lesser azygos veins, pneumogastric and splanchnic nerves, œsophagus, thoracic duct, and lymphatic glands. **M. aur'is,** see *Tympanum*. **M. cerebel'li,** falx cerebelli. **M. cer'ebri,** falx cerebri, septum lucidum. **M. dorsal'e,** M. posterior; see *Mediastinum*. **M. tes'tis,** corpus Highmori. **M. ventriculo'rum lateral'ium,** septum lucidum.

Mediastinus, me-de-as-te'nus. Mediastinum.

Mediate auscultation, me'de-ate aws-kul-ta'shun. Auscultation by means of an instrument, as a stethoscope.

Medicabilis, med-e-kab'il-is (*medicor*, to cure or heal, *habilis*, capable). Curable.

Medicable, med-e'ka-b'l. Curable.

Medicæ, med'e-se. Female practitioners of old; see *Iatrinæ*. Also sworn midwives, whose duty it was to inspect women in cases of suspected pregnancy.

Medical, med'e-kal. Appertaining to medicine. **M. jurispru'dence,** medicine, legal. **M. man,** surgeon-apothecary.

Medicalis, med-e-kal'is. Medical.

Medicament, med-e'ka-ment. Remedy; medicine.

Medicamenta (med-e-kam-en'tah) **arcana.** Proprietary medicines.

Medicamental, med-e-ka-men'tal. Medicinal.

Medicamenta'tion. Treatment with medicine.

Medicamento'sus. Medicinal. Produced by a drug, as dermatitis medicamentosa.

Medicamen'tous. Medicinal.

Medicamentum, med-e-kam-en'tum. Drug, medicament. **M. ex pal'mulis,** drastic electuary of dates.

Medicaster, med-e-kas'ter. Charlatan.

Medicated, med'e-ka-ted. Treated or impregnated with medicine.

Medication, med-e-ka'shun. Treatment by medicine. **M., hypodermat'ic** or **hypoder'mic,** see *Hypodermic*.

Medicatrina, med-e-kat-re'nah. Physician's office or fee.

Medicatrix, med-e-kat'ricks. Having the power of healing.

Medicerebel'lar. Relating to middle region of cerebellum.

Medicer'ebral. Relating to middle region of cerebrum.

Medicina, med-e-se'nah. The healing art; physic. A science the object of which is the cure of disease and the preservation of health. Occasionally it is used to comprehend all the branches of the healing art; at others to comprise one great division, in contradistinction to *surgery* and *obstetrics*. Medicine, in this sense, includes many branches, the chief of which are Anatomy, Physiology, Pathology, Therapeutics, Hygiene, Materia Medica, and Pharmacy. **M. conservati'va,** hygiene. **M. diætet'ica,** dietetics. **M. diasos'tica,** hygiene. **M. eclec'tica,** see *Eclectic*. **M. ef'ficax,** surgery. **M. equa'ria,** hippiatria. **M. euec'tica,** gymnastics. **M. foren'sis,** medicine, legal. **M. gymnas'tica,** gymnastics. **M. hermet'ica,** see *Spagyrists*. **M. judicia'ria,** medicine, legal. **M. mag-**

net'ica, sympathy, cure by. **M. mechan'ica**, kinesipathy; see *Mechanical*. **M. method'ica**, see *Methodists*. **M. milita'ris**, military medicine. **M. operati'va**, surgery. **M. Paracelsis'tica**, see *Spagyrists*. **M. perturbat'rix**, see *Perturbatrix*. **M. polit'ica**, police, medical. **M. politico-foren'sis**, medicine, state. **M. psy'chica** or **psycholog'ica**, medicine, psychical. **M. pub'lica**, medicine, state. **M. Sin'ica**, Chinese medicine. **M. spagyr'ica**, chemiatria; see *Spagyrists*. **M., state**, police, medical. **M. stat'ica**, statica medicina. **M. sympathet'ica**, sympathy, cure by. **M. tristi'tiæ**, crocus. **M. veterina'ria**, veterinary art.

Medicinable, med'is-in-a-b'l. Medicinal.

Medicinal, me-dis'in-al. Medical, remedial, having remedial power; relating to medicine, as **M. days**, days on which the ancients considered that remedies might be administered, and especially evacuants; such days were not esteemed critical. **M. hours**, times at which—the stomach being freed from its digestive actions—medicine, it was thought, could be most advantageously administered. **M. rashes**, see *Rash, medicinal*.

Medicine, med'e-sin. Medicina. Medicament; purging potion. **M. chest**, case or chest for medicines. **M., clin'ical**, see *Clinical*. **M., conserv'ative**, mode of treating disease which tends to the preservation, development, and support of the vital powers. **M., cuta'neous**, see *Cutaneous medicine*. **M., eclec'tic**, see *Eclectic*. **M., empir'ical**, secret remedy. **M., le'gal**, *Medical jurisprudence* of some, *Law* or *Forensic medicine;* application of medical knowledge to the solution of every question connected with the administration of justice. **M., pat'ent**, see *Patent medicine*. **M., polit'ical**, police, medical. **M., psych'ical** or **psycholog'ical**, see *Psychical*. **M., quack**, arcanum. **M., seal**, cachet. **M., stamp**, cachet. **M., state**, medical knowledge brought to bear on state objects, as on public hygiene and matters appertaining to medical jurisprudence.

Mediciner, med'e-sin-er. Physician.

Medico-chirurgical, med'e-ko-ki-rurj'e-kal. Relating to medicine and surgery, as *Medico-chirurgical* Society. **M.-c. anat'omy**, see *Anatomy*.

Medico-legal, med'e-ko-le'gal. Relating to legal medicine, as a *medico-legal* inquiry, a *medico-legal* inspection.

Medicomania, med-e-ko-man'e-ah (*medicus, mania*). Mania for the science of medicine without the necessary study.

Med'icon. Poisonous drug.

Med'ico-pneumat'ic. Relating to pneumatic medicine.

Med'ico-psycholog'ical. Relating to psychological medicine.

Medico-statistical, med'e-ko-sta-tis'te-kal. See *Statistics, medical*.

Med'icus (*medeor*, to heal). Doctor of medicine; physician. **M. equa'rius**, hippiater. **M. ocula'ris**, oculist. **M. ophthal'micus**, oculist. **M. unguenta'rius**, one who treats diseases by external means. **M. veterina'rius**, hippiater. **M. vulnera'rius**, see *Deligation*. **M. vul'nerum**, surgeon.

Medimnus, med-im'nus (*medimnos*). Ancient measure, capable of containing about four pecks and six pints.

Medi'na worm. Guinea worm; nematode worm of the tropics that burrows in the human body.

Medinogordius, med-in-o-gor'de-us. Dracunculus.

Me'dio-bilat'eral. Relating to median plane and both sides of the body.

Me'dio-car'pal. Relating to middle carpal articulation.

Me'dio-col'ic. Relating to middle of colon. **M.-c. ar'tery**, middle colic artery.

Medio-frontal, me'de-o-frunt'l. Relating to middle of frontal region. **M.-f. gy'rus**, middle frontal convolution.

Medio-lateral, me'de-o-lat'er-al. Relating to median plane and sides.

Mediola Virginica, me-de'o-lah vir-jin'e-kah. Cucumber root, an indigenous herb; root can be eaten; reputed to possess diuretic properties when given in large doses.

Medio-occipital, me'de-o-ok-sip'it-al. Relating to middle of occipital region. **M.-o. gy'rus**, middle occipital gyrus.

Medio-palatine, me'de-o-pal'at-ine. Relating to middle of palate.

Medio-pontine, me'de-o-pont'ine. Relating to middle of pons Varolii.

Medio-tarsal, me'de-o-tar'sal. Relating to middle tarsal articulation. **M.-t. articulation**, joint situate between astragalus and calcaneum posteriorly, and scaphoid and cuboid anteriorly.

Medipectus, med-e-pek'tus. See *Mesosternum*.

Medipedunculus, med-e-ped-un'ku-lus. Middle peduncle of cerebellum.

Mediscalenus, med-e-skal-a'nus. Scalenus medius muscle.

Mediterranean fever, med-e-ter-ra'ne-an fe'ver. Variety of remittent fever.

Meditriceps, med-e-tre'seps. Middle head of triceps muscle.

Meditullium, med-e-tul'le-um (*medium*, middle). Diploë.

Medium, me'de-um (middle). Term usually employed in medicine for the conditions which surround a living body and are inservient to its continued existence. Thus air, water, heat, light, etc. are so many media. **M. car'damoms**, Malabar cardamoms of commerce. **M. mus'culi**, see *Muscle*. **M. ven'tris**, umbilicus.

Medius, me'de-us. Middle; median. **M. dig'itus**, middle finger.

Med'lar. Mespilus.

Me'do. Hydromeli.

Medoblennorrhœa, med-o-blen-or-rhe'ah (*medea, blennorrhœa*). Leucorrhœa.

Medoc'. French wine containing tannin.

Medorrhœa, med-or-rhe'ah (*medea, rheo*, to flow). Gonorrhœa. **M. fœmina'rum in'sons**, leucorrhœa. **M. urethral'is**, gonorrhœa. **M. viri'lis**, gonorrhœa.

Medorrho'ic. Relating to or suffering with medorrhœa.

Med'os. Bladder.

Med'sine (Old E.). Medicament; medicine.

Medulla, med-ul'lah (*medius*, in the middle). Marrow. **M. cer'ebri**, see *Cerebrum*. **M. dorsa'lis**, M. spinalis. **M. dorsua'lis**, M. spinalis. **M. nervo'rum**, neurine. **M. oblonga'ta**, *Cerebral protuberance, Mesocephalon*. The medullary substance that lies within the cranium upon the basilary process of the occipital bone. The anterior surface, which rests in the basilary groove, is impressed by the basilary artery. At the upper extremity of, and on its posterior surface, are the tubercula quadrigemina. At the same extremity the medulla gives rise to two prolongations, the *peduncles of the brain*, separated from each other by the mammillary eminences, and becoming lost in the optic thalami. The lower extremity is called the tail or rachidian bulb, bulbus medullæ spinalis or rachidicus, and is continuous with the medulla spinalis. It is to this part only that some anatomists apply the name *Medulla oblongata*. From the posterior angles two other prolongations arise, called *Peduncles* of the cerebellum. The medulla oblongata has several eminences —the pons Varolii, corpora pyramidalia, c. olivaria, etc.—and has a longitudinal fissure before, and another behind, called the *anterior* and the *posterior median fissures*. The vesicular neurine in the centre of the medulla is the nervous centre of respiration and deglutition; hence it has been called *centrum vitale*. **M. os'sium**, marrow. **M. re'nis**, see *Kidney*. **M. spi'næ**, M. spinalis. **M. spina'lis**, *Spinal prolongation, Vertebral marrow, Spinal cord* or *marrow, Nervous system of voluntary motion and tactile impression* (Gall), continuation of the medulla oblongata. Commences at the foramen magnum of the occipital bone, and descends in the vertebral canal as low as the second lumbar vertebra without filling it, presenting in its course several evident enlargements. It is grooved on both its anterior and posterior surfaces by a furrow

which divides it, in its whole length, into two great nervous cords, intimately united with each other. The longitudinal fissure on its anterior surface is called the *anterior median fissure;* that on the posterior surface, the *posterior median fissure.* Between these, two *lateral fissures* have also been described on each side of the cord. The spinal marrow terminates by an oval tubercle, whence a number of nerves set out, called *cauda equina,* from its resemblance to a horse's tail. Spinal marrow has no analogy, as regards its structure, with the marrow of long bones. It is formed of two substances, one white, the other gray, presenting an inverse arrangement to that which they have in the brain, the white being external, the gray in the centre, *substantia grisea centralis.* It is enveloped by a yellowish fibrous membrane, very resisting, which seems to be continued insensibly from the pia mater, and by two other membranes, which are merely prolongations of the arachnoid and dura mater; see *Nerve.* **M. vertebra'lis,** M. spinalis.

Medullæ, med-ul'le (pl. of **Medulla**). Sperm.

Medul'lar. Medullary.

Medullary, med'ul-la-re (*medulla*). Relating to, or analogous to, marrow. **M. ar'teries,** arteries which enter bones and pass to the marrow. **M. canal',** see *Canal, medullary.* **M. cav'ities,** hollow of a bone containing marrow. **M. cells,** see *Medullary membrane.* **M. groove,** groove running longitudinally, observed in vertebrate embryo, which forms the medullary canal later on. **M. juice,** marrow. **M. lam'inæ,** strata of white matter situate between the gray substance of the brain. **M. mat'ter,** see *Nerve-fibres.* **M. mat'ter of the brain,** see *Cerebrum.* **M. mem'brane,** vascular, areolar web of extreme tenuity which envelops the marrow and lines the inner surface of the medullary canal of the long bones. This membrane has been considered as a species of internal periosteum of those bones. It has numerous vessels, which bury themselves in the thickness of the marrow, and others which nourish the innermost plates of the bone. The cells formed by it are termed *Cellulæ* or *Sacculi medullares.* **M. neu'rine,** see *Neurine.* **M. nu'cleus,** white fibres of cerebellum. **M. plates** are the thickened edges of medullary groove from which the medullary groove has its origin. **M. ridges,** protuberances which form boundary-line of medullary groove. **M. sarco'ma,** encephaloid, hæmatodes fungus. **M. sheath,** see *Nerve-fibres.* **M. spaces,** spaces in bone when in stage of formation filled with embryonic marrow. **M. stri'æ,** white lines running transversely on floor of fourth ventricle. **M. sub'stance of the kid'ney,** see *Kidney.* **M. sub'stance of Schwann,** see *Nerve-fibre.* **M. sys'tem,** Bichat gives this name to the marrow and its membranes. He distinguishes two species of medullary systems: the one occupies the cellular tissue at the extremities of the long bones and that of the flat and short bones; the other is found merely in the central canal of long bones. **M. tube,** spinal cord in the primitive tubular stage. **M. tu'mor of the lungs,** phthisis, cancerous. **M. ve'li,** folds situate in upper part of fourth ventricle. They are divided into anterior and posterior medullary velum.

Medullated, med'ul-la-ted. Containing marrow. **M. fi'bres,** see *Fibres, medullated.*

Medullic, med-ul'lik. Contained in or obtained from medulla. **M. ac'id,** occurring in beef-fat.

Medulli-spinal (me-dul'le-spi'nal) **veins.** Veins given off by the spinal cord and uniting into a fine network on the pia mater.

Medullitis, med-ul-le'tis. Myelitis.

Medullization, med-ul-li-za'shun (*medulla,* marrow). Softening of the osseous tissue from osteitis, the earthy constituents becoming absorbed and the Haversian canals, lacunæ, etc. enlarged.

Medullo-arthritis, med-ul'lo-arth-re'tis (*medulla, arthron,* joint). Inflammation involving the medulla in extremities of long bones, and followed by structural changes in the articulation.

Medullo-encephalic, med-ul'lo-en-sef-al'ik. Relating to spinal cord and cerebrum.

Medusa's (med-u'zah's) **head.** See *Caput Medusæ.*

Meeran. Daucus carota.

Megacephalic, meg-a-sef-al'ik (*megas,* large, *kephale,* head). Pertaining to crania whose capacity exceeds 1450 cc.

Megacephalus, meg-ah-sef'al-us. One having a large head.

Megacheilus, meg-ah-ki'lus (*megas,* large, *cheilos,* lip). Possessing large lips.

Megacoccus, meg-ah-kok'kus (*megas,* large, *kokkos,* berry). Largest forms of cocci.

Megagnathus, meg-a-gnath'us (*megas, gnathos,* jaw). One having a large jaw.

Megalanthropogenesis, meg-al-an-thro-po-jen'es-is (*megalo, anthropos,* man, *genesis,* birth). Term used by a French physician to designate the art of procreating great men, men of mind, men of genius. He considered that they may be perpetuated by always taking care to have talented men united to clever women!

Megalo, meg'al-o (*megas,* great.) In composition, great.

Megalocardia, meg-al-o-kar'de-ah (*megalo, kardia,* heart). Having a very large heart.

Megalocephalia, meg-al-o-sef-al'e-ah (*megalo, kephale,* head). An unusually large size of the head.

Megalocephalic, meg-al-o-sef-al'ik. Having an unusually large head.

Megalocheirous, meg-al-o-kir'us (*megalo, cheir*). Having large hands.

Megalocœlia, meg-al-o-se'le-ah (*megalo, koilia,* abdomen). Intestine, great; megalosplanchnia.

Megalocornea, meg-al-o-kor'ne-ah (*megalo, cornea*). Unusual size of cornea.

Megalocyte, meg'al-o-site (*megas,* large, *kutos,* cavity). Very large red blood-corpuscles observed with microscope in cases of anæmia.

Megaloglossia, meg-al-o-glos'se-ah (*megalo, glossa,* tongue). Abnormal condition in which the tongue is hypertrophied and protrudes from the mouth.

Megalomania, meg-al-o-man'e-ah (*megas,* large, *mania,* madness). Form of insanity in which the patient imagines himself to be a very exalted and powerful individual.

Megalomelia, meg-al-o-mel'e-ah (*megalo, melos,* limb). A monstrosity characterized by very large limbs.

Megalomelus, meg-al-om'el-us (*megalo, melos,* limb). Monster with very large limbs.

Megalophonia, meg-al-o-fon'e-ah (*megalo, phone,* voice). The condition of having a full, strong voice.

Megalophonic (meg-al-o-fon'ik) or **Megalophonous,** meg-al-o-fo'nus. Having a strong voice.

Megalophthalmus, meg-al-of-thal'mus (*megalo, ophthalmos,* eye). A congenital deformity in which the eye is inordinately large.

Megalopia, meg-al-o'pe-ah. See *Megalopsia.*

Megalopodia, meg-al-o-pod'e-ah (*megalo, pous,* foot). Condition of having large feet.

Megalopsia, meg-al-op'se-ah (*megas,* great, *opsis,* sight). An affection of the eye in which objects appear larger than they are in reality.

Megalopus, meg-al'o-pus (*megalo, pous,* foot). Having an unusually large foot.

Megaloscope, meg'al-o-skope (*megalo, skopeo,* to see). Magnifying instrument for making endoscopic examinations of bladder, rectum, and stomach.

Megaloscopy, meg-al-os'kop-e. Observation with the microscope.

Megalosplanchnus, meg-al-o-splanch'nus (*megalo, splanchnon,* viscus). *Megalocœlia.* Having a tumid condition; the viscera or a viscus. Some have used the substantive *Megalosplanchnia* for the tumor itself.

Megalosplenia, meg-al-o-sple'ne-ah (*megalo, splen,* spleen). Splenoncus.

Megascope, meg'ah-skop (*megas,* great, *skopeo,* to see). Modification of solar microscope for examining bodies of comparatively large size.

Megascopic, meg-a-skop'ik (*megas,* great, *skopeo,* to see). Visible to the eye without the use of a magnifier.

Megaseme, meg'ah-seem (*megas*, great, *sema*, sign). Having a large index; term used in craniometry; having an orbital index over 89.

Megasthenes, meg-as'then-ees (*megas*, great, *sthenos*, strength). See *Microsthenes*.

Megasthenic, meg-a-sthen'ik (*megas*, great, *sthenos*, strength). Having great strength.

Megastoma intestinalis, meg-as'to-mah in-tes-tin-al'is. Protozoa observed to exist in the small intestines of rats, and also found in human beings in cases of deficient digestion with diarrhœa.

Megastomatous, meg-ah-stom'at-us. Having a large mouth.

Megavolt, meg'ah-volt. Electrical unit equivalent to a million volts.

Megethos, meg'e-thos (*megas*, great). Stature.

Megistocephalus, mej-is-to-sef'al-us (*megas*, large, *kephale*, head). One having a very long cranium.

Meg'ohm. Resistance of electro-magnet amounting to one million ohms.

Me'grim (*migraine*, itself abridged from *hemicrania*). Hemicrania. *Megrims* is used principally in England for lowness of spirits.

Meibomian (mi-bo'me-an) **cyst.** Chalaza.

Meibo'mius, glands of. *Follicles of Meibomius, Palpebral* or *Ciliary follicles.* Small sebaceous follicles called after Meibomius, although known long before his description of them. They are situate in special grooves in the tarsal cartilages, and are ranged by the side of each other in the form of yellowish, parallel, and vertical lines, sometimes straight, at others tortuous. They may be seen at the inner surface of the eyelids, through the conjunctiva, and secrete a sebaceous humor called *Humor of Meibomius, Lippitudo, Gum.*

Meiocardia, mi-o-kar'de-ah. Diminution of the volume of the heart during systole.

Meiosis, mi-o'sis (*meioo*, to lessen). The period of a disease in which the symptoms begin to diminish; decline; remission; also idiotism.

Meiss'ner, bod'ies or cor'puscles of. Oblong bodies seen in some of the broad papillæ of the skin of the volar portion of the fingers and the palm, and into which a medullated nerve-fibre enters, either enveloping the corpuscles spirally or becoming lost in its centre. **M., gan'glion of,** *Plexus of Meissner.* A flat layer of nervous masses in the tunica submucosa of the intestines, a few ganglia projecting toward the mucous membrane and penetrating between the adjoining follicles. **M., plex'us of,** Meissner, ganglion of.

Meiurus, mi-u'rus (*meioo*, to lessen, *oura*, tail). Shortened; curtailed. Term figuratively applied to the pulse when tapering off to a fine point like a mouse's tail. Myurus (mouse's tail).

Mekilwort, mek'il-wort. Atropa belladonna.

Mel (*meli*). *Honey.* A liquid of a mucosaccharine nature prepared by the apis mellifica or common bee, which collects the materials from the nectaries of flowers. Honey is employed as aliment, condiment, and medicine. It is demulcent and aperient, and is prescribed as an adjunct to gargles in cynanche tonsillaris, etc.; at times used as a detergent to foul ulcers. *Virgin honey, Mel virginum* or *virgineum*, is that which flows from the wax spontaneously. *Honey-water* is a mixture of essences colored with saffron; a little honey is added to communicate a clamminess, the effect of which is to make it retain the scent the longer; used as a scent. **M. aceta'tum,** oxymel. **M. Ægypti'acum,** Ægyptiacum. **M. aë'rium,** Fraxinus ornus. **M. arundina'ceum,** saccharum. **M. bora'cis,** *Honey of borax* or of *borate of soda* or of *borate of sodium, Borax honey* (boracis, ℥j; glycerin, gr. xxx; mellis despumati, ℥j); detergent; applied to the mouth in aphthous affections. **M. can'næ,** saccharum (non purificatum). **M. coc'tum,** boiled honey. **M. despuma'tum** or **depura'tum,** *Clarified honey* (melt the honey in a water-bath and remove the scum); uses the same as honey. **M. ro'sæ** (Ph. U. S.), *Honey of roses* (rosæ Gallic. in pulv., ℥ij; mellis despum., f ℥xxiij; alcohol. dilut., q. s.); astringent and detergent; used chiefly in gargles and washes in aphthæ, etc. **M. scil'læ,** oxymel scillæ. **M. scil'læ compos'itum,** syrupus scillæ compositus. **M. so'dæ bora'tis,** mel boracis. **M. so'dii bora'tis,** mel boracis. **M. vino'sum,** honey wine; wine mead. **M. vir'ginum,** see *Mel.*

Melæna, mel-e'nah (*melaino*, to blacken). *Black jaundice;* name given to vomiting of black matter, ordinarily succeeded by evacuations of the same character; seems to be often a variety of hæmatemesis. *Black vomit* in yellow fever is owing to a morbid secretion from the lining membrane of the stomach and small intestines mixed with blood. Melæna also signifies hemorrhage of dark character from the intestines. **M. fungo'sa carcino'des,** hæmatodes fungus.

Melænagogus, mel-e-nag-o'gus (*melaina*, black, *ago*, to drive away). Medicine believed to be capable of expelling atrabilis or "black bile."

Melæno-diarrhœa, mel-e'no-de-ar-rhe'ah. Melæna.

Melænorrhagia, mel-e-nor-rhaj'e-ah (*melaina*, black, *rhegnumi*, to break forth). Melæna.

Melaleuca cajuputi, mel-al-u'kah kaj-u'pu-te (*melas*, black, *leukos*, white, from the trunk being black and the branches white). Ord. Myrtaceæ; plant affords the cajeput oil. See *Caieput.* Leaves are esteemed diuretic, stomachic, and emmenagogue. **M. leucaden'dron,** M. cajuputi. **M. linarifo'lia,** oil, closely resembling oil of cajuput, is obtained from this species; this tree, planted in low marshy ground, exerts a beneficial effect toward preventing malaria. **M. mi'nor,** M. cajuputi.

Melalgia, mel-al'je-ah. Melosalgia.

Melambo. See *Melambo bark.*

Melamphonus, mel-am-fo'nus (*melas*, black, *phone*, voice). Having a hoarse or indistinct voice.

Melamphyllum, mel-am-fil'lum (*melas*, black, *phullon*, leaf). Acanthus mollis.

Melampode, mel'am-pode. Helleborus niger.

Melampodium, mel-am-po'de-um (after the shepherd Melampus, or *melas*, black, *pous*, foot, in allusion to the seeds). Helleborus niger.

Melampous, mel-amp'us (*melas*, *pous*). Having black feet.

Melampyrit, mel-am'pir-it. Chemical substance, identical with dulcitol.

Melanæma, mel-an-e'mah (*melano*, *haima*, blood). Suffocation.

Melanæmia, mel-an-e'me-ah. Venosity; morbid condition in which the vessels contain an unusual quantity of pigment.

Melanæmic, mel-an-e'mik. Relating to, or suffering with, melanæmia.

Melanagogue, mel'an-a-gog (*melano*, *ago*, to expel). Medicines which the ancients believed adapted for expelling black bile or melancholy.

Melanchlorosis, mel-an-klor-o'sis. Black jaundice; melæna.

Melanchlorus, mel-an-klo'rus (*melano*, *chloros*, green). Ancients gave this name to certain dark-colored topical remedies. See *Melæna.*

Melanchole, mel-an'ko-le. Atrabilis.

Melancholia, mel-an-ko'le-ah (*melano*, *chole*, bile). Melancholy. **M. ambulato'ria,** M. errabunda. **M. an'glica,** M. in which desire for death exists. **M. atton'ita,** melancholy attended with stupor. **M. autochi'rica,** suicide. **M. congen'ita,** M., hereditary. **M. crapulo'sa,** alcoholic melancholy. **M. dæmon'ica,** demonomania. **M. ebrio'sa,** M., alcoholic. **M. errabun'da,** cuttubuth, kutubuth. **M. flatuo'sa,** hypochondriasis. **M. hilaris,** insanity characterized by exaltation. **M. hypochondri'aca,** hypochondriasis. **M. hyster'ica,** M., hysterical. **M. malev'olens,** melancholy in which propensity to do mischief exists. **M. ner'vea,** hypochondriasis. **M. nostal'gica,** nostalgia. **M. persecutio'nis,** form of melancholy in which fear of persecution is present. **M. pleonec'tia,** see *Pleonectica.* **M. a po'tu,** melancholy, alcoholic. **M. sal'tans,** chorea. **M. suicid'ium,** suicide. **M. uteri'na,** nymphomania. **M. zoänthro'pia,** melancholy.

Melancholiac, mel-an-kol'i-ak. One affected with melancholy.

Melancholic, mel-an-kol'ik. Laboring under melancholy; belonging or relating to melancholy. In popular language, one of a gloomy disposition.

Melancholiness, mel'an-kol-e-ness. Melancholy.

Melancholodes, mel-an-kol-o'dees. Melancholy.

Melancholus, mel-an'ko-lus. Melancholic.

Melancholy, mel'an-kol-e. Disease supposed by the ancients to be caused by black bile; variety of mental alienation characterized by excessive gloom, mistrust, and depression generally, with insanity on one particular subject or train of ideas, monomania, monomoria, or, on a few subjects, oligomania. Panophobia, demonomania, erotomania, nostalgia, etc. may be referred to this head. *Melancholy* is also used for unusual gloominess of disposition. **M., alcohol'ic,** melancholy existing among alcoholics. **M., amenorrhœ'al,** melancholy due to amenorrhœa. **M., amorous,** melancholy characterized by love for a person, but free from desire for sexual intercourse. **M., anæ'mic,** M. due to anæmia. **M., catalep'tic,** M. in which cataleptic attacks occur. **M., cataton'ic,** catatonia. **M., climacteric,** M. occurring at climacterium. **M. without delirium,** hypomelancholia. **M., delu'sional** or **delir'ious,** form of melancholy characterized by delusions or ideas. **M., demonopho'bic,** demonomania. **M., diabet'ic,** melancholy attributed to diabetes as the cause. **M., erot'ic,** erotomania. **M., homici'dal,** M. in which individual has homicidal tendencies. **M., hyster'ical,** M. attributed to hysteria. **M., love,** erotomania. **M., phthis'ical,** M. occurring in phthisis. **M., podagrous,** M. attributed to gout. **M., rea'soning,** hypomelancholia. **M., relig'ious,** M. characterized by religious delusions. **M., rheumatic,** M. occurring in, and thought to be due to, rheumatism. **M. with stupor,** M. attonita. **M., suici'dal,** melancholia suicidii. **M., syphilit'ic,** M. due to syphilis or to syphilophobia.

Melanchrus (mel'an-krus), or **Melan'ochrus** (*melano, chros,* color). One attacked with black jaundice. Supposed by some to be an abbreviation of *Melanchlorus.*

Melanencephaloma, mel-an-en-sef-al-o'ma (*melas, enkephalos*). Melanotic tumor of brain.

Melanephidrosis, mel-an-ef-id-ro'sis (*melano, ephidrosis*). Sudor Anglicus niger. A form of chromidrosis.

Melanianous, mel-an-e'an-us. Covered with dark pigment.

Melan'ic, Mel'anoid, or **Melanot'ic** (*melas,* black). Of or belonging to melanosis, as melanic deposit, a black coloring matter deposited from the blood under special circumstances; see *Melanosis.* **M. depos'it,** melanosis.

Melanicterus, mel-an-ik'ter-us (*melano, icterus,* jaundice). Melæna.

Melanidrosis, mel-an-id-ro'sis (*melas, hidrosis,* sweat). Chromidrosis; colored excretion of sweat or sebum.

Melanin, mel'an-in. Dark pigment covering internal surface of membrana choriocapillaris, consisting of several layers of pigment-cells; also occurs in the skin of the negro, in urine, in melanotic tumors, pulmonary tubercles, etc.

Mel'anism or **Melanismus,** mel-an-iz'mus. Melæna. Change of coloration of the skin in which the pigment is of a deeper hue and in greater quantity than natural.

Melano, mel'an-o (*melas,* black). In composition, black, obscure.

Melanocan'croid. Melanotic epithelioma.

Melanocarcinoma, mel-an-o-kar-sin-o'mah. Cancer, melanotic.

Melanocataracta, mel-an-o-kat-ar-ak'tah. Black cataract.

Melanochloro'sis. Melæna.

Melanochrus, mel-an'o-krus. Melanchrus.

Melanoco'mus (*melano, kome,* hair). Having black or dark hair.

Melanocytes, mel'an-o-sites. Lymphoid cells which derive their coloring from red blood-corpuscles.

Melanoderma, mel-an-o-dur'mah (*melano, derma,* skin). Melanopathia. Chloasma with dark patches.

Melano'des. Melanoid.

Melanœdema, mel-an-e-de'mah (*melas,* black, *œdema,* swelling). Melanosis of the lungs.

Melanoid, mel'an-oid. Melanic. Resembling dark pigment. **M. can'cer,** cancer, melanotic.

Melanoleucæ'mia. Melanæmia occurring in leucocythæmia.

Melanoma, mel-an-o'mah (*melano, oma*). Melanosis. **M. pulmo'num,** see *Melanosis.*

Melanomyces, mel-an-o-me'sees (*melano, mukes,* fungus). Melanospongus.

Melanopathia, mel-an-o-path-e'ah (*melano, pathos,* affection). *Melanopathy, Nigritism.* Disease of the skin which consists in augmentation of black pigment; generally in patches. Discoloration may vary from mere duskiness to the deepest tint of blackness.

Melanopathy, mel-a-nop'a-the. Melanopathia.

Melanophthalmus, mel-an-of-thal'mus (*melas,* black, *ophthalmos,* eye). Melanosis of the eye. Black-eyed.

Melanophyma, mel-an-o-fe'mah (*melas,* black, *phuma,* growth). Secale cornutum.

Melanopiper, mel-an-op'e-per (*melano, piper,* pepper). Piper nigrum.

Melanopneumon, mel-an-o-nu'mon (*melano, pneumon,* lung). See *Melanosis.*

Melanorrhagia, mel-an-or-rhaj'e-ah (*melano, rhage,* breaking forth). Melæna.

Melanorrhizum, mel-an-or-rhe'zum (*melano, rhiza,* root). Helleborus niger.

Melanorrhœa, mel-an-or-rhe'ah (*melas,* black, *rheo,* to flow). Dark discharge.

Melanosarcoma, mel-an-o-sar-ko'mah. Sarcoma, melanotic.

Melanoscirrhus, mel-an-o-skir'rus (*melas,* black, *skirrhos,* tumor). Scirrhus with melanotic deposit.

Melano'ses. Cutaneous affections including various forms of melasma.

Melanosina'pis commu'nis. Black pepper.

Melanosis, mel-an-o'sis (*melas,* black). Organic affection in which the tissue of the parts is converted, owing to a *melanic deposit,* into a black, hard, homogeneous substance, near which ulcers or cavities may form, owing to the softening either of the substance itself or of some other morbid tissue—of tubercles especially. This morbific change affects the lungs particularly, when it is called *Melanosis* or *Melanoma* or *Anthracosis, Black degeneration, Melanotic* or *Black cancer, Black tubercle.* It is also met with in the liver and areolar texture. The causes are very obscure. Melanosis of the lungs constitutes a species of phthisis, but it is difficult to distinguish it from the other species during life. *Spurious melanosis* arises from the introduction of carbonaceous matter, from the action of chemical agents on the blood, or from stagnation of that fluid. Several varieties of true melanosis have been described, as the punctiform, tuberiform, stratiform, and liquiform or fluid. Deposition of melanic matter in the tissues is not necessarily connected with malignant disease. See *Cancer, melanotic,* and *Melanism.* **M., bil'iary,** melanoderma caused by diseased or disordered condition of liver. **M., can'cerous,** melanosarcoma. **M. cuticula'ris progressi'va,** xeroderma pigmentosum. **M. cu'tis,** melanosis of the skin. **M. cu'tis benig'na,** melasma. **M., false,** M., spurious. **M., gran'ular,** melasma granulatum. **M. lenticula'ris progressi'va,** cutaneous affection, occurring very seldom; the pigment atrophies, and occasionally cancer is developed. **M., malig'nant,** cancer, melanotic and keloid. **M. pneu'mo-melano'sis metallur'gica,** anthracosis pulmonum. **M. pulmo'num,** see *Melanosis.* **M., spu'rious,** see *Melanosis.* **M. universa'lis,** venosity. **M. of wheat,** ergot of wheat.

Melanosmegma, mel-an-o-smeg'mah (*melano, smegma,* act of cleansing). Saponaceous compound of train-oil and an alkali.

Melanospongus, mel-an-o-spon'gus (*melano, spongos,* sponge). Tuberiform variety of melanosis of the lungs.

Melanosus, mel-an-o'sus. Melanous.

Melanosyphilolepis, mel-an-o-sif-il-ol'ep-is (*melas,* black, *syphilis, lepis,* scale). Syphilitic eruption black and scaly in character.

Melanothanatus, mel-an-o-than'at-us (*melano, thanatos*, death). Black death; plague.

Melanothrix, mel'an-o-thriks (*melano, thrix*, hair). Having black hair.

Melanotic, mel-an-ot'ik. Melanic. **M. can'cer**, cancer, melanotic. **M. sarco'ma**, see *Sarcoma.*

Melanotrichous, mel-an-ot'rik-us (*melas*, black, *thrix*, hair). Black-haired.

Melanous, mel'an-us. Epithet applied to people characterized by the hair and skin being very dark or blackish.

Melansis, mel-an'sis. Melanosis. **M. pulmo'num**, melanosis pulmonum.

Melanteria, mel-an-ter'e-ah. Copperas.

Melanthigenin, mel-an-thij'en-in. Product of melanthin derived by decomposition.

Melanthin, mel-an'thin. Glucoside existing in seed of Nigella sativa.

Melanthium, mel-an'the-um (*melano, anthos*, flower). Nigella, M. Virginicum. **M. muscætox'icum**, Amianthium muscætoxicum. **M. sabadil'la**, veratrum sabadilla. **M. sati'vum**, Nigella sativa. **M. vi'rens**, Veratrum viride. **M. Virgin'icum**, *Leimanthium Virginicum, Quafadil;* indigenous; ord. Melanthaceæ; said to be a sure but severe remedy for itch.

Melanuria (mel-an-u're-ah), **Melanure'sis** (*melas*, black, *ouron*, urine). Black urine, a condition usually dependent on blood coloring matter or the presence of indigo.

Melanuric, mel-an-u'rik. Relating to melanuria.

Melanurin, mel-an-u'rin (*melano, ouron*, urine). Black pigment sometimes observed in urine.

Mel'as (*melas*, black). Lepra nigricans. **M. ic'terus**, bilious form of melæna; jaundice with dark discoloration.

Melasma, mel-az'mah (*melasma*). Black spot or ecchymosis, occurring on the lower extremities of old people especially. Also a cutaneous affection, *Melasma cutis*, analogous to chloasma, differing from it only in the dark color of the morbid pigment. Also called *Pityriasis nigra.* An affection of the kind is seen in Paris in old persons, females especially, who sit over a charcoal fire; it is common, also, in Ireland among the poor, where turf fires are used, and is called by them the trouts. **M. Addiso'ni**, see *Capsule, renal.* **M. cu'tis**, see *Melasma.* **M. granula'tum**, rare form of melasma, consisting of blackish granules and papules. **M. maculo'sum**, form of melasma in which macules appear on various parts of the body, generally situate on leg of people advanced in years. **M. suprarena'le**, see *Capsule, renal.* **M. tinc'tum**, see *Argyria.* **M. universa'le**, variety of melasma involving entire surface of cutis, occurring in old people especially. **M. uteri'num**, Chloasma uterinum.

Melaspermum, mel-ah-spurm'um. Nigella sativa.

Melasses, me-las'es. *Molasses, Treacle* (*mel ustum*), burnt honey). Syrup which remains after the juice of the sugar-cane has been subjected to all the operations for extracting sugar from it. In the United States the syrup made in the process of forming common sugar is called molasses; that remaining after the refinement of sugar being termed sugar-house molasses or treacle. **M. spir'it**, rum.

Melassic acid, me-las'sik as'id. Product obtained from molasses.

Melastearrhœa, mel-as-te-ar-rhe'ah. Chromidrosis.

Melastoma (mel-ast'om-ah) **Ackerman'ni.** Tree of South America, yielding an oil resembling salicylate of methyl.

Melatrophia (mel-a-trof'e-ah) or **Melatrophy**, mel-at'ro-fe (*melos*, limb, *atrophia*, wasting). Atrophied condition of limb.

Melca, mel'kah (*melka*). Food made of milk, coagulated by boiling vinegar.

Meldometer, mel-dom'e-tur (*meldo*, to melt, *metron*, measure). Instrument to determine the melting-points of minerals.

Mele. Probe; explorator; stylet; sound.

Melea, mel'e-ah (*melis*, apple-tree). Pyrus malus.

Meleagra, mel-e-ag'rah (*melos*, limb, *agra*, pain). Pain in the limbs.

Meledema, mel-ed-em'ah. See *Melete.*

Meleguetta, mel-e-gwet'tah. Amomum grana paradisi.

Melete, mel'et-e. Care; medical attention of the sick.

Meletin, mel'et-in. Quercetin.

Melezitose, mel-ez'e-toze. Melezibros. Sugar found in larch manna.

Mel'i. Mel.

Melia, mel'e-ah. Fraxinus ornus. **M. azed'arach**, *Azedaracha amœna, Poisonberry tree, Azedarach, Pride of India* or *of China, Pridetree, Hoptree, Beadtree;* ord. Meliaceæ. Bark of the root, *Azedarach* (Ph. U. S.), is usually given in decoction, in the proportion of three or four ounces of the bark of the fresh root to a quart of water, boiled down to a pint; dose is one or two tablespoonfuls every two or three hours, till purging is induced; also as an emetic. Sometimes formed into an ointment and used in tinea capitis. Tree is a native of Syria, Persia, and the north of India, and is abundant in the Southern States. The bark of *Melia azadirachta, Azadirachta Indica, Neem tree, Margosa tree,* is bitter and astringent, and is prescribed in India as a tonic and antiperiodic. Seeds and oil obtained from the pericarp have been regarded as anthelmintic; bark of the root as emmenagogue; gum which exudes from it as aphrodisiac; and the leaves have been applied in the form of poultice to ulcers and cutaneous affections. **M. ter'ra** (from the island of Melos), chalk.

Meliaceæ, mel-e-as'e-e. Natural order of trees and shrubs, natives of tropical Asia and America. Species of this order possess astringent and tonic properties; some act as purgatives and emetics.

Melianthus (mel-e-an'thus) **ma'jor** (*meli, anthos*, flower). Ord. Zygophylleæ; South African plant, decoction of whose leaves is a good external remedy in tinea capitis, crusta serpiginosa, necrosis, and foul ulcers; also useful as a gargle and lotion in sore throat and diseases of the gums; bruised leaves applied to ulcers promote granulation. **M. grandiflo'ra**, Calamintha grandiflora. **M. mi'nor**, small Cape honey-flower, containing a blackish honey of disagreeable odor.

Meliasmus, mel-e-az'mus. Glanders.

Melib'iose. Melitose.

Melicera, mel-is-er'ah (*meli, keros*, wax). Porrigo favosa.

Meliceria, mel-is-er'e-ah. Porrigo favosa.

Meliceris, mel-is'er-is. Encysted tumor filled with a substance resembling honey; also porrigo favosa.

Melicero'ma. Meliceris.

Melicerous (mel-is'er-us) or **Melicer'itous.** Having the character of meliceris, as a melicerous tumor.

Melicerum, mel-is-e'rum. Porrigo favosa.

Melicheium (mel-e-ki'um) or **Melicheion** (*meli, cheo*, to pour out). Honey-like discharge from an ulcer.

Melich'rous (*meli, chroa*, color). Having the color of honey; sweetened with honey.

Melicratum, mel-e-krat'um (*meli, kerao*, to mix). Hydromeli.

Melifavium, mel-e-fav'e-um (*meli, favus*, honeycomb). Meliceris; porrigo favosa.

Meligeion, mel-e-ji'on (*meli*, honey). Fetid humor of the consistence of honey discharged from ulcers, accompanied with caries of a bone.

Mel'ilot. Melilotus.

Melilo'tal. Oily liquid derived from melilot herb.

Melilotic acid, mel-e-lot'ik as'id. Acid derived from Melilotus officinalis.

Melilotus, mel-e-lo'tus. Trifolium melilotus.

Melimelum, mel-e-ma'lum (*meli, melon*, apple). Name given to two compounds: one of honey and quince, the other of honey and apples.

Melinephidro'sis (*melinos*, of a quince color, *ephidrosis*, perspiration). Excessive yellow perspiration observed in some forms of fever and in jaundice; it is sometimes due to overindulgence in rhubarb.

Melini sulphas, mel-e'ne sul'fas (from the island of Melos). Cadmii sulphas.

Melinum, mel-e'num (*melinon*). Ancient name of

an ointment and plasters. **M. sulphu'ricum,** cadmii sulphas.

Meliphyllum, mel-e-fil'lum (*meli, phullon,* leaf). Melissa.

Melissa, mel-is'sah (bee, because bees gather honey from it). *Balm.* Ord. Labiatæ. Leaves and tops of balm, *Melissa* (Ph. U. S.), have a pleasant odor and an austere and aromatic taste. Balm was formerly much used in nervous diseases, but is now only employed when made into tea, as a diluent in febrile affections. Basis of a celebrated preparation—*Agua Carmelitana, Carmelite water.* **M. calamin'tha,** *Calamint, Nespite;* plant smells like wild mint, though more agreeably; used popularly as a tea in dyspepsia, flatulent colic, hysteria, uterine obstructions, etc. **M. Canarien'sis,** Cracocephalum Canariense. **M. citra'ta,** melissa. **M. citri'na,** melissa. **M. clinopo'dium,** Clinopodium vulgare. **M. grandiflo'ra,** *Mountain calamint;* plant resembles the last in virtues. **M. hirsu'ta,** melissa. **M. horten'sis,** melissa. **M. hu'milis,** Melittis melissophyllum. **M. nepe'ta,** *Field calamint, Spotted calamint;* formerly used as an aromatic. **M. officina'lis,** melissa. **M. pulegioï'des,** hedeoma. **M. Roma'na,** melissa. **M. tra'gi,** Melittis melissophyllum. **M. tur'cica,** Dracocephalum Canariense. **M. wa'ter,** aqua melissæ.

Melissobotanum, mel-is-so-bot'-an-um (*melissa, botane,* plant). Melissa.

Melissobotos, mel-is-sob'o-tos (*melissa,* bee, *bosko,* to feed). Melissa.

Melissophyllum, mel-is-so-fil'lum (*melissa, phullon,* leaf). Melissa; Melittis melissophyllum.

Melitæmia (mel-it-e'me-ah) or **Melithæ'mia** (*meli, haima,* blood). Condition of the circulating fluid in which it contains an unusual quantity of saccharine matter.

Melitæna, mel-it-e'nah (*melitaina*). Melissa.

Melitagra, mel-it-ag'rah (*meli, agra,* seizure). Impetigo. **M. flaves'cens,** eczema of the face with yellow crusts. **M. parturien'tium,** malagra parturientium.

Melitagria, mel-it-ag're-ah (*meli, agrios,* wild). Impetigo.

Meliteia, mel-it-i'ah. Melissa.

Melithæmia, mel-it-he'me-ah. Melitæmia.

Melithyperuria, mel-ith-ip-er-u're-ah (*meli, hyper,* in excess, *ouron,* urine). Diabetes mellitus.

Melitis, mel-e'tis (*melon,* cheek). Inflammation of the cheek.

Melitismus, mel-it-iz'mus. Therapeutical use of honey.

Melitites, mel-it-e'tees (*meli,* honey). Hydromeli.

Melitoptyalism, mel-it-o-ti'al-izm (*meli, ptualon,* saliva). Copious secretion of sweet-tasted saliva.

Melitoptyalon, mel-it-o-ti'al-on (*meli,* honey, *ptualon,* saliva). Sweet-tasted saliva containing glucose.

Melitose, mel'it-oze. Saccharine matter derived from Eucalyptus manna; has the same composition as cane-sugar.

Melitta mel-it'tah. Bee.

Melittis, mel-it'tis. Melissa. **M. grandiflo'ra,** Melittis melissophyllum. **M. melissophyl'lum,** *Bastard balm,* ord. Labiatæ; plant was formerly employed like the balm in uterine obstructions. **M. sylves'tris,** M. melissophyllum.

Melituria, mel-it-u're-ah (*meli, ouron,* urine). Urine, diabetic. See *Diabetes.* **M. ino'sita,** urine contains inosite.

Melitus (mel-e'tus) or **Melli'tus** (*meli*). Appertaining to honey. Of the nature of or sweetened with honey.

Melizomum, mel-e-zo'mum (*meli, zomos,* broth). *Mead, Metheglin.* Drink prepared with honey.

Melizo'ron. Melizomum.

Mellago, mel-lah'go (*meli*). Any medicine having the consistency of honey. Fluid extract.

Melleoleus, mel-le-ol'e-us. Relating to or mixed with honey.

Melleous, mel'le-us. Having an odor or taste like honey.

Mellicratum, mel-le-kra'tum (*meli, kerao,* to mix). Hydromeli.

Mellifavium, mel-le-fa've-um (*meli, favus,* honeycomb). Porrigo favosa.

Melliferous (mel-lif'er-us) or **Mellific,** mel-lif'ik. Producing honey.

Melligenous, mel-lij'en-us. Melleous.

Melligetta, mel-le-get'ah. Meleguetta.

Melligo, mel-le'go. Honey-dew. Substance containing saccharose, occurring on leaves of maples and other trees.

Mellina, mel-le'nah (*meli*). Melizomum.

Melli'ta. Officinal name of several honeys.

Mellithæmia, mel-lith-e'me-ah. Glycohæmia.

Mellitum, mel-le'tum (*mel*). Prepared honey; medicated honey; syrup prepared with honey. **M. de ac'etate cu'pri,** linimentum æruginis. **M. de mercuria'li compos'itum** (succ. purif. mercurialis, ℥ij; boraginis, anchusæ officinalis, āā ℥ss; iris pseudacori radicis recent., ℥ij; rad. sicc. gentianæ, ℥j; mellis, ℥iij; vini albi, ℥xiij); cathartic, stomachic, etc. **M. rosa'tum,** mel rosæ. **M. de ro'sis,** mel rosæ. **M. sim'plex,** *Syrup of honey;* demulcent.

Mellituria, mel-le-tu're-ah. Melituria.

Mellitus, mel-le'tus. Melitus.

Me'lo aquat'icus. Cucumis citrullus.

Meloæmia, mel-o-e'me-ah (*melas,* black, *haima,* blood). State of blood characterized by its incoagulability, black color, and septic properties.

Melobesia, mel-o-be'ze-ah. Genus of Algæ, possessing therapeutical virtues of chalk.

Melocampyle, mel-o-kam'pe-le. Distortion of limbs.

Melocarpus, mel-o-karp'us. Fruit of Aristolochia clematitis.

Melochia corchorifolia, mel-ok'e-ah kor-kor-e-fo'le-ah. Plant growing in the East Indies; employed there externally for snake-bites.

Melochitis, mel-o-ke'tis. *Armenites, Armenian stone.* Variety of blue carbonate found in Germany, the Tyrol, and especially in Armenia; formerly employed as a cardiac, and as proper for purging away melancholy.

Melodidymus, mel-o-did'e-mus (*melos,* limb, *didumos,* double). Double member or limb.

Mel'oë maia'lis. See *Cantharis.* **M. ni'ger,** *M. Pennsylvanicus,* class Insecta, ord. Coleoptera. Blistering fly, native of the United States; it feeds upon Prunella vulgaris or self-heal, and Ambrosia trifida or stickweed. These flies resemble the Spanish flies in properties. **M. Pennsylvan'icus,** M. niger. **M. proscarabæ'us,** anciently used as a diuretic and antihydrophobic; see *Cantharis.* **M. vesicato'rius,** cantharis.

Melolontha (mel-ol-onth'ah) **vulga'ris.** Insect said to possess aphrodisiac properties.

Melomele, mel-om'el-e. Melimelium.

Melom'eles (*melos,* limb, *meleos,* unprofitable). Monster with supernumerary limbs. Condition is called *Melomelia.*

Mel'on (*melon,* apple). Disorder of the eye in which it protrudes out of the socket; see *Exophthalmia.* Also Cucumis melo: seeds are officinal and are diuretic. **M. plant,** Cucumis melo. **M., water,** Cucurbita citrullus.

Meloncus, mel-on'kus (*melon,* cheek, *onkos,* tumor). Tumor of the cheek.

Melongena, mel-on'jen-ah (*melon,* apple). Solanum melongena.

Mel'on-seed bod'ies. Bodies resembling melon-seeds, sometimes observed in joints and sheaths of tendons.

Meloplacuntium, mel-o-plak-un'she-um. Meloplacus.

Meloplacus, mel-op'lak-us (*melon,* quince, *plakous,* cake). A compound obtained by boiling *wine, honey, quince, pepper,* etc. together.

Meloplastic, mel-o-plas'tik (*melon,* cheek, *plasso,* to form). *Genoplastic.* An epithet for the operation for forming a new cheek when any part of it has been lost, the operation being called *Meloplasty.*

Me'los. *Membrum.* Member; limb; an organized part composed of other parts.

Melosal'gia (*melos*, limb, *algos*, pain). Pain in a limb.

Meloschisis, me-los'kis-is (*melon*, cheek, *schisis*, fissure). Congenital fissure of the face embracing the upper lip and cheek.

Melosis, mel-o'sis (*mele*, probe). The act of probing a wound, ulcer, etc.; catheterism.

Meloth'ria pen'dula. Creeping cucumber; fruit is purgative.

Melothrum, mel-o'thrum. Bryonia alba.

Melotis, mel-o'tis (*mele*, probe, *ous*, ear). A small probe; a probe for the ear. See *Apyromele.*

Melotridymus, mel-o-trid'e-mus (*melos*, limb, *tridumos*, threefold). Fœtal monstrosity with three sets of limbs.

Melotris, mel-o'tris. Melotis.

Melt. Spleen; also the sperm of fish; milt.

Melt'ing. Fusion.

Me'lum. An apple; fruit in general; also a round, firm female breast; the cheek, *mala.* The *apple-eye* or *melon-eye* is an apple-formed projection of the eye from the orbit. See *Melon.* **M. Armeni'acum**, Prunus Armeniaca. **M. Cydo'nium**, see *Pyrus Cydonia.*

Melustum, mel-us'tum (burnt honey). Melasses.

Mem'ber. Membrum. **M., viri'le**, penis.

Membra pudenda, mem'brah pu-den'dah. Genital organs. **M. vil'ia**, pudibilia.

Membrana, mem-bra'nah (*quia membra tegit*, because it covers limbs). Membrane. **M. abdom'inis**, peritoneum. **M. adamantin'ea**, cuticle of tooth. **M. adipo'sa**, cellular membrane. **M. adventit'ia**, decidua reflexa. **M. agni'na**, amnios. **M. albugin'ea profun'da**, see *Albugineous.* **M. albugin'ea superficia'lis**, see *Albugineous.* **M. allantoï'des**, allantois. **M. amphiblestroi'des**, retina. **M. aponeurot'ica**, aponeurosis. **M. arachnoï'dea**, hyaloid membrane. **M. aryepiglot'tica**, arytæno-epiglottic fold. **M-æ atlan'tico-occipital'es**, occipito-atlantal ligaments. **M. basila'ris**, a delicate membrane in the cochlea, stretched across from the free margin of the osseous lamina to the outer part of the spiral canal. The two zones into which the basilar membrane is divisible are called *habenula tecta* or *arcuata*, and the *zona pectinata.* **M. blastoder'mica**, blastoderma. **M. Bruch'ii**, choroidea tunica. **M. cadu'ca**, decidua. **M. c. reflex'a**, decidua reflexa. **M. c. ve'ra**, decidua vera. **M. capsula'ris tes'tis**, albuginea. **M. cap'sulo-pupilla'ris**, see *Crystalline.* **M. carno'sa**, dartos. **M. cellulo'sa**, cellular membrane; decidua (membrana). **M. cer'ebri mol'lis**, pia mater. **M. cer'ebri pro'pria**, pia mater. **M. cer'ebri ten'uis**, pia mater. **M. cho'rii**, chorion. **M. chorio-capilla'ris**, see *Choroidea tunica.* **M. circumcin'gens**, periosteum. **M. circumossa'lis**, periosteum. **M. commu'nis**, decidua. **M. cor circumplex'a**, pericardium. **M. cor'dis**, pericardium. **M. coro'næ cilia'ris**, ciliary zone. **M. Cort'ii**, see *Corti, organ of.* **M. costa'lis**, pleura. **M. co'stas succin'gens**, pleura. **M. cras'sa**, decidua reflexa. **M. cribrifor'mis**, decidua. **M. cribro'sa**, decidua. **M. cumuli**, stratum proligerum. **M. cuticula'ris**, dura mater. **M. decid'ua**, decidua. **M. decid'ua exter'na**, decidua vera. **M. decid'ua menstrua'lis**, decidua, menstrual. **M. decid'ua reflex'a**, decidua reflexa. **M. decid'ua seroti'na**, see *Decidua.* **M. Demoursi**, M. of Demours. **M. demuria'na**, see *Aqueous humor* and *Cornea.* **M. denta'ta**, denticulatum ligamentum. **M. dermato'des**, dura mater. **M. Descemet'ii**, see *Aqueous humor* and *Cornea.* **M. diaphrat'ton**, mediastinum. **M. Duddelia'na**, see *Aqueous humor.* **M. dura cer'ebrum am'biens**, dura mater. **M. e'boris** (*ebur*, ivory), a membrane connected with the development of the teeth, which is made up of a number of cells, *odontoblasts*, arranged perpendicularly on the surface immediately over the plexus of vessels in the central portion of the dental papilla. **M. elas'tica**, membrane, elastic. **M. epicra'nia**, galea aponeurotica capitis. **M. excoria'bilis**, dartos. **M. exter'na den'tium**, tapetum alveoli. **M. exter'na system'atis nervo'si centra'lis**, dura. **M. farcimina'lis**, allantois. **M. fenes'træ rotun'dæ**, see *Fenestra.* **M. fenestra'ta**, delicate granular membrane perforated with holes, placed between the internal and external granule-layers of the retina; see *Retina* and *Artery.* **M. fibro'sa tym'pani**, middle layer of membrana tympani. **M. filamento'sa**, decidua reflexa. **M. fiac'cida**, part of membrana tympani extending over notch of Rivinus. **M. flocculen'ta**, decidua. **M. fœ'tum involven's**, amnion. **M. fus'ca**, see *Sclerotic.* **M. germinati'va**, blastoderm. **M. granulo'sa**, *Granular membrane* or *layer;* layer of yellow granular matter lining the inner layer of the Graafian follicle, and regarded by Kölliker as epithelium. **M. humo'ris a'quei**, see *Aqueous humor.* **M. hyaloï'dea**, see *Hyaloid.* **M. hyo-epiglot'tica**, hyo-epiglottic ligament. **M. interme'dia**, mesoblast. **M. intermuscula'ria brach'ii**, ligamenta intermuscularia brachii. **M. inter'na**, endopleura. **M. inter'na system'atis nervo'si centra'lis**, pia. **M. interspina'lis**, interspinal ligament. **M. intestina'lis**, allantois. **M. intrachorioï'dea**, tunica Ruyschiana and membrana brachii taken as one. **M. ir'idis ante'rior**, lamella iridis anterior. **M. ir'idis poste'rior**, composed of cells situate between dilatator pupillæ and pigmentary layer of iris. **M. Jaco'bi**, tunica Jacobi. **M. Jaco'bi Ar'nold**, see *Iris.* **M. lamino'sa**, *Laminar membrane;* membrane investing the fœtal surface of the placenta when the amnion is removed, considered to be the remains of the allantois formed out of a thickened reticulated magma upon the fœtal surface. **M. ligamento'sa**, ligamentum tectorium. **M. lim'itans**, see *Membrane, basement, Iris, Membrane, limitary* or *limiting.* **M. lim'itans olfacto'ria**, membrane over surface of olfactory epithelium. **M. lim'itans ret'inæ**, limiting membrane of retina. **M. lin'guæ**, see *Tongue.* **M. loca'lis**, pia. **M. macilen'tior**, epiploon, gastrohepatic. **M. me'dia**, tunica media. **M. me'dia cer'ebri**, arachnoid. **M. mol'lis**, pia. **M. muco'sa**, see *Membrane* and *Decidua.* **M. muscula'ris muco'sæ**, smooth muscular fibres forming a proper layer in the mucous membrane of the intestines. **M. nervo'rum**, neurilemma. **M. nic'titans**, valvula semilunaris. **M. obli'qua**, ligamentum rotundum antibrachii. **M. obturato'ria**, membrane or ligament which almost entirely covers the obturator foramen. **M. obturato'ria fenes'træ rotun'dæ**, membrana tympani secundaria. **M. obturato'ria laryn'gis**, thyro-hyoid membrane. **M. obturato'ria sta'pedis**, fine membrane between the two rami and base of stapes. **M. obturato'ria ventric'uli quar'ti**, valve of Vieussens. **M. olfacto'ria**, pituitary membrane. **M. os'sa amplec'tans**, periosteum. **M. os'sis**, periosteum. **M. o'vi mater'na**, decidua. **M. o'vuli cortica'lis**, membrane of the egg-shell. **M. pala'ti**, mucous membrane of hard palate. **M. pellu'cida**, amnion. **M. pharyn'gobasila'ris**, pharyngeal aponeurosis. **M. pigment'i**, see *Choroïdea tunica* and *Iris.* **M. pinguedino'sa**, see *Cellular membrane.* **M. pin'guis intestino'rum**, mesentery. **M. pituita'ria**, pituitary membrane; see *Membrane.* **M. pituito'sa**, see *Membrane.* **M. pleurit'ica**, pleura. **M. præexis'tens**, decidua. **M. præformati'va**, *Preformative membrane.* Structureless membrane situate between the enamel pulp and the enamel, believed by some to be the most external layer of the matrix, projecting beyond the odontoblasts. As the presence of such a membrane can only be demonstrated after the use of chemical reagents, it is considered by others to be only an artificial result from their employment. **M. præten'sa**, peritoneum. **M. prolif'era**, blastoderm. **M. prolig'era**, discus proligerus. **M. pro'pria**, basement membrane and Folliculi Graafiani; see *Cortex ovi.* **M. pro'pria cer'ebri**, pia. **M. pro'pria ster'ni**, membrane over the sternum, formed by junction of the sterno-costal ligaments with the periosteum. **M. pro'pria tu'bæ**, lining over cartilage of Eustachian tube. **M. pulmo'num**, pleura pulmonalis. **M. pupilla'ris**, pupillary membrane. **M. pupilla'ris persev'erans**, see *Pupillary membrane.* **M. putam'inis** (*putamen*, shell or husk), membrane adherent to the inner surface of the egg-shell—*putamen* or *testa ovi.* **M. quad-**

rangula'ris, portion of membrana elastica laryngis situate above false vocal cord. **M. reticula'ris ret'inæ**, external membrane of retina. **M. retifor'mis cho'rii**, decidua reflexa. **M. reu'niens**, consisting of M. r. inferior and M. r. superior; term applied to processes of the protovertebræ. **M. Ruyschia'na**, choroid (inner layer). **M. saccifor'mis**, separate synovial membrane for the inferior radio-cubital articulation which covers the upper surface of the triangular ligament, and the sort of incomplete ring which circumscribes the head of the ulna. **M. semiluna'ris conjuncti'væ**, M. nictitans. **M. semipellu'cida**, caligo. **M. sero'sa**, membrane, serous. **M. sero'tina**, decidua serotina. **M. sinuo'sa**, decidua. **M. spongio'sa**, decidua. **M. subcosta'lis**, pleura. **M. succin'gens**, diaphragm, pleura. **M. superchoroï'dea or suprachoroï'dea**, numerous bands of connection existing between the sclerotic and choroid coats of the eye which are sometimes developed into a network, to which this name is given. **M. tecto'ria** (*tectum*, roof), *Membrane of Corti*. Elastic membrane in the cochlea, attached at one edge to the membrane of Reissner, and on the other to the peripheral wall of the cochlea a little above the basilar membrane; see *Corti*. **M. ten'uis**, arachnoid. **M. ter'tia**, membrana nictitans. **M. testa'cea**, membrana testæ. **M. tes'tæ**, *Shell membrane;* membrane lining shell of the bird's egg: a simple membrane. **M. thora'cem intersep'iens**, mediastinum. **M. transver'sa**, membrane between rings of trachea and bronchi. **M. tym'pani**, see *Tympanum*. **M. tym'pani secunda'ria**, M. obturatoria fenestræ rotundæ. **M. urina'ria**, allantois. **M. u'teri inter'na evolu'ta**, decidua. **M. u'vea**, uvea. **M. vagi'næ præten'sa**, hymen. **M. vasculo'sa cer'ebri**, pia mater. **M. vaso'rum commu'nis**, endangium. **M. velamento'sa**, see *Rods of Corti*. **M. verricula'ris**, retina. **M. versic'olor**, peculiar membrane situated immediately behind the retina and in connection with it; separable into distinct layers from the choroid, and supplied with blood-vessels. **M. vestibular'is**, membrane of Reissner; see *Lamina denticulata*. **M. villo'sa**, decidua reflexa. **M. virginitat'is**, hymen. **M. vitelli'na**, zona pellucida. **M. vit'rea**, hyaloid. **M. vocal'is**, portion of mucous membrane of larynx covering vocal cords. **M. Wachendorfia'na**, pupillary membrane. **M. Zin'nii**, lamella iridis anterior; see *Iris*.

Membranaceous, mem-bran-a'she-us. Membranous.

Membrane, mem'brane. Name given to different thin organs representing a species of supple, more or less elastic webs, varying in their structure and vital properties, and intended, in general, to absorb or secrete certain fluids, and to separate, envelop, and form other organs. *Simple membranes* comprise three orders: 1. *Mucous membrane*, so called on account of the mucous fluid by which it is constantly lubricated. Mucous membranes line the canals, cavities, and hollow organs which communicate externally by different apertures on the skin. Bichat refers them to two great divisions—the *gastro-pulmonary* and the *genito-urinary*. Mucous membranes have a striking analogy with the cutaneous tissue in organization, functions, and diseases. They are composed of corium, papillæ, and epidermis, and are furnished with a multitude of follicles which secrete a viscid humor—mucus. They receive a number of arterial vessels, veins, lymphatics, and nerves. 2. The *Serous membranes* are transparent, thin, and composed of one lamina. One surface adheres to other textures, the other is smooth, polished, and moistened by a serous fluid. They are arranged—in the form of sacs without apertures—as great intermediate reservoirs for the exhalant and absorbent systems, in which the serous fluid in passing from one system tarries some time before it enters the other. Serous membranes resemble the areolar membrane in structure and diseases. They facilitate the motion on each other of the organs which they envelop. They may be divided into (*a*) *Serous membranes*, properly so called, as the arachnoid, pleura, peritoneum, and tunica vaginalis. (*b*) *Synovial membranes* or *capsules*, which belong to joints, tendons, aponeuroses, etc. These membranes—mucous and serous—are constituted of similar layers—epithelium, basement membrane, condensed areolar tissue—and a looser form of areolar tissue, termed *submucous* in one case, *subserous* in the other. 3. *Fibrous membranes* are almost all continuous, and terminate at the periosteum, their common centre. They have been divided into: 1. *Enveloping aponeuroses, Aponeuroses of insertion, Fibrous capsules of the joints*, and *Fibrous sheaths of tendons;* 2. The *Periosteum; dura mater, Sclerotica, Tunica albuginea testis, Fibrous membrane of the spleen*, etc. Fibrous membranes are not free or moistened by any particular fluid, adhere by both surfaces to the neighboring parts, are firm, resisting, but slightly elastic, and of a white color; sometimes pearly and glistening. Their vessels are numerous in some, as in the dura mater and periosteum; in others scarcely perceptible, as in the aponeuroses. Fibrous membranes, in general, augment the solidity of the organs which they envelop; retain the muscles in their respective positions; favor the motion of the limbs, and that of the muscles and skin; form canals and rings for the passage of different organs, etc. The three chief species of *Compound membranes* are: 1. *Serofibrous*, formed of a serous and fibrous lamina, intimately adherent to each other; as pericardium, dura mater, and tunica albuginea. 2. *Seromucous*, formed of a serous and mucous lamina; as the gall-bladder at its lower part. 3. *Fibromucous*, constituted of the union of a fibrous and mucous membrane; as the mucous membrane of the nasal fossæ, gums, etc. **Mem'brane, accident'al**, M., false. **M., adventit'ious**, M., false. **M., anhist'ous**, decidua. **M-s, an'imal**, membranes enveloping fœtus. **M. of a'queous hu'mor**, membrana humoris aquei. **M., arach'noid**, see *Arachnoid*. **M. of Arnold**, see *Iris*. **M., base'ment**, *Primary* or *Limitary basement;* delicate structureless lamella of membrane found beneath the epidermis or epithelium on all the free surfaces of the body, and as a basis on which the constituents of parts, as of the iris, retina, etc., rest. **M., bas'ilar**, membrana basilaris; see also *Corti*. **M. bones**, those originating from membrane. **M. of Bruch**, see *Choroïdea tunica*. **M-s, cer'ebral**, dura, arachnoid, and pia. **M., choroid**, choroïdea tunica. **M. of Corti**, see *Membrana tectoria* and *Corti*. **M., costocor'acoid**, see *Pectoralis minor*. **M., cricothy'roid**, see *Cricothyroid*. **M., dysmenorrhœ'al**, see *Dysmenorrhœa*. **M., elas'tic**, membrane formed of the elastic areolar tissue, and occurring in the coats of vessels, especially in the arteries, in the trachea, and bronchi, etc. **M. of the enam'el**, cuticula. **M., false**, *Accidental* or *Adventitious membrane, Pseudomembrane;* membranous productions which form on all the free natural surfaces and on every free accidental surface are so called; are in general produced by the exudation of fibrinous matter susceptible of organization, which takes place in consequence of inflammation of the various tissues. These accidental membranes occur on the skin after the application of a blister; on mucous surfaces, as in croup; on the parietes of inflamed veins and arteries, etc. Cicatrices of wounds are formed of them. By some it has been proposed to give the name pseudomembrane to fibrinous exudations, as in diphtheritis, which are devoid of organization, whilst neomembrane may be applied to such fresh productions, as from serous membranes, as have become supplied with vessels and nerves. **M., fen'estrated**, see *Artery*. **M., fer'tile**, endocept. **M., fi'brous**, see *Membrane*. **M., fi'brous, of eye**, sclerotic. **M., germ**, blastoderm. **M., ger'minal**, see *Blastoderm* and *Molecule*. **M., gran'ular**, membrana granulosa. **M., hap'togen**, see *Haptogenous*. **M., homoge'neous**, membrane of very delicate structure situated directly over tissue of villi of human placenta. **M., Hux'ley's**, see *Huxley*. **M., hy'aline**, membrana propria. **M., hy'aloid**, see *Hyaloid membrane*. **M., hyo-epiglot'tic**, membrana hyoepiglottica. **M., hyo-thyreoid**, membrana hyo-thyreoïdea. **M., intercos'tal**, fascia, intercostal. **M., inter'nal, of heart**, endocardium. **M., interos'seous**, membrana interossea. **M., interos'seous, of forearm,**

membrana interossea antibrachii. **M., interos'seous, of leg,** membrana interossea cruris. **M., invest'ing,** membrane, haptogenous. **M. of i'vory,** membrana eboris. **M., Ja'cob's,** tunica Jacobi. **M., keratog'enous,** matrix of nail. **M., lam'inar,** membrana laminosa. **M., lim'itary** or **lim'iting, of ret'ina,** primary or structureless membrane lining the retina, and becoming blended at its anterior portion with the hyaloid membrane; see *Retina*. **M., med'ullary,** endosteum. **M., mu'cous,** see *Membrane*. **M. nasal'e,** pituitary membrane. **M., Nas'myth's,** cuticula dentis. **M., nic'titating** or **nic'tating,** membrana nictitans. **M., nu'clear,** membrane enveloping cell-nucleus. **M., ob'turator,** see *Obturator*. **M., olfac'tory,** see *Olfactory nerves* and *Pituitary membrane*. **M., o'vular,** membrana vitellina. **M., per'forated,** see *Artery*. **M., periodon'tal,** periosteum, dental. **M., perior'bital,** periorbita. **M., præform'ative,** membrana præformativa. **M., pri'mary,** basement membrane. **M., prolig'erous,** discus proligerus. **M., pseu'do,** false membrane. **M., pu'pillary,** see *Pupillary*. **M., pyogen'ic,** layer of granulated tissue, rich in vessels, inside of an abscess. **M. of Reich'ert,** Bowman's layer. **M. of Reiss'ner,** see *Lamina denticulata*. **M. of Ruysch,** M. chorio-capillaris; choroid (inner layer); Ruyschia tunica. **M. of Schwann,** neurilemma. **M., Schneider'ian,** pituitary membrane. **M., se'rous,** see *Membrane*. **M., shell,** membrana testæ. **M. of Shrapnell,** membrana flaccida. **M., simple,** see *Membrane*. **M., struc'tureless,** membrana propria. **M., subepithe'lial, of Debove,** endothelium; see *Epithelial*. **M., syno'vial,** see *Membrane*. **M., tecto'rial,** organ of Corti. **M. of Tenon,** fascia of Tenon. **M., testa'ceous,** membrana putaminis. **M., thy'ro-hy'oid,** see *Thyrohyoid*. **M., tu'bular,** neurilemma. **M., tym'panal,** see *Tympanum*. **M., tympan'ic,** see *Tympanum*. **M., un'dulatory, of a spermatozo'oid,** membrane of delicate structure uniting spiral filament of spermatozooid with body and tail. **M., u'tero-epicho'rial,** decidua vera. **M., vas'cular,** choroïdea tunica. **M., vesic'ular syno'vial,** bursa mucosa. **M., vir'ginal,** hymen. **M., vitel'lary,** zona pellucida. **M., vit'reous,** membrane of Descemet. **M., yolk,** membrane, vitelline.

Membraneless, mem'bran-less. Devoid of membrane.

Membraneous, mem-bran'e-us. Membranous.

Membranes of brain. These are the dura mater, arachnoid, and pia mater. **M. of the fœ'tus,** the membranes; membranes which immediately envelop the fœtus in the cavity of the uterus, and the rupture of which gives rise to the discharge of the liquor amnii. These membranes are the decidua, chorion, and amnion. **M. of spi'nal cord,** the same as those of the brain. **M., the,** membranes of the fœtus.

Membraniform, mem'bran-i-form (*membrana, forma,* shape). Resembling a membrane. Name given to thin and flat parts which resemble membranes. **M. mus'cles,** very broad and thin muscles, as the platysma myoides, obliquus abdominis, etc.

Membranine, mem'bran-een. Having the character of a membrane.

Membrano-carneous, mem-bra'no-kar'ne-us. Possessing membranous and fleshy structure.

Membranocranium, mem-bran-o-kran'e-um (*membrana, kranion,* skull). Membranous condition of embryonic skull before ossification has taken place.

Membranogenic, mem-bran-o-jen'ik. Producing membrane.

Membranoid, mem'bran-oid. Membraniform.

Membranology, mem-bran-ol'o-je. Treatise on structure, etc. of membranes.

Membranosus, mem-bran-o'sus. Fascia lata muscle. Membranous.

Membranous, mem'bra-nus. Having the nature of membrane; formed of membrane. **M. lab'yrinth,** see *Labyrinth*. **M. portion of ure'thra,** see *Urethra*. **M. semicir'cular canals',** see *Semicircular canals*. **M. spi'ral lam'ina,** see *Corti*.

Membranula (mem-bran'u-lah) (dim. of **Membrana**) or **Membran'ulet.** Hymenium; membranule. **M. coro'næ cilia'ris,** see *Ciliary*. **M. lunat'a vagi'næ,** hymen. **M. nervo'rum,** neurilemma. **M. semiluna'ris conjuncti'væ,** valvula semilunaris.

Membranule (mem'bran-ule) or **Membran'ula.** Small membrane.

Membrosus, mem-bro'sus (*membrum,* male organ). One whose penis is very large.

Mem'brum. *Limb, Member.* The limbs or extremities or members of animals are certain parts exterior to the body, which are more or less apparent, long, and movable. By means of their limbs animals transport themselves from one place to another and defend themselves or attack others. In man they are four in number—two upper or thoracic, and two lower, pelvic or abdominal. Also the male organ. **M. genita'le viro'rum,** penis. **M. mulieb're,** clitoris. **M. semina'le,** penis. **M. viri'le,** penis.

Memoria, me-mo're-ah. Cerebral faculty by which past impressions are recalled to the mind.

Memory (mem'o-re), **loss of.** Amnesia.

Memphites (mem-fe'tees) **lapis.** Stone found near ancient Memphis; esteemed narcotic.

Menagogues, men'a-gogs (*menes, ago,* to drive). Emmenagogues.

Mendacia unguium, men-dah'se-ah un'gwe-um (*mendax,* false, *unguis,* nail). See *Flores unguium*.

Mendesion, men-des'e-on. Ægyptiacum.

Mendosus, men-do'sus (*mendax,* false). False; relating to incomplete parts, as floating ribs.

Me'ne. Moon.

Menecratis accipiter, men-ek-rat'is ak-sip'it-ur. Bandage shaped like a hawk's claw.

Menelcosis, men-el-ko'sis (*menes, helkosis,* ulcer). Vicarious menstruation from an ulcer.

Menes, men'ees. Menses.

Menfrige, men'fre-je. See *Pistacia lentiscus*.

Menidrosis, men-id-ro'sis (*menes, hidrosis,* sweating). Sweating of menstrual blood.

Ménière's disease, ma'ne-air's dis-ease'. Labyrinthic, auditory, or aural vertigo. Affection described by Dr. Paul Ménière in 1861, in which the patient, after recovering consciousness from an apoplectiform attack or severe vertigo, finds himself totally deaf in one ear, with tinnitus aurium, rotatory movements toward the affected side, etc.

Meningarthrocace, men-in-gar-throk'as-e (*meningo, arthron,* joint, *kakos,* diseased). Inflammation of the membranes of a joint. When accompanied with fibrinous exudation from the synovial membrane, it is called *Arthromeningitis crouposa;* with suppuration, *A. purulenta*.

Meningeal, men-in'je-al. Relating to the meninges, or merely to the dura mater. **M. ap'oplexy,** see *Apoplexy*. **M. ar'tery, mid'dle,** largest of the branches given off by the internal maxillary artery. It enters the cranium by the foramen spinale, and distributes its branches chiefly to the dura mater. **M. grooves,** sulci meningei. **M. nerve,** branch given off by jugular ganglion of pneumogastric, which returns to the cranium and innervates the meninges. **M. veins, inter'nal,** follow the meningeal arteries. **M. veins, middle,** tributaries of ptyerygoid plexus, which accompany the meningeal artery. **M. ves'sels,** vessels of the membranes of the brain.

Meninges, men-in'jees. Membranes enveloping the brain and spinal cord—dura mater, arachnoid, and pia mater.

Meninghæmato'ma. Hæmatoma of the dura mater.

Meningia tuberculosa, men-in'je-ah tu-ber-cu-lo'sah. See *Hydrocephalus*.

Meningiitis, men-in-je-e'tis. Meningitis, involving especially the arachnoid membrane.

Meningina, men-in-je'nah. Name given by Chaussier to the pia mater, united to the cerebral layer of the arachnoid. **M., in'ner lam'ina of the,** pia mater.

Meninginitis, men-in-jin-e'tis. Inflammation of the meningina.

Meningion, men-in'je-on (dim. of **Meninx,** membrane). Arachnoid membrane.

Meningis custos, men-in'jis kus'tos. Meningophylax.

Meningitis, men-in-je'tis. Inflammation of a membrane, and especially of the meninges or membranes of the brain or spinal cord. When excessively malignant and rapidly fatal, it is called by the French *Méningite foudroyante.* See *Phrenitis.* **M. arthrit'ica,** cephalagra. **M., bas'ilar,** M., tuberculous. **M., ascend'ing,** M. ascending from the lower part of the spinal cord. **M., cer'ebral,** inflammation of the membranes of the brain. **M., cer'ebro-spi'nal,** *Cerebral* or *Cerebro-spinal* or *Syncopal typhus, Epidemic* or *Typhoid* or *Malignant meningitis, Petechial fever, Cerebro-spinal fever, Cerebro-spinal arachnitis, Sinking typhus, Malignant* or *Typhoid meningitis;* alarmingly fatal form of epidemic fever which prevailed in different countries of Europe, and also in certain portions of the United States, during the middle of the nineteenth century more especially. It is attended with painful contraction of the muscles of the neck and retraction of the head, headache, vertigo, delirium, coma, pain in the back and limbs, tetanoid phenomena, hyperæsthesia of the skin, and in certain epidemics by a purpuric eruption, *Spotted fever.* It was considered by Boudin to constitute the cerebro-spinal form of the nosological group of typhus. See *Fever, purpuric malignant,* and *Typhus.* **M. chirur'gica,** M. from external injury; traumatic M. **M., chron'ic cer'ebral,** chronic M. at the upper surface of the brain, combined with chronic M. of the lower surface. **M., convul'sive,** M. with convulsions as a conspicuous feature. **M., epidem'ic,** M., cerebro-spinal. **M. exudati'va,** inflammation of membrane of spinal cord, with effusion of serum. **M., fo'cal,** meningitis localized in a small space. **M., ful'minant cer'ebro-spi'nal,** M., with intense symptoms, dark purpuric spots, and usually rapidly fatal termination. **M., gout'y,** gout, cerebral. **M., gran'ular,** hydrocephalus internus. **M. gummato'sa,** syphilitic form of meningitis. **M., hemorrhag'ic,** M. accompanied with sanguineous effusion. **M. hydrocephal'ica,** hydrocephalus internus. **M., ich'orous,** form of meningitis, with ichorous or puriform fluid in contact with the membranes or spinal cord. **M. infan'tum,** hydrocephalus internus. **M. luet'ica,** syphilitic form of meningitis. **M. mechan'ica,** traumatic meningitis; M. chirurgica. **M. membrano'sa,** M., spinal. **M. mesencephal'ica,** inflammation of the meninges of the medulla oblongata, and pons Varolii more especially. **M., metastat'ic,** M. occurring in later stages of other diseases, as pneumonia, acute rheumatism, etc. **M., otit'ic,** M. from, or associated with, purulent inflammation of the middle or internal ear. **M. perip her'ica,** M., spinal. **M. phantasmataph'ora,** delirium tremens. **M., phrenit'ic,** M. accompanied with symptoms of mental disorder. **M. potato'rum,** delirium tremens. **M., pur'puric,** form of cerebro-spinal meningitis which may become rapidly intense and fatal. **M., rhachid'ian,** M., spinal. **M., rheumat'ic,** rheumatism, meningitic. **M., scroph'ulous,** hydrocephalus internus. **M., se'nile,** M. of old persons; slow in progress and accompanied with delirium and general paralysis. **M. sero'sa,** M. accompanied with serous effusion. **M. sid'erans,** M., fulminant. **M., spi'nal,** *M., rhachidian, Perimyelitis, Myelomeningitis;* inflammation of the meninges of the spinal marrow. **M., spu'rious,** chronic hydrocephalus. **M., syphilit'ic,** meningitis due to, or associated with, syphilitic taint; chronic, and attacking the lower surface of the brain. **M., traumat'ic,** M. from external injury. **M., tuber'cular,** see *Hydrocephalus internus.* **M. tuberculo'sa,** hydrocephalus internus. **M., ver'tical,** meningitis occurring in the superior portion of the brain.

Meningitophobia, men-in-je-to-fo'be-ah (*meningitis, phobos,* fear). Condition in which great dread of meningitis exists, and which sometimes seems to induce the symptoms of that disease.

Meningium, men-in'je-um (dim. of **Meninx,** membrane). Fine delicate membrane; arachnoid tunic of the brain.

Meningo, men-in'go (*meninx,* membrane). In composition, membrane.

Meningocele, men-in-go-se'le (Eng. men-in'go-seel) (*meningo, kele,* rupture or tumor). See *Encephalocele.* **M., cer'ebral,** tumor of the head resembling hydromeningocele. **M., spi'nal,** see *Hydromeningocele* and *Hydrorrhosis.*

Meningocephalitis, men-in-go-sef-al-e'tis (*meningo, kephale,* head). Inflammation of the membranes and brain.

Meningocerebritis, men-in-go-ser-eb-re'tis. Meningocephalitis; encephalitis.

Meningococcus, men-in-go-kok'kus (*meninx,* membrane, *kokkos,* kernel). Coccus supposed to be the cause of cerebro-spinal fever.

Meningo-encephalitis, men-in'go-en-sef-al-e'tis. Encephalitis accompanied with meningitis.

Menin'go-encephalocele, en-sef-al-o-se'le (Eng. en-sef'al-o-seel). Tumor of the head similar to hydromyelocele.

Menin'go-ependymitis, ep-en-dim-e'tis. Hydrocephalus accompanied with deposition of fluid in the ventricles and induration of the ependyma.

Meningogastralgia, men-in-go-gas-tral'je-ah. Neuralgic or other pain in the meninges.

Meningogastric (men-in-go-gas'trik) **fe'ver.** Fever, gastric.

Meningogastri'tis. Fever, gastric.

Meningomalacia, men-in-go-mal-ak'e-ah (*meningo, malakia,* softening). Softening of membranes in general.

Meningomy'ces (*meningo, mukes,* fungus). Fungoid growth on the membranes of the brain.

Meningomyelitis, men-in-go-me-el-e'tis. Inflammation of the spinal cord and its membranes.

Meningomyelocele, men-in-go-me-el-o-se'le (Eng. men-in-go-mi'el-o-seel (*meninx,* membrane, *muelos,* marrow, *kele,* tumor). Spina bifida in which the covering is connected with bulging wall of the cyst; spinal nerves from this part of the cord pass through it.

Meningophylax, men-in-gof'el-aks (*meningo, phulax,* preserver). Instrument for depressing the dura mater and guarding it from injury while the bone is cut or rasped.

Meningorhachidian (men-in-go-rak-id'e-an) **veins** (*meninx,* membrane, *rhachis,* spine). Veins uniting into plexuses on inside of spinal canal, situate between membranes and vertebræ of spinal cord.

Meningorrhagia, men-in-gor-rhaj'e-ah. Meningeal hemorrhage.

Meningorrhœa, men-in-gor-rhe'ah (*meningo, rheo,* to flow). Effusion of blood upon or between the membranes of the brain.

Meningosis, men-in-go'sis. Union of bones by means of membrane—*e. g.* the articulation of cranial bones in the fœtus; a variety of syndesmosis.

Meningospinal, men-in-go-spi'nal. Relating to the spinal membranes or meninges.

Meningosymphysis, men-in-go-sim'fe-sis (*meningo, sumphusis,* growing together). Adhesion of or by membrane; adhesion of the membranes of the brain to each other or to the brain.

Meningosyzygia, men-in-go-siz-ig'e-ah (*meningo, suzugia,* conjunction). Meningosymphysis.

Meningozeuxis, men-in-go-zukes'is (*meninx,* membrane, *zeuxis,* adhesion). Meningeal adhesion.

Meningozeuxi'tis. Inflammation of adherent membranes.

Meninguria, men-in-gu're-ah (*meningo, ouron,* urine). Passage of urine containing membranous shreds.

Men'inx. Membrane (especially one that invests the brain). **M. arachnoï'dea,** arachnoid membrane. **M. au'ris,** membrana tympani. **M., cer'ebral,** cerebral membrane. **M. choroï'des,** pia mater. **M. cras'sa,** dura mater. **M. du'ra,** dura mater. **M., exte'rior,** dura mater. **M. fibro'sa,** dura mater. **M., inte'rior,** pia mater. **M. me'dia,** arachnoid membrane. **M. Pachei'a** or **scle'ra,** dura mater. **M. sero'sa,** arachnoid membrance. **M. vasculo'sa,** pia mater.

Menischesis, men-is'ke-sis (*menes, ischo,* to restrain). Amenorrhœa, when the menses do not appear at the usual age.

Menisci men-is'ke (*meniskos,* dim. of *mene,* moon). interarticular cartilages. **M., tac'tile, of Ran'vier,**

expansion of nerve-fibres in the epidermis having shape of a meniscus.

Menis'cus. Concavo-convex lens; interarticular cartilage. **M. interme'dius,** intermediate fibro-cartilage. **M., neg'ative,** M. auricularis. **M., pos'itive,** convexo-concave lens.

Menispermine, men-e-sperm'een. Alkaloid found in Menispermum Canadense and M. cocculus.

Menispermum angulatum, men-e-sperm'um an-gulat'um (*mene,* moon, *sperma,* seed, in allusion to the crescentic shape of the seed). M. Canadense. **M. Canaden'se,** *Moonseed, Yellow parilla,* ord. Menispermaceæ. Climbing plant growing in various parts of the United States; used as a substitute for sarsaparilla in scrofula, and called in the West *Sarsaparilla*; excitant tonic. Menispermum (Ph. U. S.) is the rhizome and rootlets of M. Canadense. **M. coc'culus,** systematic name of the plant, the dried fruit of which is well known by the names of *Cocculus Indicus, Indian berries, Indian cockles, Fish berries, Coccus Indicus.* The berries are remarkable for their inebriating and destructive quality to fish. A deleterious principle appears to reside in the kernel and in the active principle, called *Picrotoxin.* Cocculus Indicus has been used in decoction to kill vermin; it has at times been added to beer by fraudulent tradesmen to render it more inebriating. **M. colum'ba,** Jateorrhiza calumba. **M. fenestra'tum,** Pereira medica. **M. glau'cum,** M. cocculus. **M. palma'tum,** calumba. **M. tubercula'tum,** Chinese plant, an extract from the root of which is a stomach tonic and astringent. The same may be said of *Menispermum cordifolium*—the *Goluncha* of Bengal. **M. verruco'sum,** M. tuberculatum.

Menikelis, men-ik-e'lis (*menocelis*). Yellowish spots appearing on the skin, observed during suppression of the menses.

Men'ispine. Bitter alkaloid from Menispermum Canadense.

Menocelis, men-o-se'lis (*menes,* menses, *kelis,* stain). Amenorrhœa with purpura or congestion of the skin.

Menocryphia, men-o-krif'e-ah (*menes, kruptos,* concealed). Amenorrhœa.

Menoke'lis. Menocelis.

Menolipsis, men-o-lip'sis (*menes, leipsis,* want). Amenorrhœa; retention of the menses. See *Menopause.*

Meno'mene. Zizania aquatica.

Menometas'tasis. Vicarious menstruation.

Menopause (men'o-pause) or **Menopausis,** men-o-pau'sis (*menes, pauo,* to cause to cease). Natural cessation of the menses. See *Menses.*

Menophania, men-o-fan'e-ah (*menes, phaino,* to appear). First appearance of the menses.

Menoplania, men-o-plan'e-ah (*menes, plane,* wandering). Vicarious menstruation; also an affection resulting from suppression of menstruation.

Menorrhagia (men-or-rha'je-ah), **Menorrhœ'a** (*menes, rhegnumi,* to flow fiercely). Flow of the menses. Frequently the word is used synonymously with uterine hemorrhage or metrorrhagia, or for immoderate flow of the menses—profuse or excessive menstruation. Menstruation; metrorrhagia. **M. al'ba,** leucorrhœa. **M. diffic'ilis,** dysmenorrhœa. **M. erro'nea,** vicarious menstruation. **M. lochia'lis,** excessive lochial discharge, with blood. **M. Naboth'i,** hydrorrhœa gravidarum. **M. stillati'tia,** dysmenorrhœa.

Menorrhagic (men-or-rhaj'ik) **fe'ver.** See *Fever, menorrhagic.* **M. menstrua'tion,** menorrhagia.

Menorrhœa, men-or-rhe'ah (*menes, rheo,* to flow). Ordinary flow of the menses. Also too long continuing or too often returning menstruation. Menorrhagia.

Menoschesis, men-os'kes-is (*menes, cheo,* to hold). Amenorrhœa, when the menses do not appear at the usual age.

Menosep'sis (*menes, sepsis,* putrefaction). Putridity of the menses.

Menostasia (men-o-staz'e-ah) or **Menostasis,** men-os'tas-is (*menes, stasis,* standing). Retention of the menses and their accumulation in the uterus; also acute pain sometimes preceding each appearance of the menses, and presumed to proceed from the stasis of blood in the capillary vessels of the uterus. Hæmatometra.

Menotyphlo'sis or **Menotyphlo'tes** (*mene,* moon, *tuphlos,* blind). Moon-blindness; ocular inflammation presumed to be caused by the moon.

Menoxenia (men-oks-en'e-ah) or **Menoxenosis,** men-oks-en-o'sis (*menes, xenos,* foreign). Irregular menstruation.

Mens. Mind.

Mensa, men'sah. Table. Upper superficial part or corona of the jaw teeth.

Mensal'is. Trapezius.

Men'ses (*men,* a month). *Courses, Menstrual flux, Monthly courses* or *periods, Flowers, Turns, Terms, the Reds, Troubles.* Sanguineous evacuation from the uterus; menstrual blood, the monthly occurrence of which constitutes menstruation or monthly illness. First appearance of the menses—*menophania*—is usually preceded by the discharge of a fluid whitish mucous matter from the vagina, by nervous excitement, vague pains and heaviness in the loins and thighs, numbness of the limbs, etc. More or less indisposition and irritability also precede each successive recurrence of the menstrual flux. In temperate climates each period, *menstrual period,* ordinarily continues from three to six days, and returns in twenty-six to twenty-eight days, and the quantity lost varies from four to eight ounces; according to Vierordt, 100–200 grammes; in England and Northern Germany, 120 g. (Smellie and Dobson); 90–150 g. (De Haen); 150 g. (Pasta); Holland, up to 180 g.; Southern Germany, up to 240 g.; Italy and Spain, up to 360 g.; Greek Archipelago, up to 90 g. The menses continue to flow from the age of puberty till the age of 45 or 50. The menstrual epoch is thus from 30 to 35 years. The following interesting facts in regard to the time of appearance of the menses have been recently tabulated from various sources (Vierordt): In Germany—Berlin, commencement of 15th year; in Bavaria, 16th year; in Austria, 15 years 7½ months; in Hindu women in Calcutta, 11 years 11 months; in negro women in Jamaica, 14 years 10 months; in Esquimaux women in Labrador, 15 years 3 months; in Denmark and Norway, 16 years; in Norway, Lapp women, 16.7 years; in Hungary: Jewish women, 14–15 years; Magyar women, 15–16 years; Slovac women, 16–17 years; in Transylvania, German women and Hungarians, 15 years; in Roumanian, Armenian, and Jewish women, 14 years. The menses appear, according to Clay: in tropical countries at 8–11 years of age; in Abyssinia, India, and Turkey, at 9–11 years; in France, Italy, and Spain, at 11–13 years; in England, 13–15 years; in Iceland, Lapland, Greenland, 17–20 years. According to Felt, they appear in hot climates at 13 years 6 days; in temperate, at 14 years 6 days; in cold, at 15 years 10 days.

At the term of the natural cessation of the menses, *Menopause,* the flux becomes irregular, and this irregularity is occasionally accompanied with symptoms of dropsy, glandular tumors, etc., constituting what is called the *critical time* or *turn* or *change of life;* yet it does not appear that the mortality is increased by it.

The menstrual discharge comes from the vessels of the uterus and vagina, and differs from ordinary blood by its peculiar odor and by its not coagulating. It is usually arrested during pregnancy and lactation. In warm climates women usually begin to menstruate early, and cease sooner than in the temperate regions; the quantity lost is also greater. In the colder regions the reverse is true, as a general rule. Dried menstrual blood, especially of a woman in her first menstruation, was formerly given internally as an antiepileptic. **M. al'bi,** leucorrhœa. **M. anom'ali,** paramenia. **M. de'vii,** vicarious menstruation. **M. dolorifi'ci,** dysmenorrhœa. **M. immod'ici,** menorrhagia. **M., reten'tion of the,** see *Amenorrhœa.* **M. stillan'tes,** oozing of blood from the uterus; discharge of blood from the uterus. **M.**

super'flua, menorrhagia. **M., suppres'sion of the,** amenorrhœa.

Mensium retentio, men'se-um re-ten'she-o (retention of the menses). See *Amenorrhœa.*

Menstrua, men'stru-ah. Menses. **M. al'ba,** leucorrhœa. **M. diffic'ilis,** dysmenorrhœa. **M. doloro'sa,** dysmenorrhœa. **M. exig'ua,** see *Menorrhagia.* **M. immod'ica,** menorrhagia. **M. super'flua,** menorrhagia. **M. vica'ria,** menstruation, vicarious.

Menstrual, men'stru-al. Catamenial. **M. decid'ua,** see *Decidua membrana.* **M. excre'tion,** see *Menses.* **M. flux,** menses. **M. or'gan,** membrane lining the uterus taken as a special organ, similar to adenoid glands, in regard to menstruation. **M. pe'riod,** see *Menses.* **M. secre'tion,** see *Menses.*

Menstruant, men'stru-ant. One subject to catamenia.

Men'struate. To undergo the process of menstruation.

Menstruatio, men-stru-ah'she-o. Menstruation. **M. al'ba,** discharge of colorless menstrual fluid. **M. anom'ala,** paramenia. **M. diffic'ilis** or **dolorif'ica,** dysmenorrhœa. **M. impedi'ta,** amenorrhœa; retention of menses. **M. per insol'itas vi'as,** menstruation, vicarious. **M. membrana'cea,** membranous dysmenorrhœa. **M. nim'ia,** menorrhagia. **M. præ'cox,** premature menstruation, occurring before the usual age or time. **M. recidi'va,** menstruation when protracted beyond the usual age or recurring after its cessation. **M. reten'ta,** retention of menses; amenorrhœa; paramenia. **M. sero'tina** (*serotinus,* late in the day), retarded or tardy menstruation. **M. suppres'sa,** amenorrhœa; paramenia. **M. vica'ria,** appearance of the menstrual discharge from any other than the usual and normal place of outlet.

Menstruation, men-stru-a'shun. Flow of the menses; see *Menses.* **M., concealed,** M., occult. **M., difficult,** dysmenorrhœa. **M., ectop'ic,** vicarious menstruation. **M., labo'rious,** dysmenorrhœa. **M. metrorrha'gia,** menorrhagia. **M., occult',** *Concealed menstruation*; retention of the catamenia in the uterus or the vagina, there being secretion without excretion. **M., pre'mature,** menstruation occurring before the usual age or time. **M., profuse',** menorrhagia. **M., scan'ty,** see *Menorrhagia.* **M., ser'otine,** retarded or tardy menstruation. **M., supplement'ary,** menstruation, vicarious. **M., tar'dy,** menstruation retarded from any cause. **M., vica'rious,** *Ectopic* or *Supplementary menstruation,* occurs from other parts than the uterus. At times the discharged fluid has all the characters of the menstrual; at others it appears to be mere blood.

Menstrua'tus. Menstruant.

Menstruous, men'stru-us. Catamenial; also one affected with the menses or catamenia of the nature of menstrual blood.

Menstruum, men'stru-um (*mensis,* month). Monthly discharge of the female. The plural word menstrua is now, however, always used for the menses. The name menstruum was formerly given to every substance possessing the property of dissolving others slowly and with the aid of heat. A solvent, as water, alcohol, ether, acids, oils, etc. **M. aur'i,** nitromuriatic acid. **M. ventric'uli,** gastric juice.

Men'struus. Menstrual.

Mensura medica, men-su'rah med'e-kah. Measure of 48 ounces.

Mensuration, men-su-ra'shun (*mensura,* measure). *Measurement, Medical measuring.* Means for exploring the state of the thoracic and other cavities, consisting in a comparative measurement of each side of the chest by means of a ribbon extended from the median line of the sternum to the spine. When effusion exists on one side, the measurement is usually greater than on the other; and when a portion of a lung has ceased to exert its respiratory functions, the corresponding side of the chest becomes smaller. Also measurement of the skull, etc. See *Stethometer.*

Menta, men'tah. Mentha; penis.

Mentagra, ment'ag-rah (*mentum,* chin, *agra,* seizure). Sycosis. **M. infan'tum,** porrigo lupinosa; favus. **M. parasit'ica,** parasitic sycosis.

Mentagraphyte (men'ta-graf-ite) or **Men'tagraphyte** (*mentagra, phuton,* plant). Cryptogamous plant considered by some to produce mentagra, but by others to be accidental and not essential; see *Microsporon mentagrophytes.*

Mentagroph'yton. See *Mentagrophyte.*

Men'tal (*mens*). Belonging or relating to the mind; as mental aberration or alienation, mental diseases, etc. In anatomy mental signifies that which relates to the chin (*mentum,* chin), as **M. ar'tery,** given off by the inferior dental, and issuing at the mental foramen to be distributed on the lower lip. **M. diseases,** literally diseases of the mind, but extended to include various conditions of aberration of function of the nervous system, of which the following is perhaps the most convenient and satisfactory classification:

1. Mania. { Acute. Chronic. Recurrent. Puerperal.
2. Melancholia. { Acute. Chronic. Recurrent. Puerperal.
3. Primary Delusional Insanity (monomania)
4. Dementia. { Primary. Secondary. Senile. Organic (tumors, hemorrhages, etc.).
5. General Paralysis of the Insane.
6. Epilepsy.
7. Toxic Insanity (alcohol, morphine, etc.).
8. Congenital Mental Deficiency. { Idiocy. Imbecility. Cretinism.

M. fora'men, anterior maxillary foramen; outer orifice of the inferior dental canal, situate on the outer surface of the lower jaw-bone, opposite the second incisor or canine tooth, and giving passage to the vessels and nerves. **M. fos'sa,** see *Fossa, mental.* **M. nerve,** furnished by the inferior dental nerve, issues by the mental foramen and is distributed in numerous filaments to the muscles of the lower lip. **M. plex'us,** plexus formed by mental and facial nerves at foramen mentale. **M. point,** term used in craniometry, denoting the foremost median point of lower border of inferior maxillary bone. **M. pro'cess,** mental prominence. **M. prom'inence,** eminence of inferior maxillary bone, forming the chin. **M. re'gion,** region of the chin. **M. spines,** mental tubercles. **M. veins,** tributaries of facial vein.

Mentalis, men-tal'is. Levator labii superioris proprius.

Mentalization, men-tal-i-za'shun. The normal exercise of the functions of the brain, as in reason, judgment, etc.

Men'te cap'ti (L.). Old Roman term for those whose mental powers are deficient.

Mentha (men'thah) or **Men'ta aquat'ica** (*minthe, mintha,* the mint plant). *Wintermint,* ord. Labiatæ. Less agreeable than Mentha viridis, and more bitter and pungent; used like spearmint. **M. balsame'a,** M. piperita. **M. Capen'sis,** growing at the Cape of Good Hope, possesses the medical properties of the mints. **M. cata'ria,** Nepeta cataria. **M. cervi'na,** *Hart's pennyroyal, Hyssop-leaved mint,* possesses the properties of pennyroyal, but is very unpleasant. **M. citra'ta,** melissa. **M. cris'pa,** *Curled, Crisped,* or *Cross mint,* possesses properties of peppermint. **M. crucia'ta,** M. crispa. **M. feli'na,** Nepeta cataria. **M. genti'lis,** M. viridis. **M. hercyn'ica,** M. crispa. **M. hirsu'ta,** M. aquatica. **M. læviga'ta,** M. viridis. **M. monta'na,** calamintha. **M. nep'eta,** Nepeta cataria. **M. no'bilis,** M. gentilis. **M. officina'lis,** M. piperita. **M. palus'tris,** M. aquatica. **M. piperi'ta,** peppermint; leaves and tops are officinal (Ph. U. S.). The odor of this variety is strong and agreeable; taste pungent, aromatic, and producing a sensation of coldness in the mouth. Virtues depend upon essential oil and camphor. Stomachic and carminative. Chiefly used in the form of essential oil—the *Oleum menthæ*

piperitæ. *Trochisci menthæ piperitæ* each contain $\frac{15}{100}$ of the oil, with sugar and tragacanth; dose, ad libitum. *Essence of peppermint* consists of ol. menthæ pip., ℥j; sp. vin. rectif., f℥iv; see *Tinctura olei menthæ piperitæ*. **M. pule'gium**, *Pennyroyal, Pudding-grass;* the oil—*Oleum pulegii, Oil of pennyroyal*—possesses the virtues of the plant, resembling the mints in general. Among the vulgar it is esteemed an emmenagogue. *Aqua pulegii, Aqua menthæ pulegii, Pennyroyal water,* has been officinal in some pharmacopœias. **M. Roma'na**, Balsamita suaveolens, Tanacetum balsamita. **M. rotundifo'lia palus'tris**, M. aquatica. **M. Saracen'ica**, Balsamita suaveolens, Tanacetum balsamita. **M. sati'va**, M. viridis. **M. silves'tris**, *Horsemint, Brook* or *Water mint;* several varieties have been employed. **M. spica'ta**, M. viridis. **M. vir'idis**, *Spearmint;* leaves and tops are officinal (Ph. U. S.); odor strong, aromatic; taste warm, austere, bitterish. Virtues the same as those of the peppermint. *Oleum menthæ viridis* (Ph. U S.) is obtained from it. **M. vir'idis aquo'sa**, 2 parts of the oil to 1000 parts of water. **M. vir'idis spir'itus** contains 10 per cent. of the oil and 1 per cent. of the herb. **M. vulga'ris**, M. viridis.

Menthastrum, men-thas'trum. Mentha sylvestris.

Menthene, men'theen. A liquid product obtained from peppermint oil.

Men'thol. $C_{10}H_{20}O$. Stearoptene obtained by cooling oil distilled from fresh herb of Mentha piperasceus, M. glabrata, and M. piperita. Menthol camphor; peppermint camphor; crystalline body separating from oil of peppermint on standing. Used externally, solid, as in pencil form, or in solution, in neuralgia, migraine, etc., and highly recommended in the treatment of nasal affections. Anæsthetic, disinfectant; internally, carminative and stomachic, but probably not used. **M. ben'zoate**, benzoic acid added to menthol in the pencils increases the effect.

Mentigo, men-te'go (*mentum*, chin). Porrigo larvalis; sycosis; mentagra.

Men'tism (*mens*, mind). Irregular movement of the mind, whether from emotion or a vivid imagination.

Mentobicorneus, men-to-be-kor'ne-us (*mentum*, chin, *bicorneus*, two-horned). Geniohyoides.

Mentobregmat'ic. Relating to the chin and bregma.

Mentocondyl'ial tri'angle. Triangle formed with apex at gnathion and base situate between the two condylia.

Mentocoro'nial tri'angle. Triangle with its apex at the gnathion and base situate between the two condylia.

Mentogo'nial (*mentum*, chin, *gonia*, angle). Relating to the chin and gonion. **M. tri'angle**, triangle having its apex at gnathion and its base at bigoniac diameter.

Mentohyoi'deus. Occasional muscle from hyoid bone to lower jaw or platysma muscle.

Mentolabial, men-to-la'be-al (*mentum*, chin, *labium*, the lip). Levator labii inferioris and quadratus muscles united. See *Depressor labii inferioris*. **M. fur'row**, transverse depression between the lower lip and the chin, remarkable for the perpendicular direction of the hairs growing upon it.

Mentomas'toid. Relating to chin and mastoid process. **M. tri'angle**, triangle with apex at gnathion and bounded at its base by inferior mastoid diameter.

Mentula, men'tu-lah. Penis. **M. mulieb'ris**, clitoris.

Mentulagra, men-tu'lag-rah (*mentula*, penis, *agra*, seizure). Convulsive erection of the penis, such as is said to be sometimes observed in eunuchs; priapism; syphilis.

Mentulatus, men-tu-lat'us (*mentula*, penis). One whose penis is very large.

Mentuloma'nia (*mentula*, penis). Masturbation.

Men'tum. Chin; the inferior and middle part of the face, situate below the lower lip.

Mentzeleah (ment-zel'e-ah) **as'pera** or **hisp'ida.** Mexican herb; drastic; used in syphilis and gonorrhœa.

Menyanthes trifoliata, men-e-an'thees tre-fo-le-ah'tah (*men, anthos*, flower). *Water trefoil, Buckbean, Bogbean, Bog trefoil;* ord. Gentianaceæ. Taste is intensely bitter, and is extracted by water; tonic, anthelmintic, diuretic, cathartic, and, in large doses, emetic. In some countries it is used as a substitute for hops in making beer. **M. ver'na**, *American buckbean, Marsh trefoil, Water shamrock, Bitter root*, has similar properties.

Menyanthin, men-e-an'thin. Bitter principle obtained from Menyanthes trifoliata; a glucoside soluble in alcohol and water.

Menyanthol, men-e-an'thol. Volatile, oily product due to action of hot dilute acid upon menyanthin.

Meosis, me-o'sis. See *Meiosis*.

Mephitic, mef-it'ik. Anything possessed of an unwholesome property; chiefly applied to exhalations, or disease caused by them. **M. ac'id**, carbonic acid. **M. air**, carbonic acid. **M. gan'grene**, moist necrosis.

Mephitis, mef-e'tis. Old name for nitrogen, and, in general, for all exhalations and gases unfit for respiration. **M. hepat'ica**, hydrogen, sulphuretted. **M. inflammab'ilis**, hydrogen. **M. urino'sa**, ammonia.

Mephitism, mef'it-izm. Any pernicious exhalation.

Meramaurosis, mer-am-au-ro'sis (*mero, amaurosis*). Slight or partial amaurosis.

Meranæsthe'sia or **Meranæsthesis**, mer-an-ees-the'sis (*mero, an*, privative, *aisthesis*, sensation). Insensibility of a part of the body.

Meratrophia, mer-at-rof'e-ah (*mero, atrophia*, want of nourishment). Atrophy of some part of the body.

Mercaptan, mer-kap'tan. *Sulphur alcohol, Ethyl sulphydrate;* sulphydrate of an alcohol radicle; substance which, even in minute doses, gives rise to marked mental depression.

Mer'cier's bar. Ridge of submucous tissue which bounds the trigonum vesicæ posteriorly.

Mercurial, mer-ku're-al. Containing or relating to mercury; preparation of mercury. **M. belt**, see *Cingulum mercuriale*. **M. disease**, hydrargyriasis. **M. er'ethism**, see *Erethism*. **M. oint'ment**, unguentum hydrargyri. **M. pal'sy** or **paral'ysis**, paralysis due to exposure to mercurial vapors. **M. pill**, mass of mercury. **M. plas'ter**, emplastrum hydrargyri. **M. rash**, eczema mercuriale. **M. suppos'itories**, oleum theobromæ 120 parts; melt and add unguentum hydrargyri 60 parts. **M. trade disease**, palsy, mercurial. **M. tre'mor**, mercurial palsy.

Mercurialina, mer-ku-re-al-e'nah. *Mercurialia, Mercurialin.* Liquid alkaloid obtained from Mercurialis annua, an herbaceous plant of Europe, formerly employed as a purgative and emmenagogue.

Mercurialis, mer-ku-re-al'is (after Mercury). *Mercurialis annua, French mercury;* cathartic, hypnotic, and cosmetic, and has been chiefly used by way of *lavement*. See *Chenopodium bonus Henricus*. **M. peren'nis**, Kentish balsam; dog's mercury; acronarcotic.

Mercurialism, mer-ku're-al-izm. Pathological condition resulting from excessive or prolonged use of mercury. See *Hydrargyriasis*.

Mercurialist, mer-ku're-al-ist. One inordinately addicted to prescribing mercury.

Mercurialization, mer-ku-re-al-i-za'shun. State of being affected by mercury; one under the influence of mercury is said to be *mercurialized*.

Mer'curic alan'inate. Crystalline salt, soluble in cold water, prepared by dissolving oxide of mercury in a boiling aqueous solution of alanine; recommended for hypodermic use in syphilis. **M. ben'zoate**, used subcutaneously in syphilis. **M. car'bolate**, hydrargyri carbolas; prepared by the action of potassium carbolate upon mercuric chloride; recommended in constitutional syphilis; used in syphilis in dose of gr. $\frac{1}{4}$–$\frac{1}{2}$. **M. chlo'ride**, hydrargyri oxymurias. **M. cy'anide**, hydrargyri cyanidum. **M. formam'idate**, hydrargyrum formamidatum, used as convenient form for giving mercury. **M. im'idosuc'cinate**, white powder, employed as an antisyphilitic, usually subcutaneously. **M. i'odide**, hydrargyri iodidum rubrum. **M. meth'ide**, cases of fatal mer-

curial poisoning from this preparation have been recorded. **M. naph'tolate,** yellow odorless powder; dose internally, gr. j. **M. ni'trate,** see *Hydrargyri nitras.* **M. o'leate,** oleatum hydrargyri. **M. ox'ide,** hydrargyri oxydum cinereum. **M. oxycy'anide,** $Hg_2O(Cn)_2$; antiseptic, and said to be superior to corrosive sublimate as such. **M. pep'tonate,** yellowish liquid; mild mercurial for hypodermic use. **M. phen'ylate,** M. carbolate. **M. sal'icylate,** white, odorless, tasteless powder; used externally in gonorrhœa, and internally for same effect as other mercurials; it is mild in its effect, non-poisonous, and rapid in action. **M. sozoi'odol,** see *Sozoiodol.* **M. sul'phate,** hydrargyri sulphas. **M. sul'phate, ba'sic,** hydrargyri subsulphas flavus. **M. sul'phide,** hydrargyri sulphidum rubrum. **M. tan'nate,** green substance, odorless and tasteless; antisyphilitic; dose, 1 to 2 grains. **M. thy'molate** and **M. thymola'cetate,** employed in syphilis, internally or by intramuscular injection; also in tuberculosis of the lungs. **M. and zinc cy'anide,** white insoluble powder for antiseptic dressing.

Mercurii calx vitriolata, mer-ku're-e kalks vit-re-o-lat'ah. Hydrargyrus vitriolatus. **M. deuto-iodure'tum,** hydrargyri iodidum rubrum. **M. proto-iodure'tum,** hydrargyri iodidum, **M. sper'ma,** hydrargyrus acetatus. **M. ter'ra folia'ta,** hydrargyrus acetatus.

Mercurius, mer-ku're-us (after the god). Hydrargyrum. **M. aceta'tus,** hydrargyrus acetatus. **M. alkalisa'tus,** hydrargyrum cum cretâ. **M. calcina'tus,** hydrargyri oxydum rubrum. **M. caus'ticus fla'vus,** hydrargyrus vitriolatus. **M. cine'reus,** hydrargyri oxydum cinereum. **M. cinnebari'nus,** hydrargyri sulphuretum rubrum. **M. coralli'nus,** hydrargyri nitrico-oxydum. **M. corrosi'vus,** hydrargyri oxymurias. **M. corrosi'vus ru'ber,** hydrargyri nitrico-oxydum. **M. corrosi'vus sublima'tus,** hydrargyri oxymurias. **M. cosmet'icus,** hydrargyrum præcipitatum. **M. dul'cis,** hydrargyri submurias. **M. emet'icus fla'vus,** hydrargyrus vitriolatus. **M. gummo'sus Plenck'ii,** syrupus de mercurio mediante gummi. **M. lu'teus,** hydrargyrus vitriolatus. **M. mor'tis,** algaroth. **M. ni'ger moscat'i,** hydrargyri oxydum cinereum. **M. nitro'sus ca'lide para'tus,** see *Hydrargyri nitras.* **M. nitro'sus fri'gore para'tus,** hydrargyri nitras. **M. oxydula'tus hydrio'dicus,** hydrargyri iodidum. **M. præcipita'tus al'bus,** ammoniated mercury. **M. præcipita'tus corrosi'vus,** hydrargyri nitrico-oxydum. **M. præcipita'tus fla'vus,** yellow mercuric oxide. **M. præcipita'tus ni'ger,** hydrargyri oxydum cinereum. **M. sacchara'tus,** hydrargyrum saccharatum. **M. solu'bilis of Hahnemann,** see *Hydrargyri oxydum cinereum.* **M. sublima'tus dul'cis,** hydrargyri submurias. **M. cum sul'phure,** hydrargyri sulphuretum nigrum. **M. terres'tris,** Polygonum hydropiper. **M. vi'tæ,** algaroth. **M. vitriola'tus,** mercuric sulphate. **M. vi'vus,** mercury. **M. zot'icus Hartman'ni,** hydr rgyri submurias.

Mer'curous. Applied to mercury compounds in which two atoms of mercury are considered as forming a bivalent radical embracing the lower salts of mercury.

Mer'curous ammo'nium ni'trate. Hydrargyrum oxydulatum nitricum ammoniatum. **M. bro'mide,** salt of mercury obtained by double decomposition of potassium bromide and mercurous nitrate; same properties as mercurous iodide. **M. chlo'ride,** hydrargyri submurias. **M. i'odide,** hydrargyri iodidum viride. **M. ni'trate,** hydrargyri nitras. **M. ni'trate, ba'sic,** hydrargyri subnitras hydrargyrosus. **M. ox'ide,** hydrargyri oxidum nigrum. **M. tan'nate,** hydrargyri tannas, obtained by treating mercurous acetate with tannic acid; used in syphilis.

Mercury, mer'ku-re (after the god). Hydrargyrum. **M., ac'etate of,** hydrargyrus acetatus. **M., ac'id ni'trate of,** see *Hydrargyri nitras.* **M., amidochlo'ride of,** hydrargyrum præcipitatum. **M., ammo'niated,** hydrargyrum præcipitatum. **M., ammoniochlo'ride of,** hydrargyrum præcipitatum. **M. and ar'senic, i'odide of,** arsenic and mercury, iodide of. **M., bichlo'ride of,** hydrargyri oxymurias. **M., bini'odide of,** hydrargyri iodidum rubrum; see *Iodine.* **M., bisul'phuret of,** hydrargyri sulphuretum rubrum. **M., bo'rate of,** see *Borax.* **M., bro'mide of,** hydrargyri bromidum. **M. car'bolate,** mercuric carbolate. **M. with chalk,** hydrargyrum cum cretâ. **M., chlo'ride of, corro'sive,** hydrargyri oxymurias. **M., chlo'ride of, mild,** hydrargyri submurias. **M., com'pound ce'rate of,** ceratum hydrargyri compositum. **M., cy'anide of,** hydrargyri cyanuretum. **M., cyan'uret of,** hydrargyri cyanuretum. **M., deuto-i'odide of,** see *Iodine.* **M., dog's,** Mercurialis perennis. **M., Eng'lish,** Chenopodium bonus Henricus. **M. formam'idate,** see *Mercuric formamidate.* **M., French,** mercurial. **M., i'odide of,** hydrargyri iodidum. **M., i'odide of chlo'ride** or **iodochlo'ride of,** *Iodide of calomel* (made by the reaction of iodine on mild chloride of mercury). Two iodides may be prepared—the *iodide* and the *biniodide.* Both are violent irritants; the biniodide especially is a powerful caustic. Both have been given in scrofula. Biniodide is only used externally, like nitrate of silver, in scrofulous and certain syphilitic ulcerations. An ointment of the iodide is rubbed on scrofulous tumefactions. **M., i'odide of, green,** hydrargyri iodidum. **M., i'odide of, red,** hydrargyri iodidum rubrum. **M., i'odo-ar'senite of,** arsenic and mercury, iodide of. **M., iodochlo'ride of,** M., iodide of chloride of. **M., mu'riate of, corro'sive,** hydrargyri oxymurias. **M., mu'riate of, mild,** hydrargyri submurias. **M., ni'trate of,** hydrargyri nitras. **M., ni'trate of, acid,** see *Hydrargyri nitras.* **M., ni'tric ox'ide of,** hydrargyri nitrico-oxydum. **M., o'leate of,** see *Oleate.* **M., ox'ide of, black** or **gray,** hydrargyri oxydum cinereum. **M., ox'ide of, red,** hydrargyrum oxydum rubrum. **M., ox'ide of, yellow,** hydrargyri oxydum flavum. **M., oxymu'riate of,** hydrargyri iodidum rubrum. **M., perchlo'ride of,** mercuric oxide. **M., peri'odide of,** hydrargyri iodidum rubrum. **M., per'oxide of,** mercuric oxide. **M., persul'phate of,** mercuric sulphate. **M., phos'phuretted,** hydrargyrus phosphoratus. **M., precip'itate of, white,** hydrargyrum præcipitatum. **M., protochlo'ride of,** hydrargyri submurias. **M., proto-i'odide of,** see *Hydrargyrum iodidum* and *Iodine.* **M., prus'siate of,** hydrargyri cyanuretum. **M. and qui'nia, protochlo'ride of,** hydrargyri et quiniæ protochloridum. **M., sol'uble,** hydrargyri nitras. **M., subchlo'ride of,** hydrargyri submurias. **M., submu'riate of,** hydrargyri submurias. **M., sul'phate of,** mercuric sulphate. **M., sul'phuret of, black,** hydrargyri sulphuretum nigrum. **M., sul'phuret of, red,** hydrargyri sulphuretum rubrum; realgar. **M., sul'phuret of, with sul'phur,** hydrargyri sulphuretum nigrum. **M., superni'trate of, solution of,** see *Hydrargyri nitras.* **M., tar'trate of,** hydrargyri tartras. **M., three'-seeded,** Acalypha Virginica. **M., veg'etable,** mudar. **M. vine,** Rhus toxicodendron. **M. weed,** Mercurialis annua.

Merda, mer'dah. Excrement. **M. diab'oli,** asafœtida.

Merdivomus, mer-div'o-mus (*merda,* excrement, *vomo,* to vomit). One who vomits fæces.

Mer'dus. Excrement.

Merechema, mer-ek-a'mah (*meros,* thigh, *echema,* sound). Sound elicited by auscultation of the gravid uterus, supposed to be produced by friction of the thighs of the fœtus.

Meremphraxis, mer-em-fraks'is (*mero, emphraxis,* obstruction). Obstruction or infarction of an organ or part.

Merendera, mer-end'er-ah. *Bulbocodium.* Plant resembling colchicum found in the Pyrenees.

Meretrix, mer'et-riks. Prostitute. **M. metallo'rum,** copper.

Meriandra (mer-e-an'drah) **Benghalen'sis.** Bengal sage, shrub possessing an odor resembling camphor, and having stimulant properties.

Meriania, mer-e-an'e-ah. *Leucantha.* Shrub, genus Merianeæ; flowers are employed as a pectoral.

Meric, mer'ik (*meros,* a part). Relating to a part.

Mericism, mer'i-sizm. Merycism.

Mericus, mer'ik-us, Local.

Meridialysis, mer-e-de-al'is-is (*meros,* part, *dialysis*). Incomplete solution of a substance.

Meridian, me-rid'e-an. Imaginary great circle surrounding any globe and passing through the poles. **M. of the eye,** imaginary circle surrounding globe of the eye. **M. planes,** those passing through the line of sight and the retinal meridians; also planes passing through axis of the eye and meridians of the eye. **M. planes of field of regard,** planes which pass through the lines of regard and the meridians of the field of regard.

Meridianal, mer-id'e-an-al. Relating to a meridian.

Merid'ians. Imaginary lines on eyeball, retina, or visual field at the point where the planes intersect while passing through axis of the eye or through line of sight. **M. of the field of regard,** lines in field of regard by planes passing through line of regard.

Meridrosis, mer-id-ro'sis (*mero, hidrosis,* sweating). Partial perspiration.

Merimna (mer-im'nah) or **Merim'ne.** Cure.

Merismatic, mer-is-mat'ik (*merisma,* division). What takes place by division, as merismatic multiplication or reproduction; that which occurs by the splitting or division of cells or of whole beings.

Merismopedia, mer-is-mo-pa'de-ah. Bacterium increasing by division in two directions, forming lamellæ or plates. Several micrococci belong properly to this variety of bacteria. **M. gonorrhœ'æ,** micrococcus gonorrhœæ. **M. Goodserii,** sarcina ventriculi. **M. uri'næ,** sarcina urinæ. **M. ventric'uli,** sarcina ventriculi.

Meris'ta. Merismopedia.

Meristematic, mer-is-tem-at'ik. Merismatic.

Meristotropia, mer-is-to-tro'pe-ah. Meratropia.

Merithal, mer'e-thal. Part of fingers between the joints; phalanx.

Merizotropia, mer-iz-o-tro'pe-ah. Merotropia.

Mer'kel's cor'puscles. Grandry's corpuscles. **M.'s horizon'tal plane,** plane of auricular points and reaching to inferior border of orbits. **M.'s mus'cle,** cerato-cricoid.

Merlangus, mer-lan'gus. Gadus pollachius. **M. vulga'ris,** hake, found in Mediterranean and Atlantic Ocean; same uses as Gadus morrhua.

Me'ro (*meros,* part). In composition, a part.

Merobalaneum, mer-o-bal-an'e-um (*mero, balaneion,* bath). Bath, partial.

Merobalneum, mer-o-bal'ne-um. Bath, partial.

Meroblastic, mer-o-blas'tik (*meros,* part, *blastos,* germ). Term applied to the ova of oviparous animals, in which the yolk is chiefly nutritive, and in a small part only formative.

Merocele, mer-o-se'le (Eng. mer'o-seel) (*meros, kele,* tumor). *Femoral* or *crural hernia.* In this hernia the viscera issue from the abdomen through the crural canal, or through an opening immediately on the outer side of Gimbernat's ligament, which gives passage to lymphatic vessels. This affection is more frequent in the female than in the male, and especially in those who have had children. A tumor formed by merocele is generally small, round, and more or less difficult of reduction. In other respects it possesses all the characters of hernia. The neck of the sac has, close on the outside, the epigastric artery; above, the spermatic cord and spermatic artery in the male—the round ligament in the female; on the inside, Gimbernat's ligament; and, below, the pubes. When the obturator artery arises from the epigastric it generally passes on the outside of and below the orifice of the sac; sometimes, however, takes a turn above, and then to the inside of the opening.

Crural hernia admits of several rare varieties, as *Hernia of Cloquet* or *Pectineal crural hernia,* the hernia resting on the pectineus muscle, the aponeurosis of which may form an envelope to it; *hernia of Laugier,* or crural hernia, through Gimbernat's ligament; *hernia of Hesselbach,* or hernia with a diverticulum, through the cribriform fascia; and *Hernia of Sir Astley Cooper,* or crural hernia with a diverticulum, through the superficial fascia.

Merocoxalgia, mer-o-koks-al'je-ah (*meros, coxa,* hip, *algos,* pain). Coxalgia.

Merodialysis, mer-o-de-al'is-is (*meros,* part, *dialysis,* separation). Incomplete chemical decomposition.

Merology, me-rol'o-je (*mero, logos,* discourse). Branch of anatomy treating of the elementary parts or constituents of the tissues and humors of the organism.

Meropia, mer-o'pe-ah (*mero, opsis,* vision). Partial obscurity of vision.

Merorrheuma, mer-or-rhu'mah (*mero, rheuma,* defluxion, rheumatism). Rheumatism affecting a part; topical or local rheumatism.

Merorrhexis, mer-or-rheks'is (*meros, rhexis,* rupture). Merocele.

Me'ros. Femur, thigh.

Merotopia, mer-o-to'pe-ah (*meros,* part, *topos,* place). Reduction of a part into position.

Merotrope, mer-ot'ro-pe. Meratropia.

Merotro'pia (*meros,* part, thigh, *tropos,* turning). Formation of new chemical compounds after decomposition of their component parts. Reduction of a dislocation, as of the hip.

Mer'ry Andrew. Itinerant quack who exposes his nostrums for sale at fairs and markets. See *Charlatan.* So called from Dr. Andrew Boorde, who lived in the reigns of Henry VIII., Edward VI., and Queen Mary, and who was in the habit of frequenting fairs and markets, at which he harangued the populace.

Merten'sia marit'ima (after C. H. Mertens, botanist of Bremen). Pulmonaria maritima, oyster plant; plant is mucilaginous, and the leaves have a flavor resembling oysters. **M. pulmonarioï'des,** plant is mucilaginous. **M. Virginica,** *Pulmonaria Virginica, Virginian cowslip, Smooth lungwort;* indigenous. Family, Boraginaceæ. Plant is mucilaginous, and may be used as a demulcent.

Merulius, mer-u'le-us. Morchella esculenta. **M. auric'ula,** Peziza auricula. **M. des'truens** or **lac'rimans,** fungus producing dry-rot in wood. **M. vasta'tor,** M. lacrimans.

Me'rus. Pure, genuine; as vinum merum, unmixed wine. Also femur; thigh.

Mer'vine, male. Cypripedium luteum.

Merycism, mer'e-sizm. Rumination.

Merycology, mer-i-kol'o-je (*merukazo,* to ruminate, *logos,* description). Any work on rumination may be so termed.

Merypertrophy, mer-ip'ur-trof-e (*mero, hypertrophia,* supernutrition.) Hypertrophy of a part.

Méry's glands. Cowper's glands.

Mesa, mes'ah (*mesos,* middle). Genital organs.

Mesad, me'sad. Toward the median plane.

Mesamœboids, mes-am-e'boidz (*mesos,* middle, *amœba, eidos,* form). Free amœbiform cells of the mesoderm of the embryo; also a leucocyte of the adult. Elements of mesoderm cellular in character and possessing locomotion.

Mesaræicus (mes-ar-e'i-kus), **Mesaraic,** mes-ar-a'ik. Mesenteric.

Mesaræum, mes-ar-e'um (*meso, araia,* small intestines). Mesentery.

Mesardeon, mes-ard-e'on. Mesentery.

Mesarteriitis, mes-ar-te-re-e'tis (*meso, arteriitis,* inflammation of an artery). Inflammation of the middle layer of an artery.

Mesarteritis, mes-ar-ter-e'tis. Mesarteriitis.

Mesaticephalic, mes-at-e-sef-al'ik (*mesatos,* midmost, *kephale,* head). Term applied to skulls having an index of 75° to 80°.

Mesaticephalus, mes-at-e-sef'al-us (*mesatos* and *kephale*). Having a skull with an index of 75 to 80.

Mesatipelvic, mes-at-e-pel'vik (*mesatos,* midmost, *pelvis*). Relating to a pelvis with an index between 90 and 95.

Mesauchenus, mes-aw-ka'nus (*mesos,* middle, *auchen,* neck). Term given by Lissauer to skulls in which the line joining inion and basion forms an angle of 38° to 26° with the radius fixus.

Mescal, mes-kal'. Strong, intoxicating liquor, obtained from pulque.

Mesemar. Mismar.

Mesembryanthemum (mes-em-bre-an'the-mum)

acinacifor'me (*mesembria*, noon, because its flowers expand at midday). See *M. edule*. **M. Chilen'se**, Chilean species with very active cathartic properties. **M. cop'ticum**, see *Soda*. **M. crystal'linum**, *Diamond fig-marygold, Iceplant*, ord. Ficoideæ; a plant common in the neighborhood of Cape Town. It has been recommended in dysuria, ischuria, and some other affections of the urinary organs. **M. edu'le** and **M. acinacifor'me**, S. African plants; much used as domestic remedies at the Cape. Expressed juice of the leaves acts as an astringent in dysentery, and as a mild diuretic; also used as an antiseptic gargle in malignant sore throat, violent salivation, and aphthæ, and as a lotion to burns and scalds. **M. ficoï'des**, M. crystallinum. **M. tortuo'sum**, also a S. African plant; is said to possess narcotic properties.

Mesembryo, mes-em'bre-o (*mesos*, middle). Blastula.

Mesembryonic, mes-em-bre-on'ik. Relating to blastula.

Mesencephalic, mes-en-sef-al'ik. Relating to the mesencephalon.

Mesencephalon, mes-en-sef'al-on (*meso*, *enkephalos*, encephalon). *Midbrain.* In early fœtal development one of the three primary cerebral vesicles; from it are formed the crura cerebri below, corpora quadrigemina above, its cavity remaining as the aqueduct of Sylvius.

Mesencephalus, mes-en-sef'al-us (*mesos*, *enkephalos*). Term given by Lissauer to skulls in which the angle between lines from hormion to nasion and inion is from 142.5° to 156.5°.

Mesenchyma, mes-en'ke-mah (*meso*, middle, *enchuma*, infusion). Substance of the mesoderm of some animals.

Mesencranus, mes-en'kran-us (*mesos* and *enkranion*). Term applied by Lissauer to skulls with a median cerebellar sector of 15° to 20°.

Mesenna, mes-en'nah. Bark of an Abyssinian tree, the Albizzia anthelmintica, belonging to the family of the Mimosæ. The powdered bark is used by the natives, in doses of two ounces, as a powerful tæniafuge.

Mesenteremphraxis, mes-en-ter-em-fraks'is (*mesenteron*, mesentery, *emphraxis*, obstruction). Obstruction of the mesentery.

Mesenteric, mes-en-ter'ik. Relating or belonging to the mesentery. **M. ar'teries** are two in number, and distinguished into—1. *Superior mesenteric*, which arises from the anterior part of the abdominal aorta, below the cœliac. It immediately descends to the left, forward, behind the pancreas, and in front of the third portion of the duodenum, to gain the superior extremity of the mesentery, where it makes a long curvature, the convexity of which is turned forward and to the left. Toward the termination of the ileum it ends by anastomosing with a branch of the A. colica dextra inferior. At its concavity it gives off the three arteriæ colicæ dextræ, which belong to the great intestine, and at its convexity it sends off fifteen or twenty branches, distributed to the small intestines, after forming numerous arches by their anastomoses. 2. The *Inferior mesenteric artery* arises from the anterior part of the abdominal aorta, an inch and a half before its termination. It descends on the left side, behind the peritoneum, engages itself in the substance of the iliac mesocolon, forming a considerable curvature, whose convexity faces the left side. When it reaches the brim of the pelvis it passes along the posterior separation of the mesorectum, and attains the neighborhood of the anus, under the name superior hemorrhoidal artery. It gives off no branch at its concave part, but from the convex the three arteriæ colicæ sinistræ arise. **M. disease**, tabes mesenterica. **M. fe'ver**, enteric fever. **M. glands** or **gan'glia**, lymphatic ganglia of the mesentery. Through them the chyliferous vessels pass to the thoracic duct. When these glands become diseased nutrition is interfered with and atrophy produced. **M. her'nia**, if one of the layers of the mesentery be torn by a blow, while the other remains in its natural state, the intestines may insinuate themselves into the aperture and form a kind of hernia. Not known during life. **M. plex'uses** are furnished by the solar plexus, and have been distinguished into superior and inferior, like the mesenteric arteries, which they accompany. **M.** or **Mesara'ic veins** are two in number, and belong to the vena porta. They are distinguished into—1. Superior mesenteric or mesaraic or great mesaraic. This trunk receives, from above to below and on the right side, the three venæ colicæ dextræ and the gastro-epiploica dextra. Into its left side the veins of the small intestine open. It passes in front of the transverse portion of the duodenum, and, behind the pancreas, unites with the splenic vein to concur in the formation of the vena porta. The inferior or lesser mesenteric vein corresponds to the artery of the same name, and opens into the splenic near the union of that vein with the superior mesenteric and behind the pancreas.

Mesenterica, mes-en-ter'ik-ah. Vessel of the mesentery.

Mesenterico-mesocolic (mes-en-ter'ik-o-me-so-kol'-ik) **fold.** Ligamentum mesenterico-mesocolicum.

Mes'enteries (plural of **Mesentery**). See *Mesentery*.

Mesenteriitis, mes-en-ter-e-e'tis. Mesenteritis.

Mesenteriolum processus vermiformis, mes-en-ter-e'o-lum pro-ses'us ver-me-for'mis. Duplicature of peritoneum connecting the vermiform process with the mesentery.

Mesenteritic, mes-en-ter-it'ik. Relating to mesenteritis.

Mesenteritis, mes-en-ter-e'tis. Inflammation of the mesentery. Pain is here seated deeply and more immediately in the mesenteric region. External tenderness is less than in some of the other varieties of peritonitis.

Mesenterium, mes-en-ter'e-um. Mesentery. **M. cras'sum**, mesocolon. **M. u'teri**, broad uterine ligaments regarded as a whole.

Mesenteroid, mes-en'ter-oid (*mesenteron*, mesentery, *eidos*, resemblance.) Bearing a resemblance to the mesentery.

Mesenteron, mes-en'ter-on. Mesentery; middle portion of the fœtal alimentary canal.

Mesenterophthisis (mes-en-ter-o-te'sis) or **Mesenteriophthi'sis.** Tabes mesenterica.

Mesentery, mes'en-ter-e (*meso*, middle, *enteron*, intestine). Term in anatomy applied to several duplicatures of the peritoneum, which maintain the different portions of the intestinal canal in their respective situations, allowing, however, more or less motion. They are formed of two laminæ, between which are contained the corresponding portion of intestine and the vessels that pass to it. One only of these duplicatures has received the name *mesentery*, properly so called. This belongs to the small intestine, which it suspends and retains *in situ*. Its posterior margin, which is the smallest, is straight, and descends obliquely from the left side of the body of the second lumbar vertebra to the right iliac fossa. Its anterior margin is curved, undulating, plaited, and corresponds to the whole length of the small intestine. The mesentery contains, between the two laminæ which form it, a number of lymphatic ganglions, the trunks and branches of the mesenteric vessels, the nervous plexuses accompanying them, and many lacteals and lymphatics. **M., cæ'cal**, mesocæcum. **M., car'diac**, mesocardium. **M., col'ic**, mesocolon. **M., gas'tric**, mesogastrium. **M., rec'tal**, mesorectum. **M., sig'moid**, fold of peritoneum connecting sigmoid flexure to left iliac fossa. **M., u'terine**, mesometrium.

Mesera. Tutia.

Meseraic, mes-er-a'ik. Mesenteric.

Mesiad, me'ze-ad. Toward the median plane.

Mesial, me'ze-al (*mesos*, middle). Median; relating or appertaining to the middle. **M. plane**, imaginary plane dividing the head, neck, and trunk into similar halves toward right and left. Every aspect toward this plane is *mesial;* and every aspect toward right or left is *lateral;* every lateral aspect being *dextral* or *sinistral*. **M. plate**, see *Plate*.

Mesianum, mes-e-an'um. Plaster of litharge, thus, alum, etc. See *Aniceton.*

Mesion, mes'i-on. Middle plane.

Mesitylene (mes'it-il-een) **bihy'drate.** Acetone.

Mesmeric, mez-mer'ik (from Anthony Mesmer, the great promulgator of animal magnetism). Relating to mesmerism or animal magnetism, as the mesmeric state, etc.

Mesmerism, mez'mer-izm. Magnetism, animal; hypnotism.

Mesmerist, mez'mer-ist. Practiser of, or believer in, mesmerism.

Mesmerization, mez-mer-i-za'shun. *Magnetization.* Act of mesmerizing. State of being mesmerized.

Mesmerized, mez'mer-ized. *Magnetized.* Affected with mesmerism or animal magnetism. When the person is in a state of magnetic sleep, he is said to be *hypnotized.*

Mesmerizer, mez'mer-i-zer. *Animal magnetizer, Magnetizer.* One who practises mesmerism.

Mesmerophrenology, mez-mer-o-fren-ol'o-je. Phrenomagnetism.

Me'so (*mesos*, middle). In composition, middle.

Mesoarium, mes-o-ah're-um (*meso, oarion*). See *Ovary.*

Mesoarteritis, mes-o-art-er-e'tis (*meso, arteria*). Inflammation of middle arterial coat.

Mesobacteria, mes-o-bak-te're-ah (*meso, bakterion*, small rod). Subdivision of the coccobacteria, including the medium-sized organisms.

Mesoblast, me'so-blast (*meso, blastos*, germ). The mesoderm; middle layer of the blastoderm; the nucleus. See *Cytoblast* and *Molecule.* **M., allantoi'dean**, that part of the mesoblast from which the allantois is formed. **M., pari'etal**, upper or external mesoblastic layer. **M., somat'ic**, mesoblast, parietal. **M., splanch'nic** or **vis'ceral**, lower mesoblastic layer.

Mesoblastic, me-so-blast'ik. Relating to mesoblast.

Mesobrachycephalic, me-so-brak-e-sef-al'ik. Mesocephalic. Term applied to a head neither very long nor very short.

Mesobregmate, me-so-breg'mate (*meso, bregma*, top of the head). See *Cranium.*

Mesobregmus, mes-o-breg'mus. Term given by Lissauer to skulls in which the line drawn from hormion to bregma describes with the radius fixus an angle of 68° to 82°.

Mesobronchitis, mes-o-bron-ke'tis (*mesos, bronchia*, bronchial tubes). Inflammation affecting middle layer of bronchial tubes.

Mesobron'chium. Main bronchus of birds.

Mesocæcum, mes-o-se'kum (*meso, cæcum*). Name given to a duplicature of the peritoneum at the posterior part of the cæcum.

Mesocardia, mes-o-kar'de-ah (*meso, kardia*, heart). See *Ectocardia.*

Mesocardium, mes-o-kard'e-um (*meso, kardia*, heart). Fold of mesoblast attached to the heart. **M., ante'rior**, formed by an extension of the mesoblast from anterior cardiac surface to anterior wall of the body. **M., lat'eral**, duplicature of mesoblast which in the early developmental period furnishes a partial division between the general cavity and the cavity in which the heart is situated.

Mesocephalic, me-so-sef-al'ik (*mesos*, middle, *kephale*, head). Term applied in craniometry to a head of medium size. Also signifies relating to mesocephalon.

Mesocephalitis, mes-o-sef-al-e'tis (*meso, kephale*, head). Inflammation of mesencephalon.

Mesocephalon, mes-o-sef'al-on (*meso, kephale*, head). Medulla oblongata; pons Varolii.

Mesocephalus, mes-o-sef'al-us (*mesos*, middle, *kephale*, head). Cranium with a capacity of from 1350 to 1450 cubic centimetres.

Mesocerebrum, mes-o-ser'e-brum. Mesocephalon.

Mesochondriac, mes-o-kon'dre-ak (*meso, chondros*, cartilage). A name given by Boerhaave to fleshy fibres situate between the cartilaginous rings of the trachea.

Mes'occele or **Mesocœlia**, mes-o-se'le-ah. Aquæductus Sylvii.

Mesocolic, me-so-kol'ik (*meso, kolon*, colon). Belonging or relating to the mesocolon.

Mesocolon, mes-o-ko'lon. Name given to the duplicatures of the peritoneum which fix the different parts of the colon to the abdominal parietes. It has received different names, according to its situation. The *right lumbar mesocolon* fixes the ascending colon to the corresponding lumbar region. The *transverse mesocolon* arises from the concave arch of the colon, and forms a septum between the epigastric and umbilical regions. Its inferior portion is continuous with the mesentery. The *left lumbar mesocolon*, which contains the ascending colon, is continuous below with the *iliac mesocolon.* The last includes between its layers the sigmoid flexure of the colon, and ends in the mesorectum. The fold of peritoneum which retains the sigmoid flexure in connection with the left iliac fossa is called the *sigmoid mesocolon.* Under the right kidney it is narrow and firm, and forms the *right ligament of the colon;* at the under end of the left kidney it forms the *left ligament of the colon.*

Mesoconch, mes'o-konk. Possessing an orbital index between 80° and 85°.

Mesocranium, mes-o-kran'e-um (*meso, kranion*, skull). Vertex.

Mesocranum, mes-o-kran'um (*meso, kranon*, skull). Vertex.

Mesocuneiform, me-so-ku'ne-e-form (*mesos*, middle). Middle cuneiform bone.

Mesocynion, mes-o-sin'e-on (*mesos*, middle, *kuon*, dog). Union of talus and tibia.

Mesocyst, me'so-sist (*mesos*, middle, *kustis*, cyst). Double fold of peritoneum joining gall-bladder and liver, only met with rarely where the bladder is entirely covered by the peritoneum.

Mesodermic, me-so-dur'mik. Relating to mesoderm.

Mesodermum, mes-o-dur'mum (*meso, derma*, skin). Corpus mucosum.

Mesodme, mes-od'me (*mesodme*, crossbeam). Mediastinum.

Mesodmitis, mes-od-me'tis. Inflammation of the mediastinum.

Mesodont, me'so-dont (*mesos*, middle, *odous*, tooth). Having medium-sized teeth.

Mesoepididymis, mes-o-ep-e-did'e-mis (*meso, epididumis*, epididymis). Double serous fold like the mesocolon, formed by tunica vaginalis passing from the body of the epididymis and uniting it to the testicle.

Mesogastric, me-so-gas'trik (*mesos*, middle, *gaster*, belly). Relating to the umbilical region.

Mesogastrium, mes-o-gas'tre-um (*meso, gaster*, belly). Umbilical region; also a median membranous fold, a rudimental mesentery, which in early fœtal development connects the alimentary canal with the rest of the embryo. **M. Mül'leri**, portion of mesentery which passes from the vertebral column to the left curvature of the stomach.

Mesoglossal, me-so-glos'sal (*meso, glossa*, tongue). Situated in middle of tongue.

Mesoglossus, mes-o-glos'sus (*meso, glossa*, tongue). Genioglossus.

Mesoglottus, mes-o-glot'tus (*meso, glotta*, tongue). Genioglossus.

Mesognathic, me-so-nath'ik. Relating to mesognathion.

Mesognathion, mes-o-nath'e-on (*mesos*, middle, *gnathos*, jaw). The external of the two premaxillary bones described by Albrecht.

Mesognathism, me-so-nath'ism. Condition of being mesognathous.

Mesognathous, me-so-nath'us (*mesos*, middle, *gnathos*, jaw). Having a moderate or intermediate gnathic index of from 98° to 103°.

Mesolobar, me-so-lo'bar. Belonging or relating to the mesolobe or corpus callosum. **M. ar'teries**, arteries of the corpus callosum.

Me'solobe. Corpus callosum.

Mesolobic, me-so-lo'bik. Relating to the mesolobe.

Mesolobus, mes-ol'o-bus (*meso, lobos*, lobe). Corpus callosum.

Mesology, me-sol'o-je (*mesos,* middle, *logos,* speech). The science of the relations of organisms to the mediums surrounding them.

Mesomental, me-so-men'tal (*meso, omentum*). Relating to middle of omentum.

Mesomeria, mes-o-mer'e-ah (*meso, meros,* thigh). Parts of the body situate between the thighs and hips.

Mesomerion, mes-o-mer'e-on. Perineum.

Mesometritis, mes-o-met-re'tis (*mesos,* middle, *metra,* womb). Inflammation of the middle coat of the uterus.

Mesomet'rium. Vascular tissue associating the body of the uterus with contiguous organs.

Mesometron (mes-o-met'ron) or **Mesom'etry** (*mesos,* middle, *metra,* womb). Mesentery of womb or its annexes; broad ligament of the uterus.

Mesomphalum (mes-om'fal-um) or **Mesomphal'ion** (*meso, omphalos,* navel). Umbilicus.

Mes'on. Middle plane.

Mesonasal, me-so-na'sal. Situated in middle of nose.

Mesonephron, mes-o-nef'ron (*mesos,* middle, *nephros,* kidney). Fold of peritoneum which, when the kidney becomes displaced, may join it to the body-wall.

Mesonephros, mes-o-nef'ros. Wolffian body proper.

Mesonotum, mes-o-no'tum (*mesos,* middle, *noton,* back). Dorsal part of mesothorax.

Mesopanencephalus, mes-o-pan-en-sef'al-us (*panenkephalos,* the whole brain). Name given by Lissauer to skulls in which angle between lines drawn from hormion to basion and nasion is 163° to 188.5°.

Mesophlebitis, mes-o-fleb-e'tis (*meso, phlebitis*). Inflammation of a vein; inflammation of the middle layer of a vein.

Mesophlebium (mes-o-fleb'e-um) or **Mesophleb'ion** (*meso, phleps,* vein). Space between two veins.

Mesophryon, mes-of're-on (*meso, ophrus,* eyebrow). Part between the eyebrows.

Mesopleurium, mes-o-plu're-um (*meso, pleuron,* rib). Intercostal space.

Mesopleurius, mes-o-plu're-us. Intercostal.

Mesopodialia, mes-o-po-de-al'e-ah (*mesos,* middle, *podion,* foot). Bones of carpus and tarsus taken together as corresponding.

Mesor'chis. See *Mesorchium.*

Mesorchium (mes-or'ke-um) or **Mesor'chion** (*meso, orchis,* testicle). Duplicature of the peritoneum, which supports the testicle in its passage from the abdomen into the scrotum.

Mesorectum, mes-o-rek'tum (*meso, rectum,* the intestine rectum). Triangular reflection formed by the peritoneum between the posterior surface of the rectum and the anterior surface of the sacrum. Between the two layers of which the mesorectum is composed are found much areolar tissue and the termination of the inferior mesenteric vessels.

Mesorhine, mes'o-rheen (*mesorrheen,* having a medium-sized nose). Nose with an index from 48° to 53°.

Mesoropter, mes-or-op'tur (*mesoros,* boundary, and *optomai,* to see). Measure of field of accommodation; the distance within which an object is plainly visible.

Mesosal'pinx (*meso, salpinx,* Fallopian tube). Upper part of the broad ligament, included between the Fallopian tube, tubo-ovarian ligament, and ovary with its proper ligament.

Mesoscapula, mes-o-skap'u-lah. Spine of scapula.

Mesoscapular, mes-o-skap'u-lar (*meso, scapula*). Term applied in early life to the acromial extremity of the clavicle, the mesoscapular segment of that bone.

Mesoscelocele, mes-os-sel-o-se'le (Eng. mes-os'sel-o-seel) (*mesoscelon, kele,* rupture). Hernia, perineal. See also *Hernia.*

Mesoscelon (mes-os'ke-lon) or **Mesos'celum** (*mesos, skelos,* leg). Perineum.

Mesoscelophyma, mes-os-sel-o-fe'mah (*mesoscelon, phuma,* swelling). Tumor of the perineum.

Mesoseme, mes'o-seem (*mesos,* middle, *sema,* mark). Having an orbital index between 84 and 89°.

Mesostaphylic, mes-o-staf'il-ik (*mesos,* middle, *staphule,* uvula). Having a palatal index of from 80° to 85°.

Mesostate, mes'o-state (*mesos,* middle, *stasis,* state). Substance intermediate in formation and complexity in a series of metabolic changes.

Mesosternal, mes-o-stur'nal. Relating to mesosternum.

Mesosternebra, mes-o-stur'ne-brah (*mesos,* middle, *sternum*). Segment forming body of sternum, situated between the manubrium and xiphoid appendage.

Mesosternum, mes-o-stur'num (*mesos,* middle, and *sternum*). Body of the sternum proper; gladiolus.

Mesosthenic, mes-os-then'ik (*mesos,* middle, *sthenos,* strength). Possessed with a medium amount of muscular force.

Mesostomatous (mes-o-stom'at-us) or **Mesost'omus** (*meso, stoma,* mouth). Provided with a mouth in the middle of the body.

Mesotarsal, mes-o-tar's'l. Mediotarsal.

Mesotendon, mes-o-ten'dun. Membranous synovial folds extending to tendons from sheaths of their fibres.

Mesothelioma, mes-o-the-le-o'mah. Epithelioma developing from middle layer of tissue in embryo.

Mesothelium, mes-o-the'le-um. Epithelium which lines a primitive embryonic body-cavity.

Mesothenar, mes-oth'e-nar (*meso, thenar,* the thenar, the palm of the hand). Muscle which carries the thumb toward the palm. Winslow applied the term to the abductor pollicis, united to the deep-seated portion of the flexor brevis pollicis.

Mesotica, mes-ot'ik-ah (*mesos,* middle). Diseases affecting the parenchyma. Pravity in the quantity or quality of the intermediate or connecting substance of organs, without inflammation, fever, or other derangement of the general health.

Mesotocatarrhus, mes-ot-o-kat-ar'rhus (*mesos,* middle, *ous,* ear, *katarrhos,* catarrh). Catarrh of middle ear.

Mesotœchitis, mes-o-te-ke'tis. Inflammation of the mediastinum.

Mesotœchium (mes-o-te'ke-um) or **Mesotœ'chum** (partition wall, *mesos, toichos,* wall). Mediastinum.

Mesovarium, mes-o-var'e-um (*mesos,* middle, *ovarium,* ovary). Mesentery of the ovary.

Mesoxalate, mes-oks'al-ate. Combination of mesoxalic acid with a base.

Mespilodaphne (mes-pil-o-daf'ne) **cupula'ris.** Species reputed to possess stomachic, sudorific, and antidysenteric properties. **M. pretio'sa,** bark resembles cinnamon in its properties. **M. sas'safras,** Canella sassafras.

Mespilus, mes'pil-us (*meso, pilos,* a ball, from the resemblance of the fruit to half a ball). Ord. Rosaceæ. The medlar. Fruit and seeds of the medlar have both been used medicinally—the immature fruit as an astringent, and the seeds in nephritic diseases. See *Cratægus aria* and *Sorbus aucuparia.* **M. a'ria,** Cratægus aria. **M. domes'tica,** mespilus; Sorbus domestica. **M. German'ica,** mespilus. **M. interme'dia,** Mespilus oxyacantha. **M. læviga'ta,** Mespilus oxyacantha. **M. oxyacan'tha,** *White hawthorn;* the flowers of this uncommon European plant are sometimes used in infusion as a pectoral. **M. oxycanthoi'des,** Mespilus oxyacantha.

Mesquite (mes'keet) or **Mez'quite gum.** Gum obtained in New Mexico from a tree of the same family as the Acacia. Same virtues as gum arabic.

Mestee, mes-te'. See *Mestizo.*

Mestino. See *Mestizo.*

Mestizo (mes-te'zo) or **Mesti'no** (*mixtus,* mixed). In Spanish America, the child of a Spaniard or Creole and a native Indian. See *Halfcaste.* A *Mastee* or *Mestee* is the child of a white and mulatto or quadroon.

Mesua, mezh'u-ah. Genus of shrubs or trees natives of the tropics. **M. fer'rea,** *East Indian iron wood;* bark is astringent, and root has tonic properties. An oil is made from the seeds which is used for external applications in rheumatism. **M. nagana, pedunicula'ta, Roxburgh'ii,** or **salici'na,** M. ferrea. **M. specio'sa,** species similar to Mesua ferrea; bark and root

have sudorific properties; leaves are expectorant; oil of the seeds is employed externally in rheumatism.

Meta, met'ah (*meta, meth,* with, together with, after, change of form and place). Common prefix to terms.

Metabasis, met-ab'as-is (*metabaino, meta, baino,* to go, to digress). Change of remedy, practice, etc.

Metabioxyphenol, met-ah-be-oks-e-phen'ol. Resorcin.

Metabole, met-ab'o-le (*metaballo,* to transpose). Metabasis; transformation.

Metabolelogy, me-ta-bol-el'o-je (*metabole,* change, *logos,* description). Description of the changes which supervene in the course of a disease.

Metabolia, met-ab-ol'e-ah. Metabasis.

Metabolic, met-a-bol'ik. Appertaining to change or transformation. **M. force,** term employed by Schwann for the power possessed by living cells of changing the character of the substances brought in contact with them.

Metabolism, met-ab'o-lizm (*metaballo,* to change). Chemical change within the body in nutrition and secretion. The term includes anabolism, more complex, and katabolism, less complex change.

Metabolite, met-ab'o-lite. Product of metabolism.

Metabolous, met-ab'ol-us. Metabolic.

Metacarpal, met-a-kar'pal (*metacarpus*). Relating or belonging to the metacarpus. **M. ar'tery** arises from the radial at the moment it engages itself in the upper extremity of the abductor indicis. It descends obliquely upon the back of the hand; its branches are distributed to the abductor indicis and the integuments; some communicate with the dorsalis carpi. **M. articula'tions** are those by which the last four metacarpal bones are united together at their upper extremity. **M. bones,** or bones composing the metacarpus, are five in number, and distinguished into first, second, third, etc., beginning from the outer or radial side. They are articulated by their superior extremity with the bones of the second range of the carpus, and by the lower with the first phalanges. **M. canals',** spaces in palm of hand situate between tendons of flexors of fingers. **M. lig'ament,** *Inferior palmar ligament,* fibrous band, stretched transversely before the inferior extremities of the last four metacarpal bones, which it keeps in their respective positions. **M. mus'cles,** interosseous muscles of hand. **M. phalan'ges,** first phalanges of the fingers, so called because they are articulated with the bones of the metacarpus. **M. range** or **row of the car'pal bones,** lower row of carpal bones, so called because they are articulated with the bones of the metacarpus; they are composed of trapezium, trapezoid, magnum, and unciform.

Metacarpalia, met-ah-kar-pal'e-ah. Metacarpal bones.

Metacarpeus, met-ah-kar'pe-us. Abductor metacarpi minimi digiti.

Metacarpion, met-a-kar'pe-on. Metacarpus.

Metacarpocarpal, met-a-kar'po-kar-pal. Relating to the metacarpus and carpus, as the metacarpocarpal articulation.

Metacarpometacar'pal. Relating to the metacarpal bones in their associations with each other.

Metacarpophalan'geal. Relating to metacarpus and phalanges. **M. lig'aments, ante'rior,** digital fibro-cartilages.

Metacarpophalangeus pollicis, met-a-kar-po-fal-an-je'us pol'lis-is. Abductor pollicis manûs.

Metacarpophalangian, met-a-kar-po-fal-an'je-an. *Metacarpophalangal;* belonging to the metacarpus and phalanges. **M.** or **Metacarpophalan'gal articula'tions** are formed by the bones of the metacarpus and the corresponding phalanges. In these articulations the bony surfaces are incrusted with cartilage, covered by a synovial membrane, and kept in connection by means of an anterior and two lateral ligaments.

Metacarpus, met-a-kar'pus (*meta, karpos,* wrist). The part of the hand comprised between the carpus and fingers. Composed of five parallel bones, called *metacarpals,* forming the back of the hand externally and the palm internally.

Metacell'ulose, met-ah-sel'u-loze. Cellulose.

Metacerasma, met-ah-ser-as'mah (*meta, kerannumi,* to mix). Mixture of hot and cold water.

Metacerasmolutron, met-ah-ser-az-mol-u'tron (*metacerasma, loutron,* bath). Bath prepared either cold or warm.

Metacetamide, met-as-et'am-eed. Proprionamide.

Metace'tic acid. Proprionic acid.

Metacetonic, met-as-e-ton'ik (*meta,* change, *acetone*). Obtained as one of the products when sugar is heated with hydrate of potash; resembles acetic acid.

Metacheirisis, met-ah-ki-ris'is (*meta, cheir,* hand). Surgery; manual treatment of disease.

Metachirisis (met-a-kir'es-is) or **Metachirismus,** met-a-kir-is'mus. Surgery; manual treatment of disease.

Metachloral, met-a-klo'ral. White substance, insoluble in water, obtained by the action of sulphuric acid on anhydrous chloral. Narcotic like chloral hydrate, but less active.

Metachoresis, met-ah-ko-ra'sis (*meta, choreo,* to go). Metastasis. Dislocation.

Metachromatism, met-a-kro'ma-tizm (*meta, chroma,* color). Change of color.

Metachysis, met-ak'es-is (*meta, chuo,* to pour). Transfusion of blood, or introduction of any substance into the circulation.

Metacinema, met-ah-sin-a'mah (*meta, kineo,* to move). Metastasis.

Metacinesis, met-ah-sin-e'sis. Metastasis.

Met'acism. Act of using the letter *m* too frequently.

Metacœle (met-a-se'le) or **Metacœlia,** met-a-se'le-ah (*meta,* beyond, *koilia,* cavity). Fourth ventricle of the brain.

Metacondyle, met-a-kon'dile. See *Phalanx.*

Metacone, met'ah-kone (*meta,* beyond, *konos,* cone). Posterior external cusp of a superior molar.

Metaconid, met-ah-ko'nid. Anterior internal cusp of an inferior molar.

Metaconule, met-ah-kon'ule. Posterior intermediate cusp of a superior molar.

Metacopaivic acid, met-a-ko-pa'vic as'id. Acid obtained from copaiba.

Metacyesis, met-ah-se-a'sis (*meta, kuesis,* pregnancy). Extra-uterine pregnancy in which the fœtus is at first in the uterus, but subsequently in some other place.

Metadermatosis, met-ah-dur-mat-o'sis (*meta, derma,* skin). Abnormal development of the epidermis or epithelium.

Metadioxybenzene, met-ah-di-oks-e-ben'zeen. Resorcin.

Metadioxybenzol, met-ah-di-oks-e-ben'zol. Resorcin.

Metadrasis, met-ad'ras-is (*meta, drasis,* action). Over-exertion.

Metafacial, met-a-fa'shul (*meta,* behind, *facies,* face). Situate behind the face. **M. an'gle,** angle formed by pterygoid processes with base of cranium.

Metagal'lic acid. Substance formed by action of a ferric salt on gallic acid.

Metagas'ter (*meta,* beyond, *gaster,* stomach). Alimentary canal of such embryonic animals as have the organs of respiration formed from it.

Metagenesis, met-ah-jen'es-is (*meta, genesis,* generation). *Alternate* or *changeable generation.* Term proposed by Professor Owen to express the changes of form which one animal species undergoes in a series of successively produced individuals, extending from the one developed from the ovum to that which becomes the image or last perfected individual. This term he employs in contradistinction to Metamorphosis, which he restricts to the changes of form undergone by one and the same individual. See *Generation, alternate,* and *Parthenogenesis.*

Metagenetic (met-ah-jen-et'ik) or **Metagen'ic.** Relating to metagenesis.

Metagummic acid, met-ah-gum'mik as'id. Metarabic acid.

Metakinesis, met-ah-kin-a'sis (*meta, kineo,* to move). Metastasis.

Metakre'sol. See *Kresol.*

Met'al. A class of simple bodies, in general distinguished from others by considerable specific gravity, a particular splendor, almost total opacity, insolubility in water, and the property they have of ringing when struck. Metals have no effect, except of a mechanical nature, when taken into the stomach, unless they have already undergone, or undergo in the stomach, oxidation or union with an acid, when at times deleterious compounds may be formed. Copper cents, half-pence, quicksilver, lead, have frequently been swallowed in the metallic state with impunity. Tin and mercury are the only metals prescribed for a mechanical effect, the former as an anthelmintic, the latter, idly enough, in cases of fancied intussusception.

Metalbumin, met-al-bu'min (*meta, albumen*). Mixture of paralbumin and proteids, met with in urine and some ovarian cysts.

Metaldehyde, met-al'de-hide (*meta, aldehyde*). A white, crystalline solid, a partial conversion of aldehyde, when in contact with acids or low temperature. Hypnotic.

Metallacter, met-al-lak'tur. The genus bacillus. B. tremulus.

Metallage, met-al'lag-e (*meta, allasso,* to exchange). Metabasis.

Metallaxis, met-al-laks'is. Metabasis.

Metallenterophthisis, met-al-lent-er-o-te'sis (*metallon, enteron,* intestine, *phthisis*). Intestinal phthisis due to poisoning with metals.

Metallic (met-al'lik) **voice.** Noise resembling that caused by striking glass, metal, or porcelain with a pin, or the sound of the keys of a musical box; pathognomonic of pneumothorax.

Metallochymia, met-al-lo-kim'e-ah. Chemistry of metals.

Metallodynia, met-al-lo-din'e-ah (*metallon,* metal, *odune,* pain). Pain owing to the injurious influence of a metal—as lead, quicksilver, etc.

Metalloid, met'al-loid (*metallon,* metal, *eidos,* form). Resembling a metal.

Metallophagy, met-al-lof'aj-e (*metallon, phago,* to eat). Variety of mania characterized by a desire to swallow metal.

Metalloscopy, met-al-los'ko-pe (*metallon,* metal, *skopeo,* to view). Mode of determining by applying metals to the skin what metals act most favorably. Treatment of disease by application of metals to the part affected, or metallotherapy.

Metallother'apy. See *Metalloscopy.*

Metallum, met-al'lum. Metal. **M. hæmatopoëticum,** iron.

Metamere, met'am-ere (*meta,* after, *meros,* part). One of a longitudinal series of parts which are serially homologous with one another.

Metameric, met-a-mer'ik. Relating to a metamere or metamerism.

Metamerism, met-am'er-izm. Condition of being metameric.

Metamorphia, met-ah-mor'fe-ah. An alkaloid obtained by Wittstein from a substance separated from the dregs of laudanum, probably the result of chemical change in morphia.

Metamorphici (met-ah-morf'is-e) **mor'bi** (*metamorphoo, meta, morphe,* form, to transform). *Developmental diseases.* Special diseases, the incidental result of the formative, reproductive, and nutritive powers.

Metamorphine, met-ah-morf'een. Metamorphia.

Metamorphopsia, met-ah-mor-fop'se-ah (*meta, morphe,* form, transformation, *opsis,* vision). *Imagination, Metamorphopsy, False sight.* Aberration of the sense of sight, which transmits the image of imaginary objects. This affection sometimes depends on a slight opacity in the transparent parts of the eye—the cornea, crystalline, or vitreous humor—when it is symptomatic and of no consequence. At other times it appears to be idiopathic, and occurs particularly in those who have been in the habit of constantly fixing their eyes on very brilliant or small bodies. The objects fancied to be seen are various. They are sometimes circular, perpetually moving; or shining, or black spots, cobwebs, insects, or pieces of wool—when they are often termed *Muscæ* or *Flocci volitantes,* and the condition *Visus muscarum, Scotomata, Suffusio myodes, Myiodeopsia, Myoidopsia, Myodeopsia, Myodesopia, Visus muscarum.* These appearances continue for a few days, or they may exist for life and ultimately impair the sight. Certain of them change their position, and appear to be seated in the humors of the eye, in the vitreous humor more especially; hence the term *entohyaloid muscæ* applied to them. If the affection be symptomatic, it is of but little moment. If idiopathic and connected with excitement of the brain, attention will have to be paid to that organ.

Metamorphop'sy. Metamorphopsia.

Metamorphoses, met-ah-mor-fo'sees (Eng. met-a-mor'fo-sees) (*meta, morphao,* to shape). In pathology, conversion of constitutents of tissues, chiefly albuminous, into other material; included are the fatty, mucoid, and colloid degenerations.

Metamorphosis, met-ah-mor-fo'sis (Eng. met-a-mor'fo-sis). See *Metagenesis* and *Transformation.* **M. adipo'sa,** metamorphosis, fatty. **M., albu'minous,** swelling, cloudy. **M., ca'seous** or **chees'y,** caseation. **M., croup'ous,** change taking place among epithelial cells when they commence to become croupous. **M., descend'ing,** retrograde metamorphosis from decay and dissolution of the organic tissues and of the blood. **M., gran'ular albu'minous,** in this form of degeneration the molecules are found throughout the tissues, giving rise to the cloudy swelling. **M. regre'diens,** histolysis. **M., regres'sive, ret'rograde,** or **retrogres'sive,** M., descending. **M. ventric'uli gelatinifor'mis,** gastromalacia.

Metamorphotic, met-a-mor-fot'ik. Pertaining to metamorphosis.

Metamorphy, met-ah-morf'e. Metamorphosis.

Metanephric, met-ah-nef'rik. Relating to metanephros.

Metaneph'ros (*meta, nephros,* kidney). Back portion of the Wolffian duct, which develops into kidney and ureter.

Metangismus, met-an-jis'mus (*meta, angeion,* vessel). Decantation.

Metapedium, met-ah-ped'e-um (*meta, podion,* dim. of *pous,* foot). Metatarsus.

Metapeptone, met-a-pep'tone. See *Peptone.*

Metaphenylendi'amine. Poisonous base similar to ptomaïnes, causing vomiting and diarrhœa, increased urinary secretion, etc.

Metaphlogosis, met-ah-flo-go'sis (*meta,* beyond, *phlogosis,* burning). Inflammation in which the parts are engorged with blood, but accompanied with only slight induration.

Metaphosphate, met-a-fos'fate. Salt formed by metaphosphoric acid uniting with a base.

Metaphrenon, met-af're-non (*meta, phren,* diaphragm). The back.

Metaphysician, met-a-fiz-ish'un. In a medical sense, one practising mind-cure.

Metaphysis, met-af-is'is (*meta,* over, *phusis,* nature). Metamorphosis.

Metaphyteia, met-af-e-ti'ah (*meta, phuo,* to produce). Transplantation.

Metaplasia, met-ah-plaz'e-ah (*metaplasis,* transformation). Change of adult tissue into a different form of adult tissue, as, for instance, of hyaline cartilaginous into osseous tissue.

Metaplasm, met'ah-plazm. Protoplasm in a state of retrograde metamorphosis.

Metaplastic, met-ah-plast'ik. Relating to change of cartilage into osseous structure.

Metaplex, met'ah-pleks. Choroid plexus.

Metapodialia, met-ah-po-de-al'e-ah. Bones of metacarpus and metatarsus considered as one.

Metapodium, met-ah-po'de-um (*podion,* a foot). Metatarsus.

Metapophyses, met-ap-of'is-ees. Mammillary processes of the vertebræ (Owen).

Metapore, met'a-pore. Foramen of Magendie.

Metaporopœa (met-ah-por-o-pe'ah) or **Metaporopoësis** (*meta, poros,* pore, *poieo,* to make). Change produced in the minute pores in the capillary extremities of vessels passing from the morbid to the healthy condition.

Metapsyche, met-ah-se'ke (*meta,* behind, *psuche,* soul). Metencephalon.

Metaptosis, met-ap-to'sis (*meta, pipto,* to fall). Mutation; change; change in the form or seat of a disease; transformation.

Metarabin, met-ar'a-bin. Gum from cherry, plum, and almond trees.

Metarrhœa, met-ar-rhe'ah (*rheo,* to flow). Reflux; transfer of a disease from without to within, or from one part to another.

Metarrhysis, met-ar'rhis-is. Metarrhœa.

Metaschematisis, met-ah-skem-at'is-is (*meta, schema,* form). Metaptosis.

Metaschematism, met-a-ske'mat-izm. Metaptosis of membrane.

Metastasis, met-as'tas-is (*meta, histemi,* to place). *Displacement, Translation.* Change in the seat of a disease, as in mumps, from the parotid gland to the testicle; also used in the same sense as metaptosis. **M. dolo'rum ad par'tum,** condition which may occur during labor, in which the contractions of the uterus stop abruptly and pains of a like character are felt in other parts of the body. **M. lac'tis,** galactoplania; phlegmasia dolens. **M., milk,** galactoplania; phlegmasia dolens.

Metastatic, met-a-stat'ik. Belonging or relating to metastasis.

Metastearic (met-a-ste-ar'ik) **acid.** Margaric acid.

Metasternum, met-ah-ster'num (*meta,* behind, *sternon,* breast). Ensiform cartilage.

Metasyncrisis, met-ah-sin'kris-is (*meta, sunkrino.* to join). Recomposition; recomposition of bodies after their momentary dissolution; recorporation.

Metasyncritic, met-a-sin-krit'ic (same etymon). Belonging or relating to metasyncrisis. Medicines were formerly so called to which was attributed the virtue of producing the metasyncrisis or regeneration of the body or of some of its parts.

Metatarsal, met-a-tar'sal. Relating or belonging to the metatarsus. **M. ar'tery** arises from the arteria dorsalis tarsi, passes transversely over the back of the foot, and furnishes at its convexity, which is anterior, three branches, called arteriæ interosseæ dorsales pedis. These branches are distributed in the interosseous spaces. **M. articula'tions** are those resulting from the junction of the metatarsal bones with each other; are strengthened behind by dorsal and plantar ligaments, and before by a transverse metatarsal ligament, which is plantar and has the greatest analogy to the inferior transverse metacarpal ligament. **M. bones** are five in number, and are distinguished as the *first, second, third, fourth,* etc., reckoning from the outer side. **M. phalan'ges** are the first phalanges of the toes; so called because they are united to the metatarsus. **M. row,** of the bones of the tarsus, is the second row or that contiguous to the metatarsus, comprehending the cuboid and three cuneiform bones; some add the scaphoid.

Metatarsalgia, met-ah-tar-sal'je-ah (*metatarsus, algos,* pain). Pain in the metatarsus.

Metatarseus, met-ah-tar'se-us. See *Abductor minimi digiti pedis.*

Metatarsium, met-ah-tar'se-um. Metatarsus.

Metatarso-infraphalangian, met-ah-tar'so-in-frah-fal-an'je-an. Subphalangeus.

Metatarso-latera'les supraplanta'res, see *Interossei pedis.*

Metatarso-latera'lis. Situated on outer metatarsal side.

Metatarso-phalan'gei latera'les planta'res. Interossei plantares. **M.-p. transver'sus hallu'cis,** transversus pedis.

Metatarso-phalan'gian or **-phalan'gal.** Relating to the metatarsus and phalanges. **M.-p. articula'tions** are formed by the bones of the metatarsus and the corresponding phalanges. They bear the greatest analogy to the *metacarpophalangian articulations.*

Metatarso-subphalange'us hallu'cis, adductor hallucis. **M.-s. min'imi dig'iti,** adductor minimi digiti pedis. **M.-s. pol'licis,** adductor hallucis.

Metatarsus met-a-tar'sus (*meta,* after, *tarsos,* tarsus). Part of the foot situate between the tarsus and toes, corresponding with the metacarpus; composed of five parallel bones, one to each toe. Like the metacarpal bones, they are developed from two points of ossification.

Metatela, met-ah-tel'ah (*meta,* behind, *tela,* tissue). Posterior chorioid membrane.

Metathesis, met-ath'es-is (*meta, tithemi,* to place). Transposition; operation by which a morbific agent is removed from one place to another, where it may produce less disturbance in the exercise of the functions; as, for example, in the operation of depressing cataract, or when a calculus in the urethra is pushed back into the bladder. Also derivation.

Metathetic, met-ah-thet'ik. Relating to metathesis.

Metatio, met-ah'she-o (*metor,* to measure). Mensuration.

Metatithmenia, met-a-tith-men'e-ah (*metatithemi,* to change). Vicarious menstruation.

Metatocia, met-ah-tos'e-ah (*meta, tokos,* birth). Preternatural labor.

Metatoluic (met-ah-tol-u'ik) **ac'id.** Toluic acid.

Metatro'phia (*meta, trophe,* nourishment). Atrophy due to defective nutrition.

Metazo'a (*meta, zoe,* life). Animals whose ova undergo division.

Metazoan, met-ah-zo'an. Relating to the metazoa.

Metella, met-el'lah. Nux vomica.

Metencephalon, met-en-sef'al-on (*meta, enkephalos,* brain). *After-brain.* One of the fundamental parts—*epencephalon* and *metencephalon*—of which the posterior primary cerebral vesicle is the basis. The former includes the cerebellum, pons Varolii, and anterior part of the fourth ventricle; the latter, the medulla oblongata, fourth ventricle, and auditory nerve.

Metensomatosis, met-en-so-mat-o'sis (*meta, en, soma,* body). Incorporation.

Meteorism, me'te-or-izm. Tympanites. **M., myogen'ic,** meteorism due to atonic condition of the abdominal wall. **M., paralyt'ic,** meteorism caused by paralysis affecting the intestinal muscular layer.

Meteorismus, me-te-or-iz'mus (*meteorizo,* to elevate). Sublimation; tympanites.

Meteoristic, me-te-or-ist'ik. Tympanitic.

Meteorization, me-te-or-i-za'tion. Production of gas in the cavity of the abdomen.

Meteorology, me-te-o-rol'o-je (*meteoros,* a meteor, *logos,* discourse). The science whose object is the knowledge of the origin, formation, changes, etc. of atmospheric phenomena. The state of the atmosphere has a most important bearing upon the health of animals. Every epidemic affection has its causes seated there. The barometer, thermometer, and hygrometer are the instruments used to detect the varying weight or pressure, temperature, and moisture.

Me'ter (*metron,* a measure). Suffix to words denoting a measure, as in *Barometer, Pleximeter,* etc. See *Weights and Measures.* Also uterus (*meter,* uterus).

Me'ter-lens. Lens whose focal distance is one meter; used by oculists.

Meth. Prefix to terms. See *Meta.*

Methacetin, meth-as'e-tin. Crystalline substance obtained from action of melted phenol and nitric acid recrystallization, action of soda lye, glacial acetic acid, etc. Crystallizes in colorless scales. Antipyretic, analgesic, sometimes violently sudorific.

Methæmachymia, meth-e-ma-kim'e-ah (*meth, haima,* blood, *chuo,* to pour). Transfusion.

Methæmata, meth-e'mat-ah (sing. **Methæma**) (*meth, haima,* blood). Capillary or intermediate system of vessels in which the blood undergoes the change from venous to arterial, and conversely. See *Capillary vessels.*

Methæmoglo'bin. Product of incomplete decomposition of hæmoglobin or of its excessive oxidation.

Methæmoglobinæmia, meth-e-mo-glob-in-e'me-ah. Blood containing methæmoglobin.

Methæmoglobinuria, meth-e-mo-glo-bin-u're-ah (*methæmoglobus, ouron*, urine). Urine containing methæmoglobin.

Methæmoglobulin, meth-e-mo-glob'u-lin (*meth, haima*, blood, *globulin*). Result of change in hæmoglobin when left to itself or carbonic acid gas is passed through it. May be seen in old extravasations of blood.

Methane, meth'ane. Marsh gas; after-damp; light carburetted hydrogen.

Meth'e. Drunkenness or a state resembling it.

Metheglin, meth-eg'lin. A drink prepared with honey.

Methemerinus, meth-em-er'in-us Daily; quotidian.

Meth'enyl chlo'ride. Chloroform.

Methide, mercuric, meth'id, mer'ku-rik. See *Mercuric*.

Methilepsia. Methomania.

Methobiostatica (meth-o-be-o-stat'ik-ah) or **Methobiostatice,** meth-o-be-o-stat'is-e. Treatise on effects of over-indulgence in alcoholic beverages on human life.

Meth'od (*meth, hodos*, way). This word has different acceptations in the sciences. In medicine, *curative method* is the methodical treatment of disease. This word also applies to various *modi operandi* employed by accoucheurs in the practice of their art. **M., antisep'tic,** method introduced in surgery by Sir Joseph Lister; see *Surgery, antiseptic*, and *Antiseptic*. **M. of count'ing,** method, numerical. **M., graph'ic,** see *Graphic*. **M., Howard's,** see *Drowning, resuscitation from*. **M., Maria'no's,** see *Lithotomy*. **M., Marshall Hall's,** see *Drowning, resuscitation from*. **M., numer'ical,** *Method of observation* or *of counting*, of Louis, consists in observing every case and every symptom of a case numerically, so as to ensure, as far as practicable, accuracy of observation, and to enable us, by the analysis and collation of such facts, to deduce general laws and conclusions. Also the application of numbers to the study of disease. See *Statistics, medical*. **M., read'y,** of Dr. Marshall Hall, see *Ready method* and *Drowning, resuscitation from*. **M., Sylves'ter's,** see *Sylvester*.

Methodical compression, me-thod'e-kal kompresh'un. See *Compression*.

Methodics, me-thod'iks. Methodists.

Methodists, meth'o-dists. *Methodical sect, Methodics*. Sect of physicians whose doctrine was in vogue after that of the Empirics and Dogmatists toward the end of the first century. The doctrine, *Medicina methodica, Methodismus, Methodism*, resembles in some respects that of Brown.

Methodology (meth-o-dol'o-je) **(med'ical)** (*method, logos*, discourse). Method applied to the study of medicine.

Methodus, meth'o-dus. Method. **M. catalep'tica,** see *Cataleptic*. **M. Celsia'na,** see *Lithotomy*. **M. curato'ria,** therapeutics. **M. derivato'ria,** derivative or revellent system of treatment. **M. endermat'ica** or **ender'mica,** see *Endermic*. **M. Franconia'na,** see *Lithotomy*. **M. Guytonia'na,** see *Lithotomy*. **M. meden'di,** method of cure; therapeutics.

Methogastrosis, meth-o-gas-tro'sis (*methe*, drunkenness, *gastrosis*, disease of the stomach). Disease of the stomach from excessive use of alcohol.

Methomania, meth-o-man'e-ah (*methe*, drunkenness, *mania*, mania). Irresistible desire for intoxicating substances. See *Temulence, Œnomania, Dipsomania*.

Methonome, meth'o-nome. Instrument used for correction of stuttering.

Methoxycaffeine, meth-ox-e-caf'fe-een. Derivative of alkaloid caffeine from coffee and tea plants and Paullinia sorbilis. White substance; a weak narcotic used in neuralgia and migraine; also locally anæsthetic.

Methozine, meth'o-zeen. Antipyrine.

Meth'u. Wine. See *Temulentia*.

Meth'yl. Hypothetical radical, CH_3, of methylic alcohol. **M. al'cohol,** see *Alcohol*. **M. ben'zol,** toluene. **M. bro'mide,** liquid, CH_3Br, with odor like chloroform. **M. chlo'ride,** see *Methylene bichloride*. **M. guan'idine,** a toxic ptomaïne, result of oxidation of creatine and creatinine. **M. hydan'toïn** ($C_4H_6N_2O_2$), leucomaïne extracted from fresh meat. **M., hy'drated ox'ide of,** spiritus pyroxylicus. **M. hy'dride,** marsh gas. **M. i'odide,** *Methylene iodide;* colorless liquid obtained by distilling together phosphorus 1 p., iodine 8 p., and wood-spirit 12 or 15 p. When added to other substances, as strychnia, brucia, morphia, thebaia, codeia, etc., it forms methyl iodides, as iodide of methyl-strychnia, iodide of methyl-brucia, etc. The poisonous properties of each are greatly diminished by such additions. Some of them possess the physiological action of curare. **M. ox'ide,** methylic ether. **M. sal'icylate,** methylsalicylic acid. **M. spir'it,** alcohol. **M. vi'olet,** aniline dye for staining bacteria; germicidal; pyoktanin.

Methylacetanilide, meth-il-as-e-tan'il-eed. Exalgine.

Methylal, meth'il-al. Methylene dimethyl ether, $CH_2(OCH_3)_2$, colorless liquid, soluble in water, alcohol, or ether, obtained from distillation of methylic alcohol, sulphuric acid, and manganic oxide; has hypnotic and anæsthetic properties, and is used hypodermically as an antidote to poisoning by strychnine. Prescribed in mental diseases, delirium, psychoses, insomnia. Successful remedy administered subcutaneously in delirium tremens.

Methylamine, meth'il-am-een. Colorless gas, NH_2CH_3, possessing a strong ammoniacal odor, and strongly resembling ammonia; burns when ignited. Ptomaïne in putrefying fish.

Meth'ylated spir'it. Mixture of alcohol containing 10 per cent. of methylic alcohol; the addition of the latter ingredient makes it unfit for drinking. Used in chemistry and the arts as a solvent.

Methylation, meth-il-a'shun. Process of mixing with methyl alcohol.

Methylendimethylether, meth-il-end-im-eth'-il-ether. Methylal.

Methyle'ni bichlor'idum. Methylene bichloride. **M. ioda'tum,** methylene iodide.

Methylenum, meth-il-e'num. Methylene.

Methylben'zol. Toluene.

Methylconine, meth'il-ko-neen. Alkaloid of conium, found in conium of commerce.

Methylene (meth'il-een) **bichlo'ride.** *Chlormethyl, Chloromethyl*. Colorless liquid with an odor of chloroform, of a sp. gr. 1.344, introduced to notice by Dr. B. W. Richardson of London; made by exposing to sunshine in a glass globe chlorine and gaseous chloride of methyl and condensing, or by mutual action of methyl alcohol and hydrochloric acid. Chloride of methyl is prepared by heating together wood-spirit, common salt, and sulphuric acid, and collecting the evolved gas over water. A less manageable anæsthetic than the bichloride, which produces insensibility without previous excitement, its effects continuing longer than other anæsthetics. The quantity used averaged, in the cases thus far cited, about a drachm every five minutes. **M., bihy'drate of,** spiritus pyroxylicus. **M. blue,** coal-tar color of deep blue, a diphenylamine compound; used in dyeing, and extensively for staining bacteriological specimens. The hydrochloride of the pure tetramethylthionine, used in medicine under this name, is of the color of indigo, analgesic when used internally in rheumatism, neuralgia, migraine, intermittent fever, tuberculosis, etc. Externally it is used in scrofulous glands of the neck, tuberculosis of the pharynx, etc. **M. chlo'ride** (CH_2Cl_2), prepared by action of chlorine on marsh gas, or by reduction of chloroform, in alcoholic solution, by zinc and hydrochloric acid. Colorless liquid, with odor like that of chloroform, for which it was suggested as a substitute, especially in gynecological practice, although serious nervous and tetanic effects have been reported from its use. Another preparation under the same name, a mixture of ethyl ether and methylene chloride, has been used as an anæsthetic, but it is not safe thus employed. Under the same name a mix-

ture of chloroform and methyl chloride has been similarly employed. **M. dichlo'ride,** anæsthetic, used as a substitute for chloroform; M. bichloride. **M. e'ther,** mixture of methylene bichloride and ethylic ether has been so named by Dr. B. W. Richardson. Said by him to be a very agreeable, unirritating, and safe anæsthetic.

Methylguanidine, meth-il-gwan'id-een. $C_2H_7N_3$. Poisonous ptomaïne, product of oxidation of creatine and creatinine from decomposing horse-flesh and from mixed cultures in beef broth.

Methylhydan'toin. Leucomaïne existing in fresh muscle.

Methylic, meth-il'ik. Relating to or containing methyl. **M. al'cohol,** pyroligneous spirit, wood-naphtha. **M. e'ther,** colorless inflammable gas derived from distillation of methylic alcohol and sulphuric acid; possesses anæsthetic properties. **M. ethyl'ic e'ther,** methylethyl ether; anæsthetic. **M. hy'dride,** marsh gas.

Methylpelletierine, meth-il-pel-te-air'een. Alkaloid discovered by Tanret in bark of pomegranate.

Methylphenylketone, meth-il-phen-il-ke'tone. Hypnone.

Methylpropyloxyben'zol. Thymol.

Methylpyrocatechin, meth-il-py-ro-kat'e-kin. Guaiacol.

Methylsalicylic (meth-il-sal-is-il'ik) **acid.** Principal ingredient of wintergreen oil (oleum gaultheriæ).

Methylum, meth'il-um. Methyl.

Methylu'ramine. Methylguanidine.

Methyl-violet, meth-il-vi'o-let. Coal-tar color; employed extensively for staining bacteria; also as antiseptic internally and externally in gonorrhœa, tuberculosis, etc.

Methypostrosis, meth-ip-os-tro'sis. Changing of bed-linen of patients.

Methysis, meth'is-is. Intoxication, or condition approaching it.

Methysmus, meth-iz'mus (*methe,* intoxication). Methysis.

Methysticin, meth-is'te-sin. Crystalline principle in Piper methysticum.

Methysticus, meth-is'te-kus. Causing or pertaining to drunkenness.

Methystophyllum glaucum, meth-is-to-fil-lum glau'kum (*methustikos,* intoxicating, *phullon,* a leaf). South African plant, ord. Amyridaceæ. Infusion of leaves is pleasant to the taste, and is used in bronchitis, asthma, and other thoracic diseases.

Me'tis. See *Mulatto.*

Metoarion, met-o-ah're-on (*meta, oarion*). Corpus luteum.

Metodontiasis, met-o-don-te'as-is (*meta, odontiasis,* dentition). Second dentition. Faulty development of the teeth.

Metœcesis, met-e-sa'sis. Displacement.

Metœcism, met-e'sizm. Heterœcism.

Metopages, met-op'aj-ees (*metopon,* front, *pegnumi,* to fix). Monstrosity in which twins are united by the head.

Metopantra, met-o-pan'trah (*metopon, antron,* a cave). Frontal sinuses.

Metopantralgia, met-o-pan-tral'je-ah (*metopantra, algos,* pain). Pain in the frontal sinuses.

Metopantritis, met-o-pan-tre'tis. Inflammation of the frontal sinuses.

Metopantron (met-o-pant'ron) or **Metopant'rum** (*metopon,* forehead, *antron,* cavern). Frontal sinuses.

Metopic, me-top'ik (*meta,* between, *ops,* eye). Of or relating to the forehead. **M. an'tero-poste'rior diam'eter,** diameter from metopion to occipital point. **M. su'ture,** frontal suture.

Metopion, met-o'pe-on. Bubon galbanum.

Meto'pium or **Meto'pion** (*metopios,* pertaining to the forehead). Glabella; mesephryon.

Metopodyn'ia (*metopon, odune,* pain). Frontal neuralgia.

Metopon, met-o'pon (*meta, ops,* eye). Front; frontal bone.

Metopopagia, met-o-po-paj'e-ah (*metopon,* forehead, *pagios,* fixed). Monstrosity in which union of the foreheads of two fœtuses and one cranial cavity exists; the bodies are separate, and each individual is provided with an umbilical cord.

Metoposcopy, met-o-pos'ko-pe (*metopon, skopeo,* to view). Art of knowing the temperament and character of a person by inspecting the traits of his forehead or face. See *Physiognomy.*

Metopum, met-o'pum. Metopon.

Metra, met'rah. Uterus.

Metracinesis, met-rah-sin-a'sis (*metra, a,* privative, *kineo,* to move). Feebleness of labor-pains.

Metræ, met're (pl. of **Metra,** womb). Secundines.

Metræmia, met-re'me-ah (*metra,* uterus, *haima,* blood). Congested condition of the uterus.

Metræmorrhagia, met-re-mor-rhah'je-ah (*metræ, hæmorrhagia*). Metrorrhagia.

Metræmorrhoïdes, met-re-mor-ro-e'dees (*metra, hæmorrhoides,* hemorrhoids). Hemorrhoids or varicose veins at the orifice of the uterus.

Metralgia, met-ral'je-ah (*metra, algos,* pain). *Metrodynia, Uteralgia.* Pain in the uterus. See *Hysteralgia.*

Metralgic, met-ral'jik. Relating to metralgia.

Metranæmia, met-ran-e'me-ah (*metra, anæmia*). Anæmic condition of the uterus.

Metranastrophe, met-ran-as'tro-fe (*metra, anastrophe,* inversion). Uterus, inversion of the.

Metraneurysm, met-ran'u-rizm (*metra, aneurusmos,* dilatation). Morbid dilatation of the uterus.

Metrasia, met-rah'ze-ah (*metra,* uterus, *atresia*). Imperforation of os uteri.

Metratome, met'rah-tome. Hysterotome.

Metratonia, met-rah-ton'e-ah (*metra,* womb, *atonia,* atony). Atony of the uterus.

Metratresia, met-ra-tre'se-ah (*metra, atresia,* imperforation). Imperforation of the uterus. Unnatural closure of the uterus.

Metratrophia, met-rah-trof'e-ah (*metra, a,* privative, *trophe,* nourishment). Atrophy or want of development of the uterus.

Metrauxe, met-rawks'e (*metra, auxe,* increase). Hypertrophy of the uterus.

Metre. French measure, equal to about 39⅓ inches. **M. lens,** dioptre.

Metrecoscopy, met-rek-os'ko-pe. Auscultation and mensuration combined.

Metrectaneus, met-rek-tan'e-us (*metra,* uterus, *ektanuo,* to stretch). Uterine speculum.

Metrectasia, met-rek-taz'e-ah (*metra, ektasis,* dilatation). Dilatation of the womb.

Metrectomy, met-rek'to-me (*metra, ektome,* excision). Excision of the uterus.

Metrectopy, met-rek'to-pe (*metra,* womb, *ektropos,* displaced). Displacement of the womb.

Metrelcosis, met-rel-ko'sis (*metra, helkos,* ulcer). *Metrhelcosis.* Ulceration of the uterus.

Metremphraxis, met-rem-fraks'is (*metra, emphrasso,* to obstruct). Obstruction of the womb or of the vessels of the womb—*Infarctus uteri.* Name under which some authors have confounded chronic inflammation of that viscus and the different degenerations to which it is exposed.

Metremphysema, met-rem-fe-za'mah. See *Physometra.*

Metrenchyta, met-ren'ke-tah (*metra, enchuo,* to inject). *Metrenchytes.* Injection of the uterus. Also uterine syringe, Substances injected into the uterus are called *Metrenchyta.*

Metrepidemia, met-rep-e-dem'e-ah. Tendency to disease of an epidemic character in the female organs of generation.

Metreurysma, met-ru-riz'mah (*metra, eurusma,* dilatation). Morbid dilatation of the womb.

Metrhæmorrhoids, met-re'mor-roids. Hemorrhoidal tumors of the uterus.

Metrhelcosis, met-rel-ko'sis. Ulceration of the uterus.

Metrhymenitis, met-rhym-en-e'tis (*metra, humen,* membrane). See *Metritis.*

Metria, met're-ah (*metra,* uterus). Puerperal fever.

Metric, met'rik. Having the metre as unit of measurement. **M. sys'tem,** decimal system of weights and measures, used in various parts of the world on account of its exactness. **M. weights,** see *Weights and measures, metric.*

Metrine, met'reen (*metra,* uterus). Term proposed by Dr. Wm. Farr for the specific myotic principle by which puerperal fever—*metria*—is propagated.

Metriopathia, met-re-o-path-e'ah (*metrios,* tempered, *pathos,* affection). State of an individual whose passions are temperate.

Metritis, met-re'tis. Inflammation of the uterus or womb. Characteristic symptoms of this affection are pain, swelling, and tenderness in the hypogastric region, with heat, pain, and tenderness of the os uteri, vomiting, smallness and frequency of pulse. It occurs most frequently after delivery, hence called *Lochometritis,* when there is generally suppression of the lochial discharge. Acute inflammation of the womb, seated in its internal membrane, *Endometritis, Metrhymenitis, Enmetritis,* has been called *Inflammatio catarrhalis uteri* or *Acute catarrh* of that viscus. It is known by the discharge of a clear, stringy fluid *per vaginam;* preceded by pains, which, from the hypogastric region, shoot to the thighs, groins, etc., with more or less fever. It requires energetic and prompt treatment. *Chronic metritis* sometimes succeeds the acute; to it must be referred the indurations observed in the uterus, and many of the leucorrhœal discharges to which females are subject. Chronic endometritis intensified at the menstrual period has received the name of *Menstrual metritis.* Inflammation of the substance or parenchyma of the uterus is called *Parenchymatous metritis, Idiometritis.* **M., cer'vical parenchym'atous,** parenchymatous metritis of the cervix uteri. **M., corpo'real parenchym'atous,** parenchymatous metritis of the body of the uterus. **M., exanthem'atous,** metritis observed to exist during an attack of one of the exanthematous fevers. **M., gan'grenous,** gangrene of a puerperal character involving the uterus. **M. gravida'rum,** metritis in pregnant women. **M., hemorrha'gic,** metritis in which a disposition to hemorrhage exists. **M., idiopath'ic puer'peral,** metritis often caused by extensive laceration of the cervix uteri. **M., men'strual,** see *Metritis.* **M., mu'cous,** endometritis. **M., parenchym'atous,** see *Metritis.* **M., phleg'monous,** puerperal metritis in which the parietes of the uterus are œdematous. **M., puer'peral,** metritis occurring after birth of a child or co-existing with puerperal fever. **M. puerpera'rum,** term including puerperal diseases in general. **M. rheumat'ica,** rheumatic inflammation of the uterus. **M. sep'tica,** putrescency or gangrene of the uterus. **M. veno'sa,** see *Phlebitis.*

Metro-arctia, met-ro-ark'te-ah. Coarctation of the uterus.

Metroblennorrhœa, met-ro-blen-nor-rhe'ah. Uterine leucorrhœa.

Metroblennozemia, met-ro-blen-no-za'me-ah (*metra, blenna,* mucus, *zemia,* loss). Leucorrhœa uteri.

Metrobotrytes, met-ro-bo-tre'tees (*metra, botrus,* cluster of grapes). Cauliflower excrescence of the uterus.

Metrocace, met-rok'as-e (*metra, kakos,* evil). Putrescency or gangrene of the uterus.

Metrocampsis, met-ro-kamp'sis (*metra, kampsis,* bending). Oblique position of the uterus.

Metrocarcinoma, met-ro-kar-sin-o'mah (*metra, karkinoma,* cancer). Cancer of uterus.

Metrocatarrhus, met-ro-kat-ar'rhus (*metra, katarrhus,* catarrh). Leucorrhœa uteri. **M. benig'nus,** uterine leucorrhœa. **M. malig'nus,** uterine gonorrhœa.

Metrocele, met-ro-se'le (Eng. met'ro-seel) (*metra, kele,* rupture). Hysterocele.

Metrocelides, met-ro-sel'id-ees (pl. of **Metrocelis**) (*meter,* mother, *kelis,* mark). Nævus.

Metrocholosis, met-ro-kol-o'sis (*metra, chole,* bile). Bilious puerperal fever.

Metroclyst, met'ro-klyst (*metra,* uterus, *kluzo,* to wash out). Instrument for making injections into cavity of uterus.

Metrocolpocele, met-ro-kol-po-se'le (Eng. met-ro-kol'po-seel (*kolpos,* vagina, *kele,* hernia). Prolapse of uterus into vagina.

Metrodynamometer, met-ro-di-nam-om'et-ur. Hysterodynamometer.

Metrodynia, met-ro-din'e-ah (*metra, odune,* pain). Pain in the uterus; metralgia.

Metrodystocia, met-ro-dis-to'se-ah (*metra, dys,* with difficulty, *tokos,* childbirth). Difficult delivery, caused by unfavorable condition of uterus.

Metroectasia, met-ro-ek-taz'e-ah. Metraneurism.

Metro-epidemia, met-ro-ep-e-dem'e-ah. Metrepidemia.

Metrohæmia, met-ro-he'me-ah (*metra, haima,* blood). Hyperæmia or congestion of blood in the uterus.

Metrohemorrhage, met-ro-hem'or-rhaj. Metrorrhagia.

Metroleucorrhœa, met-ro-lu-kor-rhe'ah. Uterine leucorrhœa.

Metrology, me-trol'o-je (*metron,* measure, *logos,* treatise). Science treating of weights and measures. **M., u'terine,** science relating to measurements of dimension and capacity of the uterus.

Metroloxia, met-ro-lok'se-ah (*metra, loxos,* oblique). Oblique position of the uterus.

Metrolymphangitis, met-ro-limf-an-je'tis (*metra,* uterus, *lymphangitis*). Lymphangitis of the uterus.

Metromalacoma (met-ro-mal-ah-ko'mah) or **Metromalacosis,** met-ro-mal-ah-ko'sis (*metra, malakos,* soft). Softness or softening of the uterus.

Metromania, met-ro-man'e-ah. Nymphomania.

Metrometer, met-rom'e-tur (*metra,* womb, *metron,* measure). Instrument designed for measuring the uterus.

Metrometry, met-rom'et-re. Measurement of the uterus.

Metromyzeus, met-ro-miz'e-us (*metra, muzo,* to suck). Exhausting-syringe, applied to the os uteri for exhausting the womb in amenorrhœa.

Metronanodes, met-ron-an-o'dees (*metra, nanodes,* dwarf-like). Possessing an exceedingly small uterus.

Metroncus, met-ron'kus (*metra, onkos,* tumor). Tumor of the uterus.

Metroneuria, met-ro-nu're-ah (*metra,* womb, *neuron,* nerve). Nervous affection of the womb.

Metroneurosis, met-ro-nu-ro'sis (*metra,* womb, *neuron,* nerve). Neurosis arising from uterine affection.

Metronome, met'ro-nome (*metron,* measure, *nomos,* law). Instrument provided with a clock-work for measuring time in music; also employed to test hearing-power.

Metroparalysis, met-ro-par-al'is-is (*metro, paralusis,* paralysis). Paralysis of the uterus.

Metropath'ic (*metra, pathos,* affection). Relating to uterine affections.

Metropathy, met-rop'ath-e (*metra, pathos,* affection). Affection of the womb.

Metroperissia, met-ro-per-is-se'ah. Hypertrophy of the uterus.

Metroperitonitis, met-ro-per-e-to-ne'tis (*metra, peritonitis*). Inflammation of the uterus and peritoneum. Puerperal fever. See *Peritonitis.*

Metrophlebitis, met-ro-fle-be'tis (*metra, phleps,* vein). Inflammation of the veins of the uterus. See *Phlebitis.* **M. puerpera'lis,** see *Phlebitis* and *Puerperal fever.*

Metrophlegmymen, met-ro-fleg-me'men (*metra, phlegma,* mucus, *hymen,* membrane). Mucous membrane of uterus.

Metrophlegmymenitis, met-ro-fleg-me-men-e'tis. Inflammation of the lining membrane of the uterus; endometritis.

Metrophlogosis, met-ro-flo-go'sis (*metra, phlogosis,* inflammation). Inflammation of the uterus.

Metrophore, met'ro-for. A form of uterine pessary.

Metrophthisis, me-tro-te'sis (*metra, phthio,* to consume). Consumption from ulceration of the uterus.

Metrophyma, met-ro-fe'mah (*metra, phuma,* swelling). Tumor of the uterus.

Metrophyseterion, met-ro-fis-et-a're-on (*metra, phu-*

sao, to inflate). Instrument for applying gasiform agents to the uterus.

Metroplethora, met-ro-pleth-o'rah (*metra*, *plethora*, fulness). Congestion or hyperæmia of the uterus.

Metropolypus, met-ro-pol'ip-us (*metra*, *polypus*). Polypus of the uterus.

Metroproptosis (met-ro-prop-to'sis) or **Metroptosis**, met-rop-to'sis (*metra*, *pro*, *ptosis*, falling). Prolapsus uteri.

Metropyophthisis, met-ro-pe-o-te'sis (*metra*, womb, *puon*, pus, *phthisis*, consumption). Purulent wasting away of the uterus.

Metrorrhagia, met-ror-rhaj'e-ah (*metra*, *rhegnumi*, to break forth). *Uterine hemorrhage*, *Hemorrhage from the womb*, *Flooding*, *Metrohemorrhage*. Effusion of blood from the inner surface of the uterus, either at the menstrual or other period, but in a greater quantity than proper. Uterine hemorrhage may be caused by those influences which produce hemorrhage in general. It happens, however, more frequently during pregnancy and during or after delivery, when the vascular system of the uterus is so circumstanced as to favor its occurrence more than at other times. The termination of metrorrhagia is usually favorable. Should it, however, be very copious or frequently recur, or should it happen to a great extent after delivery, death may take place very speedily—and, in some cases, without the discharge being perceptible—constituting *internal hemorrhage*.

Uterine hemorrhage may be *active* or *passive*, requiring obviously a different treatment. The main management is similar to that of hemorrhage in general: the horizontal posture; acid drinks; free admission of cool air; cold applications to the loins, thighs, and abdomen; injection of cold water, even of iced water, into the vagina; plugging the vagina, so as to prevent the discharge *per vaginam*, and thus induce a coagulum in the mouths of the bleeding vessels. Such will be the special plan adopted where the hemorrhage has occurred in one not recently delivered. In uterine hemorrhage after delivery the same cooling plan must be followed; but as the flow of blood is owing to the uterus not contracting so as to constringe its vessels, pressure must be made on the abdomen to aid this; and, if necessary, the hand introduced into the uterus to stimulate it to contraction. Ergot may also be administered. Should the female be excessively reduced, excitants may be exhibited. The profuse exhibition of opium is, at least, a doubtful plan. Transfusion has been practised as a last resource. **M., exter'nal**, metrorrhagia, in which blood escapes per vaginam. **M. grav'idæ inter'na**, metrorrhagia in which blood flows into the gravid uterus, due to the placenta being partly detached. **M. gravida'rum**, metrorrhagia occurring in pregnant women.

Metrorrheuma, met-ror-rhu'mah (*metra*, *rheuma*, defluxion, rheumatism). Rheumatism of the uterus.

Metrorrhexis, met-ror-rheks'is (*metra*, *rhexis*, rupture). Rupture of the uterus.

Metrorrhœa, met-ror-rhe'ah (*metra*, *rheo*, to flow). Protracted discharge of fluid from the uterus.

Metrorrhoides, met-ror-rho-e'dees (*metra*, uterus, *rhoe*, stream). Hemorrhoids, uterine.

Metrosalpingitis, met-ro-sal-pin-je'tis (*metrosalpinx*, Fallopian tube). Inflammation of the Fallopian tube.

Metrosalpingorrhagia, met-ro-sal-pin-gor-rhaj'e-ah. Hemorrhage from the Fallopian tubes.

Metrosalpingorrhexis, met-ro-sal-pin-gor-rheks'is (*metrosalpinx*, *rhexis*, rupture). Rupture of a Fallopian tube.

Metrosalpinx, met-ro-sal'pinks (*metra*, *salpinx*, a tube). Fallopian tube.

Metroscirrhus, met-ro-skir'rhus (*metra*, *skirrhos*, scirrhus). Scirrhus of the uterus.

Metroscolioma (met-ro-sko-le-o'mah) or **Metroscolio'sis** (*metra*, *skolios*, oblique). Oblique position of the uterus.

Metroscope, met'ro-scope (*metra*, *skopeo*, to view). Instrument for listening to the sounds of the heart of the fœtus in utero-gestation when they are imperceptible through the parietes of the abdomen. The extremity of the instrument is introduced into the vagina and applied against the neck of the uterus.

Metroscopy, met-ros'ko-pe (*metra*, womb, *skopeo*, to examine). Process of making an ocular examination of the womb.

Metroside'ros torment'osa. Christmas tree; native New Zealand plant, bark of which is rich in tannin and valuable in dysentery. **M. ve'ra**, true iron tree of the Moluccas, bark of which is used in diarrhœa.

Metrosphongioma, met-ro-sfon-je-o'mah (*metra*, womb, *sphongia*, sponge). Fungous tumor of the womb.

Metrostaxis, met-ro-staks'is (*metra*, *stax*, a drop). *Uterine epistaxis*. Hemorrhage occurring a few days after ovariotomy, before menstruation could possibly be re-established.

Metrostenosis, met-ro-sten-o'sis (*metra*, womb, *stenosis*, narrowing). Contracted condition of cavity of uterus.

Metrosteresis, met-ro-ster-a'sis (*metra*, *steresis*, privation). Extirpation or absence of uterus.

Metrosynizesis, met-ro-sin-e-za'sis (*metra*, *sunizesis*, running together). Morbid union of the uterus to adjacent parts.

Metrotome, met'ro-tome (*metra*, womb, *tome*, incision). Instrument for incision or division of the uterus.

Metrotomy, met-rot'o-me (*metra*, *tome*, section). Cæsarean section.

Metrotuberculum (met-ro-tu-bur'ku-lum) or **Metrotylo'ma**. Outgrowth of the womb of a nodular and fungous character.

Metro-urethrotome, met-ro-u-re'thro-tome (*metron*, *urethra*, *tome*, incision). Instrument for dividing stricture.

Metroxylon, met-rok'se-lon (*metra*, pith of tree, *xulon*, wood). Genus of palms; sago is obtained from them.

Metrydrorrhœa, met-rid-ror-rhe'ah (*metra*, womb, *hudrorrhoia*, watery flow). Watery discharge from the uterus.

Metrymenitis, met-rim-en-e'tis (*metra*, womb, *humen*, membrane). Endometritis.

Metryperæmia, met-rip-er-e'me-ah (*metra*, *hyperæmia*). Plethora or hyperæmia of the uterus.

Metryperæsthesis, met-rip-er-ees-the'sis (*metra*, *hyperæsthesis*). See *Uterus, irritable*.

Metrypercinesis, met-rip-er-sin-a'sis (*metra*, *hyper*, excess, *kinesis*, motion). Excessive activity of labor-pains.

Metryperpathia, met-rip-ur-path-e'ah (*metra*, *hyper*, *pathos*). Uterine disease of a severe type.

Metrypertrophia, met-rip-er-tro'fe-ah. Hypertrophied condition of the womb.

Meu. Æthusa meum.

Me'um (*meion*, small, in allusion to the leaves). Æthusa meum. **M. anethifo'lium**, Æthusa meum. **M. athaman'ticum**, Æthusa meum. **M. fœnic'ulum**, Fœniculum vulgare.

Mevium, mev'e-um. Syphilis.

Mew. Meum athamanticum.

Mexcal, meks'kal. See *Mezcal*.

Mexican, mek'se-kan. Pertaining to Mexico. **M. el'emi**, product said to be obtained from Amyris elemifera. **M. goose'foot**, Chenopodium ambrosioïdes. **M. snake'root**, Asclepiodora decumbens; employed against snake-bite. **M. tea**, herb of Chenopodium ambrosioïdes; tonic and stomachic.

Mey'nert's claus'tral forma'tion. Stratum of cells situate in the lamina corticalis of brain. **M.'s fascic'ulus**, band of white fibres passing from ganglion habenulæ to G. interpeduncularе. **M.'s foun'tain decussa'tion**, formed by crossing of fibres under the posterior longitudinal fasciculus.

Mezcal, mez-kal'. Strong, intoxicating liquor, distilled from pulque, the fermented juice of Agave Americana.

Mez'ea. Genital organs.

Mezerein, mez-e're-in. Active principle of Daphne mezereum.

Mezereon (me-ze're-on) or **Mezereum**, mé-ze're-um. Daphne mezereum. **M. aceta'tum**, see *Daphne mezereum.*

Meziza. Religious practice among the Jews, consisting in the rabbi sucking the wound after circumcision.

Mez'quite gum. Mesquite gum.

Miamma (me-am'mah), **Miansis** (me-an'sis), **Miaria** (me-ah're-ah), **Mi'asm.** Miasma. **M., liv'ing**, microorganism capable of producing disease. **M., shaped**, miasm, living. **M., tellu'ric** or **terres'trial**, miasma from terrestrial emanations.

Miasma, me-az'mah (*miasma*, stain or contaminate). The word *miasm* has, by some, been employed synonymously with contagion. It is now used more definitely for any emanation, either from the bodies of the sick, or from animal and vegetable substances, or from the earth, especially in marshy districts (*Marsh poison*), which may exert a morbid influence on those who are exposed to its action. To these terrestrial emanations—*Koinomiasmata* (*koinos*, common)—the Italians give the name *aria cattiva* and *intemperie*, but, more commonly, *malaria* (bad air). Effluvia from decomposition of matter derived from the human body were called *Idiomiasmata* (*idios*, personal). The precise action of microörganisms in the production of malaria has not yet been determined. See *Bacillus malariæ.*

Miasmatic, me-az-mat'ik. Belonging or relating to miasmata. Fever arising from marshy miasms is styled *malarious*, *paludal*, etc., and includes intermittent and remittent fevers.

Miasmocontagious, me-az'mo-kon-taj'yus. Propagated either by miasmatic or contagious influences or a combination of both.

Miasmus, me-az'mus. Miasma. **M., contag'ious**, see *Miasmocontagious.*

Micæ (me'ke) **pa'nis** (crumbs of bread). See *Triticum.*

Micatio, me-ka'she-o (*mico*, to move quickly). Rapid winking. **M. cor'dis**, systole.

Michelia (mik-el'e-ah) **cham'paca** (after P. A. Micheli, a Floretine botanist). *Champaca, Michelia Tsjampaca.* Ord. Magnoliaceæ. Oriental tree, much prized for the odor and beauty of its flowers. The oily infusion of the flowers is employed in the Moluccas in headache. **M. kisopa**, tree, native of the Himalayas, has same properties as Michelia champaca. **M. monta'na**, tree, native of India, has same properties as cascarilla.

Michel'i's diplococ'cus. Micrococcus occurring in conjunctivitis contagiosa. **M.'s paste**, asbestos and concentrated sulphuric acid, in proportion of 1 : 3.

Microchemistry, mik-ro-kem'is-tre. Chemical investigation combined with microscopic examination. Chemistry of minute matter.

Micracoustic, mik-rah-koos'tik. See *Microcoustic.*

Micraine'. See *Migraine.*

Micrallantoid, mik-ral-lan'toid. Provided with a small allantois.

Micranatomy, mik-ran-at'o-me (*micro*, *anatomia*). Minute anatomy; see *Anatomy.*

Micrandra (mik-ran'drah). Ord. Euphorbiaceæ, native of Brazil. Inspissated juice is caoutchouc.

Micrangia, mik-ran'je-ah (*micro*, *angeion*, a vessel). Capillary vessels.

Micrencephalium, mik-ren-sef-al'e-um (*micro*, *enkephalos*, encephalon). Cerebellum.

Micrencephalon, mik-ren-sef'al-on. Cretinism.

Micrenceph'alum. Cerebellum.

Micrencranus, mik-ren-kran'us (*mikros*, small, *en*, *kranion*). Name given to skulls with a cerebellar sector of 8.5° to 15°.

Micristology, mi-kris-tol'o-je (*mikros*, small, *histologia*, histology). Science treating of minutest organic fibres.

Micro, mik'ro (small). In composition, small.

Micro-ætiological, mi-kro-e-te-o-loj'i-kal. Relating to bacteria as morbific factors.

Micro-anatomy, mik-ro-an-at'o-me. Micranatomy. Microscopic anatomy.

Microbacteria, mik-ro-bak-te're-a (*mikros*, small, *bacterium*). Bacteria having elliptical microscopic or short cylindrical cells. See *Bacteria.*

Mi'crobe (*micro*, *bios*, life). Term applied to minute forms of life. Microorganisms, animal or vegetable. The term *Microzoa* distinguishes microscopic animal life from microscopic vegetable forms—*Microphytes.* See *Bacillus*, *Bacteria*, *Micrococci*, *Spirilla*, *Streptococci*, etc.

Mi'crobes (pl. of **Microbe**), **aër'obic.** Microbes requiring oxygen for their development. See *Aërobic.* **M., anaër'obic**, microbes possessing the capability of thriving in a medium devoid of free oxygen. See *Anaërobic.* **M., ni'trifying**, microbes causing decomposition of organic matter. **M., pathogenet'ic** or **pathogen'ic**, microbes which have the property of producing disease.

Micro'bial. Microbic.

Micro'bian or **Microbic**, mi-kro'bic. Relating to microbes.

Microbiohæmia, mik-ro-be-o-he'me-ah (*mikros*, small, *bios*, life, *haima*, blood). Term applied to diseased conditions due to presence of micro-organisms in the blood.

Microbiology, mi-kro-bi-ol'o-je (*microbe*, *logos*, discourse). Science of micro-organisms. Study of the subject of microbes.

Microblast, mi'kro-blast (*mikros*, *blastos*, sprout). Small blood-corpuscle which is in an undeveloped condition.

Microblepha'ria. Microblepharon.

Microblepharon, mik-ro-blef'ar-on (*mikros*, small, *blepharon*, lid). Condition in which the eyelids are unusually small.

Microbrachius, mik-ro-brak'e-us (*mikros*, small, *brachion*, arm). Congenital smallness of the arms. See *Micromelus.*

Microbrachycephalia, mik-ro-brak-e-sef-al'e-ah. Condition in which brachycephalia and microcephalia coexist.

Microcardia, mik-ro-kard'e-ah. Congenital smallness of the heart.

Microcau'lia. Condition in which a very small penis exists.

Microcau'lis (*mikros*, small, *kaulos*, penis). One with a small penis.

Microcephalia, mi-kro-sef-al'e-ah (*micro*, *kephale*, head). Abnormal smallness of the head. See *Microcephalic.*

Microcephalic (mi-kro-sef-al'ik) or **Microceph'alous** (*micro*, *kephale*, head). A monster having a small imperfect head or a small imperfect cranium. The condition is called *Microcephalia, Craniostenosis.* With some it means idiotism.

Microcephalism, mi-kro-sef'al-izm. Microcephalia.

Microcephalon, mik-ro-sef'al-on. Abnormal smallness of head.

Microceph'alous. Microcephalic.

Microceph'alum. Microcephalon.

Microceph'alus. See *Microcephalic.*

Microceph'aly. Microcephalia.

Microchelia, mik-ro-ke'le-ah (*mikros*, small, *cheilos*, lip). Congenital small lips.

Microchemical, mi-kro-kem'ik-al. Relating or appertaining to the character of a substance as viewed by the microscope.

Microchem'istry. Chemical examination of very minute or miscroscopic objects. Investigation of delicate and exact chemical reactions by aid of the microscope.

Microclysma, mik-ro-kliz'mah. Small clyster.

Micrococci, mik-ro-kok'se (*micro*, *coccus*, grain). As already stated under *Bacteria*, Schizomycetes or fission-fungi are divisible into four groups, of which the Coccaceæ form one group, including Streptococcus, Merismopedia, Sarcina, Micrococcus, and Ascococcus. The Micrococci are characterized by division in one direction, the cocci after division remaining aggregated in irregular clusters, or singly, or in pairs, or in chains of three or four elements. The following list embraces the principal micrococci now known

(Crookshank, from whom the information given under *Micrococcus* is chiefly derived):

MICROCOCCI ASSOCIATED WITH DISEASE.

In man	Micrococcus pyogenes aureus.	Pyogenic in man (?).
	Micrococcus pyogenes albus.	Pathogenic in animals.
	Micrococcus pyogenes citreus.	
	Micrococcus cereus albus.	Non-pathogenic.
	Micrococcus cereus flavus.	
	Micrococcus in scarlatina.	Possibly only saprophytic.
	Micrococcus in measles.	
	Micrococcus in whooping-cough.	
	Micrococcus in hæmophilia neonatorum.	
	Micrococcus in typhus.	
	Micrococcus in acute yellow atrophy.	
	Micrococcus in dental caries.	
	Micrococcus in gangrene.	
	Micrococcus pyogenes tenuis.	Pathogenic (?).
	Micrococcus in rabies in animals.	
In animals	Micrococcus of septicæmia in rabbits.	Pathogenic.
	Micrococcus of pyæmia in rabbits.	
	Micrococcus of progressive suppuration in rabbits.	
	Micrococcus parvus ovatus.	
	Micrococcus of pyæmia in mice.	
	Micrococcus perniciosus.	Pathogenic (?).
	Micrococcus bombycis.	
	Micrococcus insectorum.	
In plants	Micrococcus amylivorus.	Pathogenic (?).

MICROCOCCI UNASSOCIATED WITH DISEASE.

Micrococcus cyaneus.	Chromogenic saprophytes.
Micrococcus aurantiacus.	
Micrococcus chlorinus.	
Micrococcus violaceus.	
Micrococcus luteus.	
Micrococcus rosaceus.	
Micrococcus hæmatodes.	Simple saprophytes.
Micrococcus candidus.	
Micrococcus candicans.	
Micrococcus fœtidus.	
Micrococcus crepusculum.	
Micrococcus cinnabareus.	
Micrococcus flavus liquefaciens.	
Micrococcus flavus tardigradus.	
Micrococcus versicolor.	
Micrococcus viticulosus.	
Micrococcus lacteus faviformis.	
Micrococcus fulvus.	
Micrococcus viscosus.	
Micrococcus coronatus.	
Micrococcus radiatus.	
Micrococcus flavus desidens.	

Several additional micrococci are included under merismopedia, embracing plate-cocci, in which division occurs in two directions, forming lamellæ or plates. See *Merismopedia* and *Micrococcus*.

Micrococcus, mik-ro-kok'kus. See *Micrococci*. **M. al'bicans amplus** (Bumm), the cocci resemble the gonococci, but are larger; found in the secretions of the vagina. **M. amyliv'orus** (Burrill), oval cells, cause of fire-blight of the pear tree, etc. **M. auranti'acus** (Schröter), oval cocci. **M. bom'bycis** (Béchamp), oval cocci occurring in contents of the alimentary canal, and in gastric juice of silkworms affected with flacherie. **M. can'dicans** (Flügge), cocci in masses, obtained from contaminated plate-cultivations. **M. can'didus**, probably identical with M. candicans. **M. ce'reus al'bus** (Passet), staphylococcus cereus albus. **M. ce'reus fla'vus** (Passet), staphylococcus cereus flavus. **M. chlori'nus** (Cohn), granular zooglœa. **M. chol'eræ gallina'rum** (Zopf), bacterium of fowl-cholera, bacillus choleræ gallinarum. **M. cinnabar'eus** (Flügge), large cocci found contaminating old cultivations. **M. cit'reus conglomera'tus** (Bumm), the cocci resemble gonococci, and have been isolated from blennorrhœic pus and from ordinary atmospheric dust. **M. corona'tus** (Flügge), isolated from the air. **M. crepus'culum** (Cohn), round or short oval cells occurring in various infusions and putrefying fluids; associated with bacterium termo. **M. cyan'eus** (Cohn), elliptical cells. **M. fla'vus des'idens** (Flügge), streptococcus flavus desidens. **M. fla'vus liquefa'ciens** (Flügge), cocci, diplococci, and zooglœa. **M. fla'vus tardigra'dus** (Flügge), isolated from contaminated cultures. **M. fœt'idus** (Rosenbach), small oval cocci isolated from carious teeth. **M. ful'vus** (Cohn), cocci are round and frequently in pairs. **M. hæmato'des** (Zopf), cocci observed in human sweat, particularly from the axilla. **M. in'dicus**, bacillus indicus. **M. insecto'rum** (Burrill), detected in the digestive organs of the chinch-bug. **M. lac'teus favifor'mis** (Bumm and Bockart), isolated from vaginal secretions and from sputa. **M. lu'teus** (Schröter), elliptical cocci with highly refractive cell-contents. **M. par'vus ova'tus**, isolated small ovoid cocci resembling coccus of rabbit septicæmia isolated from a pig with a fatal disease similar to swine erysipelas. **M. pernicio'sus**, *Parrot disease*, cocci described in connection with the fatal disease of the gray parrot, being found in the blood. **M. prodigio'sus**, *Bacillus prodigiosus*, *Blood-rain*, appearing on bread, boiled rice, starch paste, etc. **M. pyocyan'eus** (Gessard), bacterium æruginosum. **M. pyog'enes al'bus** (Rosenbach), obtained from a case of acute suppuration of the knee-joint. **M. pyog'enes aur'eus**, staphylococcus pyogenes aureus (Rosenbach). The coccus of acute infectious osteomyelitis, occurring also in pus of boils and in the abscesses of pyæmia and puerperal fever. **M. pyog'enes cit'reus** (Passet), frequently present in pus. **M. pyog'enes ten'uis** (Rosenbach), occasionally found in the pus of closed abscesses. **M. radia'tus** (Flügge), isolated from contaminated plate-cultivations. **M. rosa'ceus**, found contaminating an old cultivation. **M. subfla'vus** (Bumm), cocci resembling gonococci; derived from lochial discharges and vaginal secretions. **M. tetrago'nus**, cocci found in the sputa of phthisical patients and in the walls of tubercular cavities. **M. ure'æ** (Cohn), isolated from stale urine. **M. versic'olor** (Flügge), small iridescent cocci. **M. viola'ceus** (Schröter), cocci or elliptical cells observed in boiled potatoes exposed to the air. **M. visco'sus** (Pasteur), globular cells, considered the cause of mucoid fermentations in wine and beer. **M. viticulo'sus** (Flügge), oval cocci, isolated from contaminated cultivations.

Microcoria, mik-ro-kor'e-ah (*micro*, *kore*, pupil). Obliteration of the pupil by excessive contraction.

Microcornea, mik-ro-kor'ne-ah (*micro*, *cornea*). Unusually small size of cornea.

Microcosm, mi'kro-kozm (*micro*, *kosmos*, world). Little world. Some philosophers have given this appellation to man, whom they consider as the epitome of all that is admirable in the world. The world they call *Macrocosm* (*makros*, great).

Microcosmetor, mi-kro-koz-me'tor (*micro*, *kosmetor*, regulator). Vital principle.

Microcosmic (mi-kro-koz'mik) **salt.** Salt composed of soda, ammonia, and phosphoric acid; originally obtained from human urine.

Microcosmica (mik-ro-koz'me-kah) **mach'ina.** The organism of man. **M. scien'tia**, physiology.

Microcos'micum sal. With the ancients, the salts of the urine—*Sales urinæ*.

Microcosmography, mi-kro-koz-mog'raf-e (*microkosmos*, *graphe*, description). Physiology.

Microcosmus, mik-ro-koz'mus. Microcosm.

Microcou'lomb. Millionth part of a coulomb. See *Coulomb*.

Microcoustic, mi-kro-koos'tik (*micro*, *akouo*, to hear). This word, as well as *Microphonous* (*micros*, small, *phone*, voice), means anything that contributes to increase the intensity of sound—as the speaking-trumpet—by collecting the sonorous rays.

Microcranius, mik-ro-kran'e-us (*micro*, *kranion*, cranium) Microcephalus.

Microcrith, mi'kro-krith (*micro*, *krithe*, barley). Unit of molecular weight, denoting weight of half a molecule of hydrogen.

Microcyst, mi'kro-sist (*micro, kustis,* bladder). Small cyst.

Microcyte, mi'kro-site (*micro, kutos,* cavity). Small cell or corpuscle, often present in large numbers in pernicious anæmia.

Microcythæmia (*mikros,* small, *kutos,* cavity, *haima,* blood). State of blood in which microcytes—red corpuscles diminished in size—are numerous; abnormal diminution in size of blood-corpuscles, from disease or toxic agency.

Microcytosis, mik-ro-se-to'sis. Microcythæmia.

Microdacty'lia (*micro, daktulos,* finger). Smallness of fingers.

Microdont, mik'ro-dont. Having short or small teeth.

Microfarad, mik-ro-far'ad (*mikros,* small, *farad*). Practical unit of electrical capacity, equal to one-millionth of a farad.

Microgaster platypus, mik-ro-gas'ter plat'e-pus (*mikros,* small, *gaster,* stomach). Demodes folliculorum.

Microgenesis, mik-ro-jen'is-is. Term applied to a part when in an undeveloped condition.

Microgenia, mik-ro-jen'e-ah (*micro, geneion,* chin). Very small chin.

Microgerm, mi'kro-jurm. Microbe.

Microglossia, mik-ro-glos'se-ah (*micro, glossa,* tongue). Original smallness of tongue.

Micrognathia, mik-ro-nath'e-ah (*micro, gnathos,* jaw). Unusual small size of jaws.

Microgramme, mi'kro-gram. Millionth part of a gramme.

Micrography, mi-krog'raf-e (*micro, graphe,* description). Description of objects with the aid of the microscope. See *Photomicrography.*

Microgyria, mik-ro-je're-ah (*micro, guros*). Condition of brain in which the gyri are unusually small.

Microhistol'ogy. Histology.

Microhm, mi'krohm. Electrical resistance equal to the millionth part of an ohm.

Microkinesis, mik-ro-kin-a'sis (*micro, kinesis,* motion). Persistent involuntary muscular movements in very young children.

Microlentia, mik-ro-len'she-ah. Unusually small crystalline lens.

Microleuconymphæa, mik-ro-lu-ko-nim-fe'ah (*micro, leukos,* white, *nymphæa*). Nymphæa alba.

Microlitre, mi'kro-le-t'r. Millionth part of a litre.

Micrology, mi-krol'o-je (*micro, logos,* description). See *Microscopy.*

Microma'nia (*micro, mania*). Condition observed in the insane, in which the person affected imagines that some part of his body is becoming smaller.

Micromazia, mik-ro-mah'ze-ah. Unusual smallness of mammæ.

Microme'lia (*micro, melos,* limb). Congenital imperfect development of extremities. **M. chondromala'cia,** congenital rachitis. **M. unilatera'lis,** micromelia confined to only one side of the body.

Micromelus, mik-rom'el-us (*micro, melos,* a limb). *Hemimeles.* Monster having imperfectly developed extremities; the limbs are normal in shape, but abnormally small. If confined to the upper extremity, it is called *Microbrachius;* if to the legs, *Micropus.*

Micromeria (mik-ro-mer'e-ah) **Douglas'sii.** Plant, genus of Labiatæ. Yerba buena, possessing medicinal properties.

Micrometer, mi-krom'e-tur (*micro,* small, *metron,* measure). Instrument for microscopic measurements.

Micrometry, mi-krom'et-re. Measurement of very small bodies with the aid of the micrometer.

Micromil'limetre. Thousandth part of a millimetre or a millionth part of a meter; used in microscopic measurements.

Micrommatus, mik-rom'mat-us (*micro, omma,* eye). Microphthalmus.

Micromycetes, mik-rom-e'set-eez (*micro, mukes,* mushroom). Minute fungi.

Micromyelia, mik-ro-me-el'e-ah (*micro, muelos,* marrow). Condition characterized by unusual smallness of the spinal cord, existing in microcephalia.

Micron, mik'ron. Millionth part of a meter, denoted by Greek letter μ.

Micro-or'ganisms. Minute organized matters or bodies; term used to designate entire order of microscopic life as studied in its relation to disease. See *Bacteria, Bacillus, Coccus,* etc.

Micropanencephalus, mik-ro-pan-en-sef'al-us (*micro, pan,* entire, *enkephalos,* brain). Term given by Lissauer to skulls in which angle between line from hormion to nasion and basion is from 138° to 163°.

Microphages, mik-rof'aj-ees (*micro, phago,* to eat). Name given to wandering cells in lymphatic tissue of alimentary canal; the micro-organisms are supposed to be consumed by them. See *Phagocyte.*

Microphagous, mi-krof'ag-us (same etymon). Phagocyte.

Microphone, mi'kro-fone (*micro,* small, *phone,* sound). Instrument for augmenting sound.

Microphonia, mik-ro-fo'ne-ah (*micro, phone,* voice). Condition in which the voice is weak.

Microphonous, mi-krof'o-nus (*micro, phone,* voice). See *Microcoustic.*

Microphotograph, mi-kro-fo'to-graf. Photographic object so minute as to be only discernible with a microscope.

Microphotography, mi-kro-fo-tog'raf-e. Production of photographs upon a minute scale.

Microphthalmia, mik-rof-thal'me-ah. Condition in which the eye is unusually small or imperfectly developed.

Microphthal'mos or **Microphthalmus,** mik-rof-thal'mus (*micro, ophthalmos,* eye). One who has small eyes. Monster with two small or imperfectly developed eyes.

Microphytes, mi'kro-fites (*micro, phuton,* vegetable). Microscopic spores of plants—*microspores*—sometimes detected in marshy atmospheres.

Micropia, mik-ro'pe-ah (*micro, ops,* eye). Condition usually dependent on retinitis or choroido-retinitis, in which objects appear smaller to the patient than they really are.

Microplasia, mik-ro-plah'ze-ah (*micro, psuche,* soul). Weak mental condition.

Micropodia, mik-ro-pod'e-ah. Micropus.

Microprosopus, mik-ro-pro-so'pus (*micro, prosopon,* face). Monster in which a part of the face is absent.

Micropsia, mik-rop'se-ah. Micropia.

Micropsy. Mycropia. **M., hyster'ical,** delusion in hysterical subjects that distant objects are unnaturally small.

Micropus (mik'ro-pus) or **Microp'odous** (*micro, pous,* foot). One who has small feet. Condition is called *Micropodia.* See *Micromelus.*

Micro'py. Micropia.

Micropyle, mi'kro-pile (*micro, pule,* gate). *Micropyla.* Opening in the episperm of seeds, through which the fecundating pollen enters the ovule to fecundate it; it has been supposed that such a micropyle exists in the human ovule.

Microrchides, mik-ror'kid-ees (pl. of **Microrchis**) (*micro, orchis,* testicle). They who have very small testicles.

Microrrheometer, mi-kror-rhe-om'et-ur (*micro, rheo,* to flow, *metron,* measure). Instrument employed for the purpose of estimating and observing liquids in their passage through tubes of a small diameter.

Microscelous, mi-kros'sel-us (*micro, skelos,* leg). Short-legged.

Mi'croscope (*mikros, skopeo,* to see). Optical instrument for examining minute objects which are not visible to the naked eye.

Microscopic, mi-kro-skop'ik. Relating to microscopy. An eye capable of distinguishing very minute objects is sometimes called a *microscopic eye.*

Microscopist, mi-kros'kop-ist. One who is expert with the microscope or accustomed to its practical use.

Microscopy, mi-kros'ko-pe (*micro, skopeo,* to view). Observation by the microscope; an important agency in the examination of the healthy and morbid tissues. The description of the results of such observation is called *Micrography. Micrology* is often used with the

same signification, and for a treatise on the microscope and the results of microscopy.

Microseme, mi'kro-seem (*mikro*, small, *sema*, mark). Having an orbital index below 84°.

Microsoma, mik-ro-so'mah (*micro*, small, *soma*, body). Little corpuscle; minute granules which are present in the protoplasm.

Microsomatia, mik-ro-so-mat'e-ah (*micro*, *soma*, body). State in which the entire body, with all its parts, is smaller than common.

Microsomia, mik-ro-so'me-ah (*micro*, *soma*, body). Microsomatia.

Microspectroscope, mi-kro-spek'tro-skope. Spectrum arrangement applied to a microscope for spectroscopic examination.

Microspheres, mi'kro-sfeers. Minute bodies having a round shape, occurring in recent lymph from pustules of vaccine and small-pox. According to Cohn, they belong to the Schizomycetes, and are regarded by him as the carriers of contagion.

Microsphyctus, mik-ro-sfik'tus (*micro*, *sphugmos*, pulse). Smallness or weakness of pulse.

Microsphyxia, mik-ro-sfiks'e-ah (*micro*, small, *sphuxis*, pulse). Smallness of pulse.

Microsplanchnus, mik-ro-splank'nus (*micro*, *splanchnon*, viscus). Possessing small viscera.

Microspores, mi'kro-spores. See *Microphytes.*

Microsporon (mik-ros'po-ron) **Audoui'ni** (*micro*, *sporon*, seed, spore). See *Fungus*, *Parasites*, and *Porrigo decalvans.* **M. diphtherit'icum,** a form of micrococcus considered by some observers as the specific cause of diphtheria. **M. fur'fur,** see *Chloasma*, *Fungus*, and *Parasites.* **M. mentagrophy'tes,** mentagraphyte; see *Fungus* and *Parasites.* **M. minutis'simum,** vegetable parasite. It is still *sub judice* whether it belongs to the fungi; it occurs in the axillæ, inguinal and genito-crural regions, cleft of nates, and adjoining parts of trunk or limb, and causes a contagious disease called erythrasma. **M. sep'ticum,** round micrococcus described by Klebs as having been detected in septicæmic blood.

Microsporum, mik-ros'por-um. Microsporon.

Microstat, mik'ro-stat (*micro*, *histemi*, to stand). Stage and finder for microscope.

Microsthenes, mik-ros'then-ees (*micro*, *sthenos*, strength). Group of the mammalia having a small size, in contradistinction to the *Megasthenes*, which are the largest and most powerful of the mammalia.

Microstom'atous. Having a small mouth.

Microstomus, mik-ros'to-mus (*micro*, *stoma*, mouth). One who has a small mouth. Condition is called *Microstomia* or *Microstoma;* usually congenital, and due to some deficiency in the lower jaw.

Microtesia, mik-ro-ta'se-ah (*mikrotes*, smallness). Morbid smallness of organic parts.

Microthlipter, mik-ro-thlip'tur (*micro*, *thlibo*, to squeeze). Instrument for crushing minute objects.

Microtia, mik-ro'te-ah (*micro*, *ous*, ear). Unusual small size of ear.

Mi'crotome (*micro*, *tome*, incision). An instrument for cutting fine sections for microscopical examination.

Microtrapezia, mik-ro-trap-a'ze-ah (*micro*, *trapeza*, table). Leptotrophia.

Microtrichia, mik-ro-trik'e-ah (*micro*, *thrix*, hair). Fineness or shortness of hair.

Microtrophia, mik-ro-trof'e-ah (*micro*, *trophe*, nourishment). Leptotrophia.

Microtrophous, mik-rot'rof-us. Badly nourished.

Microvolt, mik'ro-volt. Millionth part of a volt.

Microzo'a (*micro*, *zoon*, animal). Very minute forms of animal life, interesting pathologically as causation of disease.

Microzoöspore, mik-ro-zo'o-spore (*micro*, *zoon*, animal, *sporos*, seed). Minute zoöspore.

Microzymæ, mik-ro-ze'me (*micro*, *zume*, ferment). Microscopic particles of living matter that secrete a ferment that is active in the production of disease.

Microzy'matous. Relating to microzymæ or microzymes; term used, instead of zymotic, to include a number of diseases caused by action of so-called fermentation, as syphilis, tuberculosis, etc.

Microzymes, mi'kro-zimes. Microzymæ; micrococci.

Mictio, mik'she-o (*mingo*, *mictum*, to pass urine). Micturition. **M. cruen'ta,** hæmaturia. **M. inopportu'na,** enuresis. **M. involunta'ria,** enuresis. **M. sanguin'ea,** hæmaturia.

Miction, mik'shun. Micturition.

Mictolithos (mik-tol'ith-os) or **Miktol'ithus** (*miktos*, mixed, *lithos*, stone). Calculous concretion composed of different parts.

Mictomephitous, mik-to-mef-e'tus. Combination of pernicious exhalations.

Mictopyous, mik-top'e-us. Mixed with pus.

Micturition, mik-tu-rish'un (*micturio*, to make water). Act of passing water; *Urination.* Also morbid frequency of passing water.

Mictus, mik'tus. Micturition. **M. cruen'tus,** hæmaturia.

Mid'brain. Mesencephalon.

Midfacial, mid-fa'she-al. Situated in the middle of the face.

Midfrontal, mid-front'al. Situated in middle of forehead.

Midgut, mid'gut. Term applied to rudimentary embryonic intestinal tract, which at a later period forms the principal part of the intestines.

Midriff, mid'rif. Diaphragm.

Mid'wife. Female practising obstetrics.

Mid'wifery. Obstetrics.

Mig'ma. Mistura.

Mignonette, min-yon-et'. Reseda odorata.

Migraine, me'grain. Abridged from Hemicrania.

Migrana, mig-ran'nah. Hemicrania.

Migration, mi-gra'shun. Act of migrating. **M. of o'vum,** transition of the ovum from the ovary to the Fallopian tube. **M. of the tes'ticle,** the descent of the testes into the scrotum. **M. of white cor'puscles,** occurring in inflammation, in which the white corpuscles pass through the walls of the vessels.

Migratory, mi'gra-to-re. Relating to migration.

Mikania (mik-an'e-ah) **gua'co** (after Prof. J. Mikan, botanist of Prague). Guaco. **M. officina'lis,** Brazilian species; reputed to be a febrifuge and tonic. **M. opif'era,** plant of Brazil; used in snake-bite. **M. scan'dens,** of Eastern and Southern United States; same properties as M. guaco.

Mikrocephalus, mik-ro-sef'al-us. Microcephalus.

Mik'rocryth. Microcrith.

Mikulicz drain'age. Method of draining cysts of the abdomen or peritoneum, consisting in introducing iodoform gauze into the cavity and packing with the same material. **M.'s opera'tion** consists in excision of inferior end of tibia and fibula, astragalus, os calcis, and posterior portion of scaphoid and cuboid bones, which are then brought into position with the tibia and fibula.

Mildew, mil'du. Term including different minute fungi which thrive on plants, animal tissue, or decaying matter. **M., corn,** rust in wheat due to Puccinia graminis. **M., gan'grene,** ergotism.

Mil'foil (*mille*, thousand, *folium*, leaf). Achillea millefolium.

Milia, mil'e-ah. Miliaria.

Miliaria, mil-e-ar'e-ah (*milium*, millet). Miliary fever. **M. crystal'lina,** sudamina. **M. papulo'sa,** lichen tropicus; prickly heat. **M. ru'bra,** miliaria vesiculosa. **M. su'dans,** miliary fever. **M. sudato'ria,** miliary fever. **M. vesiculo'sa,** form of miliaria in which the sweat-glands are greatly distended.

Miliariform, mil-e-ar'e-form. Having a resemblance to a millet-seed.

Miliarine, mil-e-ar'een (*miliaria*). Term proposed by Dr. Wm. Farr for the specific principle by which miliary fever is propagated.

Miliaris, mil-e-ar'is. Miliary. **M. purpura'ta,** fever, typhus. **M. sudato'ria,** sudor Anglicus; sudor Picardicus.

Miliary, mil'e-a-re. Resembling millet-seed; hence miliary fever, miliary glands. **M. an'eurism,** aneurism of smallest arteries of cerebellum. **M. fe'ver,** so called from the eruption resembling the seed of the

milium or millet. Fever, accompanied by an eruption of small, red, isolated pimples, rarely confluent, but almost always very numerous, slightly raised above the skin, and presenting, at the end of 24 hours, a small vesicle filled with a white transparent fluid, which quickly dries up and separates in the form of scales. Miliary fever is now rare, in consequence of the cooling practice in fevers and other states of the system. It is almost always brought on by external heat, and hence the prevention is obvious. **M. glands,** sebaceous glands. **M. granulations** or **tu'bercles,** see *Granulation.*

Mil'ii sem'ina (seeds of millet). Panicum Italicum.

Miliolum, mil-e'o-lum (dim. of **Milium,** millet). Small tumor on the eyelids, resembling, in size, a millet-seed.

Militaris herba, mil-e-tah'ris ur-bah. Achillea millefolium.

Military, mil'e-ta-re (*miles,* soldier). Pertaining to a soldier or an army—as military medicine, *Medicina militaris,* and military surgery, *Chirurgia militaris,* medicine and surgery applicable to the soldier. **M. ophthal'mia,** see *Ophthalmia.*

Milium, mil'e-um. See *Grutum, Hydatid,* and *Panicum miliaceum.* **M., am'yloid,** molluscum contagiosum. **M., col'loid,** colloid degeneration of the skin; rare affection, occurring chiefly on the face; lesions consist of flattish elevations imbedded in the skin, containing a mass resembling jelly and a drop of blood. The disease has been attributed to changes in the sebaceous glands. **M. esculen'tum,** panicum miliaceum. **M. In'dicum,** panicum Italicum. **M. pan'icum,** panicum miliaceum. **M. so'lis,** Lithospermum officinale.

Milk. Fluid secreted by the mammary glands of the females of the mammalia. Skimmed *milk of the cow* contains water, caseous matter, traces of butter, sugar of milk, chloride of sodium, phosphate and acetate of potassium, lactic acid, lactate of iron, and earthy phosphates. *Cream* is formed of butter, casein, and whey, in which there are sugar of milk and salts. When examined by the microscope, milk is seen to contain a large number of particles, of irregular size and shape, varying from $\frac{1}{12700}$th to $\frac{1}{3040}$th of an inch in diameter, floating in a colorless liquid—liquor lactis. They consist of oily matter surrounded by a delicate pellicle, and are the *milk-globules.*

Cow's milk is employed for the preparation of cream, butter, cheese, whey, sugar of milk, etc. It has been useful in a number of cases of poisoning, either by acting as a demulcent, or by decomposing certain poisons, or by combining with others so as to neutralize them. It is constantly employed as an aliment, and may be regarded as an emulsion in which butter and casein are found in suspension. When taken into the stomach it is coagulated by the gastric fluids, and the coagulum is digested like any other solid; the watery parts are absorbed.

Between milk, flour, and blood there is great similarity of composition. The following table is given by Dr. Robert Dundas Thompson:

Milk.	*Flour.*	*Blood.*
Curd or Casein	Fibrin, Albumen, Casein, Gluten.	Fibrin, Albumen, Casein, Coloring matter.
Butter	Oil.	Fat.
Sugar	Sugar, Starch.	Sugar.
Chloride of potassium, " sodium, Phosphate of sodium, " calcium, " magnesium, " iron.	Starch.	Sugar.

From a considerable number of experiments by other investigators the several kinds of milk which they examined are classed according to the following table, as regards the relative quantity of materials they contain:

Casein.	Butter.	Sugar of Milk.	Serum.
Goat	Sheep	Woman	Ass
Sheep	Cow	Ass	Woman
Cow	Goat	Mare	Mare
Ass	Woman	Cow	Cow
Woman	Ass	Goat	Goat
Mare	Mare	Sheep	Sheep

The following statement by Simon gives the average composition of various kinds of milk in parts; but milk differs often in the same animal, the food taken varying both in quality and quantity:

	Human Milk.		Cow's milk.		Goat.	Sheep.	Ass.	Mare.
	Variations.	Average.	Variations.	Average.				
Water	90.4 to 85.7	88.05	90.2 to 83.7	86.95	86.0	83.3	90.6	90.6
Casein and albumen	1.8 to 3.1	2.45	3.3 to 5.5	4.40	3.8	5.4	2.7	2.2
Fat (butter)	3.0 to 3.8	3.40	2.8 to 4.5	3.65	5.2	5.3	1.0	1.1
Lactose	4.5 to 7.0	5.75	3.0 to 5.5	4.25	4.3	5.2	5.3	5.8
Inorganic salts	0.3 to 0.4	0.35	0.7 to 0.8	0.75	0.7	0.8	0.4	0.3

	Skimmed milk.	Condensed milk.	Butter.	Buttermilk.	Curd.	Whey.
Water	89.6	25.0	15.0	91.0	59.4	93.8
Casein and albumen	4.2	14.0	2.2	3.7	27.7	0.8
Fat (butter)	1.0	10.0	82.0	0.8	6.4	0.3
Lactose	4.4	49.0	0.3	3.8	5.0	4.5
Inorganic salts	0.8	2.0	0.5	0.7	1.5	0.6

Milk ab'scess. Mastodynia apostematosa. **M., acid of,** lactic acid. **M., al'mond,** emulsio amygdalæ. **M. of ammo'niac,** mistura ammoniaci. **M., artific'ial hu'man,** cow's milk prepared for infants to resemble very closely the composition of human milk. **M., asafœ'tida,** mistura asafœtidæ. **M., ass's,** considerably resembles human milk, of which it has the consistence, smell, and taste; but it contains a little less cream, and more soft caseous matter; often used by those laboring under pulmonary affections. *Artificial ass's milk* may be made by taking gelatin, ℥ss, dissolving it by the aid of heat in barley-water, Oij, adding refined sugar, ℥j, pouring into the mixture new milk, Oj, and beating the whole with a whisk. It may also be prepared by dissolving sugar of milk, ℥j, in tepid skimmed cow's milk, Oj. **M. blotch,** porrigo larvalis. **M., blue,** milk deriving its blue color from the presence of bacillus cyanogenes. **M., but'ter,** fluid which remains after butter has been made from cream. **M., con'centrated,** *Preserved milk;* various processes have been employed to obtain milk in a form ready at any time for use. By one of these, milk immediately from the cow is heated in a boiler, sugar being added, and the contents constantly stirred to favor evaporation. When the volume is reduced four-fifths, the concentrated liquid is poured into cans which are hermetically closed, and then exposed to heat in a boiler. **M. crust,** porrigo larvalis. **M. cure,** treatment of disease by means of milk alone or as the principal article of diet employed; see *Milk, skim.*

M., defic'iency of, agalactia. **M., ewe's,** affords more cream than cow's milk, but the butter is softer. The caseum, on the contrary, is fatter and more viscid. It contains less serum than cow's milk. Roquefort cheeses are made from it. **M., exces'sive secre'tion of,** galactorrhœa. **M., ferment'ed,** kumyss. **M. fe'ver,** see *Fever, milk.* **M. fis'tula,** fistula of the mamma. **M. glass,** breast-glass. **M. glob'ules,** see *Milk.* **M., goat's,** resembles cow's milk; the butyraceous matter, however, which enters into its composition is more solid than that of the cow. Artificial goat's milk may be made by taking fresh suet, ℥j, cutting it into small pieces, tying it in a muslin bag large enough to leave the morsels free from compression, and boiling in a quart of cow's milk sweetened with a quarter of an ounce of white sugar candy. Used as diet in scrofulous cases and also in phthisis. **M., green,** colostrum. **M. hedge,** Euphorbia tirucalli. **M., hu'man,** contains more sugar of milk and cream, and less caseum, than cow's milk. Composition differs according to the distance of time from delivery. **M., i'odated,** iodine dissolved in alcohol and intimately mixed with milk until there is no taste, color, or smell of iodine. **M. jel'ly,** prepared by boiling milk with sugar, then adding gelatin, lemons, and wine. **M. knot,** *Galactoganglion,* knots often observed in the breast after inflammation of the organ or for some time after the suppression of the secretion. They generally end by resolution. **M. leg,** phlegmatia dolens. **M., male's,** sperm. **M., mare's,** contains only a small quantity of fluid butyraceous matter, a little caseum, softer than that of cow's milk, and more serum. **M., mock-ass's,** artificial ass's milk. **M. plas'ma,** clear fluid containing milk-globules. **M., preserved,** milk, concentrated. **M. punch,** see *Punch.* **M., red,** milk colored red by the presence of bacillus lactis erythrogenes. **M. scall,** porrigo larvalis. **M. sick'ness,** *Sick stomach, Swamp sickness, Tires, Slows, Stiff joints, Puking fever, River sickness.* Disease occasionally observed in certain States of the South and South-west, which affects both man and cattle, but chiefly the latter. It is attributed in cattle to something eaten or drunk by them, and in man to the eating of the flesh of animals laboring under the disease. Owing to the tremors that characterize it in animals, it is called the *Trembles.* It is endemic. Symptoms of the disease are such as are produced by the acronarcotic class of poisons—vomiting, purging, extreme nervous agitation, etc.; the approved indications of treatment appear to be—gentle emetics and laxatives, with quiet and mucilaginous drinks. **M., skim,** contains not only casein, but also a saccharine assimilable principle—sugar of milk—the fatty matter having been separated by the cream. Its use has been proposed for various morbid conditions, as diabetes and the form of Bright's disease known as fatty degeneration of the kidney, causing the sugar in the former and the albumen in the latter to disappear from the urine. Diet of the patient is restricted to skim milk, the quantity being augmented until several pints are taken daily. **M., snake's,** Euphorbia corollata. **M. and so'da-wa'ter,** agreeable mode of taking milk in cases where it lies heavily on the stomach; heat, nearly to boiling, a teacupful of milk, dissolve in it a teaspoonful of sugar, put into a large tumbler, and pour over it two-thirds of a bottle of soda-water. **M., solid'ified,** milk, to which little less than an equal weight of white sugar has been added, evaporated to dryness. When redissolved in water, it has all the qualities of fresh milk, with the additional quantity of sugar. To milk which has been evaporated to dryness the names *Lactoline* and *Lacteine* have been given. **M. spots,** maculæ albæ; strophulus. **M. stone,** kind of earth applied in intertrigo. **M., su'gar of,** sugar of milk. **M. of sul'phur,** sulphur præcipitatum. **M., sweet,** Galium verum. **M., tar,** petroleum Barbadense. **M. teeth,** see *Dentition.* **M. thistle,** Lilybum marianum. **M. thrush,** aphthæ. **M. tree,** tree yielding a juice bearing resemblance to milk. **M. tu'mor,** galactocele; galactoma. **M., tur'pentine,** rectified benzine. **M., veg'etable,** succus lacteus; the secretion of some varieties of trees resembles a milky juice. **M. vetch,** Astragalus verus. **M. vetch, stem'less,** Astragalus exscapus. **M. wax,** ozokerite. **M. weed,** Apocynum androsæmifolium, Asclepias Syriaca, Euphorbia corollata. **M. weed, long'-leaved green,** Acerates longifolia. **M. weed, smooth,** Asclepias Sullivantii. **M., witch'es',** fluid resembling colostrum, observed to exist in mamma of infants after birth. **M. wort, bit'ter,** Polygala amara. **M. wort, com'mon,** polygala. **M. wort, dwarf,** Polygala paucifolia. **M. wort, rat'tlesnake,** polygala. **M., yellow,** yellow appearance of milk, due to the presence of a specific bacterium.

Milk'ing cramp. See *Cramp, writer's.*

Milk'y. Lactic. **M. stains,** patches, white.

Mill moun'tain. Linum catharticum.

Mil'lar's asth'ma. Laryngismus stridulus; stridulous laryngitis.

Millefo'lium. Achillea millefolium.

Millegrana, mil-le-gran'ah. Herniaria glabra.

Millemorbia scrophularia, mil-le-mor'be-ah skrof-u-lah're-ah (*mille,* thousand, *morbus,* disease). Scrophularia nodosa.

Millepedes, mil-lep'e-dees (pl. of **Millepes**) (*mille,* thousand, *pedes,* feet). Onisci aselli.

Milleperta, mil-le-pur'tah. Hypericum perforatum.

Mil'ler-Lew'is bacillus, bas-il'lus. Bacillus shaped like a comma, met with in the mouth.

Mil'let-seed rash. Miliary fever.

Milliampère, mil-le-am'pare. Electrical unit representing thousandth part of an ampère.

Milliampèremeter, mil-e-am'pare-me-ter. Instrument for measuring minute electricity.

Milligramme, mil'le-gram (*mille,* thousand, *gramma,* gramme). Thousandth part of a gramme—about 0.0154 Troy grain.

Milligrana, mil-e-gran'ah. Herniaria glabra.

Millilitre, mel'le-le-ter. French measure of capacity, the thousandth part of a litre, equal to 0.06102 of a cubic inch.

Millimetre, mil'le-me-ter (*mille,* thousand, *metron,* measure). Thousandth part of the metre, equal to 0.03937 Eng. inch, about two-fifths of a line.

Mil'lon's rea'gent. Solution of mercury and nitric acid; imparts a purple-red color to proteids.

Mill'stone-ma'ker's phthi'sis. Form of severe bronchitis dependent on inhalation of fine particles separated in the manufacture of millstones.

Mil'phæ or **Milpho'sis.** Loss of hair, particularly of the eyelashes.

Milt'like. Epithet for a form of cancer characterized by a soft pale growth containing scarcely any blood; called from resemblance to the milt of a fish. See *Encephaloid.*

Mil'tus. Plumbi oxydum rubrum.

Milt'waste. Asplenium.

Mimetic, mim-et'ik. Relating to imitation. **M. paral'ysis,** facial paralysis.

Mimic (mim'ik) or **Mim'ical.** Mimetic. **M. pal'sy,** see *Paralysis, facial.* **M. spasm,** see *Paralysis, facial.*

Mimicry, mim'ik-re. Imitation.

Mimochasmesis, mim-o-kaz-ma'sis (*mimeomai,* to imitate, *chasmesis,* yawning). Imitative yawning.

Mimography, mim-og'raf-e (*mimeomai,* to imitate, *grapho,* to write). Employment of signs as a means of communication among deaf-mutes.

Mimosa catechu, mim-o'sah kat'e-ku (*mimos,* mimic, the leaves of many species mimicking sensibility). Catechu. **M. cochliacar'pa,** see *Cortex adstringens Brasiliensis.* **M. leucophlœ'a,** see *Spirit (arrack).* **M. Nilot'ica,** see *Acacia.* **M. pudi'ca,** sensitive plant, native of tropical America; root has emetic properties; leaves are employed in baths to relieve pain. **M. scand'ens,** cachang-parang. **M., Sen'egal,** see *Senegal, gum.* **M. virgina'lis,** see *Cortex adstringens Brasiliensis.*

Mimulus moschatus, mim'u-lus mos-kat'us. See *Musk.*

Mimu'sops eleu'gi. An East Indian tree; bark has tonic and astringent properties.

Mind. The seat of the intellectual reasoning

power in man. **M. blind'ness**, loss of power to recognize objects, due to cortical lesions; the sight, however, remains intact. **M. cure**, professed method of curing diseases by influence of healer's mind upon that of the patient. **M. deaf'ness** resembles mind-blindness; the patient loses the power to distinguish nature of sounds due to cortical lesions, the apparatus of hearing, however, remaining intact. **M., unsound**, insanity.

Mindere'rus, spirit of. Solution of ammonium acetate.

Mineral degeneration, min'e-ral de-jen-e-ra'shun. Cretefaction. **M. oil**, petroleum. **M. water**, acidulous water, simple. **M. waters**, see *Waters, mineral.*

Mi'ner's asth'ma. Carbonaceous or black phthisis, miner's consumption. Form of severe bronchitic disease of miners, in consequence of the peculiar atmosphere breathed by them. It is often associated with mitral insufficiency, probably dependent on the great stress on the circulatory and respiratory organs by the difficulties of egress. See *Anchylostomiasis.* **M.'s el'bow**, enlargement of bursa over the olecranon in such as habitually lean upon it; often seen in those who work on the side in low-roofed mines. **M.'s nystag'mus**, see *Nystagmus.*

Min'im (the least part or portion). The sixtieth part of a fluidrachm; measure introduced by the London College of Physicians in consequence of the uncertainty of the size of the drop; see *Drop.* The proportion between the minims and the drops of various fluid preparations is given under *Drop.* **M. meas'ure**, measure for the division of the fluidrachm.

Minimum, min'im-um. Least part or portion. Minim.

Minister gymnastæ, min'is-ter jim-nas'te. In ancient gymnastics, an officer acquainted with the prescribed exercises and who carried them into effect.

Minithosis, min-e-tho'sis (*minutho*, to diminish). Decline or remission of a disease.

Minium, min'e-um. Plumbi oxydum rubrum. **M. Græco'rum**, hydrargyri sulphuretum rubrum. **M. pu'rum**, hydrargyri sulphuretum rubrum.

Minor helicis, me'nor hel'is-is (smaller muscle of the helix). Muscle situate on the posterior border of the helix of the ear at its commencement in the fossa of the concha.

Minoration, mi-nor-a'shun. Mild purgation by laxatives.

Minorativus, min-or-at-e'vus (*minor*, less). Laxative.

Mint. Mentha. **M., cat**, nepeta. **M., cock**, Tanacetum balsamita. **M., curled**, Mentha crispa. **M., horse**, Monarda coccinea and M. punctata. **M., horse, hair'y**, Blephilla hirsuta. **M., horse, Ohi'o**, Blephilla hirsuta. **M., horse, sweet**, Cunila mariana. **M., hys'sop-leaved**, Mentha cervina. **M., moun'tain**, Monarda coccinea. **M., moun'tain, com'mon**, Pycnanthemum incanum. **M., pep'per**, Mentha piperita. **M., spear**, Mentha viridis. **M., squaw**, hedeoma. **M., stone**, Cunila mariana. **M. tea**, infusum menthæ viridis. **M., water**, Mentha aquatica.

Min'tha. Mint.

Minute' anat'omy. Histology.

Minuthesis, min-u-tha'sis (*minutho*, to diminish). Decline or remission of a disease.

Minutio, min-u'she-o. Diminution, as of capacity, power, etc. **M. mon'achi** (restriction of the monk), term used in the Middle Ages for treatment lessening the sexual energy.

Minyanthes, min-e-an'thees. Menyanthes.

Miosis, me-o'sis. Decline or remission of a disease.

Mirab'ilis dichot'oma. Four-o'clock flower of W. Indies,; a drastic purgative. **M. jalap'a**, false jalap; has been used as a substitute for officinal jalap. **M. suave'olens**, Mexican plant; leaves are stomachic, astringent, and antiarthritic.

Mirac'ulous plas'ter. See *Plaster.*

Mirocele. Merocele.

Mirror. Mirrors are used extensively in ophthalmoscopy, laryngoscopy, rhinology, etc. for examining and treating cavities.

Mirror-galvanometer, mir'ror-gal-van-om'e-tur. A mirror is fastened to the galvanometer needle, which reflects a beam of light upon a scale and indicates small motions of the needle.

Mirrot, mir'rot. Daucus carota.

Miryachit. Form of neurosis observed in Siberia and other cold countries, in which marked excitability, with imitation of words or movements, is present.

Misanthropy, mis-an'thro-pe (*misos*, hatred, *anthropos*, man). Aversion to man and society; symptom of melancholy and hypochondriasis.

Miscarriage, mis-kar'rij. Expulsion of a human fœtus between the third and seventh months of pregnancy. See *Abortion.*

Miscegenation, mis-se-jen-a'shun (*misceo*, to mix, *genus*, a race). Mixture or amalgamation of races, as of the black with the white.

Misemis'sion. Absence of emission in sexual intercourse.

Miserere (miz-er-air'e) **me'i** (have pity on me). Ileus.

Misery, miz'e-re (*miser*, suffering). See *Pain.*

Mislactation, mis-lak-ta'shun. Vitiated or defective condition of milk.

Mis'mar or **Mese'mar.** Nodus on the toes as the sequel of contusion or inflammation.

Mismenstrua'tion. Any form of disordered menstruation.

Mismicturi'tion. Any form of disordered passage of urine.

Misog'amos or **Misog'amus** (*misos*, hatred, *gamos*, wedlock). Having morbid repugnance to wedlock.

Misogyny, mis-oj'in-e (*misos*, hatred, *gune*, a woman). Hatred of women; repulsion for sexual intercourse.

Misoma'nia (*misos*, hatred or persecution). Delusion of persecution.

Misopæ'dia (*misos*, hatred, *pais*, child). Dislike of children by their parents.

Misopsychia, mis-o-sik'e-ah (*misos*, hatred, *psuche*, life). Weariness of life; melancholy.

Misoptochus, me-sop-to'kus (*misos*, hatred, *ptochos*, poor). Having hatred for the poor. Gout has been so called because commonly affecting the rich.

Misozoïa, mis-o-zo'e-ah (*misos*, hatred, *zoe*, life). Disgust of life, even to the verge of suicide.

Misplace'ment. Displacement; ectopia.

Missed la'bor. Condition in which a dead fœtus remains in the womb for some time after the term of pregnancy has expired.

Missio sanguinis, mish'e-o san'gwin-is. Bloodletting.

Mistio, mis'te-o (*misceo*, *mixtum*, to mix). Mixture.

Mistletoe, mis'il-to. Viscum album. **M., yel'lowish**, Viscum flavescens.

Mistura (mis-tu'rah) or **Mixtu'ra.** *Mixture.* Mingled compound in which different ingredients are contained in the fluid state, or suspended or not by means of mucilaginous or saccharine matter. In this sense synonymous with the French *Potion.* In France, however, the word *mixture* more frequently means a liquid medicine containing very active substances, and only to be administered by drops. When it consists of materials requiring to be shaken up when taken, it is termed *Mistura media.* **M. aca'ciæ**, mucilago acaciæ. **M. ac'idi hydrocyan'ici**, *Mixture of Prussic acid* (medicinal prussic acid, ℥j; distilled water, ℥xiv; pure sugar, ℥jss); dessertspoonful every morning and evening as a pectoral, etc. **M. ammoni'aci** (Ph. U. S. and Br.), *Mixture of ammoniac* (ammoniac, ℥iij; aquæ, f℥x); dose, f℥ss to f℥j (Ph. U. S.). **M. amyg'dalæ** (Ph. U. S. and Br.) (sweet almond, gr. ccxl; acacia, gr. xl; sugar, ℥ij; distilled water, f℥ix); dose, f℥ij-vj, in catarrh of stomach and bowels and of urinary organs; emulsio amygdalæ. **M. asafœ'tidæ** (Ph. U. S.), *Mixture of asafœtida* (asafœtidæ, ℥iij; aquæ, f℥x); used where pills cannot be swallowed and as a glyster; dose, f ℥ss to f ℥jss. **M. asafœ'tidæ pro clys'mate**, enema fœtidum. **M.**

bal'sami copai'bæ, see *Chopart's mixture*. **M. cam'phoræ**, *Camphor mixture* or *julep* (camphor., ℥ij; alcohol., ℞xl; magnes. carb., ℥iv; aqua destillat., Oij); virtues like those of camphor. **M. chlorofor'mi** (Ph. U. S.), *Mixture of chloroform* (chloroform. purif., f℥ij; camphor., gr. xlv; vitell. ovi. recent., f℥ss; aquæ, f℥iv); dose, f℥ss–j. **M. contrac'ta** (small mixture), see *Gutta*. **M. cor'nu us'ti**, *Decoction of burnt hartshorn*, *Mixture of burnt hartshorn*, *White decoction* (cornuum ust., ℥ij; acaciæ gum. cont., ℥j; aquæ, Oiij). **M. creaso'ti**, *Creasote mixture* (creasot., acid. acetic. glacial., āā ℞xv; spirit. junip., ℞xxx; syrup., f℥j; aquæ destill., f℥xv) (Ph. Br.); a fluidounce contains a minim of creasote, the usual dose. **M. cre'tæ** (Ph. U. S. and Br.), *Chalk* or *Cretaceous mixture*, *Chalk julep* (compound chalk powder, gr. cccc; cinnamon-water, f℥j, f℥vj; water, f℥j, f℥vj) (Ph. U. S.); antacid and absorbent; dose, f℥j to f℥ij. **M. diabol'ica**, mixture under this name is kept in many hospitals for malingerers; made of nauseous ingredients, as aloes, asafœtida, castor, etc., and given to keep up a disagreeable impression on the gustatory nerves. **M. fer'ri et ammo'nii aceta'tis** (Ph. U. S.), Basham's mixture (tinct. of chloride of iron, ℞lxxxiij; diluted acetic acid, f℥ij; solution of acetate of ammonium, f℥xiv; elixir of orange, f℥vj; syrup, f℥j; water, f℥iv, f℥ij); tonic; dose, f℥ss–j. **M. fer'ri aromat'ica**, *Aromatic mixture of iron* (cinchon. rubr. pulv., ℥j; calumb. rad. pulv., ℥ss; caryophyll. cont., ℥ij; ferri fil., ℥ss; tinct. cardamom. comp., f℥iij; tinct. aurant. cort., f℥ss; aquæ menth. piperit., q. s.) (Ph. Br.); tonic; dose, f℥j–ij. **M. fer'ri compos'ita** (Ph. U. S. and Br.), *Compound mixture of iron*, *Griffith's mixture* (myrrhæ, gr. lxxij; sacchar., gr. lxxij; potass. bicarb., gr. xxxij; aquæ rosæ (Ph. U. S.), f℥viij; ferri sulph. in pulv., gr. xxiv; sp. lavand., f℥ss); tonic and emmenagogue, and useful wherever iron is indicated; dose, f℥j–ij. **M. ferrosali'na**, mixture, ferrosaline. **M. fus'ca** (brown mixture), M. glycyrrhizæ composita. **M. gentia'næ**, see *Infusum gentianæ compositum*. **M. glycyrrhi'zæ compos'ita** (Ph. U. S.) *Compound mixture of licorice*, *Brown mixture* (extract. glycyrrhiz. pur., acaciæ pulv., sacchar., āā ℥ss; tinct. opii camphorat., f℥ij; vin. antimon., f℥j; spirit. æther. nitros., f℥ss; aquæ, f℥xij); popular cough medicine; dose, a tablespoonful for an adult. **M. guai'aci**, *Mixture of guaiac* (guaiac., resin. pulv., sacch. pur., āā ℥ss; acaciæ pulv., ℥ij; aq. cinnam., Oj) (Ph. Br.); dose, f℥ss to f℥ij. **M. gum'mi guai'aci berge'ri**, mistura guaiaci. **M. gummo'sa**, gum mixture. **M. hor'dei**, decoctum hordei compositum. **M. len'iens**, looch ex ovo. **M. magne'sii et asafœ'tidæ**, mixture of magnesia and asafœtida (carbonate of magnesium, gr. ccclx; tinct. of asafœtida, f℥x; tinct. of opium, ℞lxxv; sugar, ℥iss; distilled water, q. s. to make f℥xv); Dewees's carminative; dose, ℞xx. **M. me'dia**, see *Mistura*. **M. mos'chi**, *Musk mixture* (moschi, acaciæ gum., sacch. purif., āā ℥j; aq. rosæ, f℥vj); dose, f℥ss to f℥ij. **M. potas'sæ citra'tis**, liquor potassæ citratis. **M. potas'sii citra'tis** (Ph. U. S.), neutral mixture (fresh lemon-juice, f℥iv; bicarbonate of potassium, q. s. for neutralization); should be always freshly made; given in fevers, etc.; dose, f℥ss. **M. rhe'i et so'dæ** (Ph. U. S.) (bicarbonate of sodium, ℥ss; fluid extract of rhubarb, f℥iiiss; spirit of peppermint, f℥ivss; water, q. s. to make Oj); dose, for children, as carminative, half a teaspoonful to a teaspoonful. **M. scammo'nii**, *Scammony mixture* (scammon., gr. vj; lactis, f℥ij) (Ph. Br.); dose, f℥j–ij. **M. sen'næ compos'ita**, *Compound mixture of senna* (magnes. sulph., ℥iv; extract. glycyrrh. liquid., f℥j; tinct. sennæ, f℥iiss; tinct. cardamom. comp., f℥iss; infus. sennæ, f℥xv) (Ph. Br.); dose, f℥j–jss. **M. spir'itûs vi'ni Gal'lici**, *Brandy mixture*, *Mixture of spirit of French wine* (sp. vin. Gallic., aq. cinnam., āā f℥iv; vitel. ovi., ij; sacchar. pur., ℥ss) (Ph. Br.); excitant draught for the low stages of fever; dose, f℥j–ij. **M. strych'niæ**, *Mixture of strychnia* (distilled water, ℥ij; very pure strychnia, 1 gr.; white sugar, ℥ij); dose, a teaspoonful. **M. sulphu'rico-acida**, elixir acidum Halleri. **M. vulnera'ria ac'ida**, eau d' arquebusade.

Mitchella (mitch-el'lah) **re'pens** (after Dr. John Mitchell of Virginia, botanist). *Partridgeberry*, *Checkerberry*, *Winter clover*. Indigenous trailing evergreen, of the family Cinchonaceæ; expectorant, emmenagogue, and diuretic; prescribed in dropsy and gout.

Mite. Small insects, particularly the acarus.

Mitella, mit-el'lah (dim. of **Mitra**, bandage). Sling.

Mithridate, mith-rid-at'e. Compound electuary into which entered myrrh, saffron, agaric, ginger, cinnamon, frankincense, garlic, mustard, birthwort, galbanum, castor, gum arabic, opium, gentian, valerian, acacia, and other substances in Canary wine, honey, etc.; invented by Mithridates, king of Pontus and Bithynia, and regarded as alexipharmic.

Mithridaticum medicamentum, mith-rid-at'ik-um med-ik-am-en'tum. Mithridate.

Mith'ridatism. Condition of protection from toxic drugs by taking them in gradually increasing doses. Mithridates was credited with such protection, as a habitual taker of strong drugs.

Mitigans, mit'e-gans (*mitigo*, to assuage). Lenitive.

Mit'igate. To relieve pain or distress, or, at least, to moderate it.

Mitigated caustic, mit'e-ga-ted kaw'stik. Fused nitrate of silver with equal part of potassium nitrate. **M. stick**, M. caustic.

Mitochysis, mit-ok'is-is (*mitos*, thread, *chusis*, liquefaction). Multiplication of cells.

Mito'ma. Portion of nucleus, the chromatin.

Mitos'chisis. Karyokinesis.

Mitosis, mit-o'sis (*mitos*, thread). Starlike division of the chromatin of a nucleus. Karyokinesis.

Mitra Hippocratica, me'trah hip-po-krat'ik-ah (*mitra*, mitre, bandage). Bonnet of Hippocrates; capelline bandage.

Mitral, mi'tral. Having the form of a mitre; resembling a bishop's mitre. **M. regurgita'tion**, see *Regurgitation*. **M. valves**, two triangular valves at the opening of communication between the left auricle of the heart and the corresponding ventricle; formed by the inner membrane of the left cavities of the heart, and retained on the side of the ventricle by tendinous cords proceeding from the columnæ carneæ. They permit the blood to pass from the auricle into the ventricle, and oppose its return.

Mitrium, mit're-um (*mitrion*, dim. of *mitra*, bandage). Sling.

Miuamaru. See *Arrow-poison*.

Miva, me'vah. Marmelade.

Mixed fe'ver. Inflammatory and typhus fever occurring together.

Mixis, miks'is. Coition. Mistura.

Mixtio, mik'she-o (*misceo*, *mixtum*, to mix). Mistura.

Mixtura, miks-tu'rah. Mistura.

Mixture, miks'ture. Mistura. **M., A. C. E.**, alcohol, p. j; chloroform, p. ij; ether, p. iij; anæsthetic. **M. of ac'etate of i'ron and ammo'nium**, mistura ferri et ammonii acetatis. **M., al'mond**, emulsio amygdalæ. **M. of ammo'niac**, mistura ammoniaci. **M. of asafœt'ida**, mistura asafœtidæ. **M., Ba'sham's**, mistura ferri et ammonii acetatis. **M., brandy**, mistura spiritûs vini Gallici. **M., brown**, mistura glycyrrhizæ composita. **M., cam'phor**, mistura camphoræ. **M., chalk**, mistura cretæ. **M. of ci'trate of potas'sium**, liquor potassii citratis. **M. of cre'asote**, mistura creasoti. **M., creta'ceous**, mistura cretæ. **M., em'etine, emetic**, mistura emetinæ vomitoria. **M., ferrosaline'**, under this name the author has long prescribed the following combination in torpor of the colon: Magnes. sulphat., ℥j; potassæ bitart., ℥j; ferri sulph., gr. x; for a quart of water. Wineglassful every morning, on rising, until the torpor is removed. **M., gen'tian**, see *Infusum gentianæ compositum*. **M., Grif'fith's**, mistura ferri composita. **M. of guai'ac**, mistura guaiaci. **M. of gum ar'abic**, see *Emulsio acaciæ*. **M. of harts'horn, burnt**, mistura cornu usti. **M., Hope's**, recommended by a Mr. Hope in diarrhœa and dysentery; essentially a nitrate of morphia. Although the proposer employed the acidum nitrosum (Ph. Edin.), nitric acid is generally used (acid. nitros.,

f℥j ; aquæ camphor., f ℥viij ; tinct. opii, gtt. xl.—M.) ; dose, a fourth part every three or four hours. **M. of i'ron, aromat'ic,** mistura ferri aromatica. **M. of i'ron, com'pound,** mistura ferri composita. **M., Lafayette,** mixture for gonorrhœa, consisting of copaiba, spirit of nitrous ether, compound tincture of lavender, liquor potassæ, syrup, and mucilage of acacia. **M. of lic'orice, com'pound,** mistura glycyrrhizæ composita. **M. of marsh'mallows,** decoctum althææ. **M., musk,** mistura moschi. **M., neu'tral,** liquor potassæ citratis. **M. of Prus'sic ac'id,** mistura acidi hydrocyanici. **M. of rhu'barb and so'da,** mistura rhei et sodæ. **M. of scam'mony,** mistura scammonii. **M., Scud'amore's,** recommended by Sir C. Scudamore in gouty and rheumatic affections (magnes. sulph., ℥j–℥ij ; aquæ menthæ, f ℥x ; aceti colchic., f ℥j–f ℥jss ; syrup. croci, f ℥j ; magnes., ℈viij.—M.) ; dose, one, two, or three tablespoonfuls, repeated every two hours in a paroxysm of gout, until from four to six evacuations are produced in twenty-four hours. **M. of sen'na, com'pound,** mistura sennæ compositum. **M. of spir'it of French wine,** mistura spiritûs vini Gallici. **M. of strych'nia,** mistura strychniæ.

Mm. Symbol for micromillimetres.

Mne'me. Memory.

Mnemoneutice (ne-mo-nu'tis-e) or **Mnemon'ice.** Mnemonics.

Mnemonics, ne-mon'iks (*mneme,* memory). The art of aiding the memory and of forming artificial memory.

Mnemotechne, ne-mo-tek'ne (*mneme,* memory, *techne,* art). Mnemonics.

Moaning, moan'ing. A plaintive respiration, in which the patient utters audible groans or moans.

Moap'eye. Myopia.

Mo'bile spasm. Term implying movements, slow and irregular in character, following hemiplegia.

Mobility, mo-bil'it-e (*mobilis,* that can be moved). The power of being moved. In physiology, great nervous susceptibility, often joined to a disposition to convulsion. Greatly developed excitability.

Moccasin (mok'a-sin) **flow'er.** Cypripedium acaule, C. luteum. **M. plant,** Cypripedium luteum. **M. root,** Cypripedium pubescens.

Mochleusis, mok-lu'sis (*mochlos,* lever). Reduction of a luxated bone.

Mochlia, mok-le'ah (*mochleuo,* to move). Reduction of a luxated bone.

Mochlicus, mok'le-kus. Relating or appertaining to mochlia ; purgative.

Mochliscus, mok-lis'kus (dim. of **Mochlos,** lever). Lever.

Mochlium, mok'le-um (*mochlion,* dim. of *mochlos,* lever). Instrument employed in obstetrics.

Mochlus, mok'lus. Lever.

Mochthus, mok'thus. Agony.

Mock'knees. Crusta genu equinæ.

Mock'orange. Philadelphus coronarius; leaves are detergent.

Modelling process, mod'el-ing pro'sess. A term proposed by Dr. Macartney of Dublin for the mode in which wounds are healed without inflammation or suppuration by a deposit of plastic matter from the surface of the wound, portion being laid upon portion, without waste, after the manner of clay in the hands of the sculptor.

Moderator (mod'e-ra-tor) **band.** Fibrous or muscular band often existing in man, extending across the right ventricle of the heart.

Mod'ified lin'ear extrac'tion. Von Graefe's method of operating on cataracts.

Modiolus, mod-e'o-lus. (The nave of a wheel). A hollow cone in the cochlea of the ear, forming a nucleus, axis, or central pillar around which the gyri of the cochleæ pass. The modiolus forms the inner and larger portion of the central pillar, and is the cavity seen at the bottom of the meatus auditorius internus, lodging a branch of the auditory nerve. The central portion of the modiolus, *Tractus spiralis foraminulosus,* contains a number of minute canals. Into these the nerves of the cochlea enter, and pass out at right angles between the bony plates forming the zona ossea of the lamina spiralis, to be expended on the membranous portion of the lamina. Also the crown of a trepan.

Modus operandi, mo'dus op-er-an'de (mode of operating). Term applied to the general principles upon which remedies act in morbid states of the body.

The following classification will convey some idea of the ways in which different organs may be excited into action :

1. By actual or immediate contact of the remedy, and by absorption or mediate contact.
2. By an impulse conveyed by the nerves, through an impression made on the stomach or elsewhere, or by remote sympathy.
3. By contiguous or continuous sympathy, or by mere proximity or continuity of parts.

Mœnia dentium, me'ne-ah den'she-um (walls of the teeth). See *Alveolus.*

Mœ'ror (sorrow). Despondency ; melancholy.

Mog'ador gum. Barbary gum.

Mogilalia, mo-ge-lal'e-ah (*mogis,* with difficulty, *laleo,* to speak). Difficult or defective articulation. Impediment of speech. See *Balbuties.*

Mogiphonia, mo-ge-fo'ne-ah (*mogis, phone,* voice). Neurotic affection of the larynx with loss of power of voice.

Mogostocia, mo-gos-to'se-ah (*mogos,* difficulty, *tokos,* parturition). Dystocia ; laborious labor.

Mogrigraphia, mog-re-graf'e-ah (*mogis,* with difficulty, *grapho,* to write). Writer's cramp.

Mo'gus. Agony.

Mo'hawk tas'sel. Eupatorium purpureum.

Mohr'enheim's fos'sa. Depression situate below the clavicle, between the pectoralis major and deltoid, serving as a guide for ligating subclavian artery.

Mohria thurifraga, mohr'e-ah thu-rif'ra-gah (after Prof. D. M. H. Mohr, a botanist of Kiel). South African fern, the dry leaves of which, pulverized and made into an ointment with fat, are serviceable in burns and scalds.

Moisture, moist'ure. Simple humidity of the skin. The skin is said to be moist or in a state of moisture when there is slight perspiration.

Mo'ka al'oes. Aloes of poor quality from Arabia.

Mola, mo'lah (a mill). Maxillary bone, molar tooth, mole, patella. **M., u'terine,** mole.

Molalia, mo-lal'e-ah. Mogilalia.

Mo'lar (*mola,* a mill). That which bruises or grinds. **M. glands,** two small bodies formed by a collection of mucous crypts, seated in the substance of the cheeks, between the masseter and buccinator muscles, and whose excretory ducts open into the mouth opposite the last molar tooth. **M. teeth,** *Grinders, Jaw teeth, Lag teeth, Wall teeth, Cheek teeth,* occupy the farther part of each alveolar arch. Their coronæ are broader than they are high, unequal, tuberculated, and the roots are more or less subdivided. They are 20 in number, 10 in each jaw. The first two pairs in each jaw are called lesser molars, premolar or bicuspid, dentes bicuspidati or buccales or molares anteriores or molares minores. The coronæ have two tubercles, the outer being more prominent and larger than the inner. The root is commonly simple, sometimes bifurcated. The other three pairs have been termed great molars—dentes molares posteriores or majores. Their coronæ are cubical, rounded, and have at the upper surface four or five tubercles separated by deep furrows. The root is divided into two, three, four, and five fangs, more or less curved. The third great molar appears a long time after the others, and hence has been called dens sapientiæ or wisdom tooth.

Molasses, mo-las'sez. Melasses ; theriaca.

Mole (*moles,* mass). *Vesicular mole, Hydatidiform* or *Myxomatous degeneration of the placenta, Mooncalf.* Fleshy, insensible mass of variable and determinate size forming in the uterus and slightly united by vessels to that organ, from which its feeble vitality is derived. Moles seem to be owing to a morbid process, and are generally connected with conception. At times they contain parts of the fœtus, but com-

monly do not. At different periods in different women the mass is expelled from the uterus with ordinary symptoms of abortion, and the case requires similar management. See also *Nævus* and *Conception, false.* **M., hydat'id,** see *Hydatid.* **M. plant,** Euphorbia lathyris.

Molecular, mo-lek'u-lar. Relating to molecules or minute portions of anything; hence molecular death, in contradistinction to somatic death or death of the whole body. **M. lay'er of cor'tex,** stratum moleculare cerebri; first layer of Meynert. **M. move'ment,** see *Motion.* **M. weight,** see *Atomic weight.*

Molecule, mo'le-kyul (dim. of **Moles,** mass). Minute portion of any body; also the cicatricula, macula, gallatura, gelatinous molecule, tread of the cock, or embryo part of the impregnated ovum, observable by the microscope before the ovum has left the ovarium of the hen. It lies under the epidermic coats of the yolk, and upon its proper coat. If the ovum, according to Valentin, be lacerated and its contents minutely examined, the cicatricula is found like a grayish-white disk, which in its whole periphery is dense, granulous, and opaque, but in the centre presents a clear, non-granulous, and perfectly diaphanous point. Purkinje found that, when he removed the dark granulous mass by suction with a small tube, there remained a perfectly transparent vesicle filled with a pellucid lymph which had a decidedly spherical form, but, being extremely delicate, was easily lacerated, and then its fluid escaped As he found this—which later naturalists have named, after its discoverer, the *Purkinjean vesicle*—in the ova of the ovary, but could not see it in ova which had already entered the oviduct, he named it *germinal vesicle, germ-vesicle,* or *germ-cell, vesicula prolifera* or *germinativa, blastocystinx.* Besides a perfectly colorless fluid this contains one or more dark corpuscles, which appear as a nucleus through the including membrane in the shape of opaque spots—the germinal spot, germ-spot, macula germinativa or germinans, nucleus germinativus, blastocardia, corculum germinis, blastocelis, Wagnerian spot or vesicle. The small dots observed by Valentin in the Wagnerian vesicles, and arising in them, have been termed *Valentinian vesicles.* The granulous membrane—its thickened portion, the so-called "cicatricula"—and the germinal vesicle constitute those parts of the ovum which pass immediately into the original foundation of the embryo, the blastoderm, blastodermic or germinal membrane, vesicula blastodermatica or blastodermica, blastodermic vesicle. In the nomenclature of Professor Agassiz the yolk-membrane is an *ectoblast;* the Purkinjean vesicle, a *mesoblast;* the Wagnerian vesicle, an *entoblast;* and the Valentinian vesicle, an *entosthoblast.* See *Cytoblast.* **M., gelat'inous,** molecule.

Moles gangliformis, mo'lees gan-gle-for'mis (gangliform mass). Ganglion of Gasser.

Molibdus, mo-lib'dus. Lead.

Molilalia, mo-lil-al'e-ah. Mogilalia.

Molimen, mo-le'men (pl. **Moli'mina**) (*molior,* to strive). An attempt, a struggle. **M. apoplec'ticum,** cerebral hemorrhage. **M. crit'icum,** impulsion toward a sudden solution or crisis of a disease. **M. hæmorrhag'icum,** hemorrhagic diathesis or impulsion. **M. hæmorrhoïda'le,** hemorrhoidal diathesis or impulsion; see *Hæmorrhois.* **M. menstrua'le,** menstrual diathesis or impulsion. **M. natu'ræ saluta'rium,** instinct.

Molles'cence (*mollis,* soft). Softening; mollities.

Mol'lin (*mollis,* soft). Soap composed of caustic potash, cocoanut oil, and glycerin; base for ointments in cutaneous affections.

Mollipuffs, mol'e-pufs. Lycoperdon.

Mol'lis ma'ter (tender mother). Pia mater.

Mollities, mol-lish'e-eez (*mollis,* soft). Preternatural softness of an organ or part of an organ. **M. atroph'ica,** see *Mollities cerebri.* **M. cer'ebri,** *Mollescence* or *softening* or a kind of *liquefaction of the cerebral substance,* the remainder preserving its ordinary consistency. The neurine often contains small clots of blood, giving rise to what has been termed *Capillary apoplexy* (Cruveilhier). Several varieties of softening are now described, as *Red softening,* a result of inflammation; *Yellow softening,* the result of the death of a portion of the cerebral tissue; *White softening, Mollities atrophica,* the result of imperfect nutrition, due to deficient supply of blood. **M. cor'dis,** softening of the heart, caused by inflammation or from some lesion in the function of nutrition. **M. medul'læ spina'lis,** softening of the spinal marrow. **M. os'sium,** *Softening of the bones;* rare affection in which the bones are deprived of their salts, particularly of the phosphate of lime, and consist only, or mainly, of gelatin; hence they acquire a degree of suppleness which renders them unfit for the performance of their functions. The disease generally affects all the bones; but it is especially remarkable during life in the long bones, which assume any curvature that may be wished. Very violent pain is often experienced in them, and the urine frequently contains an enormous proportion of calcareous phosphate. The patient is compelled to remain in the horizontal posture, the bones no longer being fixed points for the muscles to act upon. The disease has almost always terminated fatally, and dissection has exhibited the gelatinous nature of the bones, which, by desiccation, have become transparent, as if they had been macerated in acid. Experience has afforded no means of relief in this dreadful affliction. Alkaline salts, earthy phosphates, etc. are of little or no use, the disease being in the cells of nutrition. **M. un'guium,** unnaturally soft condition of the nails from faulty nutrition of those parts.

Mollitio, mol-lish'e-o. Mollities.

Mollitudo, mol'le-tu-do. Mollities.

Moll's glands. Small glands existing in the margin of the eyelids.

Mollu'go cervia'na. Infusion of the flowers is diaphoretic. **M. sperg'ula** or **verticilla'ta,** carpet weed; Indian chickweed. Laxative, stomachic.

Molluscum, mol-lus'kum (knotty growth on the bark of the maple). Cutaneous affection consisting of numerous tumors, varying in size from that of a pea to that of a pigeon's egg, filled with an atheromatous matter, which are developed in the substance of the derma, and are of various shapes, some having a large base, others adherent by a pedicle. The disease is probably seated in the sebaceous follicles. **M. adeno'sum,** M. contagiosum. **M. contagio'sum,** singular variety, characterized by the presence of hard, round tubercles, which are smooth and transparent, and, when pressed, pour out from an orifice in their summits a little opaque or milky fluid. **M. epithelia'le** or **epithelio'ma,** M. contagiosum. **M. fibro'sum,** morbid condition consisting of quite small masses or tumors developed around a hair-follicle, each including an enlarged sebaceous gland belonging to the hair-follicle, and a peripheral mass of nucleated connective tissue, the hair occupying the centre of the tumor. **M. non-contagio'sum** or **pen'dulum,** M. fibrosum. **M. seba'ceum** or **ses'sile,** M. contagiosum. **M. sim'plex,** M. fibrosum. **M. verruco'sum,** a form of M. contagiosum allowing of enucleation *en masse.*

Moloche, mol'o-ke. Malva rotundifolia.

Molopes, mol-o'pees (wheal). Vibices.

Molybdænum magnesii, mol-ib-de'num mag-ne'se-e (*molubdos,* lead). Manganese, black oxide of.

Molybdamauro'sis. Amaurosis from lead-poisoning.

Molybdamblyo'pia. Amblyopia from lead-poisoning.

Molybdate, mo-lib'date. Molybdic acid combined with a base.

Molybdencepha'lia. Affection of the brain from lead-poisoning.

Molybdenepilep'sia (*molubdos,* lead). Epilepsy induced by lead-poisoning.

Molybdocachexia, mo-lib-do-kak-eks'e-ah (*molubdos,* lead, *cachexia*). Lead-poisoning.

Molybdocardial'gia. Cardialgia from lead-poisoning.

Molybdocolica, mo-lib-do-kol'e-kah (*molubdos,* lead, *colica*). Colica metallica.

Molybdoïdes, mo-lib-do-e'dees (*molubdos,* lead, *eidos,* form). Resembling lead.

Molybdonosus, mo-lib-don'o-sus (*molubdos,* lead, *nosos,* disease). Lead-poisoning.

Molybdoparesis, mo-lib-do-par'es-is (*molubdos,* lead, *paresis,* paralysis). Lead-palsy.

Molybdosis, mol-ib-do'sis (*molybdus*). Lead-poisoning.

Molybdospasmus, mo-lib-do-spaz'mus (*molubdos,* lead, *spasmos,* spasm). Cramp or spasm due to lead-poisoning.

Molybdus, mo-lib'dus. Lead.

Molyne, mol-e'ne. Anus.

Molynsis, mo-lin'sis (*moluno,* to taint). Miasma.

Momisci, mo-mis'se. Molar teeth. Also the parts of the molar teeth connected with the gums.

Momordica, mo-mor'de-kah (*mordeo,* to bite). *Balm-apple, Balsam apple,* ord. Cucurbitaceæ; fruit of this oriental tree, *Pomum mirabile* or *Hierosolymitanum,* was formerly considered vulnerary. **M. as'pera,** M. elaterium. **M. bu'chu,** Ecbalium buchu. **M. elate'rium,** *Wild, Squirting,* or *Asses' cucumber,* nat. ord. Cucurbitaceæ. The dried sediment from the juice is the elaterium of the shops. See *Extractum elaterii.* A powerful cathartic, and has been used in dropsies. The active principle is *Elatin, Elaterin,* or *Ecbalin.* Dose, gr. ¼ to gr. j until it operates. The Ph. B. formerly had *Ecbalii fructus, Squirting cucumber fruit,* the very nearly ripe fruit of Ecbalium officinarum.

Momor'dicin. Principle derived from elaterium.

Monad, mo'nad (*monas,* a unit). Simple particle or atom or unit; smallest of all visible animalcules; primary cell or germ.

Monadeno'ma. Adenoma of a single gland.

Monæ, mo'ne. Nates.

Monanæsthe'sia (*monos,* one, *anæsthesia,* loss of sensation). Loss of sensation in one part or limb from lesion of the nerves or of occipital cortex, or it may be from hysteria.

Monarda, mo-nar'dah (after N. Monardes, a Spanish botanist). *Scarlet rose balm, Mountain mint, Oswego tea, Mountain balm, Horsemint, Square stalk, Red balm;* indigenous plant, ord. Labiatæ; has excitant properties of Monarda punctata. **M. allophyl'la,** M. fistulosa. **M. clinopo'dia,** M. fistulosa. **M. coccin'ea,** monarda. **M. did'yma,** monarda. **M. fistulo'sa,** *Wild bergamot, Horsemint;* leaves have a fragrant smell and an aromatic, somewhat bitter taste; reputed to be nervine, stomachic, and deobstruent. **M. Kalmia'na,** monarda. **M. oblonga'ta,** M. fistulosa. **M. puncta'ta,** *Horsemint;* indigenous in the United States; stimulant and carminative; *Oleum monardæ, Oil of horsemint,* was formerly officinal in the Ph. U. S. **M. purpu'rea,** monarda. **M. rugo'sa,** M. fistulosa.

Monardin, mo-nar'din. Crystalline solid, isomeric with thymol, from oil of horsemint.

Monarthri'tis. Inflammation of a single joint.

Mo'nas. Monad. **M. crepus'culum,** micrococcus crepusculum. **M. prodigio'sa,** bacillus prodigiosus. **M. termo,** bacterium termo.

Monaster, mon-as'ter (*monos,* single, *aster,* star). Single-star figure in karyokinesis.

Monatomic, mon-ah-tom'ik (*monos,* single, *atomos,* atom). In chemistry, denotes an element of which one atom of hydrogen is saturated by only one atom of the combining element.

Monelithrix, mon-e-lith'riks. Atrophy of the hair in which it resembles beads.

Monemeron (mo-nem'er-on) or **Monoëm'eron** (*mono, hemera,* a day). Name given to several collyria which were supposed to cure diseases of the eyes in a day.

Monenterum, mon-en'ter-um (*mono, enteron,* intestine). Colon.

Monera, mo-ne'rah. Class of protozoans of the lowest forms of life.

Monesia, mo-ne'ze-ah. Vegetable extract imported into Europe from South America in hard, thick cakes. Prepared from the bark of a tree whose botanical name is uncertain—probably *Chrysophyllum glycyphlæum* or *Buranhem, Burunhem, Guaranhem;* ord. Sapotaceæ. Very friable, and its fracture very much resembles that of a well-torrefied cocoanut. Wholly soluble in water, and its taste, which is at first sweet like licorice, sometimes becomes astringent. On account of its astringent properties it has been prescribed in chronic bronchitis, hemoptysis, diarrhœa, leucorrhœa, uterine hemorrhage, etc. Has been applied locally in the form of ointment (mones., p. 1; adipis, p. 7).

Monesin, mo-ne'sin. Acrid principle obtained from monesia; identical with saponin.

Moneywort, mun'e-wort. Lysimachia nummularia.

Mongolian, mon-go'le-an. Anthropologists give the name *Mongolian race* to a variety of the human species spread over a great part of the north of Asia, in China, India, Thibet, the Moluccas, etc. Individuals composing it have the skin of a brown red, forehead flat, nose broad, cheeks prominent, and lips large. See *Man.*

Mongrel, mung'grel. Hybrid.

Monileth'rix (*monile,* necklace, *thrix,* hair). Moniliform or beaded hair.

Moniliform, mo-nil'e-form (*monile,* necklace, *forma,* shape; necklace-like). Term applied to a peculiar change in the form of the blood-vessels, caused by partial dilatations of their walls; often observed in cases of cerebral softening.

Moni'mia polystach'ia. Plant of S. America, recent leaves of which are exepctorant and bark astringent.

Monism, mo'nizm (*monas,* unity). Doctrine that matter and mind are identical.

Monk physic'ians and sur'geons. Class of practitioners of whom Frère Come and Jacques Beaulieu in France, and Pravetz in Germany, were the most distinguished.

Monkey-bread, mung'ke-bred. Fruit of baobab tree.

Monkshood, mungks'hood. Aconitum. **M., com'mon,** Aconitum napellus. **M. ocam'pi,** herb from Mexico; leaves are considered tonic. **M., sal'utary,** Aconitum anthora. **M., wild,** Aconitum uncinatum.

Monni'na polystach'ia (after Monnino, Count de Florida Blanca, Spanish promoter of botany). South American plant, Polygaleæ. The bark of the root is a powerful astringent, much used in South America in bowel diseases; also as a hair-wash.

Mo'no (*monos,* one, alone). In composition, one alone, only one.

Monobasic, mon-o-bas'ik (*monos,* single, *basis,* base). Having one base; term used in chemistry.

Monoblep'sia or **Monoblepsis,** mon-o-blep'sis (*mono, blepsis,* sight). Affection in which vision is confused, imperfect, and indistinct when both eyes are employed, but perfect or nearly so when either eye is used singly.

Monobrachius, mon-o-brak'e-us (*monos,* single, *brachium,* arm). Defective development in the congenital absence of an arm.

Monobromated, mo-no-bro'ma-ted. Containing one bromine atom. **M. cam'phor,** compound of camphor containing bromine in place of one atom of its hydrogen.

Monobrom'ethane. Ethyl bromide.

Monobro'mide of cam'phor. Monobromated camphor.

Monocarpæ, mo-no-kar'pe (*mono, karpos,* fruit). A division of cutaneous affections, of the family Eczematosen of Fuchs, which includes strophulus, psydracia, and ecthyma.

Monocephalus, mo-no-sef'al-us (*mono, kephale,* head). Compound monster having two bodies with a single head.

Monochlormethane, mo-no-klor-meth'ane. Methyl chloride.

Monochromatic (mo-no-kro-mat'ik) **aberra'tion.** Spherical aberration.

Mon'ocle. See *Monoculus.*

Monococcus, mo-no-kok'kus (*monos,* single, *kokkos*). Form of coccus in which each is single and detached.

Monocœlic, mo-no-se'lik (*mono, cœlia,* cavity). Having one cavity.

Monocolon, mo-no-ko'lon. Cæcum; rectum.

Monocranus, mon-ok'ran-us (*mono, kranon, kranion,* cranium). Monster with one cranium, but with the face in part double.

Monocrotous, mon-ok'ro-tus (*mono, kroteo,* to strike). See *Pulse, monocrotous.*

Monocular, mon-ok'u-lar (*mono, oculus,* eye). Belonging or relating to one eye; hybrid term. Variety of figure-of-8 bandage, to be applied to one eye only, is called a monocular bandage. **M. polyo'pia hysterica,** monocular diplopia or triplopia of hysterical subjects, including hysterical macropsy and micropsy.

Monoculum, mon-ok'u-lum. Cæcum.

Monoculus, mon-ok'u-lus (*mono, oculus,* eye). *Monocle.* Bandage employed to maintain topical applications over one of the eyes. This bandage, called by some surgeons *Simplex oculus,* is made of a roller three or four ells long, rolled into a single ball. See *Cyclops.*

Monocyst, mo'no-sist (*mono, kustis,* cyst). Unilocular cyst. See *Oligocyst.*

Monodiplopia, mon-o-dip-lo'pe-ah (*mono, diploos,* double, *ops,* eye). Uniocular diplopia or double vision with one eye. **M. hyster'ica,** monocular polyopia hysterica.

Monœcius, mo-ne'she-us (*mono, oikos,* house). Hermaphrodite.

Monoëm'eron. Monemeron.

Monogastric, mon-o-gas'trik (*mono, gaster,* stomach). Having but one stomach. Man is monogastric; ruminating animals, on the contrary, are polygastric; a muscle that has one belly is monogastric.

Monoge'neous (*mono, genos,* kind). Of one race or family.

Monogeny, mo-noj'en-e (*mono, genos,* kind). See *Generation.*

Monograph, medical, mon'o-graf, med'e-kal (*mono, graphe,* description). An *ex professo* treatise on a single class of diseases or on a single disease or medical subject.

Monohemeron, mon-o-hem'er-on. Monemeron.

Monolocular, mon-o-lok'u-lar (*monos,* single, *oculus,* eye). Having but one cell or cavity; term applied to cystic tumors especially; unilocular.

Monom'achon or **Monom'acum.** Cæcum.

Monomania, mon-o-man'e-ah. Form of insanity in which the aberration is confined to one subject. **M., homici'dal,** homicidal insanity. **M., incen'diary,** pyromania. **M. syphilit'ica,** syphiliphobia.

Monomaniac, mon-o-ma'ne-ak. One laboring under monomania or insanity, chiefly on one subject.

Monommatos, mon-om'mat-os (*mono, omma,* eye). Cyclops.

Monomoria, mon-o-mor'e-ah (*mono, moria,* silliness). Melancholy.

Monomphalus, mon-om'fal-us (*mono, omphalos,* navel). A monster produced by the union of two bodies having a common umbilicus. Such a double monster is called by I. G. St. Hilaire *Monomphalian.*

Mononœa, mon-o-ne'ah (*mono, noos,* thought). Thought on one subject, as in monomania.

Monopagia, mon-o-pah'je-ah (*mono, pagios,* fixed). Clavus hystericus; hemicrania.

Monopathophobia, mon-o-path-o-fo'be-ah (*mono, pathos,* disorder, *phobos,* dread). Hypochondriasis.

Monopathy, mon-op'ath-e (*mono, pathos,* disorder). A state in which one organ or function is disordered. Applied to melancholy or monomania, which is said to be a monopathic affection.

Monopegia, mon-o-pej'e-ah (*mono, pegnumi,* to fix). Clavus hystericus; hemicrania.

Monophasia, mon-o-faz'e-ah (*mono, phasis,* a speech). Difficulty in speaking, consisting of inability to utter more than one syllable, one word, or one sentence.

Monophobia, mon-o-fo'be-ah (*mono, phobos,* fear). Mental affection in which there exists a morbid dread of being left alone.

Monophthalmia, mon-of-thal'me-ah. Cyclopia.

Monophthalmus, mon-of-thal'mus (*mono, ophthalmos,* eye). Cyclops; monoculus.

Monophyodont, mon-o-fe'o-dont (*mono,* single, *phuo,* to produce, *odous,* tooth). An animal having only one set of teeth.

Monoplastic, mon-o-plas'tik (*mono, plasso,* to form). Having one form. A monoplastic element in histology is one which retains its primary form.

Monoplas'tid. An animal formed of one cell; a protozoön.

Monopleg'ia (*mono, plege,* stroke). Paralysis limited to a single organ or part and dependent on circumscribed lesions of the nervous system, as in glossoplegia or paralysis of the tongue, or in hemianopsia or one-sided blindness.

Monopodia, mon-o-pod'e-ah (*mono, pous,* foot). Sympodia.

Monoproso'pus (*mono, prosopon,* face). Double monster having a single face.

Mo'nops (*mono, ops,* eye). Cyclops.

Monopsia, mon-op'se-ah (*mono, opsis,* vision). Cyclopia.

Monopsychosis (*mono, psuche,* mind). Monomania or delusional insanity.

Monopus, mon'o-pus (*mono, pous,* foot). Defective development in the congenital absence of one foot; one who has but one foot; monster in whom a lower extremity is entirely absent. See *Symmeles.*

Monorchia, mon-or'ke-ah. See *Monorchis.*

Monor'chid. One who has apparently a single testicle, the other not having descended into the scrotum.

Monorchidia, mon-or-kid'e-ah. See *Monorchis.*

Monorchis, mon-or'kis (*mono, orchis,* testicle). One who has only one testicle. The condition is *Monorchidia* or *Monorchia, Monorchism, Unilateral anorchism.*

Monorchism, mon-or'kism. See *Monorchis.*

Monorganici, mon-or-gan'is-e (*mono, organon,* organ). See *Local.*

Monoscelus, mon-os'e-lus (*mono, skelos,* leg). One-legged.

Monositia, mon-o-sish'e-ah (*mono, sitos,* food, repast). The habit of taking only one meal in the day.

Monoso'mia (*mono, soma,* body). Double monster with two hands and one body.

Monosomian, mon-o-so'me-an (*mono, soma,* body). An epithet applied to a double monster which seems, in the first instance, to have had but one body.

Monospasm, mon'o-spasm (*mono, spasmos,* spasm). Spasm or convulsion of one part, as a limb or the face.

Monostoma (mon-os'to-mah) **len'tis.** See *Parasites.*

Monotic, mon-ot'ik. Relating to a single ear.

Monotrid'ymus (*mono, tridumos,* threefold). A monster with three bodies or with triplication of some parts.

Monotropa unifiora, mon-ot'ro-pah u-ne-flo'rah (*mono, trepo,* to turn—the solitary flower turned to one side). *Indian pipe, Iceplant, Pipeplant, Nest root, Fit root.* Ord. Ericaceæ. An indigenous plant whose juice, mixed with water, has been extolled by the Indians in ophthalmia. The dried root in powder has been given in epilepsy and nervous diseases.

Monoxide, mo-noks'id. Same as protoxide.

Monro', fora'men of. See *Foramen of Monro.*

Mons cerebel'li. Monticulus. **M. pu'bis** or **ven'eris** (mount of Venus), the more or less projecting eminence situate at the base of the hypogastrium above the vulva and in front of the os pubis. At the period of puberty it becomes covered with hair, formerly called *Tressoria.* At times mons veneris is applied to the corresponding part in the male.

Monsel's salt. See *Ferri sulphas.* **M.'s solu'tion,** see *Ferri sulphas.*

Monsonia ovata, mon-so'ne-ah o-vat'ah (after Lady Ann Monson, aid to Lee in his Introduction to Botany). *Keita* of the Hottentots. Plant, ord. Geraniaceæ, which grows at the Cape of Good Hope. The root and herb are very astringent, and are used successfully in dysentery.

Mon'ster (anything strange). Any organized being having an extraordinary vice of conformation or a preternatural perversion of every part or of certain parts only.

The following classification embraces the main va-

rieties of malformations—*Vitia primæ conformationis:* 1. Those in which certain parts of the normal body are absent or defective—monstra deficientia, constituting ectrogeny of Serres—monstrosity by defect. 2. Those produced by fusion or coalition of organs—coalitio partium, symphysis. 3. Those in which parts united in the normal state are separated from each other—clefts, fissures. 4. Those in which normal openings are occluded—atresia. 5. Those by excess or in which certain parts have a disproportionate size—monstra abundantia, monstrosity by excess. 6. Those in which one or more parts have an abnormal position—situs mutatus. 7. Those affecting the sexual organs—hermaphroditism. To these "true malformations" may be added, 8. Diseases of the fœtus and abnormal states of its envelopes.

Among the numerous hypotheses entertained on the origin or causes of monsters or of monstrosity—teratosis, monstrositas—three only are worth mentioning: 1. The influence of the maternal imagination on the fœtus in utero; 2. Accidental changes experienced by the fœtus at some period of its uterine existence; and 3. A primitive defect in the germs. The second seems to be the most philosophical.

Cases of supernumerary fingers and toes, which fall under the fifth division of the above classification, are probably owing to an excess of formative action in the part; and it may be a question whether many of the cases of diplogenesis are not due to this rather than to a fusion of two germs.

As a medico-legal question, monsters, if capable of action as individuals, have the same rights as other persons.

Mon'ster, autosit'ic. One capable of independent existence, notwithstanding that it has been arrested in development and its organs fused and displaced.

Mon'sters, com'pound. Class of monsters in which there are complete or incomplete elements of more than one monster. **M., double,** see *Diplogenesis.* **M., trip'let,** see *Triplet.*

Mon'stra abundan'tia, ab-un-dan'she-ah. See *Monster.* **M. deficien'tia,** see *Monster.* **M. trigem'ina,** see *Triplet.* **M. trip'lica,** see *Triplet.*

Monstros'itas, mon-stros'it-as. See *Monster.*

Monstros'ity, mon-stros'it-e. See *Monster.* **M. by defect',** see *Monster.* **M. by excess',** see *Monster.* **M. by inclu'sion,** monster developed under the theory of encasing of germs. **M., parasit'ic,** form of compound monstrosity in which a second part or body is nourished at the expense of the principal body.

Mon'strum. Monster or monstrosity.

Monstruos'itas. Monstrosity.

Monteggia's dislocation, mon-tej'e-ah's dis-lo-ka'shun. Dislocation of the hip-joint in which the limb is turned outward, and the head of the femur can be located near the anterior superior spine of the ilium.

Montgom'ery's glands. See *Mamma.*

Monthlies, munth'lees. Menses.

Monthly (munth'ly) **courses.** Menses. **M. ill'ness,** see *Menses.* **M. pe'riods,** menses.

Mont'icle. Monticulus cerebelli.

Monticulus, mon-tik'u-lus (dim. of **Mons,** mountain). **M. carno'sus ure'thræ,** caput gallinaginis. **M. cerebel'li,** see *Vermiform processes of the cerebellum.* **M. ven'eris,** mons veneris.

Mooltan' sore. Local disease of India, due to the presence of some animal parasite, as the ova of distomata, which are found in foul water. Probably identical with the *Delhi boil.*

Moon. The moon has been supposed to exert considerable influence over the body in health and disease. This theory has been abandoned; such influence has been grossly exaggerated.

Moon'blindness (improperly ascribed to the moon). Hemeralopia.

Moon'calf. Mole. A fœtal monstrosity.

Moon'ed. Lunatic.

Moon'seed. Menispermum Canadense.

Moon'stroke. See *Coup de soleil* and *Insolation.*

Moonstruck, moon'struk. Lunatic.

Moonwort, moon'wort (*moon, wort,* herb, so called from its lunate-shaped pinnæ). Botrychium lunaria; Ophioglossum lunaria.

Moorberry, moor'ber-re. Vaccinium oxycoccos.

Moore's meth'od. Method employed in treating aneurism by means of a fine iron wire. **M.'s test,** test for sugar; an equal quantity of caustic potash or soda is added to urine and boiled, and if sugar is present a yellow or brown color results.

Moor'grass. Potentilla anserina.

Moor'ill. Gastro-enteritis of cattle.

Moors'head. Alembic.

Moor'wort, broad-leaved. Andromeda mariana.

Moose'wood. Dirca palustris.

Mope-eye. Myopia.

Mopheta, mo-fe'tah. See *Mephitism.*

Mopsical, mop'se-kal. Myopic.

Mor'al insan'ity. Affection involving the moral powers rather than those of the intellect.

Morand's foot. Foot with eight toes described by him.

Morbi (mor'be) (pl. of **Morbus**) **acquisi'ti.** Acquired diseases. **M. acu'ti,** see *Acute.* **M. acutis'simi,** see *Acute.* **M. adventi'tii,** acquired diseases. **M. anniversa'rii,** annual diseases. **M. an'nui,** annual diseases. **M. asthen'ici,** adynamiæ. **M. cela'ti,** feigned diseases. **M. chron'ici,** chronic diseases. **M. cogna'ti,** innate diseases. **M. complica'ti,** see *Complication* and *Impliciti morbi.* **M. congen'iti,** innate diseases. **M. conna'ti,** connate diseases. **M. connex'i,** diseases going on together. **M. consequen'tes,** diseases that follow one another. **M. constricto'rii,** see *Spasmoticus.* **M. dermato'des,** see *Dermatoid.* **M. disper'si,** sporadic diseases. **M. dissimula'ti,** feigned diseases. **M. epicte'ti,** acquired diseases. **M. evolutio'nis,** see *Development.* **M. heredita'rii,** hereditary diseases. **M. homoëdri,** see *Homoëdrus.* **M. infitia'ti,** feigned diseases. **M. inter'ni,** internal diseases. **M. melancho'lici,** see *Mercurial.* **M. mercuria'les,** see *Mercurial.* **M. nervo'si,** nervous diseases. **M. occul'ti,** see *Latent.* **M. olfac'tûs,** diseases of olfaction. **M. perplex'i,** see *Complication.* **M. pseuda'lei,** feigned diseases. **M. recidi'va,** relapse. **M. recur'sus,** recurrence of disease. **M. sexua'les,** see *Sexual.* **M. sex'ûs,** sexual diseases. **M. simula'ti,** feigned diseases. **M. spar'si,** sporadic diseases. **M. spasmot'ici,** see *Spasmoticus.* **M. subacu'ti,** see *Acute.* **M. subacutis'simi,** see *Acute.* **M. tac'tûs,** diseases of sense of touch. **M. trop'ici,** tropical diseases.

Mor'bid. Diseased, or relating to disease. **M. anat'omy,** pathological anatomy; see *Anatomy.*

Morbidity, mor-bid'it-e. Morbid condition; also sick-rate. Condition inducing disease.

Morbiferous, mor-bif'er-us (*morbus,* illness, *fero,* to bear). Morbific.

Morbific, mor-bif'ik (*morbus, facio,* to make). Causing or producing disease—as morbific emanations.

Morbility, mor-bil'it-e. Disease.

Morbilli, mor-bil'le (dim. of **Morbus**). Rubeola. **M. confluen'tes,** scarlatina. **M. hemorrhag'ici,** measles accompanied with hemorrhagic manifestations on the skin, as ecchymoses, etc. **M. ig'nei,** scarlatina. **M. malig'ni,** measles with indications of serious blood-poisoning, hemorrhages, etc. **M. petechia'les,** see *Measles.* **M. sep'tici,** malignant measles.

Morbil'liform. Having resemblance to measles.

Morbillous, mor-bil'lus. *Morbillosus, Measly* (*morbilli*). Affected or connected with measles.

Morbosus, mor-bo'sus (*morbus,* disease). Sickly.

Morbulent, mor'bu-lent (*morbus,* disease). Sickly.

Mor'bus. Disease; see *Morbi.* **M. Addiso'ni,** see *Capsule, renal.* **M. ampulla'ceus,** pemphigus. **M. amyloï'des,** see *Lardaceous.* **M. An'glicus,** phthisis; rhachitis. **M. aphrodis'ius,** syphilis. **M. arcua'tus,** icterus. **M. arie'tis,** influenza. **M. arqua'tus,** icterus. **M. articula'ris,** gout. **M. astra'lis,** epilepsy. **M. atton'itus,** apoplexy. **M. Basedo'wii,** goitre, exophthalmic. **M. Bright'ii,** kidney, Bright's disease of the. **M. bullo'sus,** pemphigus. **M. cadu'cus,** epilepsy. **M. cæru'leus,** cyanopathy. **M. cal'culi,** lithia. **M. Canaden'sis,** radezyge. **M. cancrifor'mis,**

epithelial cancer. **M. cardi'acus**, cardialgia. **M. catarrha'lis**, influenza. **M. catox'ys**, see *Catoxys.* **M. a Cel'si**, catalepsy. **M. cerea'lis**, ergotism. **M. cerebra'lis Whyttii**, hydrocephalus internus. **M. ce'reus**, see *Lardaceous.* **M. cirrho'rum**, plica. **M. cœli'acus**, cœliac flux. **M. comitia'lis**, epilepsy. **M. cor'dis**, disease of the heart. **M. costa'lis**, pleuritis. **M. cox'æ**, coxarum morbus. **M. cox'æ seni'lis**, see *Coxarum morbus* and *Rheumatism, acute.* **M. coxa'rius**, coxarum morbus. **M. croa'tus**, scherlievo. **M. cucul'lus**, pertussis. **M. cucul'lus**, pertussis. **M. cystophlegmat'icus**, cystorrhœa. **M. dæmoni'acus**, epilepsy. **M. dæmo'nius**, epilepsy. **M. deif'icus**, epilepsy. **M. dissolu'tus**, dysentery. **M. Ditmar'sicus**, syphilis. **M. divi'nus**, epilepsy. **M. domino'rum**, gout. **M. el'ephas**, elephantiasis. **M. ende'mius**, endemic. **M. epidem'icus**, epidemy. **M. epidem'icus gut'turis Foresti**, scarlatina. **M. erudito'rum**, hypochondriasis. **M. extrin'secus**, external disease. **M. farcimino'sus**, see *Equinia.* **M. febri'lis**, febrile affection. **M. felli'fluus**, cholera. **M. flatulen'tus**, hypochondriasis. **M. flatuo'sus**, hypochondriasis. **M. fluminien'sis**, scherlievo. **M. fœ'dus**, epilepsy. **M. fœmina'rum**, disease of the Scythians. **M. frig'idus**, atrophy. **M. Gal'licus**, syphilis. **M. gesticulato'rius**, chorea. **M. granulo'sus re'num**, kidney, Bright's disease of the. **M. gra'vis**, see *Serious.* **M. hæmorrhoï'da'lis**, hemorrhoids. **M. Heracle'us**, epilepsy. **M. Hercule'us**, epilepsy. **M. Hispan'icus**, syphilis. **M. Hungar'icus**, fever, Hungaric. **M. hydrophob'icus**, hydrophobia. **M. hypochondri'acus**, hypochondriasis. **M. hyster'icus**, hysteria. **M. idiopath'icus**, idiopathia. **M. In'dicus**, syphilis. **M. infan'tilis**, epilepsy. **M. interlu'nis**, epilepsy. **M. ischia'dicus**, neuralgia femoro-poplitæa. **M. Ita'licus**, syphilis. **M. jecin'oris**, hepatitis. **M. larda'ceus**, see *Lardaceous.* **M. lasci'vus**, chorea. **M. latera'lis** or **lat'eris**, pleuritis. **M. la'zari**, elephantiasis. **M. lese'oli**, icterus. **M. lunat'icus**, epilepsy. **M. lute'olus**, icterus. **M. maculo'sus hæmorrhag'icus Werlho'fii**, purpura hæmorrhagica. **M. mag'nus**, epilepsy. **M. ma'jor**, epilepsy. **M. marit'imus**, sea-sickness. **M. medico'rum**, disease due to abuse of medicine. **M. Ménière**, Ménière's disease. **M. mensa'lis**, epilepsy. **M. mercuria'lis**, eczema mercuriale; hydrargyriasis. **M. metal'licus**, colic, metallic. **M. milia'ris**, miliaria. **M. mirachia'lis**, hypochondriasis. **M. muco'sus**, form of mucous flux which prevailed in the French army stationed at Göttingen about a century ago, due, it was supposed, to the presence of an entozoon, the trichocephalus; see *Fever, adenomeningeal.* **M. naut'icus**, nausea marina. **M. Neapolita'nus**, syphilis. **M. ni'ger**, melæna. **M. œsoph'agi**, disease of the œsophagus. **M. origina'lis**, idiopathia. **M. ory'zeus**, cholera. **M. pal'idus**, chlorosis. **M. pancœ'nus**, pandemic. **M. pande'mius**, pandemic. **M. parthe'nius**, chlorosis. **M. Paxto'nii**, parasitic disease of the hair of the armpit, named after the first full describer. **M. pedicula'ris**, phtheiriasis. **M. pe'dis entophyt'icus**, disease called Madura foot. **M. peracu'tus**, very acute disease. **M. phlyctenoï'des**, pemphigus. **M. phœni'ceus**, elephantiasis. **M. pila'ris**, trichiasis. **M. pleurit'icus**, pleuritis. **M. plum'beus**, lead-poisoning. **M. popula'ris**, epilepsy. **M. porci'nus**, essera. **M. prima'rius**, idiopathia. **M. pro'prius**, idiopathia. **M. proteifor'mis**, see *Proteiformis.* **M. protopath'icus**, idiopathia. **M. psoad'icus**, lumbar abscess. **M. pub'licus**, epidemy. **M. pueri'lis**, epilepsy. **M. pulicula'ris**, typhus gravior. **M. pustulo'sus Fin'nicus**, see *Anthrax.* **M. recidi'vus**, recurrence of disease, relapse. **M. regiona'lis**, endemic. **M. reg'ius**, icterus. **M. resiccato'rius**, hypochondriasis. **M. ructuo'sus**, hypochondriasis, eructation, morbid eructation. **M. sa'cer**, epilepsy. **M. saltato'rius**, chorea. **M. Sanc'ti Joan'nis**, epilepsy. **M. Sanc'ti Valenti'ni**, epilepsy. **M. scarlatino'sus**, scarlatina. **M. sceles'tus**, epilepsy. **M. scrophulo'sus**, scrofula. **M. secunda'rius**, secondary disease. **M. seleni'acus**, epilepsy. **M. sidera'tus**, epilepsy. **M. silesi'acus**, ergotism. **M. sim'plex**, simple affection. **M. solstitia'lis**, insolation. **M. son'ticus**, epilepsy. **M. spasmod'icus malig'nus** or **popula'ris**, ergotism. **M. strangulato'rius**, cynanche trachealis. **M. sudato'rius**, sudor anglicus. **M. suf'focans**, cynanche maligna. **M. suffocati'vus**, cynanche maligna. **M. testic'uli syphilit'icus**, see *Sarcocele.* **M. testic'uli tuberculo'sus**, see *Sarcocele.* **M. truculen'tus infan'tum**, cynanche trachealis. **M. tuberculo'sus**, see *Tubercle* and *Tubercular cachexia.* **M. tuberculo'sus pe'dis**, podelcoma. **M. vermino'sus**, helminthiasis. **M. vernac'ulus**, endemic disease. **M. verveci'nus**, influenza. **M. vesicula'ris**, pemphigus. **M. virgin'eus**, chlorosis. **M. viridel'lus**, epilepsy. **M. vitriola'tus**, epilepsy. **M. vo'cis**, disease of the voice. **M. vul'pis**, alopecia.

Morchella esculenta, mor-kel'lah es-ku-len'tah. Ord. Fungi. Fungus, esteemed a luxury, entering into ragouts and other dishes, or cooked itself between slices of bacon; has been considered to be aphrodisiac.

Mor'dant (*mordeo*, to take hold). Possessing the property of fixing colors.

Mordex, mor'deks (*mordeo*, to bite). Tooth.

Mordicant, mor'de-kant (*mordeo*, to bite). Morbid heat, causing a disagreeable pungent sensation in the fingers of the physician.

Mordica'tion. Biting sensation on the skin.

Mordices, mor'dis-ees (pl. of **Mordex**). Teeth. See *Tooth.*

Morea, mo're-ah. Morus nigra.

More'æ sisyrin'chium. Spanish nut iris; mucilaginous and pectoral.

Morell, common. Morchella esculenta.

Moretarium, mo-re-tah're-um. Mortar.

Moreto'sia huani'ta. Plant of Michoacan, bark of which is astringent and antiperiodic.

Moretum, mo-re'tum. Kind of salad, with the ancient Romans, made of garlic, parsley, vinegar, oil, etc.

Moretus, mo-re'tus (*morum*, mulberry). Ancient name of a cordial julep into the composition of which the syrup of mulberries entered.

Morgagni (mor-gan'yee) **colum'næ rec'tæ** (straight columns of Morgagni). Plicæ situated in rectum. **M., hu'mor** or **liq'uor of**, peculiar, transparent, slightly viscid fluid found between the crystalline and its capsule.

Morgag'nian cat'aract. Variety of cataract, with a hard centre suspended in liquid. **M. hydat'id**, see *Hydatid.* **M. si'nuses**, sinuses of Valsalva.

Morgue, morg. *Mortuary.* A dead-house wherein persons, found dead, are exposed with the view of being recognized by their friends.

Mori succus, mo're suk'kus. See *Morus nigra.*

Moria, mo're-ah. Idiotism. **M. de'mens**, idiotism, dementia. **M. de'mens lere'ma**, see *Dementia.* **M. imbeci'lis amne'sia**, amnesia.

Moribund, mor'e-bund (*morior*, to die). Dying; *in articulo mortis.*

Morin'da citrifo'lia. Indian mulberry; emmenagogue, astringent. **M. umbella'ta**, of E. Indies; vermifuge and antidysenteric.

Morin'dar. $C_{28}H_{30}O_{15}$. From Morinda citrifolia.

Moringa aptera, mo-rin'gah ap'ter-ah (*Muringo* in Malabar). See *Guilandina moringa.* **M., nux, ben**, Guilandina moringa. **M. oleïf'era**, Guilandina moringa. **M. pterygosper'ma**, Guilandina moringa. **M. Zeylan'ica**, Guilandina moringa.

Morion, mo're-on (part, member). Genital organ; penis.

Morioplastice, mo-re-o-plas'tis-e (*morion*, *plastikos*, forming). Restoration of lost parts. Plastic surgery.

Mo'rioplasty. Morioplastice; antiplasty; plastic surgery.

Morn'ing sick'ness. See *Pregnancy.*

Morn'ing-glo'ry, blue. Convolvulus nil.

Mo'ro (*morum*, mulberry). *Morum.* Small abscess resembling a mulberry. Small tumor, of a similar appearance, particularly on the genital organs after impure coition.

Morochites, mo-ro-ke'tees. Morochthus.

Morochthus (mo-rok'thus) or **Moroch'tus.** Egyptian stone used by the ancients as an application to the intertrigo of children.

Morocomium, mo-ro-ko'me-um (*moria,* folly, idiocy, *komeo,* to care for). Merotrophium.

Morodochium, mo-ro-dok'e-um (*moria,* folly, idiocy, *dechomai,* to receive). Morotrophium.

Moronobea coccinea, mo-ro-no'be-ah cok-se'ne-ah. Hog gum tree, ord. Clusiaceæ, native of Brazil. Affords a resin which is substituted for balsam of copaiba.

Morosis, mo-ro'sis. Delirium with imbecility; idiotism.

Morositates, mo-ros-it-at'ees (pl. of **Morositas**) (*morosus,* morose, peevish, fretful). Generic name given by Linnæus to an order of Vesaniæ, in which he included bulimia, polydipsia, nostalgia, panophobia, satyriasis, nymphomania, tarentismus, hydrophobia, and other affections.

Morotrophium, mor-o-trof'eum (*moros,* fatuity, *trophe,* support). An insane establishment, lunatic asylum, mad-house, bedlam.

Morphæa, mor-fe'ah. Term vaguely applied to scurfy eruptions on the face. Morphæa was formerly applied to squamous diseases in general, and is now used by some dermatologists for white tubercle of the face. **M. al'ba,** lepra alphoïdes. **M. ni'gra,** lepra nigricans.

Morphew, mor'few. Morphæa.

Morphia, mor'fe-ah (*Morpheus,* god of sleep). Morphium, morphine. Solid colorless alkali, crystallizable in beautiful pyramids, truncated and transparent; soluble in alcohol, and slightly so in boiling water. It exists, combined with meconic acid, in opium. It may be obtained, by decomposing by means of ammonia or calcined magnesia, an aqueous solution of opium made in the cold. Morphia dissolves perfectly in acids, which it saturates; and with which it forms very crystallizable salts, with the exception of the acetate. All these salts have a bitter taste, and act upon the animal economy in the same manner as opium, but more powerfully. The acetate is the salt commonly employed in medicine. It was at one time supposed that morphia is the purely sedative part of opium, divested of its irritating properties; but experience has not confirmed this. On the contrary, it will generally disagree where opium does. One-sixth of a grain has been considered equal to a grain of opium. **M., ac'etate of,** morphiæ acetas. **M. an'isate,** white soluble powder. **M. ben'zoate,** white powder, used, like muriate of morphia, in asthma. **M., bimec'onate of,** morphinæ bimeconas, a preparation of morphia, officinal, in the form of solution, in the Ph. Br. **M., bo'rate,** employed for collyria and for hypodermic injection. **M., bro'mide of,** morphiæ bromidum. **M., ci'trate of,** see *Morphiæ sulphas.* **M. habit,** morphinomania. **M., hydri'odate,** morphiæ hydriodas. **M. hydrobro'mate,** bromhydras morphica. **M., hydrochlo'rate of,** see *Morphiæ sulphas.* **M., lac'tate of,** see *Morphiæ sulphas.* **M. loz'enges,** trochisci morphinæ; each contains gr. $\frac{1}{36}$ of morphine (Ph. Br.). **M., mu'riate of,** see *Morphiæ sulphas.* **M., sul'phate of,** morphiæ sulphas. **M. suppos'itories,** each contains gr. ½ of morphine (Ph. Br.). **M. suppos'itories with soap,** suppositoria morphinæ cum sapone (Ph. Br.). **M. and zinc, double i'odide of,** zinc and morphia, double iodide of.

Mor'phiæ ace'tas. Morphinæ acetas (Ph. U. S. and Br.), *Acetate of morphine* or *of morphia.* Salt formed by saturating morphia with acetic acid (morphin. hydrochlorat., ℥ij; solution of ammonia, acetic acid, distilled water, āā q. s., and evaporate); dose, gr. ½-½. **M. bro'midum,** *Bromide of morphia* or *morphine.* Compound formed by the action of solution of bromide of potassium on a solution of morphia; given in a syrup, each drachm representing one-eighth of a grain, especially in such cases as require a combination of the sedative action of morphia with the peculiar effects of the bromides. **M. ci'tras,** see *Morphiæ sulphas.* **M. hydrochlo'ras,** see *Morphiæ sulphas.* **M. mu'rias,** see *Morphiæ sulphas.* **M. sul'phas,** *Sulphate of morphia, S. of morphine.* Salt formed like the acetate by saturating morphia with sulphuric acid, evaporating and crystallizing; dose, the same as of the acetate. It is the preparation of morphia usually employed in medicine.

Lactate, Muriate, and *Citrate of morphia* or *morphine, Morphia* or *Morphinæ citras,* have likewise been used; they possess little or no advantages over the other salts. Sulphate and muriate are officinal in the Ph. U. S. The muriate or hydrochlorate—*Morphinæ hydrochloras* (Ph. U. S. and Br.)—is given in dose of from $\frac{1}{8}$th of a grain to half a grain.

Morphiated, mor'fe-a-ted. *Morphinated.* Impregnated with morphia or with one of its salts; affected with morphia.

Morphic, mor'fik (*morphe,* shape or form). Relating to the anatomical shape or conformation of a part. Applied also in pharmacy to any composition of morphia.

Morphica, mor'fik-ah (*morphe,* shape). Monstrosities of birth.

Morphina, mor-fe'nah (Ph. U. S.). Morphine, $C_{17}H_{19}NO_3H_2O$. See *Morphia.*

Morphi'næ ace'tas (Ph. U. S). Morphiæ acetas. **M. ci'tras,** morphiæ citras. **M. hydrochlo'ras** (Ph. U. S. and Br.), see *Morphiæ sulphas.* **M. sul'phas** (Ph. U. S. and Br.), morphiæ sulphas.

Morphinated, mor'fe-na-ted. Morphiated.

Morphine, mor'feen. Morphia.

Morphinism, mor'feen-izm. Diseased condition brought about by abuse of morphine.

Morphinoma'nia or **Morphioma'nia.** Craving for morphine; morphine habit, whether the drug be swallowed or taken hypodermatically; mania from use of morphia or from abstinence from it.

Morphiom'etry (*morphia, metron,* measure). Determination of amount of morphia in opium or other drug.

Morphiophagy, mor-fe-of'aj-e (*morphia, phago,* to eat). Opium or morphia eating.

Morphium, mor'fe-um. Morphina. **M. ace'ticum,** morphinæ acetas.

Morpho, mor'fo (*morphe,* shape or form). In composition, shape or form.

Morphœa, mor-fe'ah (*morphe,* form). Addison's keloid. Circumscribed scleroderma (Wilson's morphœa). Cutaneous affection caused by deposit of a lardaceous substance, which by its pressure obliterates the more highly organized tissues, such as the vessels, glands, and nerves. When very white it is called *Morphœa alba;* when attended with pigmentary deposit, it is called *M. nigra;* with atrophy, *M. atrophica;* when in bands or lines, *Linear atrophy.* **M. flam'mea,** nævus vascularis. **M., Wilson's,** see *Morphœa.*

Morphogenesis, mor-fo-jen'es-is (*morphe,* shape, *genesis,* production). Morphosis.

Morphogeny, mor-foj'en-e. Development of shape.

Morphography, mor-fog'ra-fe (*morphe,* shape, *grapho,* to write). Descriptive morphology.

Morphological, mor-fo-loj'ik-al (*morpho, logos,* a description). That which relates to the anatomical conformation of parts. Applied at times to the alterations in the form of the several parts of the embryo, in contradistinction to histological, which is applied to the transformation by which the tissues are gradually generated. In comparative anatomy it is applied to the history of the modifications of forms which the same organ undergoes in different animals, and more generally to the doctrine of the forms of organized bodies.

Morphology, mor-fol'o-je. Anatomy. See *Morphological.*

Morpholysis, mor-fol'is-is (*morpho, lusis,* solution). Destruction of organization. An agent occasioning such destruction is called a *morpholytic.*

Morpholytic, mor-fo-lit'ik. See *Morpholysis.*

Morphometry, mor-fom'et-re (*morpho,* form, *metron,* measure). Measurement or estimation of the external form.

Morphonomy, mor-fon'o-me (*morpho, nomos,* law).

Law of organic formation. Department of anatomical science which teaches the laws of organic configuration.

Morphonosus, mor-fon'o-sus (*morphe, nosos*, disease). Morbid change of shape or form.

Morphosis, mor-fo'sis (*morphe*, form). Morbid formation; organic disease.

Morphotic, mor-fot'ik (*morphe*, shape). Term applied to organic or anatomical elements in contradistinction to the inorganic.

Morphotomy, mor-fot'o-me (*morpho, tome*, incision). General anatomy. See *Anatomy.*

Morpio, mor'pe-o. See *Pediculus.*

Mor'pion. Crab-louse. See *Pediculus.*

Morrhua Americana, mor'rhu-ah am-er-ik-an'ah. See *Oleum morrhuæ.*

Mor'rhuæ o'leum. See *Oleum.*

Mor'rhuic ac'id. $C_9H_{13}NO_3$. Ptomaïne obtained from brown cod-liver oil. See *Ptomaïnes* (table).

Morrhuine, mor'rhu-een (*gadus morrhua*, cod-fish). $C_{19}H_{27}N_3$. Ptomaïne from cod-liver oil, from mother liquors of aselline. An alkaline, oily, thick liquid; diuretic and diaphoretic. See *Ptomaïnes* (table).

Mor'rhuol. Alcoholic extract from oleum morrhuæ, used in phthisis, scrofula, etc., and containing iodine, bromine, and phosphorus, and prescribed instead of cod-liver oil, especially when the latter disagrees with the stomach.

Mors. Death. **M., appar'ent**, apparent death; asphyxia. **M. ni'gra**, black death-plague. **M. pu'tativa**, apparent death; asphyxia. **M. repenti'na**, sudden death.

Mor'sal (*mordeo, morsum*, to bite). Relating to the biting or grinding edge of a tooth.

Morsellus, mor-sel'lus (dim. of **Morsus**, a bite) or **Mor'sulus.** Tablet or lozenge.

Mor'sus (*mordeo, morsum*, to bite). Gnawing sensation about the upper orifice of the stomach. **M. diab'oli**, scabiosa succisa; fimbriæ of oviduct; see *Tube, Fallopian.* **M. Galli'næ**, alsine media. **M. stom'achi**, cardialgia. **M. ventric'uli**, cardialgia.

Mort. Adeps.

Morta, mor'tah. Pemphigus.

Mor'tal (*mors*, death). *Lethal.* That which is subject to death or that which causes death—as, man is mortal, a disease is mortal. Of old it was the custom to have a division of mortal or deadly wounds, which gave rise to many errors in medico-legal investigations, as the mortality—*Lethalitas, Letalitas, Lethality*—of wounds depends upon various circumstances. Results of modern treatment render such a division untenable.

Mortality, mor-tal'it-e. This word, taken in an extended sense, expresses the condition of all organized bodies of being subject to the cessation of life. In the sense in which it is most frequently employed it signifies the death-rate—the proportional number of individuals who, in a certain population, die in a given time. If we assume the population of the earth to be one thousand millions (and it is considerably more than this), and a generation to last thirty-three years, in that space of time the one thousand millions must all die, and, consequently, the number of deaths will be, by approximation—

Each year	30,000,000
Each day	82,191
Each hour	3,424
Each minute	57
Each second	1 nearly.

If, on the other hand, as has been supposed, the number of deaths is to that of births as ten to twelve, there will be born—

Each year	36,000,000
Each day	98,657
Each hour	4,110
Each minute	68
Each second	1⅛

It would not be proper to regard the value of life in different countries, or in different periods in the same country, to be indicated by the average mortality, inasmuch as in one case a greater mortality may occur amongst children, and in another amongst adults. **M., bills of**, *Bills of necrology, Mortuary registers;* tables instituted for the purpose of exhibiting the number of deaths, etc. in a given time. In England they were formerly made out by the parish clerks, and the information was conveyed to them by two old women who were appointed in each parish, and were called *Searchers*, their duty being to see that the deceased had died a natural death.

Mor'tar. Vessel for reducing to powder different solid substances, and for making certain mixtures. Usually made of iron, marble, glass, wedgwood-ware, etc.

Mortariolum, mor-tar-e'o-lum (dim. of **Mortarium**, mortar; or cavity resembling a mortar). Alveolus.

Mortarium, mor-ta're-um. Mortar. The trunk.

Mortifer, mor'te-fer (*mors*, death, *fero*, to carry). Producing death; lethiferous.

Mortificatio, mor-te-fe-kah'she-o (*mors*, death, *fio*, to become). Mortification. **M. pulmo'num**, gangrene of the lungs; necropneumonia.

Mortification, mor-te-fe-ka'shun. *Sphacelation;* loss of vitality in a part of the body. The incipient stage of mortification, when the case is still recoverable, is called *Gangrene;* when totally dead, *Sphacelus.* Mortification of a bone is called necrosis. **M., cold**, sphacelus. **M., er'got**, ergotism. **M., hot**, gangrene. **M., mil'dew**, ergotism. **M. root**, Althæa officinalis.

Mor'tified. Dead, as a part affected with gangrene.

Mortisec'tion. Post-mortem examination.

Mor'ton, plane of. Plane extending through principal points of parietal and occipital eminences.

Morton's painful affection of the foot (from Dr. Thomas G. Morton of Philadelphia, who first described it). A painful affection of the plantar digital nerves, directly caused by pressure upon or pinching of them by certain portions of the metatarso-phalangeal articulations, especially the fourth. **M.'s solu'tion**, potass. iodidi, gr. xxx; iodini, gr. x; glycerini, f ℥j; for injection in treatment of spina bifida. **M.'s toe**, Morton's painful affection of the foot.

Mor'tooth. Cupri sulphas.

Mortuary, mor'tu-a-re (*mortuus*, dead). Relating to the dead. See *Morgue.* **M. reg'isters**, mortality, bills of.

Mor'tuus (*mors*, death). Dead.

Morula, mor'u-lah (*morus*, mulberry). Button scurvy. Period of development of ovum after segmentation; mulberry mass or segmentation spheres. The cells are called blastomeres.

Mo'rum (*moron*). See *Morus nigra.* Condyloma; nævus. **M. pal'pebræ inter'næ**, trachoma caruncu-losum.

Mo'rus al'ba. White mulberry tree of China; diuretic, laxative, antiperiodic, anthelmintic. **M. In'dica**, leaves are galoctagogue. **M. ni'gra**, *Mulberry tree*, ord. Urticaceæ; fruit of the mulberry tree, *Morum sycaminum;* pleasant, sweet, subacid, and abounds with a deep violet-colored juice, *Mori succus* (Ph. Br.). The bark of the root has been regarded as an anthelmintic. **M. ru'bra**, *Red mulberry, Wild mulberry;* indigenous; the root has been used to destroy tænia. **M. tincto'ria**, Maclura tinctoria.

Mor'van's disease. Disease characterized by ulceration and necrosis of the fingers, with progressive anæsthesia, especially of the extremities; analgesic paresis of the extremities.

Morve. Equinia.

Mos. Habit. **M. mor'bi benig'nus** or **malig'nus**, benign or malignant character of a disease.

Mosa'ic. Having shape of a pattern or design, as seen in cross-section of muscular fibres, M. of muscle-compartments, and M. of muscle-prisms.

Moschardina (mos-kar-de'nah) or **Moscer'da** (*moschos*, musk). Lozenge for the mouth, composed of musk, ambergris, and other aromatics. Catechu.

Moschatine, mos'kah-teen. Bitter principle obtained from Achillea moschata. $C_{21}H_{27}NO_7$.

Moschelæon, mos-kel-e'on (*moschos*, musk, *elaion*, oil). Compound aromatic oil containing musk.

Moschus, mosk'us. See *Musk.* **M. A'rabum,**

Hibiscus abelmoschus. **M., factit'ious,** musk, artificial. **M. tinc'ture,** 10 per cent. in strength. Dose, ʒjss.

Moscolæa, mos-ko-le'ah. Moschelæon.

Moslich, mos'lik. Maslach.

Mosqui'ta. See *Mosquito.*

Mosquito, mos-ke'to (S. dim. of *mosca,* fly). *Musquito, Culex mosquito.* Very troublesome insect in warm, moist situations. Pain and itching from the bites are alleviated by washing them with hartshorn. The idea has been entertained that disease may be conveyed by it. *Mosquita* is a name given by the Portuguese to small red pimples on the skin resembling mosquito-bites.

Moss, Carrageen'. Irish moss. **M., Ceylon',** Fucus amylaceus. **M., Chinese',** agar-agar. **M., club,** lycopodium. **M., Cor'sican,** helminthochorton. **M. cup,** Lichen pyxidatus. **M., ed'ible,** Fucus amylaceus. **M., hair'cap,** Polytrichum juniperinum. **M., Ice'land,** Lichen Islandicus; see *Muscus.* **M., Irish,** Chondrus crispus. **M., Jaff'na,** Fucus amylaceus. **M., pearl,** Chondrus crispus. **M., pec'toral,** see *Muscus.* **M., stone,** lichen of Arctic regions of N. America, used as food. **M., wall, com'mon yel'low,** Parmelia parietina.

Mossberry, moss-ber're. Vaccinium oxycoccos.

Motamen, mo-tam'en (*moveo, motum,* to move). Motion.

Mota'rion. Charpie.

Motatio, mo-tah'she-o. Motion.

Mo'te. Carbasus linteum. **M., mul'lein,** Verbascum blattaria.

Moth freck'le. Chloasma. **M. patch,** chloasma.

Mother, muth'er. Parent of female sex. Hysteria. Phlegm. Residue in a solution. **M. cell,** parent cell. **M. liq'uor,** M. water. **M. of vin'egar,** mycoderma aceti; possesses the power to convert a solution containing sugar into vinegar. **M. water,** fluid remaining after evaporation of solutions containing salts and after removing crystals.

Moth'er's marks. Nævus; pigmentosus; angeioma. **M. spots,** nævus.

Motherwort, muth'er-wurt. Leonurus cardiaca, matricaria.

Motile, mo'til. Motory.

Motility, mo-til'it-e (*moveo, motum,* to move). Faculty of moving; moving power; contractility.

Motion, mo'shun. Movement; act of changing place. The various motions may be divided into—first, the *voluntary,* or those that are executed under the influence of the brain; secondly, the *involuntary,* which may be subdivided into—first, those of the *reflex* kind, as the closure of the larynx on the contact of acrid vapors; of the pharynx on that of the food; a function of the spinal marrow, *reflex spinal act;* and, secondly, those that are executed under the organic and other nerves of involuntary function. It is probable, too, that every living tissue is capable of moving responsive to its appropriate irritant. See *Irritability.* The movements seen whenever very fine particles are disseminated in a liquid and all dust sufficiently divided, and which have been considered phenomena of osmosis, have been called *Brownian movements,* after Dr. Robert Brown, the celebrated phytologist. **M., cil'iary,** see *Cilia.* **M., involuntary,** see *Automatic.* **M. point,** point at which a motor nerve enters a muscle; in applying electricity the electrode is placed over this point. **M. root,** nerve-root serving only to excite motion. **M., vi'bratory,** see *Ciliary.* **M., vol'untary,** motion entirely under control of the will.

Motive, mo'tiv. Motory.

Mo'tor (pl. **Moto'res**). Exciting or inducing motion in a part or organ. Motory. **M. a'rea,** convolutions about upper part of fissure of Rolando. **M. cel'lule,** cell, motor. **M. cen'tre,** M. area. **M. exter'nus,** motor oculi externus. **M. lin'guæ,** hypoglossal nerve. **M. ner'vous cen'tres,** see *Motorium commune* and *Centre.* **M. oc'uli,** motores oculorum. **M. oc'uli exter'nus,** sixth pair of nerves, arises from the furrow which separates the pons Varolii from the medulla oblongata. It enters the cavernous sinus, anastomoses on the outside of the carotid artery with two filaments furnished by the superior cervical ganglion, enters the orbit by the sphenoidal fissure, and is lost on the rectus externus oculi. This pair is also called *Abducentes.* **M. oculo'rum,** *Common oculomuscular nerves, Third pair of nerves, Par tertium,* arises from a depression at the inner side of the peduncles of the brain, between the tuber annulare and corpora mammillaria; it enters the outer part of the cavernous sinus and passes into the orbitar cavity. Behind the sphenoidal fissure it divides into two branches, the one superior and the other inferior. The former is lost on the rectus superior oculi and the levator palpebræ superioris; the latter—the larger of the two—divides into three branches, which pass to the rectus internus, rectus inferior, and lesser oblique. The last furnishes a filament which passes to the ophthalmic ganglion. **M. points,** point of entrance of a motor nerve into a muscle. Over this point the application of an electrode produces contraction. **M. root,** spinal root of a nerve producing motion only.

Motorial, mo-to're-al. Motory. **M. end-plates,** termination of minute filaments of nerves in small disks or plates; see *End-plates.*

Motorium commune, mo-to're-um kom-mu'ne. *Motor nervous centre.* Hemispherical and other ganglia whence the motor influence sets out.

Moto'rius. Motor. **M. lin'guæ,** hypoglossal nerve. **M. oc'uli commu'nis,** motor oculorum.

Motorpathy, mo'tor-path-e (*motor, pathos,* affection). Kinesipathy; medical gymnastics.

Motory, mo'to-re. *Motive, Motor, Motorial, Motile, Kinetic* or *Cinetic.* That which moves or causes or possesses movement, as motor nerves, in contradistinction to sensory nerves.

Mo'tos. Lint, charpie, tent.

Motosis, mo-to'sis. Application of lint to a wound.

Motricity, mo-tris'it-e. The power of exciting or conveying motor impulses.

Motrix, mo'triks (*moveo, motum,* to move). Motory.

Mo'tum. Lint, charpie.

Mo'tus (*moveo, motum,* to move). Motion. **M. assimilatio'nis,** plastic force. **M. automat'icus,** see *Automatic.* **M. compresso'rius,** peristole. **M. cor'dis diastal'ticus,** diastole. **M. hæmorrhoida'lis,** hæmorrhois. **M. intestina'lis** or **intestino'rum,** borborygmus. **M. involunta'rius,** see *Autocinesis.* **M. peristal'ticus,** peristole. **M. testudin'eus,** peristole. **M. vermicula'ris,** peristole. **M. voluntar'ius,** autocinesis.

Mould (*modulus,* dim. of *modus,* a measure, or standard of measure). Fontanelle. Fungus.

Mould'ed ni'trate of sil'ver. Argentum nitricum fusum.

Moulting, molt'ing (*muto,* to change). Desquamation.

Mound'ing. Condition observed in latter stages of ataxia, in which the fibres of a muscle rise into a mass when firmly struck.

Mountain (moun'tan) **ash.** Sorbus acuparia. **M. ash, Amer'ican,** Sorbus Americana. **M. balm,** Eriodictyon Californicum. **M. bu'gle,** Ajuga pyramidalis. **M. cure,** kinesipathy; cure of disease by residence in high altitudes. **M. dam'son,** see *Damson.* **M. fe'ver,** fever, mountain. **M. flax,** Linum catharticum or Polygala senega. **M. grape,** Berberis aquifolium. **M. lau'rel,** Kalmia latifolia. **M. mach'ineel,** Rhus metopium. **M. mint,** see *Pycnanthemum.* **M. pine,** see *Pine.* **M. ser'vice,** Sorbus acuparia. **M. sick'ness,** puna; marca. **M. su'mach,** Rhus copallina. **M. tea,** Gaultheria procumbens. **M. tobac'co,** Arnica montana.

Mount'ing fluids. Solutions employed in mounting microscopical specimens, as iodine, gum dammar, glycerine, etc.

Mouse ear. Alsine media, Hieracium pilosella. **M., joint,** floating cartilage in joints. **M. sight,** myopia.

Moussenine, moos'en-een. Alkaloid from bark of Albrizzia anthelmintica.

Moustache. Mystax.

Mouth. This word sometimes signifies the cavity situate between the jaws, and containing the tongue, etc.; at others, the outer orifice of that cavity, *Peristomium*, *Vestibulum oris*. The mouth, in the first acceptation, *Cavitas* or *Cavum* or *Spatium oris*, is the cavity bounded above by the palatine arch; below, by the tongue; before, by the lips; and behind, by the velum palati and pharynx. The sides of the mouth and the organs it contains are lined by a mucous membrane. The anterior aperture of the mouth is sometimes called facial; the posterior, pharyngeal. In the mouth are the teeth, gums, alveolar margins, tongue, the excretory ducts of the salivary glands, and those of a number of mucous follicles, etc. In this cavity the food, is cut, torn, or bruised by the teeth, is impregnated with saliva, and formed into a mass or bolus, which is then subjected to the act of deglutition. The mouth contains the organs of taste, and serves in respiration, articulation, expectoration, suction, etc. The condition of the mouth requires to be attended to in semeiology. The state of the mucous membrane, like that of the tongue, indicates the condition of the membrane of the alimentary canal generally. Mouth, *Os*, is also applied to the open extremity of vessels or other canals. **M., prim'itive,** blastopore. **M. root,** coptis. **M. sore,** aphthæ.

Mouth-wa'tering. See *Salivation.*

Mov'able kid'ney. Floating kidney. **M. liv'er,** mobile condition of the liver occasionally existing, and depending on exceptional length of the ligaments of that organ.

Move'ment (*moveo, motum*, to move). Dejection; motion. **M., amœ'boid,** see *Amœba.* **M., Brown'ian,** see *Motion.* **M., cil'iary,** see *Cilia.* **M. cure,** kinesipathy. **M., vermic'ular,** peristalsis. **M., vi'bratile,** M., ciliary.

Mow'er's mite. Leptothrix autumnalis.

Moxa, mok'sah. *Moxiburium.* Word by which the Chinese and Japanese designate a cottony substance which they prepare by beating the dried leaves of the Artemisia moxa, a kind of mugwort used as a cautery. In Europe and this country the same kind of cautery is usually practised with a cylinder of cotton-wool or with one formed from the pith of the greater sunflower. This mode of cauterization is employed as a powerful counter-irritant. The term moxa has been extended to any substance which by gradual combustion on or near the skin is employed as a counter-irritant, as the electric or galvanic moxa or cautery, in which voltaic electricity is employed as the cauterizing agent.

Mox'a-bearer. Porte-moxa; instrument for applying the moxa.

Moxiburium, moks-e-bu're-um (*moxa, buro*, for *uro*, to burn). Moxa.

Moxibustion, moks-e-bus'tchun. Mode of cauterization by means of the moxa.

Moxocausis, moks-o-kaw'sis (*moxa, kausis*, burning). Moxibustion.

Moxosphyra, moks-o-sfe'rah (*moxa, sphura*, hammer). Counter-irritation by means of a hammer heated in boiling water and placed on the skin.

Mucago, mu-kah'go (*mucus*). Mucilage. Mucus.

Muccinium, muk-sin'e-um (*mucus*). Mucilage.

Mucedin, mu'se-din. Constituent of wheat gluten, soluble in alcohol.

Mucedo, mu-sa'do. Mucilage; mucus.

Mucic acid, mu'sik as'id. Acid obtained when sugar of milk, gum, mucilage, etc. are subjected to the action of nitric acid; white crystalline powder.

Mucific, mu-sif'ik (*mucus, facio*, to make). Producing mucus; blennogenous.

Muciflux'us. Blennorrhagia.

Muciform, mu'se-form (*mucus, forma*, form). Resembling mucus in character or appearance.

Mucigen, mu'se-jen (*mucus, gennao*, to form). Mucus-forming substance. Substance existing in mucous membranes and some glands, which is changed into mucin.

Mucilage, mu'sil-aje (*mucus*). Mixture of gum and a small quantity of matter analogous to mucus, which is found in abundance in linseed, quinceseed, etc.; obtained by heating in water the parts or products of plants which contain it; much used in the preparation of emollient cataplasms and the greater part of the demulcent *tisanes.* See *Liquor sanguinis.* **M., an'imal,** mucus. **M. of bar'ley,** mucilago hordei. **M. of gum aca'cia** or **of gum ara'bic,** mucilago acaciæ. **M. of quince-seeds,** decoctum cydoniæ. **M. of rice,** see *Oryza.* **M. of salep',** mucilago salep. **M. of sas'safras pith,** infusum sassafras medullæ. **M. of slip'pery elm bark,** infusum ulmi. **M., starch,** mucilago amyli. **M. of tra'gacanth,** mucilago astragali tragacanthi.

Mucilaginous, mu-sil-aj'in-us. Gummy; resembling gum; possessing the character of mucilage. **M. glands,** Haversian glands.

Mucilago, mu-se-lah'go. Mucilage; mucilago acaciæ; synovia. **M. aca'ciæ** (Ph. U. S. and Br.). In 48 fluidounces of this preparation—a solution of gum arabic in water—there are 19 ounces and 130 grains of the gum; *Mucilage of acacia, M. of gum arabic* or *gum acacia* (acaciæ, ℥iv; aquæ, q. s. to make f ℥ix). Demulcent; to allay cough, but chiefly to suspend insoluble matters in water. **M. am'yli,** *Starch mucilage* (amyli, ℥ij; aquæ destill., f ℥x; Ph. Br.). Demulcent; generally given *per anum.* **M. articulo'rum** or **junctura'rum,** synovia. **M. astrag'ali tragacan'thæ,** M. tragacanthæ (Ph. U. S.), *Mucilage of tragacanth* (gr. cxc; glycerin, f ℥j; aquæ, q. s. to make ℥vij). Used for pharmaceutical purposes. **M. cre'tica,** misturæ cretæ. **M. cydo'nii** (Ph. U. S.) (cydon., gr. xxxvj; aquæ destillat., f ℥iv). Used as an external application in conjunctivitis, and as a medium for injections in gonorrhœa. **M. gum'mi Arab'ici,** M. acaciæ. **M. hor'dei,** *Mucilage of barley* (hordei, ℥ss; aquæ, f ℥xvj). Vehicle for substances given in enemata. **M. sas'safras,** see *Infusum sassafras.* **H. sas'safras medul'læ,** mucilage of sassafras pith (sassafras pith, gr. xxxvj; water, f ℥iv). Used as application in conjunctivitis, and as a drink in fevers and inflammation of mucous membranes. **M. sem'inis cydo'nii ma'li,** decoctum cydonii. **M. tragacan'thæ** (Ph. U. S. and Br.), M. astragali tragacanthæ. **M. ul'mi,** mucilage of elm (elm, gr. cviij; boiling water, f ℥iv). Demulcent and nutritious drink; soothing application externally in erysipelas, boils, etc.; infusum ulmi.

Mucin, mu'sin. Albuminoid substance characteristic of mucus; occurring also in saliva, synovia, etc.

Mucinoid, mu'sin-oid. Resembling mucin. **M. glob'ulin,** proteid existing in lymph-cells.

Mucinous, mu'sin-us. Containing or relating to mucin. **M. cysts,** mucous cysts. **M. exuda'tions,** exudations from mucous inflammation, as characteristic as fibrinous exudations are of inflammation of fibrous structures.

Mucinuria, mu-sin-u're-ah. Condition in which urine contains mucin.

Muciparous, mu-sip'ar-us (*mucus, pario*, to bring forth). Mucus-producing, as muciparous glands or follicles.

Mucitis, mu-se'tis. Inflammation of a mucous membrane.

Mucocarneous, mu-ko-kar'ne-us (*mucus, caro, carnis*, flesh). See *Myxosarcoma.*

Mucocele, mu-ko-se'le (Eng. mu'ko-seel) (*mucus, kele*, rupture). Enlargement or protrusion of the mucous membrane of the lacrymal passages, giving occasion to fistula lacrymalis, the secretion becoming thick and muco-purulent in character; *Blennorrhœa of the sac.* Also dropsy of the lacrymal sac.

Mucoderm, mu'ko-durm (*mucus, derma*, skin). Cordium.

Muco-enteritis, mu'ko-en-ter-e'tis. Inflammation of the mucous membrane of the intestines.

Mucoid, mu'koid (*mucus, eidos*, resemblance). Resembling mucus. **M. degenera'tion,** mucoid softening. **M.** or **Mu'cous soft'ening,** *Mucoid* or *Mucous degeneration;* gradual liquefaction of a part, as of cartilage, by the conversion of its albuminous matters into mucin. It has sometimes, but inaccurate-

ly, been described as *colloid softening*. **M. tu'mor,** myxoma.

Muconic acid, mu-kon'ik as'id. Acid obtained from mucic acid.

Mucopurulent, mu-ko-pur'u-lent (*mucus, pus*). Having the character or appearance of mucus and pus. *Muco-pus.*

Muco-pus, mu'ko-pus. See *Mucopurulent.*

Mucor, mu'kor. Corruption of the humors. Mucus. Genus of mucorinous moulds. **M. corym'bifer,** species occurring on bread made of wheat when kept at temperature of the body, and also observed in the auditory meatus. Pathogenic to rabbits when injected subcutaneously. **M. mu'ado,** see *Rubeola.* **M. muce'do,** see *Fungus.* **M. na'rium,** nasal mucus. **M. phycom'yces,** grease-mould. **M. racemo'sus,** mould occurring on beer-yeast. **M. vulga'ris,** mucor mucedo.

Mucosa (mu-ko'sah) **membra'na.** See *Membrane, mucous.*

Mucosin, mu'ko-sin. Albuminous matter from mucus, having same composition as keratine. See *Mucus.*

Mucositas, mu-kos'it-as. Mucosity; mucus.

Mucosity, mu-kos'it-e. Fluid resembling mucus, or containing a certain quantity of it.

Mucoso-saccharine, mu-ko'so-sak'ar-een. Sugar which cannot be crystallized.

Mucous, mu'kus. Epithet for all bodies containing mucilage or mucus. Also sometimes used synonymously with gummy. In pathology it is occasionally employed to express the seat of a disease, as *Mucous disease, Mucous phlegmasia;* that is, having its seat in the mucous membrane. **M. can'cer,** colloid cancer has been described under this name. **M. cor'puscles,** see *Mucus.* **M. cysts,** *Mucinous cysts;* cystic tumors formed by the closure of the orifice of a mucous gland and the retention of its contents. **M. degenera'tion,** mucoid softening. **M. disease,** morbid condition characterized by the secretion of abnormal mucus on mucous surfaces, which then becomes aggregated into shreds, tubular casts, etc. **M. fe'ver,** disease mentioned by the older writers, but which has since been regarded as abortive typhus. **M. fol'licles,** follicles or small glands situated in mucous membranes; they secrete mucus. **M. layer,** germinal disk. **M. lig'ament,** ligamentum mucosum. **M. mem'branes,** see *Membranes.* **M. pap'ules,** see *Condyloma* and *Papules.* **M. patches,** see *Condyloma.* **M. râle,** râle muqueux. **M. soft'ening,** mucoid softening. **M. tis'sue,** gelatinous connective tissue; occurs in the umbilical cord and in the vitreous humor of the eye. **M. tu'bercle,** see *Condyloma.* **M. tu'mor,** myxoma. **M. web,** corpus mucosum.

Mucro, mu'kro. Sharp point; sword; the point of a sword; apex. **M. cor'dis,** apex or point of the heart. **M. hu'meri,** acromion. **M. ster'ni,** body of sternum; see *Sternum.*

Mucronata cartilago, mu-kro-nat'ah kar-til-ah'go (*mucro*). Xiphoid cartilage.

Mucronatum (mu-kro-nat'um) **os.** Xiphoid cartilage.

Mucroniform, mu-kron'e-form. Resembling a sharp-pointed sword in shape.

Muculent, mu-ku'lent (*mucus*). Slimy, viscid.

Mucuna, mu-ku'nah. See *Dolichos pruriens.* **M. pru'riens,** Dolichos pruriens. **M. pruri'ta,** see *Dolichos pruriens.* **M. u'rens,** cowhage; possesses same virtues as Mucuna pruriens.

Mucus, mu'kus. *Animal mucus, Animal mucilage.* Substance analogous to vegetable mucilage, from which, however, it differs by affording subcarbonate of ammonia on distillation. Mucus exudes through the skin in a state of combination with a peculiar oily matter, and, drying, forms the epidermis. It constitutes, in part, the different epidermeous productions, as the hair, nails, wool, and horn of animals, feathers of birds, and scales of fish. It is found at the surface of the mucous membranes, and presents some difference in its composition and properties according to the particular mucous membrane from which it is obtained. Its chief organic constituent is an albuminoid compound—*mucin, mucosin*—which, in inflammation of mucous membranes, gives to the discharge its tenacious character. Mucus preserves the membranes moist, and in a state best fitted for the performance of their functions. The French give the term *glaire* to the thick, stringy mucus secreted by the mucous membranes when in a state of disease. Mucus examined with the microscope is found to contain numerous epithelial scales or flattened cells, together with round, granular bodies, commonly termed mucous corpuscles or mucous globules, which are contained in a fluid portion—*liquor muci.*

Mucus articulo'rum. Synovia. **M. carpho'des,** see *Carphodes.* **M. cathar'ticus,** Lichen Islandicus. **M. Malpigh'ii,** corpus mucosum. **M. na'rium,** nasal mucus.

Mud fe'ver. Term employed in veterinary practice for a disease generally known as the scratches.

Mudar. *Madar. Calotropis mudarii, Vegetable mercury.* Ord. Asclepiadaceæ. In the Hindoo practice of physic the bark of the root, as well as the concrete juice of the plant, enters into various compound formulæ for the cure of elephantiasis and other disorders. Its properties are like those of ipecacuanha. Bark has been employed in paralysis, epilepsy, worms, etc. Milky juice has been used in leprosy, herpes, dropsy, etc. Active principle, *mudarin,* has been separated. Mixed with oil, it is used for gout in Malabar.

Mu'darin. See *Mudar.*

Mug'get. Asperulo odorata.

Mug'wort. Artemisia vulgaris.

Mulæ, mu'le. Old name for chilbains.

Mulatto, mu-lat'to (*mulus,* a mule) (S. *mulata*). Individual of the human species engendered of a white and black race. The following table exhibits the proportion of white blood in the various castes—arising from the hybridous admixture of white and black—according to the principles sanctioned by usage:

Parents.	*Offspring.*	*Degree of Mixture.*
Negro and White	Mulatto	1–2 White, 1–2 Black.
White and Mulatto	Terceron	3–4 " 1–4 "
Negro and Mulatto	Griffo, Griff or Zambo, or Black Terceron	1–4 " 3–4 "
White and Terceron	Quarteron or Quadroon	7–8 " 1–8 "
Negro and Terceron	Black Quarteron or Quadroon	1–8 " 7–8 "
White and Quarteron	Quinteron	15–16 " 1–16 "
Negro and Black Quarteron	Black Quinteron	1–16 " 15–16 "

The last two were considered to be respectively white and black, in the British West India Islands; and the former, prior to modern changes, were white by law, and consequently free.

Terceron is now scarcely used, and Quarteron or *Quadroon* takes its place. See *Halfcaste.* The Octoroon is the old Quadroon. In other words, at the present day a Quadroon is the offspring of a White and Mulatto; an Octoroon, of the White and Quadroon. See also *Halfcaste.* **M. jack,** fever, yellow.

Mulberry (mul'ber-re) **bod'y** or **mass.** See *Morula* and *Muriform.* **M. cal'culus,** see *Calculi, urinary,* and *Mural.* **M., dyer's,** Merinda tinctoria. **M. juice,** mori succus. **M. rash,** see *Typhus.* **M., red,** Morus rubra. **M. tree,** Morus nigra. **M., white,** Morus alba. **M., wild,** Morus rubra.

Mulgedium acuminatum, mul-jed'e-um ak-u-min-at'um (*mulgeo, mulsum,* to milk), *Blue lettuce,* and **M. Florida'num,** *Lactuca Floridana, False lettuce.* Indigenous plants, ord. Compositæ; have the reputation of curing the bites of rattlesnakes.

Mulieb'ria (*mulier,* woman). Menses; vulva.

Muliebris, mu-le-eb'ris. Relating to a woman.

Muliebrity, mu-le-eb'rit-e. State of puberty in the female.

Muliebrositas, mu-le-e-bros'it-as (*muliebris,* appertaining to woman). Fondness for women. Hence *Muliebrosus, Mulierarius,* and *Mulierosus,* one who is fond of women.

Muliebrosus, mu-le-e-bro'sus. See *Muliebrositas.*

Mulier, mul'le-er. Woman. **M. med'ica,** see *Iatrine.* **M. obstet'rix,** midwife. **M. plena,** a pregnant woman.

Mulierarius, mu-le-er-ar'e-us. See *Muliebrositas.*

Mulier'itas. *Muliebrity, Womanhood.* State of puberty in the female.

Mulierosus, mu-le-er-o'sus. See *Muliebrositas.*

Mull. Thin muslin employed in surgery for dressings.

Mulled wine (*mollio,* to make milder). See *Wine.*

Mullein (mul'len), **black.** Verbascum nigrum. **M., broad-leaved, great,** Verbascum nigrum. **M., yellow,** Verbascum nigrum.

Muller, mul'ler (*molaris,* a millstone, *mola,* a mill). Moulder. Stone held in the hand, with which any powder is ground upon a horizontal slab. Sometimes called *Mullet.*

Mül'ler, an'nular mus'cle of. See *Annular muscle.* **M., canal' of,** see *Canal of Müller.* **M., duct of,** see *Duct of Müller.* **M., fi'bres of,** fibres of connective tissue extending between limiting membranes of retina. **M.'s fluid,** potass. bichrom., gm. 45; sodii sulphas., gm. 20; aquæ, 2 litres; used for hardening specimens of tissue. **M.'s mus'cle,** smooth muscular fibres in orbital membrane. **M.'s opera'tion,** laparotomy and removal of tumor of uterus which contains a dead fœtus. **M.'s ring,** cicatricial condition of internal os uteri, due to laceration of cervix.

Mulligrubs, mul'le-grubs. Tormina; colic.

Mul'lin. Melizomum.

Mulls's opera'tion. Consists in removal of contents of eyeball and in the introduction of a glass globe as a substitute for the vitreous humor.

Mulomedicina, mu-lo-med-e-se'nah (*mulus,* mule, *medicina*). Veterinary art.

Mulomed'icus. One who attends to diseases of domestic animals.

Mul'sa ac'ida (*mulsus,* mixed with honey). Oxymel.

Mul'sum. Hydromeli. **M. vino'sum,** œnomel.

Multangular, mult-an'gu-lar. Having many angles.

Multangulum (os) **ma'jus,** mult-an'gu-lum mah'jus. Trapezium bone. **M.** (os) **mi'nus,** trapezoid bone.

Multarticulate, mult-art-ik'u-late. Having many articulations.

Multicuspidate, mult-e-kus'pid-ate (*multus,* many, *cuspis,* point). Having several cusps, as the molar teeth.

Multifidus spinæ, mult-if'id-us spe'ne (*multus,* many, *findo,* to divide). Transversalis dorsi.

Multifœtation, mult-e-fe-ta'shun (*multus,* many, *fœtus*). Pregnancy with more than two fœtuses.

Multigrav'ida (*multus, gravidus,* pregnant). One who has been pregnant many times.

Multilobate, mult-e-lo'bate (*multus, lobos,* lobe). Separated into many lobes.

Multilob'ular. Multilobate.

Multilocular, mult-e-lok'u-lar (*multus,* many, *loculus,* small place or cell). Having many cells or small cavities.

Multimammæ, mult-e-mam'me (*multus,* many, *mamma,* breast). Variety of hypergenesis in which there are supernumerary mammæ.

Multinervulate, mult-e-nurv'u-late. Provided with many nerves (applied to the placenta).

Multinodate, mult-e-no'date. Having many nodes.

Multinucleate, mult-e-nu'kle-ate (*multus, nucleus,* kernel). Having several nuclei, as a cell.

Multinucleolate, mult-e-nu-kle'o-late. Cell with many nucleoli.

Multip'ara. Multiparous.

Multiparient, mult-e-par'e-ent. Multiparous.

Multiparity, mult-e-par'it-e. Condition of being multiparous.

Multiparous, mult-ip'ar-us (*multus,* many, *pario,* to bring forth). One that brings forth several young at the same time. Such a birth is called *plural.* Also one who has had many children, *pluripara.* See *Pregnancy, multiple.*

Multiple neuritis, mul'te-p'l nu-re'tis. Neuritis involving several nerves or nerve-trunks simultaneously. **M. preg'nancy,** pregnant condition in which the uterus contains more than one child.

Multiplicator (mult'e-ple-ka-tor) or **Multiplier,** mult'e-pli-er. Instrument intended to determine the strength of an electric current.

Multip'olar (*multus, polus,* pole). See *Neurine.*

Multiseptate, mult-e-sep'tate. Multilocular.

Multitestis, mult-e-tes'tis (*multus, testis,* testicle). One who has several testicles.

Multitudo, mult-e-tu'do (*multus,* many). Plethora.

Multivorantia, mult-e-vo-ran'she-ah (*multus, voro,* to devour)). Voraciousness.

Multivorous, mult-iv'o-rus. Voracious.

Multocular, mult-ok'u-lar. Provided with several eyes.

Mulungù. Inner bark of Erythrina coralloden-dron, native of Brazil; has sedative properties.

Mumia, mu'me-ah. Mummy. **M. medul'læ,** marrow of bones. **M. de medul'lis,** marrow. **M. transmari'na,** manna.

Mumisatio, mum-e-sah'she-o. Mummification.

Mummification, mum-me-fik-a'shun (*mummy, fio,* to be made). Mode of preparing a mummy. See *Gangrene, dry.* **M. of fœ'tus,** see *Fœtus.*

Mummy, mum'me (Arab. *moumya, mum,* wax). Dead body simply dried, or dried after having been embalmed; the latter acceptation is the most common. See *Skeleton.*

Mumps. Cynanche parotidæa. **M. of the lac'rymal glands,** inflammation of the lacrymal gland unaccompanied by suppuration.

Munchat'oe. Mystax.

Munctio, munk'she-o (*mungo, munctum,* to blow the nose). Act of blowing the nose.

Mundia spinosa, mund'e-ah spin-o'sah (*mundus,* clean, neat, from its appearance). Plant, ord. Polygaleæ, growing in Southern Africa, a decoction of whose branches is used in atrophy, phthisis, etc.

Mundificantia, mun-dif-ik-an'she-ah (*mundus,* clean, *facio,* to make). Detergents.

Mundificativa, mun-dif-ik-at-e'vah. Detergents.

Mungos lignum, mun'gos lig'num. Root of Strychnos colubrina. **M. ra'dix,** Ophiorrhiza mungos.

Mun'grel. Hybrid. See *Mongrel.*

Munimentum castitatis, mu-ne-men'tum kas-te-tah'tis (muniment of chastity). Hymen.

Munjeet, mun-jeet'. Rubia cordifolia.

Muntingia (munt-in'je-ah) **Calabara or M. gla'bra.** Calabar tree; possesses mucilaginous properties; fruit can be eaten, and flowers are reputed to be antispasmodic.

Mur. Murr. See *Coryza.*

Mu'res articula'res. *Joint-mice.* Loose bodies growing in joints.

Murexan, mur-eks'an. Substance produced by decomposition of murexide.

Murexide, mur-eks'id. Acid purpurate of ammonium, derived from guano. **M. test,** test for uric acid. Some of the deposit is placed in a watch-glass, nitric acid is added and evaporated to dryness. When cold, a little ammonia or caustic potash is added, and a rich purple color is produced.

Mur'fies. Ephelides, papulæ.

Muria, mu're-ah (*halmuris,* salt water). Brine; formerly used as a clyster in dysentery, in certain inveterate neuralgiæ, etc. Sodium chloride.

Murias, mu're-as. Muriate. **M. ammo'niæ,** ammonium chloride. **M. auricona'tricum,** see *Gold.* **M. fer'ri ad min'imum,** ferrous chloride. **M. hydrar'gyri,** mercury bichloride. **M. hydrargyro'sus mi'tis,** mercury chloride. **M. so'dicus,** sodium chloride. **M. stib'ii,** antimony chloride.

Muriate, mu're-at. Salt of muriatic acid.

Muriated, mu're-a-ted. Combined with chlorine.

Muriatic, mu-re-at'ik. Hydrochloric. **M. acid,** *Hydrochloric acid, Chlorohydric acid, Acidum hydrochloricum* (Ph. U. S.), *A. muriaticum purum, Spirit of salt;* aqueous solution of chlorohydric acid gas of s. g. 1.16. Odor of muriatic acid is suffocating, taste very acid and caustic. Nearly colorless when pure, but commonly of a pale yellow; volatile, the fumes visible. Muriatic acid is possessed of tonic and antiseptic properties; used in typhus, cutaneous eruptions, in gargles for inflammatory and putrid sore throats (gtt. xxx to f℥vj of water), etc. When added to a pediluvium it renders it stimulating. *Acidum hydrochloricum dilutum* (Ph. U. S.), *Dilute hydrochloric* or *chlorohydric acid,* contains 5½ fluidounces of muriatic acid to 14 fluidounces of distilled water. Its sp. g. is 1.038. **M. e'ther,** ethyl chloride.

Muriat'icus. Muriatic.

Muriatiferous, mu-re-at-if'er-us. Containing or producing chlorine.

Muriat'ous. Hydrochloric acid (old name).

Muricia (mu-ris'e-ah) **Cochinchinen'sis.** Plant, genus Momordica, native of China and Cochin China; leaves and fruit possess aperient properties.

Muride, mu'rid. Bromine.

Muriform, mu're-form. Mulberry-shaped, as muriform mass or body, collection of vitelline globes proceeding from the segmentation of the vitellus.

Murigene, mu're-jeen (*muria, gennao,* to generate). Chlorine.

Murina, mu'rin-ah (*muria*). Bromine.

Murioxic (mur-e-oks'ik) **ac'id.** Chlorine.

Mur'mur. (Word existing both in the Romanic and Teutonic languages, and probably a variety of onomatopœia, *mur mur* expressing the kind of sound which the word indicates.) Low continued or continuously repeated sound, as that of flame or a stream running over a stony bottom. **M., abdom'inal,** borborygmus. **M., accident'al,** murmur, hæmic. **M., amphor'ic,** see *Cavernous respiration.* **M., anæ'mic,** hæmic murmur due to anæmia. **M., aneuris'mal,** murmur, systolic in character, heard over an aneurism. **M., aor'tic,** murmur occurring with the systole or diastole, or occurring between these two sounds, elicited over the aortic valves. **M., aor'tic, obstruc'tive,** organic murmur heard with and after the systole, having its greatest intensity at base of the heart, and generally transmitted into the carotids. **M., aor'tic, regur'gitant,** organic murmur heard with second sound of the heart, most distinct at base of the heart and transmitted toward the apex. **M., aor'tic, systol'ic,** murmur with and after first sound of heart, with maximum intensity at the base of the heart. **M., arte'rial,** *Hæmic murmur, Blood sound,* sound heard when the ear is applied over a blood-vessel. It varies in disease, becoming, for instance, more musical in oligæmia. **M., auric'ular, systol'ic,** murmur, presystolic in time, due to stenosis of mitral or tricuspid orifice. **M. aur'ium,** tinnitus aurium. **M., bel'lows,** bruit de souffle. **M., blood,** murmur, hæmic. **M., car'diac,** normal or abnormal sound heard in auscultation of the heart. The following table gives a view of the significance of murmurs of valvular origin (Finlayson):

Tabular View of Cardiac Murmurs of Valvular Origin.

Rhythm of murmur.	The various causes of a murmur having such a rhythm.	Diagnosis from rhythm area combined.
Before first sound or auricular-systolic.	Obstruction at the right or left auriculo-ventricular orifice.	If in mitral area = obstruction at mitral orifice. If in tricuspid area = obstruction at tricuspid orifice (very rare).
After first sound or ventricular-systolic.	Obstruction at the orifice of the aorta or the orifice of the pulmonary artery. Regurgitation through mitral orifice or through tricuspid orifice.	If in aortic area = obstruction at aortic orifice. If in pulmonic area = obstruction at orifice of pulmonary artery (very rare). If in mitral area = mitral regurgitation. If in tricuspid area = tricuspid regurgitation.
After second sound or ventricular-diastolic.	Regurgitation through aortal semilunar valves or through semilunar valves of pulmonary artery.	If in aortic area = aortic regurgitation. If in pulmonic area = regurgitation through valves of pulmonary artery (very rare).
After second sound and running up to first.	Obstruction at auriculo-ventricular orifices in an extreme form; or, if complex, a combination of obstruction at one or other auriculo-ventricular orifice, and regurgitation through the aortic or pulmonic valves.	If in mitral area = obstruction of mitral orifice. If in tricuspid area = obstruction at tricuspid orifice. If the two elements of the murmur have separate areas—*e. g.* mitral and aortic—this indicates mitral obstruction combined with aortic regurgitation.

M., diastol'ic, M. occurring directly after the systole, due to mitral stenosis. **M., diastol'ic, aor'tic,** murmur, diastolic in time, heard over aortic area, due to insufficiency of aortic valves. **M., direct',** murmur caused by obstruction to flow of blood-current. **M., Duroz'iez's double,** double arterial murmur occurring in insufficiency of the aorta and when compensation still exists. **M., endocar'dial,** murmur having its seat within the cardiac ventricles. **M., func'tional,** murmur due to changes in the blood. **M., fu'nic,** bellows sound, funic. **M., gas'tric,** borborygmus. **M., hæmic,** murmur, arterial. **M., inorgan'ic,** murmur, functional. **M., interso'nal,** murmur heard between systole and diastole. **M., intes'tinal,** borborygmus. **M. intestina'le** or **intestino'rum** or **ven'tris,** borborygmus. **M., intracar'diac, organ'ic,** murmur, organic. **M., jug'ular,** venous hum heard over jugular veins. **M., mi'tral,** murmur heard over mitral valve, systolic, diastolic, or presystolic in time. **M., mi'tral, regur'gitant,** murmur occurring with the systole, due to insufficiency of mitral valve, thus allowing blood to regurgitate into the left auricle. **M., organ'ic, endocar'dial,** M. due to current of blood pursuing a normal or abnormal course. **M., pu'erile,** see *Puerile.* **M., pul'monary, regur'gitant,** murmur of rare occurrence, due to insufficiency of pulmonary valves, occurring with second sound of heart. **M., regur'gitant,** murmur caused by regurgitation of blood into the cardiac ventricle. **M., res'piratory,** noise heard during inspiration and expiration, especially the former; produced by the passage of air through the bronchial tubes and into the air-cells. Also called *murmur of the expansion of the lungs,* and, when distinctly vesicular, *Respiration of the cells* or *Vesicular respiration.* Vesicular respiration is of course absent when the cells of the lungs have been obliterated from any cause. We may then have the *Respiration nulle, Absence du bruit respiratoire, Silence,* and *Respiration silencieuse* of the French writers. At times it is rude during inspiration or expiration, or both—the *Respiration rude* or *R. râpeuse* of the French. At others there is a blowing sound, as if some one were blowing into the auscultator's ear through a tube. This is heard in the healthy state over the larynx, trachea, *tracheal murmur,* and about the bifurcation of the bronchia, *bronchial murmur;* but when it proceeds from the lungs it denotes disease. It may be tubular or diffused. In the former the whiffing murmurs appear to occur in a space limited to the immediate neighborhood of the part examined. In the latter, they are produced with but moderate intensity, and sometimes at a distance from the ear,

over a tolerably extended space. The respiration perceived over the trachea and bronchia in health is called tracheal or bronchial or tubal, according to the situation in which it is heard. **M., tricus'pid, direct'**, occurs before first sound of heart and immediately after second sound, and is due to stenosis of tricuspid orifice. **M., tricus'pid, regur'gitant**, occurs with first sound of heart, and is due to insufficiency of tricuspid valves, thus allowing the blood to regurgitate into the right auricle. **M., u'terine**, *bruit placentaire*. **M., u'tero-placen'tal**, *bruit placentaire*. **M., ve'nous**, venous murmur. **M., vesic'ular**, murmur, respiratory. **M., whiff'ing**, see *Murmur, respiratory*.

Murr (*mori*, to die). *Murrain, Ovine variola, Tagsore, Rot, Pestilential fever*. Epizootic, perhaps contagious, disease, resembling small-pox, affecting cattle, especially sheep, and said to have been transferred to man. Modification of the disease by inoculation of animals with it has been called *Clavelization*.

Murrain, mur'ran. Murr; coryza.

Murraya, mur-ra'ah. Genus of trees, ord. Rutaceæ. Native of tropical Asia and Australia. Bark and leaves of **M. exotica** are said to be tonic. **M. Kœnig'ii**, curry-leaf tree, native of East Indies; root possesses stimulant and laxative properties, and is employed to control vomiting in cholera. Leaves are edible.

Murrayine, mur'ra-yeen. Bitter extract of Murraya exotica.

Mur'ren. Murr; coryza.

Murri-murri. Form of influenza in the Hebrides. Supposed to be always brought there by strangers; hence called the *Stranger's cold*.

Mur'ton or **Mur'tum.** Clitoris.

Mus articulo'rum. Floating cartilage in joints.

Musa, mu'sah (after Antonius Musa, physician to Augustus). M. paradisiaca. **M. Cliffortia'na**, M. paradisiaca. **M. mensa'ria**, M. paradisiaca. **M. paradisi'aca**, *Plantain tree*, family Musaceæ, of India and South America. The fruit, eaten for bread, consists of a mealy substance, plantain meal, conquin tay. It is clammy, has a sweetish taste, and will dissolve in the mouth without being chewed. Being smooth and soft, it is employed as a dressing for blisters. Water from the soft trunk is astringent, and used in diarrhœa. **M. sapien'tum**, *Banana tree*. The fruit, *Banana*, is shorter, straighter, and rounder, the pulp softer and more luscious. Both varieties are natives of Guinea.

Musada. Strychnos nux vomica.

Musam'bra. Impure aloes.

Musana, mu-sah'nah. See *Mesennah*.

Musanga, mu-san'gah. *Cecropioides*. Genus Ulmaceæ. Species found in Africa; leaves are reputed to possess emmenagogue properties.

Musca Hispanica (mus'kah his-pan'ik-ah) or **Hispanio'la** (Spanish fly). Cantharis. **M. vesicato'ria**, cantharis vesicatoria.

Muscadine, mus-kad-een'. Muscatel.

Muscæ, entohyaloid, mus'se, en-to-hi'al-oid. See *Metamorphopsia*. **M. volitan'tes**, see *Metamorphopsia*.

Mus'cardine. Fungous disease of silkworms.

Musca'ria. See *Amanita muscaria*.

Muscarine, mus-kar'een. $C_5H_{15}NO_3$. Ptomaïne from poisonous mushroom, Agaricus muscarius and haddock. See *Ptomaïnes* (table).

Muscatel' or **Muscadel'**. Wine made from Muscat grapes, growing in France.

Muscerda, mus-ser'dah. Moschardina. Also dung of mice (*mus*, mouse, *merda*, dung); formerly given in epilepsy.

Muscle, mus'l (*muo*, to close, to contract, etc., a function proper to muscles). *Brawn*. Muscles have been divided into those of animal life or of the life of relation—voluntary muscles—which execute movements under the influence of the will, as the muscles of the limbs, head, trunk, etc.; and into those of organic life—involuntary muscles—which contract under the influence of certain special stimuli, as the heart, fleshy fibres of the stomach, etc. Mixed muscles are those which belong partly to each of these divisions, as the muscles of respiration and the sphincters. Muscles acting in opposition to each other are called antagonists; thus, every extensor has a flexor for an antagonist, and conversely. See *Antagonism*. Muscles that concur in the same action are termed congenerous.

The muscles present numerous varieties in form, size, situation, use, etc., and have been divided by some into long, broad, and short. Each of these divisions comprises simple and compound muscles. Simple or rectilinear muscles have all their fibres in a similar direction, and only one body, as the sartorius, pronator quadratus, etc. Compound muscles have only one belly and several tendons, as the flexors of the fingers and toes; or several bellies and several tendons, as the biceps flexor cubiti, etc. To the compound muscles belong also the radiated muscles. Their fibres set out from a common centre, and are arranged like radii of a circle; as the diaphragm, iliacus, etc. Pennatid or penniform muscles have their fibres arranged in two rows, united at a median line, at greater or less angles, nearly as feathers are inserted into a quill; the palmaris longus is one of these. Semipenniform muscles have their fibres oblique, but are inserted only on one side of the tendon. Hollow muscles are the heart, intestines, urinary bladder, etc. The enumeration of muscles varies, some authors reckon them at upward of 400. The greater part of them are in pairs. Very few are azygous.

Muscles have been variously named: 1. According to their uses, as diaphragm, buccinator, extensors, flexors, adductors, abductors, levators, depressors, etc. 2. According to their position, as interspinales, interossei, etc. 3. According to their shape, as trapezius, splenius, etc. 4. According to their dimensions, as pectoralis major, rectus capitis anticus major, pectoralis minor, glutæus maximus, medius, and minimus. 5. According to their direction, as obliquus abdominis, transversalis abdominis, rectus femoris, rectus abdominis, etc. 6. According to their composition, as semimembranosus, semitendinosus, complexus, etc. 7. According to their attachments or the different points of the skeleton with which they are connected by means of tendons or aponeuroses, as sternocleidomastoideus, sternohyoideus, etc.

The end of the muscle adhering to the most fixed part is usually called *origin* or *head*, and that adhering to the more movable part the *insertion* or *tail*; the intervening part or body of the muscle being called the *venter*, *gaster*, or *belly*. Hence the names gastrocnemii, digastrius, biceps, and triceps, according as they have two bellies, two or three heads, etc.

The following table, founded on the arrangement of Dr. Barclay, gives a comprehensive view of the actions of the various muscles of the human body:

TABLE OF THE MUSCLES ARRANGED ACCORDING TO THEIR ACTIONS.

THE HEAD IS MOVED

Forward by

Platysma myoides,
Sternomastoideus,
Rectus anticus major,
" " minor.

Assisted (when the lower jaw is fixed) by

Mylohyoideus,
Geniohyoideus,
Geniohyoglossus,
Digastrici.

Backward by

Part of trapezius,
Splenius capitis,
Complexus,
Trachelomastoideus,
Rectus posticus major,
" " minor,
Obliquus capitis superior.

To either side by

Platysma myoides,
Sternomastoideus,
Part of trapezius,
Splenius capitis,
" colli,
Trachelomastoideus,
Complexus.

THE NECK IS MOVED

Forward by

Platysma myoides,
Sternomastoideus,
Digastricus,
Mylohyoideus,
Geniohyoideus,
Geniohyoglossus,
Omohyoidei,
Sternohyoidei,
Thyrohyoidei,
Rectus anticus minor,
Longus colli.

Backward by

Part of trapezius,
Rhomboideus minor,
Serratus posticus superior,
Splenius capitis,
" colli,
Complexus,
Trachelomastoideus,
Transversalis colli,
Interspinales colli,
Semispinales colli,
Rectus posticus major,
" " minor,
Obliquus capitis superior,
" " inferior,
Scaleni postici,
Levator scapulæ.

Laterally by

Various combinations of those muscles which separately move it forward and backward, assisted by the scaleni, intertransversales, and recti laterales.

THE TRUNK IS MOVED

Forward by

Rectus abdominis,
Pyramidalis,
Obliquus externus abdominis,
Obliquus internus,
Psoas magnus,
" parvus,

Assisted (when the arms are carried forward) by

Pectoralis major,
" minor,
Serratus magnus.

Backward by

Trapezius,
Rhomboideus major,
Latissimus dorsi,
Serratus posticus superior,
" " inferior,
Sacrolumbalis,
Longissimus dorsi,
Spinales dorsi,
Semispinales dorsi,
Multifidus spinæ,
Intertransversales dorsi et lumborum.

Laterally by

Obliquus externus,
" internus,
Quadratus lumborum,
Longissimus dorsi,
Sacrolumbalis,
Serratus postici,
Latissimus dorsi.

THE SCAPULA IS MOVED

Upward by

Trapezius,
Levator scapulæ,
Rhomboidei.

Downward by

Lower part of trapezius,
Latissimus dorsi,
Pectoralis minor.

Forward by

Pectoralis minor,
Serratus magnus.

Backward by

Part of trapezius,
Rhomboidei,
Latissimus dorsi.

THE HUMERUS IS MOVED

Forward by

Part of deltoid,
Part of pectoralis major,

Assisted in some circumstances by

Biceps,
Coracobrachialis.

Backward by

Part of deltoid,
Teres major,
" minor,
Long head of triceps,
Latissimus dorsi.

Inward by

Part of pectoralis major,
Latissimus dorsi.

Rotated inward by

Subscapularis,

Assisted occasionally by

Pectoralis major,
Latissimus and teres major.

Outward by

Supraspinatus,
Infraspinatus,
Teres minor.

THE FOREARM IS MOVED

Forward by

Biceps,
Brachialis anticus,
Pronator teres,

Assisted by

Flexor carpi radialis,
" sublimis,
" ulnaris,
Supinator longus.

Backward by

Triceps,
Anconeus.

Rotated inward by

Pronator teres,
Flexor carpi radialis,
Palmaris longus,
Flexor sublimis,
Pronator quadratus.

Outward by

Biceps,
Supinator brevis,
Extensor secundi internodii.

THE CARPUS IS MOVED

Forward by

Flexor carpi radialis,
Palmaris longus,
Flexor sublimis,
" carpi ulnaris,
" profundus,
" longus pollicis.

Backward by

Extensor carpi radialis longior,
Extensor carpi radialis brevior,
Extensor secundi internodii,
Indicator,
Extensor communis digitorum,
Extensor proprius pollicis.

Outward by

Flexor carpi radialis,
Extensor carpi radialis longior,
Extensor carpi radialis brevior,
Extensor ossis metacarpi,
" carpi internodii.

Inward by

Flexor sublimis,
" carpi ulnaris,
" profundus,
Extensor communis digitorum,
" minimi digiti,
" carpi ulnaris.

THE THUMB IS MOVED

Inward and forward across the palms by

Opponens pollicis,
Flexor brevis,
" longus.

Outward and backward by

Extensor ossis metacarpi pollicis,
Extensor primi internodii,
" secundi internodii.

Upward and forward, away from the other fingers, by

Abductor,

Assisted by part of the

Flexor brevis.

Backward and inward to the other fingers by

Adductor,
Extensor primi internodii,
" secundi internodii.

THE FINGERS ARE MOVED

Forward or flexed by

Flexor sublimis,
" profundus,
Lumbricales,
Interossei,
Flexor brevis digiti minimi,
Abductor digiti minimi.

Backward or extended by

Extensor communis,
" minimi digiti,
Indicator.

Outward to radial border by

Abductor indicis,
" digiti minimi,
Interossei.

Inward by

Abductor digiti minimi,
Interossei.

THE THIGH IS MOVED

Forward by	*Backward by*	*Inward by*	*Outward by*
Psoas magnus, Iliacus, Tensor vaginæ femoris, Pectineus, Adductor longus, " brevis.	Gluteus maximus, Part of gluteus medius, Pyriformis, Obturator internus, Part of adductor magnus, Long head of biceps, Semitendinosus, Semimembranosus.	Psoas magnus, Iliacus, Pectineus, Gracilis, Adductor longus, " brevis, " magnus, Obturator externus, Quadratus femoris.	Tensor vaginæ femoris, Gluteus maximus, " medius, " minimus, Pyriformis.

Muscles are formed—1. Essentially of muscular or fleshy fibre (see *Muscular fibre*). 2. Of areolar tissue, which unites the fibres. This areolar tissue is not very visible between the fine and loose fibres, but becomes more so when they unite in more considerable fasciculi. It forms, moreover, to each muscle an external envelope, formerly called *Tunica propria musculorum*, which unites it to the neighboring parts, and admits of its motion. 3. Of arteries. These proceed from neighboring trunks, and are generally very large. Their size and number are always in proportion to the bulk of the muscle. With the exception of some viscera, as the lungs and the kidneys, there are few organs that receive as much blood as the muscles. 4. Of veins. They follow the same course in the muscles as the arteries. 5. Of lymphatics. 6. Of nerves. These are numerous and of different sizes. They almost all proceed from the encephalon; some, however, issue from ganglions, and accompany the arteries. After they have entered the muscle they divide and subdivide until they are lost sight of.

When muscles are subjected to heavy pressure at about 32° F., a fluid, *Muscle-juice*, is obtained, to which the name *Muscle-plasma* has been given. It coagulates spontaneously and separates into serum and clot; the latter, called *Myosin*, corresponding with the clot formed by coagulating blood.

The constituents of muscle may be tabulated as follows:

Water	745
Solids:	
Myosin and insoluble proteids	155
Soluble proteids	20
Gelatin	21
Fats	23
Organic and inorganic salts	36
	1000

Muscle contains various extractive matters, as creatin, creatinin, hypoxanthin or sarkin, xanthin, inosic acid, inosite or muscle-sugar, fatty matters, all embraced in the above summary. **M. beat'ing**, method of massaging muscles with an instrument called a muscle-beater. **M. clot**, see *Muscle*. **M. cor'puscle**, muscle-nucleus. **M. of Gavard'**, oblique muscular fibres of the stomach. **M. of Guth'rie**, compressor urethræ. **M. of Horner**, tensor tarsi. **M. of Hous'ton**, compressor venæ dorsalis penis. **M. jerk**, see *Reflex*. **M. juice**, *Muscular juice*. Fluid surrounding the fibres of striated muscle and the fibre-cells of smooth muscles, which differs from the liquor sanguinis of the blood; containing a considerable amount of casein. It seems to be produced within the sarcolemma, through which it exudes; see *Muscle*. **M., Merkel's**, ceratocricoid. **M. plas'ma**, see *Muscle*. **M. plate**, segment of embryonic mesoderm from which the voluntary muscles of the body are developed. **M. prism**, muscle-rods, prismatic in shape, situate in a muscle compartment. **M. read'ing**, *Body-reading*. Power of detecting, through physical contact, very

slight and delicate muscular tensions and relaxations resulting from unconscious action of mind or body. **M. rod**, muscle-fibre situate between two intermediate disks. **M. se'rum**, see *Muscle*. **M. sug'ar**, inosite. **M. tu'mor**, myoma. **M. of Wil'son**, compressor urethræ.

Muscular, mus'ku-lar. Belonging or relating to muscles; well furnished with muscles. **M. ar'teries**, arteries distributed to the muscles. *Muscular arteries of the eye* are two branches sent off by the ophthalmic artery to the rectus inferior oculi, lacrymal sac, etc., and to the rectus superior oculi and levator palpebræ superioris. **M. contrac'tion**, exertion of the power possessed by muscles of shortening themselves or of contracting to produce motion; muscular motion being the change in the situation and relation of organs induced by muscular contraction. When a muscle contracts, its fibres assume more the zigzag direction, and the extremities approximate, but the bulk of the whole muscle is not augmented. This contraction takes place, at times, with extreme velocity; a single thrill in the letter R can be pronounced in the 1-30,000th part of a minute. The force of contraction, *Myodynamis*, depends upon the healthy physical condition of the muscle, combined with due energy of the brain. The duration, in voluntary motion, is for a certain time dependent upon the will—contractions excited involuntarily cannot be so long maintained. **M. cur'rent**, current, according to Matteucci, existing in every living muscle whose tendinous extremities are not equally disposed—one, for example, forming a cord; the other broad and ribbon-like—and which circulates in the muscle from the tendinous extremity to the muscular surface. **M. dys'trophy**, myopathic atrophy. **M. fascic'uli**, muscular fibres distributed in bundles. **M. fi'bre**, *fleshy fibres*. Name given to filaments which, by their union, form the muscles. This fibre is flat, soft, downy, linear, but little elastic, and more or less red; firmer in adults than in the young or the aged; of the same size in the great and small muscles; and runs its course without bifurcation or ramification; but slightly resisting in the dead body, tearing readily; during life it supports very great efforts without laceration. It is itself composed of a considerable number of fibrils, similar to each other, and subdividing almost *ad infinitum*, and enclosed in a delicate sheath—the *Sarcolemma*. The ultimate filaments into which the fibre can be decomposed by mechanical means seem to be hollow or tubular. See *Sarcous elements*. Fibre exists under two forms, *striated* or *striped*, and *non-striated, smooth*, or *unstriped;* muscles composed of the former ministering, as a general rule, to the animal functions; the latter always, perhaps, to the organic. The color of the muscular fibres is red in man and white in several animals. A greater or less number of fibres united in fasciculi, *Fasciculi* or *Lacerti musculorum*, approximated to each other, and forming a distinct mass, of very variable size and shape, the extremities being attached to bones by means of tendons, constitutes a muscle. In this are included areolar membrane, vessels, and nerves; see *Muscle*. **M. juice**, see *Muscle*. **M. mo'tion**, movement dependent on action of muscles. **M. nerves**, nerves distributed to the muscles are so named. **M. rheu'matism**, myalgia. **M. sense**, *Sense of muscular activity*. Consciousness of muscular exertion or activity which accompanies and directs muscular movements; sense by which certain properties, as weight and position of bodies and muscular exertion, are estimated; see *Anæsthesia*. **M. sub'stance**, see *Fibrin*. **M. sys'tem**, term given to the aggregate of the muscles of the body. **M. veins**, these bring back the blood which has been carried to the muscles by the muscular arteries.

Muscularis, mus-ku-lar'is. Corroborant; muscular layer. **M. muco'sæ**, layer of organic muscular fibres which can be traced from one end of the intestinal canal to the other, and from which processes are given off in different directions; they are separated by the submucous tissue from the muscular coat proper. **M. proces'sus**, prominence situate at side of the arytenoid cartilage, which serves as attachment for muscles.

Muscularity, mus-ku-lar'it-e. Muscular contractility, as of the arteries, etc.

Musculation, mus-ku-la'shun. Exertion of muscular action. See *Locomotion*. **M., irresist'ible**, chorea.

Musculi (pl. of **Musculus**, muscle) **accessorii ad sacrolumbalem**, mus'ku-le ak-ses-so're-e ad sak-rolum-bal'em. See *Sacrolumbalis*. **M. amato'rii**, oblique muscles of the eye. **M. bicauda'ti**, muscles with tendon dividing them into two portions with separate insertions. **M. bicip'ites**, muscles arising from two separate points. **M. gemel'li su'ræ**, gastrocnemii. **M. gem'ini**, gemelli. **M. incisi'vi**, accessores orbicularis oris. **M. papilla'res**, papillary muscles; columnæ carneæ. **M. pectina'ti**, pectinated muscles; muscular bands extending from parietes of auricles of the heart. **M. polycauda'ti**, muscles with a tendon dividing into several portions with separate insertions. **M. polycip'ites**, muscles with several heads. **M. prostat'ici supe'rior et infe'rior**, fibres of the ischio-urethralis running transversely above and below the urethra in front of the prostate, to which they were formerly believed to be attached. **M. pterygoï'dei**, pterygoid muscles. **M. pubo-vesica'les**, pubo-vesical muscles. **M. rec'ti labio'rum**, compressor labii. **M. triangula'res**, scaleni muscles.

Musculin, mus'ku-lin. See *Fibrin*.

Musculinteger, mus-kul-in'te-jur. Term applied to union of two or several separate muscles regarded as one.

Musculocutaneous (mus-ku-lo-ku-ta'ne-us) or **Musculocuta'neus** (*musculus cutis*, skin). Appertaining to muscles and skin. **M. nerve**, name especially given to two nerves—the one, *External cutaneous nerve*, furnished by the brachial plexus (see *Cutaneous nerves*), the other given off from the poplitæus externus. It descends on the anterior and outer part of the leg—at first hid among the muscles; becomes superficial about the middle of the leg, and divides into two branches which pass superficially on the back of the foot. Two musculocutaneous nerves—superior and inferior—proceed from the first lumbar, the *superior musculocutaneous—ilioscrotal, iliohypogastricus*—which divides into two branches, abdominal and scrotal. The *inferior musculocutaneous* is smaller than the superior, and is distributed as its name, *ilioinguinal*, indicates. **M. perone'i**, musculocutaneous nerve of leg.

Musculo-elastic, mus'ku-lo-e-las'tik. Relating to muscular and elastic tissue.

Musculo-intestinal, mus'ku-lo-in-tes'tin-al. See *Myenteric*.

Musculomembranous, mus'ku-lo-mem'bran-us. Having the character of muscle and membrane.

Musculophrenic, mus'ku-lo-fren'ik (*musculus, phren*, diaphragm). Belonging to the muscular portion of the diaphragm. Supplying muscles and diaphragm, as the musculophrenic artery.

Musculorhachidæus, mus-ku-lo-rhak-id-e'us. Belonging or relating to muscles and to the spine. Name given to branches furnished behind by the intercostal, lumbar, and sacral arteries, which are distributed to the spine and to the muscles of the neighborhood.

Musculosa, mus-ku-lo'sah. Muscularis. **M. expansio** (muscular expansion), platysma myoides.

Musculospinal, mus-ku-lo-spi'nal. Appertaining to muscles and spine.

Musculospiral (mus-ku-lo-spi'ral) **groove** (*musculus, spira*, spire). Groove situated posteriorly on femur, for the passage of musculospiral nerve and superior profunda artery. **M. nerve**, radial nerve.

Musculosus, mus-ku-lo'sus. Muscular.

Musculotegumentary, mus'ku-lo-teg-u-ment'a-re. Including integument and muscles.

Musculous, mus'ku-lus. Containing muscular fibres.

Musculus, mus'ku-lus. Muscle. **M. accli'vis**, obliquus internus abdominis. **M. admira'tor**, rectus superior oculi. **M. anom'alus**, muscular fasciculus,

attached only to the superior maxillary bone with which the levator labii superioris alæque nasi muscle is related. **M. anom'alus men'ti**, fasciculus from lower maxillary bone near levator labii inferioris, passing outward to be again inserted on the bone. **M. anom'alus transver'sus**, rare muscular mass extending transversely across the orbit in the region of the equator oculi. **M. anon'ymus clavic'ulæ**, muscular slip from sternal to acromial extremity of the clavicle. **M. ap'icis na'si**, levator nasi proprius. **M. aponeurot'icus**, tensor fasciæ latæ. **M. aryvoca'lis**, part of internal thyro-arytenoid muscle to the vocal cord. **M. auxilia'rius**, pyramidalis abdominis. **M. bibitor'ius**, rectus internus oculi. **M. Brueckian'us**, see *Ciliary muscle.* **M. bursa'lis** or **M. bursa'rius**, obturator internus. **M. cani'nus**, levator anguli oris. **M. Casser'ii**, laxator tympani minor. **M. cate'næ**, tibialis anticus. **M. cilia'ris**, ciliary muscle. **M. cilia'ris Riola'ni**, ciliary muscle. **M. cilia'ris, supe'rior** and **infe'rior**, palpebral part of orbicularis palpebrarum. **M. cochlea'ris**, ligamentum spirale. **M. constricto'rius**, sphincter. **M. coracoi'deus**, coracobrachialis. **M. cra'nii cuta'neus**, occipitofrontalis. **M. cuta'neus**, platysma myoides. **M. cuta'neus ma'nûs**, palmaris brevis. **M. Eustach'ii**, laxator tympani. **M. Fallo'pii**, pyramidalis abdominis. **M. fascia'lis**, sartorius. **M. fem'oris membrano'sus**, fascia lata. **M. gracil'limus**, a small occasional muscle of the eye arising near the superior oblique muscle and inserted into the synovial sheath. **M. Hor'neri**, tensor tarsi. **M. hu'milis**, rectus inferior oculi. **M. immer'sus**, subscapularis. **M. im'par pharyn'gis**, azygos pharyngis. **M. incisu'ræ majo'ris auric'ulæ** or **M. incisu'ræ Santori'ni**, intertragicus. **M. in'dicator**, extensor indicis. **M. indignato'rius**, rectus externus. **M. iracun'dus**, rectus externus oculi. **M. la'bii pro'prius**, muscular fibres connecting the skin and mucous membrane around the orifice of the mouth. **M. lacryma'lis poste'rior**, Horner's muscle. **M. læti'tiæ**, rectus internus oculi. **M. liv'idus**, pectineus. **M. longis'simi ten'dini**, plantaris. **M. mal'lei exter'nus**, laxator tympani minor. **M. mal'lei inter'nus**, tensor tympani. **M. membrano'sus**, tensor fasciæ latæ. **M. multif'idus**, multifidus spinæ. **M. nasa'lis la'bii superio'ris**, nasolabialis. **M. naut'icus**, tibialis posticus. **M. orbita'lis**, Müller's muscle. **M. os'sis metacar'pi dig'iti quin'ti**, opponens minimi digiti. **M. patien'tiæ**, levator anguli scapulæ. **M. penicilla'tus**, levator labii inferioris. **M. perfora'tus Cas'seri**, coracobrachialis. **M. phren'icus**, diaphragm. **M. polygas'tricus**, muscle with several bellies. **M. prostat'icus**, sphincter urethræ prostaticus. **M. quadra'tus antibra'chii**, pronator quadratus. **M. quadriceps**, muscle having four heads. **M. rhomboi'deus**, musculus anomalus. **M. Riola'ni**, see *Riolan's muscle.* **M. riso'rius Santorini**, platysma myoides. **M. sac'ci lacryma'lis**, tensor tarsi. **M. scandala'rius**, parathenar. **M. singula'ris col'li**, an aberrant intertransversalis longus muscle. **M. singula'ris splen'ii accesso'rius**, adjutor splenii. **M. sterna'lis**, sternalis muscle. **M. subcuta'neus**, platysma myoides. **M. succenturia'tus**, pyramidalis abdominis. **M. succin'gens**, diaphragm. **M. super'bus**, rectus superior oculi. **M. supercil'ii**, corrugator supercilii. **M. supina'tor**, supinator brevis. **M. supraclavicula'ris**, tensor of superficial cervical fascia. **M. su'ræ**, triceps suræ. **M. te'res antibrach'ii**, pronator teres. **M. testicon'dus** or **testis**, cremaster. **M. tri'ceps**, muscle having three heads. **M. tu'bæ no'væ**, circumflexus. **M. u'vulæ**, azygos muscle. **M. voca'lis**, thyro-arytenoid muscle, internal.

Muscus arboreus, mus'kus ar-bo're-us (tree-moss). Lichen plicatus. **M. cani'nus**, Lichen caninus. **M. cathar'ticus**, Lycopodium selago. **M. clava'tus**, lycopodium. **M. corralli'nus**, Corrallina Corsicana. **M. cra'nii huma'ni**, Lichen saxatilis. **M. erec'tus**, Lycopodium selago. **M. helminthocor'tos**, Corallina Corsicana. **M. Islan'dicus**, Lichen Islandicus. **M. mari'nus**, Corallina Corsicana. **M. marit'imus**, corallina. **M. polyt'richus**, Polytrichum commune. **M. pulmona'rius querci'nus**, Lichen pulmonarius. **M. pyxida'tus**, Lichen pyxidatus. **M. pyxoï'des terres'tris**, Lichen pyxidatus. **M. re'pens**, Lycopodium clavatum. **M. squamo'sus**, Lycopodium clavatum. **M. ursi'nus**, Polytrichum commune. **M. villo'sus**, peristroma.

Musena-bark, mu-se'nah-bark. See *Rottlera Schimperi.*

Musen'in. Acid principle from musenna-bark; it resembles saponin.

Musenna, mu-sen'nah. Mesenna.

Museum anatomicum, mu-ze'um an-at-om'ik-um. Anatomical museum.

Mush'room. A form of fungus; some varieties are edible.

Music, mu'zik (*musa*, a song). Art of producing harmonious and cadenced sounds; has been beneficially used in diseases, particularly in those of the mind or on which the mind could act in a salutary manner.

Musical (mu'ze-kal) **sound.** Rhythmical sound heard on auscultation, resembling at times the humming of insects, noise of spinning-wheel, sounds of animals, etc. Such sound is more generally met with in chlorosis.

Music'ian's cramp. See *Cramp, writer's.*

Musicomania (mu-sik-o-man'e-ah) or **Musoma'nia** (*music, mania*). Variety of monomania in which the passion for music is carried to such an extent as to derange the intellectual faculties.

Musk. *Mosch* (Arab.). Peculiar concrete animal substance, of a very diffusible odor and bitter taste, enclosed in the preputial follicles of *Moschus moschiferus, Musk deer;* it is stimulant and antispasmodic. The volatile oil of certain plants having its characteristic odor has sometimes been substituted for musk; distilled oil of Malva moschata and Mimulus moschatus, for example, have been employed in hysterical disorders and certain forms of nervous diseases. **M., Amer'ican**, musk obtained from musk-rat, Fiber zibethicus. **M. plant**, Mimulus moschatus. **M. root**, sumbul. **M. seed**, see *Hibiscus abelmoschus.* **M. tree**, Olearia argophylla. **M. wood**, thymiama.

Muskeg moss. Plant of the N. W. parts of the U. States, used as absorbent substance for dressings.

Musk'grape flow'er. Bulbus vomitorius.

Muskmallow, musk'mal-ow. Hibischus abelmoschus.

Musk'melon. Cucumis melo.

Mus'lin gauze, antisep'tic. See *Gauze* and *Antiseptic.*

Musomania, mu-so-man'e-ah. Musicomania.

Musquash (mus'kwosh) **root.** Cicuta maculata.

Musquito, mus-ke'to. Mosquito.

Mussænda frondosa, mus-een'dah fron-do'sah. Decoction of this Ceylonese plant has been esteemed refrigerant. **M. gla'bra**, species found in East Indies possessing same properties as Mussænda frondosa. **M. luteo'la**, employed in Arabia in snake-bites.

Mus'sel. Mytilus edulis.

Mussel-poi'soning. See *Mytilus.*

Musselled, mus'l'd. See *Mytilus edulis.*

Mussitatio, mus-se-tah'she-o (*mussito*, to murmur). Condition in which the tongue and lips move as in the act of speaking, but without sounds being produced. Unfavorable sign in disease, as indicating great cerebral debility.

Mussita'tion. See *Mussitatio.*

Must. The recent juice pressed from the grape; after fermenting it becomes wine.

Mus'tard, black (*moût*, must, because the seeds were bruised with vinegar or must). See *Sinapis.* **M., clam'my**, Polanisia graveolens. **M., false**, Polanisia graveolens. **M., flour of**, sinapis. **M., green**, Lepidium sativum. **M., hedge**, erysimum. **M., In'dian**, Brassica juncea. **M. leaves**, charta sinapis. **M. mith'ridate**, Thlaspi campestre. **M. oil**, see *Sinapis alba.* **M. pa'per**, charta sinapis. **M. plas'ter**, cataplasma sinapis. **M., stink'ing hedge**, alliaria. **M., trea'cle**, Thlaspi arvense. **M., white**, Sinapis alba. **M., wild**, Sinapis arvensis.

Mustee, mus-te'. One born of parents one of whom is white, the other a mulatto. See *Mestizo*.

Mustelaneus, mus-tel-an'e-us (*mustela*, weasel). One who has two short arms.

Mus'tum (juice of the grape). Wort.

Mutacism, mu'ta-sizm (*mutakizo*, to use the letter *m*, *μν*, too frequently). Vicious pronunciation, consisting chiefly in the frequent repetition of the letters *m*, *b*, and *p*, which are substituted for others.

Mutatio sexus, mu-tah'she-o seks'us. A change or conversion of sex; ancient theory.

Mutation, mu-ta'shun. Change. Term applied in obstetrics to the operation of version.

Mute. Dumb; affected with mutitas.

Muteosis, mu-te-o'sis (*mutus*, dumb). Every phenomenon of expression, voluntary and involuntary, which impresses the sight or touch.

Mutilation, mu-til-a'shun (*mutilus*, broken). *Maiming*. The removal or privation of a limb or of some other external part of the body; in all countries a crime punished with severity.

Mutinum, mu-te'num. Penis.

Mutisia, mu-tis'e-ah. Genus of shrubs, natives of South America. **M. viciæfo'lia**, native of the Andes; seeds are employed medicinally as a heart tonic; herb has tonic and expectorant properties.

Mutism, mu'tizm. Mutitas.

Mutitas, mu'te-tas (*mutus*, dumb). *Dumbness, Speechlessness, Mutism*. Impossibility of articulating sounds, although they can be elicited. Dumbness is often congenital and united with deafness, of which it is an effect. In some cases it is accidental. **M. aton'ica**, atonic dumbness due to neuroses of the glossal nerves. **M. elin'guium**, dumbness due to loss of the tongue. **M. organ'ica**, dumbness due to disease or traumatism of the tongue. **M. surdo'rum**, *Deafdumbness, Deafmutism*, speechlessness from deafness, congenital or produced during infancy. The subjects of this affection are called *deafdumb*. **M. traumat'ica**, dumbness due to traumatism. **M. vul'neris**, mutitas traumatica.

Mu'to. Penis.

Mutoniatus, mu-to-ne-at'us. Having a large penis.

Mutton (mut'n) **tea**. Prepared from a pound of mutton freed from the fat and cut into thin slices, and a pint and a half of boiling soft water poured over them, as in the case of beef tea, except that it requires to be boiled for half an hour after the maceration before it is strained through a sieve. *Mutton broth* contains a somewhat larger proportion of mutton. *Essence of mutton* is made by a process similar to that for essence of beef.

Mutunnus, mu-tun'nus. Priapus.

Mu'tus. Mute.

Myacantha, me-ak-an'thah. Ruscus.

Myalgia, me-al'je-ah (*myon*, *algos*, pain). Muscular pain; cramp.

Myasis, me-as'is. Presence of worms in the cavities of the nose.

Myasthenia, me-as-then-e'ah (*myon*, *astheneia*, debility). Muscular debility.

Myceliophori, me-sel-e-of'or-e (*mukes*, fungus, *phoreo*, to bear). True fungi.

Mycelium, me-se'le-um (*mukes*, mushroom). Filaments or threads of minute fungi which find a soil on animal bodies. Their contents are cells or granules.

Myces, me'sees. Fungus.

Mycetencanthis, me-set-en-kan'this (*mukes*, *enkanthis*). See *Encanthis fungosa*.

Mycetes, mis-e'tees (pl. of **Myces**). Fungi.

Mycetogen'esis (*mukes*, *genesis*, formation). Formation of fungi.

Mycetography, mi-set-og'raf-e. Mycetology.

Myce'toid. Resembling a fungus in shape.

Mycetology (mi-set-ol'o-je) or **Mycol'ogy** (*mukes*, fungus, *logos*, discourse). Science of fungi.

Mycetoma, me-set-o'mah. *Fungus disease, Podelcoma, Madura foot, Fungus foot, Fungous disease of India*. An affection of the hands and feet prevailing extensively in India and ascribed to the growth of a fungus—*Chionyphe Carteri* (after Dr. H. V. Carter).

Mycetophagous, mi-set-of'ag-us (*mukes*, fungus, *phago*, to eat). Deriving nourishment from fungi.

Mycetozoa, me-set-o-zo'ah (*myces*, *zoon*, animal). Myxomycetes.

Mychmus, mik'mus. A sigh.

Mychthismus, mik-thiz'mus. Moaning; sighing.

Mycocellulose, mi-ko-sel'u-loze. Fungin.

Mycoderma, me-ko-dur'mah (*myces*, *derma*, skin). *Mycoderm*. A cryptogamous growth constituting the crusts of favus. See *Porrigo favosa*. Genus of fungi forming a membranoid surface on fermenting liquors. Also a mucous membrane. See *Membrane*. **M. ace'ti**, mother of vinegar, caused by bacterium aceti. **M. al'bicans**, saccharomyces albicans. **M. cerevis'iæ**, torula cerevisiæ. **M. cyan'eum**, micrococcus cyaneus. **M. pli'cæ**, *Tricomaphyton*, a cryptogamous growth said to be the essence of plica. **M. sac'chari**, **M. vi'ni**, M. of alcholic fermentation.

Mycoder'mis (same etymon). Micro-organisms found in excreta of some cutaneous affections, as favus.

Mycodermitis, me-ko-dur-me'tis (*mycoderma*, *itis*). Mucitis.

Mycodermosphacelus, me-ko-der-mo-sfas'e-lus (*mukes*, fungus, *derma*, skin, *sphacelus*, gangrene). Gangrene of the mucous membrane.

Mycodes, me-ko'dees. Fungoid.

Mycodiarrhœa, me-ko-di-ar-rhe'ah. See *Diarrhœa*.

Mycodysenteria, me-ko-dis-en-ter'e-ah. Mucous dysentery. See *Dysentery*.

Mycodyspnœa, me-ko-dis-ne'ah (*mukos*, mucus, *duspnoia*, difficulty of breathing). Dyspnœa from excessive secretion of mucus.

Mycogastritis, me-ko-gas-tre'tis (*mukos*, mucus, *gaster*, stomach). Inflammation of the mucous membrane lining the stomach.

Mycography, mi-kog'raf-e. Mycetology.

Mycohæmia, me-co-he'me-ah (*mukes*, fungus, *haima*, blood). Diseases due to blood containing microorganisms.

Mycol'ogist. One who is versed in the study of mycetology.

Mycology, mi-kol'o-je. Mycetology.

Mycon'ostoc grega'rium. Micro-organism perhaps identical with cladotrix.

Mycophlyzacium, me-ko-fle-zah'she-um (*mukes*, mucus, *phluzakion*, small blister). Pustule situated on a mucous surface.

Mycophthalmia, me-kof-thal'me-ah (*mukes*, fungus, *ophthalmos*, eye). Fungoid ophthalmia.

Mycophthisis, me-ko-te'sis. See *Bronchorrhœa*.

Mycopneumonypostasis, me-ko-nu-mon-ip-ost'asis. Hypostasis of the lungs due to mucus.

Mycoprotein, me-ko-pro'te-in (*mukes*, fungus, *protein*). Albuminoid substance due to the bacteria of putrefaction.

Mycorthopnœa, me-kor-thop-ne'ah (*mycos*, *orthos*, erect, *pneo*, to breathe). Orthopnœa from excessive secretion of mucus in the air-passages—orthopnœa pituitosa.

Mycos, me'kos. Mucus.

Mycose, mi'koze. Peculiar kind of sugar existing in ergot.

Mycosis, me-ko'sis (*myces*, fungus). Frambœsia. See *Fungus*. **M., acute', of the blood**, septic influence of micro-organisms on that fluid. **M. of the brain**, presence of micrococci in the brain from septic poisoning, as from diphtheria, septicæmia, etc. **M., bron'cho-pul'monary**, bronchorrhœa due to presence of micro-organisms. **M., catalyt'ic**, microbiohæmia. **M. circina'ta**, trichophytosis capitis. **M. endocar'dii**, endocarditis, infectious. **M. favosa**, favus. **M. frambœsioï'des**, dermatitis papillaris capillitii. **M. fungoï'des**, cutaneous disease, thought to be parasitic, characterized by the occurrence of soft red, mammillated tumors which may develop into fungous ulcers. **M. furfura'cea**, pityriasis versicolor. **M. intestina'lis**, diarrhœa attended with symptoms of collapse, supposed to be associated with the presence of a fungus in the alimentary canal. **M. lupino'sa**, favus. **M. microspori'na**, dermatomycosis furfuracea. **M. pulmo'num**, pneumonomycosis. **M. pustulo'sa**, sy-

cosis parasitica. **M. syphiloï'des**, scherlievo. **M., tox'ic**, sapræmic poisoning from ptomaïnes. **M. trichophyti'na**, mycosis due to presence of trichophyton. **M., vagi'nal**, term applied to pruritic irritation of the vagina excited, it is supposed, by an oïdial fungus.

Mycothrix, me'ko-thriks (*mukos, thrix*, hair). Leptothrix.

Mycotic, mi-kot'ik. Relating to mycosis.

Mycot'ics. Agents that contract the pupil. See *Mydriatics.*

Mycter, mik'ter. Nose.

Mycteres, mik-te'rees. Myxæ, nares.

Mycter'ic. Relating to nasal cavities.

Mycterophonia, mik-ter-o-fo'ne-ah (*mycter, phone*, voice). Nasal voice; commonly called "speaking through the nose."

Mycteroxerotes (mik-ter-oks-er'o-tees) or **Mycteroxero'sis** (*mycter, xerotes*, dryness). Dryness of the interior of the nose.

Mycus, me'kus. Mucus.

Mydaleine, mid-al'e-een (*mudaleos*, putrid). Poisonous ptomaïne obtained from putrefying liver and other organs. See *Ptomaïnes* (table). It produces intense dilatation of the pupil, increased temperature, intestinal peristalsis, etc.

Mydatoxine, mid-ah-toks'een. $C_6H_{13}NO_2$. Poisonous ptomaïne from gradually decomposing flesh, especially from internal organs.

Mydesis, mid-a'sis (*mudao*, to be abound with moisture, to be putrid). Moisture. In its most general sense it means corruption. By some it is used for a mucous discharge from inflamed eyelids.

Mydine, me'dine (*mudao*, to be damp or to putrefy). $C_8H_{11}NO$. Non-poisonous ptomaïne obtained from the putrefaction of human viscera and from cultures of Eberth bacillus.

My'don. Fungous or putrid flesh in certain fistulous ulcers. Also flesh putrid from mouldiness.

Mydriasis, mid-re'as-is (*mudriasis*, excessive dilatation of the pupil). Preternatural dilatation of the pupil—coromydriasis; noticed in atrophy of the optic nerve, paralysis of the third nerve, epilepsy, etc. Weakness of sight produced by hydrophthalmia, or superabundance of humors. **M. paralyt'ica**, mydriasis dependent on paralysis of the sphincter pupillæ. **M., spi'nal**, dilatation of the pupil from irritation of the spinal centre for such dilatation.

Mydriatic, mid-re-at'ik. Relating to or causing dilatation of the pupil. Certain narcotics, as opium, contract the pupil, while others, as belladonna, dilate it. Owing to this antagonism, the mydriatic belladonna has been given in poisoning from opium.

Mydriat'ics. Drugs acting upon the iris are either mydriatics, which dilate the pupil, or mycotics, which contract it. The most important of these are such drugs as have a local action on the eye, and they alone are used in ophthalmic medicine (Brunton). They are indicated in the following list by an asterisk (*):

Mydriatics.	*Myotics.*
General anæsthetics—chloroform, ether, etc.	General anæsthetics—chloroform, ether, etc.
*Atropine.	*Calabar bean.
*Belladonna.	Gelsemine internally.
Belladonnine.	Jaborandi.
Benzoyltropine.	Lobeline internally.
*Cocaine.	Morphine internally.
Daturine.	Muscarine internally.
*Duboisine.	" locally.
Gelsemine locally.	Nicotine locally.
*Homatropine (oxytoluylic-acid-tropine).	Opium.
Hyoscyamine.	*Physostigmine (eserine).
Muscarine locally (?).	Pilocarpine.
Narcissine.	Thebaine.
Piturine.	
Scopalein.	
Stramonium.	

Myel, me'el. Spinal cord.

Myelæmia, me-el-e'me-ah. Leucocythæmia of osseous marrow tissue.

Myelalgia, me-el-al'je-ah (*myelo, algos*, pain). Pain in the spinal marrow.

Myelanalosis, me-el-an-al-o'sis (*myelo, analosis*, wasting). Tabes dorsalis.

Myelapoplesia, me-el-ap-o-pla'ze-ah. Spinal apoplexy.

Myelapoplexy, me-el-ap'o-pleks-e. Spinal apoplexy.

Myelatelia, me-el-at-el-e'ah (*myelo, a*, privative, *telos*, end; want of end or finish). Incompleteness of the spinal marrow.

Myelatrophy, me-el-at'ro-fe (*myelo, atrophy*). Tabes dorsalis.

Myelauxis, me-el-awks'is (*muelos*, marrow, *auxe*, increase). Condition in which dilatation or hypertrophy of the spinal cord exists.

Myelencephalon, me-el-en-sef'al-on (*muelos*, marrow, *enkephalos*, brain). Cerebrospinal axis. Also after-brain or metencephalon.

Myeleterosis, me-el-et-er-o'sis (*muelos*, marrow, *heterosis*, alteration). Pathological change in the spinal marrow.

Myelin, me'el-in (*myelo*). Mixture of lecithin with cerebric acid and cholesterin, constituting the fatty substance in nerve-tissue, etc. See *Nerve-fibres.*

Myelinic, me-el-in'ik. Relating to myelin.

Myelitis, me-el-e'tis (*myelo, itis*). Inflammation of the spinal marrow or its membranes, indicated by deep-seated burning pain in the spine, with various nervous and vascular irregularities of function. It was proposed at one time to call inflammation of the membranes of the brain meningitis; that of the substance of the brain, myelitis. **M., bul'bar**, inflammation of the medulla oblongata, with softening, attended with cephalic, respiratory, and gastric disturbance, and perhaps paralysis. **M., compres'sion**, see *M., pressure.* **M., concus'sion**, M. caused by concussion of the cord. **M. convulsi've**, chorea, electric. **M., dissem'inated**, M. occurring at several different foci in the cord. **M. exsudati've**, hydrorachis. **M., fo'cal**, M. limited to a circumscribed space. **M., mult'iple**, M., disseminated. **M. parenchymato'sa**, myelitis. **M. petechia'lis**, meningitis, cerebrospinal. **M., pres'sure**, inflammation of the spinal cord, caused by compression from disease of the vertebræ, or from tumors or other growths. **M. spina'lis**, myelitis. **M., trans'verse**, M. in which the inflammation affects a transverse section of the spinal cord.

Myelo, me'el-o (*muelos*, marrow). In composition, marrow.

Myelocele, me-el-o-se'le (Eng. me'el-o-seel) (*muelos*, marrow, *kele*, tumor). Tumor of the spinal cord.

Myelochysis, me-el-ok'is-is (*myelo, chuo*, to pour out). Hydrorachis.

Myeloccœle, me-el-o-se'le. Canal of spinal cord.

Myelocystic, me-el-o-sist'ik (*muelos*, marrow, *kustis*, cyst). Relating to a cyst connected with the spinal marrow.

Myelocystocele, me-el-o-sist-o-se'le (Eng. mi-el-o-sist'o-seel). Condition in which an excess of liquid exists in central canal of spinal cord.

Myelocytes, mi'el-o-sites (*myelo, kutos*, mass, body, or cell). Granules of the brain. Nuclei of the cells of the gray substance.

Myelodiastasis, me-el-o-de-as'tas-is (*muelos*, marrow, *diastasis*, separation). Disintegration of medulla spinalis.

Myelogangliitis, me-el-o-gan-gle-e'tis (*myelo, ganglion, itis*). Cholera (sporadic).

Myelogenic, mi-el-o-jen'ik (*myelo, gennao*, to generate). Myeloid tumors have been so called from their point of departure.

Myeloid, mi'el-oid (*myelo, eidos*, resemblance). Marrow-like. **M. sarco'ma**, medullary sarcoma. **M. tu'mor**, *Fibroplastic tumor, Myelogenic tumor, T. myelodes.* Sarcomatous tumor, the more characteristic constituents of which are peculiar many-nucleated corpuscles, which have been recognized as constituents of the marrow and diploë of bones, especially in the fœtus and in early life. It is more nearly related, therefore, to cartilaginous than to fibrinous tumors. It was so named by Mr. Paget.

Myeloidin, mi-el-oid'in. Substance derived from the brain.

Myeloma, me-el-o'mah. Medullary tumor. See *Encephaloid.*

Myelomalacia, me-el-o-mal-ah'she-ah (*myelo, malakia,* softness). Softening of the medulla spinalis.

Myelomenia, me-el-o-men'e-ah (*muelos,* marrow, *men,* month). Metastasis of menstrual flux to the spinal cord.

Myelomeningitis, me-el-o-men-in-je'tis (*myelo, meninx,* membrane, *itis*). Meningitis, spinal.

Myelomeningocele, me-el-o-men-in-go-se'le (Eng. mi-el-o-men-in'go-seel). Hernia of the spinal cord and its membranes.

Myelomeninx, me-el-o-men'inks (*muelos,* marrow, *meninx,* membrane). Membrane serving as cover for the medulla spinalis.

Myelomyces, me-el-om'e-sees (*myelo, mukes,* fungus). Myeloma. See *Encephaloid.*

Myelomycetes, me-el-o-me-sa'tees (pl. of **Myelomyces**) (*myelo, mukes,* fungus). Order of fungi.

Myelon, me'el-on. Medulla spinalis.

Myeloparalysis, me-el-o-par-al'is-is (*myelo, paralysis*). Paraplegia.

Myelopathia, me-el-o-path-e'ah (*muelos,* marrow, *pathos,* disease). Disease of the spinal cord. **M. tropica,** beriberi.

Myelophthisis, me-el-o-te'sis. Tabes dorsalis. **M. sic'ca,** tabes mesenterica.

Myelophymata, me-el-o-fe'mah-tah (pl. of **Myelophyma**) (*myelo, phuma,* tumor). Tubercles of the spinal marrow.

My'eloplacques or **Myeloplaxes,** me-el-o-plaks'ees (*myelo,* marrow, *plax,* plate or lamella). *Osteophages, Osteoclasts, Giant* or *Colossal cells.* Large many-nucleated masses of protoplasm, most abundant in the external layers of the medullary masses occupying the bone-cavities.

Myeloplaxoma, me-el-o-plaks-o'mah. Tumor of a part in which osteoclasts are numerous.

Myeloplegia, me-el-o-plej'e-ah. Paralysis due to disease of the spinal cord.

Myelorrhagia, me-el-or-rhaj'e-ah (*myelo, rhegnumi,* to break forth). Apoplexy of the spinal cord.

Mye'los. Marrow.

Myelosarcoma, me-el-o-sark-o'mah. Osteosarcoma.

Myelosclerosis, me-el-o-skler-o'sis. Sclerosis of the spinal cord or of medullary matter of bones.

Myelosis, me-el-o'sis. Growth of medullary tumor.

Myelospasm, mi'el-o-spazm. Spasm of spinal cord.

Myelospongus, me-el-o-spon'gus (*myelo, spongus,* sponge, fungus). See *Encephaloid.*

Myelosyringosis, me-el-o-sir-in-go'sis. Syringomyelia.

Myelozoa, me-el-o-zo'ah. Class of Vertebrata provided with a spinal cord, but without brain.

Myelus, me'el-us. Marrow, medulla spinalis. **M. diauche'nius,** medulla spinalis. **M. dorsi'tes,** medulla spinalis. **M. notiæ'us,** medulla spinalis. **M. psoï'tes,** medulla spinalis.

Myelyperæmia, me-el-ip-ur-e'me-ah. Hyperæmic condition of spinal cord.

Myenergia, me-en-ur'je-ah (*myon, energia*). Muscular strength.

Myentasis, me-en'tas-is (*mus,* muscle, *entasis,* a stretching). Stretching or extension of the muscles.

Myentericus, me-en-ter'ik-us (*myon, enteron,* intestine). Relating to the muscular apparatus of the intestines, as *Plexus myentericus, Musculo-intestinal plexus,* a nervous plexus situate between the circular and longitudinal fibres.

Myginda (mij-ind'ah) **rhaco'ma** and **M. uragoy'a.** Two species of shrubs growing in the West Indies; the roots of both are diuretic.

Myg'mus. Sigh.

Myia, me-e'ah. Musca; fly.

Myiasis, me-e'as-is (*muia,* fly). Disease due to larvæ of flies.

Myiocephalum, me-e-o-sef'al-um (*muia,* fly, *kephale,* head, from its resemblance). Ptosis iridis.

Myiodeopsia, me-e-o-de-op'se-ah (*muiodes,* appertaining to flies, *opsis,* vision). See *Metamorphopsia.*

Myiodopsia, me-e-o-dop'se-ah. Metamorphopsia.

Myistos, me-ist'os (*mus,* muscle, *histos,* tissue). Muscular tissue.

Myitis, me-e'tis (*myo, itis*). Inflammation of a muscle; myositis; rheumatism, acute.

Mykos, me'kos. Mucus.

Mylabris cichorii, mil'ab-ris se-ko're-e. See *Cantharis.* **M. puncta'ta,** see *Cantharis.* **M. pustula'ta,** see *Cantharis.*

Mylacephalus, me-lah-sef'al-us (*mule,* mole, *a,* privative, *kephale,* head). Monster with only traces of viscera, and without head or extremities.

Mylacri, mil'ak-re (*mule,* millstone). Molar teeth.

Mylacris, mil'ak-ris. Patella.

My'le (*mule,* millstone). Patella; mole.

Mylic, mil'ik. Molar.

Myllos, mil'los. Vulva; lip.

My'lo (*mule,* mill). In composition, the jaw, especially the lower jaw.

Mylodontes, mil-o-don'tees. Molar teeth.

Mylodus, mil'o-dus (*mule,* mill, *odous,* tooth). Molar tooth.

Myloglossus, me-lo-glos'sus. Winslow has given this name to muscular fibres which pass from the posterior part of the myloid line of the lower jaw, and from the sides of the base of the tongue to the parietes of the pharynx. These fibres belong to the constrictor superior pharyngis.

Mylohyoid (mi-lo-hi'oid) **ar'tery.** Branch from inferior dental to mylohyoid muscle. **M. furrow** or **groove,** furrow passing from the superior orifice of the inferior dental canal of the lower jaw in the same direction as the canal, and lodging the mylohyoid nerve, a branch of the inferior dental. **M. line,** see *Mylohyoïdeus.* **M. nerve,** see *Mylohyoid furrow.*

Mylohyoïdeus, me-lo-he-o-e'de-us. *Mylopharyngeus* of Morgagni and Santorini; situate at the upper and anterior part of the neck, behind the lower jaw; is broad, flat, and has the form of a truncated triangle. Arises from the internal oblique, internal maxillary, or mylohyoid line of the lower jaw-bone, and is inserted at the fore part of the body of the os hyoides. Its innermost fibres unite with those of the opposite side to form a raphe on the median line. The mylohyoïdeus raises the os hyoides and carries it forward, or it depresses the lower jaw.

Mylopharyngeus, me-lo-far-in-ja'us. Constrictor pharyngis; mylohyoïdeus.

Myloydes, me-lo-e'dees. Mylohyoïdeus.

Myo (*muon,* muscle). In composition, muscle.

Myoalbumose, me-o-al'bu-moze. Proteid of muscle-plasma, resembling or associated with myosin ferment.

Myoatrophia lipomatosa, me-o-at-ro'fe-ah lip-o-mat-o'sah. False hypertrophic paralysis.

Myoblasts, mi'o-blasts (*mus,* muscle, *blastos,* germ). Cell-elements which go to form muscular fibres.

Myobroma (me-o-bro'mah) **fragrans.** Vanilla planifolia.

Myocarditis, me-o-kar-de'tis (*myo, carditis*). Inflammation of the muscular structure of the heart; chronic myocarditis may lead to myodegeneration or degeneration of the heart-muscles and induration. Carditis.

Myocardium, me-o-kar'de-um (*myo, kardia,* heart). Muscular structure of the heart. See *Heart.*

Myocele, me-o-se'le (Eng. mi'o-seel) (*myo, kele,* tumor). Muscular tumor.

Myocephalitis, me-o-sef-al-e'tis (*myo, kephale,* head, *itis*). Inflammation of the muscles of the head.

Myocephalon me-o-sef'al-on (*muia,* fly, *kephale,* head, from its resemblance). Ptosis iridis.

Myochorditis, me-o-kord-e'tis. Inflammation of muscles of the larynx and vocal bands.

Myochrome, mi'o-krome (*myo, chroma,* color). Pigment contained in muscles. Colored albuminous matter in the serum of red-colored muscles, which is identical with hæmatocrystallin.

Myochronoscope, me-o-kron'o-scope (*myo, chronos,* time, *skopeo,* to view). Instrument for estimating rapidity with which muscles contract or for determining transmission of nerve-stimuli through muscles.

Myoclonia me-o-klon'e-ah (*mus, klonos,* twitching). Disease characterized by the occurrence of myoclonus.

Myoclonus, me-ok'lo-nus (*mus,* muscle, *klonos,* twitching.) Muscle-spasm which attacks the muscles of the upper and lower extremities, and occasionally those of the back. **M. mul'tiplex,** myoclonus.

Myocœlialgia, me-o-se-le-al'je-ah (*myo, koilia,* abdomen, *algeo,* to suffer). Pain in the muscles of the abdomen.

Myocœlitis (me-o-se-le'tis) or **Myocœlii'tis** (*myo, koilia,* lower belly). Inflammation of the muscles of the abdomen.

Myocolpitis, me-o-kol-pe'tis (*myo, kolpos,* vagina). Inflammation of muscular wall of vagina.

Myocomma, me-o-kom'mah (*myo, komma,* slice). Myotome; muscular metamere.

Myoctonic acid, me-ok-ton'ik as'id. Yellowish oil derived from Palicourea Macrafii; highly poisonous internally and intoxicant when inhaled.

Myoctonine, me-ok'to-neen. Extract obtained from Aconitum lycoctonum; very poisonous, like curare.

Myoctonin'ic ac'id. Myoctonic acid.

Myoctonon, me-ok'ton-on. Aconitum napellus.

Myocystis, me-o-sist'is. Cystic tumor of a muscle.

Myocyte, mi'o-site. Muscle-cell.

Myodemia, me-o-dem'e-ah (*myo, demos,* fat). Fatty degeneration of muscle.

Myodeopsia, me-o-de-op'se-ah (*muiodes,* appertaining to flies, *opsis,* vision). Metamorphopsia.

Myodes, me-o'dees. Like unto muscle; muscular.

Myodesopsia, me-o-des-op'se-ah. Metamorphopsia.

Myodiastasis, me-o-de-as'tas-is (*diastasis*). Separation or rupture of muscle.

Myodynamia, me-o-din-am'e-ah (*myo, dunamis,* power). Force or power of a muscle.

Myodynamic, mi-o-di-nam'ik. Relating to the power or force of muscular contraction.

Myodynam'ics. See *Muscular contraction.*

Myodynamiometer, mi-o-di-nam-e-om'e-tur (*myo, dunamis, metron,* measure). Dynamometer.

Myodynamom'eter. Dynamometer.

Myodynia, me-o-din'e-ah (*myo, odune,* pain). Pain in the muscles—rheumatismal or other. Rheumatism. **M. inflammato'ria,** myositis. **M. puerpera'lis,** myalgia, puerperal.

Myœde'ma. Myoidema.

Myo-endocarditis, me'o-en-do-kard-e'tis. Myocarditis and endocarditis existing at the same time.

Myo-epithe'lial. Relating to myo-epithelium.

Myo-epithelium, me'o-ep-e-the'le-um. Myothelium or muscle-plate.

Myofibroma, me-o-fib-ro'mah (*myo, fibroma*). Fibrous degeneration of the muscular structure.

Myogaster, me-o-gas'ter (*myo, gaster,* belly). Belly or thickened portion of a muscle.

Myogastric, mi-o-gas'tric. Relating to the belly of a muscle.

Myogenesis, me-o-jen'es-is (*myo, genesis,* formation). Development of muscle-tissue.

Myogenic, mi-o-jen'ik (*myo, gennao,* to produce). Muscular in its origin or development. See *Paralysis, myogenic.*

Myoglobulin, mi-o-glob'u-lin. Globulin obtained from muscle; resembles serum-globulin; coagulates by heat at 63° C.

Myogna'thus (*myo, gnathos,* jaw). Monster in which the supernumerary head has only muscular and cutaneous attachment.

Myogram, mi'o-gram (*myo, gramma,* drawing). Tracings obtained by the myograph of muscular contractions and relaxations.

Myogrammata, me-o-gram'mah-tah (pl. of **Myogramma**). See *Inscriptiones tendineæ.*

Myograph, mi'o-graf (*myo, grapho,* to write). Instrument for taking tracings of muscular contraction. See *Myographion.* **M., car'diac,** cardiograph.

Myographion, me-o-graf'e-on (*myo, grapho,* to write). Instrument consisting essentially of three parts—one to hold the muscle having the nerve attached; clockwork to move a revolving cylinder with regular velocity; and an arrangement for stimulating the nerve at the proper moment; the object of the whole being to determine the rapidity of the nerve-current.

Myog'raphy (*myo, grapho,* to describe). Anatomical description of muscles. Employment of the myograph.

Myohæmatin, mi-o-he'mat-in (*myo, haima,* blood). Nitrogenous pigment contained in muscles.

Myoid, mi'oid (*myo, eidos,* resemblance). Epithet given to tumors composed of fibre-cells or muscular fibres of organic life.

Myoidema, me-oi-da'mah (*myo, oidema,* elevation, tumefaction). A symptom of peculiar muscular irritability in phthisis, exhibited in the elevation of nodules at points pressed upon by the fingers while percussing.

Myoides, me-oid'ees. Muscle-like, as platysma myoides of the neck.

Myolemma, me'o-lem-mah (*myo, lemma,* coat). Membranous covering of muscular fibrillæ.

Myolemmatic, me-o-lem-mat'ik. Relating to myolemma.

Myolin, me'o-lin (*myo*). Name given by Mr. Erasmus Wilson to a transparent substance that fills the cells, which, he conceived, by their juxtaposition form the ultimate muscular fibril.

Myolipoma, me-o-lip-o'mah. Tumor consisting of muscular and fatty tissue.

Myology, mi-ol'o-je (*myo, logos,* discourse). Anatomy which treats of the muscles.

Myoma, me-o'mah (*myo, oma*). Myomatous tumor; muscular tumor. This name has also been used synonymously with *Fibro-muscular tumor, Tumor fibro-musculosus,* a fibrous tumor containing involuntary muscle. If the muscular fibres belong to the smooth variety, the tumors are called *Leiomyomata;* if to the striped, *Rhabdomyomata.* **M. caverno'sum,** myoma telangiectodes. **M. lævicellula're** (*lævis,* smooth, *cellula,* cellule). Term applied by Virchow to fibroid tumor of the uterus, under the view that the spindle-shaped cells observed in it are muscle-cells.

Myomalacia, me-o-mal-ah'she-ah (*myo, malakia,* softness). Softening of muscle.

Myomectomy (mi-o-mek'to-me) or **Myomot'omy** (*myoma, ektome,* a cutting out). Operation for removal of myoma of the uterus by abdominal section.

Myomelanosis, me-o-mel-an-o'sis (*myo, melas,* black). Growth of a dark mass inside of a muscle.

Myomere, me'o-mere. Segment of a muscle.

Myometer, mi-om'e-tur (*myo, metron,* measure). Instrument intended to measure a muscle when contracting.

My'on. Muscle.

Myonarcosis, me-o-nar-ko'sis (*myo, narke,* stupor). Numbness of the muscles.

Myoneoplasma, me-o-ne-o-plaz'mah (*myo, neos,* new, *plasma,* formation). Myoma.

Myoneuralgia, me-o-nu-ral'je-ah. Muscular neuralgia, usually of the neck and lumbar region.

Myonine, me'o-neen. Muscle-substance.

Myonitis, me-o-ne'tis (*myo, itis*). Myositis.

Myonosus, me-on'o-sus (*myo, nosos,* disease). Disease of the muscles.

Myopachynsis, me-o-pak-in'sis (*myo, pachunsis*). Hypertrophy affecting muscles.

Myopalmus, me-o-pal'mus. Agitation; twitching of the tendons; subsultus tendinum.

Myoparalysis, me-o-par-al'e-sis. Muscular paralysis.

Myopathic, mi-o-path'ik. Pertaining to myopathy.

Myopathy, mi-op'ath-e (*myo, pathos,* affection). Disease of a muscle or muscles.

Myope, me'o-pe. Myops.

Myophone, mi'o-fon (*myo, phone,* voice). Instrument intended to estimate and detect the intensity of sound due to contraction of muscles.

Myophonia, me-o-fo'ne-ah (same etymon). Sound of muscular contraction, as that of the ventricles of the heart during the systole of that organ.

Myopia, me-o'pe-ah (*muo,* to close, *ops,* eye, from the habit with the myopic of half shutting the eyes; *mus,* mouse, *ops,* eye). *Myopy, Shortsightedness, Nearsightedness, Mousesight, Purblindness.* State of those who can

only see objects very near. The defect is owing to the too great convexity or depth of the eye, or to too great density of the humors, and is palliated by wearing concave glasses.

Myopic, mi-op'ik. *Mope-eyed, Mopsical, Short-sighted, Poreblind, Purblind, Spurblind.* Relating or appertaining to myopia. **M. cres'cent,** whitish crescentic space in the vicinity of the papilla, from exposure of the sclerotic by detachment of the choroid.

Myopodiorthoticon, me-o-po-de-or-tho'tik-on (*myopia, diorthotikon,* having power to correct). Apparatus for the cure of shortsightedness.

Myops, me'ops. *Myope;* one affected with myopia or shortsightedness.

Myopsin, me-op'sin. Ferment of pancreatin; albumen is digested by it.

Myopy, mi-o'pe. Myopia.

Myorcytes (me-or'sit-ees) **Weisman'ni.** Parasitic round-worm of small size occurring in muscles.

Myorrheuma, me-or-rhu'mah (*myo, rheuma,* a flux, rheumatism). The severe pains felt in rheumatism.

Myorrhexis, me-or-rheks'is (*myo, rhexis,* rupture). Rupture of a muscle.

Myosarcoma, me-o-sar-ko'mah (*myo, sarcoma*). Sarcomatous tumor in which muscular fibres are found, or which has developed on a myoma.

Myosclerosic (mi-o-skler-o'sik) **palsy** or **paralysis** (*myo, sclerosis*). See *Paralysis, pseudohypertrophic.*

Myosin, me-o'sin. Globulin proteid, after death producing rigor mortis by its coagulation. See *Muscle.*

Myosinizesis, me-o-sin-iz-a'sis. Condition in which muscle-fibres adhere to one another.

Myosinogen, me-o-sin'o-jen (*myosin, gennao,* to beget). Proteid of muscle-plasma; coagulated by heat at 56° C.

Myosinoses, me-o-sin-o'sees. Products obtained when myosin is digested by gastric juice.

Myosis, me-o'sis (*muo,* to close the eyes). Smallness or contraction of the pupil. *Phthisis pupillaris.* Permanent or preternatural contraction of the pupil; usually caused by iritis, and extremely difficult to cure, but it may be associated with locomotor ataxia, disseminated sclerosis, uræmia, opium-poisoning, etc. When it exists to such an extent as to obliterate the pupil, it is called *Synizesis.* Myopia. **M., spas'tic,** myosis caused by contraction of sphincter pupillæ. **M., spi'nal,** myosis occurring in some affections of the spine.

Myositic, mi-o-sit'ik (*myosis*). Causing contraction of the pupil, as opium.

Myositis, mi-o-se'tis (*myo, itis*). Inflammation of the muscles; also rheumatism. *Ossifying myositis* arises from traumatic congestion, such as is induced by continuous pressure, as in the cavalry and infantry drill; see *Drill-bone.* **M., fi'brous** or **interstit'ial,** myosis in which connective tissue is in a hyperplastic condition and the muscular fibres are atrophied. **M. ossif'icans progressi'va lipomato'sa,** myositis in which muscle-fibres become infiltrated with fat. **M., pyæ'mic,** myositis due to pyæmia. **M., pyret'ic,** myositis caused by fever. **M., specif'ic,** syphilitic myositis. **M. trichino'sa,** myositis due to presence of trichina spiralis in muscles. **M. typho'sa,** myositis characterized by softening and other changes in muscles; this condition occurs sometimes in typhoid fever.

Myosotis, me-o-so'tis (*mus,* mouse, *ous,* ear). Hieracium pilosella. Acute rheumatism (*muon,* muscle).

Myospasis, me-os'pas-is. Muscular contraction.

Myospasm, mi'o-spazm. Spasm of a muscle; cramp.

Myostici (**mor'bi**) me-os'tis-e (*myo, osteon,* bone). Diseases of the bones and muscles.

Myostypses, me-o-stip'sees (*myo, stupsis*). Diseases in which muscular spasm of excreting ducts occurs.

Myosuture, mi'o-su-ture. Muscle-suture.

Myotalgia, me-o-tal'je-ah. Myalgia.

Myotases, me-ot'as-ees. Muscular tensions.

Myotatic, mi-o-tat'ik (*myo, teino,* to stretch). Relating to muscular tension. **M. contrac'tion,** contraction which takes place when muscle-tendons are subjected to blows; also called **tendon reflex** or **tendon jerk.**

Myotenotomy, mi-o-te-not'o-me (*myo, tenon,* tendon, *tome,* incision). The act of dividing or cutting muscles and tendons.

Myothelium, me-o-the'le-um. Muscle-plate.

Myothermic, mi-o-thur'mik (*myo, therme,* heat). Relating to heat generated by muscles.

Myot'ic (*muo,* to close). Causing contraction of the pupil.

Myotics, mi-o'tiks (*muo,* to close). Agents which contract the pupil—the Calabar bean, for instance.

Myotility, mi-o-til'it-e (*myon*). Muscular contractility.

Myotome, mi'o-tome (*myo, tome,* section). The muscular section of the skeleton.

Myotom'ia congen'ita. Thomsen's disease.

Myotomy, mi-ot'o-me (*myo, tome,* section). Practical anatomy treating of the dissection of the muscles; also surgical operation of the division of muscles to remove deformity. **M., in'tra-oc'ular,** operation in which the ciliary muscle is divided. **M., oc'ular,** section of muscles in strabismus.

Myotonus, me-ot'o-nus (*myo, tonos*). Muscular tone.

Myotrichodina, me-o-trik-o-de'nah (*myo, thrix,* hair). Trichina spiralis. **M. pimentoi'des,** Pimenta citrifolia.

Myotyrbe, me-o-tur'be (*myo, turbe,* disorder). Chorea.

Myracopum, mir-ak'o-pum (*muron,* ointment, *a,* privative, *kopos,* fatigue). Ointment used by the ancients in cases of fatigue.

Myrcia acris, mer'se-ah ak'ris. Pimenta acris. See *Spiritus myrciæ.*

Myrepsus, mir-ep'sus (*muron,* ointment). One who makes and sells ointments.

Myriagramme, mir'e-a-gram (*gramma,* gramme). Weight equal to 10,000 grammes, or to 26 pounds 9 ounces and 6 drachms Troy.

Myrialitre, mir'e-ah-le-t'r (*murioi,* ten thousand, *litre*). French measure of capacity containing 10,000 litres, equal to 2642 U. S. gallons.

Myriametre, mir'e-a-me-t'r. Measure of 10,000 metres, equal to 16 miles 1 furlong 156 yards 14 in.

Myrica asplenifolia, mir-e'kah as-plen-e-fo'le-ah (*murike,* tamarisk). Comptonia asplenifolia. **M. cerif'era,** see *Cera flava, C. alba,* and *Wax, myrtle.* **M. ga'le,** *Dutch myrtle, Sweet gale, Sweet willow* (Sc.), ord. Myricaceæ. Leaves, flowers, and seeds have a strong fragrant smell and a bitter taste; used for destroying moths and cutaneous insects; infusion is given internally as a stomachic and vermifuge. **M. palus'tris,** M. gale.

Myricin, mir'is-in. One of the substances contained in wax; undissolved matter remaining when wax is boiled with alcohol.

Myringa, mir-in'gah. Membrana tympani.

Myringitis, mir-in-je'tis (*myringa,* membrana tympani). Inflammation of the membrana tympani, and also of the tympanum.

Myringodectomy, mir-in-go-dek'to-me (*myringa, ektome,* excision). Excision of a part or the whole of the membrana tympani. See *Sphyrotomy.*

Myringomycosis, mir-in-go-me-ko'sis (*myringa,* membrana tympani, *mukosis,* fungous disease). *Myringomyringitis, Otitis parasitica.* Inflammatory affection of the meatus of the ear caused by parasitic vegetable growths, the Aspergillus nigrescens and A. flavescens.

Myringomyringitis, mir-in-go-mir-in-je'tis (*myringa,* membrana tympani). Myringomycosis.

Myringoplasty, mir-in'go-plas-te (*myringa, plasso,* to form). Plastic operation on membrana tympani.

Myringotome, mir-in'go-tome (*myrinx, tome,* incision). Surgical knife for making incision into membrana tympani.

Myrinx, mir'inks. Membrana tympani.

Myris (*muron,* perfumed oil or ointment). Perfumed oil-jar or ointment-box.

Myristate, mir'ist-ate. Salt of myristic acid.

Myristic acid, mir-is'tik as'id. Acid found in the oil of nutmeg.

Myristica, mir-is'te-kah (*muron,* liquid perfume, *muro,* to flow). Ord. Myristicæ. Tree which produces the nutmeg and mace. The *Nutmeg* (kernel of seed of Myristica fragrans), *Myristica* (Ph. U. S. and Br.), is the kernel of the fruit. It has a fragrant, aromatic odor, an agreeable pungent taste, and is much used for culinary purposes. Alcohol extracts its active matter. It has the properties of aromatics in general, being stimulant and stomachic. The oil—*Oleum myristicæ* or *O. nucistæ æthereum, Volatile oil of nutmeg*—possesses the virtues of the nutmeg. Dose of the nutmeg is gr. v to ℈j; of the oil, gtt. iij–vj. *Mace* is the arillus of the fruit; it is membranous, with the odor and taste of the nutmeg, and is possessed of similar qualities. The *Oleum macis* or *macidis* is a fragrant, sebaceous substance expressed in the East Indies; it is only used externally. It is the *Adeps myristicæ, Oleum myristicæ expressum, Oleum* or *Balsamum nucistæ, Butter of nutmegs, Expressed oil of mace* or *nutmegs.* **M. aromat'ica,** myristica. **M. fra'grans,** myristica. **M. moscha'ta,** myristica. **M. officina'lis,** myristica. **M. oto'ba,** tree native of Columbia, said to possess tonic properties. **M. sebif'era,** tree native of Guiana and Brazil; ocuba wax is obtained from the seeds.

Myristicæ nucleus, mir-is'te-se nu'kle-us. See *Myristica moschata.*

Myristicatio hepatis, mir-is-te-kah'she-o hep'at-is. Liver, nutmeg.

Myristicene, mir-is'te-seen. A stearopten of the oil of Caryophyllus aromaticus.

Myristin, mir-is'tin. Glyceride of myristic acid occurring in the oil of nutmeg.

Myrmecia, mir-me'she-ah. Formica; growth on palms or soles producing sensation of formication.

Myrmeciasis, mir-me-se'as-is. Convulsio cerealis; formication.

Myrmeciasmus, mir-me-se-az'mus. Convulsio cerealis; formication.

Myrmecizon, mir-me'se-zon. Formicant.

Myrmex, mir'meks. Formica.

Myrobalanus, mir-o-bal'an-us (*myron, balanos,* nut). *Myrobalan.* Dried Indian fruit of the plum kind, of different species of Terminalia, ord. Combretaceæ. Of this there are several varieties: the *M. bellirica,* or *Belliric myrobalan, Bellegu, Bellerigi, Belnileg;* the *M. chebula* or *Chebule myrobalan;* the *M. citrina* or *Yellow myrobalan, Arara;* the *M. emblica* or *Emblic myrobalan;* and the *M. Indica, Asuar, Indian,* or *Black myrobalan.* All the myrobalans have an unpleasant, bitterish, very austere taste, and strike an inky blackness with a solution of steel. They are said to possess laxative as well as astringent properties.

Myrocarpus (mir-o-karp'us) **fastigiat'us.** Cabriura preta; contains a balsam resembling balsam of Tolu.

Myron, me'ron. Myrum; unguentum.

Myronate, mi'ron-ate. Salt of myronic acid. **M. of potas'sium,** glucoside occurring in black mustard-seeds.

Myron'ic ac'id. Acid which is present in Sinapis nigra combined with potassium.

Myrophorum, mir-of'o-rum (*muron,* ointment, *phero,* to carry). Instrument to facilitate the application of ointments to parts difficult of access.

Myropissoceron, mir-o-pis-so-se'ron (*myron, pissa,* pitch, *keros,* wax). Topical application in alopecia, referred to by Galen.

Myropœus, mir-o-pe'us (*myron, poieo,* to make). One who makes ointments.

Myropoles, mir-o-po'lees (*myron, poleo,* to sell). One who sells ointments.

Myrosin, mi'ro-sin. Nitrogenous ferment contained in black mustard-seed.

Myrospermum (mir-o-spur'mum) **emargina'tum** (*myron, sperma,* seed). Myroxylon frutescens. **M. erythrox'ylon,** Myroxylon Peruiferum. **M. frutescens,** Myroxylon Peruiferum. **M. Perei'ræ,** see *Myroxylon Peruiferum.* **M. Peruif'erum,** see *Myroxylon Peruiferum.* **M. of Sonsonate,** see *Myroxylon Peruiferum.* **M. Toluif'erum,** see *Toluifera balsamum.*

Myrosyne, mir-os'in-e (sweet-scented juice). Principle closely allied to emulsin found in black mustard-seeds; also in horseradish root.

Myroxocarpin, mir-oks-o-kar'pin (*myroxylon, karpos,* fruit or seed). See *Myroxylon Peruiferum.*

Myroxylin, mir-oks-il'in. Substance contained in wood and bark of Myroxylon Peruiferum.

Myroxylon, mir-oks'il-on (*myron, xulon,* wood). See *M. Peruiferum.* **M. Perei'ræ,** tree of Central America and the Pacific coast, source of officinal balsam of Peru. **M. Peruif'erum,** *Quinquino, Cabureiba;* ord. Leguminosæ. Tree which affords the *Peruvian balsam, Balsamum Peruvianum* or *Peruvianum nigrum* or *Peruanum* or *Indicum, Putzochill, Myroxyli Peruifera balsamum, Myroxylon, Cabureiciba, Indian, Mexican,* or *American balsam.* Balsamum Peruvianum (Ph. U. S. and Br.) is obtained from Myroxylon Pereiræ. It consists of benzoic acid, resin, and essential oil. The odor is fragrant and aromatic; taste hot and bitter; soluble in alcohol, and miscible in water by the aid of mucilage. Stimulant and tonic, and considered to be expectorant; as such it has been employed in paralysis, chronic asthma, chronic bronchitis, rheumatism, gleet, leucorrhœa, etc., and externally for cleansing and stimulating foul indolent ulcers. Dose, gtt. v. to xxx. White balsam of Peru, natural balsam, balsamum album, styrax alba, balsamelæon, is obtained by incision from Myrospermum Peruiferum. The Myroxylon of Sonsonate in Central America—*Myrospermum Pereiræ* of Dr. Royle—*M. of Sonsonate,* according to the Ph. Br., furnishes balsam of Peru. From it is obtained a resinous principle called *Myroxocarpin.* **M. of Son'sonate,** see *M. Peruiferum.* **M. Toluif'erum,** Toluifera balsamum.

Myroxytic (mir-oks-it'ik) **ac'id.** Acid prepared from cinnamein.

Myrrha, mir'rah (*muro,* to flow) (Ph. U. S.). Myrrh. Exudation of a plant of Abyssinia or Arabia Felix, or Balsamodendron myrrha. This gum-resin has a fragrant, peculiar odor, and bitter aromatic taste. It is in reddish-yellow, light, brittle, irregular tears; partially soluble in distilled water when aided by friction; s. g. 1.360; is stimulant, and has been used in cachectic affections, humoral asthma, chronic bronchitis, etc., and, in the form of tincture, as a mouth-wash. Dose, gr. x to ℈j. **M. imperfec'ta,** bdellium.

Myrrhine, mir'rheen. Myrtus.

Myrrhis (mir'rhis) **an'nua.** Athamanta cretensis. **M. ma'jor,** Chærophyllum odoratum. **M. odora'ta,** Chærophyllum odoratum.

Myrrhol, mir'rhol. Volatile oil, $C_{10}H_{14}O$, derived from myrrha.

Myrsinat'on. Plaster in which oil of myrtle is contained.

Myrsine, mur-see'ne. Myrtus.

Myrsinelæon, mur-sin-el-e'on (*mursine,* myrtle, *elaion,* oil). Oil of myrtle.

Myrsinites, mur-sin-e'tees. Wine in which branches of myrtle have been macerated.

Myrtacantha, mur-tak-an'thah (*myrtus, akantha,* thorn). Ruscus.

Myrtidanon, mur-tid'an-on (*myrtus,* myrtle). Excrescence growing on the trunk of the myrtle and used as an astringent. Also wine—*Vinum myrtidanum*—made from wild myrtle-berries.

Myrtifolia Belgica, mur-te-fo'le-ah belj'ik-ah (*myrtus, folium,* leaf). Myrica gale.

Myrtiform, mur'te-form (*myrtus, forma,* shape). Having the shape of a leaf of myrtle. Name given to a muscle (depressor alæ nasi), to the fossa incisiva, to certain caruncles, etc.

Myrtiformis, mur-te-for'mis. Compressor naris; depressor alæ nasi. See *Myrtiform.*

Myrtillus, mur-til'lus. See *Vaccinium myrtillus.*

Myrtites, mur-te'tees (*murton,* the myrtle-berry). Name given to medicine prepared with honey and myrtle-berries.

Myrtle, mur't'l. Myrtus. **M., bas'tard,** Myrica gale. **M. ber'ry,** Vaccinium myrtillus. **M. can'dleberry,** see *Wax, myrtle.* **M., Dutch,** Myrica gale. **M.**

tree, Myrtus communis. **M. wax,** see *Wax, myrtle.* **M., wild,** ruscus.

Myrtocheilides, mur-to-kile'e-dees (sing. **Myrtocheilis**) (*myrton, cheilos,* a small lip). Nymphæ.

Myrtochila, mur-to-ke'lah (*myrton, cheilos,* a lip). Nymphæ.

Myrtodes, mur-to'dees (*myrtus, odes*). Myrtiform.

Myrtol, mur'tol. Oil obtained from leaves of Myrtus communis by distillation; recommended in catarrhal affections; dose, 5 minims.

Myr'ton. Clitoris.

Myr'tus. The myrtle. Ord. Myrtaceæ. Berries of this plant have been recommended in alvine and uterine fluxes and other disorders of relaxation and debility. Moderately astringent and somewhat aromatic. **M. a'cris,** see *Spiritus myrciæ.* **M. an'glica,** Myrica gale. **M. Braban'tica,** Myrica gale. **M. caryophylla'ta,** tree which is considered to afford the *Clove bark, Cortex caryophyllatus* or *caryophyllata.* Bark is a warm aromatic, resembling clove with an admixture of cinnamon. May be used with the same views as cloves or cinnamon; see *Spiritus myrciæ.* **M. caryophyl'lus,** Eugenia caryophyllata. **M. caulifio'ra,** *Jaboticabeira.* Decoction of the bark is aromatic and astringent, and is employed in sore throat. **M. chekan',** cheken, chekan, chequen; tree or shrub, native of Chili; leaves have been recommended in bronchitis. **M. commu'nis,** myrtle. **M. leucoden'dron,** Melaleuca cajuputi. **M. pimen'ta,** tree which bears the *Jamaica pepper, Pimentæ baccæ, Pimento berries, Pimento, Allspice.* The nearly ripe berries—*Pimenta* (Ph. U. S. and Br.), *Pimento*—have an aromatic odor, resembling a mixture of cinnamon, nutmeg, and cloves; the taste is pungent, but mixed like the odor. Like other peppers, this is stimulant and carminative. The oil—*Oleum pimentæ*—possesses the virtues of the berries. The powdered fruit has been called *Four spices.* Dose, gr. v to ℈ij. *Aqua pimentæ, Pimento-water,* was officinal in several pharmacopœias; it is carminative. Dose, f℥j or f℥ij.

My'rum. Perfumed oil or ointment. Liquid perfume. Spontaneously exuding juice of many plants, especially of that from which myrrh is obtained.

Mys. Muscle.

Mysiologia, mis-e-o-loj'e-ah (*mys, logos,* a discourse). Myology.

Mysitis, mis-e'tis (*mys, itis,* inflammation). Myositis.

Mysophobia, mis-o-fo'be-ah (*musos,* uncleanness, *phobos,* fear). Morbid fear of contamination or infection.

Mystachial, mis-tak'e-al. Pertaining to upper lip.

Mystax, mis'taks (*mastax, mustax*). Hair growing on each side of the upper lip in men. *Mustache* or *Mustachio;* also the upper lip.

Mysterion, mis-te're-on (mystery). Arcanum, nostrum, or secret preparation in general.

Mys'tron. A Greek measure which held about three drachms.

Mytilotoxine, mit-il-o-toks'een (*mutilos,* mussel, *toxikon,* poison). $C_6H_{15}NO_2$. Ptomaïne existing in poisonous mussels; is a violent poison resembling curare. See *Ptomaïnes* (table).

Mytilus edulis, mit'il-us ed-u'lis. Common mussel; bivalve, the flesh of which, when at all in a state of decomposition, is highly poisonous; when fresh it is an agreeable but not very digestible article of diet, producing in some persons all the symptoms of urticaria. One affected with such phenomena is said, occasionally, to be *musselled.*

Myurus (me-u'rus) or **Myur'ous.** The pulse is so called when it sinks progressively and becomes smaller and smaller like a mouse's tail (*mus,* mouse, *oura,* tail). *Pulsus myurus reciprocus,* a pulse which, after having become gradually weaker, resumes by degrees its former character.

Myxa, miks'ah. Mucus; sebestena.

Myxadenitis, miks-ad-en-e'tis. Inflammation of a mucous gland. **M. fibro'sa,** myxadenitis in which the connective tissue is in a hyperplastic condition.

Myxadeno'ma. Myxoadenoma.

Myxæmia, miks-e'me-ah (*muxa,* mucus, *haima,* blood). Condition in which mucus accumulates in the blood, tissues, and secretions.

Myxangeiitis, miks-an-ji-e'tis. Inflamed condition of outlets of mucous glands; that is, of mucous canals.

Myxeurysma, miks-u-riz'mah. Lymphangeioma cavernosum.

Myxiosis, miks-e-o'sis (*muxa,* mucus, *osis*). Gonorrhœa impura.

Myxoadenoma, miks-o-ad-en-o'mah (*myxa, adenoma*). Glandular tumor in the cystic spaces of which gelatinous material has been generated.

Myxochondroma, miks-o-kon-dro'mah (*myxa, chondros,* cartilage). Myxoma containing the honeycomb-like septa, such as are met with in chondroma.

Myxochondrosarcoma, miks-o-kon-dro-sark-o'mah. Variety of myxosarcoma in which cartilage-cells exist.

Myxocolica, miks-o-kol'e-kah (*muxa,* mucus, *colica,* colic). Mucous colic.

Myxocylindroma, miks-o-sil-in-dro'mah. Myxosarcoma.

Myxœdema, miks-e-de'mah (*muxa,* mucus, *oidao,* to swell). Disease characterized by hyperplasia of connective tissue and mucoid infiltration of the cutis and surrounding organs. The thyroid gland also becomes atrophied.

Myxofibroma, miks-o-fib-ro'mah. *Myxomatous fibroma, Fibromyxoma;* fibrous growth containing mucus, the result of softening; sometimes attains a very large size.

Myxoglio'ma. See *Gliomyxoma.*

Myxoïdes, miks-o-e'dees (*myxa,* mucus, *eidos,* resemblance). Muciform; mucous.

Myxolipoma, miks-o-lip-o'mah. Lipomatous myxoma.

Myxoma, miks-o'mah (pl. **Myxo'mata**) (*myxa, oma*). *Myxomatous, Mucous,* or *Mucoid tumor;* elastic, soft tumor, composed of loose tissue with a semifluid matrix, resembling the Whartonian jelly of the umbilical cord or the vitreous humor. One variety is benign, its tissue resembling embryonic tissue; another variety is recurrent after removal, and is allied to sarcoma, or sometimes combined with it, as in myxosarcoma. Originally described by J. Müller as *Collonema.* Types are to be found in gelatinoid polypus of the nose, ear, etc., cystic neuromata, etc. **M., cartilag'inous,** myxoma containing cartilage-like cells. **M., cys'tic,** myxoma containing fluid material, giving it the appearance of cystic. **M., diffuse', of the placen'ta,** vesicular mole. **M., erec'tile,** myxoma rich in vessels. **M., lipo'matous,** myxoma in which a large quantity of fat is contained.

Myxomatodes, miks-o-mat-o'dees. Resembling myxoma; term applied to mucocarneous sarcomata. See *Myxosarcoma.*

Myxomatous (miks-o'mat-us) **degenera'tion of the placen'ta.** Mole. **M. sarco'ma,** myxosarcoma.

Myxomyceles, miks-o-me'se-lees (*muxa,* mucus, *mukes,* fungus). Tribe of parasites usually reckoned among the fungi, but occupying an intermediate position between the animal and vegetable kingdoms.

Myxomycelous, miks-o-me-se'lus. Belonging or relating to the myxomyceles.

Myxoneuroma, miks-o-nu-ro'mah. Interstitial tissue between the nerve-filaments of neuroma, resembling mucous tissue.

Myxorrheos, miks-or-rhe'os (*muxa,* mucus, *rheo,* to flow). One who is subject to mucous discharge. Applied to an infant that discharges a considerable quantity of mucus and saliva.

Myxosarcoma, miks-o-sar-ko'mah (*muxa,* mucus, *sarx,* flesh). *Myxomatous* or *Mucocarneous sarcoma;* mucous transformation of round-celled sarcoma, malignant and of large volume, usually attacking the omentum, skin, etc.

Myxospores, miks'o-spors. Spores originating within a mass containing gelatin.

Myxoter, miks-o'ter (*muxoter,* nostril). Nose.

Myydrocystic, me-e-dro-sis'tic (*mus,* muscle, *hydrocystis,* hydatid). Hydatid existing in the flesh.

Myzesis, miz-a'sis (*muzeo,* to suck). Sucking.

N.

N. This letter, in prescriptions, is an abridgment of *numero*, by number; sign of refraction; also symbol of nitrogen.

Na. Symbol of natrium or sodium.

Nabalus (nab'al-us) **al'bus** (*nabla*, harp, owing to the lyrate leaves). *White lettuce, Lion's foot, Rattlesnake's master, Rattlesnake root, Gall of the earth.* Indigenous plant, ord. Compositæ, which, with several other species of the genus, is reputed to possess the power of curing the bites of serpents. The root has been used in dysentery. Poultice has been employed in ulcers, gangrenous sores, etc. **N. Fraseri** has similar properties.

Na'bot. Saccharum candidum.

Naboth, glands, etc. of. See *Nabothi.*

Nabothi glandulæ, na-bo'thē glan'du-lē. *Glands of Naboth.* Small mucous crypts or follicles situate in the interstices of the duplicatures of the lining membrane of the cervix uteri. Naboth, from noticing them in a morbid condition, mistook them for ova, and hence they received the name *ovula Nabothi.* The term *Nabothian cyst* has been applied to a form of mucous cyst involving the glands just referred to, and in their nature resembling the cystic degeneration of Cowper's gland in the male, *Cowperian cyst.* **N. menorrha'gia**, serous vaginal discharge occurring in pregnant women, first observed by Naboth.

Nacra, nak'rah. *Nakra, Nasa.* Kind of influenza common in the East Indies.

Nacreous, nak're-us. Margaritaceous.

Nacta, nak'tah. Abscess, mammary.

Naegele's (na'ge-le's) **pel'vis.** Oblique distortion of the pelvis described by Naegele, not suspected during life and fatal to mother and child, which depends on arrest of development, fusion of the sacrum with the ilium, or ankylosis after inflammation of the sacroiliac joint.

Nævi, ne've. See *Nævus.* **N. i'ridis**, melanoma iridis. **N., pig'mentary**, see *Nævus.* **N. pila'res**, see *Nævus.* **N. spi'li**, see *Nævus.* **N. vasculo'si**, see *Nævus.*

Nævoid, ne'void (*nævus, eidos*, resemblance). Resembling nævus, as nævoid elephantiasis.

Nævus, ne'vus. *Mother's* or *Fancy* or *Pigment marks, Mother's spots, Port-wine stains.* Spots of various kinds on the skin of children when born, which have been attributed to the influence of the maternal imagination on the fœtus in utero. They are of various appearances, some much better supplied with blood than others. Some are merely superficial or stain-like spots, pigmentary nævi; others are prominent—nævi vasculosi, vascular tumors—and often have long, irregular hairs growing from them. Others are rounded, fatty growths covered with normal skin, nævi lipomatodes. These have been usually called *moles, nævi pilares, N. spili, spili, spilomata, epichroses spili*, etc. See *Telangiectasia.* When nævi are superficial, without any disposition to enlarge or spread, they need not be meddled with, but all those partaking of the character of aneurism by anastomosis had better be removed where practicable. **N. ara'neus**, nævus of a vascular character resembling the shape of spiders' legs. **N., cap'illary**, formed of superficial cutaneous capillaries. Port-wine mark is a variety of this form. **N. caverno'sus**, nævus with new vascular growth, and both erectile and compressible. **N. cuticula'ris**, N., capillary. **N. fibromato'sus**, nævus in which pieces of fibrous tissue exist. **N. flam'mus**, angioma. **N. lipomato'des**, soft and fatty form of nævus. **N. mater'nus**, nævus. **N. pigmento'sus**, nævus; pigmentary mole or birth-mark. **N. sigil'lum**, nævus. **N. spi'lus**, see *Nævus.* **N. vascula'ris** or **vasculo'sus**, nævus. **N., ve'nous**, consists of veins and sinuses adhering to connective tissue. **N. verruco'sus**, pigmented mole with a warty appearance.

Nafda, naf'dah. Naphtha.

Naf'ta. Naphtha.

Nail. Whitish, transparent substance, similar to horn, covering the dorsal extremity of the fingers. Three portions are distinguished in it: the extremity, which is free, at the end of the finger; the body or middle portion, adherent by its inner surface; and the root, *Onychorrhiza, Rhinonychia, Radix* or *Matrix unguis, Intimum unguis.* The last presents two distinct parts: the one, terminated by a thin, serrated edge, is buried in a duplicature of the skin, *Vallecula unguis*, which acts the part of a *Nail-follicle;* the other, called *Lunula* or *Semilunula* or *Selene* or *Arcus* or *Exortus* or *Anatole* or *Albedo unguium*, is whitish and of a semilunar shape, and is situate above the part where the epidermis terminates. The surface covered by the nail is called the *Nail-bed.* The nails are composed of a horny tissue, of the same nature as that forming the hoofs, horns, and scales of different animals. When the nail has been torn off, the papillæ of the skin become covered by a soft, whitish lamina, whose consistence gradually augments. New laminæ are then formed underneath, and give the nail the thickness it ought to possess. The corneous substance being thus constantly produced at the extremity of each of these laminæ, the whole of the nail is pushed forward, and it would grow indefinitely were it not cut or worn by friction. The nails protect and support the extremities of the fingers against the impression of hard bodies; they are also useful in laying hold of small bodies and dividing those that have but little consistence. **N., defœda'tion of**, see *Defœdation.* **N., degenera'tion of**, see *Defœdation.* **N., fa'vus of**, onychomycosis. **N., hang**, see *Hangnail.* **N., ingrow'ing** or **in'grown**, onyxis. **N., inver'sion of**, onyxis. **N., stri'ated**, nail marked with longitudinal furrows.

Nail-bed. See *Nail.*

Nail'er's consump'tion. Variety of siderosis.

Nail-fol'licle. See *Nail.*

Nail'spring. Hangnail.

Nail'wort. Draba incana.

Na'ja tripu'dians. Cobra di capello.

Nak'ra. Nacra.

Namangeiitis, nam-an-ji-e'tis (*nama*, a stream, *angeion*, vessel). Lymphangitis.

Nang'nail. Hangnail.

Nan'ism (*nanos*, dwarf). Dwarfishness.

Nanna'ri. Hemidesmus Indicus.

Nannyberry, nan-ne-ber're. Viburnum lentago.

Nanocephalia, nan-o-sef-al'e-ah (*nanus, kephale*, head). See *Nanocephalus.*

Nanocephalus, nan-o-sef'al-us. *Nanocephalia.* One of a monstrous state, in which the whole head or certain of its parts are too small, whilst the trunk and extremities are normal.

Nanocormia, nan-o-kor'me-ah. See *Nanocormus.*

Nanocormus, nan-o-kor'mus (*nanus, kormos*, trunk). *Nanocormia.* One of a monstrous condition, in which the trunk is too small, whilst the head possesses its normal size.

Nan'oid (*nanos*, dwarf, *eidos*, shape). Dwarfish.

Nanomelia, nan-o-mel'e-ah. See *Nanomelus.*

Nanomelus, nan-om'el-us (*nanus, melos*, limb). One of a monstrous condition, in which some part of an extremity is too small and the whole limb too short; *Nanomelia.*

Nanophyes, nan-of'e-ees (*nanos*, dwarf, *phuo*, to grow). Dwarfish.

Nanosomia, nan-o-so'me-ah (*nanus, soma*, body). *Dwarfishness.* State in which the entire body, with all its parts, is smaller than common.

Nanosomus, nan-o-so'mus. Nanus.

Na'nus (*nanos*, a dwarf). Dwarfish; one much below the usual stature. Term applicable to all organized beings, from man to the vegetable. Trees

have their dwarfs, as has the human species. See *Pigmy*.

Napaconitine, nap-ak-on'it-een. Aconitine.

Nape of the neck. Nucha.

Napellina (nap-el-le'nah) or **Napelline**, nap-el'leen. White alkaloid from root of Aconitum napellus; used subcutaneously in neuralgia.

Napellus (na-pel'us) **ve'rus** (dim. of **Napus**, a turnip). Aconitum napellus.

Naphæ (naf'e) **flo'res.** See *Citrus aurantium*. **N. syru'pus**, syrupus aurantii florum.

Naph'tha. From a Chaldaic and Syriac word signifying *bitumen*. Bituminous substance found in Persia, Calabria, Sicily, etc. Is liquid, limpid, of a yellowish-white color, a smell slightly resembling that of oil of turpentine, and lighter than water. Resembles petroleum in its properties, and has been chiefly used as an external application, although, occasionally, as an anthelmintic, and in inhalation in phthisis pulmonalis. See *Æther* and *Acetone*. **N. ace'ti**, see *Æther sulphuricus*. **N., coal-tar, light**, see *Anæsthetic*. **N. pe'træ, N. petro'lei**, petroleum. **N. sulphu'rica**, æther sulphuricus. **N. vegetab'ilis**, æther aceticus. **N. vitrio'li**, æther sulphuricus. **N. vitrio'li camphora'ta**, tinctura ætherea camphorata. **N. vitrio'li martia'lis**, tinctura or alcohol sulphurico-æthereus ferri. **N., wood**, acetone.

Naph'thæ o'leum. Oleum æthereum.

Naph'thalene. Naphthalin.

Naph'thalin. $C_{10}H_8$. When coal tar is subjected to distillation, naphthalin passes over after coal naphtha. It is also obtained by action of heat as phenylbutylene. White, shining, concrete, crystalline substance, fusible at 176° and boiling at 423°. Soluble in alcohol, ether, naphtha, and the oils, but insoluble in water. It is antiseptic and disinfectant, anthelmintic, and has been used as an excitant expectorant in the dose of 8 to 15 grains, in emulsion or syrup. When made into an ointment it is used in psoriasis, lepra vulgaris, etc.

Naphthalol, naf'thal-ol. $C_{10}H_7OH$. β-naphthol-salicylic ether or betol. Given internally as an antiseptic. See *Betol*.

Naphthol (naf'thol) or **Naphtho'leum.** Iso-naphthol; beta-naphthol. It has antiseptic properties, and is used locally in cutaneous affections, in ointment and alcoholic solution; in chronic affections of the middle ear attended with suppuration, etc. Internally, in doses of five grains, it is used in intestinal antisepsis, in chronic diarrhœa, etc. It is bactericidal, and in solution of 1 to 1000 it is employed for preserving pathological specimens, etc. *Alpha-naphthol* is isomeric with beta-naphthol; is decidedly antiseptic, and fatal to bacilli of typhoid fever and tuberculosis. Also a test for sugar in urine. **N., cam'phorated**, used antiseptically for furuncles, diphtheritic sore throat, tuberculosis—in the latter disease being administered by injection into the parenchyma of the lung—in tuberculous abscesses, etc.

Naph'thol-ar'istol. Diiodbeta-naphthol.

Naph'thol-py'rine. A phenol compound of antipyrine.

Naphtosalol, naf-to-sal'ol. Betol.

Napiform, na'pe-form (*napus*, turnip, *forma*, shape). Epithet for a form of scirrhous tumor, carcinoma reticulare, whose cut surface presents concentric lines resembling those seen in the interior of a turnip.

Napium, nap'e-um. Lapsana; sinapis.

Napta, nap'tah. Naphtha; nata.

Napus (*napu*, mustard). Sinapis. **N. leucosina'pis**, Sinapis alba. **N. sylves'tris**, Brassica napus.

Na'py. Sinapis.

Nara. Dracunculus.

Na'ram. Dracunculus.

Narca, nar'kah (*narke*, stupor). Narcosis.

Narcaphthon, nar-kaf'thon. Bark of an aromatic tree formerly brought from India; by some supposed to be that of the tree affording the olibanum; used in fumigation in diseases of the lungs. See *Lacaphthon* and *Thymiama*.

Narce, nar'se (*narke*, stupor). Narcosis.

Narceïn, nar'se-in. *Narceïna, Narceia*. $C_{23}H_{29}NO_9$. One of the alkaloids of opium, which is in colorless, silky needles, and of bitterish, metallic taste, slightly soluble in water, insoluble in ether, and very soluble in alcohol. Said to exceed all the opium alkaloids in soporific power, without producing the disagreeable secondary effects.

Narcema, nar-se'mah. Narcosis.

Narcephlogia, nar-se-flo'je-ah. State in which small-pox and a typhoid condition coexist.

Narcerysipelas, nars-er-e-sip'el-as (*narke*, stupor, erysipelas). Erysipelas in which stupor exists.

Narcesis, nar-sa'sis. Narcosis.

Narcissine, nar-sis'seen. Alkaloid discovered by Girard in the bulb of the daffodil.

Narcis'sus (*narke*, stupor) **jonquil'la.** Same medicinal properties as N. pseudonarcissus. **N. poet'icus**, bulb is reputed to be emetic and cathartic. **N. pseudonarcis'sus**, *Daffodil, Bellflower, Butter and eggs, Lent rose;* ord. Amaryllidaceæ. Root is emetic and cathartic, in the dose of ʒj; flowers are antispasmodic.

Narcodes, nar-ko'dees. Narcotic.

Narcolepsy, nar'ko-lep-se. Tendency in some affections to frequently fall into deep sleep, but only of short duration.

Narcoma, nar-ko'mah (*narke*, numbness, *oma*). Stupor produced by narcotics.

Narcomatous, nar-kom'at-us. Relating to narcoma.

Narcopepsis, nar-ko-pep'sis. Slow digestion.

Nar'cose. In a state of stupor.

Narcosis, nar-ko'sis. *Torpor, Stupor, Stupefaction*. Aggregate effects produced by narcotic substances. At times narcotism is confined to a state of more or less profound stupor, and constitutes, in certain cases, a useful remedial condition; at others it is a true poisoning, characterized by vertigo, nausea, a state of intoxication or apoplexy, constant delirium, convulsive motions, etc. Emetics in strong doses and not much diluted with water, purgatives, and glysters are the first means to be used in this condition. Stupor may afterward be combated by the use of excitant and stimulating drinks. The production of narcosis or the effects of narcotics have been called *narcotization*. **N. folliculo'rum**, state of the scalp which Mr. Erasmus Wilson conceives to be dependent upon torpid action of the hair-follicles, and in which the scalp and hair are found covered with a yellowish, dirty-looking powder, composed of an admixture of granular particles and furfuraceous scales.

Narcospasmus, nar-ko-spaz'mus (*narce, spasmos*, spasm). Stupor combined with spasm.

Narcotia, nar-ko'she-ah. Narcotin.

Narcotic (nar-kot'ik) **poi'son.** See *Poison*.

Narcotico-acrid, nar-kot'ik-o-ak'rid. See *Poison*.

Narcotics, nar-kot'iks (*narke*, stupor). *Stupefacients*. Substances having property of stupefying; as opium, stramonium, and hyoscyamus. Used in medicine as soothing agents, exerting their special influence on the brain and tubular matter of the spinal marrow. In small doses, as a general rule, narcotics stimulate; in large they act as sedatives. The following is a list of the chief narcotics: aconitum, ætherea, belladonna, cannabis, conium, digitalis, humulus, hyoscyamus, lactucarium, opium and morphia, stramonii folia, stramonii semina; mental narcotics (appropriate music, monotonous sounds, or any succession of monotonous impressions).

Narcotin, nar'ko-tin. Narcotina, $C_{22}H_{23}NO_7$. Solid, white, insipid substance, crystallizable; fusible like the fats; soluble in boiling alcohol and ether, and scarcely soluble in water; producing all the unpleasant effects of opium, but objectionable from its throwing the animal into a state of stupor. Its salts, which are very bitter, have been used successfully in India in intermittents.

Narcotism, nar'ko-tizm. Narcosis.

Narcotization, nar-kot-i-za'shun. See *Narcosis*.

Narcotized, nar'ko-tized. Affected with stupor, as from the use of a narcotic.

Narcurethritis (nark-u-reth-re'tis) or **Narcurethrorrhœ'a** (*narke, urethra, rhoia*, a flow). Gleet.

Nard, Cel'tic. Valeriana Celtica; spikenard. **N. In'dica,** Nardus Indica. **N., true,** Nardus Indica. **N., wild,** Asarum Europæum.

Nardostachys (nar-dos'tak-is) **jatamansi.** Nardus Indica. **N. patrin'ia,** Nardus Indica.

Nar'dum Gal'licum. Valeriana Celtica.

Nar'dus America'nus. Aralia nudicaulis. **N. Cel'tica,** Valeriana Celtica. **N. Cel'tica al'tera,** Arnica montana. **N. In'dica,** *India nard, Spikenard;* root of this plant is one of the ingredients in the mithridate and theriaca; moderately warm and pungent, and has a flavor by no means disagreeable; used by the Orientals as a spice. The ointment was formerly used, called *Unguentum nardinum;* it was prepared of *nard, malabathrum leaves, oil of worms, costus, amomum, myrrh,* etc., and was used as a detergent. **N. monta'na,** asarum. **N. rus'tica,** asarum.

Naregamia, nar-eg-am'e-ah. Root of N. alata; has emetic, expectorant, and cholagogue virtues.

Naregamine, nar-eg'am-een. Active principle from root of Naregamia alata, having emetic properties.

Na'res (pl. of **Na'ris**). *Nostrils.* Two elliptical apertures situate beneath the nose, and separated from each other by the cartilaginous septum or columna nasi. These apertures are continually open, and give passage to the air and to the mucous fluids secreted in the nasal fossæ. The anterior portion of the canal surrounded by cartilage is the vestibulum nasi. **N. coal'itæ,** condition characterized by walls of nostrils adhering to each other. **N. exter'næ,** the anterior nares; anterior apertures of nasal cavities. **N. inter'næ,** nasal fossæ. **N., poste'rior,** nares internæ, are the posterior apertures of the nasal cavities, which establish a communication between those cavities and the pharynx; they are bounded above by the body of the sphenoid bone; below by the palate bone and the base of the velum pendulum; and on the outside by the internal ala of the pterygoid process. They are separated from each other by a septum of which the vomer is the bony part.

Narial, nar'e-al. Nasal.

Nariform, nar'e-form. Resembling a nostril in shape.

Narifusoria, nar-e-fu-zo're-ah (*nares,* nostrils, *fundo, fusum,* to pour). Medicines which are dropped or put into the nostrils.

Naringin, nar'inj-in. Substance which crystallizes, obtained from Citrus decumana.

Naris, nah'ris. Nostril; nose.

Narium aditus, nar'e-um ad'it-us (entrance or passage of the nostrils). Nares. **N. sic'citas,** mycteroxerotes.

Nar'row chest. See *Lordosis.*

Narthecia, nar-the'se-ah. Formulary; myris.

Narthecium, nar-the'se-um (dim. of **Narthex,** case of ointments). Formulary; myris.

Narthex, nar'theks. Formulary; myris; splint. **N. asafœ'tida,** see *Asafœtida.*

Nasa, nas'ah. Nacra; nata.

Na'sal (*nasus,* nose). That which relates to the nose. **N. an'gle** is formed by the lower ends of the nasal bones. **N. arch,** transverse venous trunk uniting the frontal veins of opposite sides at the root of the nose. **N. ar'tery,** largest of the two branches in which the ophthalmic artery terminates. Issues from the orbit, above the tendon of the orbicularis palpebrarum, passes above the side of the root of the nose, and anastomoses with the last extremity of the facial. The facial artery gives off the artery of the septum. The internal maxillary gives off the posterior nasal artery. Anterior nasal artery is a small branch from the ethmoidal to the upper meatus. Haller gave the name *nasal* to the spheno-palatine. He also called the dorsales nasi, furnished by the external maxillary, *Nasales laterales.* **N. bones** are situate beneath the nasal notch of the os frontis, and occupy the space between the nasal or angular processes of the superior maxillary bone. Their shape is nearly quadrilateral. They have an external or cutaneous surface, an internal or nasal, and four margins. Each is articulated with its fellow, with the os frontis, ethmoid, and superior maxillary bones. They ossify from a single point. **N. car'tilage,** cartilage formed of three portions, which unite at the dorsum nasi, and are distinguished into the *cartilage of the septum* (*Cartilago septi* or *quadrangularis, Septum narium cartilagineum, Septal cartilage*) and the *Lateral cartilages.* The lateral cartilages are divided into *upper lateral* (*Cartilagines superiores laterales* or *triangulares*), situate immediately below the free margin of the nasal bones; and the *lower lateral* or *alar* (*Cartilagines inferiores* or *alares* or *pinnales* or *minores inferiores*), which are chiefly characterized by the curve they form. Several loose nodules or plates exist in the posterior border of the alæ, *Cartilagines quadratæ, C. alarum minores* or *posteriores* or *minores posteriores;* and some small, flat, irregularly shaped bodies, from two to five in number, which are seen on the upper margin of the lateral cartilage in the neighborhood of the angle, are called *Cartilagines epactiles, C. sesamoïdeæ* or *accessoriæ.* The nasal cartilage is continuous, above, with the ossa nasi, and, inferiorly, with membranous fibrocartilages which form the supple and movable part of the nostrils. **N. catarrh',** coryza. **N. crest,** crista nasalis. **N. douche,** apparatus for cleansing nasal fossæ with water or for applying medicated liquids. **N. duct,** lacrymal duct. **N. em'inence,** mesophryon. **N. fos'sæ,** two large, anfractuous cavities, situate between the orbits below the cranium, and lined by the pituitary or Schneiderian membrane. These cavities have no communication with each other, but the various sinuses in the neighboring bones—the ethmoidal, sphenoidal, superior maxillary, etc.—all communicate with them. The general cavity of each nostril is divided by the spongy bones into three *meatuses* or *passages,* which run from before backward. 1. The *Meatus narium superior,* placed at the upper, inner, and back part of the superior spongy bone. 2. The *Meatus medius,* situate between the superior and inferior spongy bones; and 3. The *Meatus inferior,* situate between the inferior spongy bone and the bottom of the nose. The Schneiderian membrane receives the first pair of nerves and various branches from the fifth pair. Arteries are furnished by the branches of the internal maxillary, known under the names of sphenopalatine, infra-orbitar, superior alveolar, palatine, pterygopalatine; by the supra-orbitar and ethmoidal branches of the ophthalmic artery; by the internal carotid, superior labial, and dorsales nasi. Its veins are little known, and generally follow the course of the arteries. The lymphatics are almost unknown. The nasal fossæ are the seat of smell; they aid also in respiration and phonation. **N. fur'row,** groove which divides the embryonic external and internal processes. **N. gan'glion,** spheno-palatine ganglion. **N. gleet,** ozæna in the horse. **N. mea'tus,** see *Nasal fossæ.* **N. mu'cus,** mucus secreted by the Schneiderian membrane. **N. nerve,** one of the three branches of the ophthalmic nerve of Willis. It enters the orbit by the sphenoidal fissure, passes along the inner paries of that cavity, and divides opposite the internal and anterior orbitar foramen into two branches: 1. The *internal* and *posterior,* which passes into the foramen orbitarium internum anterius, enters the cranium near the dura mater, and passes into the nasal fossæ through an aperture at the side of the crista galli. Afterward it divides into several filaments: one of them—the *Nasolobar* of Chaussier—is very small, and descends on the posterior surface of the os nasi and ramifies on the integuments of the ala nasi. A second terminates near the septum; others descend along the outer paries of the nasal fossæ. 2. The other, *external* and *anterior,* is called the *external nasal nerve,* and is distributed to the outside of the orbit. Before dividing the nasal nerve communicates with the ophthalmic ganglion and gives off two or three ciliary nerves. Sömmering has given the name *Posterior nasal nerves* to the nerves which arise from the internal part of the sphenopalatine ganglion. **N. notch,** semicircular notch situate between the nasal prominences of the frontal bone, and articulated with the nasal bones and the nasal processes of the su-

perior maxillary bones. **N. pas'sages,** meatus narium. **N. pits,** primary embryonic nasal fossæ which appear as depressions on the cerebrovesical surface. **N. point,** nasion. **N. point, infe'rior,** inferior end of nasomaxillary suture. **N. point, supe'rior,** point at which the nasomaxillary and nasofrontal sutures unite. **N. pol'ypi,** see *Polypus.* **N. pro'cess,** maxillary bone, superior. **N. prom'inence,** prominence situate on the median line at the anterior surface of the os frontis, between the two superciliary arches. **N. re'gion,** *Regio nasalis,* region of the nose. **N. sep'tum,** septum narium. **N. spines,** these are three in number: 1. *Superior nasal spine* of the os frontis, occupying the middle of its nasal notch, and articulated before with the nasal bones, behind with the ethmoid; 2. *Inferior* and *anterior nasal spine,* situate at the inferior part of the anterior opening of the nasal fossæ. Is formed by the two superior maxillary bones; and 3. *Inferior* and *posterior nasal spine,* process formed on the mesial line by the two palate-bones at the posterior part of the palatine arch. **N. sur'face,** portion of superior maxillary bone which forms the external wall of the nasal fossæ. **N. veins,** these veins collect blood from side and dorsum of nose and conduct it to the angular vein.

Nasal'e (*nasus,* nose). Errhine; also nasal bone.

Nasalis, nas-al'is. Compressor naris. **N. la'bii superio'ris,** small muscular slip running up from the middle of the orbicularis and the lip to the tip of the nose. Lies exactly in the furrow, and is occasionally a levator of the upper lip or a depressor of the tip of the nose. **N. or'bitæ,** nasal duct.

Nasarium, naz-ar'e-um. Mucus secreted from the nose.

Na'sas. Nata.

Nasatus, naz-at'us (long-nosed, the size of the nose being supposed an index of that of the male organ). Having a long penis.

Nascale, nas-cal'e. Kind of pessary, made of wool or cotton, which was formerly introduced into the vagina after being impregnated with oil, ointment, or some other proper medicament.

Nascapthon, nas-kaf'thon. Narcapthon.

Nascent (nas'sent) **state** (*nascor,* to be born). In chemistry, the state of gases at the instant they are liberated from a combination.

Nasda, nas'dah. Nata.

Naseberry, naz'ber-re. Achras sapota.

Nasen, nas'en. Relating to the nose or nasal aspect.

Nasi, nas'e. See *Oryza.*

Nasilabialis, nas-e-lab-e-al'is. Levator labii superioris alæque nasi.

Nasion, naz'e-on. In craniometry, median point of nasofrontal suture.

Nasitas, nas'it-as (*nasus*). Nasal voice.

Nasitis, naz-e'tis (*nasus, itis*). Inflammation of the nose. **N. posti'ca,** angina nasalis.

Nasmyth's mem'brane. Cuticula dentis.

Na'so (*nasus*). One having a long nose. In composition, the nose.

Naso-alveolar, na'zo-al-ve'o-lar (*nasus, alveolus*). Relating to nasal and alveolar points.

Naso-aural, na'zo-aw'ral. Relating to the nose and ear.

Nasobasilar, na-zo-bas'il-ar. Relating to nasion or nasal point and basion.

Nasobregmatic, na-zo-breg-mat'ik. Relating to nasion and bregma.

Nasobuccal, na-zo-buk'kal. Relating to nose and cheek.

Nasobuccopharyngeal, na-zo-buk-ko-far-in-je'al. Relating to nose, cheek, and pharynx.

Nasociliaris (naz-o-sil-e-ar'is) **nervus.** Nasal nerve.

Naso-ethmoidal, na'zo-eth-moi'dal. Relating to nasal and ethmoidal regions of skull.

Nasofrontal, na-zo-fron'tal. Relating to nasal and frontal bones.

Nasolabial, na-zo-la'be-al (*naso, labium,* lip). Relating to the nose and lip. **N. line,** line or furrow separating the lip from the cheek, and commencing at the ala nasi.

Nasolabialis, naz-o-lab-e-al'is. Muscular fasciculus which arises from the anterior extremity of the septum nasi and terminates in the orbicularis oris.

Nasolacrymal (na-zo-lak're-mal) **duct.** This duct conveys the tears from the eye to the nose.

Nasomalar, na-zo-ma'lar. Pertaining to nose and malar bone, as the nasomalar angle.

Nasomaxillary, na-zo-maks'il-la-re (*nasus, maxilla*). Relating to nasal and superior maxillary bones, as the nasomaxillary suture.

Naso-occipital, na'zo-ok-sip'it-al. Relating to nose and occiput.

Naso-ocular, na'zo-ok'u-lar. Relating to nose and eye.

Nasopalatine, na-zo-pal'a-teen. Belonging to the nose and velum palati. **N. ar'tery,** branch given off by sphenopalatine artery and going to septum of nose. **N. gan'glion** is situate in the foramen palatinum anterius. Its greater extremity receives the two nasopalatine branches, while the smaller gives off two or three filaments, which reach the palatine vault, where they ramify on the membrane of the same name, anastomosing with filaments of the great palatine nerve. **N. groove,** sulcus nasopalatinus on the vomer, which conducts the nasopalatine nerve. **N. nerve,** *Nerve of Cotunnius,* is furnished by the sphenopalatine, which proceeds from the ganglion of Meckel, traverses the vault of the nasal fossæ, and proceeds upon the septum between the two layers of the pituitary membrane. It enters the anterior palatine canal, and terminates at the superior angle of the nasopalatine ganglion, without attaining the mouth.

Nasopalpebral, na-zo-pal'pe-bral. Relating to nose and eyelids.

Nasopharyngeal, na-zo-far-in-je'al. Relating to the nose and pharynx, as nasopharyngeal polypus.

Nasopharynx, na-zo-far'inks. Posterior nasal cavity.

Nasoseptitis, naz-o-sep-te'tis. Inflammation of septum of nose.

Nasosubna'sal line. Distance from nasion to subnasal point.

Nasotransversa'lis. Transversalis nasi muscle.

Nasoturbinal, na-zo-tur'bin-al. Relating to nose and turbinated bones.

Nasta, nas'tah. Nata.

Nasturtium amphibium, nas-tur'she-um am-fib'e-um (*nasus, torqueo,* to twist, owing to the effect of its pungency). See *Sisymbrium.* **N. aquat'icum,** Cardamine pratensis, Sisymbrium nasturtium. **N. bur'sa pasto'ris,** Thlaspi bursa. **N. Hispan'icum,** Tropæolum majus. **N. Horten'se,** Lepidium sativum. **N. In'dicum,** Tropæolum majus. **N. In'dicum mi'nus,** Tropæolum minus. **N. lacus'tre,** Armoracia Americana. **N. officina'le,** Sisymbrium nasturtium. **N. palus'tre,** see *Sisymbrium.* **N. Peruvia'num,** Tropæolum majus. **N. praten'se,** Cardamine pratensis. **N. sati'vum,** Lepidium sativum. **N. silves'tre,** Sisymbrium sophia. **N. supi'num,** Nasturtium officinale.

Nasum dilatans, na'zum dil-at'ans (dilating the nose). Pyramidalis nasi.

Na'sus. *Nose.* The nose is a pyramidal eminence, situate above the anterior apertures of the nasal fossæ, which it covers, and occupying the middle and upper part of the face, between the forehead and upper lip, the orbits and the cheeks. Its lateral surfaces form, by uniting angularly, a more or less prominent line, called *Dorsum* or *Rhachis* or *Spina nasi.* This line terminates anteriorly by the lobe—*Lobulus.* The sides are called *Alæ nasi, Pinnæ naris.* The columna is the inferior part of the partition. Its apex or tip has been called *Globulus nasi.* The portion of the nose formed of bone is the nasus osseus; that of cartilage, the nasus cartilagineus. The chief varieties of the nose are the aquiline, the flat nose, and the snub nose. The nose is formed, besides its bones, of fibrocartilage, cartilage, muscles, vessels, and nerves, and its use seems to be to direct odors to the upper part of the nasal fossæ. **N. cartilagin'eus,** see *Nasus.* **N. exter'nus,** that part of

the nose consisting of osseous, cartilaginous, muscular, and cutaneous tissues. **N. inter'nus,** nares. **N. os'seus,** see *Nasus.*

Nasutus (nas-u'tus) or **Nasute,** nas'ute. Naso.

Nata, nat'tah. Fleshy indolent excrescence having the shape of the nates.

Natal' ar'row root. Arrow root obtained from East India. **N. boil** or **sore,** variety of painful ulcer occurring in South Africa, situate on the hands, feet, or legs.

Natality, na-tal'it-e. Ratio of number of births in a certain time to total number of population; birth-rate.

Nataloin, na-tal'oin. Bitter principle of Natal aloes.

Natant, na'tant (*nato,* to swim). Floating or swimming on the surface of a liquid.

Nataron, nat'ar-on. Natron.

Natation, na-ta'shun (*nato, natatum,* to swim). Swimming. Action of swimming or of supporting one's self or moving upon the water. Swimming resembles the horizontal leap in its physiology—the medium being water instead of air. The difference between the specific gravity of the human body and that of water is not great, so that but little exertion is required to keep a part of the body above water.

Na'tes (sing. **Natis,** buttock). *Breech, Buttocks.* Two round projections at the inferior and posterior part of the trunk, on which we sit; the seat. Among the mammalia man alone has the nates prominent and round. They are formed chiefly by the skin and a thick layer of areolar tissue, covering the three glutæi muscles. The cleft between the nates is the rima clunium. **N. cer'ebri,** quadrigemina corpora. **N. and tes'tes,** quadrigemina corpora.

Natiform, nat'e-form. Having shape of buttocks.

Na'tis. See *Nates.*

Native albumins, na'tive al-bu'mins. Animal proteids existing in animal solids and fluids; soluble in water, not precipitated by alkaline carbonates or very dilute acids. Serum and egg albumin constitute the chief varieties of native albumins.

Nativism, na'tiv-izm. Theory of innate ideas; the doctrine that knowledge is not entirely dependent on sensation, but that the mind has innate power of thought and perception.

Nativistic, na-tiv-is'tik. Pertaining to nativism.

Natricofer'ricus. Containing sodium and iron.

Natricus, nat'rik-us. Containing sodium.

Natrium, nat're-um (*Natron,* lake in Judæa). Saline compound, very abundant in Egypt, almost wholly formed of subcarbonate of soda. Natron. Sodium. **N. ace'ticum,** sodic acetate. **N. arsenic'icum,** arseniate of sodium. **N. biborac'icum,** borax. **N. caus'ticum,** sodium hydroxide. **N. chlora'tum liq'uidum,** liquor sodæ chlorinatæ. **N. glacia'le,** selenite. **N. hypochloro'sum solu'tum,** solution of chlorinated soda. **N. muriat'icum,** soda, muriate of. **N. muria'tum,** soda, muriate of. **N. ni'tricum,** soda, nitrate of. **N. oxymuriat'icum,** sodium chloride. **N. oxyphosphoro'des,** sodium phosphate. **N. præpara'tum,** soda, subcarbonatæ of. **N. spi'ricum,** sodium salicylate. **N. subborac'icum,** borax. **N. subsulphuro'sum,** sodium thiosulphate. **N. sulphu'ricum,** sodium sulphate. **N. tartariza'tum,** sodium tartrate. **N. vitriola'tum,** sodium sulphate.

Natrix, nat'riks (water serpent). Penis.

Natrocrenæ, nat-ro-kren'e (*natron, krene,* well). Natropegæ.

Natrokali, nat-rok'al-e. Compound containing sodium and potassium.

Natronatus, nat-ron-at'us. Containing soda.

Natronium, nat-ro'ne-um. Sodium.

Natropegæ, nat-ro-pa'ge (*natron, pege,* spring). Soda springs.

Natta, nat'tah. Nata.

Natulæ, nat'u-le (dim. of **Nates**). Quadrigemina tubercula.

Natura, nat-u'rah (*nascor, natus,* to be born or arise). Nature. Also the genital organs. **N. mor'bi,** essence or condition of a disease.

Nat'ural. According to order; an idiot. **N. order,** an order belonging to a natural system of classification of animals and plants. **N. parts,** genital organs. **N. philos'ophy,** physics.

Nat'uralism. Naturism.

Naturalized, nat'u-ral-ized. Growing in but not a native of a country, as plants. The term *naturalization* is thus applied.

Naturism, na'tu-rizm. *Naturalism.* View attributing everything to nature as a sage, prescient, and sanative entity. See *Expectation* and *Vis medicatrix naturæ.*

Naturist, na'tu-rist. Physician who scrupulously investigates, interprets, and follows the indications presented by nature in the treatment of disease.

Na'tus mor'tuus. Stillborn.

Nauclea (nau'kle-ah) **gam'bir** (*naus,* ship, *kleio,* to enclose, the half capsule being hull-shaped). Plant, ord. Rubiaceæ, native of the Malayan Peninsula and Indian Archipelago; it yields large quantities of catechu, known by the names *Terra Japonica* and *Square catechu,* and which in Indian commerce is called *gambier* or *gambir.* Powerful astringent, much used in tanning and in medicine. See *Catechu.*

Naucleic acid, nau-kle'ik as'id. Catechin.

Naupathia, nau-path-e'a (*naus,* ship, *pathos,* affection). Sea-sickness; nausea marina.

Nausea, nau'she-ah (*naus,* a ship, because those unaccustomed to sailing are so affected). Sickness at the stomach; inclination to vomit. **N. gravida'rum,** nausea caused by pregnancy. **N., kreat'ic,** sickness and vomiting excited, in some nervous patients, by the smallest portion of animal food. **N. mari'na** or **nava'lis,** sea-sickness; sickness, vomiting, etc. experienced at sea by those unaccustomed to sea-life, and from which those who are accustomed are not always exempt. It generally ceases when the person becomes habituated to the motion of the vessel, and not till then.

Nauseabundus, nau-she-ab-un'dus (*nausea*). Nauseant.

Nauseant, nau'she-ant. Agent exciting nausea, which is a state of diminished action; nauseants are, hence, valuable remedies in diseases of excitement.

Nauseating, naw'she-a-ting. Exciting nausea.

Nauseous, naw'she-us. Nauseating; affected with nausea.

Nausia, nau'she-ah. Nausea.

Nausiasis, nau-she'as-is. Nausea.

Nausiosis, nau-she-o'sis (*nausia, osis*). This word, besides being synonymous with nausea, has been used to express the state of venous hemorrhage when blood is discharged by jets.

Nautia, nau'she-ah. Nausea.

Nauticus, nau'te-kus (*nautes,* sailor, *naus,* ship). See *Tibialis anticus.*

Nautomania, nawt-o-man'e-ah (*naus,* ship, *mania*). Mania characterized by a destructive and homicidal tendency, observed to occur in particular among seafaring men.

Na'vel. Umbilicus. **N. ill,** inflammation of the navel, septic in character, occurring among infants. **N., rup'ture of,** exomphalos. **N. string,** funiculus umbilicalis. **N., vas'cular,** condition characterized by a cicatrix in the middle of the navel, occurring sometimes after the cord has entirely fallen off. **N. wort,** Cotyledon umbilicus. **N. wort, Venus's,** Cotyledon umbilicus.

Navew, nav'u. Brassica campestris.

Navicula, nav-ik'u-lah (dim. of **Navis,** a ship). Fourchette.

Navicular, nav-ik'u-lar (*navicula,* little ship). Boat-shaped. **N. bone,** scaphoid bone. **N. fos'sa,** see *Scaphoid.* This name has been given, 1, to a small depression between the entrance of the vagina and the posterior commissure of the labia major or fourchette; 2, to a perceptible dilatation presented by the urethra in man near the base of the glans; 3, to the superficial depression separating the two roots of the helix.

Naviculare (nav-ik-u-lar'e) **os.** Scaphoid bone.

Navicularthritis, na-vik-u-lar-thre'tis (*naviculare os, arthron,* joint, *itis*). Inflammatory disease of the navicular joint of domestic animals.

Naviculo-cuboid articulation, na-vik'u-lo-ku'boid ar-tik-u-la'shun. Joint occasionally existing between scaphoid and cuboid bones. **N.-c. ligaments,** bands of ligament between scaphoid and cuboid bones of the foot.

Naviculo-cuneiform articulation, na-vik'u-lo-ku'-ne-e-form ar-tik-u-la'shun. Joint situate between the scaphoid and three cuneiform bones of the foot.

Naviform, na've-form (*navis,* a ship, *forma,* form). Navicular.

Navis (a ship). Vulva.

Near-point. See *Point.*

Nearsight'ed. Myopic.

Nearsight'edness. Myopia.

Nearthrosis, ne-ar-thro'sis (*neos,* young or new, *arthron,* a joint). New joint.

Neat's-foot oil. Oil made from the feet of neat cattle by boiling.

Neb'le. Nipple.

Nebula, neb'u-lah (*nephele,* a cloud). Slight speck or opacity of the cornea; called leucoma when still more cloudy. Mist or cloud suspended in the urine. See *Caligo;* also *Leucoma.*

Nebulization, neb-u-li-za'shun. See *Pulverization.*

Nebulized, neb'u-lized (*nebula,* a cloud or mist). Made nebulous or cloudy, as a nebulized liquid. See *Pulverization.*

Nebulizer, neb'u-li-zer. See *Pulverization.* **N., Eustach'ian,** apparatus for spraying the Eustachian tube.

Nebulous (neb'u-lus) or **Neb'ulose.** Cloudy.

Necessary, nes'es-sa-re (*ne, cesso,* to cease). *Necessaries of life, Vitæ necessitates,* include everything requisite for the maintenance of life, and particularly food.

Neck. Collum. **N., anatom'ical, of hu'merus,** see *Collum humeris.* **N. of blad'der,** see *Collum vesicæ.* **N. of calca'neum,** constricted part of calcaneum anterior to the tuberosity. **N., Der'byshire,** bronchocele. **N. of fe'mur,** collum femoris. **N. of fib'ula,** cervix fibulæ; that part of the fibula situate below the head. **N. of the foot,** instep. **N. of the gall-blad'der,** the superior constricted part. **N. of a hair-fol'licle,** narrowest part of a hair opposite opening of sebaceous gland. **N. of hu'merus,** collum humeri; see *Humerus.* **N. of low'er jaw,** that part or portion of the inferior maxillary bone situate immediately below the condyle. **N. of mal'leus,** narrow part below its head. **N., Nithsdale,** goitre. **N. of rib,** see *Collum costæ.* **N. of scapula,** collum scapulæ. **N. of sta'pes,** narrow part of stapes where it divides into crura. **N., stiff,** torticollis. **N., sur'gical, of hu'merus,** narrow part immediately below the tuberosities; name given to it because fractures of the humerus are apt to occur there. **N., swelled,** bronchocele. **N. of tooth,** cervix dentis. **N. of urinif'erous tu'bule,** that part of uriniferous tubule situate between capsule of Bowman and convoluted tubule. **N. of u'terus,** cervix uteri. **N., wry,** torticollis.

Necklace, anodyne, nek'las, an'o-dine. Formed of the roots of hyoscyamus, Job's tears, allspice steeped in brandy, or the seeds of the wild licorice vine, to suit the fancy of the prescriber. **N., pop'lar,** Populus monilifera, cotton-wood; bark is tonic, stomachic, and febrifuge.

Neck'weed. Veronica beccabunga, V. peregrina.

Necræ'mia (*necros, haima,* blood). Death of the blood; death beginning with the blood.

Necrencephalus, nek-ren-sef'al-us (*necros, enkephalos,* encephalon). Mollities cerebri.

Necrobiosis, nek-ro-be-o'sis (*necros, bios,* life). Name given by Virchow to degeneration occurring near the close of the life of any part of the organism; a spontaneous dying out of a living part; a natural death, therefore not a violent one. See *Degeneration.*

Necrobiotic, nek-ro-be-ot'ik. Relating or appertaining to necrobiosis or morbid metamorphosis.

Necrocedia, nek-ro-sa'de-ah (*necros, kedos,* funereal attentions). Embalming.

Necrocomium, nek-ro-ko'me-um (*necros, komeo,* to care for). Morgue.

Necrodes, nek-ro'dees (*necros, odes*). Cadaverous.

Necrodochium, nek-ro-do-ke'um (*necros, dechomai,* to receive). Morgue.

Necrogenous, nek-roj'en-us (*nekros,* dead body, *gennao,* to engender). Existing or living in dead matter.

Necrology (nek-rol'o-je), **bills of** (*necros, logos,* description). Mortality, bills of. Reference to or account of death.

Necromancy, nek'ro-man-se (*necros, manteia,* divination). Divination by the dead; conjuration; the black art, *Nigromantia, Negromantia* (*niger,* black, *manteia,* divination).

Necromania, nek-ro-man'e-ah. Insane desire in which a longing for death or desire to mutilate a dead body exists.

Necromantia, nek-ro-man'she-ah. Necromancy.

Necrometer, nek-rom'et-ur (*necros, metron,* measure). Apparatus for determining weight, volume, and specific gravity of parts of the body at post-mortem examinations.

Necromime'sis (*necros, mimesis,* imitation). Delusion in which a person imagines himself to be dead.

Necronarcema, nek-ro-nar-sa'mah (*necros, narkema,* stiffness). Rigor mortis.

Necronium, nek-ron'e-um. Substance originating in cadavers during process of saponification.

Necropathy, nek-rop'ath-e. Pathological condition in which a tendency to necrosis of the bones exists.

Necrophagous, nek-rof'a-gus (*nekros,* dead body, *phago,* to eat). Eating or feeding on carrion.

Nec'rophile. One affected with necrophilism.

Necrophilism (nek-rof'il-ism) or **Necrophilia,** nek-ro-fil'e-ah (*nekros,* corpse, *phileo,* to love). Insane desire for sexual intercourse with a corpse.

Necrophobia, nek-ro-fo'be-ah (*necros, phobos,* fear). Exaggerated fear of death. It occurs in patients in whom the disease is not mortal, as in hypochondriasis. In fevers it is a bad symptom.

Necropneumonia, nek-ro-nu-mo'ne-ah (*necros, pneumonia*). Gangrenous inflammation of the lungs. This may be diffused or circumscribed. The only pathognomonic symptom is the extraordinary and repulsive odor of the breath and expectoration.

Necropsia, nek-rop'se-ah (*necros, opsis,* seeing). Post-mortem examination.

Necropsy, nek'rop-se. Post-mortem examination.

Necros, nek'ros. Corpse.

Necroscopia, nek-ro-skop'e-ah (*necros, skopeo,* to examine). Post-mortem examination.

Necroscopic, nek-ro-skop'ik (*necros, skopeo,* to view). Relating to necroscopy or examination after death.

Necroscopy, nek-ros'ko-pe. Post-mortem examination.

Necrosed, nek-rozed'. Affected with necrosis.

Necrosemeiotic, nek-ro-sem-e-ot'ik. Relating to the doctrine of the signs of death.

Necrosemeiotice, nek-ro-se-me-ot'is-e (*necros, semeion,* sign). Doctrine of the signs of death.

Necrosial, nek-ro'se-al. Necrotic; relating or appertaining to death or mortification, or to necrosis, as necrosial fever, fever that accompanies necrosis.

Necrosis, nek-ro'sis (*nekroo,* to kill). Death; mortification; especially the state of a bone or of a portion of a bone deprived of life; hence *necrosed.* Necrosis may take place without the surrounding soft parts being affected with gangrene. It is to the bones what gangrene is to the soft parts: the part of the bone affected with necrosis becomes a foreign body, similar to the gangrenous eschar, and its separation must be accomplished by the efforts of nature or by art. When necrosis occurs in the centre of long bones, it never extends to their articular extremities. The exterior layers of bone form a canal around the dead portion or *sequestrum;* between these swollen layers and the sequestrum suppuration takes place; the matter presses against the bony canal, perforates

it, and is discharged by apertures which become fistulous. In the treatment the exit of the sequestrum must be facilitated by proper incisions, by the application of the trephine to the bone, etc. **N., anæmic,** necrosis caused by deficient blood-supply. **N., ca'seous,** caseation. **N. cerea'lis,** ergotism. **N., cir'culatory,** necrosis, anæmic. **N., coag'ulative,** when the cells of a tissue die from atrophy, fibrin may be precipitated, and the part become indurated and swollen. **N., decu'bital,** bed-sores. **N. den'tium,** dental gangrene. **N. dissemina'ta,** necrosis in which a bone is involved in its whole thickness. **N., embol'ic,** necrosis due to embolism. **N. infanti'lis,** stomatitis, gangrenous. **N., jaw, exanthem'atous,** see *Jaw.* **N. maxil'læ ex phos'phoro,** see *Phosphorus.* **N., mercu'rial,** necrosis due to effects of mercury. **N., moist,** *Mephitic gangrene;* necrosis of the cancellated structure of bone especially, which becomes moist and softened, with an offensive odor. It involves the whole thickness of the bone, and is met with in compound fractures, gunshot contusions, etc. **N., phos'phorus,** see *Phosphorus.* **N. of teeth,** caries dentium. **N. ustilagin'ea,** ergotism.

Necrosozoic (nek-ro-so'zo-ik) or **Nekrosozoic,** nek-ro-so'zo-ik (*necros, sozo,* to preserve). Fluids have been so called which are injected into dead bodies in order to preserve them, as in embalming.

Necrosteon, nek-rost'e-on. Necrosis of bone.

Necrostoa, nek-ros'to-ah (*necros, stoa,* gallery). Morgue.

Necrotic, nek-rot'ik. Necrosial.

Necrotocion, nek-ro-to'se-on (*necros, tokos,* child). Dead or stillborn child.

Necrotomic, nek-ro-tom'ik. Relating to necrotomy.

Necrotomy, nek-rot'o-me (*necros, tome,* section). Dissection.

Nectandra, nek-tan'drah. See *Bebeeru.* **N. cinnamomoï'des,** order Lauraceæ; native of New Granada, where it is called *Canela;* has the odor and taste of cinnamon, and is used as such. **N. cymba'rum,** *Ocotea cymbarum* or *amara,* grows in Oronko, where it is called *Sassafras;* bark is aromatic, bitter, and stomachic, and is thought to be an ingredient in the curare poison. **N. mol'lis,** species of Brazil; bark has diuretic, emmenagogue, and carminative properties. **N. puchu'ry,** see *Pichurim beans.* **N. Rodie'i,** see *Bebeeru.*

Nectan'dræ cor'tex. Nectandra; Bebeeru bark; dried bark of Nectandra rodiæi.

Nectandria, nek-tan'dre-ah. See *Bebeeru.*

Nectandrine, nek-tan'dreen. Alkaloid derived from wood of Nectandra rodiæi.

Nectar, nek'tar (*ne,* particle of negation, *ktao,* to kill). Pleasant liquor, feigned by the poets to have been the drink of the gods and to have rendered immortal those who partook of it; name given by the ancients to many drinks, and particularly to one made with wine, evaporated and sweetened with honey.

Nectarine, nek'tar-een. Amygdalus Persica lævis, variety of peach.

Nectarium, nek-tar'e-um. Inula helenium.

Necusia, nek-u'ze-ah (*necus,* corpse). See *Wound.*

Necusine, nek'u-sin (*necus,* corpse). Term proposed by Dr. Wm. Farr for the specific zymotic principle by which infection of the system takes place from a dissecting wound.

Necyomantia, nes-e-o-man-te'ah (*nekus,* dead body, *manteia,* divination). Necromancy.

Nedyia, ne-de'e-ah. Intestines.

Ned'ys. Belly, abdomen, stomach; uterus.

Nedyusa, ned-e-u'sah. Aggravated thirst.

Nee'dle (Teut. *neten,* to sew). Steel instrument used in many professions. In *Surgery* a steel, gold, silver, or platinum instrument, round, flat, or triangular, straight or curved, supported or not by a handle, but having almost always a point, by means of which it can penetrate the textures, and, either near the point or, more commonly, near the other extremity, an aperture or eye for the reception of a thread or tape, which it introduces into the parts. **N., ac'upuncture,** inflexible gold or silver needle, conical, very delicate, four inches long, furnished with a handle, and at times with a canula shorter than it by about half an inch; an ordinary needle, waxed at the head, will answer as a substitute for this; see *Acupuncture.* **N., an'eurism,** needle attached to a handle, of such a shape as will allow a ligature to be passed around a vessel, as in aneurism. **N., cat'aract,** needles of gold, silver, and steel have been used, the latter alone at the present day; the cataract needle is employed to depress or tear the crystalline when opaque. This needle is usually made from 15 to 24 lines long, and is attached to a fine handle; the extremity may be, as in Scarpa's and Langenbeck's, pointed, prismatic, triangular, and curved; in Dupuytren's and Walther's, flat, curved, and sharp-edged; in Hey's, flat, with a semicircular and sharp end; or, as in Beer's, Siebold's, Schmidt's, Himly's, Von Grafe's, etc., straight and spear-pointed. A mark is generally placed upon the handle to inform the operator, when the instrument is engaged in the eye, what side corresponds to the crystalline. **N. for a coun'ter-o'pening,** long, narrow instrument of steel, the point of which is fine and sharp on both sides, the heel having an aperture to receive a thread, tape, etc., provided with a flat silver sheath, shorter than the blade, the point of which it covers when passing through parts that have to be respected. **N., Deschamps',** *Paupe's needle;* the eye is placed near the point. It is employed in the ligature of deep-seated arteries. **N., discis'sion,** needle employed in operating on the eye; it is inserted through the cornea and is used to break the lens-capsule and substance; see *N., stop-discission.* **N., explor'ing,** needle grooved at its extremity, which, when passed into a tumor, abscess, etc., brings away a few drops of the fluid contents, and thus facilitates the diagnosis. **N., extrac'tion,** see *Cataract extraction.* **N., fis'tula,** a long, flat, flexible silver instrument having an aperture near one extremity, blunt at the other; formerly used for passing a seton into fistulous ulcers. On one of its sides is a groove for guiding a bistoury in case of necessity. Also a long steel instrument, terminated by a point like that of a trocar, which Desault employed for penetrating the rectum when operating for fistula that had no internal aperture. **N., Gru'ber's curved paracente'sis,** needle employed in division of tendon of tensor tympani. **N., Hag'edorn's,** needle provided with curved edge and sharp side on convex surface. **N., hare'-lip,** a small silver canula to which is attached a spear-point that can be readily withdrawn. This needle, armed with the point, is introduced at one side of the fissure in the lip and through the other. The twisted suture is then applied and the pin withdrawn. **N., Hays',** needle used in operating for scleronyxis. **N., Hutch'inson's,** needle provided with a handle and an eye, employed in ligating hemorrhoids subcutaneously. **N., hypoderm'ic,** needle with a canal extending through its entire length, and so arranged as to be attachable to a hypodermic syringe. **N., Ja'cob's cat'aract,** needle provided with a curved point, employed in operations for cataract. **N., lig'ature,** a long steel instrument, sharp toward one extremity, with an eye near the other, which was formerly used for suspending the circulation of blood prior to amputation, by being passed through the limb so as to include the principal artery and a part of the muscles and integuments. Also a steel instrument of various dimensions, round toward one of its extremities. At the commencement of the last century it was used to pass ligatures around vessels. Also a steel instrument of various dimensions, flat, regularly curved in the form of a semicircle, with a sharp or lance point and a long eye, used with advantage in place of the last. **N., næ'vus,** needle with sharp point which is heated and introduced into nævi. **N., paracente'sis,** needle used in paracentesis. **N., Paupe's,** needle, Deschamps'. **N., se'ton,** a long, narrow steel blade, pointed and sharp at one extremity, pierced at the other by

an aperture. **N., stop-discis'sion,** needle provided with a shoulder to prevent it being carried too far. **N., su'ture,** for the twisted suture the hare-lip needle is used; for the others the straight or curved needle; the straight needle is preferable for stitching up the abdomen, etc. in dissection. In suturing tendons a curved needle has been used, flat on both sides and cutting only at the concave edge, in order that it may pass between the tendinous fibres without dividing them.

Nee'dle-bear'er, Needle-car'rier, Needle-hold'er. Instrument of steel or silver for accurately laying hold of a needle and giving it greater length, so that it may be readily introduced into the tissues, when it is so fine and small that it cannot be firmly held by the fingers.

Nee'dles and pins. See *Pins.*

Need'ling. Use of needle for discission in cataract.

Neef's hammer. Contrivance which works automatically, intended to regulate the current in a magneto-induction apparatus.

Neel'sen's meth'od. Method of staining tubercle bacilli with hot solution of fuchsin, and then treating with watery solution of sulphuric acid for the purpose of decolorizing. **N.'s solu'tion,** solution for staining in microscopic examinations of micro-organisms; composed of fuchsin, 1 grm.; alcohol absolutus, 10 cc., 5 per cent. sol.; acidi carbolici, 100 cc.

Neem. See *Melia azedarach.*

Neeria, nee're-ah. Dracunculus.

Nefrendes, nef-ren'dees (pl. of **Nefrens**). Properly, sucking pigs. Persons devoid of teeth; young children, for instance, who have not cut them, or aged persons who have lost them. This state is called *Nefrendis, Odontia edentula.*

Neg'ative eye-piece. See *Eye-piece.* **N. pole,** see *Pole.*

Negotium parturitionis, ne-go'she-um par-tu-rish-e-o'nis (affair of parturition). Parturition.

Negretia (neg-re'she-ah) **cachex'ia.** Chthonophagia. **N. pruriens,** dolichos pruriens.

Negro, ne'gro (S. and F. *negro;* [L.] *niger,* black). One of the Æthiopian race. See *Homo* and *Mulatto.* **N. cachex'y,** pica, or depraved appetite. **N. lethargy. N. leth'argy,** nelavan. Disease among negroes in Africa, in which the symptoms are headache, somnolence, and loss of flesh; generally terminates fatally. **N. mouth,** peculiar appearance of the mouth, dependent on projection of the canine and incisor teeth. **N., pied,** see *Achroma.* **N. vine,** Gonolobus hirsutus; root has cathartic and the juice narcotic properties; poisonous.

Negromantia, ne-gro-man'she-ah (*niger,* black, *manteia,* divination). See *Necromancy.*

Neiæ'ra. Abdomen.

Neir'a. Abdomen.

Neis. Nasus.

Neisseria, neis-se're-ah. Genus of Schizomycetes. **N. al'bicans,** species in vaginal secretions, like diplococci. **N. cit'rea,** in gonorrhœal pus and in dust of the air. **N. conglomerat'a,** on endocardial vegetations. **N. decip'iens,** in atmospheric air. **N. Edingto'nii,** in blood and scales of scarlet fever. **N. gonorrhœ'æ,** micrococcus gonorrhœæ or gonococcus. **N. lac'tea,** in vaginal and uterine secretions, etc. **N. lys'sæ,** micrococcus in various organs in rabies. **N. Michel'i,** in Egyptian conjunctivitis. **N. petechial'is,** in typhus fever. **N. rosa'cea,** species of micrococcus in the air. **N. ro'sea,** similar habitat. **N. subfla'va,** in urine of vesical catarrh, the lochial discharge, discharges of simple vaginitis, etc. **N. tardis'sima,** in urethral pus. **N. Weichselbaum'ii,** in effusion attending cerebrospinal meningitis. **N. Wink'leri,** in beriberi.

Neis'ser's gonococ'cus. See *Micrococcus gonorrhœæ.*

Nekroso'zoic. Necrosozoic.

Nélaton's (nel'a-ton's) **fi'bres.** Muscular fibres of the rectum, circular in shape. **N.'s gas caut'ery,** see *Cautery.* **N.'s line,** line drawn from anterior superior spinal process of ilium to tuber ischii. **N.'s meth'od,** method employed in which the patient's head is held downward when the tendency to failure of respiration or of the heart, as the result of anæsthesia, threatens life. **N.'s opera'tion,** enterotomy. **N.'s probe,** sound, porcelain.

Nel'avan. See *Negro lethargy.*

Nelumbium luteum, nel-um'be-um lu'te-um. *Yellow nelumbo, Yellow water-lily, Pond-lily, Water shield, Water nuts, Water chincapin, Rattle nut, Sacred bean.* Water plant common in the United States, and belonging to ord. Nymphaceæ; leaves are cooling and emollient when applied to the surface; the roots, leaves, and nuts are eaten. The last are called by the Indians and others *Water chincapins.*

Nelum'bo, yel'low. Nelumbium luteum.

Nematachom'eter (*nema,* thread, *tachos,* rapidity, *metron,* measure). Instrument for measuring the rapidity of nervous impulses.

Nematelmia, nem-at-el'me-ah (*nema,* thread, *helmins,* worm). Nematelmintha.

Nematelmintha, nem-at-el-min'thah (*nema,* thread, *helmins,* worm). Class of nematoid or round thread-worms embracing numerous varieties, as the ascaris lumbricoïdes, trichina spiralis, trichinocephalus dispar, etc. See *Parasites.*

Nematelminthes, nem-at-el-min'thees. Nematelmintha.

Nematoblast, ne'ma-to-blast (*nema,* thread, *blastos,* germ). Spermatoblast.

Nematoid (ne'ma-toid) **worms** (*nema,* thread, *eidos,* resemblance). Nematelmintha.

Nematoidea, nem-at-oid'e-ah. Nematelmintha.

Nematoïdeum, nem-at-o-id'e-um. See *Pentastoma.*

Nemomena, nem-om'en-ah. Corroding ulcers.

Nen'do. Angelica lucida.

Nen'uphar. Nymphæa alba. **N. lu'tea,** Nymphæa lutea.

Ne'o (*neos,* new). In composition, new.

Neoarthrosis, ne-o-ar-thro'sis (*neo, arthron,* joint). New joint; artificial joint.

Neoblast, ne'o-blast. Parablast.

Neoblastic, ne-o-blas'tik (*neos,* new, *blastos,* germ). Possessing the character of a new growth. **N., inflam'matory fun'goid,** mycosis fungoides.

Neochmosis, ne-ok-mo'sis. Relapse (said of a disease).

Neogala, ne-og'al-ah (*neo, gala,* milk). Milk secreted immediately after the colostrum. Also the colostrum.

Neogenes, ne-oj'en-ees (*neo, geno,* to be born). Newly born.

Neogilus (ne-oj'il-us), **Neognus** (ne-og'nus), or **Neogonus,** ne-og'o-nus. Newly born.

Neolepra, ne-o-lep'rah (lepra). Pellagra.

Neomembrane, ne-o-mem'brane. See *Membrane, false.*

Neomorph, ne'o-morf (*neos,* new, *morphe,* shape). A new formation of an organ.

Neomorphism, ne-o-mor'fizm (*neos,* new, *morphe*). Development of a new form.

Neonatus, ne-o-nat'us (*neo, natus,* born). Newly born.

Neoplasia, ne-o-plaz'e-ah (*neo, plasso,* to form). Formation of neoplasms or new growths.

Neoplasm, ne'o-plazm (*neo, plasso, platto,* to form). New formation or tissue, the product of morbid action. Neoplasms may be classified as follows, based on the derivation of the different organs or tissues (Gibbes), which is one of the most satisfactory methods of arranging them:

CLASSIFICATION OF NEOPLASMS.

Mesoblastic or Connective-tissue growths:

Fibromata.	Myomata.
Myxomata.	Angiomata.
Lipomata.	Neuromata.
Chondromata.	Sarcomata.
Osteomata.	

Epiblastic and Hypoblastic growths:

Papillomata.	Carcinomata.
Adenomata.	

According to Virchow, the connective tissue and its

equivalents are the general source of development of new growths, which arise either from simple division or from endogenous changes set up in the interior of pre-existing cells. See *Tumors*.

Neoplastic, ne-o-plas'tik (same etymon). Belonging or relating to neoplasms or new growths, or to neoplasty. See *Neoplasty*.

Neoplastice, ne-o-plas'tis-e. Neoplasty.

Neoplasty, ne'o-plas-te. General term denoting an operative process for the formation of new parts, including autoplasty, cicatrization of wounds, and the formation of adhesions.

Neoscytechus, ne-o-skit'ek-us (*neo, skutos,* leather, *echos,* sound). See *Craquement de cuir neuf*.

Neosot, ne'o-sot. Product derived from furnacetar. Antiseptic and disinfectant.

Neoteric, ne-o-ter'ik (*neoterikos,* youthful). Relating to youth.

Neotocerysipelas, ne-o-tos-er-e-sip'el-as (*neo, tokos,* birth, *erusipelas*). Erysipelas occurring in infants soon after birth.

Neotocerythriasis, ne-o-tos-er-e-thre'as-is. Erythrosis occurring in infants, especially soon after birth.

Neotocicterus, ne-o-to-sik'ter-us (*neo, tokos,* one born, *icterus*). Icterus infantum. Jaundice occurring soon after birth.

Neotocogalactoze'mia (*neos,* new, *tokos,* birth, *gala,* milk, *zemia,* loss). Condition in which milky fluid exists in the breast of a new-born child.

Neotocophthalmia, ne-o-to-kof-thal'me-ah (*neos,* new, *ophthalmos,* eye, *tokos,* birth). Conjunctivitis in a new-born child, generally described as congenital conjunctivitis.

Neottia, ne-ot'te-ah (nest, from the arrangement of the roots). Goodyera pubescens.

Nep. Nepeta.

Nepaline, nep'al-een. Pseudo-aconite.

Ne'paul ac'onite. See *Aconite*. **N. tumor,** pendulous tumor from the external ear, the contents of which is a thick whitish fluid; it is met with in Nepaul especially.

Nepentha destillatoria, nep-en'thah des-til-lat-o'-re-ah. Ceylonese plant, the root of which is astringent.

Nepenthe, nep-en'the (*ne,* neg., *penthos,* grief). Remedy much extolled by the ancients against sadness and melancholy. The women of Thebes, according to Diodorus Siceliotes, alone possessed the secret of its composition; and, according to Homer, Helen introduced it from Egypt. Some suppose it to have been opium. Cannabis Indica. **N. opia'tum,** pilulæ opiatæ.

Nepeta, nep'e-tah (*Nepete,* a town in Italy). *Nep, Catnep, Catmint,* ord. Labiatæ. The leaves, *Cataria,* have a smell and taste like those of an admixture of spearmint and pennyroyal. It has been recommended in uterine disorders, dyspepsia, flatulency, etc., like pennyroyal, and is much used in domestic medicine, in flatulence, etc. of children. **N. agres'tis,** Melissa nepeta. **N. glecho'ma,** Glechoma hederacea. **N. vulga'ris,** nepeta.

Nephablep'sia (*nephos,* cloud, *blepo,* to see). Snowblindness.

Nephaliotes, nef-al-e'o-tees (*nepho,* to abstain). Temperance.

Nephalism, nef'al-izm. Temperance.

Nephele, nef'el-e (*nephos,* cloud). Enæorema; nebula; leucoma.

Nephelion, nef-el'e-on (*nephele,* little cloud). Nebula.

Nephelium (nef-el'e-um). Kambutan tree; grows in China and Asia; fruit is edible and is employed in fevers. Nebula.

Nepheloid, nef'e-loid (*nephele,* cloud, *eidos,* resemblance). Nebulous; cloudy. Epithet applied to urine when it is cloudy.

Nephelopia, nef-el-o'pe-ah (*nephele,* cloud, *opsis,* sight). Indistinct or cloudy sight.

Nephos, nef'os (cloud). Nebula.

Nephræmorrhagia, nef-re-mor-rhaj'e-ah (*nephros, hæmorrhagia*). Hemorrhage from the kidney. See *Hæmaturia*.

Nephralgia, nef-ral'je-ah (*nephros, algos,* pain). Pain and neuralgia in the kidney. **N. areno'sa,** see *Gravel*. **N. arthrit'ica,** lumbago of a gouty character. **N. calculo'sa,** see *Gravel*. **N. hæmorrhoïda'lis,** nephralgia due to amenorrhœa; neuralgia due to abscess of the mesentery. **N. plethor'ica,** nephralgia hæmorrhoidalis. **N. rheumat'ica,** lumbago.

Nephranuria, nef-ran-u're-ah (*nephros, a,* priv., *ouron,* urine). See *Ischuria renalis*.

Nephrapostasis, nef-rap-os'tas-is (*nephros, apostasis,* abscess). Renal abscess.

Nephrapragmonia, nef-rap-rag-mon'e-ah. Renal inactivity.

Nephrarctia, nef-rark'te-ah (*nephros, arctus,* narrow). Contracted condition of kidney.

Nephratony, nef-rat'o-ne (*nephros, atonia,* want of tone). Atony of the kidney, sometimes eventuating in renal paralysis.

Nephrauxe (nef-rauks'e) or **Nephraux'is** (*nephros, auxo,* to increase). Enlargement of the kidney.

Nephrectasia, nef-rek-taz'e-ah (*nephros, ektasis,* dilatation). Dilatation of the kidney.

Nephrectomy, nef-rek'to-me (*nephros, ektemno,* to cut out). Excision of the kidney.

Nephrelcosis, nef-rel-ko'sis (*nephros, helkosis,* ulceration). Ulceration of the kidney.

Nephrelcus, nef-rel'kus (*nephros, helkos,* ulcer). Ulcer of the kidney.

Nephrelmintic, nef-rel-min'tik (*nephros, helmins,* worm). That which is owing to the presence of worms in the kidney.

Nephremphraxis, nef-rem-fraks'is (*nephros, emphrasso,* to obstruct). Obstruction of the kidneys.

Nephretic, nef-ret'ik (*nephros*). Relating to the kidney; applied especially to pain, etc. seated in the kidney.

Nephreticum, nef-ret'ik-um. Medicine employed for the cure of kidney disease. **N. lig'num,** Guilandina moringa.

Nephreticus (nef-ret'ik-us) **la'pis.** Green fatty kind of stone once used as an amulet against calculus and epilepsy.

Nephria, nef're-ah (*nephros,* kidney). Bright's disease of the kidney.

Nephric, nef'rik. Relating to the kidney.

Nephridion, nef-rid'e-on (*nephridios,* pertaining to the kidney). Fat surrounding the kidney.

Nephridium, nef-rid'e-um. Renal capsule.

Nephridius, nef-rid'e-us. Nephretic.

Nephrine, nef'reen (*nephros*). Cystic oxide; urea.

Nephrism, nef'rizm. State in which patients are suffering from serious affections of the kidneys.

Nephrites, nef-re'tees (*nephros*). Asphaltites.

Nephritic, nef-rit'ik. Nephretic. Relating to inflammation of the kidney.

Nephritici (nef-rit'is-e) **mor'bi.** Renal diseases.

Nephriticum (nef-rit'ik-um) **lig'num.** Guilandina moringa.

Nephritidocolica, nef-rit-id-o-kol'ik-ah. Colic, renal.

Nephritis, nef-re'tis (*nephros, itis*). Inflammation of the kidney. Several varieties have been described, according to the seat of the inflammation, its progress, etc., under the names *Acute* or *Suppurative nephritis, Desquamative* and *Non-desquamative nephritis, Acute tubal nephritis, Parenchymatous nephritis, Interstitial nephritis,* or *Nephritis vera,* etc. Most of these varieties have already been referred to as different stages of acute and chronic Bright's disease. (See *Kidney, Bright's disease of the*). When the mucous membrane of the pelvis of the kidney is inflamed, the affection is called *pyelitis. Acute nephritis*—or, as it is sometimes called, from its tendency to suppuration, *suppurative nephritis*—is characterized by acute pain; burning heat and a sensation of weight in the region of one or both kidneys; suppression or diminution of urine; fever; dysuria; ischuria; constipation, more or less obstinate; retraction of the testicle, and numbness of the thigh of the same side. In *calculous nephritis—lithonephritis*—the urine often contains small particles of uric acid or of urate of ammonia. The most com-

mon causes of nephritis are excess in irritating and alcoholic drinks; abuse of diuretics; blows or falls on the region of the kidneys; the presence of renal calculi, etc. It may be distinguished from lumbago by the pain which attends the latter on the slightest motion, etc. It usually terminates by resolution in from one week to two or three; it may, however, end in suppuration, when it is called *pyonephritis;* or it may become chronic, *chronic nephritis. Lymphomatous nephritis* may occur in typhoid fever, numerous small areas being infiltrated with round cells, having the appearance of lymphomata. See *Kidney, Bright's disease of the.* Nephritis occurring in the childbed state has been called *puerperal nephritis.* Asphaltites. **N., acute diffuse',** see *Kidney, Bright's disease of the.* **N., acute exu'dative,** a form of acute Bright's disease; see *Kidney, Bright's disease of the.* **N., acute produc'tive,** form of acute Bright's disease in which there is proliferation of the stroma of the connective tissue and of the cells of the Malpighian tufts. **N. albuminen'sis,** kidney, Bright's disease of the. **N. albumino'sa,** kidney, Bright's disease of the. **N., albu'minous,** kidney, Bright's disease of the. **N., am'yloid,** amyloid degeneration of the kidneys. **N., arte'rial,** nephritis due to arterial atheroma. **N. arthrit'ica,** nephritis, gouty. **N., ascend'ing,** nephritis caused by diseased condition of the inferior urinary organs, or introduction of a catheter, or operative interference on the urethra and bladder. **N., asso'ciated,** kidney, Bright's disease of the. **N., blennorrhag'ic,** nephritis due to gonorrhœa. **N., cachec'tic,** kidney, Bright's disease of the. **N., cal'culous,** see *Nephritis.* **N. chirur'gica,** nephritis, surgical. **N., chron'ic degen'erative,** chronic Bright's disease of the kidney. **N., chron'ic diffuse' with exuda'tion,** chronic Bright's disease of the kidney. **N., chron'ic intersti'tial,** contracted or granular or gouty kidney; see *Kidney, Bright's disease of the.* **N., chron'ic parenchym'atous,** chronic Bright's disease of the kidney. **N., chron'ic tu'bal,** chronic Bright's disease of the kidney. **N., consec'utive,** inflammation of the pelvis of the kidney. **N., croup'ous,** kidney, Bright's disease of the. **N., des'quamative,** condition of Bright's disease in which epithelial cells are seen by the microscope in the urine; see *Kidney, Bright's disease of the.* **N., diffuse' hemorrhag'ic,** acute parenchymatous nephritis in which the urine contains blood-corpuscles. **N., diphtherit'ic,** parenchymatous or glomerular nephritis caused by diphtheritic micro-organisms. **N., epithe'lial,** nephritis, parenchymatous. **N., gout'y,** interstitial or parenchymatous nephritis in which deposits of sodium urate are found in the renal pyramids. **N. gravida'rum,** nephritis, puerperal. **N., hemorrhag'ic,** nephritis, acute parenchymatous. **N., in'durative,** nephritis, chronic interstitial. **N., metastat'ic,** N. associated with disease of other organs, as of the heart. **N., non-des'quamative,** see *Kidney, Bright's disease of the.* **N., parasit'ic,** nephritis due to presence of micro-organisms. **N., parenchym'atous,** see *Kidney, Bright's disease of the.* **N., pur'ulent,** nephritis, suppurative. **N. rheumat'ica,** nephritis caused by rheumatism. **N. saturni'na,** nephritis due to chronic plumbism. **N., scarlati'nal,** nephritis occurring during an attack of or following scarlet fever. **N. socia'ta,** kidney, Bright's disease of the. **N., sup'purative,** see *Nephritis.* **N., sur'gical,** *Surgical kidney;* chronic inflammation of the kidney, the result of local lesions, as calculus in the kidney or bladder, stricture of the urethra, etc. **N., tu'bal,** kidney, Bright's disease of the. **N., tuber'cular,** tuberculosis, renal. **N. urat'ica,** nephritis, gouty.

Nephro-abdominal, nef'ro-ab-dom'in-al. Commencing at the kidney and terminating at the wall of the abdomen; a term applied to fistulas so constituted.

Nephrocele, nef-ro-se'le (Eng. nef'ro-seel) (*nephros, kele,* tumor). Hernia of the kidney.

Nephrochalazosis, nef-ro-kal-az-o'sis (*nephros, chalaza,* hail, granulation). Kidney, Bright's disease of the.

Nephrococcosis, nef-ro-kok-ko'sis (*nephros, kokkos,* grain or berry). Kidney, Bright's disease of the.

Nephrocolica, nef-ro-kol'ik-ah. Colica nephritica.

Nephrocystitis, nef-ro-sis-te'tis (*nephros, kustis,* bladder, *itis*). Inflammation of the kidney and bladder.

Nephrocystosis, nef-ro-sis-to'sis (*nephros, kustis,* cyst or bladder, *osis*). Morbid condition consisting in the formation of cysts in the bladder.

Nephrodes, nef-ro'dees. Nephroid.

Nephrodium filix (nef-ro'de-um fe'liks) **mas** (*nephros*). Polypodium filix mas. **N. margina'le,** Aspidium marginale.

Nephrodysneuria, nef-ro-dis-nu're-ah. Condition in which the nerves of the kidney are diseased.

Nephrœdema, nef-re-de'mah (*nephros,* kidney, *oidema,* œdema). Renal œdema.

Nephrogenous, nef-roj'en-us (*nephros,* kidney, *gennao,* to beget). Producing a morbid condition of the kiduey.

Nephrography, nef-rog'ra-fe (*nephros, graphe,* description). Anatomical description of the kidney.

Nephrohæmia, nef-ro-he'me-ah (*nephros, haima,* blood). Hyperæmia or congestion of the kidney.

Nephroid, nef'roid (*nephros, eidos,* form, resemblance). Reniform; having a resemblance to a kidney, as nephroid cancer, so called because the morbid growth resembles the kidney in structure.

Nephrolith, nef'ro-lith (*nephros, lithos,* stone). Renal calculus, or stone in the kidney.

Nephrolithiasis, nef-ro-lith-e'as-is (*nephros, lithos,* stone). Formation of calculus in the kidney; *Lithia renalis, Lithiasis nephritica, L. renalis.* See *Gravel.*

Nephrolithic, nef-ro-lith'ik. Belonging to calculi in the kidneys; epithet applied to ischuria occasioned by calculi formed in the kidneys.

Nephrolithocolica, nef-ro-lith-o-kol'ik-ah (*nephros,* kidney, *lithos,* stone, *kolikos*). Renal colic from presence of calculus.

Nephrolithotomy, nef-ro-lith-ot'o-me. Nephrotomy. Operation for removal of calculus in the kidney.

Nephrolithus, nef-rol'ith-us. Renal calculus.

Nephrology, nef-rol'o-je (*nephros, logos,* treatise). Treatise on the kidneys; description of the kidneys and their functions.

Nephromalacia, nef-ro-mal-ash'e-ah (*nephros, malakia,* softness). Softening of the kidney.

Nephromere, nef'ro-mere (*nephros,* kidney, *meros,* a part). Part of mesoblast from which the kidney is formed.

Nephrometræ, nef-ro-met're. Muscles of the loins.

Nephromiosis, nef-ro-me-o'sis. Atrophy of the kidneys.

Nephroncus, nef-ron'kus (*nephros, onkos,* tumor). Tumefaction of the kidney. Tumor in that region.

Nephroparalysis, nef-ro-par-al'is-is. Paralysis of the kidneys.

Nephroparesis, nef-ro-par'es-is (*nephros, paresis,* loss of tone). Nephroparalysis.

Nephropathy, nef-rop'ath-e (*nephros, pathos,* disease). Disease of the kidneys.

Nephrophlegmasia, nef-ro-fleg-maz'e-ah (*nephros, phlegmasia*). Nephritis.

Nephrophlegmatic, nef-ro-fleg-mat'ik (*nephros, phlegma,* phlegm). Name given by some authors to ischuria produced by mucus contained in the urine.

Nephrophlegmone, nef-ro-fleg'mo-ne (*nephros, phlegmone,* inflammation). Nephritis.

Nephrophthisis, nef-ro-te'sis (*nephros, phthisis,* consumption). Phthisis from suppuration or wasting disease of the kidney.

Nephroplegia, nef-ro-plej'e-ah (*nephros, plege,* stroke). Nephroparalysis.

Nephroplethoric, nef-ro-ple-thor'ik (*nephros, plethora,* plethora). Belonging to plethora of the kidneys; epithet given to ischuria so caused.

Nephroptosis, nef-ro-to'sis (*nephros, ptosis*). Condition in which the kidney is prolapsed, or has slipped away from its natural position.

Nephropyelitis, nef-ro-pe-el-e'tis (*nephros, puelos*, pelvis). Inflammation of parenchyma and pelvis of kidney.

Nephropyic, nef-ro-pi'ik (*nephros, puon*, pus). Belonging to suppuration of the kidney.

Nephropyosis, nef-ro-pe-o'sis (*nephron, puon*, pus). Suppuration of the kidney; nephrapostasis. Nephrelcosis, or ulceration of the kidney, may sometimes be accompanied with suppuration.

Nephrorrhagia, nef-ror-rhaj'e-ah (*nephros, rhage*, rupture). Hemorrhage from the kidney.

Nephrorrhaphy, nef-ror'rha-fe (*nephros, rhaphe*, suture). Suture of kidney to the abdominal wall, as in case of floating kidney.

Nephros, nef'ros. Kidney.

Nephroscleria (nef-ro-skler'e-ah) or **Nephrosclero'sis** (*nephros, skleria*, hardness). Induration of the kidneys.

Nephrospastic, nef-ro-spas'tik (*nephros, spao*, to draw). That which depends upon spasm of the kidney; epithet given to a variety of ischuria.

Nephrostegnosis, nef-ro-steg-no'sis (*nephros, stegnosis*, occlusion). Condition of kidney in which contraction is associated with induration.

Nephrostome, nef'ro-stome (*nephros, stoma*, mouth). An infundibular opening of a primitive kidney.

Nephrothromboid, nef-ro-throm'boid (*nephros, thrombos*, clot). Depending upon clots of blood in the kidneys or their ducts, a species of ischuria.

Nephrotomy, nef-rot'o-me (*nephros, tome*, section). Dissection of the kidney. Also operation for extracting calculi or a tumor from the kidney, by incision into the tissue of that organ.

Nephrotyphus, nef-ro-ti'fus. Typhus fever associated with hemorrhagic nephritis.

Nephrozymose, nef-ro-zi'moze (*nephros, zumosis*, fermentation). Diastatic ferment found in urine.

Nephrus, nef'rus. Kidney.

Nepios, nep'e-os. Infant.

Nepiotes, nep-e'o-tees. Infancy.

Nepta, nep'tah. Asphaltum.

Nep'tune's gir'dle. Name given to an abdominal bandage resorted to for applying cold to the waist and upper part of the abdomen.

Nera, ne'rah. Toddy.

Ne'reum. Nerium.

Neriatin, ne're-at-in. Active principle of Nerium odorum or oleander; employed as a cardiac tonic.

Nerium, ne're-um (*neros*, humid, because growing in moist places). N. oleander. **N. antidysenter'icum**, tree which affords the *Codagapala bark*. Bark, *Koorchee*, of this Malabar tree has been recommended as an astringent in diarrhœa, dysentery, etc. The seeds, *Semina indagee, Indrojolare*, are used as a vermifuge by the natives. **N. odo'rum**, *Kunaree*, of India, is a well-known poison, and extensively used as such. **N. olean'der**, leaves are narcotic. Infusion is employed internally in herpetic affections, and the powder, incorporated with lard, in itch.

Neroli, ner'o-le. See *Citrus aurantium*.

Neroniana (ne-ro-ne-an'ah) or **Neronica phlebotomia**, ne-ro'ne-kah fle-bo-tom'e-ah. Epithet given to phlebotomy when more than one vein was opened on the same day, or to bleeding *coup sur coup* (termed *Neroniana* because the philosopher Seneca was bled to death under Nero).

Neruah. Dracunculus.

Nerve (*neuron*, cord or string). (*Neuron* and *Nervus* meant also, with the ancients a tendon and a ligament, *Partes nervosæ;* and hence the different acceptations of "nervous"—"a man of nerve—a strong, *nervous* man; and a weak, *nervous* woman"). Nerves are tubular cords of the same substance as that composing the encephalon and spinal marrow. They extend from the nervous centres to every part of the body, communicating frequently with each other; forming *plexuses*, and occasionally *ganglions;* and being at length lost in the parenchyma of organs.

There are 42 pairs, and according to their origin they are termed *Cranial* or *Encephalic* and *Spinal*. Each nerve is composed of several filaments or cords placed alongside each other, and is surrounded by a neurilemma. Encephalic nerves, in general, have only one root in the brain, whilst the spinal arise from the marrow by two roots: the one from an anterior fasciculus of filaments, the other from a posterior, separated from each other by the ligamentum denticulatum, uniting outside this ligament and presenting near the intervertebral foramen a ganglion formed only by the posterior root. The two roots make, afterward, but one nerve; and, like the encephalic nerves, proceed to their destination, subdividing into rami and ramusculi until they are finally lost in the texture of the organs. Trunks first formed are commonly round, and proceed alone or accompany the great vessels, being placed in the areolar spaces which separate the organs, and are thus protected from injury. Their manner of termination has admitted of much discussion. See *Corpuscles, Pacinian, Corpuscula tactûs*, etc. Some organs have numerous nerves; others seem to have none—a circumstance influencing considerably the sensibility of parts. Observation has shown that certain motor fibres cross the median line and affect muscles on the side opposite to that from which they originate; but the influence is very limited. Some important facts as to the more important nerves, their number, measurements, etc., have been tabulated as follows (Krause):

Number of nerve-fibres. In the 3d–12th cephalic nerves, about 100,000 on each side, as follows:

Oculomotorius		15000
Trochlearis		1100– 2000
Trigeminus (portio minor)		9000–10000
Abducens		2000– 3600
Facialis		4000– 4500
Glossopharyngeus		3500– 4000
Vagus	finer	4000
"	coarser	5000
Accessorius	finer	1300– 1400
"	coarser	2000– 2500
Hypoglossus	coarse	4000– 4500

Thickness of nerve-fibres. On an average, 0.0072 mm. (Krause).

Dimensions of some of the more important nerves (mm.) (Krause):

Olfactorius: Vertical diameter at commencement	about 4
Bulbus olfactorius	8–9 long, about 4 broad.
Opticus: Thickness at commencement	4.5 (Krause).
Thickness at greatest constriction in lamina cribrosa	1.35 (Flemming).
Oculomotorius	3
Trochlearis	at most 1
Trigeminus:	
Portio major at commencement	6
Portio major at exit from pons	3.8
Portio minor	2
	the whole trunk (with both roots), 8 broad, 4 thick.
Ganglion Gasseri	16 broad, 3 thick.
N. ophthalmicus (ramus primus nervi trigemini)	3
N. ethmoidalis posterior (or spheno-ethmoidalis)	0.1
N. maxillaris superior (ramus secundus, N. trigemini)	5 broad, 1.7 thick.
N. maxillaris inferior (ramus tertius, N. trigemini)	6 " 3 "
N. lingualis	2 (Luschka).
N. abducens	1.7
N. facialis at entrance into facial canal	2
Ganglion geniculi	2 at base.
Chorda tympani	0.5

The *Encephalic nerves* arise from the encephalon or are inserted into it (according as we consider the brain the origin or termination of the nerves), and make their exit by foramina at the base of the skull. They are 12 in number. The *spinal nerves* are 31—8 *cervical*, 12 *dorsal*, 5 *lumbar*, and 6 *sacral*, the four inferior cervical being larger than the superior, because they furnish the nerves of the upper extremities.

The following table gives a synoptical arrangement of the principal nerves and their distribution:

Synoptical Table of the Nerves.

I. *Cranial* or *Encephalic Nerves.*

1. *Olfactory.* (1st pair.) — Divided into internal, external, and middle branches, which are distributed on the Schneiderian membrane.

2. *Optic.* (2d pair.) — Terminate in the retina.

3. *Motores oculorum.* (3d pair.)
- *Superior Branch.* To the rectus superior oculi and levator palpebræ superioris.
- *Inferior Branch.* To the rectus internus, rectus inferior, and lesser oblique muscles; a filament which goes to the ophthalmic ganglion.

4. *Pathetici.* (4th pair.) — To the greater oblique muscle of the eye.

5. *Par trigeminum.* (5th pair.)
- *Ophthalmic Branch.* Divided into three branches: 1. *Lacrymal branch*, to the lacrymal gland and upper eyelid. 2. *Frontal branch*, to the forehead and upper eyelid. 3. *Nasal branch*, to the eyelids, nasal fossæ, and nose.
- *Superior Maxillary Branch.* 1. *Orbital branch*, to the orbit. 2. *Posterior* and *superior dental*, to the last three molar teeth and gums. 3. *Anterior dental*, to the incisor, canine, and two lesser molares. 4. *Infra-orbitar*, to the upper lip, cheek, and nose.
- *Inferior Maxillary Branch.* 1. *Temporal* profound branches, to the temporal muscle. 2. *Masseterine* branch, to the masseter muscle. 3. *Buccal*, to the inner surface of the cheek. 4. *Pterygoid*, to the internal pterygoid muscle. 5. *Lingual*, to the mucous membrane of the tongue. 6. *Inferior dental*, to the teeth of the lower jaw and to the lower lip. 7. *Auricular branch*, to the pavilion of the ear and forehead.

6. *Abducentes.* (6th pair.) — To the rectus externus oculi.

7. *Facial.* (Portio dura of the 7th pair.)
1. At its exit from the cranium, the *posterior auricular*, *stylohyoid*, and *inframastoid*, to the pavilion of the ear, the mastoid process, the digastricus, and the muscles attached to the styloid process.
2. Near the parotid gland, the *temporal*, *malar*, *buccal*, *supramaxillary*, and *inframaxillary* to the whole superficies of the face.

8. *Auditory.* (Portio mollis of the 7th pair.) — To the vestibule, semicircular canals, and cochlea.

9. *Glossopharyngeal.* (Portion of the 8th pair.)
- To the base of the tongue and pharynx.
- 1. In the Neck—*pharyngeal* branch to the pharynx; *superior laryngeal* branch to the larynx, and to some of the muscles of the inferior hyoid region. *Cardiac* branches to the cardiac plexus.
- 2. In the Chest—*inferior laryngeal* branch to the larynx, *pulmonary* branches, which form the plexus of the same name; *œsophageal* branches to the œsophagus.
- 3. In the Abdomen—*gastric* branches to the parietes of the stomach; filaments which go to the neighboring plexuses.

10. *Par vagum.* (8th pair.)

11. *Spinal* or *Accessory of Willis.* — At its exit from the cranium—the *accessory of the pneumogastric nerve* anastomosing with this nerve. In the neck, filaments to the trapezius muscles.

12. *Hypoglossal.* (9th pair.) — *Cervicalis descendens*, to the muscles of the inferior hyoid region and to the cervical nerves. Filaments to the muscles of the tongue.

II. *Spinal* or *Vertebral Nerves.*

1. *Cervical Nerves.*

1st Cervical Pair. — *Anterior Branch.* Anastomosing *par arcade* with the second pair.

2d Cervical Pair. — *Anterior Branch.* Branch anastomosing with the first pair; a branch which goes to the cervical plexus.

3d and *4th Cervical Pairs.* — *Anterior Branch.* Concurring in the cervical plexus.

Posterior Branch of these four pairs ramifies on the occiput and muscles of the superficial and deep-seated cervico-occipital regions.

Cervical Plexus.
- Descending Branches.—1. *Internal descending*, anastomosing with a branch of the hypoglossus. 2. *Phrenic branch*, to the diaphragm. 3. *External descending branches*, dividing into supraclavicular, supra-acromial, infraclavicular, and cervicales profundi, to the muscles and integuments of the upper part of the chest and shoulder, to the trapezius, levator scapulæ, rhomboideus, etc.
- Ascending Branches.—1. *Mastoid*, to the posterior and lateral part of the head and the inner surface of the pavilion of the ear. 2. *Auricular*, to the parotid gland and pavilion of the ear.
- *Superficial Cervical Branches.* (2.) To the platysma myoides, diagastricus, the integuments of the neck, etc.

5th, *6th*, and *7th Cervical Pairs.*
- *Anterior Branches.* Assisting in the formation of the brachial plexus.
- *Posterior Branches.* To the muscles and integuments of the posterior part of the neck and upper part of the back.

Brachial Plexus.
- 1. *Thoracic Branches.* To the anterior and lateral parts of the chest. 2. *Suprascapulary* branch to the muscles of the posterior scapular region. 3. *Infrascapulary* branches (3) to the subscapularis, teres major, teres minor, and latissimus dorsi. 4. *Brachial internal cutaneous*, to the integuments of the palmar and dorsal surfaces of the forearm, near the ulnar margin. 5. *Brachial external cutaneous*, principally to the integuments of the palmar and dorsal surfaces of the forearm, near the radial margin. 6. *Median nerve*, to the forearm, hand, and palmar surface of all the fingers. 7. *Cubital nerve*, to the last two fingers. 8. *Radial*, to the first three. 9. *Axillary*, around the shoulder-joint, and to the neighboring muscles.

2. *Dorsal Nerves* (*Nervi dorsales*).

1st Dorsal Pair. — *Anterior Branch.* To the brachial plexus.

2d and *3d Dorsal Pairs.* — *Anterior Branches.* Intercostal and brachial branch.

4th, *5th*, *6th*, and *7th Dorsal Pairs.* — *Anterior Branches.* *Internal* branches to the intercostals, triangularis sterni, pectoralis major, and to the skin. *External* branches to the integuments of the chest, the obliquus externus abdominis, and the skin of the abdomen.

8th, *9th*, *10th*, and *11th Dorsal Pairs.* — *Anterior Branches.* *Internal* branches to the transversalis, obliquus internus, and rectus muscles, and to the skin of the abdomen. *External* branches to the integuments of the chest and to the muscles and skin of the abdomen.

12th Dorsal Pair. — *Anterior Branch.* To the first lumbar nerve, and to the muscles and skin of the abdomen as far as the iliac crest.

Posterior Branches of the dorsal nerves are distributed to the muscles and integuments of the back and loins.

3. *Lumbar Nerves.*

1st, *2d*, *3d*, and *4th Lumbar Pairs.* — *Anterior Branches.* Concurring to form the lumbar plexus.

5th Pair. — *Anterior Branch.* Aiding in forming the sciatic plexus.

Posterior Branches of the lumbar nerves are distributed to the loins, sacrum, and nates.

Lumbar Plexus.
1. *Musculo-cutaneous Branches* number three. One, *superior*, to the muscles of the abdomen, to the fold of the groin, and the scrotum; a *middle*, to the integuments and muscles of the abdomen; and an *inferior*, to the skin of the thigh. 2. *Genito-crural* branch to the integuments of the scrotum, the groin, and the thigh. 3. *Crural* nerve, to the integuments and muscles of the thigh, skin of the leg, and foot. 4. *Obturator* nerve, to the muscles at the inner part of the thigh. 5. *Lumbo-sacral*, to the sciatic plexus. Gives off the *gluteal* nerve to the glutæi muscles.

4. *Sacral Nerves.*

1st, 2d, 3d, and 4th Sacral Pairs. — *Anterior Branches.* Form by their union the sciatic plexus.

5th and 6th Pairs. — *Anterior Branches.* To the parts in the vicinity of the coccyx.

Posterior Branches ramify on the muscles and integuments of the nates.

Sciatic Plexus.
1. *Hemorrhoidal nerves*, to the rectum. 2. *Vesical*, to the bladder. 3. *Uterine* and *vaginal*, to the vagina and uterus. 4. *Inferior gluteal*, to the gluteal muscles, perineum, and integuments of the posterior part of the thigh. 5. *Pudic*, to the perineum, penis, or vulva. 6. *Sciatic*, divided into the *external popliteal*, which ramifies on the integuments and muscles of the external side of the leg, on the dorsum of the foot, and the dorsal surface of the toes; and into the *internal popliteal*, distributed on the dorsal surface of the last two toes, to the muscles of the foot, and on the plantar surface of all the toes.

Classifications of the nerves have been recommended according to their uses, in preference to the ordinary anatomical arrangement. It has been remarked that the encephalic nerves have generally one root; the spinal two. Experiments and pathological facts have proved that the anterior column of the marrow — *Funiculus anterior* — and the anterior roots of the spinal nerves are inservient to volition or voluntary motion; and that the posterior column —*Funiculus posterior*—and roots are destined for sensibility. Hence the spinal nerves, which have two roots, must be the conductors both of motion and feeling, while the encephalic, which, with but few exceptions, have but one, can possess but one of these properties: they must be either *sensitive* or *motor* according as they arise from the posterior or anterior column of the medulla, and, consequently, three classes of nerves may be distinguished:

1. *Sensory.* — Arising, by a single root, from the posterior column of the medulla oblongata or spinal marrow.
2. *Motor.* — Arising, by a single root, from the anterior column of the same parts.
3. *Sensory and Motor.* — Which have two roots: one from the anterior and one from the posterior column.

Dr. Marshall Hall's division of the nervous system is calculated to explain many of the anomalous circumstances so frequently witnessed. He proposed to divide all nerves into—1. *Cerebral*, or sentient and voluntary; 2. *True spinal* or excitomotory; 3. *Ganglionic* or *cycloganglionic*, the nutrient and secretory. If the sentient and voluntary functions be destroyed by a blow upon the head, the sphincter muscles will still contract when irritated, because the irritation is conveyed to the spine and the reflex action takes place to the muscle so as to throw it into contraction. But if the spinal marrow be now destroyed, the sphincters remain entirely motionless, because the centre of the system is destroyed. Dr. Hall maintained that a peculiar set of nerves constitutes, with the vesicular centre of the marrow as their axis, the second subdivision of the nervous system; and as those of the first subdivision are distinguished into sentient and voluntary, these may be distinguished into the *excitor* and *motory*. The first, or the excitor nerves, pursue their course principally from internal surfaces, characterized by peculiar excitabilities, to the centre of the medulla oblongata and medulla spinalis; the second, or the motor nerves, pursue a reflex course from the medulla to the muscles, having peculiar actions, concerned principally in ingestion and egestion. The motions connected with the first or cerebral subdivisions are sometimes, indeed frequently, spontaneous; those connected with the true spinal are, he believes, always excited. He thought, too, that there is good reason for viewing the fifth and posterior spinal nerves as constituting an external ganglionic system for the nutrition of the external organs; and he proposed to divide the *ganglionic* subdivision of the nervous system into—1. *Internal* ganglionic, which includes that usually denominated the sympathetic, and probably filaments of the pneumogastric; and, 2. *External* ganglionic, embracing the fifth and posterior spinal nerves. To the *cerebral* system he assigned all diseases of sensation, perception, judgment, and volition—therefore all painful, mental, and comatose, and some paralytic diseases. To the true *spinal, excitomotory, reflex*, or *diastaltic nervous system* he referred all spasmodic and certain paralytic diseases. He properly added that these two parts of the nervous system influence each other both in health and disease, as they both influence the ganglionic system.

Nerves are sheathed and are united to the neighboring parts by an abundant layer of fatty areolar texture, which sends inward prolongations that separate the nervous cords and filaments from each other. The arterial trunks distributed to them transmit branches into their interior. The veins follow the same course as the arteries. Absorbents are not easily traced even on the greatest trunks. The term *regeneration of nerves* has been applied to the process of reproduction of nerves after severe lesions of the nerves, as in gunshot injuries, etc. **N., abdu'cent,** motor oculi externus. **N., acces'sory, of Wil'lis,** spinal nerve. **N., af'ferent,** see *Afferent.* **N. of Ar'nold,** Arnold's nerve. **N., artic'ular,** branches so called are given off to various joints from the axillary, ulnar, obturator, great sciatic, and other nerves. **N., artic'ulo-tem'poral,** see *Auricular.* **N., augmen'tor,** cardiac sympathetic nerves. **N., buccina'tor,** buccal nerve. **N. bulb,** see *End-bulbs.* **N., catabol'ic,** nerve assisting in causing chemical changes of a destructive character. **N. cells,** see *Neurine.* **N., cerebrospi'nal,** nerves connected with the cerebro-spinal centre, are, in number, forty-three pairs; twelve are cerebral and thirty-one spinal. **N. of Cotun'nius,** nasopalatine nerve. **N. em'inence,** elevation of the sarcolemma over the seat of the end-plate, and of the end-plate itself; see *End-plate.* **N., fa'cial,** see *Facial nerve.* **N., fem'oral cuta'neous,** see *Genitocrural nerve.* **N., fem'oro-poplite'al, lesser,** sciatic nerve, lesser. **N. fi'bres,** in the nerves of the higher animals two forms of nerve-fibre exist—the *tubular* and the *gelatinous.* In the minute fibrils or tubules, *tubuli nervei*, full of nervous matter, which constitute the former, there is a difference between the central and peripheral portion; the former has been called the *axis-cylinder* and *primitive* and *flattened band, band of Remak;* the latter, the *medullary* or *white substance of Schwann—nerve medulla, sheath of Schwann, medullary sheath* or *matter, myelin*—being that to which the peculiarly white aspect of cerebrospinal nerves is principally due. In the gelatinous fibre no tubular envelope can be distinguished, and the white substance of Schwann seems to be wanting. It contains numerous cell-nuclei. The white substance of Schwann and the tubular sheath generally disappear as the nerve approaches its terminal distribution, the axis-cylinder invested by its basement-membrane being left; see *Neurine.* **N., gen'ital,** see *Genitocrural nerve.* **N., genitocru'-**

ral, see *Genitocrural nerve*. **N. glands**, name given by Remak to the suprarenal bodies. **N., glu'teal, of the sa'cral plex'us**, sciatic nerve, lesser. **N., gus'tatory**, hypoglossal nerve. **N., hypoglos'sal**, see *Hypoglossal*. **N., in'guinal, inter'nal**, genitocrural nerve. **N. of Ja'cobson**, see *Petrosal ganglion*. **N. of Lanci'si**, see *Corpus callosum*. **N., lat'eral na'sal**, sphenopalatine nerve. **N., lin'gual**, hypoglossal nerve. **N. medul'la**, see *Nerve-fibres*. **N., na'so-ocula'ris**, nasal nerve. **N., nasopal'atine**, see *Nasopalatine*. **N., nasopal'pebral**, nasal nerve. **N., oc'ular**, optic nerve. **N., op'tic**, see *Optic*. **N., orbitofron'tal**, ophthalmic nerve. **N. of organ'ic life**, trisplanchnic nerve. **N., palpebrofron'tal**, frontal nerve. **N. pang**, neuralgia. **N., phren'ic**, diaphragmatic nerve. **N., poplite'al, inter'nal**, tibial nerve, posterior. **N. pow'er**, nervous power. **N., re'nal**, see *Splanchnic nerve*. **N., res'piratory, exter'nal**, see *Thoracic nerves*. **N., res'piratory, of the face**, facial nerve. **N., res'piratory, supe'rior**, spinal nerve. **N., scapulohu'meral**, axillary nerve. **N., scro'tal**, see *Genitocrural nerve*. **N., sheath of**, neurilemma. **N., spi'ral**, radial nerve. **N., spi'ral, mus'cular**, radial nerve. **N. storm**, paroxysmal attack of nervous disturbance. **N. stretch'ing**, operation consisting in cutting down on and forcibly stretching a nerve for the purpose of relieving neuralgic affections, spasmodic contraction, etc., or more superficially in flexion of the part, massage, etc. **N., suboccip'ital**, occipital nerve. **N., subpu'bian**, genitocrural nerve. **N., superfic'ial tem'poral**, auricular nerve. **N., sympathet'ic**, trisplanchnic nerve. **N., tem'poral cuta'neous**, auricular nerve. **N. tire**, neurasthenia. **N. track**, path along which nerve-fibres convey nervous impulses. **N., trigem'inal**, see *Trigemini*. **N. tu'mor**, neuroma. **N., ul'nar**, cubital nerve. **N., vasomo'tor**, see *Vasomotor*. **N., Vid'ian**, pterygoid nerve. **N., vo'cal**, see *Spinal nerve*. **N. wounds**, see *Wounds of nerves*. **N. of Wris'berg**, see *Cutaneous nerves*. **N., zygo'mato-auric'ular**, auricular nerve.

(For other nerves that may not have received distinct mention under *Nerve*, *Nerves*, *Nervi*, or *Nervus*, see table on preceding page, or refer to them by name under the alphabetical head. Optic nerve, for example, will be found described under *Optic;* genitocrural nerve, under *Genitocrural*, etc.)

Nerves, com'pound. Nerves, motor-sensory. **N., costal**, intercostal nerves. **N., dor'sal**, intercostal nerves. **N., eighth pair of**, pneumogastric. **N., encephal'ic, elev'enth pair**, spinal nerve. **N., encephal'ic, first pair**, olfactory nerves. **N., ethmoi'dal**, olfactory nerves. **N., fifth pair**, trigemini. **N., fourth pair of**, patheticus nervus. **N., infraor'bitar**, suborbitar nerves. **N., mo'tor** or **mo'tory**, see *Nerve*. **N., mo'tor-sen'sory**, *Compound nerves;* nerves possessing both afferent and efferent fibres, and concerned both in motion and sensation. **N., mo'tor-spi'nal**, see *Trophic*. **N., ninth pair of**, hypoglossal nerve. **N., oculomus'cular, com'mon**, motores oculorum. **N., phren'ic**, diaphragmatic nerves. **N., plex'us of**, see *Plexus*. **N., recur'rent**, laryngeal inferior nerves. **N., regenera'tion of**, see *Nerve-regeneration*. **N., roots of**, see *Nerve*. **N., saphe'nous**, see *Saphenous*. **N., sixth pair of**, motor oculi externus. **N., spi'nal**, vertebral nerves. **N., tenth pair of**, pneumogastric. **N., third pair of**, motores oculorum. **N., trifa'cial**, trigemini. **N., trigem'inal**, trigemini. **N., troph'ic**, see *Trophic*. **N., vasomo'tor**, see *Vasomotor*.

Nervi, nur've (pl. of **Ner'vus**). Nerves. **N. acromia'les**, acromial nerves. **N. alveola'res superio'res**, superior dental nerves. **N. ampulla'res**, branches of vestibular nerve distributed to ampullæ of semicircular canals. **N. anococcyge'i**, branches from coccygeal plexus supplying skin about tip of coccyx. **N. anon'ymi**, innominati nervi. **N. articula'res ge'nu, supe'rior** and **infe'rior**, branches from peroneal nerve distributed to the knee-joint. **N. carot'ici exter'ni** or **carot'ici mol'les**, branches from superior cervical ganglion supplying walls of external carotid artery. **N. caverno'si**, branches from cavernous plexus distributed to posterior part of penis or clitoris. **N. clavicula'res**, clavicular nerves. **N. clu'nium posterio'res**, lateral branches from posterior part of the three upper sacral nerves distributed to posterior and upper gluteal region. **N. cuta'nei abdomina'les latera'les**, lateral branches of the five lower intercostal nerves. **N. cuta'nei abdom'inis anterio'res**, branches from lower six anterior branches of the intercostal nerves. **N. cuta'nei anterio'res fem'oris**, middle cutaneous nerves of thigh. **N. cuta'nei clu'nium inferio'res**, see *Sciatic nerve, lesser*. **N. cuta'nei clu'nium lumba'les**, nervi cutanei clunium superiores. **N. cuta'nei clu'nium posterio'res**, nervi clunium posteriores. **N. cuta'nei clu'nium sacra'les**, nervi clunium posteriores. **N. cuta'nei clu'nium superio'res**, lateral branches from posterior branches of the three superior lumbar nerves; they perforate the lumbar fascia, and are distributed to the skin over crest of ilium and upper gluteal region. **N. cuta'nei cox'æ posterio'res**, nervi cutanei clunium superiores. **N. cuta'nei cru'ris media'les**, branches of long saphenous nerve, supplying inner side of leg. **N. cuta'nei inferio'res posterio'res**, nervi clunium posteriores. **N. cuta'nei media'les fem'oris**, internal cutaneous nerves of thigh. **N. cuta'nei pec'toris anterio'res**, superior six anterior branches of the intercostal nerves. **N. cuta'nei pec'toris latera'les**, lateral branches of intercostal nerves from 2d to 6th or 7th. **N. divi'si**, trigemini. **N. entobænon'tes**, afferent nerves. **N. erigen'tes** (*erigo, erectum*, to erect), nerves concerned in erection, which proceed from the sacral nerves and enter the hypogastric plexus, branches from which are distributed to the prostate, bladder, urethra, etc. **N. facia'les inferio'res**, branches from facial nerve to lower jaw and chin. **N. facia'les me'dii**, buccal nerves from facial. **N. facia'les superio'res**, zygomatic nerves. **N. facia'les tempora'les**, branches from facial nerve to temporal region. **N. gustato'rii**, trigemini. **N. hepat'ici posterio'res**, plexus venæ portæ. **N. labia'les anterio'res**, branches from ilio-inguinal nerve to labia pudendi. **N. labia'les posterio'res**, superficial internal perineal nerves. **N. latera'les abdom'inis**, nervi cutanei abdominales laterales. **N. mea'tus audito'rii exter'ni**, branches from auriculo-temporal nerve to auditory canal. **N. mol'les** (soft nerves), anterior branches of the superior cervical ganglion of the great sympathetic, which accompany the carotid artery and its branches, around which they form intricate plexuses and here and there small ganglia. They are called *molles* from their softness, and *subrufi* from their reddish hue. **N. nasa'les exter'ni**, nasal nerves, external. **N. nasa'les latera'les**, branches of infra-orbital nerve supplying side of nose. **N. nervo'rum**, nervous filaments in the neurilemma, which are thought to be in the same relation to the nerves as the vasa vasorum to the vessels. **N. odorato'rii**, olfactory nerves. **N. pectora'les anterio'res**, anterior thoracic nerves. **N. pectora'les exter'ni**, anterior intercostal nerves. **N. pectora'les latera'les**, nervi cutanei pectoris laterales. **N. pectora'les profun'di**, anterior intercostal nerves. **N. perforan'tes anterio'res**, anterior cutaneous nerves of thorax and abdomen. **N. perforan'tes latera'les**, lateral cutaneous nerves of thorax and abdomen. **N. phren'ici intercosta'les**, branches from intercostal nerves to diaphragm. **N. phren'ico-abdomina'les**, branches of phrenic nerve passing through diaphragm and supplying the crura. **N. pterygopalati'ni**, palatine nerves. **N. pulmona'les**, bronchial nerves. **N. reversi'vi**, laryngeal inferior nerves. **N. scrota'les anterio'res**, branches from ilio-inguinal nerve to scrotum. **N. sinuvertebra'les**, nerves given off by a spinal nerve, which pass through the intervertebral foramina to spinal canal and its walls. **N. spina'les thorac'ici**, dorsal nerves. **N. subcosta'les**, intercostal nerves. **N. subcuta'nei glute'i**, nervi cutanei clunium superiores. **N. subcuta'nei glute'i inferio'res**, gluteal cutaneous nerves. **N. subcuta'nei maxil'læ inferio'res**, nervi faciales inferiores. **N. subcuta'nei na'si**, nervi nasales laterales. **N. subru'fi**,

nervi molles. **N. superficia'les na'si,** nervi nasales laterales. **N. vulnera'tio,** neurotrosis.

Nerviduct, nurv'e-dukt. Aperture in a bone through which a nerve passes. **N., Fallo'pian,** aquæductus Fallopii.

Nervimotion, ner-ve-mo'shun (*nervus, motio,* motion). Movement which is caused in the organs of the senses by external agents, and transmitted to the muscles by the nerves.

Nervimotor, nur-ve-mo'tor. Epithet given to external agents capable of causing nervimotion.

Nervine, nur'veen. *Neurotic, Neuritic, Antineurotic, Antineuropathic;* medicine which acts on the nervous system. Also nerve-substance. Cypripedium pubescens.

Nervopathic, nur-vo-path'ik. Neuropathic.

Nervo-sanguine, nur'vo-san'gwin. Possessing an excitable and sanguine disposition.

Ner'vosism. Doctrine which maintains that all morbid phenomena are owing to variations in the nerve-force. Neurasthenia.

Nervous, nur'vus. Relating or belonging to the nerves; strong; also weak, irritable. **N. attack',** affection accompanied with spasm, pain, and different nervous symptoms to which impressible individuals are liable. **N. cen'tres,** see *Centres, nervous.* **N. deaf'ness,** deafness due to diseased condition of the auditory nerve or brain-centres. **N. diath'esis,** termed nervousness. Medically, nervousness means unusual impressibility of the nervous system. Formerly it signified strength, force, and vigor. Recently it has been applied to a hypochondriacal condition verging upon insanity, occasionally occurring in those in whom the brain has been unduly tasked—a condition termed by some cerebropathy; by others, brain fag. **N. diseases,** affections seated in the nervous system. To purely functional disease of the nerves the name neuræmia has been given, and to the class of diseases the epithet neuræmic. **N. exhaus'tion,** neurasthenia. **N. fe'ver,** enteric fever of the Germans. **N. flu'id,** nervous principle; fluid supposed to circulate through the nerves, and which has been regarded as the agent of sensation and motion. Of this fluid we know nothing except that it resembles, in many respects, the electric or galvanic. It was formerly called animal spirits, spiritus animales. **N. head'ache,** megrim. **N. in'fluence,** see *Nervous power.* **N. pain,** neuralgia. **N. pow'er,** nerve power, nervous influence; power of the nerves as exhibited in the living organism. **N. prin'ciple,** nervous fluid. **N. sys'tem,** nerves and nervous centres considered collectively; see *Nerves, Cerebro-spinal axis,* etc. **N. sys'tem of the automat'ic func'tions,** trisplanchnic nerve. **N. sys'tem, ganglionic,** see *Trisplanchnic nerve.* **N. sys'tem of the senses,** medulla oblongata. **N. sys'tem, sympathet'ic,** trisplanchnic nerve. **N. sys'tem of vol'untary mo'tion,** etc., medulla spinalis.

Nervousness, nur'vus-ness. Nervous diathesis.

Nervule, nurv'ule. Small nerve.

Ner'vuli gingiva'les. Small branches given off by alveolar nerves to the gums.

Ner'vus. Nerve. See *Penis.* **N. abdom'ino-genita'lis supe'rior,** ilio-hypogastric nerve. **N. abdu'cens,** motor oculi externus. **N. accesso'rius cuta'nei inter'ni,** lesser internal cutaneous nerve. **N. accesso'rius saphe'ni exter'ni,** communicans peronei. **N. acus'ticus,** auditory nerve. **N. adscen'dens,** recurrent laryngeal nerve. **N. alveola'ris ante'rior ma'jor,** anterior superior dental nerve. **N. alveola'ris ante'rior mi'nor,** middle superior dental nerve. **N. alveola'ris infe'rior,** inferior dental nerve. **N. alveola'ris maxil'læ inferio'ris,** inferior dental nerve. **N. alveola'ris poste'rior ma'jor** and **mi'nor,** posterior superior dental nerves. **N. ambulato'rius,** pneumogastric nerve. **N. anastomot'icus,** Vidian nerve. **N. Andersch'ii,** tympanic nerve. **N. anon'ymus,** trigemini. **N. ante'rior sep'ti na'rium,** branch of ethmoidal nerve to mucous membrane of septum of nose. **N. ap'icis na'si,** nervus nasalis externus. **N. arte'riæ femora'lis pro'prius,** nerve of the femoral artery. **N. articula'ris,** circumflex nerve. **N. Aschia'nus,** first cervical nerve. **N. audito'rius,** auditory nerve. **N. auricula'ris cervica'lis,** great auricular nerve. **N. auricula'ris mag'nus,** great auricular nerve. **N. auricula'ris posterior,** nervus auricularis magnus. **N. auricula'ris profun'dus,** posterior auricular nerve. **N. auricula'ris va'gi,** auricular branch of the pneumogastric nerve. **N. auric'ulo-occipita'lis,** posterior auricular nerve. **N. axilla'ris,** circumflex nerve. **N. bigem'inus,** nervus biradiatus. **N. biradia'tus,** second sacral nerve, giving off the sciatic and the pudic nerve. **N. biven'tricus,** digastric nerve. **N. buccinato'rio-labia'lis,** buccal nerve. **N. buccinato'rius,** buccal nerve. **N. buccolabia'lis,** buccal nerve. **N. bul'bo-urethra'lis,** deep branch of the perineal nerve. **N. calcaneoplanta'ris cuta'neus,** plantar cutaneous nerve. **N. cardi'acus mag'nus** or **profun'dus,** see *Cardiac nerves.* **N. cardi'acus mi'nor** or **par'vus,** see *Cardiac nerves.* **N. cardi'acus quar'tus,** fourth cardiac nerve; branch of superior thoracic ganglion. **N. cardi'acus superficia'lis,** see *Cardiac nerves.* **N. cardi'acus ter'tius,** inferior cardiac nerve. **N. caroticotympan'icus,** nervus caroticotympanicus inferior. **N. caroticotympan'icus infe'rior,** branch from the tympanic plexus to the carotid plexus. **N. caroticotympan'icus supe'rior,** small deep petrosal nerve. **N. carot'icus,** carotid nerve. **N. carot'icus ascen'dens,** or **cerebra'lis,** or **inter'nus,** carotid nerve. **N. carot'icus Vidia'ni,** great deep petrosal nerve. **N. cerebra'lis,** carotid nerve. **N. cervica'lis descen'dens infe'rior,** communicans noni. **N. cervica'lis descen'dens supe'rior,** descendens noni. **N. cervicofacia'lis,** cervicofacial nerve. **N. clitor'idis,** dorsal nerve of clitoris. **N. coccyge'us infe'rior,** second coccygeal nerve, sometimes existing. **N. commu'nicans facia'lis,** branch from auriculo-temporal to facial nerve. **N. commu'nicans faciei,** facial nerve. **N. commu'nicans fibula'ris** or **perone'i,** communicans peronei. **N. commu'nicans tibia'lis,** external saphenous nerve. **N. coracobrachia'lis,** musculo-cutaneous nerve. **N. crotaphit'ico-buccinato'rius,** ramus superior nervi inframaxillaris. **N. crura'lis,** anterior crural nerve. **N. crura'lis inter'nus,** obturator nerve. **N. crura'lis poste'rior,** obturator nerve. **N. cubita'lis,** ulnar nerve. **N. cuta'neus ante'rior,** musculocutaneous nerve of leg. **N. cuta'neus bra'chii exter'nus,** musculocutaneous nerve. **N. cuta'neus bra'chii latera'lis,** musculocutaneous nerve. **N. cuta'neus bra'chii poste'rior,** cutaneous branch of circumflex nerve. **N. cuta'neus cal'cis,** calcaneoplantar cutaneous nerve. **N. cuta'neus clu'nium inter'nus supe'rior,** nervus perforans ligamenti tuberososacri. **N. cuta'neus cru'ris poste'rior latera'lis,** communicans peronei. **N. cuta'neus cru'ris poste'rior me'dius,** branch from sciatic or external popliteal distributed to the skin over the calf. **N. cuta'neus dor'si pe'dis commu'nis,** musculocutaneous nerve of leg. **N. cuta'neus dor'si pe'dis latera'lis,** formed by external saphenous nerve uniting with peroneal communicating. **N. cuta'neus dor'si pe'dis media'lis,** internal branch of musculocutaneous nerve of leg, supplying inner side of great toe and second interdigital space. **N. cuta'neus dor'si pe'dis me'dius,** external branch of musculocutaneous nerve of leg, distributed to third and fourth interdigital spaces. **N. cuta'neus fem'oris circumflex'us,** inferior pudendal nerve. **N. cuta'neus fem'oris inter'nus ma'jor,** internal saphenous nerve. **N. cuta'neus fem'oris inter'nus mi'nor,** internal cutaneous nerve of thigh. **N. cuta'neus fem'oris latera'lis,** external cutaneous nerve of thigh. **N. cuta'neus fem'oris poste'rior,** small sciatic nerve. **N. cuta'neus glute'us infe'rior,** small sciatic nerve. **N. cuta'neus hu'meri,** cutaneous branch of circumflex nerve. **N. cuta'neus inter'nus,** internal cutaneous nerve; see *Saphenous nerves.* **N. cuta'neus inter'nus lon'gus,** see *Saphenous nerves.* **N. cuta'neus inter'nus ma'jor,** internal cutaneous nerve. **N. cuta'neus inter'nus mi'nor,** lesser internal cutaneous nerve. **N. cuta'neus lon'gus cru'ris et pe'dis,** external

saphenous nerve. **N. cuta'neus media'lis**, lesser internal cutaneous nerve. **N. cuta'neus me'dius**, internal cutaneous nerve. **N. cuta'neus palma'ris**, palmar cutaneous nerve. **N. cuta'neus perine'i**, inferior pudendal nerve. **N. cuta'neus perone'i**, musculo-cutaneous nerve of leg. **N. cuta'neus planta'ris pro'prius**, calcaneoplantar cutaneous nerve. **N. cuta'neus poste'rior exter'nus**, communicans peronei. **N. cuta'neus poste'rior, infe'rior** and **supe'rior**, inferior and superior external cutaneous nerves. **N. cuta'neus poste'rior mag'nus**, small sciatic nerve. **N. cuta'neus poste'rior me'dius**, small sciatic nerve. **N. cuta'neus supe'rior**, cutaneous branch of circumflex nerve. **N. de'cimus**, pneumogastric. **N. diaphragmat'icus**, phrenic nerve. **N. digita'lis planta'ris inter'nus**, internal terminal branch of the internal plantar nerve. **N. digita'lis planta'ris me'dius**, external terminal branch of internal popliteal nerve. **N. divi'sus**, trigeminus nerve. **N. dorsa'lis pol'licis radia'lis**, branch from radial nerve to back of thumb. **N. dorsa'lis scap'ulæ**, branch from brachial plexus (fifth cervical nerve) distributed to rhomboid muscle. **N. ethmoida'lis posti'cus**, spheno-ethmoidal nerve. **N. femora'lis**, anterior crural nerve. **N. femorocuta'neus**, external cutaneous nerve of thigh. **N. femoroperinea'lis**, superficial external perineal nerve. **N. fibula'ris**, external popliteal nerve. **N. fos'sæ jugula'ris**, Arnold's nerve. **N. frontonasa'lis**, supratrochlear nerve. **N. fusca'lis**, nervus triradiatus. **N. ganglion'icus**, trisplanchnic nerve. **N. ganglio'sus**, sympathetic nerve. **N. genitocrura'lis**, genitocrural nerve. **N. hypoglos'sus**, hypoglossus. **N. im'par**, prolongation of the neurilemma below the lower extremity of the spinal cord, as a fibrous filament, inserted into the base of the coccyx; formerly regarded as a nerve; hence its name. **N. incisi'vus**, incisive nerve. **N. inframaxilla'ris**, inferior maxillary nerve. **N. infra-occipita'lis**, first cervical nerve. **N. inguina'lis exter'nus**, external cutaneous nerve of thigh. **N. inguina'lis inter'nus** or **inguinocuta'neus inter'nus**, genitocrural nerve. **N. innomina'tus**, trigemini. **N. intercosta'lis**, intercostal nerve; sympathetic nerve. **N. intercosta'lis mag'nus** or **intercosta'lis max'imus**, sympathetic nerve. **N. intercosta'lis Willis'ii**, sympathetic nerve. **N. intercostobrachia'lis**, intercostohumeral nerve. **N. interme'dius Wrisberg'ii**, intermediary nerve. **N. interos'seus ante'rior** or **inter'nus**, anterior interosseous nerve of arm. **N. interos'seus cru'ris**, interosseous nerve of leg. **N. interos'seus externus**, posterior interosseous nerve of arm. **N. ischiad'icus**, sciatic nerve. **N. jugula'ris**, branch connecting superior cervical ganglion with jugular ganglion. **N. juveni'lis**, penis. **N. larynge'us ascen'dens**, inferior laryngeal nerve. **N. larynge'us recur'rens**, inferior laryngeal nerve. **N. latis'simi dor'si**, long subscapular nerve. **N. la'tus**, Achilles tendo. **N. ligamen'ti interos'sei cru'ris**, interosseous nerve of leg. **N. lingua'lis latera'lis**, pharyngoglossal nerve. **N. lingua'lis me'dius**, hypoglossal nerve. **N. lingua'lis par'is octa'vi**, glossopharyngeal nerve. **N. lo'quens**, hypoglossal nerve. **N. lumbodorsa'lis**, trunk of anterior branch of first lumbar nerve, dividing into iliohypogastric and ilioinguinal. **N. lumbo-inguina'lis**, genitocrural nerve. **N. lumbosacra'lis**, lumbosacral cord. **N. malleola'ris externus**, branch of musculocutaneous nerve of leg to external malleolus. **N. mandibula'ris**, inferior dental nerve. **N. margina'lis scapu'læ**, long subscapular nerve. **N. masticato'rius**, superior branch of the inframaxillary nerve. **N. mastoï'deus poste'rior**, digastric nerve. **N. membran'æ interos'seæ antibra'chii**, branch from anterior interosseous nerve distributed to interosseous membrane and bones of forearm. **N. membran'æ tym'pani**, branch from the auricular nerve that extends to the auditory canal and membrana tympani. **N. menin'geus poste'rior**, meningeal nerve; branch from hypoglossal and superior cervical ganglion distributed to the blood-vessels around the anterior condyloid foramen. **N. mix'tus**, trigemini. **N. mo'tor oc'uli exter'nus**, motor oculi externus. **N. moto'rius lin'guæ**, hypoglossal nerve. **N. moto'rius oc'uli**, see *Motores oculorum*. **N. mus'culi mal'lei exter'ni**, small branch from otic ganglion extending to laxator tympani. **N. mus'culi mal'lei (interni)**, branch from otic ganglion or from internal pterygoid nerve to tensor tympani. **N. mus'culi pterygoï'dei**, pterygoid nerve. **N. mus'culi tenso'ris ve'li palati'ni**, branch from otic ganglion to the tensor tympani. **N. musculocuta'neus pe'dis**, musculocutaneous nerve of leg. **N. mus'culo-urethra'lis**, deep perineal nerve. **N. nasa'lis ante'rior**, nasal nerve. **N. nasa'lis exter'nus**, branch of ethmoidal nerve passing down on posterior surface of nasal bone; pierces wall of nose between nasal bone and triangular cartilage, and supplies skin of apex. **N. nasocilia'ris**, nasal nerve. **N. nasodenta'lis**, anterior one of the superior dental nerves. **N. nasopalati'nus**, nasopalatine nerve. **N. nasopharynge'us**, pharyngeal nerve. **N. obturato'rius accesso'rius**, accessory obturator nerve. **N. occipita'lis ante'rior**, small occipital nerve. **N. occipita'lis exter'nus**, small occipital nerve. **N. occipita'lis inter'nus**, great occipital nerve. **N. occipita'lis mag'nus**, or **ma'jor**, or **max'imus**, great occipital nerve. **N. occipita'lis mi'nor** or **par'vus**, small occipital nerve. **N. occipita'lis mi'nor secun'dus**, second small occipital nerve. **N. occipita'lis ter'tius**, third occipital nerve. **N. oculomoto'rius commu'nis**, oculomotor nerve. **N. oculomuscula'ris** or **commu'nis**, oculomotor nerve. **N. oculomuscula'ris exter'nus**, abducent nerve. **N. oculomuscula'ris supe'rior**, trochlear nerve. **N. oculonasa'lis**, nasal nerve. **N. op'ticus**, optic nerve. **N. orbita'lis**, ophthalmic nerve. **N. pathet'icus**, pathetic nerve. **N. pectora'lis poste'rior**, dorsalis scapulæ nerve. **N. peda'lis ante'rior**, nervus cutaneus dorsi pedis medialis. **N. pe'nis**, dorsal nerve of penis. **N. per'forans bra'chii**, musculo-cutaneous nerve. **N. per'forans Casse'rii**, musculo-cutaneous nerve. **N. per'forans ligamen'ti tuberososa'cri**, perforating cutaneous nerve. **N. perine'i**, perineal nerve. **N. perine'i latera'lis**, superficial external perineal nerve. **N. perine'i media'lis**, superficial internal perineal nerve. **N. perone'us**, external popliteal nerve. **N. perone'us inter'nus**, nervus cutaneus dorsi pedis medialis. **N. perone'us profun'dus**, anterior tibial nerve. **N. perone'us superficia'lis**, musculocutaneous nerve of leg. **N. petro'sus**, petrosal nerve. **N. petro'sus infi'mus**, small superficial petrosal nerve. **N. petro'sus profun'dus ma'jor**, great deep petrosal nerve. **N. petro'sus profun'dus mi'nor**, small deep petrosal nerve. **N. petro'sus superficia'lis infi'mus**, external superficial petrosal nerve. **N. petro'sus superficia'lis ma'jor**, great superficial petrosal nerve. **N. petro'sus superficia'lis me'dius**, small superficial petrosal nerve. **N. petro'sus superficia'lis mi'nor**, small superficial petrosal nerve. **N. petro'sus superficia'lis ter'tius**, external superficial petrosal nerve. **N. petro'sus superficia'lis vascula'ris**, small superficial petrosal nerve. **N. phren'icus accesso'rius**, filament from phrenic nerve occasionally detached from third cervical nerve, and running separate for some distance. **N. phren'icus secunda'rius**, accessory phrenic nerve. **N. planta'ris digita'lis commu'nis IV.**, branch of external plantar supplying fourth digital interspace. **N. planta'ris hallu'cis media'lis**, branch of internal plantar to inner side of great toe. **N. planta'ris latera'lis**, external plantar nerve. **N. planta'ris latera'lis dig'iti min'imi**, branch of external plantar to outer side of little toe. **N. planta'ris media'lis**, internal plantar nerve. **N. pneumogas'tricus**, pneumogastric. **N. poplite'us inter'nus**, internal popliteal nerve. **N. poste'rior commu'nis**, small sciatic nerve. **N. pro'prius dec'imi ner'vi**, separated filament of the vagus which leaves the trunk below the jugular foramen, sends twigs to the spinal accessory and hypoglossal, and rejoins the parent stem near the transverse process of the third cervical vertebra. **N. pudendohæmorrhoïda'lis**, common trunk which gives off pudic and inferior

hæmorrhoidal nerves. **N. puden'dus**, pudic nerve. **N. puden'dus commu'nis**, nervus pudendohæmorrhoidalis. **N. puden'dus exter'nus**, see *Genitocrural nerve*. **N. puden'dus infe'rior** or **inter'nus**, perineal nerve. **N. puden'dus inguina'lis**, genitocrural nerve. **N. puden'dus lon'gus infe'rior**, inferior pudendal nerve. **N. puden'dus supe'rior**, dorsal nerve of penis. **N. quin'ti recur'rens**, Vidian nerve. **N. quin'tus**, trigemini. **N. radia'lis**, musculospiral nerve. **N. radia'lis profun'dus**, posterior interosseous nerve of arm; see *Interosseous nerves*. **N. radia'lis superficia'lis**, radial nerve. **N. recur'rens**, spinal accessory nerve. **N. recur'rens inframaxilla'ris**, recurrent branch of inferior maxillary. **N. recur'rens inter'nus**, Vidian nerve. **N. recur'rens ra'mi pri'mi**, nervus tentorii. **N. recur'rens ra'mi secun'di**, recurrent branch of superior maxillary. **N. recur'rens ra'mi ter'tii**, recurrent branch of inferior maxillary. **N. recur'rens supramaxilla'ris**, recurrent branch of superior maxillary. **N. respirato'rius inter'nus**, phrenic nerve. **N. saccula'ris ma'jor**, branch from vestigial nerve to the saccule. **N. saccula'ris mi'nor**, branch from cochlear nerve to saccule. **N. saphe'nus bre'vis** or **infe'rior**, external saphenous nerve. **N. saphe'nus ma'jor**, internal saphenous nerve. **N. saphe'nus mi'nor**, internal cutaneous nerve of thigh; external saphenous nerve. **N. saphe'nus perone'us**, communicans peronei. **N. saphe'nus supe'rior**, internal cutaneous nerve of thigh. **N. scapula'ris** or **supe'rior**, suprascapular nerve. **N. scrota'lis infe'rior**, inferior pudendal nerve. **N. scrota'lis poste'rior**, superficial internal perineal nerve. **N. sep'ti na'rium**, nasopalatine nerve. **N. sinua'lis**, nervus tentorii. **N. spermat'icus**, see *Genitocrural nerve*. **N. spermat'icus commu'nis**, pudic nerve. **N. spermat'icus exter'nus**, genital branch of genitocrural nerve. **N. sphenoethmoida'lis**, ethmoidal nerve, posterior. **N. spino'sus**, recurrent branch of inferior maxillary. **N. splanch'nicus i'mus**, smallest splanchnic nerve. **N. splanch'nicus infe'rior**, or **me'dius**, or **secun'dus**, small splanchnic nerve. **N. splanch'nicus sup'erior**, great splanchnic nerve. **N. splanch'nicus supre'mus**, great splanchnic nerve. **N. splanch'nicus ter'tius**, smallest splanchnic nerve. **N. stape'dii**, branch from facial to stapedius muscle. **N. styloi'deus**, branch of facial which divides into stylohyoid, digastric, and communicating nerves. **N. subcuta'neus col'li**, cervical nerve, superficial. **N. subcuta'neus col'li facia'lis**, superior superficial cervical nerve. **N. subcuta'neus col'li infe'rior**, inferior branch of superficial cervical nerve. **N. subcuta'neus col'li me'dius** or **supe'rior**, superior superficial cervical nerve. **N. subcuta'neus ma'læ**, orbital nerve. **N. subcuta'neus mandib'ulæ**, branch of facial running along border of lower jaw. **N. subcuta'neus maxil'læ inferio'ris**, nervus subcutaneus mandibulæ. **N. sublingua'lis**, sublingual nerve. **N. superficia'lis col'li**, cervical nerve, superficial. **N. superficia'lis scap'ulæ**, one of the supra-acromial nerves. **N. supramaxilla'ris**, superior maxillary nerve. **N. sura'lis** or **mag'nus**, external saphenous nerve. **N. sympathet'icus mag'nus**, trisplanchnic nerve. **N. sympathet'icus me'dius**, trigemini; pneumogastric nerve. **N. sympathet'icus mi'nor**, facial nerve. **N. sympath'icus**, trisplanchnic nerve. **N. sympath'icus me'dius**, trigemini. **N. tempora'lis cuta'neus** or **superficia'lis**, auriculotemporal nerve. **N. temporofacia'lis**, temporofacial nerve. **N. tenso'ris tym'pani**, formed by branch from internal pterygoid nerve and one from otic ganglion; supplies tensor tympani muscle. **N. tenso'ris ve'li palati'ni**, formed by branch from internal pterygoid nerve and one from otic ganglion; supplies tensor palati muscle. **N. tento'rii**, recurrent branch from ophthalmic nerve, supplying tentorium. **N. thoracicobrachia'lis**, intercostohumeral nerve. **N. thoracicodorsa'lis**, nervus dorsalis scapulæ. **N. thorac'icus ante'rior** or **ma'jor**, external anterior thoracic nerve; see *Thoracic nerves*. **N. thorac'icus ante'rior mi'nor**, internal anterior thoracic nerve. **N. thorac'icus ante'rior pri'mus** or **exter'nus**, external anterior thoracic nerve; see *Thoracic nerves*. **N. thorac'icus inter'nus**, internal anterior thoracic nerve. **N. thorac'icus poste'rior**, see *Thoracic nerve, posterior*. **N. thorac'icus secun'dus**, internal anterior thoracic nerve. **N. thyrohyoi'deus**, thyrohyoid nerve. **N. tibia'lis**, internal popliteal nerve. **N. tibia'lis anti'cus**, tibial nerve, anterior. **N. tibia'lis exter'nus**, calcaneoplantar cutaneous nerve. **N. tim'idus**, motor oculi externus. **N. tremel'lus**, trigemini. **N. trigem'inus**, see *Trigemini*. **N. triradia'tus**, fourth lumbar nerve. **N. trisplanch'nicus**, trisplanchnic nerve. **N. trochlea'ris**, pathetic nerve. **N. tu'bæ Eustachian'æ**, branch from tympanic plexus to mucous lining of Eustachian tube. **N. tym'pani**, Jacobson's nerve; branch from facial, or from one of the branches supplying external auditory meatus, which is distributed to the membrana tympani. **N. tympan'ico-lingua'lis**, chorda tympani nerve. **N. tympan'icus supe'rior**, tympanic nerve. **N. ulna'ris dorsa'lis**, dorsal branch of ulnar nerve. **N. ulna'ris vola'ris**, ulnar nerve before it divides into deep and superficial palmar branches. **N. ulna'ris vola'ris profun'dus**, branch of ulnar nerve distributed to deep muscles of the palm. **N. va'gus**, pneumogastric nerve. **N. va'gus cum accesso'rio**, spinal nerve. **N. vasomoto'rius**, trisplanchnic nerve. **N. voca'lis**, pneumogastric nerve. **N. zygomat'icus**, orbital nerve.

Nes. Nasus.

Nesis, na'sis. Suture.

Nes'pite. Melissa calamintha.

Ness'ler's rea'gent. Very delicate test for ammonia. It consists of an alkaline solution of potassium iodide and mercuric chloride. If ammonia is present even in only a very small quantity in water, a slight reddish-yellow tinge ensues upon addition of the test.

Nest, ed'ible. Nest of some birds regarded by the Chinese as a delicacy.

Nestia, nes-te'ah. Fasting; jejunum.

Nestiatria, nes-te-at-re'ah (*nestis*, *iatreia*, medical treatment). Hunger-cure; cure by fasting.

Nes'tis (a faster). Jejunum.

Nestitherapeia (nes-te-ther-ap-e'ah) or **Nestotherapeia**, nes-to-ther-ap-e'ah (*nestis*, fasting, *therapeia*, treatment). Hunger-cure; cure by fasting.

Nestoposia, nest-o-po'ze-ah (*nestis*, fasting, *posis*, drinking). The act of drinking on an empty stomach.

Nest'root. Monotropa uniflora.

Net'leaf. Goodyera pubescens.

Netraneurysma, net-ran-u-riz'mah (*netron*, spindle, *aneurusma*). Aneurism of the first form in variety.

Net'ting. Urine.

Nettle (net'l), **archan'gel, white.** Lamium album. **N., day**, Lamium album. **N., dead**, Lamium album, L. amplexicaule. **N., dwarf**, Urtica urens. **N., hedge**, galeopsis. **N., horse**, Solanum Carolinense. **N., lich'en**, see *Lichen*. **N., pill'-bearing**, Urticaria pilulifera. **N., sting'ing, common**, urtica. **N. tree**, Celtis occidentalis.

Nettlerash, net'l-rash. Urticaria.

Net'wort. Goodyera pubescens.

Neubauer's test. Test for sugar. Solution of indigo-carmine alkalized by sodium carbonate. If a drop of saccharine urine is added to a hot solution, the color changes to purple, red, and pale yellow.

Neu'ber's tubes. Drainage-tubes of bone.

Neurad, nu'rad. Toward the cerebro-spinal axis.

Neuradynamia, nu-rad-in-am'e-ah (*neuron*, *dunamis*, power). Neurasthenia.

Neuræmia, nu-re'me-ah (*neuron*, nerve, *haima*, blood). See *Nervous diseases*.

Neuræmic, nu-re'mik. See *Nervous diseases*.

Neural, nu'ral (*neuron*). Relating to a nerve or to the nervous system or centres. **N. a'læ**, see *Neural arch*. **N. arch**, formed by the posterior projections connected with the body of the vertebra, which protect the medulla. Each arch, with the pedicle—*neural pedicle*—and body, forms a segment of the *neural tube*. The alæ of the arches are the *neural alæ*. **N. ax'is**, spinal cord; see *Encephalon*. **N. canal'**, spinal canal. **N. cav'ity**, one of the two great cavities which may

be said to be enclosed in the arrangement of the segments of the skeleton, including the cranium and the vertebral canal. **N. crest**, projection of ectodermal cells on superior margin of the medullary groove, from which the dorsal nerves in embryo originate. **N. fora'men**, foramen vertebrale. **N. ped'icle**, see *Neural arch.* **N. sep'tum**, row of processes of deep fascia existing on median line posteriorly. **N. spines**, spinous processes. **N. tube**, tube formed by closure of the medullary groove of the epiblast; see *Neural arch.*

Neuralgia, nu-ral'je-ah (*neuron, algos*, pain). *Nervous pain* or *pang, Spasmodic tic.* Generic name for a number of diseases, the chief symptom of which is a very acute pain, exacerbating or intermitting, which follows the course of a nervous branch, extends to its ramifications, and seems, therefore, to be seated in the nerve. The principal neuralgiæ have been distinguished by the names *facial* (of which the *infra-orbitar, maxillary*, and *frontal* are but divisions), the *ilioscrotal, intercostal, femoropopliteal, femoropretibial, plantar*, and *cubitodigital.* A division of *anomalous* neuralgiæ has likewise been admitted. **N., anom'alous**, neuroses, some of which are characterized by acute pains circumscribed within a short compass or extending by irradiations, but not having their seat in the course of a nerve, and others which are occasioned by tumors in the course of a nerve or which succeed contusions or incomplete divisions of nerves. **N., artic'ular**, arthralgia. **N. brachia'lis**, brachialgia. **N. brachiothorac'ica**, angina pectoris. **N. cardi'aca**, angina pectoris. **N. cerebra'lis**, hemicrania. **N. cœli'aca**, neuralgia of the solar plexus. **N. cor'dis**, angina pectoris. **N. crura'lis**, N. femorotibialis. **N. cubitodigita'lis.** In this variety the pain extends from the part where the nerve passes under the inner condyle to the back of the hand and to its cubital edge. **N. denta'lis**, odontalgia nervosa. **N., epilep'tiform**, variety of neuralgia characterized by very sudden and exceedingly painful attacks of pain following course of fifth nerve. **N., fa'cial**, *Tic douloureux, Face-ague, Fothergill's face-ache*, is characterized by acute lancinating pains, returning at intervals, and by twinges in certain parts of the face, producing twitches in the corresponding muscles; it may be seated in the frontal nerve, in the infraorbitar, or in the maxillary branch of the fifth pair. *Metopodynia, Brow-ague, Brow-pang, Tic douloureux*, commences at the superciliary foramen and extends along the ramifications of the frontal nerve that are distributed on the forehead, upper eyelid, caruncula lacrymalis, and nasal angle of the eyelids. *N. infra-orbitaria, Infra-orbitar neuralgia, Tic douloureux*, is chiefly felt in the infra-orbital foramen, whence it passes to the cheeks, upper lip, ala nasi, lower eyelid, etc. In *N. maxillaris, Tic douloureux*, the pain usually sets out from the mental foramen and passes to the chin, lips, temple, teeth, and tongue. **N., false**, term assigned to pains along a nerve or its ramifications produced by some body compressing it—those pains terminating with the removal of the compressing cause. **N. femoropoplitæ'a**, *Hip-gout*, pain following the great sciatic nerve from the ischiatic notch to the ham, and along the peroneal surface of the leg to the sole of the foot. Often considered to be a form of rheumatism, *Rheumatism of the hip.* **N. femoroprætibia'lis**, *Crural neuralgia;* the pain, setting out from the groin, spreads along the fore part of the thigh, and passes down, chiefly on the inner side of the leg, to the inner ankle and back of the foot. **N. fronta'lis**, see *N., facial.* **N., gen'eral**, form of neuralgia in which pain is experienced in various parts of the body. **N. of the heart**, angina pectoris. **N. hepat'ica**, hepatalgia. **N., hyster'ical**, neuralgia coexisting with hysteria. **N., ilioscro'tal**, is rare; characterized by a very acute pain in the course of the branches of the first lumbar pair; pain follows the crista ilia and accompanies the spermatic vessels to the testicle, which is often painfully retracted. **N., infra-or'bitar**, see *N., facial.* **N. ischiad'ica**, N., femoropopliteal. **N., lead**, N. caused by poisonous effects of lead; see *Lead rheumatism.* **N. lie'nis**, splenalgia. **N. mam'mæ**, *Irritable breast;* exceedingly painful affection of the female mamma, unaccompanied by inflammation. **N. maxilla'ris**, see *N., facial.* **N. planta'ris**, erythomelalgia; neuritis of the plantar nerves; a rare disease, in which pain is confined chiefly to the course of the plantar nerves, and is usually met with in the male. **N. re'num**, nephralgia. **N. spina'lis**, spinal irritation. **N. tes'tis**, orchidalgia. **N. tympan'ica**, otalgia caused by an inflamed condition of the tympanic plexus. **N. u'teri**, hysteralgia. **N. ventric'uli**, cardialgia.

Neuralgic, nu-ral'jik. Pertaining to neuralgia.

Neuralward, nu'ral-ward. Neurad.

Neuranagenesis (nu-ran-ah-jen-e'sis) or **Neuranagene'ma** (*neuron, anagennao*, to regenerate). Regeneration or renewal of a nerve.

Neuranaphysis, nu-ran-af'is-is (*neuron, ana*, again, *phuo*, to grow). Neuranagenesis.

Neurapophysis, nu-rap-of'is-is. See *Vertebræ.* **N., gas'tric**, dyspepsia, nervous. **N. ret'inæ**, asthenopia.

Neurarteria, nu-rar-te're-ah (*neuron*, nerve, *arteria*, artery). Close connection existing between small nerves and small arteries.

Neurasthenia, nu-ras-then-e'ah (*vulg.* nu-ras-the'ne-ah) (*neuron, astheneia*, debility). Debility or impaired activity of the nerves or of the nervous system generally; nervous exhaustion. **N. gas'trica**, weak digestive action from nervous debility or exhaustion.

Neuratrophia, nu-rat-rof'e-ah (*neuron*, nerve, *atrophia*, wasting). Atrophy of nerves.

Neuratrophic, nu-rat-rof'ik. Relating to imperfect supply of nerve-food.

Neuraxis, nu-raks'is. See *Axis, cerebro-spinal.*

Neurec'tasis. Neurectasy.

Neurectasy, nu-rek'ta-se (*neuron*, nerve, *ekteino*, to stretch). Nerve-stretching.

Neurectomy, nu-rek'to-me (*neuron, ektome*, excision). Excision of a nerve, in whole or in part. **N., op'tico-cil'iary**, operation consisting of exsection of ciliary part of nerves and optic nerves.

Neurectopia, nu-rek-to'pe-ah (*neuron, ektopos*, out of place). Condition in which displacement of a nerve exists.

Neurempodism, nu-rem'pod-izm. Condition in which hindrance to nervous action exists.

Neurenteric (nu-ren-ter'ik) **canal'** (*neuron, enteron*, intestine). Temporary passageway existing between neural and enteric tubes in the embryo.

Neuria, nu're-ah. Delicate nervous tissue.

Neuriasis, nu-re'as-is. Condition in which hysteria and hypochondriasis coexist.

Neuriatria, nu-re-at-re'ah (*neuron*, nerve, *iatriea*, treatment). Neurotherapeutics.

Neuric, nu'rik (*neuron*). Nervous.

Neuricity, nu-ris'it-e. Nerve-force.

Neuridine, nu'rid-een. $C_5H_{14}N_2$. Ptomaïne produced in the putrefaction of albuminous substances, as horse-flesh, beef, human muscle, cheese, etc.; non-poisonous. It is usually associated with choline; it is isomeric with cadaverine. See *Ptomaïnes* (table).

Neurilemma, nu-ril-em'mah (*neuron, lemma*, coat). Fine, transparent, and apparently fibrous membrane surrounding the nerves, consisting of connective tissue having a distinctly lamellar arrangement. The pia mater of the spinal cord forms its neurilemma.

Neurilemmatitis (nu-re-lem-mat-e'tis) or **Neurilemmitis**, nu-re-lem-me'tis (*neurilemma, itis*). Inflammation of the neurilemma.

Neurility, nu-ril'it-e (*neuron*). Property possessed by nerve-fibre of exciting contraction in a muscle, secretion in a gland, and sensation in a ganglionic centre.

Neurilyma, nu-re-le'mah (*neuron, eiluma*, covering). Neurilemma.

Neurine, nu'reen (*neuron*). Substance of which the nervous system is composed. It consists chiefly of albumen and a peculiar fatty matter, associated with phosphorus. There are two kinds of neurine—the one *vesicular*, or consisting essentially of *nerve-vesicles*

or *nerve-cells* or *corpuscles*, or, as they are sometimes called from their prevailing in the ganglia, *ganglion corpuscles* and *ganglion globules;* the other, *tubular*, formed—as the word imports—of tubules. The former is the *cineritious* or *cortical* nervous matter of older anatomists; the latter, the *white* or *medullary*. The vesicular neurine has appeared to be restricted to the production and distribution of nerve-power; the tubular, to its conduction. Most of the nerve-cells are furnished with one process, hence termed *unipolar;* others have two processes—*bipolar;* and others again have several—*multipolar;* while others are devoid of processes—*apolar*.

Also a poisonous ptomaïne, $C_5H_{13}NO$, of the choline group, found in decomposing cadavers, brain-matter, horse-flesh, etc.; as a poison it resembles muscarine; atropine is a direct antagonist to it. See *Ptomaïnes* (table).

Neuriorrhabdia, nu-re-or-rhab'de-ah (pl. of **Neuriorrhabdeum**) (*neuron*, little nerve, *rhabdion*, little rod). Corpora virgæformia retinæ; rod-like bodies of the retina.

Neurischias, nu-ris'ke-as. Neuralgia femoropoplitæa.

Neurism, nu'rizm. Nervosism.

Neuristos, nu-rist'os. Nervous tissue.

Neuritic, nu-rit'ik. Relating to neuritis; nervine.

Neuritis, nu-re'tis (*neuron, itis*). Inflammation of a nerve. **N., alcohol'ic,** neuritis due to excess in alcoholic drinks. **N., can'cerous,** neuritis due to nerve being affected by cancer. **N., mult'iple,** see *Multiple*. **N., op'tic,** neuroretinitis. **N., op'tic, ascend'ing,** see *Neuroretinitis*. **N., optic, descend'ing,** see *Neuroretinitis*. **N., periph'eral,** inflammation of terminal extremities of nerves on the surface of the body. **N., re'tro-oc'ular,** see *Neuroretinitis*.

Neuro-anatomy, nu'ro-an-at'om-e. Anatomy relating to the nervous system.

Neuroblacia, nu-ro-blah'se-ah (*neuron, blakeia*, stupor). Insensibility of the nerves.

Neuroblasts, nu'ro-blasts. Component elements of nervous system.

Neurocanal, nu-ro-kan-al'. Myelocœle.

Neurocele, nu-ro-se'le (Eng. nu'ro-seel) (*neuron*, nerve, *koile*, cavity). Cavity in which the central nervous system is contained.

Neurochondrodes, nu-ro-kon-dro'dees (*neuron, chondros*, a cartilage, *odes*). Hard substance between a sinew and cartilage.

Neurochondrous (nu-ro-kon'drus) or **Neurochon'droid.** Fibro-cartilaginous.

Neurocyte, nu'ro-site (*neuron, kutos*, cell). Nerve-cell.

Neurodealgia, nu-ro-de-al'je-ah (*neurodes, tunica*, retina, *algos*, pain). Pains occurring in the retina.

Neurodeatrophy, nu-ro-de-at'ro-fe (*neurodes, tunica*, retina, *atrophy*). Atrophy of the retina.

Neurodermatosis, nu-ro-durm-at-o'sis. Cutaneous neurosis.

Neurodermatrophia, nu-ro-durm-at-ro'fe-ah. Condition due to perverted innervation, in which the skin is thin in spots, generally very white, and atrophy and anæsthesia are present.

Neurodes, nu-ro'dees (*neuron, odes*). Nervous.

Neurodiastasis, nu-ro-de-ast'as-is. Stretching of a nerve.

Neurodictyitis, nu-ro-dik-te-e'tis. Neuroretinitis.

Neurodynamia, nu-ro-din-am'e-ah (*neuron, dunamis*, power). Nervous power.

Neurodynamis, nu-ro-din'am-is. Nervous power.

Neurodynia, nu-ro-din'e-ah (*neuron, odune*, pain). Neuralgia.

Neurodysentery, nu-ro-dis'en-ter-e. Dysentery, typhoid.

Neu'ro-epithe'lium. Layer of rods and cones in the retina.

Neurofibroma, nu-ro-fib-ro'mah. Condition in which nerve-tissue is in a hyperplastic stage, but the nerve-fibres are not increased.

Neurofrontal, nu-ro-frun'tal. Relating to brain and frontal bone.

Neurogamia, nu-ro-gam'e-ah (*neuron, gamos*, marriage). Magnetism, animal.

Neurogangliitis, nu-ro-gan-gle-e'tis (*neuron*, nerve, *ganglion*, tumor). Inflammation of a nervous ganglion.

Neurogeny, nu-roj'en-e (*neuron, genesis*, production). Production of nerves.

Neuroglia, nu-rog'le-ah (*neuron, glia*, glue). *Perineurium of the brain.* Term proposed by Virchow for a delicate stroma of retiform tissue in the brain and spinal cord, constituting an investing and supporting framework. See *Glioma*.

Neuroglioma, nu-ro-gle-o'mah. Tumor containing nervous and gliomatous elements.

Neurography, nu-rog'ra-fe (*neuron, graphe*, description). The part of anatomy describing the nerves.

Neurohypnology, nu-ro-hip-nol'o-je (*neuron, hupnos*, sleep, *logos*, treatise). Magnetic sleep. See *Magnetism, animal*.

Neurohypnotism, nu-ro-hip'no-tizm. See *Magnetism, animal*.

Neuroid, nu'roid (*neuron, eidos*, form). Resembling a nerve or nerve-substance.

Neurokeratin, nu-ro-ker'at-in (*neuron*, nerve, *keras*, horn). Substance entering into composition of gray brain-matter.

Neurokinesis, nu-ro-kin-a'sis. Stretching of a nerve.

Neurolemmatitis, nu-ro-lem-mat-e'tis. Neurilemmitis.

Neurologist, nu-rol'o-jist. One versed in neurology and nervous affections.

Neurology, nu-rol'o-je (*neuron, logos*, discourse). The part of anatomy treating of the nerves.

Neurolymph, nu'ro-limf. Cerebrospinal fluid.

Neurolysis, nu-rol'is-is (*neuron, lusis*, solution). Exhausted condition of a nerve, due to excessive stimulation.

Neuroma, nu-ro'mah (*neuron*). Nerve-tumor; morbid enlargement of a nerve. Applied to subcutaneous, circumscribed, and highly painful tumors formed on the tissue of the nerves; and likewise to a small, hard, grayish tumor, *Neuromation, Nervous ganglion, Painful tubercle, Tubercula dolorosa*, the size of a pea, observed in the course of nerves and formed from the neurilemma. As a general rule, a neuroma is a small fibrous tumor embedded in the nerve or enveloped in the neurilemma; growth of nerve-fibres mixed with connective-tissue formation; *true neuroma*. When the end of a divided nerve becomes enlarged from fibrinous effusion, and consequently bulbous, a *traumatic neuroma* is formed. Such a neuroma—*amputation neuroma*, as it is then called—may occur after amputation. **N., amputa'tion,** see *Neuroma*. **N. amyelin'icum,** in this form of neuroma the fibres are non-medullated. **N. cu'tis,** cutaneous tumor of connective tissue originating from the neurilemma. **N. cys'ticum,** myxoma in nerves containing cysts. **N., false,** form of tumor in which there is no formation of nerve-fibres, as fibroma, myxoma, glioma, sarcoma, carcinoma, etc. when occurring in nerves. **N. myelin'icum,** neuroma in which the fibres are medullated. **N., true,** see *Neuroma*.

Neuromalacia (nu-ro-mal-ah'se-ah) or **Neuromalax'is** (*neuron, malakia*, softening). Softening of nerves.

Neuromantia, nu-ro-man-te'ah (*neuron, manteia*, prophecy). Subcutaneous tubercle.

Neuromation, nu-ro-mat'e-on. Neuroma.

Neuromatoid, nu-ro'mat-oid (*neuroma, eidos*, resemblance). Resembling neuroma, as a neuromatoid tumor.

Neuro'matous. Resembling neuroma; having character of neuroma.

Neuromere, nu'ro-mere. Part of cerebro-spinal axis.

Neurometadrasis, nu-ro-met-ah-dra'sis. Magnetism, animal.

Neurometastasis, nu-ro-met-ast'as-is. Metastasis to the nervous system.

Neurometræ (nu-ro-me'tre) or **Neuromet'ores.** Psoæ.

Neuromimesis, nu-ro-mim-a'sis. Nervous affection in which patient simulates disease.

Neuromus'cular, nu-ro-mus'ku-lar. Said of medicine acting simultaneously on nerves and muscles.

Neuromyalgia, nu-ro-me-al'je-ah (*neuron,* nerve, *mus,* muscle, *algos,* pain). Rheumatism, articular.

Neuromyelitis, nu-ro-me-el-e'tis (*neuron, muelos,* marrow, *itis*). Inflammation of the medullary matter of the nerves.

Neuromyelous (nu-ro-mi'el-us), **Neuromyelo'des,** or **Neuromyeloï'des.** Resembling nerve or medullary tissue.

Neuromyol'ogy. System of classifying and naming muscles with reference to the nerves; myology based upon neurology.

Neuromyopathic, nu-ro-mi-o-path'ik. Relating to disease involving nerves and muscles.

Neuromyxoma, nu-ro-miks-o'ma (*neuron,* nerve, *muxa,* mucus). Myxoneuroma.

Neu'ron. See *Nerve.*

Neurona'sal arch. Rhinencephalic arch.

Neuroneoplas'ma (*neuron, neos,* new, *plasma,* formation). See *Neuroma.*

Neuronephric, nu-ro-nef'rik (*neuron, nephros,* kidney). Relating to the nerves and kidneys.

Neuron'osi of the skin. Division in classification of skin diseases, denoting diseases of the nerves of the skin.

Neuron'osos or **Neuron'osus** (*neuron, nosos,* disease). Disease of the nerves.

Neuronygme (nu-ro-nig'me) or **Neuronyg'mus** (*neuron, nugme,* puncture). Puncture of a nerve.

Neuronyx'is. Neuronygme.

Neuro-occip'ital arch. Epencephalic arch.

Neuroparal'ysis. Nervous shock.

Neuroparietal, nu-ro-par-i'et-al. Relating to neural arch and to parietal bone. **N. arch,** mesencephalic arch.

Neu'ropath (*neuron, pathos,* disease). A physician who ascribes diseases, etc. to nervous influence rather than to the blood, etc. Also a person of nervous organization liable to or exhibiting nerve diseases.

Neuropathi'a. See *Neuropathic.*

Neuropath'ic (*neuron, pathos,* affection). *Nervopathic.* Belonging to disease of the nerves, neuropathia, neuronosus, neuropathy. See *Neuroses.*

Neuropatholog'ical (*neuron, pathos,* disease, *logos,* description). Belonging or related to neuropathology.

Neuropathol'ogy (same etymon). Doctrine of the influence of the nerves in causing diseased conditions, as inflammation, etc. Also pathology of the nervous system.

Neurop'athy. Disease of the nervous system. **N., cer'ebro-car'diac,** nervous cardiac disease due to pathological condition of medulla oblongata and cortex cerebri.

Neurophlegmone, nu-ro-fleg'mo-ne (*neuron, phlegmone,* inflammation). Neuritis.

Neurophlogosis, nu-ro-flog-o'sis (*neuron, phlogosis,* inflammation). Neuritis.

Neurophonia, nu-ro-fon'e-ah. Form of hysteria in which patients utter sounds resembling the barking of dogs.

Neurophysiol'ogy. Physiology of nervous system.

Neuroplasia, nu-ro-plaz'e-ah (*neuron,* nerve, *plasso,* to mould). Neuromatous diathesis.

Neuroplas'tice. Neuroplasty.

Neuroplasty, nu'ro-plas-te (*neuron, plastikos,* forming). Ganglionary alteration of the peripheral nerves. Also plastic surgery of nerves.

Neuroploca, nu-rop'lok-ah. Nervous ganglion.

Neuroploconarcosis, nu-ro-plok-o-nark-o'sis. Loss of sensibility of nervous ganglion.

Neu'ropore. An orifice of communication between the neural canal and the exterior in embryos of some animals.

Neuroprosopalgia, nu-ro-pros-op-al'je-ah (*neuron, prosopon,* face, *algos,* pain). Trigeminal neuralgia.

Neuropsychology, nu-ro-si-kol'o-ge. Neurology including psychology.

Neuropsychopathic, nu-ro-si-ko-path'ik. Pertaining to diseases of the nervous system, including those parts of it subserving psychic functions. **N. constitu'tion,** permanent condition of irritable weakness of the nerve-centres, especially the higher psychical ones.

Neuropurpuric (nu-ro-pur'pu-ric) **fe'ver** (*neuron, porphura,* purple). Fever, purpuric malignant, cerebrospinal.

Neuropyra (nu-rop'ir-ah) or **Neuropyr'etus** (*neuron, pur,* fire, fever). Nervous fever; typhus mitior.

Neuropyret'ic. Pertaining to fever of nervous origin.

Neuroretinitis, nu-ro-ret-in-e'tis (*neuron, retina*). *Optic neuritis.* Inflammation of the optic nerve and retina. Two forms are described: *ascending,* sometimes called *engorged papilla,* the inflammation commencing in the papilla or optic disk, and extending upward along the trunk of the nerve; and *descending,* in which the inflammation commences externally and travels downward to the optic disk. In *retro-ocular neuritis* the structural changes do not extend to the papilla, and do not implicate the whole trunk of the optic nerve continuously.

Neurorrhaphy, nu-ror'rhaf-e (*neuron, rhaphe,* suture). Suture of a nerve that has been divided.

Neuro'sal. Of the nature of or pertaining to a neurosis; originating in the nervous system.

Neurosclerosis, nu-ro-skler-o'sis (*neuron, skleros,* hard). Sclerosis affecting the tissue of nerves.

Neuroses, nu-ro'sees (pl. of **Neurosis**). Diseases of the nervous system. See *Neurosis.*

Neuro'sis (*neuron, osis*). Generic name for diseases of the nervous system, indicated by disordered sensation, volition, or mental manifestation, without any evident lesion in the structure of the parts, and without any material agent producing them. **N., alcohol'ic,** neurosis caused by over-indulgence in alcohol. **N., epilep'tic,** neurosis caused by epilepsy. **N., re'flex,** a functional disease originating in a part or organ distinct from that to which it is referred; may result in organic lesions. **N., restraint',** see *Inhibitory.* **N. traumat'ica,** railway spine. **N., vas'cular,** angeioneurosis.

Neuroskel'eton. See *Skeleton.*

Neurospas'mi. See *Spasm.*

Neurospongium, nu-ro-spon'je-um. Inner granular layer of retina.

Neurostear'ic ac'id. A glycero-phosphoric acid in which the H of the alcoholic hydroxyl is replaced by a radical of stearic acid, and one atom of phosphoric acid by the base, neurine. **N. e'ther,** derived from phrenosin by action of sulphuric acid and alcohol.

Neurostheni'a (*vulg.* nu-ros-the'ne-ah) (*neuron, stheneia,* strength). Excess of nervous irritation; nervous irritability.

Neurostremma, nu-ro-strem'ma (*stremma,* twist). Nerve-ganglion.

Neurotabes, nu-rot-ab'ees. Condition in which the sensory and motor apparatus are affected, caused by inflammation of the periphery of the nerves.

Neurothe'le (*neuron, thele,* nipple). Nervous papilla.

Neurotheleitis, nu-ro-thel-e-e'tis. Inflammation of nerve-papilla.

Neurothe'lic appara'tus. Corpus papillare.

Neurothelion, nu-ro-the'le-on. Small nerve-papilla.

Neurotherapeu'tics or **Neurotherapy,** nu-ro-ther'a-pe. Therapeutics of nervous diseases.

Neurothlipsis, nu-ro-thlip'sis (*thlipsis,* irritation). Irritation of a nerve.

Neurot'ic. Relating to neurosis; nervine. See *Neurotics.*

Neurot'ica. Diseases of the nervous function.

Neurot'ics. Remedies, drugs, or poisons especially affecting the nervous system. Three classes—*Cerebral neurotics,* as morphia; *Spinal neurotics,* as strychnia; and *Cerebrospinal neurotics,* as conia and aconitia—are described.

Neu'rotome (*neuro, tome,* dissection). An instru-

ment used by anatomists to dissect the nerves; a long, very narrow scalpel, having two edges. Also applied by Goodsir to the section of the skeleton embraced in the nervous system.

Neurotom'ical. Pertaining to neurotomy.

Neurot'omy (*neuron, tome,* incision). Dissection of nerves. An incised wound and section of a nerve.

Neuroton'ic. Medicine employed to strengthen the nervous system.

Neurotraumat'ic (*neuron, trauma,* wound). Relating to or connected with injuries of nerves, as neurotraumatic eruptions.

Neu'rotripsy (*tribo,* to crush). Nerve-crushing.

Neurotroma, nu-ro-tro'mah. *Neurotrauma.* Nerve wound.

Neurotrophasthenia, nu-ro-trof-as-then-e'ah (*neuron, trophe,* nourishment, *astheneia,* loss of strength). Malnutrition of the nervous system.

Neurotrophic, nu-ro-trof'ik. Relating to nutrition of the nervous system. Pertaining to or dependent upon trophic influence coming through the nerves.

Neurotro'sis (*neuron, trosis,* wounding). Wound or wounding of a nerve.

Neurotros'mus. Neurotrosis.

Neurotrotous, nu-ro-trot'us. Suffering from neurotrosis.

Neurovarico'sis. Formation of varicose swellings on nerve-fibres. It is termed filovaricosis when affecting the axis-cylinder only; myelovaricosis when affecting the myelin sheath.

Neu'rymen (*neuron, humen,* membrane). Neurilemma.

Neurymenitis, nu-ri-men-e'tis. Neurilemmitis.

Neurypnol'ogist, Neurypnol'ogy. See *Neurohypnologist, Neurohypnology.*

Neu'ta or **Neuth'a.** A membrane, according to Paracelsus, covering the eyes and ears of the fœtus in utero.

Neuter, nu'ter. Hermaphrodite.

Neu'tral (*neuter,* neither). Belonging to neither in particular. **N. mix'ture,** liquor potassii citratis. **N. salts,** *Secondary salts;* salts composed of two primitive saline substances combined together, and not possessing the characters of acid or of base.

Neutraline, nu'tral-een. A commercial form of petroleum.

Neutraliza'tion. The rendering inactive of peculiar properties; complete counteraction of the effect of morbid agents.

Neutrophile, nu'tro-file. Readily stained by neutral reagents.

Nevus. Nævus.

Newbould'ia læ'ris. Tree, native of Africa, possessing astringent, tonic, and oxytocic properties.

New-forma'tion. Neoplasm.

New Grana'da bark. Variety of cinchona.

New Jer'sey tea. Red root; small indigenous shrub, ord. Rhamnaceæ, found in most parts of U. S. Root astringent, imparts red color to water. During the Revolutionary War the leaves were used as a substitute for tea. Infusion of dried leaves and seeds has been recommended in aphthous stomatitis and scarlatinous angina.

New Zealand flax. Phormium tenax; used in place of sarsaparilla.

Nex'us nervo'rum optico'rum. Chiasm. **N. stamin'eus oc'uli** (stamineous connection of the eye), ciliary body.

Ngai cam'phor. $C_{10}H_{18}O$. Variety obtained in China and Burmah by distillation of Blumea balsamifera; same composition as Sumatran.

Ngerengere. *Lepra gangrænosa.* Singular disease in New Zealand, a variety of such diseases as elephantiasis Græcorum, lepra of the Cossacks, etc. Similar affection in Jamaica is called *Cacubay.*

Nican'dra anom'ala (after Nicander, a physician of Colophon). Anisodus luridus. **N. physaloi'des,** Peruvian apple, naturalized in U. S.; berries are diuretic.

Nicara'gua wood. See *Cæsalpinia.*

Nic'colate. Compound of niccolic oxide, which is basic or acid.

Nic'coli sa'les. *Salts of nickel.* These salts are gentle tonics, and have been given with advantage in periodic headache and neuralgia, chlorosis and amenorrhœa. Dose of the sulphate, *Niccoli sulphas,* is gr. ss or gr. j three times a day. The other salts are **N. ac'etate, N. bro'mide,** $NiBr_2$; green odorless crystals of acrid, burning taste, sparingly soluble in water, alcohol, or ether; obtained by action of bromine upon heated metallic nickel; used in epilepsy, melancholia, and hysteria. **N. chlo'ride,** $NiCl_2$; yellow crystalline unctuous salt, formed by heating nickel in a current of dry chlorine; hydrated salt green and very deliquescent; recommended as a tonic in anæmia. *N. benzoate, N. carbonate, N. citrate, N. cyanide, N. hydroxide, —hydrated oxydulate—N. iodide, N. nitrate, N. oxalate, N. oxide,* black (sesquioxide), green, *N. protoxide,* niccolous hydroxide, *N. phosphate, N. tartrate,* have also been used. **N. sul'phate,** $NiSO_47H_2O$; green crystalline, efflorescent; sweet, styptic taste; readily soluble in water, insoluble in alcohol; prepared by dissolving the carbonate in dilute sulphuric acid, concentrating, and crystallizing; recommended by Simpson (1852) as a tonic and antiperiodic.

Niccolicus, nik-kol'ik-us. Niccolic; belonging to nickel.

Nic'colite. A mineral compound of arsenic and nickel, containing 44 per cent. of latter.

Nic'colum. Nickel.

Nick'ar tree. Gymnoclaudus Canadensis.

Nick'el (from [G.] *nickel,* prostitute). A term of detraction applied by the old German writers to what was regarded as a kind of false copper ore. A white malleable metal, s. g. 8.8; less oxidizable than iron. Several preparations of nickel have been employed medicinally; see *Niccoli sales.* **N. and ammo'nium** chloride, citrate, nitrate, and sulphate have been employed, as has also nickel and potassium sulphate. **N. carb'onyl,** volatile liquid obtained by passing a stream of carbonic oxide over finely-divided nickel; but not of therapeutic value at present, as its vapor causes intense headache. **N., salts of,** niccoli sales.

Nick'er-seed oil. Derived from bonduc seed; used as embrocation.

Nick'ing. Myotomy of caudal depressor muscles in horses.

Nicol's prism. Prism of Iceland spar, used for polarizing light.

Nicolum, nik'ol-um. Nickel.

Nico'tia. See *Nicotiana tabacum.*

Nicotia'na (after Jean Nicot, who first introduced it into Europe about 1560). N. tabacum. **N. a'qua,** preparation of tobacco made by adding alcohol and water to the cut fresh green leaves, and distilling. Said to be sedative and diaphoretic without possessing the dangerous qualities of other preparations of tobacco. **N. Mexica'na, N. mi'nor, N. pilo'ra, N. pusil'la, N. rus'tica,** or **N. trigonophyl'la,** *English* or *Wild tobacco;* leaves possess the properties of tobacco, but are milder. **N. tab'acum,** *Tabacum* (Ph. U. S), *Tabaci folia* (Ph. B.), *Tobacco, Virginia tobacco, Drunkwort.* Tobacco is a violent acronarcotic, its properties seeming to depend upon a peculiar principle, *Nicotin, Nicotia, Nicotina, Nicotylia,* or *Nicotianin.* It is narcotic, sedative, diuretic, emetic, cathartic, and errhine. In incarcerated hernia it is injected in the form of smoke or infusion, but requires great caution. Extensively and habitually used as an errhine and sialagogue. Infusion is used to kill vermin and in some cutaneous eruptions. The crude oil, *Nicotianin,* is supposed to be the juice of "the cursed *hebenon*" described by Shakespeare as "the lep'rous distilment" poured into the ear of Hamlet's father.

Nicotianin, nik-o-she-an'in. Tobacco camphor; white, neutral, crystalline compound which separates from aqueous distillate of tobacco.

Nicotianismus, nik-o-she-an-iz'mus. Nicotinism.

Nicotianomania, nik-o-she-an-o-man'e-ah. Inordinate craving for tobacco.

Nicotianus, nik-o-she-an'us. Relating to tobacco, or due to effect of tobacco.

Nicotin or **Nicotine,** nik'o-teen. An active, color-

less, volatile, strongly alkaline, very soluble alkaloid; a depressant, neurotic, and rapidly fatal poison, producing symptoms known as nicotinism or nicotism. **N. bitar'trate,** white, soluble salt, from nicotine; a convenient form of administering it in tetanus, poisoning from strychnine, etc.

Nic'otinism. Condition arising from excessive use of tobacco; in addition to profound depression of the nervo-muscular system there are at times severe organic lesions, which have given rise to such terms as "tobacco heart," "tobacco amblyopia," etc.

Nicotyl'ia. See *Nicotiana tabacum.*

Nicta'tio. Hippus; nictation.

Nicta'tion or **Nictita'tion** (*nicto,* to wink). *Twinkling of the eye;* rapid and repeated motion of the eyelids, which open and shut alternately; if repeatedly performed, it is a disease. It seems to be executed chiefly by the motor 7th pair of nerves, but the excitor 5th pair must likewise be in a state of integrity.

Nic'titating mem'brane. See *Membrana nictitans.*

Nidamen'tum (*nidus,* nest). Decidua.

Nidation, ni-da'shun (*nidus*). Periodical development of epithelial lining of body of uterus during the intermenstrual period.

Nidor, nid'or. Putrefactive change which food undergoes in certain forms of dyspepsia.

Ni'dorous (*nidor, cnissa,* smell of anything burnt, etc.). Iridose. Having the smell of rotten eggs.

Nidularion, nid-u-lar'e-on. Mycelium of fungi.

Ni'dus, (nest). Focus or point of infection; nucleus; collection of nerve-cells; nerve-centre. **N. edulen'tus,** see *Nest, edible.* **N. hirun'dinis,** *Swallow's nest;* deep fossa in the cerebellum—so called from its fancied resemblance—situate between the velum medullare posterius in front and the nodulus and uvula behind.

Niepa bark. See *Samadera Indica.*

Nigel'la (*niger,* black, in allusion to seed). Coptis. **N. arven'sis,** wild fennel flower, has properties like those of Nigella sativa. **N. sati'va,** ord. Ranunculaceæ; *Fennel flower, Nutmeg flower, Devil in a bush.* This small European and Syrian plant was formerly used medicinally as an expectorant and deobstruent, errhine, sialagogue, etc.

Nigellin, nij-el'lin. Extract from seeds of Nigella sativa.

Nightblind'ness. Hemeralopia; nyctamblyopia.

Night-bloom'ing ce'reus. Cactus glandiflora; flowers are used in functional cardiac troubles, angina pectoris, etc.

Night'eyes. Crusta genu equinæ.

Night'mare. Incubus.

Night-palsy. A nocturnal numbness of the extremities occurring usually in women about the climacteric.

Night'shade, Amer'ican. Phytolacca decandra. **N., bittersweet,** Solanum dulcamara. **N., com'mon,** solanum. **N., dead'ly,** Atropa belladonna. **N., enchant'er's,** Circæa Lutetiana. **N., gar'den,** solanum. **N., Pal'estine,** Solanum sanctum. **N., red,** Phytolacca decandra. **N., stink'ing,** Hyoscyamus niger. **N., vine,** Solanum dulcamara. **N., wood'y,** Solanum dulcamara.

Night'-sight. Nyctalopia.

Night'-soil. Contents of privy vaults. **N.-s. fe'ver,** typhoid fever.

Night'-sweat. Nocturnal hyperidrosis, especially in phthisis and hectic fever.

Night'-terrors. An affection of childhood in which the child awakes screaming in a great fright, as if it had dreamt of some impending danger. A kind of nightmare.

Nigranilin, nig-ran'il-in (*aniline black, blue-black*). A stain having especial affinity for ganglion-cells; much used in study of central nervous system.

Nigre'do acquisita universa'lis. Melasma, universal. **N. cu'tis,** melasma. **N. ab ic'tero nigro,** jaundice, black. **N. scorbu'tica,** melasma caused by scurvy. **N. à so'le** (blackness from the sun), ephelides; melasma.

Nigres'cent. Becoming blackish.

Nigricans, nig'rik-anz. Nigrescent.

Ni'grism. Nigrismus; melanopathia.

Nigris'mus. *Nigrism.* Pigment accumulation; chloasma; melanoderma; the reverse of albinismus; see *Melanopathy.*

Nig'rita. Negro.

Nigrit'ies (blackness). Melanopathy. **N. cu'tis,** see *Melanopathy.* **N. os'sium,** caries.

Ni'gritism. Melanopathia.

Nigritu'do (blackness). Melanosis. **N. pulmo'num,** melanosis pulmonum.

Nigritus, nig-re'tus. Partially black.

Nigromantia, nig-ro-man'she-ah (*niger,* black, *manteia,* divination). Necromancy.

Ni'gror (blackness). Melasma.

Nigrosin, nig'ro-sin. *Bengalin, Indulin, Anilin blue-black, Blackless blue, Artificial indigo.* A peculiar stain, never affecting nuclei. See *Nigranilin.*

Ni'grum oc'uli (black of eye). Pupil.

Nigua. Chigue or chigoe.

Ni'hil al'bum. Zinci oxidum. **N. gris'eum,** zinci oxidum.

Nihilis'mus (*nihil,* nothing). See *Expectation.*

Nilgue. Plant found in Chile, employed as a febrifuge.

Nili'acum (*Nilus,* Nile). Mel.

Nim bark. Bark of *Azadirachta Indica* (P. Ind.); astringent, tonic, antiperiodic. **N. leaves,** stimulant, used locally in ulcers and obstinate skin diseases.

Ni'ma quassioï'des. *Simaba quassioïdes,* a native of Nepal and the Himalaya mountains; as bitter as quassia and used like it.

Nind'sin, Nin'si, or **Nin'zin.** Sium ninsi.

Nine'bark. Spiræa opulifolia; astringent, tonic, vulnerary.

Nine-day fits. Trismus nascentium.

Nin'sing. Panax quinquefolium.

Ninth nerve. Hypoglossal of Willis, glossopharyngeal of Sömmering and majority of anatomists.

Nio'po tree. *Piptadenia peregrina* of tropical America. The natives prepare an intoxicating snuff from the seeds.

Nio'ta bark. Bark of Samadera Indica.

Niphablepsia, nif-ah-blep'se-ah (*niphas,* snow, *ablepsia,* blindness). Snow-blindness. As a preventive Esquimaux wear goggles, "snow-eyes."

Niphotyphlosis, nif-o-tif-lo'sis (*tuphloo,* to make blind). Production of niphablepsia.

Nip'pers, bone. Nippers used for removing particles of bone.

Nip'ple. *Teat, Tit, Tete, Dug, Pap.* The conical tubercle situate at the centre of the breast. Toward the central part of each breast the skin changes color and assumes a rosy tint in young females, or a reddish-brown in those who have suckled several children. The circle is called the *Areola* or *Aureola of the nipple.* It is capable of erection on being excited, and is rudimentary in males. **N., artific'ial,** an arrangement of rubber or ivory to place over the nipple when the infant sucks, soon after delivery, or when the nipple is in a morbid condition. **N., cracked,** fissure of the nipple. **N. line,** reference line drawn vertically through the nipple; used in physical diagnosis.

Nip'plewort. Lapsana, plant used for sore nipples.

Nirles. Herpes phlyctænodes.

Nirlus, nirl'us. Papular eruption sometimes following measles or scarlet fever.

Nirmallees. Strychnos potatorum.

Nirmillies. Strychnos potatorum.

Ni'sus (*nitor,* to endeavor). Straining. A voluntary retention of the breath so as to force down the diaphragm, the abdominal muscles being at the same time contracted forcibly. In this manner the contents of the abdomen are compressed, and the evacuation of the fæces, urine, etc. is effected. Also vernal generative impulse in birds, etc. **N. formati'vus,** plastic force. **N. parturien'tium,** efforts or forcing during parturition.

Nit. See *Nits.*

Nited'ula (*niteo,* to shine). Cicindela.

Nitor, ne'tor. Enamel.

Nitraria (nit-rah're-a) **tridenta'ta.** Supposed to be lotus tree of ancients. Ord. Malpighiaceæ, native of Central Asia and Northern Africa.

Ni'tras. Nitrate. **N. amidohydrargyro'sus,** mercurous ammonium nitrate. **N. ammo'nicus,** ammonium nitrate. **N. argen'ticus,** silver nitrate. **N. argen'ticus fu'sus,** fused nitrate of silver. **N. argen'ticus mitiga'tus,** dilute fused nitrate of silver. **N. bihydrargyro'sus,** basic mercurous nitrate. **N. fer'ricus,** ferric nitrate. **N. hydrargyr'icus,** see *Hydrargyri nitras.* **N. hydrargyr'icus ac'ido-ni'trico solu'tis,** solution of mercuric nitrate. **N. hydrargyro'sus,** hydrargyri nitras. **N. kal'icus,** potassii nitras. **N. lixiv'iæ,** potassii nitras. **N. na'tricum,** sodium nitrate. **N. plum'bicus,** plumbi nitras. **N. potas'sæ cum sulphu're fu'sus,** potassæ nitras fusus sulphatis paucillo mixtus. **N. strych'nicus** or **strychni'nus,** nitrate of strychnine. **N. sub-bismu'thicum,** bismuth subnitrate.

Nitratation, ni-tra-ta'shun. Staining of tissues with silver nitrate.

Ni'trate. *Azotate.* A salt formed of a base and nitric acid. Several nitrates are employed in medicine. **N. of potas'sium pa'per,** paper impregnated with nitrate of potassium, fumes of which afford relief to asthmatics. **N. of so'dium,** *Cubic nitre* or *Nitratine;* salt found in immense quantities in Chile, extensively used in manufacture of nitric acid, and commended as a remedy in dysentery. **N. test,** reagent; see *Acid phenyl sulphate.*

Nitrated, ni'tra-ted. Combined with nitric acid or with nitre.

Nitration, ni-tra'shun. Process or act of introducing into a compound, by substitution, the radical NO_2.

Ni'tre. Potassii nitras. **N., ammoni'acal,** ammonium nitrate. **N., sweet spirits of,** spiritus ætheris nitrosi.

Ni'tric (*nitrum,* nitre). Appertaining or relating to nitre and its compounds. **N. ac'id,** *Nitrous acid, Azotic acid, Dephlogisticated nitrous acid, Oxyseptonic acid, Nitric hydrate* (HNO_3). Nitric acid is obtained from nitre—nitrate of potassium or sodium. Its odor is suffocating; taste very acid and caustic; the acid is fuming, corrosive, liquid, colorless, and transparent. S. g. 1.42, Ph. U. S. Strong nitric acid is rarely used except as an application to foul, indolent ulcers or to warts. When given internally, it is in the form of the *Acidum nitricum dilutum*—diluted nitric acid—which, in U. S. Ph., consists in nitric acid 1½ fluidounces, water 12½ fluidounces. S. g. 1.068; tonic, antiseptic, astringent. In the Ph. Br. it is much stronger. Diluted largely with water, used, as a drink, in fevers of the typhoid kind, in chronic affections of the liver, syphilis, etc., but in the latter affections not to be depended upon. **N. anhy'dride,** N_2O_5, colorless, shining, deliquescent, prismatic crystals, obtained by decomposing pure silver nitrate by absolutely dry chlorine. **N. e'ther,** erroneously used for nitrous ether. **N. magne'sian rea'gent,** *Robert's reagent.* **N. ox'ide,** nitrogen pentoxide.

Ni'tric-ac'id test. *Heller's test.* Contact method of determining presence of albumen in urine.

Nitricus, nit'rik-us. Nitric.

Nitrifiable, nit-ri-fi'a-b'l. Capable of nitrification or nitration.

Nitrifica'tion. Decomposition of organic matters with formation of nitrites and nitrates, a process taken advantage of in water analysis.

Nitrigenium, nit-re-jen'e-um. Nitrogen monoxide.

Ni'trite. Salt of nitrous acid (HNO_2). **N. of am'yl,** see *Amyl nitrite.* **N. of eth'yl** or **Ni'trous e'ther,** volatile liquid characteristic of sweet spirits of nitre.

Nitrobenzi'nic ac'id. *Benzoinitric acid.* Formed by action of strong nitric acid upon benzoic acid.

Nitroben'zol. *Nitrobenzide.* A substitute for oil of bitter almonds, from which it differs in containing no prussic acid. Used as perfume and flavor, and in manufacture of aniline; active poison.

Nitroben'zole. See *Oleum amygdalæ amaræ,*

Nitrocel'lulose. A cellulose ether, compound of nitric acid and cellulose. Name given to both guncotton and substance from which collodion is made.

Nitrochlo'roform. Same as chloropicrin.

Nitrocom'pound. Compound of carbon by substitution of monatonic radical NO_2 for H.

Ni'trogen (*nitre, gennao,* to generate). Azote. Colorless, tasteless, inodorous gas, incombustible and a non-supporter of combustion. Exists free in atmosphere, forming four-fifths of its bulk. **N., gas'eous ox'ide of,** *Nitrous monoxide, Nitrous oxide, Protoxide of nitrogen* or *of azote, Paradise, Intoxicating,* or *Laughing gas, Dephlogisticated nitrous gas;* also *N. monoxide.* When respired it produces great mental and corporeal excitement, and generally so much exhilaration as to render the appellation "laughing gas" by no means inappropriate. A safe and reliable anæsthetic in dental and minor surgical operations; action very fugacious. **N. perox'ide,** liquid of variable color, having marked antiseptic properties. **N., protox'ide of,** nitrogen, gaseous oxide of.

Nitrogen'ium. Azote.

Nitrogenized, ni-troj'en-ized. *Azoted, Azotized.* Containing nitrogen or azote, as a nitrogenized, azoted, or azotized aliment—animal food, for example—in contradistinction to the non-nitrogenized, non-azoted, or non-azotized, or those not containing nitrogen—saccharine and oleaginous aliments, for example.

Nitrog'enous, ni-troj'en-us. Containing nitrogen. **N. organ'ic bod'ies,** see *Organic bodies* (table).

Nitroglycerin, ni-tro-glis'er-in. *Trinitroglycerin, Trinitrin, Glonoin.* Colorless or yellowish, oily, odorless, highly explosive, liquid, having a sweet, aromatic, pungent taste, slightly soluble in water, freely so in alcohol and ether; a powerful poison. Used in angina pectoris, Bright's disease, etc. It is administered in gradually increasing doses, beginning with one minim of a one per cent. solution.

Nitroglyceri'num. Nitroglycerin.

Nitrohydrochloric (ni-tro-hy-dro-klo'rik) **acid.** Nitromuriatic acid.

Nitro'leum. Nitroglycerin.

Nitrom'eter. Apparatus for measuring nitrous oxide gas during process of nitrification.

Nitromethane, nit-ro-meth'ane. Liquid compound of methane, possessing analgesic properties.

Nitromuriat'ic ac'id. *Nitrohydrochloric* or *Hydrochloronitric acid, Aqua regia.* Mixture of nitric and muriatic acids in proportion of four parts to fifteen. Freshly prepared, a reddish yellow, fuming, corrosive, poisonous liquid, having strong odor of chlorine. Upon standing and when exposed to light becomes golden-yellow, then lemon-yellow, when it is therapeutically almost inert. Used as a tonic, astringent, and digestant; of special service in hepatic torpor, both internally and in form of bath. The officinal dilute acid is an ineligible preparation, *Acidum nitrohydrochloricum dilutum,* Ph. U. S.

Nitronaphthalene, ni-tro-naf'thal-een. Compound of nitric acid and naphthalene.

Nitropen'tane. $C_5H_{11}NO_2$. Liquid isomeric with amyl nitrite, formed by action of amyl iodide upon silver nitrate.

Nitrophenis'ic ac'id. Picric or carbazotic acid.

Nitrophe'nol. Three substances have been obtained by the action of nitric acid on carbolic acid. Carbazotic acid—*Nitrophenisic acid*—is the only one having any therapeutic value.

Nitropic'ric ac'id. Carbazotic acid.

Nitroprus'sic ac'id. *Nitroprusside of hydrogen,* formed by the action of nitric acid on ferrocyanide of potassium. Its therapeutic value is undetermined.

Nitroprus'sides. Salts formed by the action of nitric acid upon ferrocyanides and ferricyanides.

Ni'trous. Belonging to nitre. **N. ac'id,** unstable acid derived from nitrogen trioxide. **N. e'ther,** ethyl trioxide nitrite. **N. ox'ide,** nitrogen, gaseous oxide of. **N. powder,** see *Potassii nitras.*

Ni'trum (*nitron*). Natron; potassii nitras. **N. antiquo'rum,** soda. **N. cu'bicum,** soda nitrate. **N. factit'ium,** borax. **N. flam'mans,** ammonii nitras. **N.**

lunar'e, argenti nitras. **N. prismat'icum,** potassii nitras. **N. rhomboida'le,** soda nitrate. **N. saturni'num,** plumbi nitras. **N. tabula'tum,** potassii nitras fusus sulphatis paucillo mixtus. **N. vitriola'tum,** potassii sulphas. **N. vitriola'tum Schroed'eri,** potassii sulphas.

Nitryl, ni'tril. Nitric peroxide (NO_2). Univalent radical assumed to exist in nitric acid and so called nitro-compounds.

Nits. See *Pediculus.*

Nit'ta tree. *Parkia biglandulosa, African locust.* Clustered pods contain an edible mealy pulp.

Nix. Snow. **N. fu'mans,** calx viva. **N. zin'ci,** zinci oxidum.

Nix'us. Nisus (effort or struggle). **N. parturien'tium,** the efforts or forcing during parturition.

No'ah's ark. Cypripedium luteum.

Noasthenia, no-as-then-e'ah (*noos,* mind, *astheneia,* weakness). Mental weakness.

No'ble. Principal, essential. **N. parts,** *Partes nobiles* or *essentiales.* Some anatomists have given this name to parts without which life cannot exist, such as the heart, liver, lungs, brain, etc. Organs of generation have likewise been so called.

No'car (*nokar*). Lethargic tumor.

Nocarodes, nok-ar-o'dees. Affected with nocar.

Noctambula'tio or **Noctambulis'mus** (*nox,* night, *ambulo,* to walk). Somnambulism.

Noctam'bulus. Somnambulist.

Noctidial, nok-tid'e-al. Lasting through a night and a day.

Noctisurg'ium (*nox, surgo,* to arise). Somnambulism.

Noctui'ni oc'uli (owl's eyes) (*noctua,* owl). Gray or blue eyes.

Noctur'na bel'la (nocturnal wars). Coitus.

Noctur'nal (*nox,* night). Relating to night, as *Febris nocturna,* fever occurring at night. **N. blind'ness,** hemeralopia, nyctamblyopia. **N. emis'sion** or **pollu'tion,** ejaculation of semen during sleep; see *Spermatorrhœa.* **N. ver'tigo,** sensation of falling after going to sleep.

No'dal points. Two points on the principal axis of a refracting system, so situated that every ray that before refraction is directed to the first nodal point is after refraction directed to the second, and the incident and refracted rays are parallel. The point of intersection of convergent rays of light with the visual axis of the eye. In optics two points in the visual axis at which converging rays meet after passing through a refracting medium. Conjugate foci.

Nod'ding. Forward and downward movement or dropping of the head, as from somnolency; nutatio. **N. spasm,** spasmus nutans.

Nod'dlepox. Syphilomania.

Node. *Gumma.* A hard concretion or incrustation which forms around joints attacked with rheumatism or gout. Some include, under this name, exostoses, articular calculi, ganglions, and even the chronic swellings of the joints known under the name of white swellings. The oblong swellings in the course of the bones in syphilis—*syphilitic nodes*—due to periostitis, are either hard and indolent or fluctuating, from the deposit of gummatous material. **N., lymphat'ic,** gland, lymphatic.

No'des (*ne,* priv., *odous,* tooth). Without teeth.

No'di digito'rum ma'nûs. Phalanges of the fingers. **N. hæmorrhoïda'les,** see *Hæmorrhois.* **N. lac'tea,** milky tumefaction of the breast. **N. nervo'rum,** nervous ganglions.

No'doi. Nefrendes.

Nodose. Characterized by nodes or nodosities.

Nodo'sis (*nodus, osis*). Formation or existence of nodes.

Nodosity, no-dos'it-e. Small knot-like swelling or tumor.

Nodos'ities, Heb'erden's. Deposits of hard nodules at the phalanges of the fingers, occurring in middle life, due to gout, etc., or to changes in cartilages of articulation and bone.

Nodous, no'dus. Nodose.

Nod'ular. Pertaining to or having nodes.

Nod'ule. Nodulus. **N. enam'el,** see *Tooth.*

Nod'uli Albi'ni. Nodules of connective tissue found upon free edge of auriculo-ventricular valves. **N. Aran'tii,** *Noduli Morgagnii, Corpora Arantii;* small sesamoid bodies situate on the periphery of the semilunar valves of the aorta and pulmonary artery for the better occlusion of the artery. **N. Morgagn'ii,** noduli Arantii. **N. nervo'rum,** ganglions, nervous.

Nod'ulus (dim of **Nodus,** a knot). Nodule. A small prominence or lobule in the portion of the cerebellum which forms the posterior boundary of the fourth ventricle; the nodulus is on the median line and before the uvula. See *Vermiform process, inferior.* **N. uteri'nus,** pessary.

No'dum rel'igo (to fasten a knot or tie). To prevent by enchantment the venereal act or to render impotent.

No'dus (a knot or tie). Articulation, edentulus, encystis, hamma. **N. cer'ebri,** pons Varolii. **N. chirur'gicus,** knot, surgeon's. **N. enceph'ali,** pons Varolii. **N. extenso'rius** or **exter'nus hu'meri,** epicondyle. **N. flexo'rius,** epitrochlea. **N. guttura'lis,** Adam's apple. **N. hyster'icus,** angone. **N. inter'nus hu'meri,** epitrochlea. **N. val'vulæ at'rio-ventricula'ris,** a cartilaginous thickening in the wall of the heart at either side of the anterior segment of the mitral valve; also called *N. valvulæ mitralis.* **N. vi'tæ,** centrum vitale.

Noë'ma (*noeo,* to think). Thought.

Noëmatachograph, no-e-mah-tak'o-graf (*noema, tachus,* quick, *grapho,* to write). An instrument devised by Donders to determine the duration of more or less complex operations of the mind; consisting of a cylinder on which the time is registered by a vibrating tuning-fork.

Noematachometer, no-e-mah-tak-om'et-ur (*metron,* measure). An instrument devised by Donders to define the shortest possible time for a simple sensation or idea to be recorded,

Noë'sis (*noesis*). See *Intellect.*

No'li me tan'gere (do not touch me). Applied to various eroding ulcers, such as lupus, epithelioma, etc. of the face.

No'ma (*nemo,* to corrode). Cancer aquaticus. See *Gangrenous stomatitis, Cancrum oris.* **N. pudendo'rum,** gangrene or putrescency of the vagina and genitals in young children.

No'mad (*nomas,* pasturage). An epithet given to people who, having no fixed habitation, travel with their flocks from country to country for pasturage. Such are the Tartars. By analogy the word *nomadic* has been applied to a spreading ulcer.

No'me. Cancer aquaticus; phagedenic ulcer.

No'menclature (*nomen,* name, *calo,* to call). *Termonology, Terminology, Glossology, Orismology.* A collection of terms or words peculiar to a science or art. In all sciences nomenclature is an object of importance, and each term should convey to the student a definite meaning. The Lavoisierian nomenclature was a valuable gift to chemistry, and anatomy has derived advantage from the labors of Barclay, Dumas, and Chaussier, who have given names to parts indicative of their situation. See *Muscle.* The nomenclature of pathology has required the greatest attention; and although repeated attempts have been made to improve it, the barbarous terms that disgrace it are still frequently adopted. It consists of Hebrew and Arabic terms, Greek and Latin, French, Italian, Spanish, German, English, and even Indian, African, and Mexican, often barbarously and illegitimately compounded. A want of principle in forming the technical terms of medicine is everywhere observable. They have been formed, for example—1. From *Color;* as Melæna, Melas, Atrabilis, Leuce, Alphos, Chlorosis, Rubeola, Scarlatina, Purpura, etc. 2. From *Duration;* as ephemeral, quotidian, tertian, and quartan, continued and intermittent, etc. 3. From *Birds, Beasts, Fishes, Insects,* and *Plants;* as Rabies canina, Cynanche, Boulimia, Pica, Hippanthropia, Elephantiasis, Urticaria, Lichen, Ichthyosis, etc. 4. From *Persons* or *Places;* as Morbus Herculeus, Facies Hippocritica,

Lepra Arabum, Plica Polonica, Sudor Anglicus, Morbus Gallicus, Ignis Sancti Antonii, Chorea Sancti Viti, etc. The Royal College of Physicians of England has a system of nomenclature of diseases which is generally recognized as authoritative. See *Nosology.*

Nomocacostomia, nom-o-kak-ost-o'me-ah (*nome,* corroding ulcer, *kakos,* evil, *stoma,* mouth). Cancer aquaticus.

Nomogeny, no-moj'en-e (*nomos,* law, *gennao,* to produce). Origination of life under operation of existing natural law, and not by miracles.

No'mus. Cancer aquaticus.

No'nan. Said of fever in which an exacerbation occurs every ninth day.

Nonatelia (non-ah-tel'e-ah) **officina'lis.** Asthma plant growing in Cayenne; leaves are employed in asthmatic attacks.

Nona'zoted. See *Nitrogenized.*

Non com'pos. Lunatic.

Non com'pos men'tis. Not possessing a mind; lunatic.

Non-nat'urals. Under this term the ancient physicians comprehended air, meat and drink, sleep and watching, motion and rest, the retentions and excretions, and the affections of the mind. They were so called because they affect man without entering into his composition or constituting his nature, but yet are so necessary that he cannot live without them.

Non-nitrogenized, non-ni-troj'en-ized. See *Nitrogenized.*

Non-nitrogenous, non-ni-troj'en-us. Not containing nitrogen. **N.-n. organ'ic bod'ies,** see *Organic bodies.*

Non-pedun'culated hydat'id. See *Morgagni's hydatid.*

Non-placen'tal. Not having a placenta; aplacental, as marsupials and monotremes. See *Aplacental.*

Non'sane. Insane.

Non-sex'ual. Having no sex; sexless; asexual. Done by or characteristic of sexless animals, as the nonsexual conjugation of protozoans.

Non-stri'ated mus'cular fi'bre. See *Muscular fibre.*

No'nus hu'meri placenti'ni (*nonus,* ninth). Teres minor. **N. lin'guæ mus'culus,** genioglossus. **N. Vesa'lii,** peronæus tertius.

Non-vi'able. Not viable. Applied to a fœtus too young to maintain independent existence.

Noo'dles. See *Turundæ Italicæ.*

Noos. Intellect.

Noosphales, no-os'fal-ees. Insane.

Noosteresis, no-o-ster-a'sis (*noos,* intellect, *steresis,* privation). Dementia.

Nopal, no'pal. Opuntia vulgaris.

Nordhausen acid. *N. oil of vitriol.* Fuming sulphuric acid. Sp. gr. 1.860 to 1.900.

Nor'ma. Rule, model, line. **N. facia'lis** or **N. fronta'lis,** line drawn from in front perpendicular to frontal plane of skull. **N. infe'rior,** line from below to vertical plane of skull. **N. latera'lis,** line perpendicular to sagittal plane of skull. **N. occipita'lis,** line from behind perpendicular to frontal plane of skull. **N. parieta'lis,** N. verticalis. **N. poste'rior,** N. occipitalis. **N. sagitta'lis,** aspect of skull seen on a mesial sagittal section. **N. tempora'lis,** N. lateralis. **N. vertica'lis,** line from above vertical to horizontal plane of skull. All of these are used in comparative study of crania. See *Normal.*

Nor'mal (*norma,* a perpendicular, a rule). According to rule; perpendicular. **N. con'jugate diam'eter,** see *Pelvic diameters.* **N. solu'tion,** one containing in 100.0 cc. sufficient of the active constituent to combine with or replace 1 gramme of hydrogen.

Norm'oblast. See *Corpuscle.*

Nor'ris's col'orless cor'puscles. Blood-red corpuscles from which coloring matter has been dissolved out.

Nor'ton's drops. Liquor hydrargyri oxymuriatis.

Norwe'gian itch. See *Radzyge.*

Nosac'erus (*nosakeros*). Sickly.

Nosætiologia, no-ze-te-o-loj'e-ah (*nosos,* disease, *aitia,* cause, *logos,* discourse). Etiology of disease.

Nosanthropochemia, no-zan-thro-po-kem-e'ah (*nosos,* disease, *anthropos,* man, *chemia,* chemistry). Chemistry applied to human physiology.

Nosazontology, no-zaz-ont-ol'o-je. Pathology relating to etiology of disease.

Nose. Nasus. **N. bleed,** epistaxis; Achillea millefolium. **N., bridge of,** see *Bridge.* **N., running at the,** coryza. **N., Tench's,** external os uteri.

Nosegay (noze'ga), **Ri'olan's.** Name given to muscles extending from the styloid process of the temporal bone.

Noselia (no-ze'le-ah) or **Noselei'a.** Care of the sick.

Nosema, no-za'ma. Disease. **N. bom'bycis,** parasite of pébrine.

Nosemat'ic. Pertaining to disease.

Nosenceph'alus (*nosos, enkephalos,* brain). A monster whose skull is open only on the frontal and parietal regions, the posterior fontanelle being distinctly present—the brain being more or less replaced by vascular tissue.

Noseph'erous (*nosos, phero,* to bear). Bringing disease.

Noseræsthesia, no-zer-ees-the'ze-ah (*noserus, aisthesis,* sensation). Disordered sensation.

Noseropheretrum, no-zer-o-fer'et-rum (*nosos, pheretron*). Litter.

Nose'rus (*noseros*). Insalubrious; sick.

Noseu'ma. Disease.

Nosistoria, no-zist-o're-ah (*nosos, historia,* history). History of disease.

Nosocarya, no-zo-kar'e-ah. Secale cornutum; ergot of rye.

Nosocephalous, no-zo-sef'al-us. Nosencephalus.

Nosoche'ma (*nosos, ochema,* carriage). Ambulance.

Nosochorologia, nos-o-kor-o-lo'je-ah (*nosos,* disease, *choros,* piece of ground, *logos,* treatise). Nosochthonographia.

Nosochthonographia, no-zok-thon-o-graf'e-ah (*nosos, chthon,* the earth, *grapho,* to describe). Medical topography in relation to endemic disease.

Nosochthonolog'ia (*nosos, chthon,* the earth, *logos,* a description). Geographical nosology.

Nosocomesis, no-zo-ko-ma'sis (*nosokomesis,* from *nosos, komeo,* to care for). Noselia.

Nosocomi'a. Noselia.

Nosoco'mial (*nosocomium,* hospital). Relating to a hospital, as nosocomial or hospital fever. **N. at'mosphere,** see *Hospitalism.*

Nosocomi'um (*nosokomeion*). Hospital. **N. psychiat'ricum,** hospital for the insane.

Nosoc'omus. Male hospital nurse.

Nosocratic, no-zo-krat'ik (*nosos, kratos,* power). Specific.

Nosocrinies, no-zo-krin'ees (*krino,* to separate). Diacrises.

No'sode. Isopathic remedy.

Noso'des (*nosos,* disease). Insalubrious, sick, sickly.

Nosodochium, no-zo-do'ke-um (*nosos, dechomai,* to receive). Hospital.

Nosogenesis, no-zo-jen'es-is (*nosos, genesis,* generation). Generation of disease; pathogeny.

Nosogen'ia (*nosos, gennao,* to engender). Pathogeny.

Nosog'eny. Pathogeny.

Nosogeog'raphy. Medical geography.

Nosog'raphy (*nosos, grapho,* to describe). A description of diseases.

Nosohæmia, no-zo-he'me-ah (*nosos, haima,* blood). Disease of the blood.

Nosological, no-zo-loj'ik-al. Pertaining to nosology.

Nosologism, no-zol'o-jism. Abuse of nosological arrangements in pathology.

Nosol'ogy (*nosos, logos,* a discourse). The classification of diseases. Pathology.

Nosomania, no-zo-man'e-ah. Mania in regard to disease; a species of hypochondriasis.

Nosomycosis, no-zo-me-ko'sis. Disease produced by fungi.

Nosonomy, no-zon'o-me (*nosos, onoma,* name). Nomenclature of diseases.

Nosophobia, no-zo-fo'be-ah. Intense dread of disease.

Nosophyta, no-zof'it-ah (*nosos, phuton,* plant). Diseases supposed to be produced by, or to consist in, the development of parasitic plants, as porrigo, mentagra, etc.

Nosophytodermata, no-zo-fe-to-dur'mat-ah (*nosophyta, derma,* skin). Nosophyta affecting the skin, as favus, trichosis, mentagra, alopecia areata, and chloasma.

Nosopœus, no-zo-pe'us (*nosos, poieo,* to make). That which causes disease.

Nosopoiet'ic or **Nosopoetic,** no-zo-po-et'ik. Nosopœus.

Nosos, no'sos. Disease.

Nosotaxy, no-zo-taks'e (*nosos, taxis,* arrangement). Distribution and classification of diseases.

Nosotheoria, no-zo-the-o're-ah (*nosos, theoria,* doctrine). Doctrine or theory of disease.

Nosotroph'ic (*nosos, trophe,* nourishment). Supplying material for disease. Nourishing to the sick.

Nosotrophy, no-zot'ro-fe. Proper care of the sick.

Nostalgia, nost-al'je-ah (*nostos,* a journey home, *algos,* pain). Homesickness; an affection produced by the desire of returning to one's country, characterized by melancholia and wasting, sometimes followed by death. **N. complica'ta,** nostalgia accompanied by intermittent fever.

Nostalgic, nos-tal'jik. Pertaining to, or affected with, nostalgia.

Nostomania, nos-to-man'e-ah. Nostalgia.

Nostosite, nos'to-site. Parasite situated in or on a part.

Nostrassia, nos-tras'se-ah (*nostras,* of our country). Nostralgia.

Nostrate, nos'trate. Endemic.

Nostrils, nos'trils. Nares.

Nos'trum (*noster,* our own). Arcanum; a secret or quack medicine.

Nota materna, no'tah mat-ur'nah (mother's mark). Nævus. **N. primiti'va,** primitive groove.

Notæ infantum, no'te in-fan'tum (infant's marks). Nævi.

No'tal (*notos,* the back). Dorsal.

Notalgia, no-tal'je-ah (*notos,* back, *algos,* pain). *Notialgia* (*Nostalgia,* improperly, of Köchlin and others). Pain in the back; spinal irritation.

Notanencephalia, not-an-en-sef-al'e-ah (*notos, anencephalia*). See *Notencephalus.*

Notch. A depression or indentation of differing shape and size, observed on the circumference or edges of certain bones, as the sacrosciatic, sphenopalatine, and pterygoid notches. Notches in soft parts are generally called fissures. **N., acetab'ular,** situate in border of acetabulum near the obturator foramen. **N., ante'rior, of cerebel'lum,** see *Incisura cerebelli.* **N., aor'tic,** an undulation, as indicated by the sphygmograph, synchronous with the reflux of blood closing the aortic valves. **N., clavic'ular,** depressed part at superior end of sternum, articulating with clavicle. **N. of the con'cha,** incisura intertragica. **N., cot'yloid,** see *Cotyloid cavity.* **N., ethmoid'al,** is situate on the frontal bone and joins the ethmoid. **N., great sciat'ic,** see *Incisura ischiadica major.* **N., interclavic'ular,** semilunar notch of sternum. **N., intercon'dylar,** intercondylar fossa. **N., na'sal,** cavity at internal edge of facial portion of the upper maxillary bone. **N., parot'id,** the triangular space comprised between the parotid edge of the inferior maxillary bone and the mastoid process, so called because it lodges the parotid gland. **N. of Rivi'nus,** small gap in bony ring to which membrana tympani is attached. **N., scap'ular,** the notch on the superior edge or costa of the scapula, which is converted into a foramen by means of a ligament, and gives passage to the suprascapular nerve. **N., semilu'nar, of the ster'num,** fourchette. **N., supraor'bital,** supraorbital foramen. **N., supraster'nal,** N., interclavicular. **N., ver'tebral,** concavity above and below the pedicle.

Notches of the cerebel'lum. Intervals separating the hemispheres, anterior and posterior. **N., ischiat'ic,** two in number: greater, situate at inferior part of the pelvis, is formed by the sacrum and ilium, and gives passage to the sciatic nerve, pyramidalis muscle, and superior gluteal vessels and nerves; the lesser is much the smaller, and is separated from the greater by the sciatic spine. It gives passage to the tendon of the obturator internus and internal pudic vessels and nerves.

Notencephalia, no-ten-sef-al'e-ah. See *Notencephalus.*

Notencephalocele, no-ten-sef-al-o-se'le (Eng. no-ten-sef'al-o-seel). Congenital encephalocele at back of head; congenital absence of back part of cranium.

Notencephalus, no-ten-sef'al-us (*notos,* back, *enkephalos,* brain). Form of exencephalus in which the encephalic mass projects through a fissure in the occipital bone; usually, the contents being fluid or semifluid, the tumor is a hydrencephalocele. The condition is termed *Notencephalia* or *Notanencephalia.*

Notheus'is or **Nothi'a.** Degeneration.

No'throtes. Torpor.

Nothrous, no'thrus. Torpid.

No'thus. False.

Notiæus, no-te-e'us. Dorsal. **N. my'elus,** medulla spinalis.

Notial'gia. Notalgia.

No'tis. Humidity.

No'tochord (*notos, chorde,* a string). Chorda dorsalis. Embryonic condition of spinal cord; also spinal cord itself.

Notoglossus, no-to-glos'sus (*notos,* a ridge, *glossa,* tongue). Longitudinal muscular fibres on the upper surface of the tongue, immediately beneath the mucous membrane—*Lingualis superficialis.*

Notomelus, no-to-me'lus. Monster with supernumerary limbs attached to the back.

Notomyelitis, no-to-me-el-e'tis (*notos, myelitis*). Myelitis.

Notomyelus, no-to-me'el-us (*notos, muelos,* marrow). Medulla spinalis.

Notonia (no-ton'e-ah) **corymbo'sa.** Shrub growing in south of India; juice of recent stems has been employed in rabies.

Notophore, no'to-for. Monster with spina bifida.

No'tos or **No'tus.** Dorsum or back; vertebral column.

Nourishment, nur'ish-ment. Aliment.

Nous. Intellect.

Novacula, no-vak'u-lah. Razor.

Nox'ious (*noceo,* to injure). Deleterious.

Noy'ris. Nurse.

Nubecula, nu-bek'u-lah (dim. of **Nubes**). Enæorema; nebula.

Nu'bes (cloud). Enæorema; nebula.

Nubile, nu'bil. Marriageable; marriable; fit to marry. Generally, the period of puberty is considered to be the age at which both sexes are nubile. They are truly nubile, however, only when fitted to procreate healthy and vigorous children, and competent to discharge their duties as parents. Menstruation alone does not indicate nubility, which is the complement of puberty. See *Puberty.*

Nubil'ity. State of being nubile or marriageable.

Nubilosus, nu-bil-o'sus (*nubes,* a cloud). Nepheloid.

Nuces (nu'sees) (pl. of **Nux,** nut) **aquat'icæ** (water nuts). See *Trapa natans.* **N. quer'cûs,** see *Quercus alba.*

Nucha, nu'kah. The nuke, hinder part or nape of the neck. Part where the spinal marrow begins. The *Ligamentum nuchæ* is a strong ligament from the neck, proceeding from one spinous process to another, and inserted into the occipital bone. It is very strong in quadrupeds. It is called in them *Paxywaxy, Paxwax, Packwax;* formerly, *Faxwax* and *Taxwax.*

Nuchal, nu'kal (*nucha*). Relating or appertaining to the nucha or nape of the neck. **N. fas'cia,** cervical fascia enveloping the trapezius. **N. fos'sa,** triangular depression on the median line at the back of the neck just below occipital bone. **N. re'gion,** region of the nucha or nape of the neck. **N. tu'bercle,** prominence caused by spine of seventh cervical vertebra.

Nu'cin. A crystalline substance in the pericarp and leaves of *Juglans regia.*

Nucista, nu-sis'tah (*nux,* a nut). See *Myristica moschata.*

Nu'cit. A crystallizable, non-fermentable sugar found in the leaves of *Juglans regia,* probably identical with inosit.

Nuck, canal' of. See *Canal of Nuck.*

Nu'clear. Pertaining to a nucleus, or to a central group of nerve-cells. **N. fis'sion,** increase of nuclei by fission or division of the original solitary nucleus. **N. lay'ers,** strata of central layers of retina. **N. lay'ers, inner,** layers between inner and outer molecular layers, subdivided into layer of spongioblasts and layer of ganglion retinæ. **N. lay'ers, out'er,** inner portion of visual cell-layer, composed of cone- and rod-granules. **N. paral'ysis,** paralysis from central causes. **N. spin'dle,** spindle-shaped arrangement of fibres and chromatin fragments into which the nucleus is transformed during karyokinesis. **N. zone,** uniform arrangement of nuclei or superficial fibres formed around the crystalline lens.

Nucleated, nu'kle-a-ted (*nucleus,* kernel). Having a nucleus or central particle. Applied to the elementary cells of organized tissues, the vital properties of which are seated in the nucleus. See *Cytoblast.* **N. cell,** see *Cytoblast.*

Nu'clei cem'bræ. See *Pinus cembra.* **N. cerebel'li secunda'rii,** N. fastigii, N. globosus, and N. emboliformis. **N. colliculo'rum,** gray masses found within the corpora quadrigemina. **N. os'sei,** ossification, points of. **N. pin'eæ,** see *Pinus pinea.* **N. trigem'ini,** trigeminal nuclei.

Nuclein, nu'kle-in. Albuminoid substance like mucin in nuclei of globules of the blood, pus, milk, the brain, etc. See *Globules of the blood.*

Nucleochylema, nu-kle-o-kil-a'mah. Substance occupying meshes of reticulum of nucleus.

Nucleochyme, nu'kle-o-kime. Fluid-like hyaline substance contained in a cell-nucleus.

Nucleohyaloplasm, nu-kle-o-hi'al-o-plazm. Nucleoplasm; karyoplasm. See *Chromatin.*

Nucleo-idioplasma, nu'kle-o-id-e-o-plaz'mah (*nucleus, idios,* special, *plasma*). Idioplasm of nucleus in particular.

Nucleolar, nu-kle'o-lar. Resembling a nucleolus.

Nucleolid, nu-kle'o-lid. Body resembling a nucleolus.

Nucleoli'nus or **Nucleol'ulus.** Small part of a cell-nucleus.

Nucleolus, nu-kle'ol-us (dim. of **Nucleus**). See *Cytoblast.* **N. prick'le,** nucleolus attached to nucleus, which surrounds it, by delicate fibrils.

Nucleoplasm, nu'kle-o-plazm (*nucleus,* small nut, *plasso,* to form). Substance from which the fibrils of germinal vesicles are formed. Also substance from which nuclear reticulum and envelope are formed.

Nucleoplasmatic (nu-kle-o-plaz-mat'ik) or **Nucleoplas'mic.** Relating to nucleoplasm.

Nucleoplastic, nu-kle-o-plas'tik. Nucleoplasmatic.

Nu'cleus. Kernel, central differentiated part. Applied principally to differentiated body in protoplasm of a cell containing chromatin—may or may not be separated from protoplasm by a membrane; also group of cells forming central termination of a nerve or bundle of nerve-fibres. Motor centre of a muscle; centre of functional activity of an organ. **N. abducen'tis,** abducens nucleus. **N. accesso'rii,** spinal accessory nucleus. **N. accesso'rius acus'tici,** see *Auditory nuclei, N. acustici.* **N. ambig'uus,** in medulla oblongata a nuclear mass in form of a gray cord directed dorso-ventrally along fibres of origin of vagus and glossopharyngeal nerves. **N. amyg'dalæ,** amygdaloid tubercle. **N. amygdalifor'mis,** nucleus of Luys. **N. angula'ris,** see *Auditory nuclei.* **N. ante'rior,** N. ambiguus. **N. of ante'rior root-zone,** detached group of nerve-cells found in medulla oblongata, ventrally and radially from lowest fibres of origin of hypoglossal nerves. **N. ante'rior thal'ami,** see *Thalamic nuclei.* **N. anterolatera'lis,** nucleus funiculi lateralis. **N. arcifor'mis,** small mass of gray matter among superficial arcuate fibres of medulla. **N. arcua'tus triangula'ris, N. of Balbia'ni,** Balbiani's nucleus. **N. basa'lis,** olivary nucleus. **N. of Beck'terew,** see *Auditory nuclei.* **N. blastoder'matis,** germinal spot. **N. bul'bi forn'icis,** gray matter within the corpora mammillaria. **N. cauda'tus,** caudate nucleus. **N. centra'lis infe'rior,** mass of gray cells in pons, rather diffusely scattered, situated near raphe and posterior border. **N. centra'lis supe'rior,** similar mass near dorsal and anterior surface. **N. cerebel'li,** dentate nucleus of cerebellum. **N. cine'reus,** posterior gray commissure; see *Spinal commissures.* **N. cochlea'ris,** see *Auditory nuclei.* **N. cunea'tus exter'nus,** small detached nucleus of gray matter lying superficially to nucleus cuneatus of medulla oblongata. **N. cursa'rius,** portion of gray matter in head of corpus striatum, irritation of which in animals produces an irresistible tendency to run or jump. **N. denta'tus cerebel'li,** dentate nucleus of cerebellum. **N. denta'tus oli'væ,** olivary nucleus. **N. denta'tus par'tis commissura'lis,** nucleus olivaris superior. **N. denticula'tus,** dentate nucleus of cerebellum. **N. den'tis,** pulp of tooth. **N. of Die'ters,** outer or superior auditory nucleus; see *Auditory nuclei.* **N. embolifor'mis,** nucleus of gray matter in cerebellum lying close to corpus dentatum, toward median line. **N. exter'nus thal'ami,** see *Thalamic nuclei.* **N. fas'ciæ denta'tæ,** irregularly arranged pyramidal cells in centre of fascia dentata. **N. fascia'lis,** fascial nucleus. **N. fasti'gii,** roof nucleus. **N. fibro'sus lin'guæ,** septum fibrosum linguæ. **N. fimbria'tus,** dentate nucleus of cerebellum. **N. funic'uli anterio'ris,** nucleus of anterior root-zone. **N. funic'uli cunea'ti,** cuneate nucleus. **N. funic'uli grac'ilis,** clavate nucleus. **N. funic'uli latera'lis,** in medulla oblongata, portion of continuation of anterior horn of spinal cord, which has become separated by fibres crossing from lateral column to opposite anterior pyramid. **N. funic'uli ter'etis,** a nucleus lying in funiculus teres, floor of fourth ventricle, mesially and dorsally from hypoglossal nucleus. **N. gelatino'so-cartilagin'eus** or **N. gelatino'sus,** nucleus pulposus. **N. globo'sus,** nucleus of gray matter in cerebellum, near corpus dentatum, to median and under side of nucleus emboliformis. **N. glossopharynge'i,** glossopharyngeal nucleus. **N. hypoglos'si,** hypoglossal nucleus. **M. hypoglos'si accesso'rius** or **ant'ero-exter'nus,** nucleus funiculi lateralis. **N. infe'rior acus'tici,** accessory auditory nucleus; see *Auditory nuclei.* **N. inter'nus thal'ami,** see *Thalamic nuclei.* **N. jux'ta-oliva'ris,** nucleus of pyramid. **N. latera'lis,** claustrum. **N. latera'lis ante'rior,** anterior division of nuclei funiculi lateralis. **N. latera'lis me'dius,** nucleus ambiguus. **N. latera'lis poste'rior,** posterior division of nucleus funiculi lateralis. **N. latera'lis thal'ami,** see *Thalamic nuclei.* **N. lemnis'ci latera'lis,** collection of cells in lateral lemniscus tract, about on level of upper termination of fourth ventricle. **N. lenticula'ris,** lenticular nucleus; gray centre of the extraventricular portion of the corpus striatum. **N. lenticula'tus,** dentate nucleus of cerebellum. **N. lentifor'mis,** nucleus lenticularis. **N. len'tis,** inner harder portion of crystalline lens. **N. of Luys,** lens-shaped collection of nerve-cells, of a clear brown color, under optic thalamus, extending from red nucleus behind nearly to corpus albicans. **N. media'lis thal'ami,** see *Thalamic nuclei.* **N. medulla'ris** or **N. medulla'ris cerebel'li,** medullary nucleus. **N. oculomoto'rii,** oculomotor nucleus. **N. oli'væ,** olivary nucleus. **N. oli'væ accesso'rius,** accessory olivary nucleus. **N. oli'væ accesso'rius exter'nus** or **N. oli'væ accesso'rius latera'lis,** collection of gray matter in medulla, dorsally from olive; also, **N. oli'væ accesso'rius supe'rior** and **N. oliva'ris supe'rior,** situate in pons behind trapezium and between roots of sixth and seventh nerves; also applied by Luys to red nucleus. **N. oli'væ accesso'rius media'lis,** pyramidal nucleus. **N. of Pan'der,** upper enlarged extremity of the white part of yolk of the hen's egg. **N. pedun'culi cer'ebri,** nucleus of Luys. **N. pedun'culi cona'rii,** ganglion habenulæ. **N. pon'tis,** scattered

multipolar cells in pons. **N. pulpo'sus,** jelly-like mass at centre of intervertebral disks—vestige of notochord. **N. of pyr'amid,** collection of gray matter found in anterior area of medulla, just behind pyramid and ventrally from olive; lesser N. of pyramid is nucleus arciformis. **N. quadrigem'ini,** masses of gray matter occupying central portions of corpora quadrigemini, anterior and posterior. **N. reticula'ris,** situate dorsally in pons, widest about region of root of trigeminus. **N. ru'ber,** red nucleus. **N. supe'rior thal'ami,** see *Thalamic nuclei.* **N. tænifor'mis,** claustrum. **N. tec'ti,** roof nucleus. **N. tegmen'ti,** red nucleus. **N. trape'zius,** collection of cells in pons among fibres of trapezius. **N. trochlea'ris,** see *Trochlearis nuclei.* **N. va'gi,** vagus nucleus. **N. vestibula'ris,** see *Auditory nuclei.*

Nucula terrestris, nu'ku-lah ter-res'tris (*nux,* a nut). Bunium bulbocastanum.

Nudipes, nu'de-pees. Having naked feet, as in some animals.

Nuel's space. Intercellular space between outer rods of Corti and outer hair-cells.

Nuhn, glands of. Glands of Blaudin. Two glands at the apex of the tongue, beneath the mucous membrane and the longitudinal muscular fibres, formed by the styloglossus and longitudinalis inferior muscles.

Nui'sance. In common law, that which causes hurt, inconvenience, or damage to any one; in public health legislation, that which is injurious to health.

Nuke. Nucha.

Nulekneed. Entogonyancon.

Nullip'ara or **Nulliparous,** nul-lip'ar-us (*nullus,* none, *pario,* to bring forth). One that has not brought forth any young, though not a virgin.

Nullipar'ity. State or condition of a nullipara.

Numb. Torpid.

Numb'ness. State of being torpid.

Numer'ical meth'od. See *Method.*

Num'miform. Coin-shaped.

Nummular, num'mu-lar (*nummus,* money). *Nummulated.* Relating to money. Coin-shaped, as the sputa in phthisis, when they flatten at the bottom of the vessel, like a piece of money; and to the mode of aggregation of the red corpuscles of the blood—nummular rolls.

Nummularia, num-mu-lah're-ah. Lysimachia nummularia.

Nummulated, num'mu-la-ted. Coin-shaped.

Nummulation, num-mu-la'shun. Aggregation of red blood-corpuscles into rolls, resembling rolls of money.

Num'post. Abscess.

Nuphar (nu'far) **ad'vena.** *Yellow pond-lily, Spatterdock,* ord. Nympheaceæ; indigenous in Canada and the U. S. Root is a popular tonic, and the fresh root bruised is applied as a cataplasm. **N. lu'teum,** Nymphæa lutea.

Nuptiality, nup-she-al'it-e. Proportion of number of marriages to number of people in a given locality.

Nurse. One who suckles her own child or another's. One that has the care of a sick person; caretaker. A *dry nurse* is one who gives every care to a child, but does not suckle it. A *monthly nurse* is one who attends a woman during the month of her parturient state; a *wet nurse* (Sc.), *milkwoman,* a female who suckles the child of another. A *hospital nurse* is one whose field of occupation is in a hospital; a *trained nurse,* one who has received systematic instruction and discipline to fit him or her for duty in the sick-room; a *professional nurse* is one whose sole occupation is the care of the sick, in contradistinction to the voluntary nursing of family or friends. To *nurse artificially* is to bring up a child by the hand.

Nurses' contrac'ture. Tetany.

Nurs'ing. Lactation. Also care of the sick.

Nursling, nurs'ling. An infant nursed by its mother or by another.

Nus. Intellect.

Nuss'baum's narco'sis. Condition produced by a full dose of morphia, followed by inhalation of chloroform.

Nu'sus. Disease.

Nut ([L.] *nux*). Glans. **N., Barba'does,** see *Jatropha curcas, Ben, Betel, Bonduc.* **N., Brazil'ian,** see *Pichurim beans.* **N., but'ter,** Juglans cinerea; see *Cashew, Cream.* **N., cem'bros,** see *Pinus cembra.* **N., clear'ing,** Strychnos potatorum. **N., French,** Juglans regia. **N., ground,** Apios tuberosa, Arachis hypogea; see *Guru, Indian gum, Kola, Malacca, Marking, Oil, Oriental cashew.* **N. oil,** a drying fluid oil obtained from kernels of English walnuts. **N., Para,** see *Pichurim beans, Pecan.* **N., phys'ic,** Jatropha curcas. **N., pine,** Pinus sabiniana; see *Pinus picea.* **N., pistach'io,** see *Pistacia vera.* **N., poi'son,** see *Strychnos nux vomica.* **N., purg'ing,** see *Jatropha* and *Croton tiglium.* **N., rat'tle,** Nelumbium luteum. **N., sas'safras,** see *Pichurim beans.* **N., soap,** see *Sapindus saponaria.* **N. tree, Mal'abar,** adhatoda. **N., vom'ic,** see *Strychnos nux vomica.* **N., zir'bel,** see *Pinus picea.*

Nutation, nu-ta'shun (*nuto,* to nod). Nodding. Also a constant oscillation of the head, by which it moves involuntarily in one or more directions.

Nutator capitis, nu-ta'tor kap'it-is (nodder of the head). Sternocleidomastoideus.

Nut'gall. See *Quercus infectoria,* also *American nutgalls.* **N. oint'ment,** powdered nutgalls 1, benzoinated lard 9 (U. S. Ph.). **N., tinc'ture of,** see *Tinctura gallarum.*

Nut'grass. Indigenous; root aromatic; used in cholera.

Nut'meg. See *Myristica moschata.* **N. but'ter,** see *Myristica.* **N. ce'rate,** yellow wax 1, olive oil 2, expressed oil of nutmeg 6; melt together. **N. flow'er,** nigella. **N. liver,** cirrhosis of the liver, or condition of that organ dependent on imperfect circulation, from local obstruction or from heart trouble. **N., oil of,** see *Myristica.* **N. tree,** Myristica fragrans.

Nut'megs. Testes.

Nu'triant (*nutrio,* to nourish). Medicine modifying or improving local or general nutrition.

Nutricatio, nu-tre-kah'she-o (*nutrio,* to nourish). Nutrition.

Nutric'ius. Nutritious.

Nutriens, nu'tre-ens. Aliment; nurse.

Nu'trient. Giving nourishment. Food or other nourishing material. **N. ar'tery,** medullary artery. **N. canal',** passage by which medullary artery enters a bone. **N. foram'ina,** openings by which nutrient arteries penetrate bones.

Nutrility, nu-tril'it-e. Metabolism. Ability to perform a nutritive function.

Nutrimen, nu-tre'men. Aliment.

Nu'triment. Aliment. Anything that nourishes.

Nutrimental, nu-tre-men'tal. *Alimental, Alimentary;* having qualities of food or nutriment.

Nutrimentum, nu-tre-men'tum. Aliment; pabulum.

Nutrition, nu-trish'un (*nutrio,* to nourish). Nutrition is that function by which the alimentary matter already elaborated by the various organic actions loses its own nature and assumes that of the different living tissues, to repair their losses and maintain their strength. Sometimes used in a more extended signification to express the whole series of actions by which the two constant movements of composition and decomposition are accomplished in organized bodies. Nutrition would then comprehend digestion, absorption, respiration, circulation, and assimilation; the latter being nutrition properly so called, and being effected in the intermediate system over the whole of the body, the cells of the tissues attracting from the blood the elements necessary for their reparation. **N., anor'mal,** term proposed as a substitute for inflammation. **N., force of,** plastic force. **N. treat'ment,** restorative treatment in pneumonia, etc., consisting in judicious stimulation and nourishing diet.

Nutritional, nu-trish'un-al. Relating or appertaining to nutrition.

Nutritious, nu-trish'us. Nutritive; having the quality of nourishing, as nutritious food, nutritious lymph, etc. **N.** or **Nu'tritive ar'teries,** arterial

branches which enter the *foramina nutricia* of long bones and penetrate to the medullary membrane.

Nutritive, nu'tri-tiv. Nutritious; also relating to nutrition; hence the nutritive functions, or those concerned in nutrition. **N. yolk**, portion of ovum containing most yolk-granules, and serving principally as a food reservoir in distinction from the formative yolk.

Nutritus, nu-tre'tus. Aliment, nutrition.

Nutrix, nu'triks. Mamma; nurse.

Nuts, wa'ter. Nelumbium luteum.

Nux (a nut) **aromat'ica.** See *Myristica moschata.* **N. avella'na**, Corylus avellana (nut). **N. Barbaden'sis**, Jatropha curcas. **N. becui'ba**, ibicuiba. **N. castan'ea Brasilien'sis**, Brazil nuts. **N. cathar'tica America'na**, Jatropha curcas. **N. gal'læ**, see *Quercus cerris.* **N. jug'lans**, Juglans regia. **N. med'ica**, coco of the Maldives. **N. metel'la**, Strychnos nux vomica. **N. meth'el**, Datura stramonium. **N. moscha'ta**, see *Myristica moschata.* **N. myris'tica**, see *Myristica moschata.* **N. pista'cia**, see *Pistacia vera.* **N. unguenta'ria**, see *Myristica moschata.* **N. vom'ica**, Strychnos nux vomica.

Nyade'lia. Tree growing in Malabar, where it is used in pulmonary affections; seeds have purgative prorerties.

Nychthemerus, nik-them'er-us (*nux*, night, *hemera*, day). Of the duration of a night and a day.

Nyc'talope. See *Nyctalopia.*

Nyctalopex, nik-tal-o'peks. See *Nyctalopia.*

Nyctalopia, nik-tal-o'pe-ah (*nux*, night, *optomai*, to see). Now used to signify day-blindness, as by Hippocrates; other old authorities used it in sense of night-blindness, now called nyctamblyopia. See *Hemeralopia.* Disease of nervous irritability, and one of excitement of the visual nerve in particular.

Nyctalopiasis, nik-tal-o-pe-as'is. Nyctalopia.

Nyctalopy, nik'tal-o-pe. Nyctalopia.

Nyctamblyopia, nik-tam-ble-o'pe-ah (*nycto*, *amblusso*, to be blind). Night-blindness.

Nyctanthes, nik-tanth'ees (*nycto*, *anthos*, flower). *Arbor tritis; Indian mourner.* Plant growing in India, where the seeds and flowers are employed as a cardiac tonic.

Nycterinus, nik-ter-e'nus. Nocturnal.

Nycthemeron, nik-the'mer-on. See *Dies.*

Nycthe'merum (*nycto*, *hemera*, day). The space of 24 hours, or of a day and night. Certain complaints continue only so long.

Nyctiplauc'tos, Nyctiplauc'tus, Nyctip'olos, Nyctip'olus, or **Nyctip'orus** (*nycto*, *poleo* or *poreuo*, to go about). A somnambulist.

Nycto, nik'to (night). In composition, night.

Nyctobadia, nik-to-bad'e-ah (*nycto*, *baino*, to walk or mount), **Nyctobasis** (nik-tob'as-is), **Nyctobatesis** (nik-to-bat-a'sis), or **Nyctobatia**, nik-to-bat'e-ah. Somnambulism.

Nyctophobia, nik-to-fo'be-ah (*nycto*, *phobos*, fear). Morbid fear of night.

Nyctophonia, nik-to-fo'ne-ah (*nycto*, *phone*, voice). Ability to speak only at night.

Nyctotyphlosis, nik-to-tif-lo'sis (*nycto*, *tuphlos*, blind). Hermeralopia.

Nyg'ma (*nugma*, a prick). Punctured wound.

Nygmat'icum emplas'trum (wound plaster). Emplastrum resinæ.

Nygmaticus, nig-mat'ik-us. Pertaining to a puncture or stab.

Nympha, nim'fah. Clitoris. See *Nymphæ.*

Nymphæ, nim'fe. *Labia minora* or *interna; Pudenda minora.* Two membranous folds arising from the lateral parts of the prepuce of the clitoris and descending on the inner surface of the labia majora; terminating by becoming gradually thinner about the middle of the circumference of the vaginal orifice; formed each of two folds of mucous membrane of the vulva, and containing in their substance a thin layer of spongy, erectile tissue. Their use seems to be—not as was once supposed, to direct the course of the urine, which notion gave rise to their name (after the fabulous water nymphs), but to favor the elongation and dilatation of the vagina in pregnancy and labor. The word *Nymphe* has also been used synonymously with clitoris. **N. pen'dulæ**, pendulous labia majora.

Nymphæa (nim-fe'ah) **ad'vena.** Nuphar advena. **N. al'ba**, *White water lily*, ord. Ranunculaceæ. Demulcent, antaphrodisiac, emollient, and slightly anodyne remedy. **N. In'dica**, N. nelumbo. **N. lu'tea**, *Yellow water lily*, used for the same purposes as *Nymphæa alba.* In Norfolk, England, the flowers are called *Brandybottles.* **N. nelum'bo**, *Ægyptian bean.* The fruit is eaten raw in Egypt and some neighboring countries; considered to be tonic and astringent. **N. ma'jor lu'tea**, N. lutea. **N. odora'ta**, *Sweet-scented water lily, Sweet water*, or *White pond*, or *Toad lily, Cow* or *Water cabbage.* An indigenous plant, growing in most parts of the U. S. in fresh-water ponds and along streams, having large white, beautiful, sweet-scented flowers. Root is very astringent and bitter. Sometimes made into a poultice and used as a discutient. **N. umbilica'lis**, N. lutea.

Nymphar, nim'far. Nymphæa alba.

Nymphe, nim'fe. Clitoris. See *Nymphæ.*

Nymphitis, nim-fe'tis (*nympha*, *itis*). Inflammation of the nymphæ or clitoris.

Nympholepsy, nim'fo-lep-sy (*nympholepsia*,). State of one rapt or entranced. See *Catalepsy.*

Nymphomania, nim-fo-man'e-ah (*nympha*, *mania*, fury). An irresistible and insatiable desire in females for the venereal act. It occurs in those particularly who possess a nervous temperament and vivid imagination, especially if excited by improper language, masturbation, etc. In the commencement the sufferer is a prey to perpetual contests between feelings of modesty and impetuous desires. At an after period she abandons herself to the latter, seeking no longer to restrain them. In the last stage the obscenity is disgusting, and the mental alienation, for such it is, becomes complete.

Nymphoncus, nimf-on'kus (*nympha*, *onkos*, tumor). A morbid tumefaction of the nymphæ.

Nymphotomy, nimf-ot'o-me (*nympha*, *tome*, section). An operation, known and practised for a long time, consisting in the excision of the nymphæ. The operation is had recourse to when the seat of scirrhus, cancer, fungus, or gangrene, or when so large as to interfere with walking or coition. Nymphotomy is the circumcision of the female. Some authors have used the term for amputation of the clitoris.

Nys'sa. Genus of *Cornaceæ.* **N. can'dicans**, Ogeechee lime, grows in swamps of Georgia and Florida; also **N. capita'ta, N. grandidenta'ta**, or **N. uniflo'ra**, large tupelo, cotton gum, grows in southern U. S. The spongy roots of these species are used for corks and surgical tents.

Nystagmus (nist-ag'mus) or **Nystax'is** (*nustagmos*, sleep). A partial, involuntary, rotatory, or oscillatory movement of the eyeball. *Nystagmus rotatorius* (rotatory nystagmus) or *oscillatorius* is a spasmodic affection of the muscles of the eye, generally appearing in infancy, sometimes in conjunction with congenital cataract. Also coma vigil. **N., mi'ner's**, variety of nystagmus occurring among coal-miners. **N. mis'tus**, nystagmus in which oscillatory and rotary nystagmus exist.

Nysta'leus. Somnolent, sleepy.

Nyxis, niks'is (*nusso*, to pierce). Puncture; paracentesis.

O.

O. Abb. of *octarius*, a pint. Symbol for oxygen.

Oak balls. See *California oak balls.* **O. bark,** dried bark of smaller branches and young stems of *Quercus robur;* astringent. **O., black,** Quercus tinctoria. **O., com'mon,** Quercus robur. **O. galls,** see *Nutgall.* **O., Jeru'salem,** Chenopodium botrys; see also *Chestnut, Cork, Dyer's, Live, Poison, Spanish,* and *White.* **O. lungs,** Lichen pulmonarius. **O. man'na,** Diabekir and Armenian manna, obtained from leaves of Quercus vallonea and Q. Persica; consists chiefly of grape-sugar. **O. poi'son,** Rhus toxicodendron. **O., red,** Quercus rubra montana. **O., sea,** Fucus vesiculosus. **O., Spanish,** Quercus rubra montana. **O., white,** Quercus alba.

Oak'um. See *Linteum.*

Oämma, o-am'mah. Audition; also the ear.

Oärialgia, o-ar-e-al'je-ah. Ovarian neuralgia.

Oäric, o-ar'ik (*oarion*). Relating or appertaining to the ovary.

Oäricele, o-ar-e-se'le (Eng. o-ar'i-seel). Ovarian hernia.

Oäriocye'sis (*oarion, kuesis,* pregnancy). Ovarian pregnancy.

Oärion, o-ar'e-on (*oarion,* an egg). Ovary.

Oärioncus, o-ar-e-on'kus (*oarion, onkos,* swelling). Ovarian tumor.

Oärioparectama, o-ar-e-o-par-ek'tam-ah (*oarion, parekteino,* to extend). Enlargement of the ovary.

Oäriopathy, o-ar-e-op'ath-e (*oarion, pathos,* affection). Disease of the ovary.

Oäriophyma, o-ar-e-o-fe'mah (*oarion, phuma,* a swelling). Oarioncus.

Oäriorrhexia, o-ar-e-or-rheks'e-ah (*oarion, rhexis,* rupture). Rupture of the ovary.

Oärioscirrhus, o-ar-e-o-skir'rhus (*oarion, scirrhus*). Scirrhus of the ovary.

Oäriosteresis, o-ar-e-o-ster-a'sis (*oarion, steresis,* privation). Oariotomy.

Oäriotomy, o-ar-e-ot'o-me (*oarion, tome,* incision). Ovariotomy.

Oäritis, o-ar-e'tis. *Ovaritis.* Inflammation of the ovarium. When occurring in childhood it is the *Lochoöphoritis* of some.

Oäriule, o-ar'e-ule (*oarion, ule,* cicatrix). Corpus luteum.

Oärium, o-ar'e-um. Ovary.

Oäriydrops, o-ar-e-e'drops (*oarion, hudrops,* dropsy). Hydroarion.

Oärthrocace, o-ar-throk'as-e. *Omoärthrocace.* Inflammation of the scapulohumeral articular surfaces.

Oat'meal. See *Avena.*

Oats. Avena. **O., water,** Zizania aquatica.

Ob (L.). In composition, on, before, over, against, toward. At times only intensive; at others it means inversely. Before *c* and *f* it is often changed into *oc, of,* and before *p* always into *op.*

Obauditio, ob-aw-dish'e-o (*ob, audio,* to hear). Hardness of hearing; incomplete deafness.

Obauditus, ob-aw-de'tus. Hardness of hearing.

Obcæcatio, ob-se-kah'she-o (*ob, cæco,* to blind). Blindness.

Obdormition, ob-dor-mish'un (*ob, dormio,* to sleep). The state of being asleep; also of the limbs being asleep.

Obductio legalis, ob-duk'she-o leg-al'is. Legal post-mortem examination.

Obduc'tion. Examination of cadaver previous to medico-legal autopsy.

O'Beirne's tube. A long, flexible tube for high injection in cases of obstinate constipation.

Obelæa raphe, ob-el-e'ah raf'e (*obelos,* a spit or arrow). Sagittal suture.

Obe'lion. Point on median line in sagittal suture between the two parietal foramina, used in craniometry.

Obesitas, o-bes'it-as (fatness). Excessive corpulency. **O. col'li,** prominence of the neck from obesity. **O. cordis,** fatty degeneration of the heart. **O. nim'ia,** conversion into, or formation of, fat. **O. vis'cerum,** accumulation of fat in the intestines. The principal systems of treatment for reduction of obesity or for its prevention are those of Banting, Ebstein, and Oertel, all of whom enjoin exercise and abstention from carbohydrates. Ebstein advises the use of fats. Oertel restricts the quantity of fluids used.

Obesity, o-bes'it-e. Polysarcia. See *Obesitas, treatment for.*

Obesus, o-ba'sus (fat). Corpulent.

O'bex. Thin layer of white matter crossing posterior median fissure of medulla at calamus scriptorius.

Obfuscatio, ob-fus-kah'she-o (*ob, fusco,* to make dark). Amaurosis.

Obitus, ob'it-us (*ob, eo,* to go). Death; dead.

Objective, ob-jek'tiv. An object-glass; combination of lenses used next to the object in a compound microscope. Also applied to symptoms, as objective symptoms, in contradistinction to subjective symptoms. **O. cone,** cone of light proceeding from an object, the apex of which is on the object and the base on the cornea. **O. lig'ament,** thin fibrous band, apparently a detached portion of interosseous membrane, extending from coronoid process of ulna to radius just below the tubercle. **O. line of clav'icle,** trapezoid line. **O. line of fib'ula,** postero-internal border, from inner side of head to interosseous crest at lower fourth, giving attachment to fascia separating tibialis posticus from superficial muscles. **O. line of lower jaw, exter'nal,** impression for depressor muscles, extending downward and forward from anterior border of ramus. **O. line of lower jaw, inter'nal,** mylohyoid ridge. **O. line of ra'dius,** upper part of anterior border, downward and outward from tuberosity, affording attachment to supinator brevis, flexor sublimis digitorum, and flexor longus pollicis muscles. **O. line of thy'roid,** line for insertion of sternothyroid and thyrohyoid muscles on great wing of thyroid cartilage. **O. line of tib'ia,** popliteal line. **O. line of ul'na,** ridge from posterior extremity of lesser sigmoid cavity to posterior border, giving attachment to supinator brevis. **O. sensa'tions,** see *Sensations.*

Oblesion, ob-le'zhun. Absence or deficiency of some functions.

Obligatio, ob-lig-ah'she-o. Dressing.

Oblinition, ob-lin-ish'un (*ob, lino,* to besmear). Inunction.

Oblique, ob-leek'. Anything inclined or which deviates from the vertical line. Anatomists have given this name to certain muscles which have a unique direction as regards the plane that divides the body into two equal and symmetrical halves. **O. muscles of the abdo'men,** two in number: 1. *Obliquus externus abdominis, Grand* or *External oblique.* One of the broadest muscles of the body; situate at the lateral and anterior part of the abdomen, flat and quadrilateral. Attached above to the outer surface and lower edge of the last seven or eight ribs; below, to the anterior third of the external lip of the crista ilii; before, it terminates at the linea alba, a broad and strong aponeurosis which covers the rectus and presents toward the inferior parts two very solid fibrous fasciculi, which are inserted—the one at the symphysis, the other at the spine of the pubis—under the name of *Pillars of the abdominal ring.* These pillars leave between them an opening which forms the inferior orifice of the inguinal canal. The obliquus externus abdominis depresses the ribs and carries them backward during a strong expiration. It impresses on the chest a movement of rotation, and bends the thorax upon the pelvis, and conversely. It also contracts the abdominal cavity. 2. *Obliquus in-*

ternus abdominis, *Internal oblique*, is broad, especially before; thin, and irregularly quadrilateral, like the preceding, beneath which it is situate. Attached, above, to the inferior edge of the cartilages of the fifth, fourth, third, and second ribs; below, to the anterior two-thirds of the interstices of the crista ilii, to the posterior part of the crural arch, and to the pubis; behind, to the spinous processes of the last two lumbar vertebræ, and to those of the first two portions of the sacrum; before, to the linea alba. Its upper fibres run obliquely upward and forward; the middle are horizontal; and the lower pass obliquely downward and forward. These last, in the male, are dragged down through the inguinal ring when the testicle descends, and form the two fasciculi of the cremaster. The *Obliquus internus* resembles the O. externus in function. **O. muscles of the eye** are two in number: 1. *Obliquus superior oculi*, *Trochlearis*, situate at the inner and upper part of the orbit; is small, round, fusiform, and reflected upon itself in the middle of its course. Behind, it is attached to the inside of the foramen opticum; opposite the internal orbital process it becomes a small, round tendon, which slides in a cartilaginous pulley fixed to the os frontis, and is reflected at an acute angle to proceed downward and outward, to attach itself to the outer and back part of the globe. This muscle carries the globe forward and inward, producing a movement of rotation, which directs the pupil downward and inward. This is conceived to be an involuntary muscle, as well as the next. In sleep, when power over the straight or voluntary muscles of the organ is nearly lost, the eye is given up to the oblique muscles, which lodge the transparent cornea under the upper eyelid. At the approach of death the same thing is observable; hence the turning up of the eye at such time is not an evidence of agony or suffering, but of insensibility. 2. *Obliquus inferior*, situate at the anterior and inferior part of the orbit. It is flat and attached to the inner and anterior part of the orbital surface of the superior maxillary bone, on the outside of the lacrymal gutter; from thence it passes outward and backward, and terminates by an aponeurosis at the posterior and inner part of the globe of the eye. It carries the globe of the eye inward and forward, and directs the pupil upward and outward. **O. mus'cles of the head**, two in number: 1. *Obliquus superior*, situate at the sides of and behind the articulation of the head; it is flat and attached, on the one hand, to the top of the transverse process of the atlas, and on the other terminates at the occipital bone beneath the inferior curved line, and sometimes also at the mastoid region of the temporal bone. It extends the head, inclining it to one side. 2. *Obliquus inferior capitis*, situate at the posterior part of the neck and head. It is round, fusiform, attached to the spinous processes of the axis, and proceeds to terminate behind and below the summit of the transverse process of the atlas. It impresses on the first vertebra and the head a movement of rotation, which turns the face to one side. **O. pro'cesses**, articular process. **O. ridge of molar tooth**, thick ridge of enamel connecting the anterior internal cusp with the posterior external cusp in upper molars. **O. ridge of trape'zium**, eminence on palmar surface of trapezium, giving attachment to the ligamentum carpi volare proprium. **O. vein of heart**, small vein in vestigial fold of pericardium, remains of fœtal left superior cava.

Obliquitas, ob-lik'we-tas. Obliquity.

Obliquity, ob-lik'we-te. State of being oblique, as o. of the fœtal head, o. of the pelvis, o. of the uterus, etc.

Obli'quus (*ob*, *liquis*, slanting). Oblique. **O. abdom'inis exter'na mi'nor** or **abdom'inis secun'dus**, rare muscle arising from the 10th or 11th rib, and passing to Poupart's ligament, sheath of rectus, or middle of crest of ilium (rectus lateralis abdominis). **O. acces-so'rius oc'uli**, gracillimus oculi. **O. ascen'dens**, O. internus abdominis. **O. auric'ulæ**, a few muscular fibres on medial surface of external ear, from eminentia conchæ to eminentia fossæ triangularis. **O. au'ris**, laxator tympani. **O. cap'itis infe'rior** or **ma'jor**, small muscle arising from spinous process of axis, inserted into transverse process of atlas. **O. cap'itis supe'rior** or **mi'nor**, small muscle arising from transverse process of atlas, passing up and back to be inserted between curved lines of occipital bone. **O. col'li supe'rior**, see *Longus colli*. **O. descen'dens exter'nus**, see *Oblique muscles of abdomen*. **O. inter'nus abdom'inis**, see *Oblique muscles of abdomen*. **O. ma'jor**, O. externus abdominis, O. inferior capitis, O. superior oculi. **O. mi'nor**, O. internus abdominis. **O. mi'nor cap'itis**, O. superior capitis. **O. mi'nor oc'uli**, O. inferior oculi.

Obliterated, ob-lit'er-a-ted (*oblitero*, to efface). A vessel or duct is said to be obliterated when its parietes have approximated and contracted such an adhesion to each other that the cavity has completely disappeared.

Obliteratio completa, ob-lit-er-ah'she-o kom-ple'tah. Matting or growing together of organic parts.

Oblivio, ob-liv'e-o (forgetfulness). Amnesia. **O. iners'**, lethargy.

Oblobium, ob-lo'be-um (*ob*, *lobos*, a lobe). Antilobium; antitragus.

Obmutescence, ob-mu-tes'sence. Aphonia.

Obnubilation, ob-nu-bil-a'shun (*ob*, *nubilo*, to be cloudy). Giddiness; dazzling.

Obolus, ob'ol-us. An ancient weight of 9 or 10 grains.

Obrang. Plant of Guinea, employed in decoction in orchitis.

Obscœnæ (ob-se'ne) **par'tes.** Obscene parts. Genital organs.

Observation, ob-ser-va'shun (*ob*, *servo*, to keep—*e. g.* in sight). Act of examining a thing by means of the external senses. Employed in several acceptations. It expresses—1. The action of observing. 2. The aggregate of knowledge afforded by observation. In French—but not in English—it means the case or history of the phenomena presented by a patient in the course of a disease. **O., meth'od of**, numerical method.

Obsession, ob-sesh'un. Disordered condition of intellect, in which the patient imagines himself possessed of demons.

Obsoles'cence. State of becoming old and useless; cessation of normal growth and action.

Obsolete, ob'so-lete. Out of use; also deficient in development.

Obstetric, ob-stet'rik (*obsto*, to stand before). Relating or appertaining to obstetrics, as obstetric auscultation, obstetric exploration, etc. **O. chair**, labor chair.

Obstet'rical. Obstetric. **O. con'jugate**, see *Pelvic diameters*.

Obstetricans, ob-stet'rik-ans. Accoucheur.

Obstetricatio, ob-stet-rik-ah'she-o. Obstetrics.

Obstetricius, ob-stet-ris'e-us. Accoucheur.

Obstetrics, ob-stet'riks. *Tocology*, *Tokology*. Art of midwifery; midwifery in general.

Obstetricy, ob-stet'ris-e. Obstetrics.

Obstetrist, ob-stet'rist. Accoucheur.

Obstetrix, ob-stet'riks. Midwife.

Obstipa'tio. See *Hump*.

Obstipation, ob-stip-a'shun (*ob*, *stipo*, to cram close). Constipation. Lateral curvature of the spine. **O. alvi'na**, constipation. **O. tenes'mus**, tenesmus.

Obstipitas capitis (ob-stip'it-as kap'it-is) or **col'li** (*obstipo*, to lean to one side). Torticollis.

Obstructio, ob-struk'she-o (*obstruo*, to stop up by building against). Constriction; detention in a cavity or canal of any substance which is morbid from either quantity or quality. **O. al'vi**, constipation. **O. duc'tûs alimenta'rii**, constipation. **O. duc'tûs Stenonia'ni**, constriction of Steno's duct. **O. intestina'lis**, constipation. **O. pulmo'num pituito'sa febri'lis**, peripneumonia notha. **O. rec'ti spas'tica**, spasmodic stricture of the rectum.

Obstruction, ob-struk'shun (same etymon). In pathology applied to various forms of obstruction, such as the valvular, mitral, and aortic, to obstruc-

tion of the bowels, pancreatic duct, etc. **O., albu'minous,** amyloid degeneration. **O. of the intes'tines,** condition usually dependent upon excessive accumulation of fæces.

Obstruent, ob'stru-ent. A medicine which closes the orifices of ducts or vessels.

Obstupefacientia, ob-stu-pe-fash-e-en'she-ah (*ob, stupefacio,* to be numb). Narcotics.

Obstupescence, ob-stu-pes'sence. Stupefied condition resulting from consternation or from traumatism.

Obsuturalis, ob-su-tu-ral'is. Applied to placenta when situate against or opposed to a suture.

Obtruncatio, ob-trun-kah'she-o (*ob, trunco,* to cut off). Decollation.

Obtundens, ob-tun'dens (*obtundo,* to beat against, and therefore to blunt the edge). An epithet applied to remedies supposed, according to an erroneous theory, to be possessed of the power of blunting the acrimony of the humors—*e. g.* a demulcent.

Obturamentum, ob-tu-rah-men'tum (*obturo,* to stop). Anything that obstructs, as fæcal accumulations. Any obstacle to delivery of fœtus in preternatural or other presentations.

Obturatio, ob-tu-rah'she-o. Infarction; obstruction; detention in canals or cavities of any substance that is morbid either from quantity or quality. Plugging. **O. of teeth,** plugging of teeth.

Obturatococcyge'us. Portion of levator ani arising from spine of ischium.

Obturator, ob-tu-ra'tor. An instrument adapted for closing an opening caused by a wound or disease, as *obturator of the palate;* see *Palate, artificial.* Also a name given in anatomy to several parts connected with the obturator foramen. **O. ar'tery** arises most commonly from the hypogastric. It is, however, frequently given off from the epigastric; a matter of importance to be determined in cases of femoral hernia. Of 500 obturator arteries examined by M. J. Cloquet, 340 were furnished by the hypogastric, and 152 by the epigastric or crural. When it arises from the hypogastric, it passes forward and outward, and then turns horizontally into the cavity of the pelvis, to issue from this cavity by the opening left at the upper part of the obturator membrane. When, on the contrary, the obturator artery arises from the epigastric or the crural, it descends obliquely inward behind the os pubis to the obturator foramen. At its exit from the pelvis the artery divides into two branches, a posterior and an anterior, which are distributed to the muscles of the anterior and superior part of the thigh. **O. canal',** passage for obturator vessels and nerves through upper part of obturator foramen. **O. exter'nus,** muscle of hip arising from outer surface of obturator membrane and rami of ischium and pubes, inserted into digital fossa of great trochanter. **O. fas'cia** covers deep surface of O. internus muscle, constituting its perimysium; upper part, a portion of pelvic fascia. **O. fora'men,** a large opening of oval or triangular form in the anterior part of the os innominatum, on the outside of the symphysis pubis and beneath the horizontal ramus of the os pubis. This foramen is closed by a membranous ligament. **O. groove,** deep oblique furrow on under surfaces of horizontal ramus of pubis for O. vessels and nerves. **O. her'nia,** hernia through O. foramen. **O. lig'ament** or **mem'brane,** *Subpubic membrane,* a fibrous membrane fixed to the whole circumference of the obturator foramen, except above, where an opening remains for the passage of the vessels and nerves of the same name. **O. mus'cles,** two in number: 1. *O. externus,* situate at the anterior and inner part of the thigh. It is broad, flat, and triangular; attached on the one hand to the anterior surface of the os pubis, to that of the ischium, and to the anterior surface of the obturator ligament. Its fleshy fibres converge to the tendon inserted at the inferior part of the cavity of the great trochanter; it rotates the thigh outward. 2. *O. Internus,* situate almost entirely in the pelvis, arises from the inner surface of the obturator ligament, and from the posterior part of the circumference of the obturator foramen, inserted by means of a strong tendon running between the two portions of the gemini into the cavity at the root of the great trochanter, after having turned upon the ischium, which forms for it a kind of pulley; it also rotates the thigh outward. **O. nerve** proceeds principally from the 2d and 3d lumbar nerves, descends into the pelvis, gains the obturator foramen, gives branches to the obturator muscles, and divides, behind the abductor primus and pectinalis, into two branches: *anterior,* whose branches are distributed to the first two adductors, gracilis, and integuments; *posterior,* distributing its ramifications to the obturator externus and third adductor. **O. nerve, acces'sory,** see *Accessory obturator nerve.* **O. plex'us,** formed by veins surrounding O. foramen; discharges through O. vein. **O. tu'bercles,** eminences on either side of the obturator groove when the O. membrane expands over it. The posterior or superior is where the edge of the acetabulum meets the O. foramen; the anterior or inferior is on the descending ramus of the pubis. **O. vein** has, ordinarily, the same arrangement as the artery. It is common, however, to find it arising from the epigastric; while the corresponding artery proceeds from the hypogastric, and conversely.

Obturatores, ob-tu-rah-to'rees. Obturator muscles.

Ob'turatory bur'sa. Bursa under tendon of internal obturator.

Obtusion, ob-tu'zhun (*obtundo, obtusum,* to blunt). Blunting of acuteness of sensation, as by disease.

Obvolventia, ob-vol-ven'she-ah (*obvolvo,* to cover over). Demulcents.

Oc, as a prefix. See *Ob.*

O'ca. Oxalis tuberosa.

Ocab. Sal ammoniac.

Occæcatio, ok-se-kah'she-o (*oc, cæcus,* blind). Blindness.

Occasional cuta'neous nerve. An occasional branch of obturator nerve, descending along border of sartorius to inner side of knee, communicating with internal saphenous nerve. Many other nerves, arteries, and veins are *occasional,* but do not receive that distinctive name.

Occipital, ok-sip'it-al (*occiput*). Belonging to the occiput. **O. angle,** one indicating inclination of plane of foramen magnum, either with reference to line from opisthion to lower border of orbit (Daubenton), from opisthion to nasion or basion to nasion (Broca), or with reference to basicranial axis; see *Angles of Deschamps, Orbito-occipital angle, Basilar angles.* That between lines drawn from inion to lambda and to opisthion (Lissauer). Also posterosuperior angle of parietal bone. **O. arc,** arc measured on the surface from lambda to opisthion. **O. a'rea,** see *Areas of skull.* **O. ar'tery** arises from the posterior part of the external carotid, beneath the parotid; proceeds backward, passes between the mastoid process and the transverse process of the atlas; reaches the occipital bone, and divides into two branches, ascending posterior and anterior, distributed to the neighboring muscles and ligaments. **O. ar'tery of the brain,** branch of posterior cerebral supplying occipital lobe. **O. bone,** situate at the posterior and inferior part of the cranium, which it assists in forming. It is flat, symmetrical, and curved upon itself. It presents—1. An *occipital* or *posterior surface,* which is convex, and has, upon the median line, the basilary surface, the foramen magnum—through which passes the spinal marrow with its membranes and vessels—the external occipital crest, the external occipital protuberance; and, at the sides, the upper curved line, large rough arched ridge, or transverse arch, the lower curved line, the posterior condyloid fossæ, the condyles for the articulation of this bone with the atlas, and the anterior condyloid fossæ, pierced by a foramen for the passage of the ninth pair of nerves. 2. A *cerebral* or *anterior surface.* On the median line are the basilary fossæ, the inner orifice of the foramen magnum, the internal occipital crest, the internal occipital protuberance, the cruciform spine, a channel which lodges the termination of the straight sinus, and, on each side, the occipital

fossæ—superior or cerebral and inferior or cerebellous, and separated by a groove which lodges the lateral sinus. 3. The surfaces of the occipital bone are separated by four ridges and four angles. Two superior edges articulate with the parietal bones; the two lower join the temporal; and the anterior angle, the basilary process, is united to the sphenoid. In extremely rare cases Hyrtl found a flat eminence, about the size of a hazelnut, at the occipital insertion of the rectus capitis lateralis, containing cells which communicated with those of the mastoid process, termed *pneumatic occipital bone.* **O. convolu'tions,** situate upon occipital lobe of brain. On the convex surface are three, the superior, middle, and inferior, or first, second, and third. The *cuneate lobule,* a triangular lobule seen on median aspect, belongs to the first. These connect, by small annectant convolutions, with convolutions of the frontal and temporosphenoidal lobes; they are united posteriorly by the *descending* convolution, which is C-shaped and embraces the forked extremity of the calcarine fissure. Upon the tentorial surface the following convolutions pass without notable change into those of the lobes lying in front: *Superior occipito-temporal,* lying between calcarine and collateral fissures, and continuous in front with the uncinate convolution; the *inferior occipito-temporal* lies between the collateral fissure and inferior temporal sulcus, and extends from posterior extremity of the hemisphere to near the anterior extremity of the temporo-sphenoidal lobe. **O. diam'eter, max'imum,** diameter of skull from asterion to asterion. **O. em'issary vein,** small branch occasionally originating from torcular Herophili, passing through a foramen in occipital protuberance to one of the occipital veins. **O. font'anelle,** see *Fontanelle.* **O. fora'men,** foramen magnum. **O. fos'sæ,** concavities on cerebral surface of O. bone; superior or cerebral and inferior or cerebellar. **O. glands,** suboccipital glands. **O. groove,** depression on mastoid portion of temporal bone for O. artery. **O. line of Daub'enton,** see *Daubenton, line of.* **O. lobe,** postero-inferior portion of hemispheres; pyramidal in shape, with convex, medial, and tentorial surfaces; upon the medial surface, bounded by the parieto-occipital sulcus; on the convex surface, less distinctly by the transverse occipital, or, according to some, anterior occipital sulcus; upon the tentorial surface it passes into the temporal lobe. **O. lob'ule,** cuneate lobule. **O. mus'cle,** many anatomists have given this name to the posterior fasciculus of the occipitofrontalis. **O. nerves.** The great occipital nerve, internal branch of posterior division of second cervical, supplies complexus and skin of O. region. The small occipital nerve, branch of cervical plexus, derived from second and third cervicals, ascending along posterior border of sterno-mastoid to region behind the ear, supplying the integument. A portion sometimes arises separately from the plexus, and is distributed to the region of the mastoid process, sometimes called the second small occipital nerve. The internal branch of the posterior division of the third cervical sometimes pierces the trapezius and ramifies in the integument over the occipital protuberance; is then known as the third small occipital nerve. **O. point,** point on occipital bone and in mesial plane farthest removed from the glabella. Also point of spherical field of regard behind the head, diametrically opposed to the principal fixation point. **O. pole,** rounded end of occipital lobe of cerebrum. **O. protu'berances,** two prominent elevations on O. bone: *external,* at junction of superior curved lines and O. crest, gives attachment to ligamentum nuchæ; *internal,* on inner surface in nearly corresponding situation, at intersection of the internal O. crest with the transverse ridge, to which the tentorium is attached. **O. re'gion,** occiput. **O. sec'tor,** area in median plane of skull between lines drawn from hormion to lambda and inion (Lissauer). **O. si'nus,** passage for venous blood within falx cerebelli, extending from posterior spinal veins to torcular Herophili; sometimes double. **O. sul'ci,** furrows on convex surface of O. lobes of brain. *Anterior o. s.,* running obliquely upward and backward from præoccipital notch; placed by some in parietal lobe. *Inferior o. s.,* near lateral edge of O. lobe. *Middle o. s.,* slight and inconstant, about midway between the other two. *Transverse o. s.,* directed outwardly from a little behind parieto-occipital fissure; believed to be homologous with external perpendicular fissure of ape's brain. **O. tri'angles,** measurements of O. region proposed by Welcker. *Superior o. t.,* base, biparietal diameter, apex at inion. *Inferior o. t.,* base, bimastoid diameter, apex at inion. Lateral o. triangles are triangles between these. **O. vein,** its roots follow exactly the course of the branches of the artery, and unite into a single trunk which opens into the internal jugular vein, and sometimes into the external. **O. ver'tebra,** O. bone, so called with reference to vertebral theory of the skull. See *Cranial vertebræ.*

Occipita'lis. Subcutaneous muscle of occipital region, rising from superior curved line of O. bone, inserted into the epicranial aponeurosis. **O. ma'jor nerve,** see *Occipital nerves.* **O. mi'nor, O. transver'sus,** muscle frequently found arising from inner portion of superior curved line of O. bone, proceeding outward to be inserted upon tendon of the sternomastoid muscle or upon the bone.

Occipitium, ok-sip-ish'e-um. Occiput.

Occipito-atloid, ok-sip'it-o-at'loid. Having reference to the occiput and atlas. **O.-a.** or **Occip'ito-atlan'tal articula'tion** is the articulation of the condyles of the occipital bone with the superior articular cavities of the atlas. It is strengthened by two ligaments, the one anterior, the other posterior, called occipito-atloid or occipito-atlantal ligaments; the one extends from the anterior, the other from the posterior, arch of the atlas to the corresponding portion of the circumference of the foramen magnum.

Occipito-axoid (ok-sip-it-o-aks'oid) or **Occipito-ax'ial.** Relating to the occipital bone and the axis or second vertebra. **O.-a. articula'tion,** the connection of the occipital bone with the axis or second vertebra, although these bones are not really articulated, but are merely retained in apposition by three strong ligaments, the posterior of which is called occipito-axoid or occipito-axial, and the two others odontoid. Some describe two layers—superficial or posterior common ligament; deep, occipito-cervical, or cervicobasilar.

Occipitobregmatic, ok-sip-it-o-breg-mat'ik. Relating to the occiput and bregma.

Occipitocervical, ok-sip-it-o-surv'i-kal. Relating to the occiput and neck.

Occipitocotyloid, ok-sip-it-o-kot'il-oid. With the occiput directed toward the acetabulum of the mother; said of position assumed by the fœtus.

Occipitofrontal, ok-sip-it-o-fron'tal. Relating to occipital and frontal regions. **O. aponeuro'sis,** epicranial aponeurosis. **O. diam'eter,** distance between the occipital and frontal protuberances; about 4½ inches in fœtus at term.

Occipitofrontalis, ok-sip-it-o-fron-tal'is. *Occipital muscle.* The majority of anatomists call by this name the whole of the fleshy plane, with the epicranial or coronal aponeurosis which covers the head from the occiput to the forehead; attached by its posterior fasciculus to the two outer thirds of the upper curved line of the occipital bone, and to the outer surface of the mastoid portion of the temporal; and by its anterior fasciculus terminates at the eyebrow, where it becomes confounded with the superciliaris, pyramidalis nasi, and orbicularis palpebrarum. By the contraction of its anterior fasciculus it draws forward a part of the integuments of the cranium. It wrinkles the skin of the forehead transversely, and may also contribute to open the eye by its decussation with the orbicularis palpebrarum. The posterior fasciculus draws backward a part of the skin of the cranium, and assists in stretching the common aponeurosis.

Occipitohæmal (ok-sip-it-o-he'mal) **arch.** Pectoral arch.

Occipitohy'oid mus'cle. An anomalous muscle, apparently an appendage to the digastric and stylo-

hyoid, arising from the O. bone; passing over the sterno-cleido-mastoid to insertion upon the hyoid bone.

Occipitolateral, ok-sip-it-o-lat'er-al. Occipitocotyloid.

Occipitomastoid, ok-sip-it-o-mas'toid. Relating to the occipital bone and the mastoid process; as the *Occipitomastoid suture*, situate between the occipital bone and the mastoid process of the temporal bone.

Occipitomeningeal, ok-sip-it-o-men-in'je-al. Belonging to the occipital bone and to the dura mater. **O. ar'tery,** a branch of the vertebral given off to the dura mater at its entrance into the cranium.

Occipitomen'tal diam'eter. Distance from posterior fontanelle to the chin; about 5¼ inches in fœtus at term.

Occipito-odontoid, ok-sip'it-o-o-don'toid. Relating to the occipital bone and odontoid process of atlas.

Occipitoparietal, ok-sip-it-o-par-i'e-tal. Relating to the occipital and parietal bones. See *Lambdoid.*

Occipitopetrosal, ok-sip-it-o-pe-tro'sal. Relating to the occipital bone and petrous portion of temporal bone.

Occipitopharyngeus, ok-sip-it-o-far-in-je'us. Supernumerary muscle arising from basilar process of O. bone, inserted into the pharyngeal wall.

Occipitoposterior, ok-sip-it-o-pos-te're-or. With the occiput directed toward the sacrum of the mother; said of position assumed by the fœtus.

Occipitoscapula'ris. Rhombo-occipitalis.

Occipitostaphylinus, ok-sip-it-o-staf-il-e'nus. Portion of superior constrictor of pharynx arising from pterygoid process, palate-bone, or soft palate, passing backward to be inserted upon the occipital bone.

Occipitotem'poral. Relating to occipital and temporal regions. **O. convolu'tions,** those common to occipital and temporal lobes. Two, situate on the ventral surface, known as medial, internal, or superior o. c., also as fifth temporal c., inferior internal temporal c., lobulus lingualis, and lateral, external, or inferior o. c.; also the fourth temporal c., middle internal c., lobulus fusiformis. **O. sul'cus,** collateral fissure.

Occiput, ok'sip-ut (*oc, caput,* the head). Back part of the head, formed by the occipital bone. **O., soft,** softening, and consequent thinness, of the occipital bone.

Occlusion, ok-klu'zhun (*occludo,* to shut up). Sometimes signifies simply the transient approximation of the edges of a natural opening, *occlusion of the eyelids,* for example; at others synonymous with imperforation, as *occlusion of the pupil, vagina,* etc. **O. of the intes'tines,** any modification in the calibre of the intestinal canal which may be sufficient to arrest the progress of alimentary and fecal matters. See *Ileus, Imperforation,* etc.

Occult (ok-kult') **diseases.** See *Latent.*

Occupa'tion neuro'ses. Nervous disorders characterized by spasmodic symptoms upon attempting the movements peculiar to an habitual occupation; see *Milker's, Telegrapher's, Writer's cramp,* etc.

Oc'ellated. Having eyes (ocelli being the eyes of insects).

Ochema, ok-a'mah. Vehicle.

Ocheteumata, ok-e-tu-mat'ah (*ocheteuma,* canal). Nares.

Ochetos, ok'et-os. Canal.

Ocheuma, ok-u'mah (*ocheuma*). Coition; fecundation.

Ocheus, ok'us (*echo,* to hold). Scrotum.

Ochlesis, ok-la'sis (*ochlos,* a crowd). *Crowd-poisoning.* A morbid condition induced by the crowding together of sick persons under one roof or in the same apartment.

Ochlodes, ok-lo'dees. Keratoconus.

Ochre, o'ker. See *Hæmatites.*

Ochrea, ok're-ah (*ochros,* pale). Ochre; also Abelmoschus esculentus. **O. fer'ri ru'brica,** chalk, red. **O. ru'bra,** red ochre; hæmatites. **O. ru'bra creta'cea,** chalk, red.

Ochriasis, ok-re'as-is. Paleness.

Ochroma, ok-ro'mah. Paleness. **O. lagopus,** corkwood tree, native of tropical America, possessing mucilaginous and antisyphilitic properties.

Ochronosis, ok-ron'os-is. Yellow staining of tissues.

Ochropyra, ok-rop'ir-ah (*ochros,* pale, *pur,* fever). Yellow fever.

Och'rotes. Paleness.

Ochrotyphus, ok-ro-ti'fus (*typhus*). Yellow fever.

Ochrozia (ok-ro'ze-ah) **Bourbon'ica.** Isle of Bourbon yellow wood; tree whose wood is extremely bitter; leaves possess tonic and febrifuge properties.

Ochthe, ok'the. Margin of an ulcer.

Ochthiasis, ok-the'as-is (*ochthos,* a hill, a protuberance). Molluscum.

Ochthodes, ok-tho'des. Callous.

Ocimum (o'sim-um) **adscen'dens** (*okus,* swift, owing to its swift growth). O. basilicum. **O. basil'icum,** *Common* or *Citron basil,* ord. Labiatæ. This herb has a fragrant odor and aromatic taste; used as a condiment; supposed to possess nervine properties. **O. caryophylla'tum,** *Small* or *Bush basil;* possesses properties similar to the former; sometimes used as snuff. **O. citra'tum,** O. basilicum. **O. pilo'sum,** O. basilicum. **O. racemo'sum,** O. basilicum.

Ocotea (ok-o-te'ah) **ama'ra.** Nectandra cymbarum. **O. cym'barum,** Nectandra cymbarum. **O. pichu'rim,** see *Pichurim beans.* **O. puchu'ry,** see *Pichurim beans.*

Ocrea, o'kre-ah. Hippocampus minor; shin.

Octana, ok-tan'ah (*octo,* eight). *Hebdomadaria;* a fever with weekly paroxysms, a suppositious case.

Octarius, ok-tah're-us (*octo,* eight). A pint, the eighth part of a wine-gallon; contains sixteen fluidounces (Ph. U. S.), twenty fluidounces imperial measure. See *Weights.* The symbol of a pint is O.

Oc'topus (*octo, pous,* foot). Monster with eight extremities. **O. synapheocephalus,** hemipages.

Octoroon, ok-to-roon'. Offspring of the white and quadroon. See *Mulatto.*

Octunx, ok'tunks (*octo,* eight, *uncia,* an ounce). A weight of eight ounces.

Ocu'ba wax. Vegetable wax obtained by boiling the berries of myristica.

Ocular, ok'u-lar (*oculus,* eye). Of or belonging to the eye. **O. cone,** cone formed within the eye by a pencil of rays proceeding from an object, the base of the cone being on the cornea, the apex on the retina. **O. mus'cles,** see *Oblique muscles of the eye, Recti muscles of the eye,* etc. **O. sheath,** loose tissue from apex of orbit to diameter of eyeball. **O. spec'trum,** see *Spectrum.*

Oculares communes, ok-u-lar'ees kom-mu'nees. Motores oculorum. **O. den'tes,** canine teeth.

Ocularia, ok-u-lar'e-ah (*oculus*). Euphrasia officinalis.

Ocularis, ok-u-lar'is. Ocular. **O. commu'nis,** motor oculi communis.

Oc'uli cancrorum, kank-ro'rum. Crabs' eyes. **O. marmarygo'des,** metamorphopsia. **O. palpebra'rum scab'ies prurigino'sa,** see *Ophthalmia tarsi.*

Oculi'na virgin'ea. White coral. See *Coral.*

Oc'ulist. One who devotes himself to the treatment of diseases of the eyes.

Oculofrontal rugæ, ok-u-lo-fron'tal ru'ge. Wrinkles above the root of the nose, caused by the corrugator supercilii, said to be expressive of internal pain or mental anguish.

Oculomotor, ok-u-lo-mo'tor. Effecting movement of the eye. **O. nerve,** third cranial; motor nerve for all muscles of the eye save superior oblique and external rectus. It arises from nucleus under floor of Sylvian aqueduct, emerging on inner side of crus cerebri just in front of the pons, and leaves the cranium through the sphenoidal fissure. **O. nerve, exter'nal,** abducent nerve. **O. nu'cleus,** origin of O. nerve, extends from nucleus of fourth, with which it is continuous, to posterior cerebral commissure. **O. sul'cus,** see *Pendicular sulcus.*

Oculomotorius, ok-u-lo-mo-to're-us. Motor oculi.

Oculomuscular (ok-u-lo-mus'ku-lar) **nerves, com'mon.** Motores oculorum.

Oculona'sal nerve. Nasal nerve.

Oculopupillary, ok-u-lo-pu'pil-lah-re. Relating to the pupil of the eye.

Oculospinal, ok-u-lo-spi'nal. Belonging to the eye and the spine, as the oculospinal axis, ciliospinal axis, a portion of the spinal cord—probably from the fifth cervical to the twelfth dorsal vertebræ—partial division of which affects the size of the pupils, the vascularization of the eyes, etc.

Oculozymot'ic line. Furrow extending from internal angle of the eye to below the malar eminence. See *Jadelot's lines.*

Oculum movens primus, ok'u-lum mo'vens pre'mus. Rectus internus oculi. **O. mo'vens quar'tus**, rectus inferior oculi. **O. mo'vens secun'dus**, rectus externus oculi. **O. mo'vens ter'tius**, rectus superior oculi.

Oculus, ok'u-lus. Eye. **O. bovi'nus** or **bu'bulus**, hydrophthalmia. **O. bo'vis**, Chrysanthemum leucanthemum. **O. bu'bulus**, O bovinus. **O. cæs'ius**, glaucoma. **O. du'plex**, binoculus. **O. elephanti'nus**, hydrophthalmia, **O. ge'nu**, patella. **O. lac'rymans**, epiphora. **O. lepori'nus**, lagophthalmia. **O. o'vi**, cicatricula. **O. purulen'tus**, hypopyon. **O. sim'plex**, see *Monoculus.* **O. typho'nis**, scilla.

O'cy (*okus*, quick). In composition, quick.

Ocymum, o'sim-um. See *Ocimum.* **O. sylves'tre**, Clinopodium vulgare.

Ocyodinic, o-se-o-din'ik (*ocy*, *odin*, labor-pain). Ocytocic; oxytocic.

Ocyphonous, o-sif'o-nus (*phonos*, murder). An agent that kills speedily.

Ocytoceus, os-it-o'se-us. Ocytocic.

Ocytocic, os-it-os'ik (*ocy*, *tokos*, labor). Ocyodinic. Anything that expedites parturition.

Ocytocious, os-it-os'e-ous (*ocutokios*). Ocytocic.

Ocytocus, os-it'ok-us. A quick or easy labor.

O. D. Abbv. for oculus dexter, right eye. Also abbv. for optic disk.

Od. A term applied by Reichenbach to designate an effective force which, according to him, not only manifests itself in contact with man, as in the case of magnets, crystals, the hands, etc., but also at distances, as from the sun, moon, and stars; indeed, from all matter. Such a force he termed *Odic.*

O. D. A. Abbv. for occipito-dexter-anterior—*i. e.* right occipito-anterior position of fœtus in labor.

Odaxesmus, o-daks-ez'mus. Odaxismus.

Odaxetic, o-daks-et'ik. Biting; gnawing.

Odaxismus, o-daks-iz'mus (*odaxo*, to bite). A sensation of biting or pricking, as that in the gums preceding the appearance of the teeth. Biting of the tongue during an attack of epilepsy.

Odes, o'dees. A suffix, at times having the signification of *oid*, but generally indicating, like *osus* in Latin terms, "consisting of" or "full of."

Od'ic. See *Od.*

O'din. Pain.

Odinagogue, o-din'a-gog (*odin*, *ago*, to lead). See *Ocytocic.*

Odinolyontous, o-din-o-le-on'tus. Anodyne.

Odinolysis, o-din-ol'is-is (*odin*, *lusis*, solution). Mitigation of labor-pains.

Odinopœia, o-din-o-pe'e-ah (*odin*, *poieo*, to make). Agents that excite or encourage labor-pains.

O'dis. Pain; labor.

Od'me. Odor.

Odontaganactesis, o-don-tag-an-ak-ta'sis. Odontochesis.

Odontagma, o-don-tag'mah. Odontoclasis.

Odontagogon, o-dont-ag-o'gon (*odonto*, *ago*, to draw). Dentagra.

Odontagra, o-don'tag-rah (*odonto*, *agra*, a seizure). A rheumatic or gouty pain in the teeth. Tooth forceps.

Odontalgia, o-don-tal'je-ah (*odontalgia*, *odonto*, *algos*, pain). *Toothache, Odontia.* A disease dependent upon a variety of causes affecting the cavity of the tooth, generally owing to caries, which exposes the cavity to the action of the air and to extraneous matters in general. Hence the treatment consists in plugging the tooth or destroying the sensibility of the nerve by powerful stimulants, and, if these means fail, in extracting the tooth. **O. cario'sa**, dental gangrene. **O. dentitio'nis**, dentition. **O. hæmo'dia**, great sensibility of the teeth; toothedge. **O. nervo'sa**, neuralgia of the teeth, characterized by periodical pain, shooting with the utmost violence along the branches of the fifth pair distributed to the affected jaw. **O. remit'tens et intermit'tens**, infra-orbitar neuralgia.

Odontalgic, o-don-tal'jik. Antiodontalgic; pertaining to toothache.

Odontamblyogmus, o-don-tam-ble-og'mus (*odonto*, *amblus*, blunt). Great sensibility of the teeth; toothedge.

Odontapotribe (o-dont-ap-ot'rib-e) or **Odontapotripsis**, o-dont-ap-o-trip'sis. Condition in which teeth are worn superficially.

Odontatrophy, o-dont-at'ro-fe (*odonto*, *atrophia*, atrophy). Atrophy of the teeth.

Odontelephas, o-dont-el'ef-as. Dentine.

Odonterismus, o-dont-er-iz'mus. Chattering of the teeth.

Odonteuros, o-dont-u'ros. Caries of the teeth.

Odonthæmodia, o-dont-he-mo'de-ah. Great sensibility of the teeth; toothedge.

Odontharpaga, o-dont-har'pag-ah (*odonto*, *harpazo*, to lay hold of). Toothache.

Odonthercos, o-dont-hur'kus. Set of teeth.

Odonthyalophthora, o-dont-he-al-o-tho'rah (*odonto*, *hualos*, enamel, *phthora*, corruption). Destruction of the enamel of the teeth.

Odonthyperæsthesis, o-dont-hip-er-ees-the'sis. Hæmodia.

Odontia, o-don'she-ah. Odontalgia. **O. defor'mis**, deformity of the teeth from error of shape, position, or number. **O. dentitio'nis lactan'tium**, see *Dentition* (*first*). **O. dentitio'nis pueril'is**, see *Dentition* (*second*). **O. edent'ula**, see *Nefrendes.* **O. excres'cens**, epulis. **O. incrus'tans**, tartar of the teeth. **O. stupo'ris**, hæmodia.

Odontiasis, o-don-te'as-is. Dentition.

Odontiater, o-dont-e-at'ur (*odonto*, *iatros*, physician). Dentist.

Odontiatria, o-dont-e-at-re'ah. Dentistry.

Odontic, o-don'tik. Antiodontalgic.

Odontitis, o-don-te'tis (*odonto*, *itis*). Inflammation of the teeth. **O. infan'tum**, inflammatory condition of the teeth and gums attending the first appearance of teeth in the young child.

Odonto, o-don'to (*odous*, tooth). In composition, tooth.

Odon'to-atlan'tal articula'tion. Pivot-joint between odontoid process of axis and anterior arch of atlas.

Odontoblasts, o-don'to-blasts (*odonto*, *blastema*). A layer of large cells, of elongated form, constituting the external layer of the dental pulp, and forming a kind of columnar epithelium. See *Membrana eboris* and *M. præformativa.*

Odontobothritis, o-don-to-both-re'tis (*odontobothrium*, *itis*). Inflammation of the alveoli.

Odontobothrium, o-don-to-both're-um (*odonto*, *bothrion*, a small pit). Alveolus.

Odontoceramic, o-don-to-se-ram'ik (*odonto*, *keramos*, potter's earth). Relating or appertaining to porcelain teeth, as the odontoceramic art, *odontoceramotechny*, the art of making porcelain teeth.

Odontoceramotechny, o-don-to-se-ram-o-tek'ne. See *Odontoceramic.*

Odontochalix, o-don-tok'al-iks. Dental cement.

Odontochirurgical, o-don-to-ki-rur'gik-al. Relating or appertaining to the surgery of the teeth.

Odontoclasis, o-don-to-kla'sis (*odonto*, *klasis*, fracture). Fracture of a tooth.

Odontocnesis, o-don-to-na'sis (*odonto*, *knesis*, itching). Sensation preceding cutting of teeth. Odaxismus.

Odontocnesmus, o-don-to-nez'mus. Odaxismus.

Odontocomium, o-don-to-ko'me-um. Dental hospital.

Odontodes, o-don-to'dees. Odontoid.

Odontodiarrhœa, o-don-to-di-ar-rhe'ah. Diarrhœa caused by dentition.

Odontodynia, o-don-to-din'e-ah (*odonto*, *odune*, pain). Odontalgia.

Odontogeny, o-don-toj'en-e (*odonto*, *genesis*, generation). Generation or mode of development of the teeth.

Odontoglyphon (o-dont-og'lif-on) or **Odontog'lyphum** (*odonto*, *glupho*, to hollow). Gum lancet.

Odontography, o-dont-og'ra-fe (*odonto*, *graphe*, a description). Description of the teeth.

Odontoid, o-dont'oid (*odonto*, *eidos*, shape, resemblance). Having the shape or appearance of a tooth. An epithet given to the processus dentatus of the second vertebra or axis; a separate bone in amphibia. **O. lig'aments**, *Check ligaments*, two strong and short conical fasciculi whose truncated summits embrace the sides of the odontoid process, and whose bases are fixed in the fossæ at the inner side of the condyles of the occipital bone. Their direction is obliquely outward and slightly upward. They enter into the composition of the occipito-axoid articulation, strengthen the junction of the head with the vertebral column, and limit the movement of rotation of the atlas on the axis. Other ligamentous fibres pass from the highest portion of the processus dentatus to the anterior margin of the foramen magnum of the occipital bone, constituting the *Ligamentum suspensorium dentis*. **O. pro'cess**, see *Axis*.

Odontolith, o-don'to-lith (*odonto*, *lithos*, a stone). A sort of incrustation of a yellowish color which forms at the coronæ of the teeth, and is called *Tartar*. It consists of seventy-nine parts of phosphate of lime, twelve and a half of mucus, one of a particular salivary matter, and seven and a half of animal substance, soluble in chlorohydric acid. A species of infusoria, *Denticoli hominis*, has been found in it.

Odontolithus, o-don-tol'ith-us. Odontolith.

Odontology, o-don-tol'o-je (*odonto*, *logos*, a discourse). *Odontologia*. A treatise on the teeth.

Odontoloxia, o-dont-o-loks'e-ah (*odonto*, *loxos*, oblique). Irregularity and obliquity of the teeth.

Odontol'oxy. Odontoloxia.

Odontoma, o-don-to'mah (*odonto*, *oma*). *Odontome*. Ivory exostoses of the teeth, the molars especially, composed of hypertrophied dentine, and resulting from morbid conditions of the pulp. Broca divides them into *Odontomata embryoplastica*, *O. odontoplastica*, *O. coronaria*, and *O. radicularia*. Tumor connected with the teeth, or composed of the same tissue as the teeth.

Odontomerion, o-dont-o-mer'e-on. Tænia dentata.

Odontomys, o-dont'om-is. Tooth pulp.

Odontonecrosis, o-dont-o-ne-kro'sis. Dental gangrene.

Odontonosology. Treatise on diseases of the teeth.

Odontoparallax'is (*odonto*, *parallaxis*, deviation). Irregularity and obliquity of the teeth.

Odontop'athy. Abnormal or pathological condition of the teeth.

Odontoperios'teum. Periodontium.

Odontophatne, o-dont-o-fat'ne (*odonto*, *phatne*, a crib, a stall). Alveolus.

Odontophatnitis (*odontophatne*). Odontobothritis.

Odontophlegmone, o-dont-o-fleg'mon-e. Odontitis.

Odontophyia, o-dont-o-fe'e-ah (*odonto*, *phuo*, to grow). Dentition.

Odontopiester, o-dont-o-pe-est'ur. Instrument designed for relief of toothache by pressure.

Odontoplerosis, o-dont-o-ple-ro'sis (*odonto*, *pleroö*, to fill). See *Filling*.

Odontoprisis, o-dont-o-pre'sis (*odonto*, *prisis*, gnashing of teeth). Grinding of the teeth, noticed especially in children, but not necessarily a symptom of gastric derangement.

Odontorrhage, o-dont-or'rhaj-e. Hemorrhage from the teeth.

Odontorrheumalgy, o-dont-or-rhume-al'je. Rheumatic toothache.

Odontorrhine, o-dont-or-rhin'e. Tooth rasp, lancet, or pick.

Odontorrhiza, o-dont-or-rhe'zah (*odonto*, *rhiza*, root). See *Tooth*.

Odontorrhizophthisis, o-dont-or-riz-o-te'sis. Caries of dental root.

Odontoschisis, o-dont-os'kis-is. Splitting of tooth.

Odontoschisma, o-dont-o-siz'mah. Fissured condition of a tooth.

Odontosei'sis or **Odontoseismus**, o-dont-o-size'mus (*odonto*, *seisis*, shaking). Looseness of the teeth.

Odontosis, o-dont-o'sis. Dentition; odontogeny.

Odontosmegma, o-dont-o-smeg'mah (*odonto*, *smegma*, a detersive substance). Dentifrice.

Odontospasmus, o-dont-o-spaz'mus (*odous*, tooth, *spasmos*, spasm). Convulsions caused by difficult dentition.

Odontosphacelisis (o-dont-o-sfas-el'is-is) or **Odontosphacelis'mus** (*odonto*, *sphakelos*, gangrene). Dental gangrene.

Odontosteophyton, o-dont-ost-e-of'it-on (*odous*, *osteon*, bone, *phuo*, to grow). Excrescence on a tooth of an osseous character.

Odontosteresis, o-dont-o-ster-a'sis (*odonto*, *steresis*, privation). Loss of the teeth.

Odontosynerismus, o-dont-o-sin-er-iz'mus (*odonto*, *sunerizo*, to strike together). Chattering or gnashing of the teeth.

Odontotechny, o-dont-o-tek'ne (*odonto*, *techne*, art). Dentistry.

Odontotheca, o-dont-o-the'kah (*odonto*, *theke*, a sheath). Dental follicle.

Odontotherapia, o-dont-o-ther-ap-e'ah (*odonto*, *therapeia*, healing). Dentistry; care and treatment of the teeth.

Odontother'apy. Odontotherapia.

Odontothryp'sis or **Odontotrimma**, od-ont-o-trim'mah (*odonto*, *tribo*, to rub). Dentirice.

Odontotripsis, o-dont-o-trip'sis (*odonto*, *tripsis*, friction). Abrasion or wearing away of the teeth.

Odontrypy, o-don'tre-pe (*odonto*, *trupao*, to perforate). *Odontotrypy*, *Odontotrypia*. Operation of perforating a tooth to evacuate purulent matter confined in the cavity of the pulp.

O'dor. *Odour*, *Odme*, *Osme;* a smell. Odors are subtle particles constantly escaping from the surface of certain bodies, hence called odorous. They act in some manner by actual contact with the nerves of the Schneiderian membrane, and give occasion to the sense of smell or olfaction.

Odoramen'tum (from *odor*). Scent; perfume.

Odoratio, o-dor-ah'she-o. Olfaction.

Odora'tus. Olfaction. **O. deperd'itus**, anosmia. **O. perver'tus**, anosmia.

Odorif'erous. Carrying or bearing an odor. **O. glands**, see *Sebaceous glands*.

Odorif'erum (*odor*, *fero*, to carry). Medicine that gives odor or flavor; scent, perfume.

Odoroscope, o'dor-o-skope (*odor*, *skopeo*, to view). Device for testing odors.

O'dorous. See *Odor*.

O'dos. Way.

O'dour. Odor.

O'dous. See *Teeth*.

O. D. P. Abbv. for occipito-dextra-posterior—*i. e.* right occipitoposterior position of fœtus in labor.

O'Dyer's method. Intubation of the larynx.

Odyle, o'dil. See *Od*.

Odyne, od'in-e (pain). A very common suffix to words, as in *Pleurodyne*.

Odyne'ma. Odyne.

Odynephatous, o-din-ef'at-us (verbally, pain-killer). Anodyne.

Odynephobia, o-din-e-fo'be-ah (*odyne*, *phobeo*, to fear). Fear or dread of pain.

Odynephorous, o-din-ef'or-us. Giving rise to pain.

Odyno'des. Painful.

Odynphagia, o-din-faj'e-ah (*odyne*, *phago*, to eat). Pain in swallowing.

Odynopoetic, o-din-o-po-et'ik (*odyne*, *poieo*, to make). Dolorific; causing pain.

Œciomania, e-se-o-man'e-ah (*oikeios*, belonging to a household or family, and *mania*). *Oikeiomania;* a form of moral insanity characterized by domestic perversity; shrewishness.

Œcoid, e'koid. *Oikoid.* Term applied to red blood-corpuscles the hæmoglobin of which has been lost.

Œconomia, e-ko-nom'e-ah (*oikos,* a house, *nomos,* law). Economy. **Œ. anima'lis,** physiology.

Œdal'icus (*oideo,* to swell). Œdematous.

Œdal'ius. Œdematous.

Œdema, e-de'ma (*oidema,* a swelling). Swelling produced by the accumulation of serous fluid in the interstices of the areolar texture. This swelling is soft, yields under the finger, preserves the impression for some time, and is pale and without pain. It presents the same character as anasarca, which is general œdema. Its etiology and treatment are also the same. See *Anasarca.* **Œ. acu'tum,** see *Anasarca.* **Œ. al'gidum,** sclerema neonatorum. **Œ. arsenica'lis,** swelling of the eyelids and face, induced by continued use of the preparations of arsenic. **Œ. articular'e,** hydrarthrosis. **Œ. cal'idum,** see *Anasarca.* **Œ. cap'itis,** hydrocephalus externus. **Œ. carbuncu'lo'sum,** œdema malignum. **Œ. cer'ebri,** œdema of the brain; a condition of the cerebral pulp in which there is an infiltration of serous fluid into it, so that it appears more moist or watery than common, and, when sliced or pressed, small drops of water are seen to ooze out. **Œ. compac'tum,** induration of the cellular tissue. **Œ., cre'tinoid,** myxœdema. **Œ. cruen'tum,** suggillation. **Œ. febri'le,** see *Anasarca.* **Œ. frig'idum,** œdema, chronic in character, devoid of pain and cold to the touch. **Œ. fu'gax,** transient swelling or inflation, as in some nervous and hysterical cases. **Œ. of the glot'tis,** œdematous laryngitis or angina, a disease consisting of serous or seropurulent infiltration into the submucous tissue of the glottis. The symptoms resemble those of croup, but the disease attacks the adult rather than the child. Age is, indeed, a principal means of diagnosis between the two affections. The disease is almost always fatal. Treatment varies according to the accompanying general symptoms. **Œ., hypostat'ic,** œdema due to hypostasis. **Œ. hyster'icum,** transient swelling or inflation occurring in hysteria. **Œ. indurati'vum,** œdema accompanied by induration. **Œ., infec'tious,** œdema malignum. **Œ., inflam'matory,** exudation of a serous character into inflamed tissue. **Œ., laryngе'al,** œdema having its origin in the larynx or in an inflammation of the laryngeal region. **Œ. of the lungs,** infiltration of serum into the tissue of the lung, carried to such an extent as to diminish its permeability to air. Not an uncommon sequela of pneumonia and the major exanthemata. Respiration is laborious; the respiratory murmur scarcely perceptible, although the thorax is largely expanded, and there is a slight *râle crépitant,* particularly at the base and inferior part of the lung. Percussion note is clear, and on both sides equally so. Cough is attended with aqueous expectoration. In some cases the respiration becomes puerile in a small portion of the summit of the lung. **Œ. malig'num,** variety of anthrax. **Œ. neonato'rum,** induration of the subcutaneous cellular tissue occurring within a few days after birth and always fatal. **Œ. oc'uli,** hydrophthalmia. **Œ. œdemato'des,** œdema frigidum. **Œ. palpebra'rum,** hydroblepharon. **Œ. puerpera'rum,** phlegmasia dolens. **Œ., pul'monary,** œdema of the lungs. **Œ. pulmo'num chron'icum,** hydropneumonia. **Œ., pur'ulent,** purulent infiltration. **Œ., ret'inal,** presence of liquid in periphery of retina, occurring in old people. **Œ. rheumat'ica,** œdema caused by rheumatism. **Œ. scro'ti aquo'sum,** watery œdema of the scrotum. **Œ. scro'ti cruen'tum,** effusion of blood into the scrotum. **Œ. scro'ti purulen'tum,** purulent tumefaction of the scrotum. **Œ. scro'ti urino'sum,** urocele. **Œ. sim'plex du'rius,** phlegmasia alba dolens. **Œ. spasticum,** spasmodic transient swelling or inflation. **Œ. of trichini'asis,** œdema of different parts of the body due to presence of trichinæ in the muscles, which destroy the capillaries. **Œ. u'vulæ,** staphylœdema. **Œ. of the womb,** œdematous infiltration of cell-tissue of cervix, occurring in pregnancy.

Œdemat'ia. Œdema.

Œdematis'chesis. Checking of œdema.

Œdematosarca, e-dem-at-o-sar'kah. Œdemosarca.

Œdematoscheocele, e-dem-at-os-ke-o-se'le (Eng. e-de-mat-os'ke-o-seel). Oscheocele with œdema of scrotum.

Œdematostrophe, e-dem-at-ost'ro-fe. Doctrine of œdema.

Œdem'atous. Afflicted with œdema; of the nature of œdema.

Œdemerysipelas, e-dem-er-e-sip'el-as. Erysipelas characterized by marked œdema.

Œdemosar'ca (*œdema, sarx,* flesh). *Œdematosarca.* Species of tumor holding a middle place between œdema and sarcoma.

Œdemosarcoma, e-dem-o-sark-o'mah (*œdema, sarx,* flesh). Tumor of an œdematous and sarcomatous character.

Œdemoscheocele, e-dem-os-ke-o-se'le (Eng. e-dem-os'ke-o-seel). Œdematoscheocele.

Œnanthaldehyde, en-anth-al'de-hide. Œnanthol.

Œnan'the (*oinos,* wine, *anthos,* a flower, its flowers smelling like the vine). *Hemlock dropwort, Hemlock water dropwort.* Ord. Umbelliferæ. A violent poison of the acronarcotic class. Its juice has been recommended in certain cutaneous diseases, but it is rarely used. Employed in fomentations. **Œ. aquat'ica,** Phellandrium aquaticum. **Œ. chærophyl'li fo'liis,** œnanthe. **Œ. croca'ta,** œnanthe. **Œ. phellan'drium,** Phellandrium aquaticum. **Œ. stria'ta rig'ida,** Seseli tortuosum.

Œnan'thic e'ther. Ethereal liquid, odorous principle of wine.

Œnanthilic (e-nan'thil-ik) or **Œnan'thylic ac'id.** Oily, acrid, fishy acid, found in rice and corn spirits, product of oxidation of œnanthol. **Œ. al'dehyde,** œnanthol.

Œnanthin, e-nan'thin. Acrid emetic principle obtained from *Œnanthe fistulosa.*

Œnanthol, e-nan'thol. Volatile liquid product of distillation of castor oil.

Œnas (e'nas) **ofer.** Insect belonging to the oil-beetles, said to possess vesicant properties similar to cantharis.

Œnelæon, e-nel-e'on (*œnos, elaion,* oil). A mixture of oil and wine. Also rectified spirit or alcohol.

Œnocarpus, e-no-karp'us (*oinos,* wine, *karpos,* fruit). *Bacaba.* Tree of South America from which an oil having a sweet taste is obtained. It is mixed with olive oil for purposes of adulteration.

Œno'des (*œnos, odes*). Vinous; wine-like.

Œnoflavin, e-no-flav'in. Matter which gives white wines their color.

Œnogala, e-nog'al-ah (*œnos, gala,* milk, a mixture of wine and milk). According to some, wine as warm as new milk.

Œnog'aron. Wine mixed with garum.

Œnoïdes, e-no-e'dees (*œnos, eidos,* resemblance). Vinous; wine-like.

Œnokrine, e'no-kreen (*oinos,* wine, *krino,* to test). Prepared paper for testing purity of red wines.

Œnolature, en-ol'a-ture (*œnos*). See *Vinum.*

Œnolin, e'nol-in. Substance which constitutes coloring matter of grapes and red wine.

Œnomania, e-no-man'e-ah (*œnos, mania*). *Oinomania.* Delirium tremens. Properly, wine-mania. An insatiable desire for intoxicating liquors, *Dipsomania, Methomania.*

Œnomel, e'no-mel (*œnos, mel,* honey). Honey wine; wine mead. See *Hydromel.*

Œnophlygia (e-no-flij'e-ah) or **Œnophlyx'is** (*œnos, phluo,* to overflow). Temulence; drunkenness.

Œnorganin, en-org'an-in. Œnolin.

Œnos. Wine.

Œnostag'ma (*œnos, stagma,* drop). Spiritus vini rectificatus.

Œnotannin, e-no-tan'nin. Tannin in red wine.

Œnothera biennis, e-no-tha'rah be-en'nis. *Evening primrose, Tree primrose, Primrose tree, Cureall, Scabish.* An indigenous plant common on the borders of fields and in natural hedges. Ord. Onograceæ. Mucilaginous and slightly acrid. A decoction has been used in cases of infantile and other eruptions. **Œ. guaroï'-**

des, Œ. biennis. **Œ. murica'ta,** Œ. biennis. **Œ. pumila,** dwarf evening primrose of Mexico; resolvent.

Œnyl iodide, e'nil i'od-id. Methyl iodide.

Œ'sipus. Old name for lanolin.

Œsophagalgia (e-sof-ag-al'je-ah) or **Œsophagial'gia.** Pain in the œsophagus.

Œsophageal, e-sof-a-je'al. Relating or belonging to the œsophagus. **Œ. ap'erture of the di'aphragm,** *Foramen œsophageum;* an opening in the diaphragm for the passage of the œsophagus. **Œ. ap'erture of the stom'ach,** a name given to the superior or cardiac orifice of the stomach, to distinguish it from the inferior or pyloric; see *Cardia.* **Œ. ar'teries,** branches of thoracic to œsophagus, from 3 to 6 in number. **Œ. cords,** applied to pneumogastrics from their position at the side of the œsophagus. **Œ. fora'men,** hiatus œsophageus. **Œ. glands,** compound racemose glands in mucous and submucous tissue of œsophagus, especially at its lower end. **Œ. lymphat'ic glands,** few in number and on the outer side. **Œ. mus'cle,** *Œsophagæus.* Some anatomists have given this name to the transverse muscular fibres which surround the œsophagus at its upper extremity. **Œ. nerves,** branches of pneumogastric lying in front of and behind the œsophagus. **Œ. opening,** hiatus œsophageus. **Œ. or'ifice,** cardiac orifice of the stomach. **Œ. plex'us,** formed by branches of Œ. nerves from pneumogastric. **Œ. tube,** see *Tube, œsophageal.* **Œ. veins,** number of veins returning blood from œsophagus to the azygos veins.

Œsophagecpiesmus, e-sof-aj-ek-pe-ez'mus. Condition in which the œsophagus is displaced.

Œsophagectomy, e-sof-ag-ek'to-me (*ektome,* cutting out). Excision of a portion of the œsophagus.

Œsophagectopy, es-of-aj-ek'to-pe. Condition in which the œsophagus is displaced.

Œsophagemesis, es-of-aj-em'es-is (*œsophagus, emesis,* vomiting). Condition in which food regurgitates from the œsophagus.

Œsophageurysma, e-sof-ag-u-riz'mah (*œsophagus, eurusma,* dilatation). Dilatation of the œsophagus.

Œsophageus, es-of-a-je'us. See *Œsophageal muscle.*

Œsophagialgia, e-sof-a-je-al'ge-ah (*œsophagus, algos,* pain). Œsophagismus.

Œsophagiarctia, e-sof-aj-e-ark'te-ah (*œsophagus, arcto,* to make narrow). Dysphagia constricta; stricture of the œsophagus.

Œsophagism, e-sof'a-jism. Œsophagismus.

Œsophagismus, e-sof-aj-iz'mus. *Dysphagia.* Spasm of the œsophagus. By some used synonymously with œsophagitis, dysphagia, and contraction of the œsophagus. Globus hystericus. **Œ. arthrit'icus,** œsophagismus due to arthritic œsophagitis.

Œsophagitis, e-sof-aj-e'tis (*œsophagus, itis*). Inflammation of the œsophagus.

Œsophagocele, e-sof-ag-o-se'le (Eng. e-sof'ag-o-seel). Hernia of œsophageal mucous membrane through an opening in its walls.

Œsophagodynia, e-sof-ag-o-din'e-ah (*œsophagus, odune,* pain). Pain in the œsophagus.

Œsophagomalacia, e-sof-ag-o-mal-ah'se-ah. Softening of the œsophagus.

Œsophagomycosis, e-sof-ag-o-me-ko'sis. Disease of a mycotic character affecting the œsophagus.

Œsophagop'athy (*œsophagus, pathos,* affection). A morbid condition of the œsophagus.

Œsophagoplegia, e-sof-ag-o-plej'e-ah (*œsophagus, plege,* a stroke). Paralysis of the œsophagus.

Œsophagorrhagia, e-sof-ag-o-rhaj'e-ah (*œsophagus, rhage,* rupture). Hemorrhage from the œsophagus.

Œsophagorrhœa, e-sof-ag-o-rhe'ah (*œsophagus, rheo,* to flow). Discharge of blood or mucus from the œsophagus.

Œsophagoscope, e-sof'a-go-skope (*œsophagus, skopeo,* to view). An endoscopic instrument for viewing the interior of the œsophagus throughout its whole extent.

Œsoph'agospasm. Œsophagospasmus.

Œsophagospas'mus (*œsophagus, spasmos,* spasm). Spasm of the œsophagus.

Œsophagostenoma (e-sof-ag-o-sten-o'mah) (*œsophagus, stenos,* narrow, *oma*) or **Œsophagosteno'sis.** Stricture of the œsophagus.

Œsophagostomy, e-sof-a-gos'to-me. Operation for establishing a fistula or artificial opening in the œsophagus.

Œsoph'agotome (*œsophagus, tome,* section). An instrument devised for the performance of œsophagotomy.

Œsophagotomy, e-sof-a-got'o-me (*œsophagus, tome,* incision). An incision made into the œsophagus for the purpose of extracting foreign bodies from it; external, when the incision is made from the exterior; internal, when the stricture of the œsophagus is divided by a knife introduced through the mouth.

Œsophagus (*oio,* to carry, *phago,* to eat). The gullet. A musculomembranous canal, cylindrical, and depressed from before to behind, which extends from the inferior extremity of the pharynx to the upper orifice of the stomach. At its origin situate in the median line, but beneath the larynx it deviates to the left, and in the chest experiences different reflections. The cervical portion corresponds, behind, with the spine; before, with the larynx and trachea; and at the sides it is close to the primitive carotids, internal jugular veins, par vagum, recurrent nerves, etc. The inferior or thoracic portion is entirely contained in the posterior mediastinum, and enters the abdomen through the œsophageal aperture, *Foramen œsophageum,* of the diaphragm. The œsophagus is composed of a very strong muscular layer, sometimes called *Tunica vaginalis gulæ,* formed, itself, of two sets of fibres—the external, generally longitudinal; the internal, transverse or annular—and of the mucous membrane, which is soft, fine, thin, and white, especially at its lower part, continuous above with the mucous membrane of the pharynx. The mucous follicles found beneath it are not numerous, and have been called *Œsophageal glands.* The arteries of the œsophagus proceed in the neck from the thyroid; in the chest, from the bronchial arteries and directly from the aorta; in the abdomen, from the inferior phrenic and coronaria ventriculi. Its veins empty into the inferior thyroid, the vena cava superior, the internal mammary, azygos, bronchial, phrenic, and coronaria ventriculi. Its lymphatics pass into the ganglia surrounding it. Its nerves are afforded by the pharyngeal and pulmonary plexuses; by the cardiac nerves, the thoracic ganglia, and especially by the pneumogastrics and recurrent branches. The following statistical facts concerning the œsophagus are of interest (Vierordt):

Weight 51 g. (Dursy); specific weight (lower end)	1040 g.	
Length, 216–244 . . . (in round figures),	250 mm.	
of which the neck part amounts to	50	
the chest part to	170	
the abdominal part to	30	
Distance from the teeth to the cardia	400	
" " margin of the gums to the stomach in new-born children	170	
Commencement of œsophagus distant from the incisor teeth in the adult	150	
Breadth	18	
Depth, anteriorly to posteriorly (when stretched up to 25).	9	
When filled with gypsum at its widest place (where it is crossed by the left bronchus)	*Dilated.* 35	*Not dilated.* 17
4 cm. higher	19	14
4 cm. lower	35	21
At lowest end (commencement of cardia)	25	14
In the new-born	—	4
When muscular coat is contracted, thick	1.8	

Œ. succenturia'tus, pharyngocele.

Œstriasis, e-stre'as-is. Effects produced by larvæ of œstrus.

Œstridæ, e'strid-e (*oistros,* gad-fly). Genus of dipterous insects, the gad-fly or breeze.

Œstromania, e-stro-man'e-ah (*oistros,* imperious erotic impulse, *mania*). Nymphomania.

Œstro-menstruation, e'stro-men-stru-a'shun (*oistros,* frenzy, *menstruo,* to menstruate). Menstruation as compared to rut of animals.

Œstrual, e'stru-al (*œstrum*). Appertaining or re-

lating to œstruation; also to an orgasm, especially the venereal orgasm.

Œstrua'tion. See *Œstrum* and *Heat.*

Œs'trum. Clitoris; orgasm. **Œ. ven'eris** (*œstrus*), imperious erotic impulse. Vehement desire for sexual intercourse; orgasm; *Œstruation.*

Œs'trus. Clitoris; orgasm. See *Œstridæ* and *Ectozoa.* **Œ. bo'vis,** commonest species of Œstridæ. **Œ. e'qui,** Gastrophilus equi. **Œ. hom'inis,** bot-fly, dipterous insect depositing its eggs in the skin; see *Parasites.* **Œ. o'vis,** bot-fly of sheep. **Œ. vene'reus,** œstrum venereum.

Œsypus (e'sip-us) or **Œs'ipum** (a sheep). Greasy matter of unwashed wool; formerly employed in friction in diseased joints; lanolin.

Offic'ial. Preparations designated by pharmacopœia or other proper authority.

Offici'na (for **Opificina**) (*opifex,* a workman, a shop). Workshop; office; apothecary's shop.

Offic'inal or **Offic'ial.** An epithet for medicines found in the apothecary shop ready prepared, in opposition to *magistral* or *extemporaneous*—those prepared after the prescription of the physician. Those recognized as authoritative by the National Pharmacopœia or other proper authority.

Of'fium. Affion; opium.

Off'spring. Epigone.

Offusca'tio (*ob, fusco,* to make dark). **Amaurosis;** amblyopia.

Ogee'chee lime. Nyssa candicans.

Og'la. Oogala.

Ogmomele, og-mo-me'le (*ogmos,* furrow, *mele,* probe). Probe furnished with a groove.

Og'ston's opera'tion. For flat foot: excision of wedged-shaped portions of tarsal bones to restore the arch. For knock-knee: sawing or chiselling off obliquely the inner condyle of the femur and forcible straightening of the limb.

Ohio buckeye. Æsculus glabra. **O. scratches,** pruritus; scabies or eczema.

Ohm. Practical electro-magnetic unit of resistance. The legal O (Paris Congress of 1884) is the resistance offered by a column of mercury 106 centimetres high and one square millimetre in cross section, at 0° C.; about the resistance of 100 metres of telegraph wire; 10,000,000 times the absolute unit.

Ohm's law. The strength of the current varies directly as the electro-motive force, and inversely as the resistance of the circuit; or current = electro-motive force divided by the resistance.

Oicoid. Oikoid.

Oid (*eidos,* form, resemblance). A suffix denoting resemblance, as in ethmoid, sphenoid, etc.

Oid'ium (*oon,* egg, *eidos,* resemblance). Parasitic disease of the vine. **O. abortifa'ciens,** claviceps purpurea; see *Ergot.* **O. al'bicans,** see *Aphthaphyte* and *Parasites.* **O. lac'tis,** white, fungus-like membrane on milk, etc. **O. Schoenlein'i,** see *Porrigo favosa.*

Oig'non. Onion; an irritated bursa mucosa; bunion.

Oikeiomania, oi-ki-o-man'e-ah. Moral insanity characterized by domestic perversity.

Oikiomiasmata, oi-ke-o-mi-as'mat-ah (*oikeios,* belonging to a household, *miasmata*). Morbific emanations from domestic sources.

Oi'koid. According to Brücke, the hyaline, unstainable stroma of red blood-corpuscles; the substance containing hæmoglobin he calls *zooid.*

Oikopho'bia (*oikeios,* belonging to a household, *phobos,* fear). Morbid dislike or fear of home.

Oikosite, oik'o-site. Animal parasite attached to its host.

Oil (*elaia,* olive). A collective name under which two classes of fluids are included, very different from each other; those belonging to the one class are viscid, mawkish, or almost insipid; those of the other are nearly devoid of viscidity, and are caustic and very volatile. The former are called *fat* or *fixed oils;* the latter *volatile* or *essential oils* or *essences.* They are all compounds of carbon and hydrogen, principally or exclusively, are readily inflammable, and mostly insoluble in water. See also *Almond, Animal, Apple, Banked, Beech, Belen, Belgraum walnut, Ben, Benné, Bone, British, Camphor, Camphorated, Canauga, Candlefish, Candle-nut, Carap, Carron, Castor, Chabert's, Chaulmugra, Citronella, Coal, Cocoanut, Cod, Cod-liver, Colza, Cotton-seed, Crab, Croton, Dead, Deelina, Dippel's animal, Distilled, Doli, Drying, Dugong, Earth-nut, Empyreumatic, Essential, Ethereal, Eulachon, Expressed, Firwool, Fixed, Fusel, Grain, Groogroo, Ground-nut, Hazel-nut, Horse-chestnut, Ilupai, Iodized, Jatropha, Kekune, Kukui, Kundah, Lard, Light, Linseed, Neat's-foot, Nickerseed, Olive, Oulachon, Palm, Paraffin, Peanut, Phosphorated, Poonga, Poppyseed, Rape, Ray, Red, Rock, Rubsen, Sesame, Shark, Skate, Sulphurated, Sweet, Tallicoonah, Tambor, Teel, Tucum, Virgin, Volatile, Walnut, Wood,* and *Ylang-ylang oil.* **O. of absinth'ium,** limpid oil consisting mainly of absinthinol; obtained by distillation. **O. of aj'wain,** oil of omum; volatile; obtained by distillation from fruit of *Carum ajowan;* odor of thyme; contains thymol. **O. of am'ber,** volatile oil obtained by destructive distillation of amber, purified by subsequent rectification; rubefacient, stimulant, antispasmodic. **O. of Amer'ican worm'seed,** oil of chenopodium. **O. of an'da,** fixed oil expressed from seeds of Anda Gomesii, said to resemble castor oil in physiological action; nearly free from taste or odor. **O. of an'ise,** volatile oil distilled from anise (P. G.), from anise and from illicium (U. S. P. and B. P.); represents medicinal properties of anise. **O. of bay,** oil of myrcia. **O. of ben,** see *Ben oil.* **O. of ber'gamot,** volatile oil extracted by mechanical means from rind of fresh fruit of Citrus bergamia vulgaris; used as perfume. **O. of birch,** volatile oil identical with oil of gaultheria, aqueous distillate from bark and leaves of Betula lenta; sweet or cherry birch. **O. of bit'ter al'monds,** volatile oil, distillate from bitter almonds after maceration in water; colorless or yellowish, limpid; peculiar aromatic odor and bitter, burning taste; contains nearly 13 per cent. hydrocyanic acid, to which its medicinal properties are due; 20 drops have proved fatal. A few drops on porcelain, with addition of a drop of strong sulphuric acid, become deep crimson (distinguishing it from nitrobenzole). **O. of bit'ter al'monds, artifi'cial,** see *Benzaldehyd;* see also *Poisons and Antidotes.* **O. of cade,** juniper tar, obtained by destructive distillation of wood of Juniperus oxycedrus; used in treatment of skin diseases. **O. of caj'eput** or **caj'uput,** pale bluish-green, transparent, volatile; strong, agreeable odor, warm, aromatic taste; distilled from leaves of Melaleuca cajuputi; stimulant antispasmodic. **O. of cal'amus,** volatile distillate from calamus rhizome. **O. of cam'phor,** volatile; see *Camphor oil of Formosa* and *of Borneo.* **O. of canthar'ides,** prepared by digesting cantharides in rape oil (P. G. 30 per cent.), (Cod. 10 per cent.) in olive oil. **O. of car'away,** volatile distillate from fruit of Carum carui. **O. of cas'sia,** distillate from Chinese cinnamon; less delicate in odor and taste and of higher sp. gr. than that of Ceylon. **O. of ce'dar,** volatile oil from Cupressus thyoides, formerly oil of Lebanon cedar; see *Oil of red cedar.* **O. of cham'omile,** volatile distillate from flowers of Anthemis nobilis; stimulant, antispasmodic. **O. of chenopo'dium,** oil of American wormseed; volatile distillate from chenopodium; anthelmintic. **O. of Chinese' cin'namon,** oil of cassia. **O. of cin'namon,** volatile distillate from cinnamon bark. **O. of cit'ron,** from outer rind of citron. **O. of citronel'la,** commercial name of volatile oil of Andropogon nardus; resembles oil of lemon-grass in character and properties. **O. of cloves,** volatile distillate from cloves, consists of light and heavy oil, latter principally eugenol. **O. of copai'ba,** volatile distillate from copaiba. **O. of corian'der,** volatile distillate from coriander. **O. of cu'bebs,** volatile distillate from cubebs. **O. of cu'min,** volatile distillate from fruit of Cuminum cyminum. **O. of dill,** volatile distillate from fruit of Anethum graveolens; see *Dill fruit.* **O. of egg,** obtained by expressing between warm iron plates coagulated yolk of eggs. **O. of er'got,** fixed oil in ergot, forming 30 per cent. or more of its weight. **O. of erig'eron,** volatile distillate from fresh

flowering herb of Erigeron Canadense. **O. of eucalyp'tus,** aromatic volatile distillate from fresh leaves of Eucalyptus globulus and other species; powerful antiseptic. **O. of fen'nel,** volatile distillate from fruit of Fœniculum vulgare. **O. of flax'seed,** fixed oil, expressed without heat; solidifies on exposure; used as application to burns. **O. of gar'lic,** volatile distillate, principally sulphide of allyl. **O. of gaulthe'ria,** oil of wintergreen, volatile distillate from leaves of Gaultheria procumbens, consists principally of methylsalicylic acid. **O. of gera'nium, Turk'ish, O. of ginger-grass,** roslé or rosé oil, distilled from Andropogon Schœnanthus; used in Turkey as hair-oil and adulterant of oil of rose. **O. of hedeo'ma,** oil of pennyroal, distilled from fresh herb, Hedeoma pulegioides **O. of hem'lock,** oil of spruce; volatile, aqueous distillate of branches of Abies Canadensis. **O. of horse-mint,** volatile distillate of fresh herb, Monarda punctata. **O. of hyoscy'amus,** fresh or dried leaves moistened with alcohol, boiled or digested in olive oil, expressed and filtered; for external use. **O. of jas'mine,** fragrant, volatile, from flowers of Jasminum officinale and other species. **O. of ju'niper,** volatile distillate from berries. **O. of lau'rel,** concrete aromatic fixed oil, expressed from fruit of Laurus nobilis; also volatile distillate from leaves or fruit. **O. of lav'ender,** volatile distillate from flowering tops or whole herb, Lavandula vera; less agreeable odor than **O. of lav'ender flow'ers,** volatile distillate from fresh flowers; possesses medicinal properties of lavender. **O. of lem'on,** very volatile, pungent, aromatic, and neutral; extracted by mechanical means from fresh lemon-peel; used for flavoring. **O. of lem'on-grass,** volatile distillate from Andropogon citratum; carminative, diaphoretic, rubefacient, stimulant. **O. of Levant' worm'seed,** volatile, from santonica. **O. of mace,** volatile distillate, active principle of mace; see *Expressed oil of nutmeg.* **O. of mir'bane,** nitrobenzole. **O. of mus'tard,** bland, fixed, expressed from seeds; consists of glycerin compounds of oleic, stearic, and erucic or brassic acids. Ol. sinapis of B. P. is the volatile oil; see *Volatile oil of mustard.* **O. of myrcia,** oil of bay, volatile distillate from leaves of Myrcia acris. **O. of myrtle,** volatile, from leaves of Myrtus communis; antiseptic and rubefacient. **O. of nero'li,** O. of orange-flowers. **O. of nutmeg,** ol. myristicæ, volatile aqueous distillate. **O. of o'mum,** oil of agwain. **O. of or'ange-flow'ers,** oil of neroli, volatile distillate from fresh flowers; a perfume. **O. of or'ange-peel,** volatile, mechanically extracted from fresh peel. **O. of orig'anum,** volatile distillate from wild marjoram, Origanum vulgare; in commerce, oil of thyme is said to be often substituted. **O. of or'ris root,** solid, crystallizable substance obtained by distillation with steam; consists of myristic acid with a little volatile oil. **O. of pars'ley,** volatile, from fruit of Petroselinum sativum. **O. of pen'nyroyal,** oil of hedeoma. **O. of pep'permint,** volatile distillate from Mentha piperita; carminative and anodyne; see also *Chinese O. of P.* **O. of pimen'ta,** volatile distillate from fruit of Eugenia pimenta; resembles, in taste and clinical properties, oil of cloves. **O. of red ce'dar,** volatile, from leaves of Juniperus Virginiana; perfume. **O. of ro'dium,** volatile distillate from root of Convolvulus scoparius and C. floridus; sometimes used as adulterant of **O. of rose,** volatile distillate from fresh flowers of Rosa damascena, and probably other species; perfume. **O. of rose-gera'nium,** volatile distillate from cultivated rose-geranium, Pelargonium roseum. **O. of rose'mary,** volatile distillate from Rosmarinus officinalis. **O. of rue,** volatile distillate from Ruta graveolens. **O. of san'dal-wood** or **O. of santal',** volatile distillate from wood of Santal album; used as perfume, and in gonorrhœa and bronchitis. **O. of santon'ica,** pale yellow, volatile distillate. **O. of sas'safras,** volatile distillate from root of Sassafras officinalis. **O. of sav'ine,** volatile distillate from tops of Juniperus sabina; active principle. **O. of ses'amum,** benné, gingelly or gingli, or tael oil; bland, fixed, non-drying, expressed from seeds of Sesamum Indicum; substitute for olive oil. **O. of spear'mint,** volatile distillate from Mentha viridis. **O. of spruce,** oil of hemlock. **O. of star-an'ise,** volatile distillate from fruit of Illicium anisatum. **O. of tan'sy,** volatile distillate from leaves and tops of Tanacetum vulgare; active principle. **O. of tar,** volatile distillate. **O. of theobro'ma,** cacao butter; concrete fixed oil expressed from seeds of Theobroma cacao; yellowish-white, bland, neutral, agreeable odor and taste; melts between 30° and 35° C.; used in making suppositories and ointments. **O. of thyme,** volatile distillate from Thymus vulgaris; source of thymol. **O. of tobac'co,** black, tarry product of dry distillation; virulent poison. **O. of tur'pentine,** thin, colorless, volatile distillate; strong odor and taste; very slightly soluble in water, soluble in alcohol and ether; anthelmintic, diuretic, rubefacient, and stimulant; see *Rectified oil of turpentine.* **O. of vale'rian,** volatile distillate; active principle. **O. of verbe'na,** oil of lemon-grass. **O. of vit'riol,** sulphuric acid; see *Nordhausen's oil of vitriol.* **O. of wheat,** fixed, expressed between hot iron plates. **O. of wine,** ethereal oil. **O. of win'tergreen,** O. of gaultheria.

Oil-cake. Mass remaining after expression of oil from flax and cottonseed.

Oil-emulsion. Ol. amygdalæ expressum, 15 p; acaciæ, 15; syr. acaciæ, 20; aq. aurantii flor., 15; aquæ, 100; make an emulsion, sec. art.

Oil-nut. See *Juglans cinerea.*

Oil-plant. See *Sesamum Indicum.*

Oils, an'imal. Olea animalia. **O., distilled,** olea volatilia. **O., empyreumat'ic,** olea empyreumatica. **O., essen'tial,** olea volatilia. **O., ethe'real,** olea volatilia. **O., expressed,** olea fixa. **O., fat'ty,** olea fixa. **O., fixed,** olea fixa. **O., fuga'cious,** olea fugacia. **O., medic'inal,** olea medicinalia. **O., vol'atile,** olea volatilia.

Oil-sugar. Pharmaceutical preparation of volatile oil triturated with sugar. **O.-s. of anise, O.-s. of caraway,** each, one part of oil to twenty of sugar. **O.-s. of lemon, O.-s. of orange,** rub surface of one lemon or orange with ten grammes of sugar, then triturate the sugar in a mortar.

Oil'y. Oleaginous. **O. cysts,** cysts containing oil or fatty matter, a result of degeneration of other substances occurring in the breast, skin, etc. **O. grain,** Sesamum orientale.

Oinomania, oin-o-man'e-ah. Passion for wine; œnomania.

Oin'os kri'thes (barley wine). Cerevisia.

Ointment. Topical application of such consistence that it may be easily rubbed on the skin, becoming gradually liquefied; lard, 80; yellow wax, 20 parts; mixed with aid of heat (U. S. P.); white wax, 2; benzoinated lard, 3; expressed oil of almonds, 3 parts (B. P.); see also *Ammonia, Antimonial, Basilicon, Belladonna, Blue, Chaulmugra, Compound, Diachylon, Hebra's, Hellmund's, Helmerich's, Iodine, Iodoform, Jarich's, Kentish, Mercurial, Mezereon, Nervine, Nutgall, Paraffin, Petroleum, Regent's, Simple, Stramonium, Tar, Veratrine,* and *Wilkinson's ointment.* **O. of ac'etate of lead,** lead acetate, 2; benzoinated lard, 73 parts (B. P.). **O. of acon'itine,** 1 to 55 (B. P.). **O. of ammo'niated mer'cury,** 10 per cent. with lard (U. S. P.); simple ointment (B. P.); petroleum (P. G). **O. of at'ropine,** atropine, 8; alcohol, 23; benzoinated lard, 440 (B. P.). **O. of belladon'na,** extract 1 to 10 (U. S. P.); 1 to 7.5 (Cod.). **O. of ben'zoin,** benzoinated lard. **O. of bo'ric acid,** boric acid, 1; soft paraffin, 4; hard paraffin, 2 parts (B. P.). **O. of cal'amine,** Turner's cerate, 20 per cent. (B. P.). **O. of canthar'ides,** infusion of cantharides in olive oil (lard, Cod.), strained, filtered, with addition of yellow wax, 12 per cent. (B. P.); 20 per cent. (P. G.); 60 per cent. (Cod.). French preparation is colored with turmeric and aromatized with oil of lemon. **O. of carbol'ic acid,** 10 per cent. (U. S. P.), carbolic acid 60; soft paraffin, 720; hard paraffin, 360 (B. P.). **Oil of car'bonate of lead,** 1 to 9 (U. S. P.); 1 to 7 (B. P.); 1 to 5 (Cod.); 4 to 7 (P. G.). **O. of cevadil'la,** cevadilla in powder, 50; simple ointment, 200; oil of lavender, 2 (P. Aust.). **O. of chrysaro'bin,** 1 to 9 (U. S. P.); 1 to 24 (B. P.). **O. of creasote,** creasote, f℥j;

simple ointment, ℥j; mix thoroughly (B. P.). **O. of el'emi**, elemi, 1; simple ointment, 4 parts (B. P.); elemi, 150; Venice turpentine, 150; mutton suet, 200; lard, 100 (Cod.); mix. **O. of eucalyp'tus** (B. P.), oil of eucalyptus, 1; hard paraffin, 2; soft paraffin, 2 (B. P). **O. of gal'lic acid**, 10 per cent. (U. S. P.). **O. of galls** (B. P.), see *Nutgall ointment.* **O. of galls and o'pium**, powdered opium, 1; ointment of galls, 13.7 (B. P). **O. of glyc'erin**, glycerite of tragacanth, 1 to 50 of glycerin (P. G.). **O. of glyc'erin and subac'etate of lead**, glycerin of subacetate of lead, 3; soft paraffin, 12; hard paraffin, 4 (B. P.). **O. of i'odide of lead**, 10 per cent. (U. S. P.). **O. of i'odide of potas'sium**, potassium iodide, 12; sodium hyposulphite, 1; water, 6; benzoinated lard, 81 (U. S. P.); potassium iodide, 16; potassium carbonate, 1; water, 4; lard, 110 (B. P.); potassium iodide, 10; water, 5; paraffin ointment, 85 (P. G.); salts dissolved in water and thoroughly mixed with lard. **O. of i'odide of sul'phur**, iodide of sulphur, 5; hard paraffin, 18; soft paraffin, 55; triturate iodide of sulphur with melted mixture of paraffins (B. P.). **O. of mer'cury**, mercurial ointment. **O. of ni'trate of mer'cury**, citrine ointment; ointment of mercuric nitrate; prepared by mixing, with aid of gentle heat, mercury, nitric acid, and lard oil (U. S. P.), or lard and olive oil (B. P.). **O. of o'leate of zinc**, equal parts of zinc oleate and soft paraffin (B. P.). **O. of ox'ide of zinc**, 1 to 4 (U. S. P.); 1 to 5.5 (B. P.); 1 to 9 (Cod., P. G.). **O. of red i'odide of mer'cury**, mercuric iodide, 1; simple ointment, 27.3 (B. P.). **O. of red ox'ide of mer'cury**, 1 to 9 of simple ointment (Ph. U. S.); or paraffin ointment (P. G.); 167 of lard and 5.3 of soft paraffin (B. P.). **O. of rose-water**, rose-water, white wax, spermaceti, and oil of almonds; agreeable, soothing, protective; everywhere known as cold cream. **O. of sav'in** (B. P.), see *Savin cerate.* **O. of spermace'ti**, spermaceti, 5; white wax, 2; expressed oil of almond, 18.5; benzoin, 0.5; mix with aid of heat (B. P.). **O. of staves'acre**, stavesacre seeds, 1; benzoated lard, 2; crush seeds, macerate in melted lard, and strain (B. P.). **O. of sto'rax**, storax, 100; olive oil, 150; white wax, 100; colophony, 180; elemi, 100. **O. of subchlo'ride of mer'cury**, 1 to 55 (B. P.); **O. of sul'phur** (B. P.), see *Sulphur ointment.* **O. of sul'phurated pot'ash**, sulphurated potassa, 5; hard paraffin, 18; soft, 56; triturate the potash with the melted paraffins (B. P.). **O. of tan'nate of lead**, tannic acid, 1; solution subacetate of lead, 2; lard, 7 (P. G.). **O. of tannic acid**, 10 per cent. (U. S. P.). **O. of tar** (B. P.), see *Tar ointment.* **O. of tar'tarated an'timony**, antimony and potassium tartrate and simple ointment, 1 to 4 (B. P., P. G.); counter-irritant, produces characteristic pustular eruption. **O. of tur'pentine**, oil of turpentine, 7; resin, 1; white wax, 4; lard, 4 (B. P.); turpentine, 1; oil of turpentine, 1; white wax, 1 (P. G.). **O. of ver'atrine** (B. P.), see *Veratrine ointment.* **O. of yel'low ox'ide of mer'cury**, with simple ointment, 1 to 9 (U. S. P.). **O. of zinc** (B. P.), ointment of oxide of zinc.

Oint'ment-pos'itor. Instrument for applying ointments to the vagina and rectum, consisting of tube and piston.

Oiocalymma, o-e-o-kal-im'mah (*oion*, egg, *kalupto*, to cover). Membrane of the egg-shell.

O'ken's bod'y. Corpus Wolffianum.

O'kra or **O'kro.** Hibiscus esculentus.

Olanine, o'lan-een. Base derived from bone oil.

Olax (o'laks) **Zeylan'ica.** Malla tree of Ceylon; the leaves are eaten by the natives, and the wood, which has an odor resembling human excrement, is employed in fevers.

Ol. Abbv. for *oleum*, oil.

O. L. A. Abbv. for occipito-læva-anterior, left occipito-anterior position of fœtus in labor.

Old age. See *Senectus.* **O. field pine**, Pinus tæda. **O. man**, Artemisia abrotanum; southernwood. **O. man's beard**, fringe tree; Chiananthus Virginica. **O. wife's shirt**, liriodendron.

O'lea. Oils. Olive tree. See *Olea Europæa.* **O. anima'lia**, *Animal oils.* Fixed oils holding in solution the mucilaginous and gelatinous principles of certain animals, as the oil of frogs, oil of scorpions, oil of spiders, etc. Sometimes also empyreumatic oils produced during the decomposition of animal substances by heat. **O. coc'ta**, medicinal oils. **O. destillat'a**, O. volatilia. **O. dioi'ca**, Indian olive. **O. empyreumat'ica**, *Empyreumatic oils.* Oils having an empyreumatic or burnt smell. Obtained by treating vegetable or animal matters by heat in close vessels. They do not exist in organized bodies, but are formed during their decomposition by fire. The animal oil of Dippel is an empyreumatic oil. **O. ethe'rea**, volatile oils. **O. Europæ'a**, *Olive tree;* (fruit) *Olive;* ord. Jasmineæ. Leaves are bitter; extract prepared from them, and a substance called *olivina*, the bitter principle of the leaves, have been given in Italy as antiperiodics. Fruit, when pickled, is extremely grateful to some stomachs. Olives, as met with in the shops, are prepared from the green, unripe fruit, repeatedly steeped in water. To this some quicklime or alkaline salt is added, and afterward they are washed and preserved in a pickle of common salt and water. From the natural olive is prepared the *Olive oil* or *Salad oil* of the pharmacopœias, obtained by grinding and pressing the olives when thoroughly ripe. The finer and purer oil issues first by gentle pressure, and the inferior sort on heating what is left and pressing it more strongly. See *Oleum olivæ.* In Calabria an odorous resin exudes from its trunk, which is employed as a perfume by the Neapolitans. A gum flows from certain wild olives in warm countries, which consists, according to Pelletier, of a resin, a little benzoic acid, and a peculiar substance called *Olivile.* It is in yellow masses, of a slightly acrid taste and of a vanilla smell. It is called *O. gummi*, *O. resina*, and *O. balsamum*, an esteemed astringent and detersive. **O. fix'a**, *Expressed, Fixed,* or *Fatty oils.* Oils obtained from the seeds or pericarps of vegetables without distillation, and which are viscid, but slightly odorous and sapid; lighter than water and insoluble in alcohol. The rancidity of oils depends on the absorption of oxygen, and therefore they should be kept in bulk as much as possible, and in narrow-necked bottles. All the fixed oils are emollient, and, in a certain dose, they act as purgatives and emetics. They are prepared by expressing the fruit or seed containing them. **O. fra'grans**, Osmanthus fragrans, fragrant olive, Chinese shrub; the leaves are added to tea for purposes of adulteration. **O. fuga'cia**, *Fugacious oils*, oils which are so volatile that, in order to obtain them, recourse must be had to a different process from that employed for other essential oils. Such are the oils of jessamine, lily, violet, etc. **O. Gal'lica**, O. Europæa. **O. infu'sa**, medicinal oils. **O. lancifo'lia**, O. Europæa. **O. latifo'lia**, broad-leaved olive, variety of Olea Europæa growing in Spain; yields an inferior sort of olive oil. **O. Malabar'ica**, species growing in Malabar; the juice of the leaves is emetic. **O. medicina'lia**, *Medicinal oils.* Oils prepared by macerating, infusing, or boiling medicinal substances in olive or any other fixed oil. These oils may then be regarded as oily solutions of certain medicinal substances, whence they can never be simple. They have, however, been divided into simple and compound medicinal oils. To the former belong the *Oils of St. John's wort*, of the *Solanum nigrum*, etc.; to the other—which have often been called *oily balsams*—the *Balsams of Fioraventi, Metz*, etc. Medicinal oils are almost always employed externally. **O. microcar'pa**, species growing in Cochin China; leaves have diuretic and discutient properties. **O. oleas'ter**, oleaster; wild olive. **O. pin'guia**, fixed oils. **O. polymor'pha**, O. Europæa. **O. sati'va**, O. Europæa. **O. volatil'ia**, *Volatile, Ethereal, Essential,* or *Distilled oils; Essences.* Oils found in aromatic vegetables, and in every part of them except in the interior of the seeds. The majority are obtained by distillation, but some by expression. Most of them are prepared by putting the substance from which

the oil is to be extracted into a retort or other vessel suitable for distillation, and adding enough water to cover it; then distilling by a regulated heat into a large refrigeratory, and separating the distilled oil from the water which comes over with it. They possess unctuosity, inflammability, and viscidity, like the fixed oils, but are generally odoriferous, pungent, and acrid. The greater part are lighter than water; some are heavier, and congeal at a moderate temperature. They dissolve in small quantity in distilled water by simple agitation. Almost all are soluble in alcohol. The odor and taste are the usual tests of their goodness. To preserve them, they should be kept in a cool place in small bottles, quite full and well corked. Volatile oils are possessed of the aromatic properties of the plants whence they are obtained. All, when applied externally, are stimulant and rubefacient. Pharmaceutical preparations in which the substances are dissolved in volatile oils are termed by the French *Myrolés*.

Oleaceous, ol-e-a'shus. Relating to the olive.

Oleaginous, o-le-aj'in-us (*oleum,* oil). Oily; containing oil, as an oleaginous or oily mixture.

Olea'men (*oleum*). Any soft ointment prepared of oil.

Oleander (*olea,* the olive). Rhododendron chrysanthemum. See *Nerium oleander.*

Olean'drine. Poisonous alkaloid obtained from Nerium oleander, a glucoside having action of digitalin.

Oleaster, o-le-as'tur. Wild olive. Olea oleaster. **O., Bohe'mian,** Elæagnus angustifolia.

Olea'ta. Oleates.

O'leate. Combinations of oleic acid with oxides of zinc, mercury, lead, etc., and with aconitine, atropia, morphia, etc., have been employed externally; the medical properties of course depend on those of the base. The chief oleates thus far used (generally diluted) are *Aconite oleate,* in neuralgia; *Atropine oleate; Aluminium oleate,* in intertrigo, dermatitis, bromidrosis, burns, foul ulcers, etc.; *Arsenic oleate,* used in lupus, scrofulous ulcers, seborrhœa, chronic eczema, warts, corns, etc.; *Bismuth oleate,* in pustular eruptions, erysipelas, acne, eczema, etc.; *Cadmium oleate,* in chronic eczema, hypertrophied glands, etc.; *Cocaine oleate,* in some forms of eczema and pruritus; *Copper oleate,* antiseptic and astringent, in ringworm, chronic ulcers, freckles, tinea, etc., in various degrees of dilution of the oleate; *Iron oleate,* astringent and styptic, in some forms of eczema, sycosis, scrofulous ulcers, acne rosacea, etc.; *Lead oleate,* in eczema, indurated acne, etc.; *Mercuric oleate* (see *Oleatum hydrargyri*), glandular resolvent, not easily absorbed so as to affect the general system; useful in chronic indurated eczema, papular and tubercular eruptions, sycosis, scrofulous cutaneous diseases, phtheiriasis, etc.; *Mercurous oleate,* in syphilis, chronic psoriasis, chronic eczema, etc.; *Morphine oleate,* not much employed; *Nickel oleate,* in chronic ulcerations and abrasions, chronic eczema, etc.; *Quinine oleate,* antiseptic, but not a desirable method of getting either the local or constitutional effects of the drug; *Silver oleate,* as a stimulant to granulating surfaces in erysipelas, lupus, boils, carbuncles, etc.; *Strychnine oleate; Tin oleate,* astringent and tonic; *Veratrine oleate,* much diluted, in localized neuralgia; see *Oleatum veratrinæ; Zinc oleate,* astringent, in various forms of abnormal sweating, cancer of the cervix uteri, etc.; see *Oleatum zinci.*

Olea'tum. Oleate. **O. hydrar'gyri** (Ph. U. S.), mercury oleate: yellow oxide of mercury, gr. xl; oleic acid, f℥j; used as a substitute for mercurial ointment; also in arthritis, indurations, syphilis, skin diseases, etc. See *Oleate, mercuric.* **O. veratri'næ** (Ph. U. S.), oleate of veratrine: veratrine, gr. viij; oleic acid, f℥j; used as a substitute for veratrine ointment. **O. zin'ci** (Ph. Br.) (zinc oxide, ℥j; oleic acid, ℥ix); zinc oleate.

Olecranarthritis, o-lek-ran-ar-thre'tis (*olecranon, arthron,* joint, *itis*). Inflammation of the elbow-joint.

Olecranarthrocace, o-lek-ran-ar-throk'as-e (*olecranon, arthron,* articulation, *kakia,* vice or disease). Inflammation of the articular surfaces of the elbow.

Olecran'ial or **Olec'ranal.** Relating or belonging to the olecranon.

Olecranocace, ol-ek-ran-ok'as-e (*olecranon, kakos,* bad). Gout affecting the elbow; pain in the elbow.

Olec'ranoid cav'ity. See *Ulna.*

Olec'ranon. Properly *Olecranum* (*olene,* elbow, *kranon,* head). *Top of the cubit.* Head or protection of the elbow. Large process at the upper extremity of the ulna, on which we lean. When fractured it is apt to be drawn up by the triceps, and much care is required to keep the parts in apposition. **O. fos'sa,** depression on posterior surface of lower end of humerus for reception of olecranon. **O. pro'cess,** olecranon.

Olef'iant gas. *Ethylene, Ethene;* chief illuminating constituent of coal-gas; heavy carburetted hydrogen. **O. g., chlo'ride of,** *Dutch liquid, Bichloride of ethylene;* this liquid has been exhibited as an anæsthetic.

Oleic, o-le'ik. Relating to, obtained from, or existing in oil. **O. ac'id,** $C_{18}H_{34}O_2$. Odorless, tasteless, neutral, yellowish, oily liquid, becoming brown, rancid, and acid on exposure to air, crystallizing at 4° C.; product of saponification of olein; used in preparation of oleates.

Oleiferous, ol-e-if'er-us. Yielding oil.

Olefines, o'le-feens. Members of series of hydrocarbons having the formula C_nH_{2n}.

O'lein or **O'leine** (*oleum,* oil). Trioleate of glyceryl, triolein; fluid portion of non-drying oils or fats. **O., cod-liv'er,** see *Oleum morrhuæ.* **O. hypophos'phite,** compound of olive oil, beef extract, and phosphorus; the phosphorus is oxidized with hydrogen; often combined with cod-liver oil and given in tuberculosis.

Oleineous, o-le-in'e-us. Oleaceous.

Olenarthrocace, o-len-ar-throk'as-e (*olene,* ulna, *arthron,* joint, *kakos,* bad). Inflammation, especially of a scrofulous kind, of the elbow-joint.

Olene, o'len-e. Ulna.

Oleoceratum, o-le-o-ser'at-um. Cerate. **O. aquâ subace'tum,** ceratum Galeni.

Oleo-infu'sions. Medicinal oils; oleols.

Oleomargarin (o-le-o-mar'gar-in) or **Oleomargarine,** o-le-o-marg'ar-een. Artificial butter made from animal fat by melting at a temperature not exceeding 110°; on cooling, excess of stearin crystallizes out; when pure, it is less liable to become rancid than ordinary butter, and is free from bacteria.

Oleophosphoric acid, ol-e-o-fos-for'ik as'id. Phosphoretted fatty substance contained in the brain.

Oleoresin, o-le-o-rez'in. A resin dissolved in volatile oil. Oleoresins are made by passing ether through the powdered drug by displacement, and evaporating the ether until the liquid is of an oily consistence, an ethereal extract. They not only contain resin, but the essential oil of the drug. **O. of aspid'ium,** thick, liquid, ethereal extract of male fern. **O. of cap'sicum,** liquid oleoresin extracted from capsicum. **O. of cu'beb,** percolation of cubeb with ether (U. S. P.); maceration in equal parts of ether and alcohol (P. G.). **O. of fern,** O. of aspidium. **O. of gin'ger,** concentrated ethereal tincture of ginger. **O. of lu'pulin,** semifluid, possesses all medicinal properties of lupulin. **O. of male fern,** see *O. of aspidium.* **O. of pep'per,** an ethereal extract from which crystals of piperine have been removed.

Oleoresi'na. Oleoresin. **O. aspid'ii** (Ph. U. S.), aspidium, ℥xvj; stronger ether, q. s. to make Oij, and evaporate. **O. cap'sici** (Ph. U. S.), *Oleoresin of capsicum;* capsicum, ℥xvj; stronger ether, q. s. to make Oij, and evaporate; dose, ♏¼–j in strangury and irritation of the bladder; externally, diluted, a rubefacient. **O. cube'bæ** (Ph. U. S. and Br.), *Oleoresin of cubeb;* cubeb, ℥xvj; stronger ether, q. s. to make Oij, and evaporate; dose, ♏v–xxx, in water or in powdered sugar. **O. fil'icis,** *Oleoresin of fern.* **O. lupuli'næ** (Ph. U. S.), *Oleoresin of lupulin;* lupulin, ℥xvj; stronger ether, q. s. to make Oij; dose, gr. ij–v. **O. pip'eris** (Ph. U. S.), *Oleoresin of pepper;* pepper, ℥xvj; stronger ether, q. s. to make Oij; dose,

m¼–j. **O. zingib'eris** (Ph. U. S.), *Oleoresin* or *Piperoid of ginger;* ginger, ʒxvj; stronger ether, q. s. to make Oij; dose, mss–j.

Oleosaccharose, o-le-o-sak'ar-oze. Saccharose combined with a volatile oil.

Oleosaccharure'tum ani'si. Oil-sugar of anise.

Oleosaccharum, o-le-o-sak'ar-um. Elæosaccharum; oil-sugar.

Oleosac'charure. Preparation of sugar ʒj, saturated with a volatile oil, gtt. j.

Oleo'sus. Oleaginous.

Ol'era (*olus,* potherb). See *Lachanon.*

O'leum (*olea,* olive). Oil. **O. abie'tis,** see *Pinus picea.* **O. absin'thii,** *Artemisia absinthium* (*oil of*). **O. ad'ipis,** lard oil; used for pharmaceutical purposes. **O. æthe'reum,** *Ethereal oil* (formed in the distillation of ether), *Etherol, Oil of wine, Heavy oil of wine, Sweet oil of vitriol,* a peculiar oleaginous matter obtained by continuing the distillation after the whole of the sulphuric ether has passed over in the process for the preparation of the latter; used only as an ingredient in the compound spirit of ether. It is officinal in the Ph. U. S. Its s. g. is 0.91. **O. amyg'dalæ ama'ræ,** O. of bitter almond; also **O. amygdalarum æthe'reum, O. amyg'dalæ dul'cis, O. a. expres'sum,** and **O. amygdala'rum,** almond oil. **O. androp'agi citra'ti,** O. of lemon-grass. **O. ane'thi,** O. of dill. **O. anima'lis æthe'reum,** animal o.; also **O. a. Dippel'ii** and **O. a. empyreumat'icum. O. an'isi** or **O. anisi æthe'reum,** O. of anise. **O. ano'næ,** ylang-ylang o. **O. anthelmin'ticum Chaberti,** Chabert's anthelmintic o. **O. anthem'idis,** O. of chamomile. **O. an'thos,** O. of rosemary. **O. ar'achis,** ground-nut o. **O. auran'tii cor'ticis,** O. of orange-peel. **O. a. flo'rum,** O. of orange-flowers. **O. bac'cæ junip'eri,** O. of juniper. **O. Badia'ni,** O. of star-anise. **O. bal'sami copaibæ,** O. of copaiba. **O. berga'mii** or **O. bergamot'tæ,** O. of bergamot. **O. bet'ulæ empyreumat'icum,** birch tar. **O. betuli'num,** oleum rusci. **O. bu'bulum,** neat's-foot o. **O. caca'o,** O. of theobroma. **O. cadi'ni,** O. of cade. **O. cajupu'ti,** O. of cajuput. **O. cal'ami,** O. of calamus. **O. cam'phoræ,** O. of camphor. **O. camphora'tum** (P. G., Cod.), camphor liniment, **O. cantharida'tum** (P. G.), oil of cantharides. **O. cari** or **O. carui** (B. P.), oil of caraway. **O. caryi'ni,** walnut oil. **O. caryophyl'li** or **caryophyllo'rum** (P. G.), O. of cloves. **O. cas'siæ,** oil of Chinese cinnamon. **O. cas'toris,** castor o. **O. ce'ti,** sperm o. **O. Chaber'ti,** Chabert's anthelmintic oil. **O. chamomil'læ,** chamomile o. **O. c. æthe'reum,** volatile O. of matricaria. **O. c. Roman'æ,** O. of chamomile. **O. chemico'rum Hollandico'rum,** ethylene bichloride. **O. chenopo'dii,** O. of chenopodium. **O. chlorina'tum,** chlorinated o. **O. cinnamo'mi,** O. of cinnamon. **O. cit'ri** (P. G.), O. of lemon. **O. co'cos** (P. G.), cocoanut o. **O. contra-tæ'niam Chaber'ti,** Chabert's anthelmintic o. **O. copai'bæ,** O. of copaiba. **O. corian'dri,** coriander o. **O. croto'nis,** croton o. **O. cube'bæ,** O. of cubebs. **O. destilla'tum,** volatile oil. **O. erigeron'tis Canaden'sis,** O. of Canada erigeron. **O. eucalyp'ti,** O. of eucalyptus. **O. fa'gi,** beech o. **O. f. pyrolig'neum,** beech tar. **O. fil'icis,** oleoresin of aspidium. **O. flo'rum na'phæ,** O. of orange-flowers. **O. fœnic'uli,** O. of fennel. **O. fruc'tus junip'eri,** O. of juniper. **O. garcin'eæ purpu'reæ,** kokum butter. **O. gaulthe'riæ,** O. of gaultheria. **O. gossyp'ii sem'inis,** cotton-seed o. **O. gynocar'diæ,** chaulmugra o. **O. Harleman'se,** sulphurated o. of turpentine. **O. hedeo'mæ,** O. of hedeoma. **O. hepatis mor'rhuæ,** cod-liver o. **O. hippocas'tani,** oil of horse-chestnut. **O. hyoscy'ami** or **O. h. ace'tum,** O. of hyoscyamus. **O. hype'rici,** red oil; prepared by digesting in olive o. fresh herb Hypericum perforatum. **O. illi'cii anisa'ti,** O. of star-anise. **O. jec'oris asel'li,** cod-liver o. **O. j. a. ferra'tum,** ferrated cod-liver o. **O. j. a. fla'vum,** obtained by simple exudation from fresh livers below 85° C. **O. junip'eri,** O. of juniper. **O. junip'eri empyreumaticum** or **O. junip'eri nigrum,** O. of cade. **O. la'næ,** lanolin. **O. lau'ri** (P. G.) or **O. l. unguino'sum,** expressed oil of laurel. **O. lauri'ni,** O. of laurel. **O. lavan'dulæ,** O. of lavender. **O. lavan'dulæ flo'rum,** O. of lavender-flowers. **O. lig'ni sant'ali,** O. of santal. **O. limo'nis,** O. of lemon. **O. li'ni,** O. of flaxseed. **O. mac'idis,** O. of mace. **O. mar'tis,** solution of ferric chloride. **O. mar'tis per deliq'uium,** deliquescent ferric chloride. **O. men'thæ piperi'tæ,** O. of peppermint. **O. m. vir'idis,** O. of spearmint. **O. monar'dæ,** O. of horsemint. **O. mor'rhuæ,** cod-liver o. **O. mun'dubi,** ground-nut o. **O. Muscovit'icum,** O. rusci. **O. myr'ciæ,** O. of myrcia. **O. myris'ticæ,** O. of nutmeg. **O. m. expres'sum,** expressed O. of nutmeg. **O. na'phæ** or **O. neroli,** O. of orange-flowers. **O. nucis'tæ** (P. G.), expressed oil of nutmeg. **O. oli'væ** or **oliva'rum,** olive oil. **O. oliva'rum commu'ne,** inferior quality of olive oil, obtained from marc after expression of virgin oil; also called **O. o. provincia'le. O. orig'ani,** O. of origanum. **O. ovo'rum,** O. of eggs. **O. pal'mæ,** palm o. **O. pal'mæ christ'i,** castor o. **O. papav'eris,** poppy-seed o. **O. pe'dum tau'ri,** neat's-foot oil. **O. pe'træ,** petroleum. **O. p. cru'dum** or **O. p. Ital'icum,** crude petroleum. **O. petroseli'ni,** O. of parsley. **O. phosphora'tum,** phosphorated o. **O. pi'cis liq'uidæ,** O. of tar. **O. pimen'tæ,** O. of pimenta. **O. pin'gue,** fixed o. **O. pi'ni æthe'reum,** O. of turpentine. **O. pi'ni sylves'tris,** fir-wool o. **O. provincia'le,** virgin o. **O. ptycho'tis,** O. of agwain. **O. pyrogena'tum suc'cini,** O. of amber. **O. ra'jæ,** ray oil. **O. ra'pæ,** rape oil. **O. ric'ini,** castor oil. **O. ro'sæ,** O. of rose. **O. rosa'rum,** also an infusion of rose-petals in olive o. **O. rosmari'ni,** O. of rosemary. **O. rus'ci,** empyreumatic volatile oil from birch tar; used externally in skin diseases, and in curing Russian leather, to which it gives its peculiar odor. **O. ru'tæ,** O. of rue. **O. sabi'næ,** O. of savine. **O. san'tali,** O. of santal. **O. sassafra'tis,** O. of sassafras. **O. ses'ami,** O. of sesamum. **O. sina'pis,** O. of mustard. **O. s. æthe'reum** or **O. s. vola'tile,** volatile O. of mustard. **O. squa'li,** shark o. **O. suc'cini** or **O. s. empyreumat'icum** or **O. s. pyrogena'tum,** O. of amber. **O. sulphura'tum,** balsam of sulphur. **O. tab'aci,** O. of tobacco. **O, tanace'ti,** O. of tansy. **O. tar'tari per deliq'uium,** liquor potassæ subcarbonatis. **O. temp'linum,** volatile o. from tops of Prunus punilis, or young cones of Abies rectinata, by distillation. **O. terebin'thinæ,** O. of turpentine. **O. t. rectifica'tum,** rectified oil of turpentine. **O. ter'ræ,** petroleum. **O. theobro'mæ,** O. of theobroma. **O. thy'mi,** O. of thyme. **O. tig'lii,** croton oil. **O. trit'ici,** O. of wheat. **O. uno'næ,** ylang-ylang o. **O. valeria'næ,** O. of valerian. **O. vi'ni,** ethereal o. **O. e vitel'lis ovo'rum,** O. of eggs. **O. vitrio'li,** sulphuric acid. **O. vola'tile,** volatile o. **O. v. amygdala'rum,** O. of bitter almond.

Olfaction, ol-fak'shun (*oleo,* to smell, *facio,* to make). Sense of smell; smelling; sense by which we perceive the impressions made on the olfactory nerves by the odorous particles suspended in the atmosphere. The olfactory nerve, or first pair, has usually been considered the great nerve of smell, and it is probably the nerve of special sensibility, general sensibility being communicated by the branches of the fifth pair distributed on the pituitary membrane of the nose and sinuses.

Olfactive, ol-fak'tiv. Olfactory.

Olfactory, ol-fak'to-re. That which belongs or relates to the sense of smell, as olfactory cells, olfactory nerves, etc. **O. an'gle,** ethno-cranial angle. **O. bulb,** an extension from the cerebral hemispheres, gray oval matter lying upon the cribriform plate of the ethmoid, sending down through its foramina filaments constituting the end-organs of the olfactory nerve. **O. cen'tre,** part of cerebral cortex that appreciates smell; located by Ferrier in subiculum cornu ammonis; by Munk in hippocampal gyrus. **O. chi'asm,** applied by Meynert to connection believed to exist between olfactory lobe of one side and gyrus uncinatus of the other, through the anterior commissure of the brain. **O. fil'aments,** fibres of olfactory nerve proper—those arising from the bulb. **O. foram'ina,** in cribriform plate of ethmoid,

through which pass filaments of the olfactory nerve. **O. gan'glion,** olfactory bulb. **O. glom'erules,** rounded ganglionic masses near surface of olfactory bulb, from which olfactory filaments arise; considered by Krause homologous with spinal ganglia. **O. groove,** see *Olfactory sulcus.* **O. lobe,** olfactory tubercle, tract, and bulb, considered together as an outgrowth from the hemispheres. **O. mem'brane,** portion of Schneiderian membrane covering olfactory region. **O. nerve,** special nerve of smell; often applied to olfactory tract and bulb, more properly to collection of filaments passing down from the bulb through cribriform plate of ethmoid, and distributed to the Schneiderian membrane of nose. The nerves of both sides constitute the first pair of cranials. **O. pit,** primitive invagination of ectoderm to form cavity of nose. **O. re'gion,** area of distribution of olfactory nerve, embracing upper part of septum and upper part of middle turbinated bone. **O. roots** connect olfactory tract with the hemispheres. A *lateral* or *outer root* (stria lateralis) passes to uncinate convolution; a *medial* or *inner* (stria medialis) to convolution of corpus callosum. A dorsal root is also described (Broca), connecting with frontal lobe. The *middle* or *gray root* of older authors appears to be merely gray substance intercepted between the lateral and medial roots. **O. sul'cus,** furrow for olfactory tract and bulb on orbital surface of the hemispheres; also grooves for same on cribriform plate of ethmoid. In the plural, grooves in which filaments of the olfactory nerve lie on the perpendicular plate of the ethmoid. **O. tract,** nerve-like process joining olfactory tubercle with bulb. **O. tri'gone,** triangular area of gray matter between outer and inner roots of tract and forming base of tubercle. **O. tu'bercle,** small pyramidal lobule at apparent origin of tract, in front of anterior perforated space. **O. ven'tricle,** prolongation of cavity of lateral ventricle into olfactory lobe, constant in fœtus and many lower animals; sometimes found in adults.

Olfactus, ol-fak'tus. Olfaction. **O. acu'tus,** hyperosphresia. **O. amis'sio,** defective sense of smell; loss of smell; anosmia. **O. defic'iens,** defect of sense of smell; anosmia. **O. depravat'us,** depraved sense of smell; parosmia.

Olibanum, ol-ib'an-um (*libanos,* frankincense tree). See *Juniperus lycia.* **O. Arab'icum,** see *Juniperus lycia.* **O. In'dicum,** see *Juniperus lycia.* **O. sylves'tre,** see *Pinus abies.* **O. vulga're,** see *Pinus abies.*

Olibene, ol-ib'een. Hydrocarbon, chief constituent of volatile oil of olibanum.

Oligæmia, ol-ig-e'me-ah (*oligo, haima,* blood). Poverty of the blood; paucity of red globules; anæmia, hæmaporia, hypæmia. **O. sero'sa,** watery or thin condition of the blood; hydræmia. **O. sic'ca,** oligæmia caused by a thickened condition of the blood.

Oligæmydria, ol-ig-em-id're-ah (*oligo, haima,* blood, *hudor,* water). Hydræmia.

Oligidria, ol-ig-id're-ah (*oligo, hidros,* sweat). Ischidrosis. Diminution in quantity of sweat. Suppression of perspiration.

Oligo, ol'ig-o (*oligos,* few, little). In composition has these significations.

Oligoblennia, ol-ig-o-blen'ne-ah (*oligo, blenna,* mucus). Deficiency of mucus.

Oligocatantes, ol-ig-o-kat-an'tees (*oligo, katantes,* down hill). Applied to skulls in which line joining hormion and staphylion makes an angle of 20° to 23° with radius fixus (Lissauer).

Oligocholia, ol-ig-o-kol'e-ah (bile). Paucity of bile.

Oligochromæmia, ol-ig-o-kro-me'me-ah (*oligo, chroma,* color). Deficiency of hæmoglobin in red blood-corpuscles.

Oligochrosis, ol-ig-o-kro'sis (*oligo, chrosis,* coloring). Deficiency of hæmoglobin in red blood-corpuscles.

Oligochylia, ol-ig-o-kil'e-ah (*oligo, chulos*). Deficiency of chyle.

Oligochy'lus. An epithet for food which is but little nutritive, furnishing but little chyle.

Oligochym'ia (*oligo, chuma,* juice, chyme). Deficiency of chyme.

Oligocopria, ol-ig-o-kop're-ah (*oligo, kopros,* excrement). Scantiness of alvine evacuations.

Oligocystic, ol-ig-o-sis'tik. Term applied to cystic tumors which contain a few cysts, a monocystic tumor including one cyst.

Oligocythæmia, ol-ig-o-si-the'me-ah (*oligo, kutos,* a cell). Paucity of red corpuscles.

Oligodacrya, ol-ig-o-dak're-ah (*oligo, dakru,* a tear). Paucity of the lacrymal secretion.

Oligogalac'tia or **Oligoga'lia** (*oligo, gala,* milk). Deficient lactation. Agalactia.

Oligohæ'mia. Oligæmia.

Oligohydram'nios (*oligo, hudor,* water, *amnion*). Deficiency of amniotic fluid.

Oligohy'dria. Deficiency of fluids or humors.

Oligoma'nia. See *Melancholy.* Proposed as a substitute for monomania, to signify a form of insanity affecting only a part of the mental faculties, having well-defined and systematic manifestations. **O., abou'lic,** aboulomania. **O., agorapho'bic,** agoraphobia. **O., claustropho'bic,** claustrophobia. **O., mysopho'bic,** mysophobia.

Oligomenorrhœa, ol-ig-o-men-or-rhe'ah (*oligo, men,* month, *rheo,* to flow). Deficient menstrual flow.

Oligopepsia (*oligo, pepto,* to digest). Weak digestion.

Oligopionia, ol-ig-o-pe-o'ne-ah (*oligos, pion,* fat). Loss of flesh.

Oligopo'sia (*oligo, posis,* drink). Diminution in the quantity of drinks.

Oligopsychia, ol-ig-o-sik'e-ah (*oligo, psuche,* mind). Imbecility.

Oligoria, ol-e-go're-ah. Condition, characterized by apathy, occurring in some varieties of mental afflictions, in which the patients lose interest in their surroundings.

Oligosialia, ol-ig-o-se-al'e-ah (*oligo, sialon,* saliva). Paucity of saliva.

Oligospermat'ic. Relating to oligospermia.

Oligospermia, ol-ig-o-spur'me-ah (*oligo, sperma,* sperm). Paucity of spermatic secretion.

Oligospondylous, ol-ig-o-spon'dil-us. Possessing few vertebræ.

Oligospon'dylus (*oligo, spondulos,* a vertebra). Possessing few vertebræ; monster with defective vertebræ.

Oligosteatosis, ol-ig-o-ste-at-o'sis (*oligo, stear,* tallow). Defective secretion of sebum.

Oligotrichia, ol-ig-o-trik'e-ah (*oligo, thrix,* hair). Want of hair; paucity of hair; poorly-developed hair.

Oligotrophia, ol-ig-o-trof'e-ah (*oligo, trepho,* to nourish). Deficient nourishment.

Oligotrophous, ol-ig-ot'rof-us (*oligos, trepho,* to nourish). Deficient in nourishment.

Oligozoospermia, ol-ig-o-zo-o-spurm'e-ah (*oligo, zoon,* animal, *eidos,* shape). Condition of sterility existing in the male in which the spermatozoa are few in number and inactive.

Oliguresia, ol-ig-ur-a'ze-ah, **Oligure'sis, Oligoure'sis, Oligoure'sia, Oligu'ria** (*oligo, oureo,* to pass urine). Morbidly diminished urinary secretion.

Oligydria, ol-ig-id're-ah (*oligo, hidros,* sweat). Deficiency of sweat; ischidrosis.

Olinic (o-lin'ik) **acid.** Acid contained in the form of a glyceride in oils when drying.

Olisthe'ma (*olisthaino.* to slip). Luxation.

Oli'va (olive). See *Olea.* Olive; olivary body. **O. infe'rior,** olivary body. **O. supe'rior,** nucleus olivaris superior.

Oli'væ. Corpora olivaria.

Oliva'ris. Olive-shaped.

Ol'ivary. Olive-shaped. Relating to the olive. **O. body,** oval protuberance containing a large nucleus found on lateral surface of medulla just below the pons. **O. body, supe'rior,** nucleus olivaris superior. **O. em'inence,** olivary process. **O. fascic'ulus,** lateral column of medulla. **O. nu'cleus,** collection of gray matter folded like an empty pocket within the olivary body. **O. ped'uncle,** fibres which, after surrounding gray nucleus of olivary body within and without, are collected into a bundle; they end in the deep

arcuate fibres. **O. pro'cess,** rounded prominence on upper surface of body of sphenoid in front of pituitary fossa. **O. sul'ci,** grooves which separate olive from neighboring portions of medulla; the lateral (sulcus olivæ lateralis) separates it from lateral tract; the medial (sulcus olivæ medialis) is a continuation upward of posterior lateral sulcus of the medulla.

Ol'ive. Fruit of *Olea Europæa*; also olivary body. **O., infe'rior,** olivary body. **O. oil,** fixed oil expressed from the ripe fruit; bland, nearly odorless, pale yellow or greenish yellow, oily liquid, sp. gr. .915 to .918; sparingly soluble in alcohol, freely so in ether; nutritious and mildly laxative; principally used in pharmacy as a constituent of liniments, ointments, cerates, and plasters. **O., supe'rior,** nucleus olivaris superior.

Olivella, ol-iv-el'lah. Cneorum tricoccum.

Oliverin, ol-iv'er-in. Product obtained from bark of Olea Europæa; has been employed in place of quinine.

Ol'iver's test. For bile in urine. Pulverized peptone, gr. xxx; salicylic acid, gr. iv; acetic acid, ♏xxx; enough distilled water to make fʒviij; filtered until perfectly transparent; ♏xx of urine added to fʒj of this solution will cause an opalescence proportionate to the amount of bile present.

Ol'ive-shaped. *Olivary.* Resembling an olive. See *Corpora olivaria.*

Olivifor'mis (*oliva, forma,* shape). Olive-shaped.

Olivile, ol'iv-ile. Crystalline principle obtained from exudation from bark of olive tree.

Olivi'na. See *Olea Europæa.*

Olivine, ol'iv-een. See *Rutilin.*

Olivite, ol'iv-ite. Product derived from leaves or green fruit of olive tree.

Ol'la (*olla,* a pot) **cap'itis.** Cranium.

Ol'lier's meth'od or **opera'tion.** A rhinoplastic operation in which an inverted flap, including periosteum, is taken from the forehead, and side flaps by preference from stump of the nose.

Olophlyc'tis (*holos,* entire, *phluktis,* a vesicle). Herpes. **O. hydro'ica,** miliaria rubra and miliaria crystallina. **O. labia'lis,** herpes facialis. **O. progenita'lis,** herpes progenitalis. **O. prolabia'lis,** herpes facialis. **O. volat'ica,** strophulus volaticus.

Olopho'nia (*ollumi.* to lose, *phone,* voice). Congenital misconstruction of the vocal organs. **O. la'bii loba'ta,** hare-lip. **O. lin'guæ fræna'ta,** see *Ankyloglossum.*

O. L. P. Abbv. for occipito-læva-posterior, left occipitoposterior position of fœtus in labor.

Olsnit'ium. Peucedanum palustre.

Olshau'sen's opera'tion. Ventrifixation of uterus for retroflexion.

Olulano'sis. Disease of cats due to presence of *Olulanus tricuspis* in the lungs and stomach.

Olula'nus tricus'pis. Nematode worm found in the stomach and lungs of cats.

O'lus (a potherb). Lachanon.

Olut kumbool. A remedy used in India in cases of neuralgic and congestive dysmenorrhœa.

Oma (*oma*). In the termination of many pathological words signifies morbid condition, as in sarc*oma,* ather*oma,* etc.

Omacephalia, o-mah-sef-al'e-ah. State of being an omacephalus.

Omacephalus, o-mah-sef'al-us (*omo, akephalos,* devoid of head). A genus of paracephalous monsters without any neck—a slight depression indicating the limits of the head and body. The organs of special sense are rudimentary, and thoracic extremities absent.

O'magra (*omo, agra,* seizure). Gout in the shoulder.

Omal'gia (*omo, algos,* pain). Pain in the shoulder.

Omarthritis, o-mar-thre'tis (*omo, arthron,* a joint). Inflammation of the shoulder-joint.

Omarthrocace, o-mar-throk'as-e (*omo, arthron,* joint, *kakos,* bad). Arthrocace of the shoulder-joint. Caries or suppuration of the shoulder-joint.

Oma'sum or **Oma'sus.** *Manyplies.* Third stomach of ruminant animals.

Omatocia, o-mat-o'se-ah (*omo, tokos,* birth). Shoulder presentation; abortion; premature birth.

Omeire. A vinous and acetous fermented milk used in Africa.

Omen'ta (pl. of **Omentum**). Meninges.

Omen'tal. Relating to the omentum.

Omenta'sis. Epiploitis.

Omenti'tis. Epiploitis.

Omentocele, o-men-to-se'le (Eng. o-men'to-seel). Epiplocele.

Omen'tula (dim. of **Omentum**). Appendiculæ pinguedinosæ.

Omen'tulum. Lesser omentum.

Omen'tum. Epiploon. **O. col'icum,** epiploon, colic. **O., gas'tric,** omentum majus. **O. gastrocol'icum,** epiploon, gastrocolic. **O., gastrohepat'ic,** omentum minus. **O., gastrosplen'ic,** epiploon, gastrocolic. **O. hepatogas'tricum,** epiploon, gastrohepatic. **O., less'er,** epiploon, gastrohepatic. **O. ma'jus,** epiploon, gastrocolic. **O. mi'nus,** epiploon, gastrohepatic. **O. os'sium,** periosteum. **O., sac of the,** see *Epiploon, gastrohepatic.* **O., third,** epiploon, colic.

Omichesis, o-mik-a'sis (*omicheo,* to pass urine). Micturition.

Omichma, o-mik'mah. Urine.

Omichol'ic ac'id. Acid of red color in decomposing urine.

Omicholin, om-ik'o-lin. Matter of a red color contained in decomposing urine.

Omitis, o-me'tis. Inflammation in or about the shoulder-joint.

Om'ma. Eye; vision.

Om'ne o'vum ex o'vo (every living being from an egg). The maxim that every living body must be produced from a parent.

Omniph'agus (*omnis,* all, *phago,* to eat). Omnivorous.

Om'nis cel'lula e cel'lulâ (every cell from a cell). An expression of the doctrine that every living cell originates from a parent cell.

Omniv'orous (*omnis,* all, *voro,* to eat). *Omnivorus.* An epithet for animals which eat every kind of food, animal or vegetable—*Pantophagists.*

Omnubilation, om-nu-bi-la'shun. A making or becoming obscure or confused.

O'mo (shoulder). In the composition of anatomical terms, the scapula or shoulder-blade; in other cases, the shoulder.

Omo-ankoneus, o'mo-an-ko-ne'us. Dorso-epitrochlearis.

Omo-atlan'ticus. Levator claviculæ.

Omobrachialis, o-mo-brak-e-al'is. Coraco-brachialis.

Omocace, o-mok'as-e. Diseased condition of the shoulder-joint.

Omocervicalis, o-mo-sur-vik-al'is. Levator anguli scapulæ.

Omoclavicular, o-mo-klav-ik'u-lar. See *Coracoclavicular.*

Omocleido-hyoideus, o-mo-kli'do-he-o-id-a'us. Accessory head of omohyoid, arising from the clavicle, apparently an extension of muscular fibres into a process of cervical fascia, confining posterior belly and intermuscular tendon.

Omocot'yle. See *Glene.*

Omodyn'ia (*omo, odune,* pain). Pain in the shoulder. **O. rheumat'ica,** rheumatism of the back, particularly of the shoulders.

Omohyoid, o-mo-hi'oid. Relating or attached to hyoid bone and scapula.

Omohyoïd'eus. This muscle is situate obliquely at the sides and front of the neck; slender, long, and flat. Arises from the superior costa of the scapula, near the semilunar notch, and from the ligament that runs across it, and is inserted at the sides of the inferior margin of the body of the os hyoides. It consists of two fasciculi united by a common tendon, and is a true digastric muscle. Depresses the os hyoides, carrying it a little backward and to one side, except when it acts with its fellow, when the bone is depressed and drawn obliquely backward.

Omolita, om-o-le'tah. Suprascapular bone.

Omophagia, o-mo-faj'e-ah. Fondness for raw food; eating of raw food.

Omophagus, o-mof'ag-us (*omos*, crude, *phago*, to eat). One who eats raw flesh.

Omoplata, o-mo-plat'ah (*platus*, flat). Scapula.

Omoplatohyoïdeus, om-o-plat-o-he-o-id'e-us. Omohyoideus.

O'mos. Crude. Humerus. Shoulder.

Omositia, o-mo-sish'e-ah (*omos*, crude, *sitos*, food). Omophagia.

Omosternal, o-mo-sturn'al. Relating to omosternum.

Omoster'num. Interarticular fibrocartilage of sternoclavicular joint.

Omostrophosis, o-mo-strof-o'sis (*omo*, *strepho*, to wrest). Dislocation of the shoulder.

Omotar'ichos (pickled). Properly, the neck or shoulder-piece of a salted animal; once recommended against bites of vipers and hydrophobia.

O'motes. Crudity.

Omothy'roid. Aberrant form of omohyoid muscle, in which it sends fasciculi to be inserted upon superior horn of thyroid cartilage.

Omotocia, o-mo-to'se-ah (*omo*, *tokos*, birth). Abortion; omatocia.

Omotrapezal, o-mo-trap-e'zal. Relating to trapezius and omohyoideus.

Omotribes, o-mo'tri-bees (*omos*, crude, *tribo*, to bruise). Oil expressed from unripe olives.

Omoyodes, om-o-e-o'dees. Omohyoideus.

Omphace, om'fas-e (*omphax*, an unripe grape). Verjuice.

Omphac'inum o'leum. Omotribes.

Omphac'ion. The juice of unripe grapes; also verjuice.

Om'phacis. An unripe gallnut.

Omphaci'tes (**vi'num**). A name given to wine prepared from the unripe grape.

Ompha'cium. Omphacion; verjuice.

Omphacomeli, om-fak-om'el-e (*omphax*, unripe fruit, *mel*, honey). A sort of oxymel, made of the juice of unripe grapes and honey.

Omphalea (om-fal-e'ah) **corda'ta.** Ouabe oil-plant, growing in Guiana and the West Indies. The seeds can be eaten and have purgative properties; leaves are employed in dressing wounds; plant furnishes caoutchouc.

Omphalectomy, om-fal-ek'to-me (*omphalo*, *ektome*, excision). Excision of the umbilicus.

Omphalelcosis, om-fal-el-ko'sis (*omphalo*, *helkos*, an ulcer). Ulceration of the navel or of the umbilical cord.

Omphalexoche, om-fal-ex'o-ke (*omphalo*, *exoche*, standing out). Umbilical hernia; exomphalus.

Omphal'ic. Umbilical.

Omphalister, om-fal-is'tur. Knife for cutting the umbilical cord.

Omphali'tis. Inflammation of the umbilicus.

Om'phalo (*omphalos*, navel). In composition, navel.

Omphalobium (om-fal-o'be-um) **pinna'tum.** Tree of the East Indies; fruit, oil of fruit, and leaves have resolvent properties.

Omphalocar'pus (*omphalo*, *karpos*, fruit). Galium aparine.

Omphalocele, om-fal-o-se'le (Eng. om'fal-o-seel) (*omphalo*, *kele*, rupture). Umbilical hernia; exomphalos.

Omphalocraniodid'ymus (*omphalo*, *kranion*, cranium, *didumos*, twin). Double monster in which the umbilical cord or the rudiment of one fœtus is rooted in the cranium of another.

Omphalodes, om-fal-o'dees. Omphaloid.

Omphalo-enteric, om'fal-o-en-ter'ik. Belonging to the umbilicus and intestine, as the *omphalo-enteric canal*. See *Vesicula umbilicalis*.

Om'phaloid. Navel-like; umbilicated.

Omphalolysis, om-fal-ol'is-is (*omphalo*, *lusis*, separation). Omphalotomy.

Omphalomantia, om-fal-o-man-te'ah (*omphalo*, *manteia*, prophecy). *Omphalomancy*. A species of divination practised by credulous matrons, who pretend to be able to know the number of children a female will have by the number of knots in the funis.

Omphalomesenteric (om-fal-o-mes-en-ter'ik) or **Omphalomesera'ic** (*omphalo*, *mesenterion*, mesentery). Relating to the umbilicus and mesentery. **O. duct**, passage in fœtus connecting small intestine with umbilical vesicle; vestige often found in the adult as a small diverticulum. **O. vein**, main venous stem returning blood from yolk-sac to embryo. **O. ves'sels**, two very fine vessels on parietes of umbilical vesicle.

Omphalomonodidymi, om-fal-o-mon-o-did'im-e (*omphalos*, *monos*, alone, *didumos*, navel). Condition in which union of twins at the navel exists.

Omphaloncus, om-fal-on'kus (*omphalo*, *onkos*, swelling). Omphalophyma; umbilical tumor.

Omphaloneuron, om-fal-o-nu'ron (*omphalo*, *neuron*, sinew, ligament). Funiculus umbilicalis; umbilical cord.

Omphaloneurorrhexis, om-fal-o-nu-ro-reks'is (*omphalo*, *rhexis*, rupture). Omphalorrhexis.

Omphaloneurostrepsis, om-fal-o-nu-ro-strep'sis. Twisted condition of umbilical cord.

Omphalop'agus (*omphalo*, *pegnumi*, to fasten together). Double monster united by anterior aspects of bodies, having single umbilicus at lower point of fusion. For species, see *Gastrodidymus*, *Prosopodidymus*, *Sternodidymus*, *Xiphodidymus*.

Omphalophlebitis, om-fal-o-fleb-e'tis (*omphalo*, *phlebitis*, inflammation of vein). Inflammation of the umbilical vein.

Omphalophlegmone, om-fal-o-fleg'mo-ne. Omphalitis.

Omphalophyma, om-fal-o-fe'ma (*omphalo*, *phuma*, tumor). Tumor of the navel.

Omphalopropto'sis (*proptosis*, falling foward). Exomphalus; protrusion of navel.

Omphalorrhagia (om-fal-or-rhaj'e-ah) or **Omphalor'rhage** (*rhage*, rupture or discharge). Hemorrhage from the umbilicus, in the new-born in particular.

Omphalorrhexis, om-fal-or-rheks'is (*omphalo*, *rhexis*, rupture). Rupture of the funis.

Omphalorrhœa, om-fal-or-rhe'ah (*omphalo*, *rheo*, to flow). Discharge from the umbilicus.

Om'phalos. Umbilicus.

Om'phalosite (*omphalo*, *sitos*, nourishment). Monster possessing an imperfect kind of life, which ceases when the umbilical cord is divided.

Omphalosoter, om-fal-o-so'ter (*omphalo*, *soter*, preserver). Instrument devised for the reduction of a prolapsed umbilical cord.

Omphalotacterium, om-fal-o-tak-ta're-um. Instrument for placing umbilical cord in position.

Omphalotaxis, om-fal-o-taks'is. Manipulation of replacing umbilical cord when prolapsed.

Omphalot'omy (*omphalo*, *tome*, section). Division of the funis or umbilical cord.

Om'phalus. Umbilicus.

O'mum oil. Ajowan oil; derived from fruit of Carum ajowan, containing thymol.

O'mus. Crude. Humerus. Shoulder.

Onage. Poison contained in strophanthus seeds; used by natives of Africa for poisoning arrows.

On'agra. Œnothera biennis.

Ona'nia. See *Onanism*.

O'nanism (after *Onan*, Gen. xxxviii. 9). Generally but improperly confounded with masturbation; now usually applied to incomplete coitus, when the male organ is withdrawn in time to prevent the semen from entering the female organs of generation; sometimes called *Conjugal onanism*.

Onanis'tic. Relating or appertaining to onanism.

O'nar. Somnium.

Onco'ba spino'sa. Tree of order Flacourtiaceæ or Tiliaceæ, native of Egypt and Senegal; fruit is edible.

Oncocarpus (on-ko-karp'us) **Fitien'sis.** Itch-tree growing in the Fiji Islands; so called because any part of the tree gives rise to severe cutaneous irritation. Caustic juice of the fruit is employed by the islanders in leprosy.

Oncograph, onk'o-graf (*onkos*, *grapho*, to write). In-

strument for recording variations in volume of a body, such as the spleen.

Oncol'ogy (*onkos*, tumor, *logos*, discourse). Treatise on tumors.

On'come. Scotch term, according to Sir Walter Scott, for "mysterious diseases which baffle the regular physician."

Oncometer, onk-om'e-ter (*onkos*, *metron*, measure). Instrument for measuring variations in volume of bodies, the dimensions of tumors, etc.

On'cos or **On'cus.** Tumor.

Onco'ses. Tumors, as diseases.

Onco'sis. Intumescence.

Oncothlipsis, onk-o-thlip'sis (*onkos*, tumor, *thlipsis*, pressure). Pressure due to presence of a tumor.

Oncot'omy (*onkos*, *tome*, incision). *Onkotomy.* Excision of a tumor. Opening of an abscess with a cutting instrument.

One'berry. Paris.

Oneirocriticus, on-i-ro-krit'ik-us (*oneiron*, dream, *krisis*, judgment). One who judges according to dreams.

Oneirodynia (*oneiron*, *odune*, pain). Painful dream. Incubus and somnambulism are oneirodyniæ. **O. acti'va,** depraved, disturbed, or morbid dreaming; somnambulism. **O. gra'vans,** incubus.

Oneirogmus, on-i-rog'mus (*oneiron*, dream). A lascivious dream; pollution; nocturnal pollution.

Oneirog'one. Oneirogmus.

Oneirogonorrhœ'a. Pollution, nocturnal.

Oneirog'onos (*oneiron*, dream, *gonos*, seed). Pollution.

Oneirogyne, on-i-rog'in-e (*oneiron*, a dream, *gune*, woman). Lascivious dream.

Oneirol'ogy (*oneiron*, dream, *logos*, description). Doctrine of dreams.

Oneiromantia, on-i-ro-man-te'ah (*oneiron*, *manteia*, divination). The art of divining by dreams or of interpreting dreams.

Onei'ron. A dream.

Oneiron'osus (*oneiron*, dream, *nosos*, a disease). Morbid, uneasy dreaming.

Oneiropole'sis or **Oneiropol'ia.** A dream.

Onei'ros. A dream.

On'era al'vi (load of the bowels). Excrement. **O. ven'tris** (load of the belly), excrement.

On'ion (L. *unio*), **bog.** Asmunda regalis. **O., com'mon,** bulb of Allium cepa. Diuretic, expectorant, rubefacient, stimulant. Old English term for *bunion.* **O., pota'to,** Allium cepa. **O., sea,** see *Scilla maritima.*

Onis, on'is. Dung of the ass; once employed in medicine.

Onis'ci asel'li. *Woodlice, Slaters, Hoglice;* had at one time a place in the pharmacopœias; they were considered stimulant and diuretic, and useful in jaundice.

Onis'cus (dim. of **Onos,** an ass). A genus of insects, class Crustaceæ, very common in cellars and dark and moist places.

Oni'tis. Origanum dictamnus.

Onkinocele, onk-in-o-se'le (Eng. onk'in-o-seel). Swelling accompanying inflammation of sheaths of tendons.

Onkot'omy. Oncotomy.

Onobai'o. Arrow-poison used by natives of Obock.

Onomatol'ogy (*onoma*, a name, *logos*, a discourse). Nomenclature.

Onomatomania, on-o-mat-o-man'e-ah. Mental distress at inability to recall names, or irresistible impulse to repeat, or morbid dream of, some particular word.

Ono'nin. Crystallizable, tasteless glucoside obtained from root of *Ononis spinosa.*

Ono'nis antiquo'rum. O. spinosa. **O. arven'sis** has properties like the next. **O. spino'sa,** ord. Leguminosæ. Root is used as a diuretic.

Onopor'don or **Onopor'dum acan'thium** (*onos*, ass, *perdo*, to break wind). Cotton thistle, ord. Compositæ; expressed juice has been recommended as a cure for cancer, applied externally.

Onosmo'dium Virginia'num. False gromwell, ord. Borragineæ; indigenous; root and seeds are diuretic and tonic; said to dissolve calculi.

On'thus. Excrement.

Ontogen'esis or **Ontog'eny** (*on*, a being, *gennao*, to produce). Development or genesis of the individual. Embryology.

Ontol'ogy (*on*, *ontos*, a being, *logos*, a discourse). Term used sometimes for metaphysics generally, but more frequently for that portion of it which deals in generalities, and which embraces, therefore, the speculative and chimerical. Medical ontology treats of diseases of distinct entities, without reference to the part or parts affected.

On'ycha. See *Bdellium* and *Cistus creticus.*

Onychatrophia, on-ik-at-rof'e-ah (*onycho*, *atrophia*, want of nourishment). Atrophy of the nails.

Onychauxe (on-ik-aux'e) or **Onychaux'is** (*onycho*, *auxe*, increase). Unusual increase of the size and thickness of the nails.

Onychexallaxis, on-ik-ex-al-laks'is (*onycho*, *exallaxis*, change). Degeneration of the nails.

Onychia, o-nik'e-ah. Paronychia. Inflammation and suppuration at the side or root of the nail. **O. malig'na,** malignant variety of onychia, generally due to traumatism, characterized by the presence of ulceration and granular condition and foul-smelling discharge. **O. parasit'ica,** onychomycosis. **O. periungua'lis,** perionychia. **O. scrofulo'sa,** onychia caused by scrofulosis.

Onychisterion, on-ik-ist-a're-on. Instrument employed for trimming the nails.

Onychitis, on-ik-e'tis. Inflammation of a nail. See *Paronychia.*

On'ycho. In composition, a nail.

Onychocampe, on-ik-o-kam'pe (*onycho*, *kampe*, curvature). Onychogryphosis.

Onychoclasis, on-ik-o-klah'sis (*onycho*, *klasis*, fracture). Fracture of a nail.

Onychocline, on-ik-o-kle'ne (*onycho*, *kline*, bed). The sensitive bed or stroma under the nail.

Onychocrypto'sis (*onycho*, *kruptus*, concealed). Disease of nail-follicles.

Onychogryphosis (on-ik-o-grif-o'sis) **Onychogrypo'sis,** or **Onychogrypto'sis** (*onycho*, *gryposis*, crookedness). Hypertrophy with curvature of the nails, *Ungues aduncı*, such as occurs in hectic individuals. Also growing-in of the nails.

Onychohelcosis, on-ik-o-hel-ko'sis. Ulcerated condition of nail.

On'ychoid. Resembling a nail.

Onycholepra, on-ik-ol'ep-rah. Leprosy involving the nails.

Onycholysis, on-ik-ol'is-is. Atrophy of the nails.

Onychomantia, on-ik-o-man-te'ah (*onycho*, *manteia*, divination). Divination from the appearance of the nails.

Onychomyco'sis or **Onychomykosis,** on-ik-o-mi-ko'sis (*onycho*, *mycosis*, fungous growth). *Onychia parasitica.* A parasitic disease, tinea trichophytina, of the substance of the nail, commencing at the root and extending downward, the nail becoming claw-shaped, thickened, rough, and fissured—*Favus of the nail.* It is dependent on a fungus, Achorion keratophagus, and attacks also the hoofs of the horse, mule, etc. **O. circina'ta,** onychomycosis trichophytina. **O. ton'surans** or **trichophyti'na,** ringworm affecting the nails, due to trichophyton tonsurans.

Onychon'osi (*onycho*, *nosos*, disease). Diseases of the nails.

Onychon'osus. Disease of the nails.

Onychopath'ic (*onycho*, *pathos*, disease). Relating to affections of the nails.

Onychophosis, on-ik-o-fo'sis. Disease of the toenails, consisting of induration of the corneous layers of epidermis beneath the nail.

Onychophthora (on-ik-of'tho-rah), **Onychophtho'ria, Onycoph'thora,** or **Onycophtho'ria** (*onycho*, *phthora*, degeneration). Degenerate condition or destruction of the nails.

Onychophyma, on-ik-o-fe'mah (*onycho*, *phuma*, tumor). A painful degeneration of the nails, which be-

come thick, rough, and crooked; occurring as a symptom of syphilis and lepra.

Onychophyton, on-ik-of'it-on (*onux, phuton,* plant). Onychomycosis.

Onychopto'sis (*onycho, ptosis,* falling). Falling off of the nails.

Onychorrhiza, on-ik-or-rhe'zah (*onycho, rhiza,* root). Root of the nail.

Onychosarcoma, on-ik-o-sark-o'mah (*onux, sarx,* flesh). Fleshy outgrowth on a nail.

Onycho'ses (pl. of **Onychosis**). Generic term for diseases of the nails.

Onycho'sis. Disease of the nails. **O. arctu'ra,** ingrowing nail; see *Arctura.* **O. grypho'sis,** onychogryphosis. **O. lap'sus,** onycholysis. **O. molli'ties,** soft condition of nails. **O. tin'ea,** onychomycosis.

Onychostro'ma (*onycho, stroma,* bed). The sensitive bed or stroma under the nail.

Onychostromelcosis, on-ik-o-strom-elk-o'sis. Ulcerated condition of the bed of the nail.

Onychothlasis, on-ik-oth'las-is. Crusting of the nails.

Onyclein, on-ik'le-in. Brownish granules found in matrix of nails, resembling keratohyaline.

Onygosis, on-ig-o'sis. Onychosis.

O'nyx. Hook (blunt); nail; pterygion. Collection of purulent matter between the laminæ of the cornea having the shape of a nail.

Onyx'is. Ingrowing nail; see *Onychogryphosis.* **O., re'tro-un'gueal,** onychia commencing at root of nail. **O. syphilit'ica,** onychia syphilitica.

Onyxi'tis. See *Paronychia.*

O'öblast (*oon,* egg, *blastano,* to grow). Cell which develops into an ovule; primordial ovule.

Oöboo-waloo. Beriberi.

Oöcalymma, o-o-kal-im'mah. Oiocalymma.

Oöcye'sis (*oon, kuesis,* pregnancy). Ovarian pregnancy.

Oödeocele, o-o-de-o-se'le (Eng. o-o'de-o-seel). Hernia foraminis ovalis.

Oö'des. Oval. Aqueous humor.

Oög'ala or **Oög'la** (*oon, gala,* milk). Milk of eggs, a preparation of eggs and milk.

Oög'amous (*oon, gamos,* marriage). Applied to beings reproduced through an ovum.

Oögenesis, o-o-jen'es-is. Origin and development of ova.

Oöid, o'oid (*oon, eidos,* resemblance). Oval. Aqueous humor

Oökine'sis (*oon, kinesis,* movement). Series of movements and form-changes of ovum during maturation, fecundation, and first segmentation.

Oölecithymen, o-o-les-ith'im-en. Vitelline membrane.

Oölemma (o-o-lem'mah) **pellu'cidum** (*oon, lemma,* sheath). Zona pellucida.

Oöleucon, o-o-lu'kon (*oon, leukos,* white). Albumen ovi.

Oölogy, o-ol'o-je (*oon, logos,* discourse). *Ovology.* Description of the ovum.

Oömycetes, o-o-me-sa'tees (*oon, mukes,* fungus). Subdivision of fungi.

O'ön. Ovum.

Oönine, o'on-een. Albumen.

Oöphagous, o-of'ag-us (*oon, phago,* to eat). Feeding on eggs.

Oöphoralgia, o-of-o-ral'je-ah (*oophoron, algos,* pain). Neuralgia of the ovary; ovarian irritation.

Oöphoraux'e or **Oöphoraux'is** (*oophoron, auxe,* increase). Enlargement of the ovary.

Oöphorectom'ia or **Oöphorectomy,** o-of-o-rek'to-me (*oophoron, ektome,* excision). Ovariotomy.

Oöphor'ia (*oophoron,* ovary). Hysteria.

Oöphori'tis. Oaritis; ovaritis. **O., follic'ular,** inflamed condition of Graafian follicles. **O., peritone'al,** inflammation of the peritoneum around the ovary.

Oöph'oro-ep'ilepsy. Epilepsy dependent upon ovarian disease.

Oöphoromalacia, o-of-or-o-mal-ah'se-ah (*oophoron, malakia,* softening). Softened condition of the ovary.

Oöphoroma'nia. Insanity resulting from ovarian disease.

Oöph'oron. Ovary. Region of ovary in which ova are developed.

Oöphoropathi'a (*oophoron, pathos,* affection). Disease of the ovary.

Oöph'oro-salpingec'tomy (*oophoron, salpinx,* tube). Excision of ovary and Fallopian tube.

Oöphor'rhaphy (*oophoron, rhapto,* to stitch together). Operation for displaced ovary; suture of hilus of ovary to relaxed infundibulo-pelvic ligament.

Oöph'orum (*oon, phero,* to bear). Ovary.

Oöplasma, o-o-plaz'mah. Vitellus.

Oöri'tis. Inflammation of the ovary.

O'öskope (*oon, skopeo,* to observe). Apparatus for observing the development of the egg.

O'ösperm (*oon, sperma,* germ). Fertilized ovum.

O'öspore (*oon, sporos,* seed). Ovum; egg-cell.

Oötoc'ia (*ootokeo,* to lay eggs). Ovulation.

Op, as a prefix. See *Ob.*

Opacity, o-pas'it-e (*opacus,* obscure). *Opaqueness.* Incapability of transmitting light; reverse of transparency. *Opacity of the cornea* constitutes *albugo* or *leucoma.* See *Ceratitis suppurans.* **O. of lens,** see *Cataract.*

Opales'cent or **Opaline,** o'pal-een. That which resembles the opal. A fluid is said to be opaline when milky, and when it presents an appearance more or less like that of the opal. **O. patch,** see *Patch, opaline,* and *Condyloma.* **O. plaques of the mouth,** leucoplasia buccalis.

Opaque, o-pake'. An epithet given to bodies which do not permit the passage of rays of light. The opaque cornea is the sclerotica, in contradistinction to the transparent cornea or true cornea. **O. nervefi'bres,** continuance of medullary sheaths of fibres of optic nerves beyond lamina cribrosa, exhibiting bright white patches upon the nervous coat of the eye.

Opaqueness, o-pake'ness. Opacity.

O'pe. Foramen.

O'pening. Orificium; os; ostium; apertura. **O., abdom'inal, of o'viduct,** ostium abdominale tubæ Fallopii. **O., aor'tic,** opening in diaphragm for passage of aorta. **O., œsophage'al,** opening in diaphragm through which the aorta passes. **O., saphe'nous,** foramen saphenæ, opening below Poupart's ligament, through which saphenous vein passes.

Opeocele, o-pe-o-se'le (Eng. o'pe-o-seel) (*ope,* foramen, *kele,* rupture). Obturator hernia. See *Tube, Fallopian.*

Operable, op'er-a-b'l. Admitting of operation; allowing an operation to be performed, as new growths, etc.

Opera'tio (*opus,* work). Action; operation. **O. chem'ica** or **pharmaceu'tica,** operation, chemical or pharmaceutical. **O. chirur'gica,** see *Operation.* **O. ma'jor,** operation, major. **O. mi'nor,** see *Operation, major.* **O. sim'plex,** a simple incision or operation.

Opera'tion. The application of instruments to the human body with the view of removing diseases. The object of an operation, *operatio chirurgica,* is generally to divide or reunite parts, to extract extraneous or noxious bodies, and to replace organs that are wanting, by different instruments or artificial means. The principal operatory methods have been called *Synthesis, Diæresis, Exæresis,* and *Prothesis.* Frequently the most difficult subject connected with an operation is to decide when it is absolutely called for or advisable, and when improper. Many surgical operations have been named after their proposers; these will be found under their respective alphabetical heads, as *Adams's operation, Buchanan's operation,* etc. **O., bilat'eral,** see *Lithotomy.* **O., chem'ical** or **pharmaceu'tical,** is any process whose object is the preparation of medicines, their combinations with each other, analysis, and decomposition; such are solution, distillation, sublimation, evaporation, digestion, maceration, infusion, decoction, calcination, etc. Some of these operations are mechanical; others, really chemical. **O., high,** see *Lithotomy.* **O., lat'eral,** see *Lithotomy.* **O., ma'jor,** an important opera-

tion requiring a high degree of surgical skill and efficiency, as amputation at the hip-joint, etc. Ovariotomy performed with a long incision is so called, as the same operation with a short incision is called the *Minor operation*. **O., mi'nor**, one of the operations of minor surgery; see *Operation, major*. **O., plas'tic**, see *Surgery*. **O., Sigaul'tian**, symphyseotomy.

Opera'tions, cap'ital. See *Surgery, operative*. **O., ma'jor**, see *Surgery, operative*. **O., mi'nor**, see *Surgery, operative*.

Operative, op'er-a-tiv. Effective; relating to operations, as operative surgery. See *Surgery, operative*.

Op'erator. A surgeon who is in the habit of practising the greater operations. To be a successful operator the surgeon must be well acquainted with anatomy and be possessed of decision, good judgment, and strong nerve. See *Surgeon*.

Opercula, o-pur'ku-lah. Small membranous processes from the margins of the dental follicles, which unite and form a lid to the follicles after they are closed in the development of the teeth.

Oper'cular. Relating to the operculum. In the nature of a lid or cover.

Oper'culum (*operio*, to cover). A cover or lid. In fishes, the gill-cover. **O. as'peræ arte'riæ**, larynx. **O. cu'tis**, epidermis. **O. ilei**, ileocæcal valve; valve of Bauhin. **O. in'sulæ**, triangular eminence between ascending and posterior branches of Sylvian fissure, formed by portion of inferior frontal and of precentral convolutions, and covering a considerable portion of the island of Reil. **O. laryn'gis**, epiglottis. **O. oc'uli**, eyelid. **O. papilla'rum**, a nipple-shield. **O. sel'læ**, sheet of dura mater passing over pituitary fossa of sphenoid, binding down the pituitary body.

Operimen'tum (*operio*, to cover). Operculum. **O. intestino'rum**, epiploon. **O. præten'sum abdom'inis**, peritoneum.

Opertor'ium. Operculum.

Oph. Abbv. for ophthalmoscope, ophthalmoscopy, or ophthalmia.

Ophe'lia chira'ta. Gentiana chirayta. See *Chirata*.

Ophelic (of-el'ik) **acid.** Bitter acid principle isolated from chirata.

Ophiasis, of-e-as'is (*ophis*, a serpent). Calvities; porrigo decalvans. Lepra. **O. sor'dida**, see *Lepra nigricans*.

Ophid'ia. Order of reptiles including snakes.

Ophid'ian. Belonging to or resembling serpents.

Ophidomonas, of-id-om'on-as (*ophis*, serpent, *monos*, single). Genus of Schizomycetes.

Ophioglos'sum luna'ria. Moonwort. Leaves are astringent, and have been used in domestic practice in fluxes. **O. vulgat'um** (*ophis*, a serpent, *glossa*, tongue), *Adder's tongue*, ord. Filices. This plant was formerly considered to be vulnerary.

Ophiography, of-e-og'raf-e. See *Herpetography*.

Ophiophagous, of-e-of'ag-us (*ophis*, a serpent, *phago*, to eat). Epithet for animals which feed on serpents. Certain African tribes have been called by this name.

Ophiorrhi'za (*ophis*, serpent, *rhiza*, root). *O. mungos*, fam. Gentianaceæ. Root has been called *Radix serpentum*, *Mungos radix*. The bitter root is much esteemed in Java, Sumatra, etc. for preventing the effects that usually follow the bite of the naja, a venomous serpent; with which view it is eaten by the natives. It is also a reputed anthelmintic.

Ophiosis, of-e-o'sis (*ophis*, serpent). Variety of alopecia circumscripta in which desquamation occurs.

Ophiostaphylon, of-e-o-staf'il-on (*ophis*, a serpent, *staphule*, grape). Bryonia alba.

Ophioxyline, of-e-oks'il-een. Alkaloid from Ophioxylon serpentinum.

Ophiox'ylon. Ophioxylum.

Ophiox'ylum (*ophis*, a serpent, *xulon*, wood). Acaweria, ord. Apocynaceæ. Has been recommended in the bites of serpents and in intermittents; said to be very bitter.

O'phis. Serpent.

Ophi'tes. Serpentine or black porphyry; formerly worn as an amulet to cure diseases of the head.

Ophlyctis, of-lik'tis. Aphthæ.

Ophritis, of-re'tis. Inflammation of the eyebrow.

Ophrya, of're-ah. Eyebrow.

Oph'ryo-alve'olo-auric'ular angle. Facial angle measured by two lines drawn from ophryon and auricular point which meet at alveolar point.

Oph'ryo-in'iac arc. Arc measured on cranial surface from ophryon to inion.

Oph'ryon. In craniometry, point where the supraorbital line cuts the medial line; the glabella.

Oph'ryo-opis'thiac arc. Arc measured on cranial surface from ophryon to opisthion.

Ophryospi'nal angle. Jacquart's angle. See *Facial angle*.

Ophryptheiriasis, of-rip-thi-ri-as'is. Phtheiriasis of eyebrows and eyelashes.

Oph'rys. Eyebrow.

Ophryt'ic. Pertaining to the eyebrow.

Ophthal'magra (*ophthalmos*, *agra*, a seizure). A sudden gouty or other pain of the eye.

Ophthalmal'gia (*ophthalmos*, eye, *algos*, pain). Pain in the eye; neuralgia of the eye.

Ophthalmatro'phia, Ophthal'matrophy (*ophthalmos*, eye, *atrophia*, atrophy). Atrophy of the eyeball.

Ophthalmemicrania, of-thal-mem-e-kran'e-ah. Epileptoid amaurosis. Sudden attack of blindness, thought to be of the same character as epilepsy.

Ophthalmempas'ma (*empasso*, to strew upon). Dry collyrium.

Ophthalmenceph'alon (*enkephalos*, brain). Portion of the eye developed from the brain.

Ophthalmentozoon, of-thal-men-to-zo'on. Parasite existing in the eye.

Ophthalmia (of-thal'me-ah), *Ophthalmitis*. Three great varieties of ophthalmia, independently of the acute and chronic (which conditions occur in all inflammations), may be reckoned: *Ophthalmia membranarum*, *O. purulenta*, and *O. tarsi*. The first is characterized by the general symptoms of ophthalmia—pain and redness of the eye or its appendages, with intolerance of light and unusual flow of tears, the inflammation being seated chiefly in the coats of the eyeball. It is called also *Conjunctivitis*, *Catarrhal ophthalmia*, *Ophthalmoconjunctivitis*, *Conjunctival* or *Lacrymose ophthalmia*. Simple conjunctivitis, hyperæmia with catarrhal or muco-purulent secretion.

In *Purulent ophthalmia* the internal surface of the palpebræ associates in the inflammation of the eyeball, and there is a copious secretion of a purulent fluid. An epidemic and contagious variety of this is the *Egyptian ophthalmia*, *Military ophthalmia*, *Suppurative* or *Granulous ophthalmia*, *Epidemic contagious ophthalmia*—called *Egyptian* from its prevalence in Egypt during the British expedition under Sir Ralph Abercrombie. Inflammation is rapid and destructive; granulations shoot from the tunica conjunctiva, and occasionally there is intolerable pain, often succeeded by delirium; a contagious form, probably due to microorganisms tending to become chronic, with granular lids; see *Trachoma*. In new-born children a species of purulent ophthalmia, usually gonorrhœal, *O. neonatorum*, in which the palpebræ are florid and peculiarly tumid, is by no means uncommon. It seems to be caused by acrid discharges from the mother, applied to the eye of the infant during its exit, or to the stimulus of the light when the child first opens its eyes. An acute and severe form of purulent ophthalmia is produced by the infection of urethral discharges, *Gonorrhœal ophthalmia*, *Gonorrhœal conjunctivitis*.

Ophthalmia is likewise modified by the condition of the constitution, and hence we have *strumous*, *variolous*, *exanthematous*, and other inflammations of the conjunctiva.

The *third* variety, *Tarsal ophthalmia*, is seated chiefly in the tarsus or eyelid; the sebaceous crypts secreting a viscid and acrid fluid that glues and ulcerates its edges and irritates the eye. When accompanied with ulceration and much itching it constitutes *Psorophthalmia*, *Tinea of the eyelids*.

Different forms of inflammation of the conjunctiva may be thus classed:

Conjunctivitis
- 1. Pure or phlegmonous.
- 2. Pustular.
- 3. Granular or catarrhal
  - Contagious.
  - Non-contagious.
  - Miasmatic.
  - Exanthematic
    - Erysipelatous.
    - Variolous.
    - Morbillous.
    - Scarlatinous.
- 4. Purulent
  - Of new-born infants.
  - Gonorrhœal.
  - Egyptian.

Another rare form of ophthalmia is met with, *Diphtheritic conjunctivitis*, in which the discharge often assumes the form of thin, yellowish patches, sometimes of thick, opaque membrane. It is complicated with corneal affections, and the prognosis is unfavorable. In *Phlyctenular ophthalmia*, *Scrofulous corneitis*, *Herpes of the conjunctiva and cornea*, there is generally seen a triangular bundle of conjunctival vessels, at the apex of which one or more small herpetic vesicles or pustules appear, especially at the outer side of the cornea. When the pustules are very numerous, it has been termed *Pannus herpeticus*.

Exanthematous or *Exanthematic ophthalmia* is called *O. morbillosa*, *O. scarlatinosa*, *O. variolosa*, *O. erysipelatosa*, according to the disease with which it is associated, whether measles, scarlatina, smallpox, or erysipelas.

Conjunctivitis, when slight, requires little treatment, mild astringent and antiseptic applications, etc., and particularly avoiding exposure to light, being all that is necessary. When more severe, the treatment must be more vigorous and adapted to the special circumstances of the case. In purulent ophthalmia measures must be employed to prevent disorganization. In ophthalmia tarsi the eyelids must be prevented from being glued together during the night, and the irritation caused by attempts at separating them in the morning thus avoided.

Ophthal'mia Ægypti'aca. O., Egyptian; see *Ophthalmia*. **O. Asiat'ica,** see *Ophthalmia*. **O. bel'lica,** see *Ophthalmia*. **O. bilio'sa,** ophthalmia from biliary derangement. **O., catar'rhal,** see *Ophthalmia*. **O. catarrhal'is bel'lica,** see *Ophthalmia*. **O. chron'ica,** lippitudo. **O., conjuncti'val,** see *Ophthalmia*. **O. contagio'sa,** see *Ophthalmia*. **O., Egyp'tian,** see *Ophthalmia*. **O. epidem'ica,** see *Ophthalmia*. **O. erysipelato'sa,** see *Ophthalmia*. **O., exanthem'atous,** see *Ophthalmia*. **O. glutino'sa,** see *Ophthalmia*. **O., gonorrhœ'al,** see *Ophthalmia*. **O. gonorrho'ica,** see *Ophthalmia*. **O., gran'ular,** trachoma. **O. hu'mida,** see *Ophthalmia*. **O., lac'rymose,** see *Ophthalmia*. **O. membrana'rum,** see *Ophthalmia*. **O., mil'itary,** see *Ophthalmia*. **O. morbillo'sa,** see *Ophthalmia*. **O. neonato'rum,** see *Ophthalmia*. **O., neuroparalyt'ic,** occurring in paralysis of sensation of the cornea, resulting from perforation. **O., phlycten'ular,** characterized by formation of blebs, phlyctenulæ, or pustules upon bulbar conjunctivæ; see *Ophthalmia*. **O. psor'ica,** see *Ophthalmia tarsi*. **O. purifor'mis,** see *Ophthalmia*. **O. puromucosa,** Egyptian ophthalmia; see *Ophthalmia*. **O. purulen'ta,** O. characterized by purulent discharge; see *Ophthalmia*. **O. purulen'ta contagio'sa,** see *Ophthalmia*. **O. purulen'ta epidem'ica,** see *Ophthalmia*. **O. purulen'ta infan'tum,** see *Ophthalmia*. **O., pus'tular,** O., phlyctenular. **O., rheumat'ic,** sclerotitis. **O. scarlatino'sa,** see *Ophthalmia*. **O., scrof'ulous** or **stru'mous,** see *Ophthalmia* and *Phlyctenular*. **O. sic'ca,** inflammation of the eye without discharge. **O., sup'purative,** see *Ophthalmia*. **O., sympathet'ic,** inflammation of one eye caused by disease or injury of the other. **O., syphilit'ic,** see *Ophthalmia*. **O. tarax'is,** see *Ophthalmia*. **O. tar'si,** blepharitis; see *Ophthalmia*. **O. ulcero'sa,** ophthalmia with ulceration. **O., var'icose,** cirsophthalmia. **O. variolo'sa,** see *Ophthalmia*. **O. ve're,** see *Ophthalmia*. **O. virulen'ta,** purulent conjunctivitis.

Ophthalmia'ter (*ophthalmos*, *iatros*, a physician). Oculist.

Ophthalmiatri'a. *Ophthalmiatrotechnia*, *Ophthalmotherapia*. Art of the oculist; treatment of diseases of the eye.

Ophthalmiat'ric. Relating or appertaining to the treatment of diseases of the eye.

Ophthalmiatrics, of-thal-me-at'riks (*ophthalmos*, *iatrike*, surgery). Ophthalmology.

Ophthalmiatrotechnica, of-thal-me-at-ro-tek'nik-ah (*ophthalmiater*, *techne*, art). Art of the oculist; treatment of diseases of the eye.

Ophthal'mic. Relating or belonging to the eye. **O. ar'tery** arises from the internal carotid, and issues from the cranium by the foramen opticum. At first it is situate at the outer and lower side of the optic nerve, but ascends above the nerve and passes toward the inner angle of the orbit. It furnishes in its course the lacrymal, centralis retinæ, infra-orbitars, anterior ciliaries, inferior and superior musculars, anterior and posterior ethmoidals, and superior and inferior palpebrals. After having given off these it divides into two branches, the frontal and nasal, which furnish a number of ramifications, some superficial, others deep-seated. **O. gan'glion,** *Lenticular* or *Ciliary ganglion*, is one of the smallest ganglions of the body, and formed by the fifth and third pairs of the cranial nerves. It is situate at the outer side of the optic nerve near the bottom of the orbit; is irregularly quadrilateral and flat; its color is a reddish-gray. It is supplied by three roots—motor from oculomotor, sensory from nasal, and sympathetic (trophic) from carotid plexus, ciliary nerves from anterior angles. **O. nerve,** *Ophthalmic nerve*, *Orbitofrontal*, is the smallest and first of the three branches given off by the fifth pair; it is purely sensory. It proceeds along the external paries of the cavernous sinus, enters the orbit by the sphenoidal fissure, and divides into three branches: external—the lacrymal nerve; superior—frontal nerve; internal—the nasal nerve. See *Lacrymal*, *Frontal*, and *Nasal*. **O. plex'us,** filaments of the cavernous plexus, extending to the ophthalmic artery. **O. si'nus,** see *Cavernous sinus*. **O. stone,** see *Copper, aluminated*. **O. veins,** usually two, superior and inferior; they collect blood from the orbit, communicating with the angular and supraorbital veins, and discharge into the cavernous sinus. The name *Facial ophthalmic* has been given to the branch by which the facial vein communicates with the ophthalmic.

Ophthal'mica. Emphrasia officinalis.

Ophthal'mici exter'ni. Motores oculorum muscle.

Ophthalmid'ium. Smallness of an eye or of the eyes.

Ophthalmine, of-thal'meen. A term proposed by Dr. William Farr for the specific principle by which ophthalmia is propagated.

Ophthalmit'ic. Pertaining to ophthalmitis.

Ophthalmi'tis. Ophthalmia. Latterly restricted to inflammation of the globe of the eye, in which both the external and internal structures are involved; see *Panophthalmitis*. By some it is restricted to sympathetic ophthalmia.

Ophthal'mium. Smallness of an eye or of the eyes.

Ophthal'mo (*ophthalmos*, eye). In composition, eye.

Ophthalmobiotic, of-thal-mo-be-ot'ik. Relating to the development and physiology of the eye.

Ophthalmoblennorrhœa. Ophthalmia (purulent).

O. neonato'rum, see *Ophthalmia*.

Ophthalmobrachytes, of-thal-mo-brak'it-ees (*ophthalmos*, *brachutes*, shortness). Condition in which the eye axis is short.

Ophthalmocace, of-thal-mok'as-e. Gangrene of the eye.

Ophthalmocarcinoma, of-thal-mo-car-sin-o'mah. Cancer of the eye.

Ophthalmocele, of-thal-mo-se'le (Eng. of-thal'mo-seel) (*ophthalmos*, *kele*, tumor). Exophthalmia.

Ophthalmocentesis, of-thal-mo-sen-ta'sis (*ophthal-*

mos, kentesis, piercing). Paracentesis or puncture of the eyeball.

Ophthalmocholosis, of-thal-mo-kol-o'sis (*ophthalmos, chole,* bile). Ophthalmia from biliary derangement (?).

Ophthalmochroites, of-thal-mo-kro'it-ees (*ophthalmos, chroizo,* to color). See *Choroidea tunica.*

Ophthalmoconjunctivi'tis. See *Ophthalmia.*

Ophthalmocopia, of-thal-mo-kop'e-ah (*ophthalmos, kopos,* fatigue). Fatigue of vision.

Ophthalmodesmitis, of-thal-mo-dez-me'tis. See *Ophthalmia.*

Ophthalmodesmoxerosis, of-thal-mo-des-mo-zer-o'sis (*ophthalmos, desmos,* band, *xeros,* dry). Xerophthalmia; condition in which the conjunctiva is very dry.

Ophthalmodes'mum (*ophthalmos, desmos,* band). Conjunctiva tunica.

Ophthalmoduli'a (*ophthalmos, doulia,* servitude). Eye-service.

Ophthalmodynamometer, of-thal-mo-di-nam-om'e-tur (*ophthalmos, dunamis,* power, *metron,* measure). Instrument for measuring the power of convergence.

Ophthalmodynia, of-thal-mo-din'e-ah (*ophthalmos, odune,* pain). Pain, and especially rheumatic pain, of the eye. Plenck has given this name to neuralgia of the frontal nerve, in which the pain radiates particularly toward the bottom of the orbit. See *Neuralgia, frontal.* **O. period'ica,** facial neuralgia.

Ophthalmœdema, of-thal-me-de'mah (*ophthalmos, oidema,* œdema). Œdema of the conjunctiva.

Ophthalmography, of-thal-mog'raf-e (*ophthalmos, graphe,* description). An anatomical description of the eye.

Ophthalmohydrorrhœa, of-thal-mo-hid-ror-rhe'ah. Watery discharge from the eyes.

Ophthal'molith (*ophthalmos, lithos,* stone). Calculus of the eye.

Ophthalmol'ogist. One who devotes special attention to the eye and its care and treatment.

Ophthalmol'ogy (*ophthalmos, logos,* discourse). Science of affections of the eye and their treatment.

Ophthalmolyma, of-thal-mo-le'mah (*ophthalmos, lume,* destruction). Condition in which the eyeball has deteriorated or is destroyed.

Ophthalmomacrosis, of-thal-mo-mak-ro'sis (*ophthalmos, makros,* large). Enlargement of the eyeball.

Ophthalmomalacia, of-thal-mo-mal-ah'se-ah (*ophthalmos, malakia,* softness). Morbid softness of tissues and globe of the eye.

Ophthalmomelano'ma or **Ophthalmomelano'sis.** Melanoma of the eyeball.

Ophthalmom'eter (*ophthalmos, metron,* measure). Instrument for measuring the eye, more particularly the radius of curvature of the cornea.

Ophthalmom'etry. Measurement of the eye, usually limited in application to radius of corneal curvature.

Ophthalmomi'croscope. A microscope devised for the purpose of appreciating exactly the condition of the cornea, crystalline lens, etc.

Ophthalmomyi'tis or **Ophthalmomyosi'tis** (*ophthalmos, mus,* muscle). Inflammation of the muscles of the eye.

Ophthalmomyotomy, of-thal-mo-me-ot'om-e (*ophthalmos, mus,* muscle, *tome,* incision). Operation of dividing the eye-muscles.

Ophthalmoncus, of-thal-mon'kus. Tumor of the eye.

Ophthalmoneuri'tis. Neuritis of the ophthalmic nerve, a branch of the fifth pair. Herpes zoster ophthalmicus is a form of ophthalmoneuritis.

Ophthalmoneuromeninx (of-thal-mo-nu-ro-men'inks) or **Ophthalmoneurymen,** of-thal-mo-nur-e'men (*ophthalmos, neuron,* nerve, *meninx* or *hymen,* membrane). Retina.

Ophthalmonosology, of-thal-mo-noze-ol'o-je (*ophthalmos, nosos,* disease, *logos,* discourse). Discourse on or description of diseases of the eye.

Ophthalmoparacentesis, of-thal-mo-par-a-sent-e'sis. Paracentesis of cornea or sclera; also incision of conjunctiva.

Ophthalmoparal'ysis. Ophthalmoplegia.

Ophthalmoperipheritis, of-thal-mo-per-if-er-e'tis (*ophthalmos, periphereia*). Inflammation of neighborhood of eye.

Ophthalmophantum, of-thal-mo-fan'tum. Mask in which eyes of animals may be inserted on which to practise ophthalmic operations.

Ophthalmophlebotomy, of-thal-mo-fleb-ot'om-e (*ophthalmos, phleps,* vein, *tome,* incision). Bleeding from the vessels of the conjunctiva.

Ophthalmophtharsis (of-thal-mo-thar'sis) or **Ophthalmophthisis,** of-thal-mo-te'sis (*ophthalmos, phtharsis, phthisis,* wasting, corruption). Destruction of the eyeball; atrophy of the eyeball.

Ophthalmophyma, of-thal-mo-fe'mah (*ophthalmos, phuma,* growth). Condition in which a tumor of the eyeball exists.

Ophthalmoplasty, of-thal'mo-plas-te (*ophthalmos, plasso,* to form). Plastic operation on the eye or in its immediate vicinity.

Ophthalmoplegia, of-thal-mo-plej'e-ah (*ophthalmos, plesso,* to strike). *Ophthalmoparalysis.* Paralysis of one or more of the muscles of the eye. **O. exter'na,** progressive paralysis of extrinsic muscles of the eyeball. **O. inter'na,** paralysis of the iris and ciliary muscle. **O. partia'lis,** ophthalmoplegia in which one or two of the muscles of the eye are involved. **O. progressi've,** form of ophthalmoplegia in which several or all of the muscles of both eyes are liable to be involved.

Ophthalmopon'ia (*ophthalmos, ponos,* suffering). Ophthalmia; neuralgia of the eye.

Ophthalmoprosopsis, of-thal-mo-pros-op'sis (*ophthalmos, prosopis,* appearance). Ability of the eye to adjust itself so as to distinguish near and far objects.

Ophthalmopto'ma or **Ophthalmoptosis,** of-thal-mop-to'sis (*ophthalmos, ptosis,* prolapse). Employed by some authors in the sense of exophthalmia, by others in that of hydrophthalmia.

Ophthalmopyorrhœa, of-thal-mo-pe-or-rhe'ah (*ophthalmos, puon,* pus, *rheo,* to flow). Purulent conjunctivitis.

Ophthalmopyra, of-thal-mop'ir-ah (*ophthalmos, pur,* fever). Conjunctivitis occurring in epidemic form.

Ophthalmorrhagia, of-thal-mor-rhaj'e-ah (*ophthalmos, rhegnumi,* to break forth). Hemorrhage from the tunica conjunctiva; more generally hemorrhage from the eye.

Ophthalmorrhexis, of-thal-mor-rhex'is (*ophthalmos, rhexis,* rupture). Rupture of the eyeball.

Ophthalmorrhœa, of-thal-mor-rhe'ah (*ophthalmos, rheo,* to flow). Discharge from the eyeball, especially oozing of bloody fluid. **O. exter'na,** extravasation of blood beneath the eyelids. **O. inter'na,** extravasation within the eyeball.

Ophthal'mos. Eye.

Ophthal'moscope (*ophthalmos, skopeo,* to see). Instrument invented by Helmholtz, in 1851, for examining the interior of the eye, consisting essentially of a mirror with a hole in it, through which the observer looks at the artificially illuminated fundus. An *auto-ophthalmoscope* is so constructed that the observer may examine details of his own eye-ground. *Refraction O.* is used in testing the degree of ametropia; especially fitted with lenses, revolving in front of the observer's eye, by which the ametropia, whether on the part of observer or of observed, is neutralized.

Ophthalmoscop'ia or **Ophthal'moscopy** (*ophthalmos, skopeo,* to regard attentively). Examination of the eye by means of an ophthalmoscope.

Ophthalmoscop'ic. Relating to ophthalmoscopy.

Ophthalmoscoptometer, of-thal-mo-skop-tom'e-tur. Arrangement of ophthalmoscope for determining amount of refraction of the eye.

Ophthalmospasmus, of-thal-mo-spaz'mus (*ophthalmos, spasmos,* spasm). Ocular spasm.

Ophthalmospintherism, of-thal-mo-spinth'er-izm (*ophthalmos, spinther,* spark). Ocular condition in which shining spots or sparks seem to appear before the eyes.

Ophthalmostasis, of-thal-mos'tas-is. See *Ophthalmostatum.*

Ophthal'mostat or **Ophthalmosta'tum** (*ophthalmos, stasis,* station). Instrument for fixing the eye, rendering it immovable during operation. The action of fixing the eye is termed *Ophthalmostasis.*

Ophthalmostatometer, of-thal-mo-stat-om'et-ur (*ophthalmos, histemi, metron,* measure). Apparatus for measuring the position of the eyes.

Ophthalmostatom'etry. Measurement of position of the eyes.

Ophthalmosteresis, of-thal-mo-ster-a'sis (*ophthalmos, steresis,* loss). Deprivation or absence of the eye.

Ophthalmosynchysis, of-thal-mo-sin'kis-is (*ophthalmos, sunchusis,* a mixing). Condition in which an effusion into interior of the eye exists.

Ophthalmotherapeutics, of-thal-mo-ther-ap-u'tiks (*ophthalmos, therapeia,* medical treatment). Treatment of diseases of the eye.

Ophthalmotherapi'a (*ophthalmo, therapeia,* treatment). Treatment of diseases of the eye.

Ophthalmot'omy (*ophthalmos, tome,* section). Dissection of, cutting into, or extirpation of the eye.

Ophthalmotonometer, of-thal-mo-to-nom'e-tur (*ophthalmos, tonos,* tension). Instrument for determining tension of the eyeball.

Ophthalmotonom'etry. Measurement of tension of the eyeball.

Ophthal'motrope (*ophthalmos, trepo,* to turn). A movable ball, attached to which are elastic cords representing the various muscles of the eyeball, for demonstrating different movements of the eyes.

Ophthalmotropometer, of-thal-mo-tro-pom'e-ter. Instrument for measuring movements of the eyeballs. This procedure is termed *Ophthalmotropometry.*

Ophthalmotyphus, of-thal-mo-ti'fus. Contagious ophthalmia occurring in epidemic form.

Ophthalmoxero'sis (*ophthalmos, xerosis,* dryness). Xerophthalmia; dryness of conjunctiva. Also termed *Ophthalmoxenosis.*

Ophthalmoxysis, of-thal-mox'is-is (*ophthalmos, xuo,* to scrape). Scarification of the conjunctiva in cases of ophthalmia.

Ophthalmoxystrum (of-thal-mox-is'trum) or **Ophthalmoxys'ter.** Instrument for scraping the eye. Name given to a small brush, with barbs like an ear of barley or rye, intended to scarify the eyelids in certain cases of ophthalmia.

Ophthalmozo'a (*ophthalmos, zoon,* animal). Entozoa or parasites in the globe of the eye and its appendages.

Ophthalmozygomatogramma, of-thal-mo-ze-go-mat-o-gram'mah (*ophthalmos, zugoma, gramma,* mark). Line extending from the eye to the zygoma.

Ophthalmula, of-thal'mu-lah. Cicatrix of the eye.

Ophthal'mus. Eye.

Ophthalmydrorrhœa, of-thal-mid-ror-rhe'ah (*ophthalmos, hudor,* water, *rheo,* to flow). Watery flux from the eyes.

Ophthalmymenitis, of-thal-mim-en-e'tis (*ophthalmos, humen,* membrane). *Ophthalmohymenitis.* Inflammation of one or more membranes of the eye; conjunctivitis.

Opia'cum. Opiatum.

O'piane. Narcotine.

Opian'ic acid. Oxidation product from narcotine; bitter, prismatic crystals, soluble in boiling water, alcohol, and ether.

O'pianine. *Opianina, Opiana.* Alkaloid discovered in opium, resembling morphia in its properties and doses; insoluble in water, sparingly so in alcohol.

Opia'num. Narcotine.

O'piate (*opion,* juice, opium). Medicine containing opium; a medicine that procures sleep; an electuary. Formerly *Opiat* was an electuary which contained opium.

O'piated. Impregnated with opium or laudanum. Affected by opium or laudanum.

Opia'tum. Opiate. **O. cum copa'hu compos'itum,** electuary of copaiba. **O. febrif'ugum,** *Electuary of cinchona* (pulv. cinch., ℥xviij; ammon. muriat., ℥j; mellis, syrup. absinth., āā ℥ij; make into an electuary; Ph. P.); given when cinchona is indicated. **O. mesenter'icum** (gum ammon., ℥ss; sennæ, ℥vj; hydrargyri submuriat., rad. ari., aloës socotrin., āā ℥ij; pulv. scammon. comp. (vulg. de tribus), rhei rad., āā ℥iij; ferri limatur. porphyrisat., ℥ss; bruise and mix together, add of compound syrup of apples double the weight of the other matters, and make into an electuary; Ph. P.); dose, ℥ss to ℥ij, in obstructions of the liver, mesentery, etc.

Opia'tus. Opiated.

Opifex (op'e-feks) **circumductio'nis.** Obliquus acutus superior. See *Oblique muscles of the eye.*

O'pii pul'vis (Ph. U. S.). Powdered opium; opium dried at a temperature not exceeding 185° F., and reduced to a moderately fine powder.

Opiokapnism, o-pe-o-kap'nizm (*opion,* opium, *kapnos,* smoke). Opium-smoking habit.

Opiologia, o-pe-o-loj'e-ah. Treatise on or description of opium.

O'pion (*opion,* juice). Opium.

Opionin (o'pe-on-in). Product derived from opium, occurring in colorless crystals, readily soluble in alcohol and ether, nearly insoluble in boiling water.

Opiophagism, o-pe-of'aj-izm (*opion,* opium, *phago,* to eat). Opium-eating habit.

O'piophil, Opioph'iler, Opioph'ilus (*opium, phileo,* to love). A lover of opium. There was in Paris a club of opium-smokers who called themselves *Opiophiles.*

Opis'ma. Juice.

Opisthantrus, op-is-than'trus (*opistho, antron,* cavern). Applied to skulls in which a vertical let fall upon the radius fixus from the most projecting point of torus frontalis falls behind that drawn from nasion by from 1 to 6 mm. (Lissauer).

Opis'thenar (*opistho, thenar,* the palm of the hand). Back of the hand.

Opis'thion. Point where median line meets posterior border of foramen magnum (Broca). The lambda or posterior end of the sagittal suture (Lissauer).

Opis'tho (*opisthe,* behind, backward). In composition, behind, backward.

Opisthobreg'mus (*opistho, bregma,* top of head). Applied to skulls in which line drawn from hormion to bregma makes, with radius fixus, an angle of from 55.5° to 68° (Lissauer).

Opisthochasmus, op-is-tho-kaz'mus. Applied to skulls in which line forming staphylion and basion looks forward when referred to radius fixus as a horizontal, making with it an angle of from 13° to 26°.

Opisthocephalon, op-is-tho-sef'al-on (*opistho, kephale,* the head). Occiput.

Opisthocœlus, op-is-tho-se'lus (*opisthe,* behind, *koilos,* hollow). Having concavity posteriorly and convex anteriorly. Applied to the middle of a vertebra.

Opisthocranium, op-is-tho-kran'e-um (*opistho, kranion,* skull). Occiput.

Opisthocyphosis, op-is-tho-sif-o'sis (*opistho, cyphosis*). Cyphoma. Backward curvature of spine, convexity being forward.

Opisthogas'tric (*opistho, gaster,* stomach). Behind the stomach.

Opisthognathism, op-isth-og'nath-izm (*opisthe,* behind, *gnathos,* jaw). State of being opisthognathous or having teeth that slope backward.

Opisthognathous, op-is-thog-na'thus (*opistho, gnathos,* mouth). Having teeth that slope backward.

Opistholo'bium or **Opistho'tium** (*opistho, lobion,* lobe of the ear). Any agent applied behind the ear.

Opisthomeloph'orus, op-is-tho-mel-oph'o-rus (*opistho, melos,* limb, *phero,* to bear). Monster with superfluous flesh on the back.

Opisthophalacro'sis (*opistho, phalakros,* bald). Baldness of the occipital region.

Opisthopo'ria (*opistho, poreuo,* to walk). Involuntary going backward in attempting to walk.

Opisthosynechia, op-is-tho-sin-ek-e'ah (*opistho, sunecheia*). Posterior synechia.

Opisthotenar, op-is-thot'en-ar (*opistho, teino,* to stretch). See *Erector spinæ.*

Opistho'tic. Behind the ear. **O. bone,** posterior part of petrous portion of temporal bone. **O. cen'tre,** separate ossific centre for temporal bone, forming part of petrosal seen at base of skull (Huxley).

Opistho'tium (*opistho, ous, otos,* ear). Opistholobium.

Opisthot'onus (*opistho, teino,* to stretch). Species of tetanus in which the body is bent backward. **O., hyster'ical,** see *Crucifixion attitude.*

O'pium (*opion,* juice). Concrete, milky exudate obtained in Asia Minor by incising unripe capsules of *Papaver somniferum* (Ph. U. S. and Br.). In normal moist condition it should contain not less than 9 per cent. of morphine. The principal commercial varieties are from Turkey, Smyrna, or Constantinople; the Egyptian, Persian, Indian, Mozambique or Zambesi, and European. A large number of alkaloids and other substances have been derived from opium, in addition to water, resin, fatty matter, gum, extractive matter, etc.: morphine, narcotine, codeine, thebaine or paromorphine, meconine, papaverine, narceine, hydrocotarnine, pseudomorphine, protopine, laudanine, codamine, rhœadine, meconidine, cryptopine, meconoiosin, opianine, metamorphine, laudanosine, lanthopine, and gnoscopine; two neutral principles, meconin and meconosin; thebolactic acid, and a peculiar acid called meconic. Opium is a stimulant in small doses; in larger doses a sedative narcotic, acting almost exclusively on the central nervous system; locally it is anodyne; a powerful narcotic poison; its effects are characterized especially by contraction of the pupils. Two grains have proved fatal. Children are particularly susceptible. Morphia and meconic acid (q. v.) are of especial medico-legal importance. It is a valuable drug to allay many forms of irritation or inflammation and to produce sleep. Dose, gr. ¼–j, according to the effect desired. See *Papaver;* also *Constantinople, Denarcotized, Egyptian, India, Malva, Mozambique, Persian, Smyrna,* and *Turkey opium;* and *Poisons* (table).

The important constituents may be tabulated as follows, so as to exhibit their chemical composition and characteristics (after J. Mitchell Bruce):

	Parts in 100 parts.	Constitution.	Reaction.	Characters.
1. Morphine	5 to 12	$C_{17}H_{19}NO_3$	Alkaline.	White needles.
2. Codeine	up to 0.6	$C_{18}H_{21}NO_3$	Alkaline.	Nearly colorless octahedra.
3. Thebaine or Paramorphine.	up to 0.3	$C_{19}H_{21}NO_3$	Alkaline.	White plates, with acrid styptic taste.
4. Opianine	0.5 to 1	$C_{23}H_{25}NO_5$	Alkaline.	
5. Cryptopine				
6. Metamorphine				
7. Papaverine				
8. Narcotine	4 to 6	$C_{20}H_{21}NO_4$	Alkaline.	White needles.
9. Narcein	up to 0.02	$C_{23}H_{23}NO_7$	Alkaline.	Shining prisms; tasteless, odorless.
10. Porphyroxin		$C_{23}H_{29}NO_9$	Neutral.	Fine white needles; odorless, bitter.
11. Laudanin				
12. Meconin	0.08 to 0.3	$C_{20}H_{20}NO_4$	Neutral.	White needles; odorless, acrid.
13. Meconic acid	4 to 8	$C_{10}H_{10}O_4$	Acid.	Nearly colorless micaceous crystals.
14. Theobolactic acid		$C_7H_4O_7$	Acid.	
		Lactic acid.		

O. cru'dum, commercial opium. **O. denarcotiza'tum** (Ph. U. S.), denarcotized opium. **O. depura'tum,** O. extract of some pharmacopœias. **O. ex'tract, a'queous,** contains glycerin. **O. et glycyrrhi'zæ trochisci,** each contains gr. $\frac{1}{20}$ of opium. **O. hab'it,** habitual use of morphia or opium as a stimulant; such users are termed *opium habitués.* **O. et ipecacuan'hæ,** Dover's powder. **O. and ip'ecac. tinc'ture,** liquid Dover's powder. **O. pill,** gr. j each. **O. tinc'ture,** laudanum. **O. tinc'ture, cam'phorated,** paregoric. **O. tinc'ture, compound,** Squibb's diarrhœa mixture. **O. tinc'ture, deo'dorated,** McMunn's elixir. **O., wine of,** vinum opii.

Opobal'samum (*opos,* juice, *balsamon,* balsam). See *Amyris opobalsamum.*

Opocar'pason, Carpasium (juice).

Opocephalous, op-o-sef'al-us (*ops,* the face, *kephale,* head). Monster having two ears approximated or united under the head, the jaws atrophied, and no mouth or nose. Synotus.

Opodel'doc, Opodel'doch, or **Opodel'toch.** A soft solid composition resembling in its properties extractum saponis (Ph. U. S. and Br.). Formerly a plaster for all external injuries, and generically, like *Saponula,* union of soap with volatile oils. See *Liquid opodeldoc* and *Linimentum saponis compositum.*

Opodeocele, op-o-de-o-se'le (Eng. op-o'de-o-seel) (*ope,* foramen, *eidos,* resemblance, *kele,* a rupture). Subpubic or obturator hernia.

Opodid'ymus or **Opod'ymus** (*ops,* eye, *didumos,* double). Diprosopus.

Opoï'dia galbanif'era (*opodes,* juicy). See *Bubon galbanum.*

Opopana'cum. Pastinaca opopanax.

Opop'anax. Gum resin formerly esteemed as antispasmodic and emmenagogue. See *Pastinaca opopanax.* **O. chiro'nium,** Pastinaca opopanax.

Opop'anaxwort. Pastinaca opopanax.

Opo'pios. Optic.

Opo'ra. See *Autumn.*

Opo'rice. Medicine of autumnal fruits and wine; given in dysentery, diseases of the stomach, etc.

O'pos. Expressed juice. **O. sil'phion,** laserpitium.

Opos'sum tree. Sweet gum. See *Liquidambar.*

Opotomocatheter, op-ot-om-o-kath'et-ur (*ope,* opening, *tome,* incision, *catheter*). Catheter of elastic material provided with a stylet.

Oppid'ulum (a little town). Vulva.

Oppila'tio (*oppilo,* to shut up). Obstruction, as of a canal or cavity. **O. te'læ cellulo'sæ,** induration of the cellular tissue.

Oppila'tion. Obstruction; constipation.

Oppilative, op'pil-a-tiv. Closing an orifice, as of a duct or vessel.

Oppo'nens (*ob, pono,* to place). That which faces or is put in opposition to something. **O. hallu'cis,** supernumerary muscle associated with adductor hallucis, but inserted into first metatarsal bone. **O. min'imi dig'iti,** situate in the hypothenar eminence; fibres are inserted into anterior annular ligament of carpus, and terminate on whole inner edge of fifth metacarpal. It carries the fifth metacarpal forward and outward, and thus augments the concavity of the palm. **O. min'imi dig'iti pe'dis,** supernumerary muscle associated with flexor brevis minimi digiti pedis, but inserted separately into fifth metatarsal. **O. pol'licis,** small, flat, triangular muscle, situate in the thenar eminence; attached to anterior annular ligament of carpus and to trapezium, and to whole outer margin of first metacarpal. It rotates the first bone of the metacarpus, opposing the thumb to the fingers.

Opposi'tion. Angular motion.

Oppres'sio (*opprimo, oppressum,* to press against). Catalepsy; oppression. **O. noctur'na,** incubus.

Oppres'sion. Sensation of weight in the part affected, as the stomach, chest, etc. When employed abstractly, it means, particularly, oppression of the chest. Condition, at commencement of fevers, etc., in which the system is oppressed rather than debilitated, and where the vascular action rises as the obstruction to free circulation is relieved.

Ops. Eye.

Opseonusi, op-se-on-u'se. Diseases of vision.

Opsialgia, op-se-al'je-ah (*opsis,* countenance, *algos,* pain). Facial neuralgia.

Opsig'onus (dens) (*opsigonos*, born late). Wisdom tooth; see *Dentition.*

Opsiodontes, op-se-o-don'tees (pl. of **Opsiodons**). Eye teeth.

Opsiodous, op'se-o-dus (*opse*, late, *odous*, tooth). See *Dentition.*

Opsiom'eter (*opsis*, vision, *metron*, measure). Instrument for measuring the distance of distinct vision.

Opsionu'si (*opsis*, vision, *nousos*, disease). Diseases of vision.

Opsiotoc'ia (*opse*, late, *tokos*, birth). Parturition after the usual period. See *Pregnancy.*

Op'sis (countenance). Pupil; vision.

Opsomania, op-so-man'e-ah (*opson*, aliment, *mania*). Morbid daintiness as to food.

Opsomaniac, op-so-ma'ne-ak (*opson*, aliment). One who loves some peculiar aliment to madness.

Optactin, opt-act'in (*optomai*, to see). Axis of vision.

Opte'sis (roasting or broiling). Preparation of food or medicines in their own juice, without the addition of any liquid. Cooking by heat.

Op'tic or **Op'tical** (*optomai*, to see). Relating to vision or to the eye. **O. an'gle,** see *Visual angles.* **O. arteries,** small branches supplying optic thalamus: external, from striate arteries; inferior, twigs from posterior cerebral, passing through posterior perforated space. **O. at'rophy,** atrophy of optic nerve. **O. cen'tre** of crystalline, point at which various rays proceeding from an object cross on their way to the retina; see *Optical centre.* **O. chi'asm** or **com'missure,** junction and decussation of the optic nerves at base of brain upon body of sphenoid. **O. cup,** formed by involution of distal extremity of primary optic vesicle. **O. disk,** nearly circular pinkish area at back of retina where optic nerve pierces it and expands to form its inner layer. **O. fora'men,** a round opening in the sphenoid bone, near the base of its lesser ala, through which the optic nerve passes. **O. gan'glia,** quadrigemina corpora. **O. gan'glion,** basal collection of cells in tuber cinereum, near optic tract, with which it is said to communicate. **O. groove,** transverse groove on the superior surface of the sphenoid, in front of olivary eminence, on which the optic commissure rests; continuous on each side with the optic foramen. **O. lobes,** quadrigemina corpora. **O. nerve,** *Nerve of the second pair, Ocular nerve.* The optic nerves are remarkable for their size, for their running a longer course within than without the cranium, and for their furnishing no branch from their origin to their termination. It arises through the optic tract from the optic thalami and corpora quadrigemina. The fibres are believed to be traceable to occipital lobe of cerebrum and upper portion of cord. Immediately after their origin the optic tracts proceed forward; at first broad and flat, but afterward narrower and round. In front of the fossa pituitaria they unite and decussate, each nerve proceeding through the optic foramen of the sphenoid bone with the ophthalmic artery, and through the foramen opticum choroïdeæ to form the retina. The nerve passes to the back part of the globe of the eye, becomes narrower, and enters that organ at a flattened circular papilla—the optic papilla—to give rise to the nervous expansion called the retina. The circle which surrounds the point of entrance, and which, seen by the ophthalmoscope, is of a lighter hue than the rest of the retina, is called the *optic disk,* but the term is usually employed synonymously with *optic papilla.* See *Optic papilla.* Between the colliculus and the yellow spot of Sömmering a small projection or fold of the retina passes—plica centralis retinæ. Besides its neurilemma, the optic nerve is surrounded by a sheath, furnished by the dura mater. This accompanies it as far as the eye. It is the nerve of special sensibility of the eye. In the centre of the nerve there is a *punctum cæcum, macula,* where the central artery enters the eye and the corresponding vein passes out. If a ray of light falls on this spot it is not appreciated. **O. neuri'tis,** papillitis. **O. neurot'omy,** division of optic nerve. **O. papil'la,** *Optic disk, Papilla of the optic nerve.* A yellowish-white spot situate about one-tenth of an inch internal to the antero-posterior axis of the eye, through which the optic nerve enters that organ, the central artery and vein of the retina being either at or near the middle of this spot. Its color, which varies in different individuals, is due to the reflected light from the vessels, nerve-tubercles, etc. which compose the papilla. The optic disk may become excavated, as in glaucoma—the glaucomatous cup—or as a result of congenital malformation, or from atrophy and retraction of the optic nerve. The papilla is also liable to venous congestion, ischæmia, hyperæmia of its capillaries, apoplexy, inflammation, atrophy, anæmia, etc. **O. radia'tions,** portion of corona radiata of optic thalamus passing to occipital lobes. **O. thal'amus,** one of the principal collections of gray matter at base of brain; appears on either side of third ventricle as a club-shaped mass, bent from before backward, and continuous from behind downward and forward with the optic tract; see *Tract.* **O. tu'bercles,** corpora quadrigemina.

Op'tical. Optic. **O. ax'is,** line passing through centre of cornea and posterior pole of eye. **O. cen'tre,** point situate on principal axis of an optical system characterized by the property that every incident ray which, after refraction by first surface, passes through it, emerges in a parallel direction after refraction by second surface.

Op'tici. Anterior pair of corpora quadrigemina.

Optician, op-tish''n. Maker of optical instruments.

Opticist, op'ti-sist. One skilled in the theory and practice of optics.

Opticociliary, op-tik-o-sil'e-ar-e. Relating to optic and ciliary nerves. **O. neurot'omy,** division of the nerves, leaving the globe intact.

Opticocinerea, op-tik-o-sin-e're-ah (*opticus, cinereus*, resembling ashes). Gray matter of optic tract.

Optics, physiolog'ical. Part of optical science treating of optical properties of the eye, comprehending various phenomena of vision, color-perception, single vision with two eyes, visual field, etc.

Op'ticus ellip'soid. Strongly refracting ellipsoidal body found in basal portion of retinal cones.

Op'ticum. Ophthalmic remedy.

Op'ticus. Optic; optic nerve.

Op'tilos. Eye.

Op'togram (*optomai*, to see, *gramma*, drawing). Image formed on the retina by action of light on retinal purple.

Optograph, op'to-graf (*optos*, visible, *grapho*, to write). Optogram reproduced in a photograph.

Optography, op-tog'ra-fe (*optomai*, to see, *grapho*, to write). Fixation of images on the retina.

Optomeninx, op-to-men'inks (*optos*, visible, *meninx*, membrane). Retina.

Optom'eter (*optomai*, to see, *metron*, measure). Instrument for measuring the distance of distinct vision.

Optoscope, op'to-skope (*optomai*, to see, *skopeo*, to observe). Instrument for testing alleged unilateral amblyopia.

Optotypi, op-to-ti'pe. Test letters for determining visual acuteness.

Opun'tia (*Opus*, town of Locris). Cactus opuntia. **O. cochinillif'era,** cultivated in Mexico and Central America as food for cochineal insects. **O. vulga'ris,** Cactus opuntia; prickly pear; native of tropical and subtropical America; fruit edible, leaves mucilaginous and demulcent; powdered, an excellent material for poultices.

O'pus mag'num. See *Alchemy.*

O'ra. An edge or seam (pl. of **Os**, mouth). **O., dog's,** Chenopodium vulvaria. **O. fenes'tra ova'lis,** slight raised process surrounding oval window. **O. serra'ta** (serrated edge), wavy edge indicating sensitive nerve portion of the retina a little behind the outer edge of the ciliary processes.

Or'ache, spread'ing. Atriplex patula. **O., stink'ing,** Chenopodium vulvaria.

O'ral (*os, oris*, mouth). *Vocal.* Relating to the mouth or to speech. **O., whiff,** Drummond's whiff.

Intermittent sound on expiration, supposed to be a symptom of intrathoracic aneurism.

Or'ange (*aurum*, gold, the color of the fruit). Fruit of several species of *Citrus*, ord. Aurantiaceæ; see also *Bitter*, *Portugal*, *Seville*, and *Sweet orange*. **O. ber'ries**, small, unripe fruit of bitter orange, *Citrus vulgaris;* the volatile oil obtained by aqueous distillation is called *essence de petit grain*. **O. flow'ers**, partially expanded, fresh flowers of *Citrus vulgaris* and *C. aurantium.;* in infusion, a gentle nerve stimulant. **O. flower water**, aqueous distillate of fresh flowers; a fragrant vehicle for other medicines. **O. juice**, expressed from sweet orange; agreeable beverage, used in febrile and scorbutic affections. **O. peel**, see *Bitter-orange peel*. **O. wine**, made in Britain by fermentation of saccharine solution to which has been added fresh peel of bitter orange (Br. Ph.); used for flavoring and as an excipient.

Orangeade, or-anj-ade'. A drink made with orange-juice diluted with water, often recommended in acute diseases.

Or'ange-grass. *Hypericum sarothra.* The tops are used for the same purpose as St. John's wort.

Or'ange-root. Golden seal. See *Hydrastis Canadensis.*

Or'bes cartilagino'si trache'æ (*orbis*, circle). See *Trachea.*

Orbic'ular (*orbis*, circle). Spherical; circular. See *Orbicularis.* **O. bone**, the smallest of the four bones of the ear; scarcely perceptible, round, convex on two surfaces, and situate between the long ramus of the incus and the head of the stapes. **O. lig'ament**, annular ligament of radius.

Orbicularis, or-bik-u-lar'is. Orbicular. The O. palpebrarum. **O. a'ni**, sphincter ani externus. **O. exter'nus**, orbicular part of O. palpebrarum. **O. inter'nus**, palpebral part of same. **O. la'tus**, orbital part of same. **O. mala'ris**, malaris. **O. oc'uli**, orbicularis palpebrarum; according to Henle, O. palpebrarum, corrugator supercilii, and tensor tarsi, all taken as one muscle. **O. or'bital** or **orbita'lis**, orbital part of O. palpebrarum. **O. o'ris**, muscle situate in the substance of the lips, and extending from one commissure to the other; formed of two very distinct portions, of a semi-oval shape; one belonging to the upper lip, the other to the lower. Their extremities cross at the commissures, and are confounded with the other muscles of the parts; bring the lips together and close the aperture of the mouth by making it represent a sort of *bourrelet* with radiated wrinkles. An antagonist to every other muscle of the lips. **O. palpebra'rum**, sphincter muscle of eyelids. It consists of a palpebral portion, thin and pale, situate upon the lids, and an orbital portion, surrounding the orbit, arising from the internal tarsal ligament and adjacent portions of frontal and superior maxillary bones; a slip arises from the lacrymal crest; see *Tensor tarsi*. **O. p., infe'rior** and **supe'rior**, orbital part of O. palpebrarum.

Orbiculostapedial, or-bik-u-lo-stap-e'de-al. Relating to the orbicular process of incus and to the stapes.

Orbic'ulus (*orbis*, circle). Small circle or disk. **O. capsulocilia'ris**, zonule of Zinn; see *Ciliary zone*. **O. cilia'ris**, region of choroid coat of eye, between ora serrata and ciliary processes. **O. ganglio'sus**, deeper, softer layer of ciliary body of choroid, containing many nerves. **O. ligamento'sus**, external stronger layer of same.

Or'bis ge'nu. Patella.

Or'bit (*orbis*, circle). *Eye-socket.* The circular cavities are so called which lodge the organs of sight; situate at the upper part of the face, and composed of seven bones—viz. the frontal, above; the palate and superior maxillary, below; the sphenoid and malar, externally; the ethmoid and lacrymal, internally. The orbit is filled by the globe of the eye, with its different accessory parts—muscles, nerves, vessels, the lacrymal gland, etc. Its margin is termed *Margo orbitalis.*

Or'bita. Orbit. **O. oc'uli**, orbit.

Or'bital or **Or'bitar.** Relating to or belonging to the orbit. **O. an'gle**, biorbital angle. **O. apoph'yses** or **pro'cesses** terminate the two extremities of the orbital arch. The external is much more prominent, and is articulated with the cheek-bone; the internal is thinner, and joins the os unguis. **O. arch**, the projecting round margin separating the frontal and orbital surfaces of the os frontis, and forming a part of the circumference of the orbit. **O. ar'tery**, branch of middle temporal, running above the zygoma to the external angle of the eye. **O. canals, inter'nal**, ethmoidal foramina. **O. convolu'tions**, situate on orbital surface of frontal lobe of brain; usually considered as continuation of frontal convolutions, and distinguished as *inner* (straight, medial, gyrus rectus), *middle* (intermediate), *external* (lateral). Since the last two are frequently cut by a cross-furrow, the portions in front and behind are sometimes called *anterior* and *posterior* orbital convolutions. A *pre-Sylvian* or *transverse* convolution sometimes runs in front of the Sylvian fissure. **O. fas'cia**, capsule of Tenon; sheaths of ocular muscles with their dependencies and the palpebral fascia. **O. fis'sures**, situate in the orbit, two in number: one superior, the sphenoidal; the other inferior, the sphenomaxillary. **O. foram'ina**, there are several: 1. Foramen orbitarium superius, situate at the junction of the inner third of the orbital arch with its two outer thirds, and giving passage to the frontal nerve; 2. Foramina orbitaria interiora, situate at the upper part of the internal paries of the orbit, formed by the union of the two notches of the os frontis with two similar ones of the ethmoid, and distinguished into anterior and posterior. The former gives passage to the ethmoidal filament of the nasal nerve and to a small artery. **O. fos'sa**, excavation in orbital plate of frontal bone, forming upper part of frontal cavity. **O. frontoma'lar diam'eter**, distance between opposite external orbital points. **O. in'dex**, in craniometry, ratio of vertical height of the orbit to its transverse width, taken as 100. **O. nerve**, a branch of the superior maxillary. It enters the orbit by the sphenomaxillary fissure, and divides into two filaments: malar, which passes over the cheek-bone, distributed to the orbicularis palpebrarum, and anastomosing with the facial nerve; temporal, which passes to the temporal fossæ, and anastomoses with the inferior maxillary and facial, to become afterward subcutaneous. **O. plane**, Broca, visual plane of. **O. plate**, thin bony partition, part of ethmoid, contributing to inner wall of orbit; also part of frontal bone roofing the orbit. **O. point**, lowest point of inferior border of orbit. **O. point, external**, point at which outer edge of orbit meets frontozygomatic suture. **O. pro'cess**, pyramidal portion of palate-bone contributing, by one of its surfaces, to form the orbit; also orbital portion of malar bone. **O. sul'ci**, furrows on orbital surface of frontal lobe of brain. Three are usually described: *medial* or *internal* o., usually called *Olfactory sulcus;* *intermediate* o., beginning behind at side of olfactory tubercle, running forward with a slight outward convexity; *lateral* or *external* o., commencing a little to median side of Sylvian fissure, running forward with slight convexity inward. The last two are connected by a cross furrow. See also *Triradiate sulcus.* **O. sur'face**, part of superior maxilla forming floor of orbit. **O. vein** gathers blood from the eyelids, accompanies O. artery, and discharges into middle temporal.

Orbita'lis. Orbital; used substantially for orbital portion of orbicularis palpebrarum.

Or'bito-alve'olo-con'dylar angle. Angle between orbital axis and alveolocondylar plane.

Orbitobas'ilar angle. Angle between lower border of inferior maxilla produced and orbital axis.

Orbitocele (or-bit-o-se'le (Eng. or'bit-o-seel). Exophthalmus.

Orbitoma'lar in'dex. Ratio of superior facial and bizygomatic diameters of skull, the latter being taken as 100.

Or'bito-occip'ital angle. In craniometry expresses inclination of plane of foramen magnum to axis of vision.

Orbito-ocular, or'bit-o-ok'u-lar. Relating to the orbit and the eye.

Orbitopalpebra'lis. Middle sheet of expansion by which levator palpebræ is inserted, composed of smooth muscular fibres.

Orbitosphenoid, or-bit-o-sfe'noid. One of lesser wings of sphenoid considered as a separate ossific integer; it constitutes a separate bone in many animals.

Orchalgia, or-kal'je-ah (*orchis,* testicle, *algos,* pain). Pain in the testicle. See *Orchidalgia.*

Or'chanet. Anchusa tinctoria.

Or'chea. Scrotum.

Orchei'tis (*orchea,* scrotum), **Oschi'tis,** or **Oscheitis,** os-ke-e'tis. Inflammation of the scrotum; also hernia humoralis.

Orchella, ork-el'lah. See *Orchilla weed.*

Orchellin, ork-el'lin. Coloring matter of purple; red color derived from Roccella tinctoria.

Orchemphraxis, ork-em-fraks'is. Obstruction of the vessels of the testicles.

Orcheocatab'asis. Descent of testes into scrotum.

Orcheocele, or-ke-o-se'le (Eng. or'ke-o-seel). Orchiocele.

Orcheœdemosarcoma, ork-e-e-de-mo-sar-ko'mah. Elephantiasis of the scrotum.

Orcheoplasty, or'ke-o-plas-te (*orchis,* testicle, *plasso,* to form). Reparative surgery of the scrotum by procuring flaps of normal tissue from adjacent part.

Orcheot'omy (*orchis, tome,* incision). Castration.

Orchestroma'nia (*orchester,* dancer, *mania*). Chorea.

Orch'ic. Relating to the testicles.

Orchichore'a (*orchis, chorea*). An alternate rising or sinking of one or both of the testicles, produced by onanism.

Or'chida (*orchis,* testicle). Spirocolon.

Orchidal'gia, Orchial'gia, Orchidodyn'ia, or **Orchiodyn'ia** (*orchis,* testicle, *algos,* pain). Pain in the testicle. Neuralgia of the testicle. Irritable testicle; a form of neuralgia.

Orchidatonia, or-kid-at-o'ne-ah (*orchis,* testicle, *atonia,* want of tone). Relaxation of the testicles.

Orchidatroph'ia (*orchis, atrophia,* atrophy). Atrophy or wasting of the testicle.

Orchidauxe, or-kid-awks'e (*orchis, auxe,* growth). Pathological increase in size of testicles.

Orchidectomy, or-kid-ek'to-me (*orchis, ektome,* excision). Castration.

Orchidemphraxis, or-kid-em-fraks'is (*orchis, emphraxis,* obstruction). Condition in which the vessels of the testicles are obstructed.

Orchidencephaloma, or-kid-en-sef-al-o'mah (*orchis, enkephalos,* brain). Medullary fungus of the brain.

Orchidion, or-kid'e-on (dim. of **Orchis**). Small testicle.

Orchidi'tis (*orchis, itis*). Inflammation of the testicle; hernia humoralis.

Orchidocar'pum arieti'num (*orchis, karpos,* fruit). See *Carica papaya.*

Orchidocatab'asis or **Orcheocatab'asis** (*orchis, katabasis,* descent). The descent of the testes into the scrotum.

Orchidocele, or-kid-o-se'le (Eng. or'kid-o-seel (*orchis, kele,* tumor). Hernia humoralis. Tumor of the testicle.

Orchidodynia (*orchis, odune,* pain). Orchidalgia.

Orchidomyeloma, or-kid-o-me-el-o'mah (*orchis, muelos,* marrow, *oma*). Medullary fungus of the testicle.

Orchidoncus, or-kid-on'kus (*orchis, onkos,* swelling). Hernia humoralis.

Orchidopexia, or-kid-o-peks'e-ah (*orchis, pegnumi,* to adjust). *Orchidopexy.* Operation of fastening the testicle to adjacent part by suture.

Orchidorrhaphy, or-kid-or'haf-e (*orchis, rhaphe,* suture). Orchidopexia.

Orchidoscheocele, or-kid-os-ke-o-se'le (Eng. or-kid-os'ke-o-seel). Hernia of scrotum coexisting with hernia humoralis.

Orchidoscirrhus, or-kid-o-skir'rus. See *Orchiocele.*

Orchidospongioma, or-kid-o-spon-je-o'mah (*orchis, spongia,* sponge). Growth of testicles tuberculous in character.

Orchidot'omy (*orchis, tome,* incision). Castration.

Orchidotubercula, or-kid-o-tu-burk'u-lah. Orchidospongiomata.

Orchidotyloma, or-kid-o-til-o'mah (*orchis, tulos,* callus). Tubercle of testicles callous in character.

Orchiepididymitis, or-ke-ep-e-did-im-e'tis. Orchitis accompanied with epididymitis.

Or'chill. Deep reddish-purple semi-liquid coloring matter obtained from different species of *Roccella* and other lichens.

Orchil'la weed. Species of *Roccella* yielding orchil.

Orchiocele, or-ke-o-se'le (Eng. or'ke-o-seel) (*orchis,* testicle, *kele,* a rupture). Tumor of the testicle. Scrotal hernia. Hernia humoralis. A name given to several affections of the testicles and their coverings, essentially differing from each other. **O. scirrho'sa,** scirrhous tumor of the testis.

Orchiodyn'ia (*orchis, odune,* pain). Orchidalgia.

Orchiomyeloma, or-ke-o-me-el-o'mah. Medullary fungus of the testicle.

Orchioneuralgia, or-ke-o-nu-ral'je-ah (*orchis, neuron,* nerve, *algos,* pain). Orchidalgia.

Orchioscheocele, or-ke-os-ke-o-se'le (Eng. or-ke-os'ke-o-seel) (*orchis, osche,* scrotum, *kele,* tumor). Hernia of scrotum coexisting with orchidoncus.

Orchioscirrhus, or-ke-o-skir'rhus. Scirrhous tumor of the testicle.

Orchiostosis, or-ke-ost-o'sis (*orchis, osteon,* bone). Bony indurated condition of testicle.

Orchiotomy, or-ke-ot'o-me (*orchis, tome,* section). Castration.

Orchipeda (or-kip'ed-ah) **fœ'tida.** Javanese tree; juice is employed in some cutaneous affections.

Orchirrhaphy, ork-ir'rhaf-e (*orchis, rhaphe,* suture). Operation of fastening the testicle to adjacent part by suture.

Orchis, or'kis. Testicle. **O. bifo'lia,** see *Salep.* **O., but'terfly,** Orchis bifolia. **O. latifo'lia,** see *Salep.* **O. macula'ta,** see *Salep.* **O. mas'cula,** *Dogs' stones, Male orchis, Ballockgrass, Male Fools' Stones, Twinroot,* ord. Orchidaceæ. This root had a place in some pharmacopœias on account of the glutinous, slimy juice it contains. Root of the *Orchis bifolia* or *Butterfly orchis* has been used as a demulcent. Its fancied aphrodisiac virtues seem to be owing to its resemblance to orchis, testicle, whence its name. *Salep* is obtained from this variety of the orchis and from the Orchis morio, etc.; see *Salep.* **O. milita'ris,** see *Salep.* **O., round-leaved, large,** Platanthera orbiculata.

Orchitidocolica, or-kit-id-o-kol'ik-ah (*orchis, kolikos*). Colic due to orchitis.

Orchitis, or-ke'tis (*orchis, itis*). Inflammation of the testicle. Hernia humoralis. **O. acu'ta urethral'is,** acute orchitis following inflammation of urethra. **O. apostemato'sa,** orchitis, suppurative. **O., blennorrhag'ic,** see *Hernia humoralis.* **O. blennorrhag'ica urethra'lis,** epididymitis. **O. caseo'sa,** orchitis, tubercular. **O., dissem'inated tuber'cular,** orchitis occurring in diffuse miliary tuberculosis. **O. epidem'ica,** the name of parotitic orchitis has been given to this form because it has been observed to exist more frequently during an attack of mumps occurring in epidemic form. **O., gonorrhœ'al,** see *Hernia humoralis.* **O., gout'y,** orchitis preceding a gouty attack. **O. gummato'sa,** gummatous orchitis, a variety of syphilitic orchitis. **O., interstit'ial,** orchitis in which the interstitial connective tissue is in a hyperplastic condition and the testicle atrophied. **O., mala'rial,** orchitis occurring in individuals suffering from malaria. **O. parotit'ic,** orchitis due to metastasis observed in an attack of mumps. **O. rheumat'ica,** orchitis caused by rheumatism. **O. syphilit'ica,** orchitis due to syphilis attacking both testicles, either at the same time or consecutively. This disease is characterized by almost entire absence of pain and marked insensibility to pressure. **O., tuber'cular,** disease of a scrofulous character, in which caseation and suppuration are apt to occur, and the spermatic cord and seminal vesicles to increase in size. **O. urethra'lis,** orchitis following urethritis,

Orchitomia (or-kit-om'e-ah) or **Orchot'omy** (*orchis, tome*, incision). Castration.

Orchocele, ork-o-se'le (Eng. ork'o-seel). Orchiocele.

Or'choi (*orchos*, a row). See *Tarsus.*

Orchotom'ia or **Orchotomy**, or-kot'o-me (*orchis, tome*, section). Castration. Also removal of the tarsi.

Or'chus or **Or'chos** (*orchos*, a row). See *Tarsus.*

Orcin, or'sin. A dihydroxyltoluol found in lichens; local anæsthetic; used externally in skin diseases.

Orde'al nut. *Calabar bean, Physostigmatis faba, Calabar;* called *Esere* by the natives of Calabar; ord. Leguminosæ; the *Physostigma venenosum*, closely resembling a Dolichos. Possessed of virulent acronarcotic properties. The bean is officinal under the name *Physostigma.* It appears to be a direct sedative to the spinal cord. Internally given in the form of tincture and alcoholic extract in epilepsy, etc. Its active alkaloids are termed *Physostigmine* and *Eserine* or *Eseria.* **O. tree**, Erythrophlœum Guineense.

Orde'olum. Hordeolum.

Or'deum. Hordeum.

Or'do medicina'lis. Police, medical.

Orectic, o-rek'tik (*oregomai*, to desire). Exciting appetite.

Or'egon grape. Berberis aquifolium and other species. **O. tobac'co**, used as food by the Indians.

Ore'lia grandiflo'ra. Allamanda.

Orella'na. See *Terra Orleana.* Anotta.

Orellin, o-rel'lin. Yellow coloring matter in anotta.

Oreoselin, o-re-os'el-in. Crystalline principle from partial decomposition of imperatorin or peucedanin.

Oreoseli'num (*oros*, mountain, *selinon*, parsley). Athamanta aureoselinum. **O. Africa'num**, Bubon galbanum. **O. legit'imum**, Athamanta aureoselinum. **O. ni'grum**, Athamanta aureoselinum.

Orex'ine hydrochlo'ride. Derivation of chinoline; in colorless, odorless, bitter crystals. Used medicinally as a stomachic and digestive tonic in form of wafer. It is given in cases of loss of appetite, anæmia, tuberculosis, chronic gastric catarrh, etc.

Orex'is (*oregomai*, to desire). Appetite; pyrosis. **O. cyno'des**, boulimia.

Or'gan (*ergon*, work, instrument). Part of an organized being, destined to exercise a particular function; as the eyes are organs of sight, etc. The collection of organs which concur in any function is called an *apparatus.* Mentha pulegium. **O. albu'min**, albumin forming integral part of tissues. **O. of Cor'ti**, see *Corti.* **O., enam'el**, see *Tooth.* **O. of Giral'dès**, *Parepdidyimis, Paradidymis.* A small linear body at the upper end of the testicle in the spermatic cord, regarded by Giraldès as the remains of the Wolffian body, and analogous to the 'appendage to the ovary' of the female. **O., gus'tatory**, that part of the mouth and tongue which instructs us as to the savors of bodies. **O. of Ro'senmüller**, parovarium.

Or'gana (pl. of **Organum**) **generatio'ni inservien'tia.** Genital organs. **O. genita'lia**, genital organs. **O. sexua'lia**, genital organs. **O. sudorip'ara**, see *Perspiration.* **O. urogenita'lia**, urogenital organs. **O. uropoet'ica**, urinary organs.

Organ'ic. Relating to an organ or organs and to beings possessed of organs; to structure as opposed to function. **O. bod'ies**, the various proximate principles of the body, nitrogenous and non-nitrogenous; the former, occurring in all the tissues and fluids, and active in formation of solid constituents of the body, being chemically CHO and N; the non-nitrogenous being fats and carbohydrates.

Organic bodies may be thus classified (Manning):

Classification of Organic Bodies.

I. Nitrogenous Organic Bodies.

Proteids.	1. Native albumins found in nature,	Egg albumin, Serum albumin,	Soluble in water and coagulable by heat.
	2. Globulins found in nature,	Globulin, Paraglobulin, Fibrinogen, Myosin, Vitellin, Globin,	Soluble in sol. NaCl., 1 per cent.; coagulable by heat; nearly all precipitated by alcohol.
	3. Derived albumins, derived from Class 1 by action of acids, alkalies, or ferments,	Acid albumin, Alkali albumin, Casein,	Soluble in weak (1 per cent.) HCl sol.; not coagulable by heat; precipitated by neutralizing solution.
	4. Fibrin, from Class 1 by action of "fibrin ferment,"	Fibrin,	Insoluble in cold HCl (1 per cent.) sol., but soluble at 60° C.
	5. Coagulated albumin, by heat, etc., from Class 1,	Coagulated albumin,	Soluble in gastric juice, becoming peptones, and also in strong acids, becoming acid albumin.
	6. Peptones, by action of digestive ferments on Class 1,	Peptones,	Very soluble in water; not precipitated by heat, acids, alkalies, or alcohol. Peculiar in dialyzing freely.
Gelatins.	Gelatin, soluble in hot water. Mucin, soluble in weak alkaline solutions. Elastin, insoluble. Chondrin, soluble in hot water. Keratin, insoluble; probably a complex compound.		
Products of the decomposition of nitrogenous matter.	Crystallizable acids—*e. g.* glycin, lucin, taurin, etc. Urea and its allies—*e. g.* kreatin, uric acid, xanthin, etc. Pigments—*e. g.* bile-pigments, melanin, hæmatin, etc.		
Nitrogenous, but of uncertain composition.	Ferments—*e. g.* amylolytic, proteolytic, milk-curdling, etc.		

II. Non-nitrogenous Organic Bodies.

Fats.	Olein, liquid at ordinary temperatures. Palmatin, solid " " Stearin, " " "	(melts at 113° F.) (" 140° F.) United in fatty tissues.	Insoluble in water. Soluble in ether. " " chloroform. " " hot water. Saponify.
	Cholesterin, chemically an alcohol, but closely allied to the fats.		
Carbohydrates.	Starch, soluble in hot water, not in cold.	Not found in unchanged state in body, except as food.	Iodine test (blue color).
	Glycogen, soluble in cold water.	In liver, by dehydration, glucose.	Iodine test (red color).
	Dextrin, " " " "	Not found in body except as food.	
	Glucose, " " " "	Derived from saccharose and starch by ferment action.	All respond more or less readily to fermentation and copper tests.
	Lactose, " " " "	Found in milk.	
	Maltose, " " " "	From starch by ferments, ptyalin.	
	Inosite, " " " "	Found in muscles and in heart.	Non-fermentable with yeast.
Fatty acids.	Formic acid, Acetic " Lactic "	Found only in perspiration. " " muscle-plasma.	

O. chem'istry, see *Chemistry.* **O. com'pound,** product of vital action (sometimes of synthetic chemistry) possessing definite composition, often exhibiting crystalline structure; thus distinguished from an organized body, which exhibits no tendency to crystalline arrangement and is not invariable in composition. **O. diseases** or **le'sions,** such as concern the organ itself, in contradistinction to functional, rational, or dynamic diseases or lesions, which merely concern the function. Of course, organic diseases of a part are always more serious than functional. **O. func'tions** are those possessed by both animals and vegetables. The word organic, as well as *teleorganic,* is also used synonymously with *vital,* in contradistinction to *physical.* **O. life,** Bichat's term for some of the functions common to living animals and vegetables, as opposed to those he supposed peculiar to animals. **O. ner'vous sys'tem,** see *Trisplanchnic nerve.* **O. re'flexes,** those connected with organic actions, as defecation, erection, digestion, etc.

Organ'icism. Doctrine of the localization of disease, or which refers it always to a material lesion of an organ. It is the antithesis of *vitalism.* The great principle of the supporters of the former doctrine is that life is the result of organization.

Organisa'tio. Organization.

Organisa'tus. Organized.

Or'ganism. The living economy. Many physiologists have used this word synonymously with organization; but it more especially designates the aggregate of vital actions in organized beings, animal as well as vegetable. The collection of parts composing an organized body and the laws which govern it.

Or'ganite. An elementary organ—a blood-corpuscle, for example.

Organizabil'ity (*organisatio, habilis,* suitable). Capability of organization or of being formed into living tissue. Substances possessed of such capability —as fibrin—are said to be *organizable.*

Organiza'tion. The manner of structure proper to different beings. Also employed in the sense of the structure of a part; as the organization of the heart, etc. **O., com'pounds of,** principles, immediate.

Or'ganized. That which is composed of organs. **O. bod'ies,** those endowed with life—*i. e.* animals and vegetables—in contradistinction to inorganic bodies, which comprise the mineral kingdom. See *Corpus.*

Organochemia, or-gan-o-kem-e'ah. Organic chemistry.

Organogen'esis (*organ, genesis,* generation). Doctrine of the formation and growth of organs.

Organogenetic, or-gan-o-jen-et'ik. Relating to organogenesis.

Organogenic, or-gan-o-jen'ik. Relating or appertaing to organogeny.

Organogeny, or-gan-oj'en-e (*organ, genesis,* generation). Doctrine of the formation of different organs.

Organognosia, or-gan-og-no'ze-ah (*organ, gnosis,* knowledge). Knowledge and discrimination of organized bodies.

Organog'raphy (*organ, graphe,* description). A description of the organs of the living body.

Organoid, or'gan-oid. Virchow's term for tumors consisting of a number of tissues.

Organolep'tic (*organ, lepsis,* action of receiving). Plastic.

Organol'ogy (*organ, logos,* description). Anatomy; craniology. Description of the various organs of the body.

Or'ganon. Organ. **O. adamanti'næ,** enamel organ. **O. audi'tûs,** the ear. **O. gus'tûs,** organ, gustatory. **O. innomina'tum,** pancreas. **O. Köllikeri,** cylindrical epithelial cells lining sulcus spiralis internus. **O. olfacto'rium,** organs, olfactory. **O. pneuma'ticum,** pedunculus. **O. tac'tûs,** organ or sense of taste, one of the five senses, which makes known to us the palatable qualities of bodies. **O. vi'sûs,** the eye.

Organonomia (or-gan-o-nom'e-ah) or **Organon'omy** (*organ, nomos,* law). Doctrine of the laws of organic life.

Organopalinclasis, or-gan-o-pal-in'klas-is (*organon, palin,* again, *klasis,* a breaking). See *Refracture.*

Organopathia, or-gan-o-path-e'ah. Morbid condition in which a structural change in the affected part exists.

Organop'athism (*organ, pathos,* affection). *Organopathology.* Doctrine of organopathies or of organopathic states of Piorry, which consists essentially in studying the pathological condition of the organs in each individual case.

Organopathy, or-gan-op'ath-e. Organopathism. Local action of drugs.

Organoscopy, or-gan-os'ko-pe (*organ, skopeo,* to examine). See *Craniology.*

Organotrophic, or-gan-o-tro'fik (*organ, trepho,* to feed). Relating or appertaining to the organization, nutrition, or creation of living parts.

Organozoönomia, or-gan-o-zo-on-o'me-ah (*organ, zoön,* animal, *nomos,* law). Zoönomia.
